- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.6. Peaches, Maturity.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No 2).
- 2. Amendment and renumbering from Section 1449 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 5–4–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.7. Peaches, Blossom Tip Bruising.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1447 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 5–4–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.8. Peaches, Bruising.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1448 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.9. Peaches, Split Pits.

NOTE: Authority cited: Sections 407 and 42684. Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1446 through 1449 filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- Renumbering from Section 1446 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 8–31–76; effective thirtieth day thereafter (Register 76, No. 36).
- Repealer filed 5–4–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.10. Peaches, Marking Requirements.

In addition to the basic marking requirements of Section 1359, every nonconsumer container of fresh peaches shall be clearly and conspicuously marked with the following information:

- (a) A numerical size description as established in Section 1454.16(c). This requirement shall apply only to volume or loose–filled nonconsumer containers.
- (b) The count description if the peaches are packed in trays or uniform layers or rows.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1449.13 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).
- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).
- 4. Editorial correction of section heading (Register 84, No. 33).
- 5. Amendment filed 7-14-2000; operative 8-13-2000 (Register 2000, No. 28).
- Amendment of first paragraph, repealer of subsection (a) and subsection relettering filed 4–13–2006; operative 4–13–2006 pursuant to Government Code section 11343.4 (Register 2006, No. 15).

§ 1454.11. Peaches, Four-Basket Crates.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1449.14 filed 1–21–5; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.12. Peaches, Variation in Count Tolerance.

HISTORY

- 1. Renumbering from Section 1449.15 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1454.13. Peaches, Cup Pack.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 5–4–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.14. Peaches, Standard Container Requirements.

Peaches shall be in containers 5, 9B, 10A, 12B, 22D, 22E, 22G, 22H, 22I, 31, 32, 33, 34, 35, or 36. Container 31 shall only be standard for peaches which are placed in molded forms.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–6–77; effective thirtieth day thereafter (Register 77, No. 19). For prior history, see Register 76, No. 12.
- 2. Amendment filed 6–23–78; effective thirtieth day thereafter (Register 78, No. 25)
- 3. Amendment filed 11–25–80; effective thirtieth day thereafter (Register 80, No. 48).
- 4. Amendment filed 5–4–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).
- Amendment filed 5–5–86; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 86, No. 19).
- 6. Amendment filed 4-16-87; operative 4-20-87 (Register 87, No. 16).
- 7. Amendment filed 5-29-97; operative 6-28-97 (Register 97, No. 22).
- 8. Amendment filed 6-17-98; operative 7-17-98 (Register 98, No. 25).
- Amendment of section and Note filed 5–29–2002; operative 5–29–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 22).
- 10. Amendment filed 8–26–2003; operative 8–26–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 35).

§ 1454.15. Peaches, Molded Forms in Standard Containers.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1449.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.16. Peaches, Size Variation and Tolerance, and Size Description Requirements.

- (a) Packed peaches shall not vary in size between the fruits in any container more than 3/8 inch in diameter when measured through the widest portion of the cross section of the fruit.
- (b) Size variation shall not exceed 5 percent, by count, in any container.
- (c) Peaches in volume-filled nonconsumer containers marked with one of the size descriptions established below in Column A shall comply with the corresponding requirement in Column B:

	Column B
Column A	Maximum Number of Fruit
Size Description	in a 16 lb Sample
108	108
96	96
88	92
84	83
80	77
72	69
70	65
64	58
60	53
56	48
54	46
50	43
48	41
44	37
42	34
40	32
36	29
34	28
32	25
30	23
28	21
26	20

For sizes smaller than 108 size, the maximum number of peaches in a 16-pound sample shall be equal to the number of peaches that would be packed in the corresponding tray-pack size. For example, a 130 tray-pack size would have a maximum of 130 peaches in a 16-pound sample.

(d) Peento type peaches in volume-filled nonconsumer containers marked with one of the size descriptions established below in Column A shall comply with the corresponding requirement in Column B:

Column A	Column B Maximum Number of Fruit
Size Description	in a 16 lb Sample
80 '	140
72	128
70	111
64	99
60	93
56	87
54	80
50	77
48	74
44	70
42	68
40	59
36	53
34	50
32	39
30	32

For sizes smaller than 80, no weight/count has been assigned, and are exempt from this Section.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 14491.12 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).
- Amendment of section heading and new subsection (c) filed 7–14–2000; operative 8–13–2000 (Register 2000, No. 28).
- Amendment of subsection (c) filed 4–15–2005; operative 4–15–2005 pursuant to Government Code section 11343.4 (Register 2005, No. 15).
- 5. New subsection (d) filed 3–27–2007; operative 4–26–2007 (Register 2007, No. 13).

§ 1456.18. Pears, Uniform in Size.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New sections 1452.3 through 1452.5 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from section 1452.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 10–19–84; effective thirtieth day thereafter (Register 84, No. 42).
- Repealer filed 7-27-92 as an emergency; operative 7-27-92 (Register 92, No. 31). A Certificate of Compliance must be transmitted to OAL 11-24-92 or emergency language will be repealed by operation of law on the following day.

§ 1456.19. Pears, Variation in Count Tolerance.

HISTOR'

- 1. Renumbering from Section 1452.5 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

Article 36. Peas

§ 1458. Peas, Overmature.

"Overmature" means that more than one-third of the surface of the pea pod is wrinkled, shriveled, or yellowed.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1458.1. Peas, Standards.

Pods of peas shall not be poorly filled or overmature and shall be free from:

- (a) Insect larvae.
- (b) Serious damage due to insects, freezing, mildew, decay, or other causes. Damage is serious when 20 percent or more of the peas in the pod are affected.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1458.2. Peas, Poorly Filled.

Pods of peas are poorly filled if one-half or more of the pod is filled with undeveloped peas.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Repealer and new section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 12)

§ 1458.3. Peas, Damage.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

History

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 3-22-83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1458.4. Peas, Tolerances.

Not more than 10 percent, by weight, of the pods in any one container or bulk lot may be below the requirements prescribed by this article. Not more than one-half of this tolerance shall be allowed for any one cause. The percentage shall be based on a random sample of not less than 10 percent, by weight, of the peas in any one container or bulk lot.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

Article 37. Oriental Persimmons

§ 1460. Persimmons, Standards.

Persimmons shall be mature, at time of picking, but not overripe, and shall be free from the following defects:

- (a) Mold and decay.
- (b) Serious damage due to cuts, bruises, broken skin, growth cracks, hail, or other causes. Damage is serious when it wastes 10 percent, by volume, of an individual persimmon.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–1–75; effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 74, No. 34.
- 2. Amendment filed 10–5–83; effective thirtieth day thereafter (Register 83, No. 41).

§ 1460.1. Persimmons, Maturity.

A persimmon shall be considered mature when its outside surface meets the following color requirements:

- (a) Persimmons of the Hachiya Variety: The blossom end has attained an orange or reddish color equal to or darker than Munsell Color Chart 6.7YR—5.93/12.7 on at least one—third of the length of the fruit measuring in a straight line from the blossom end to the stem end with the remaining two—thirds a green color equal to or lighter than Munsell Color Chart 2.5GY 5/6 (Lot #10114D).
- (b) Persimmons of other varieties: When they have attained a yellowish–green color equal to or lighter than Munsell Color Chart 10Y 6/6 (Lot #7138).

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41).

§ 1460.2. Persimmons, Maturity.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 9-12-69 as an emergency; effective upon filing. Certificate of compliance included (Register 69, No. 37).
- 2. Amendment and renumbering from Section 1453 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41).

§ 1460.3. Persimmons, Tolerances.

Not more than 10 percent, by count, of the persimmons in a container or bulk lot, may be below the requirements prescribed by this article. Not more than one-half of this tolerance shall be allowed for any one cause. Note: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

2. Amendment filed 10–5–83; effective thirtieth day thereafter (Register 83, No. 41)

§ 1460.4. Persimmons, Size Variation.

Packed persimmons shall not vary in any one container more than one-half inch in diameter when measured through the widest portion of the cross-section of the persimmons.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Section filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1453.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41)

Article 38. Plums and Fresh Prunes

§ 1462. Plums and Fresh Prunes, Exceptions.

This Group does not prohibit any person, under a permit issued pursuant to this Article, from transporting out of the state plums and fresh prunes which fail to comply with the quality, packing, container, or marking requirements of this Group, if both of the following requirements are satisfied:

- (a) The permit is issued for and is attached to each load or lot transported.
- (b) The plums and fresh prunes are loose in containers which are not closed, or in bins each holding 200 pounds or more of the plums and fresh prunes.

NOTE: Authority cited for Article 38: Sections 42 and 43, Chapter 1404, Statutes of 1974 and Sections 407, 42681, 42682 and 42684 Food and Agricultural Code. Reference: Sections 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 67, No. 23.
- 2. Amendment filed 5–12–78; effective thirtieth day thereafter (Register 78, No. 19).

§ 1462.1. Plums and Fresh Prunes, Permits.

The permit may be issued by the commissioner of the county from which the plums and fresh prunes are to be transported if such commissioner has satisfactory verification by a like officer of the state of destination that the plums and fresh prunes are to be transported to a purchaser for commercial processing, preserving, or manufacturing on the premises of the purchaser. Such verification shall include a statement that such official will report to the commissioner who issued the permit as to the commercial processing, preserving, or manufacturing use to which the plums and fresh prunes so transported under the permit were actually put by the purchaser of the plums and fresh prunes.

HISTORY

New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 67, No. 23.

§ 1462.2. Plums and Fresh Prunes, Standards.

Plums and fresh prunes shall be mature, but not overripe, and shall be free from any of the following defects:

- (a) Insect injury which has penetrated or damaged the flesh.
- (b) Unsealed skin breaks or cuts, mold, brown rot, or decay.
- (c) Serious damage which is due to bruises, growth cracks, sunburn, hail, doubles, insects, internal growth cracks, cavities, gum spots, or other causes.

HISTORY

 New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.4). For former section, see register 67. No. 23.

§ 1462.3. Plums and Fresh Prunes, Defects.

Damage to any one plum or fresh prune is serious if it is caused by any of the following:

(a) Bruises which affect the flesh more than three-sixteenths of an inch in depth or more than an aggregate surface area of one-half of an inch in diameter.

- (b) Growth cracks over one-half of an inch in length or over three-sixteenths of an inch in depth, except that healed growth cracks within the stem end cavity are not serious damage unless they are over five-eights of an inch in length or over three-sixteenths of an inch in depth.
 - (c) Sunburn which affects the flesh.
- (d) Hail which results in one or more depressions over three-sixteenths of an inch in depth or which affects more than an aggregate surface area of one-half of an inch in diameter.
- (e) Doubles, if one portion is one-fourth or less in size than the other portion of the plum or fresh prune.
- (f) Thrip marks or other similar insect injury if 15 percent or more of the surface of the plum or fresh prune is affected or which causes one or more depressions or raised portions (bumps or welts) one-fourth of an inch or more in depth or height.
- (g) Internal growth cracks, cavities, or gum spots if they cause the plum to be seriously malformed.

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No.

§ 1462.4. Plums, Immaturity.

After plums have been picked and stored for some time, they will increase in color. They do not increase in maturity regardless of the color, and therefore whenever a lot of plums arrives at the packing house and is immature, it must be reconditioned immediately. It would be impossible within a relatively short period of storage to determine which of the individual plums were immature unless sorting is done upon arrival at the packing house.

HISTORY

1. Renumbering from Section 1457 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1462.5. Plums, Heat Damage.

Hot weather sometimes causes internal damage to plums. This does not come under the classification of "sunburn," defined in Section 1462.2. The provision of Section 1462.2 which does apply is "serious damage due to . . . other causes." Such heat damage shall not be considered serious unless the flesh affected is dark brown to black in color, and affects at least 10 percent of the volume of the individual fruit.

HISTORY

- 1. Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from Section 1458 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1462.6. Plums and Fresh Prunes, Tolerances.

(a) Not more than 10 percent, by count, of the plums or fresh prunes in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause. Individual containers in any lot may, however, contain not more than 1 1/2 times the tolerances which are specified if the percentage of defects of the entire lot averages within the tol-

(b) In addition to the tolerance specified for any one cause, containers of plums or fresh prunes which are conspicuously marked "hail marked" shall be permitted a tolerance of 10 percent for hail damage, provided that no hail mark permitted under such additional tolerance may exceed 3/8 inch in depth, or exceed an aggregate area of 3/4 inch in diameter. Individual containers shall not have more than 17 1/2 percent hail damage (7 1/2 percent for any one cause plus 10 percent under the additional toler-

HISTORY

- 1. New sections 1455 through 1458 filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment of subsection (a) filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2)
- 3. Amendment and renumbering from section 1455 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment of subsection (b) filed 11-8-78; effective thirtieth day thereafter (Register 78, No. 45).
- 5. Amendment of subsection (b) filed 5-15-91 as an emergency; operative 5-15-91 (Register 91, No. 26). A Certificate of Compliance must be transmitted to OAL by 9-12-91 or emergency language will be repealed by operation of law on the following day.
- 6. Repealer filed 4–23–92; operative 4–23–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 20).

§ 1462.9. Plums, Maturity.

Column A

(a) The varieties of plums listed in Column A, to be considered mature as required by Section 1462.2, shall at least comply with the minimum standard specified in Column B opposite each variety name.

Column B

1. Ace	1/2 of surface mottled red color characteristic of the variety, or 3/4 red or light amber flesh color.
2. Abundance	Full greenish yellow, or trace of red.
3. Apex	Full greenish yellow, or trace of red.
4. Beauty	85 percent of surface yellowish green, or trace of red.
Becky Smith	Full yellow, or trace of red.
6. Blue Giant	2/3 surface blue color, or full light greenish yellow.
7. Botan	Full greenish yellow, or trace of red.
8. Bradshaw	1/4 surface blue color, or full light greenish yellow.
9. Burbank	Full light greenish yellow, or 1/2 of surface red color.
10. Burmosa	Full yellowish green, or 1/2 of surface red color.
11. Burton Mammoth	Full light yellowish green, or trace of red.
12. Casselman	3/4 of surface distinct red color, or full light yellow color.

13. Climax 85% of surface light yellowish green, or trace of red.

14. Clyman Full light green, or trace of red. 15. Del Norte 1/4 surface red color, or full light greenish

Diamond 1/2 of surface blue color, or full light greenish yellow.

17. Duarte 1/2 of surface mottled red color characteristic of the variety, or 3/4 red or light amber flesh color.

18. Earliana 1/2 surface blue color, or full light greenish

19 El Dorado Shoulders smooth with good "spring." Full dark red surface color, or part red and rest of surface yellow color.

20. El Dorosa 1/2 red surface color, or full light greenish

21. Elephant Heart 1/2 of surface mottled red color characteristic of the variety, or 3/4 red or light

amber flesh color. 22. Emily 3/4 of surface red color, or full light greenish

23. Empress Full dark purplish blue, or 75% dark purplish blue, remainder light greenish yellow 24. Fallenberg 3/4 of surface purple, or full light greenish

(American blue, or yellow. German prune) Formosa Full light greenish yellow, or trace of red. Gaviota Full yellowish green, or trace of red.

HISTORY

- 1. Renumbering from Section 1458.6 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1462.20. Plums and Fresh Prunes, Minimum Diameter Definitions.

Minimum diameter means the smallest diameter measured through the center of the plum or fresh prune at a right angle to a straight line that is drawn from the stem end to the distal end of the fruit.

NOTE: Authority cited: Sections 14, 407, and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1458.7 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment of subsection (b) and adoption of Note filed 4-23-92; operative 4-23-92 pursuant to Government Code section 11346.2(d) (Register 92, No. 20).
- 3. Amendment of section heading and section filed 6-21-95; operative 7-21-95 (Register 95, No. 25).

Article 39. Pomegranates

§ 1464. Pomegranates, Standards.

Pomegranates shall be mature and free from the following defects:

- (a) Rot and decay.
- (b) Serious damage which is due to sunburn, growth cracks, cuts, bruises, or other causes.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 67, No. 23.
- 2. Amendment filed 8-18-83; designated effective 8-25-83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

§ 1464.1. Pomegranates, Serious Damage.

Damage, except damage caused by sunburn, is serious when it causes a waste of 10 percent, by volume, of the fruit. Damage caused by sunburn is serious when 20 percent of the seed arils of the fruit fail to show the characteristic reddish color of normal matured fruit.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- 2. Amendment filed 8-18-83; designated effective 8-25-83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

Pomegranates, Sampling to Determine Compliance or Noncompliance.

- (a) Compliance or noncompliance with the quality requirements of this Article shall be determined in accordance with Table 1 and applicable procedures stated in subsection (b), below.
- (b) In applying Table 1, the number of sample containers and fruits shall be selected at random. A lot shall be considered in compliance or noncompliance in accordance with the number of defects established for any one cause or combination of causes in each step. When the number of defects in one or more steps is:

- (1) Equal to or less than the numbers in Column A, the lot shall be passed.
- (2) Equal to or more than the numbers in Column B, the lot shall be rejected.
- (3) More than the numbers in Column A but less than those in Column B, the next step shall be completed. The sample fruits and defects from all steps shall be combined in determining whether to pass or reject a lot.

TABLE 1. DEFECT SAMPLING PLAN

				Scoreable Defects			
				Any One		Combination	
		Fruit Per		Cause		of Cause	
Step	Containers	Container S	ample Size	A*	B^{**}	A *	B^{**}
1	2	10	20	0	4	1	6
2	2	10	40	1	5	3	8
3	2	5	50	2	6	4	10
4	2	5	60	3	7	6	11
5	2	5	70	4	8	7	12
6	2	5	80	5	8	9	13
7	2	5	90	6	8	10	13
8	2	5	100	7	8	12	13

^{*} Compliance

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- 2. Amendment filed 7-16-81; effective thirtieth day thereafter (Register 81, No. 29).
- 3. Amendment filed 8-18-83; designated effective 8-25-83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

§ 1464.3. Pomegranates, Maturity Defined.

Pomegranates shall be considered mature when both of the following requirements are satisfied:

- (a) The juice from a composite sample of at least 10 percent of the fruit in any container does not exceed 1.85 percent of acid.
- (b) The juice is a shade of red equal to or darker than Munsell Color Chart 5R–5/12, Lot 8730.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- 2. Amendment filed 8-18-83; designated effective 8-25-83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

Pomegranates, Testing Procedures to Determine Maturity.

To determine whether the juice meets the standard set forth in Section 1464.3, select sample containers from the lot at random in accordance with Section 1370.8. Take 10 percent of the fruit at random from each

When the lot to be tested is in bulk, select the number of pomegranates which would have been selected if the pomegranates had been packed in standard container No. 22C as defined in Section 1380.19.

Extract, combine, strain, and thoroughly mix the juice from the pomegranates selected for the sample. Place 10 c.c. of juice in a flask. Add 100 c.c. of water and 10 drops of phenolphthalein indicator solution. With the use of a pipette, add sodium hydroxide solution (.1562N). As sodium hydroxide is added, the reddish color of the juice will turn white and then to a pink shade. When this occurs, divide the amount of sodium hydroxide used by ten to determine the percent of acid.

NOTE: Authority cited: Sections 407, 42681 and 42684 Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

^{**} Noncompliance

- Amendment filed 8–18–83; designated effective 8–25–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

Article 40. Potatoes

§ 1466. Potatoes, Exceptions for By-Products Use.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 67, No. 27.
- 2. Repealer filed 10-9-84; effective thirtieth day thereafter Register 84, No. 41).

§ 1466.1. Potatoes, Requirements for Out-of-State Processing.

In addition to the requirements of Section 1390.14, potatoes which are being transported out of state for processing, preserving, or manufacturing shall be loose in bins that will hold 500 pounds or more, or in bulk loads. Containers holding 100 pounds or less may be used provided such containers are marked in three–inch letters with the words "processing potatoes."

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 10–9–84; effective thirtieth day thereafter (Register 84, No. 41).

§ 1466.2. Potatoes, Verification for Permit.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 2. Repealer filed 10-9-84; effective thirtieth day thereafter (Register 84, No. 41).

§ 1466.3. Potatoes, Board of Supervisors Establish Fee Schedule.

The board of supervisors of the county from which the potatoes are to be transported pursuant to the provisions of this article shall establish a schedule of fees, which shall be based upon the cost to the county in carrying out the provisions of this article, to be paid by any person who requests a permit under this article. Such fees shall be deposited in a county fund and be used for carrying out the provisions of this article.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. New NOTE filed 10-9-84 (Register 84, No. 41).

§ 1466.4. Potatoes, Standards.

Except as otherwise provided in this article, potatoes shall conform to the United States No. 2 grade or better. However, potatoes less than 1 1/2 inches in diameter shall not be considered as meeting a U.S. grade unless:

- (1) containers are marked to specify the diameter in connection with the grade marking; and
- (2) not more than 10 percent, by weight, of the potatoes in each container so marked shall exceed 1 7/8 inches in diameter.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- $2.\ Repealer\ filed\ 10-9-84; effective\ thirtieth\ day\ thereafter\ (Register\ 84,\ No.\ 41).$

§ 1466.7. Potatoes, Markings for Processing in This State.

Notwithstanding any provision of Section 1390, all potatoes, in containers designed to hold 100 pounds or less of potatoes, destined for processing in this state that fail to meet United States No. 2 grade size and

Page 199 (4-1-90)

maturity standards established by the Article shall be clearly and conspicuously marked with a statement of responsibility (name and address). In addition, each container of such potatoes shall also have printed or stenciled on it in three—inch letters the full unabbreviated words "processing potatoes," and such potatoes shall only be used for processing purposes.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 5–31–85; effective thirtieth day thereafter (Register 85, No. 22).

§ 1466.8. Potatoes, Decay, Soft and Wet Rots.

All decay, or soft and wet rots, regardless of the name or type, and without regard to the size of the tuber, shall cause the tuber to be rejected when there has developed a soft or mushy condition in the tissue.

A defect, such as jelly-end, would be considered as decay, only when it causes the flesh to be soft, or mushy, however, when this defect is still glassy and firm, it would have to cause 10 percent waste on the individual potato before being considered serious.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Amendment filed 6-7-67; effective thirtieth day thereafter (Register 67, No. 23).
- 2. Renumbering from Section 1463 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. New NOTE filed 10-9-84 (Register 84, No. 41).

§ 1466.9. Potatoes, Method of Inspection.

In the inspection of a carload of potatoes (300 sacks) of 100–pound sacks, *all* the potatoes in at least 6 sacks shall be inspected. In the case of smaller sized sacks, a proportionate number of sacks shall be selected for inspection (that is, 50–pound sacks, 12 sacks inspected).

If internal defects not discernible from external examination are present, cut at least 20 pounds of potatoes, taken at random, from each of the sacks. If the 20 pounds so examined reveal less than the tolerance permitted, this should be sufficient to consider the lot passable. However, if a percentage found in this 20–pound sample exceeds the tolerance permitted, an additional 30 pounds shall be taken at random and cut in a like manner. The total taken shall not exceed 50 pounds of a 100–pound sack. Proportionate amounts shall be used in the case of smaller sacks.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1465 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 5–31–85; effective thirtieth day thereafter (Register 85, No. 22).
- 3. Editorial correction of printing error (Register 85, No. 31).

§ 1466.10. Potatoes, Certified for Seed Purposes.

Potatoes for seed purposes, unless certified pursuant to the Food and Agricultural Code, Chapter 3 (commencing with Section 52651), Division 18, shall comply with all of the requirements of this group which relate to potatoes.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. New NOTE filed 10-9-84 (Register 84, No. 41).

§ 1466.11. Potatoes, for Seed, Exemption for Greening and Green Ends.

Potatoes failing to meet standards for serious damage due to greening and green ends may be used for seed purposes within the state, if:

(a) containers are marked for seed purposes, or

(b) accompanied by a warning notice directing disposition for seed purposes.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 10–9–84; effective thirtieth day thereafter (Register 84, No. 41).

§ 1466.12. Potatoes, for Seed Purposes, Under Notice and Order.

NOTE: Authority cited: Sections 407 and 42884, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 10-9-84; effective thirtieth day thereafter (Register 84, No. 41).

§ 1466.13. Name and Address Requirements.

HISTORY

- New section filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1468.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1466.14. Grade Marking Requirements.

All containers of potatoes holding less than 50 pounds shall be marked with one of the grade markings for potatoes established by the United States Department of Agriculture. Open containers need not be marked with one of the grade markings when they are part of an open display of potatoes which is marked with one of the grade markings. The potatoes in such containers shall meet the grade marked on the open display.

HISTORY

- New section filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1468.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. New NOTE filed 10-9-84 (Register 84, No. 41).

§ 1466.15. Potatoes, Definition of Mislabeling.

Mislabeling means any of the following:

- (a) Incomplete designations of U.S. Grade terms. For example, "U.S. No." is incomplete and shall be obliterated with a solid black line at least one-half the height of the term, or shall be completed, such as "U.S. No. 1";
- (b) U.S. Grade terms which do not exist in the U.S. Grades for Potatoes. For example, the term "U.S. Fancy No. 1"; and
- (c) Use of a percentage figure with the term "U.S. No. 1" unless both of these designations are preceded by the term "U.S. Commercial." For example, "U.S. Commercial, 85% U.S. No. 1."

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42943, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 10–9–84; effective thirtieth day thereafter (Register 84, No. 41).

§ 1466.16. Potatoes, Photographs, Serious Damage.

NOTE: Authority cited: Sections 407 and and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- New section filed 6-7-67; effective thirtieth day thereafter (Register 67, No. 23).
- 2. Renumbering from Section 1468.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 10-9-84; effective thirtieth day thereafter (Register 84, No. 41).

§ 1466.17. Potatoes, Maturity Requirements.

Potatoes shall be mature.

Page 200 (4-1-90)

(a) Mature potatoes are those which are not more than slightly skinned. "Slightly skinned" is defined as a potato with not more than one-fourth of the skin missing or feathered.

Not more than 15 percent, by weight, of the potatoes in a lot may be more than slightly skinned. Individual containers shall be permitted 30 percent, provided the lot averages 15 percent or less.

(b) Exception. Potatoes in containers labeled U.S. No. 2 need not comply with the skinning requirements of this section.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–29–75 as an emergency; effective upon filing (Register 75, No. 18).
- 2. Certificate of Non-Compliance (repealer by operation of Section 11422.1, Gov.C.) filed 8-21-75 (Register 75, No. 34).
- 3. New section filed 4–9–76 as an emergency; effective upon filing (Register 76, No. 15).
- 4. Certificate of Compliance filed 8-5-76 (Register 76, No. 32).

- 6. Amendment of NOTE filed 10-9-84 (Register 84, No. 41).

Article 41. Quinces

§ 1468. Quinces, Standards.

Quinces shall be mature, but not overripe, and shall be free from the following defects:

- (a) Insect injury which has penetrated or damaged the flesh.
- (b) Mold and decay.
- (c) Serious damage due to cuts or skin breaks, bruises, cracks, scab, disease, hail, or other causes. Damage is serious when it causes a waste of 10 percent or more, by volume of the individual quince.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13)

§ 1468.1. Quinces, Tolerances.

Not more than 10 percent, by count, of the quinces in any one container or bulk lot may be below the requirements prescribed by this article. Not more than one—half of this tolerance shall be allowed for any one cause. Note: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1468.2. Quinces, Size Variation.

Packed quinces shall not vary in size in any one container more than one-half inch in diameter when measured through the widest portion of the cross section of the quinces.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).3. Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 4. Amendment and Renumbering from section 1470 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).
- Repealer filed 10–26–92; operative 10–26–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 44).

§ 1470.2. Sweet Potatoes, Tolerances.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13)
- Repealer filed 10–26–92; operative 10–26–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 44).

§ 1470.3. Markings on Containers.

HISTORY

- Renumbering from Section 1470.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1470.4. Unlawful Grade Markings.

HISTORY

- 1. Renumbering from Section 1470.5 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1470.5. Sweet Potatoes, General Provisions for Standard Containers and Packs.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New sections 1470.1 through 1470.5 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- Renumbering from Section 1470.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1470.6. Standard Container Numbers.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1470.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 3-22-83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1470.7. Standard Container Requirements.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1470.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).
- 3. Repealer filed 10–26–92; operative 10–26–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 44).

Article 43. Tomatoes

§ 1472. Tomatoes, Standards.

Tomatoes shall be mature, but not overripe, and shall be free from:

- (a) The following defects:
- (1) Mold, decay, wet or soft rot, dirt, manure, bird or animal droppings that adhere to the surface of the tomato.
- (2) Pinworm penetrating beyond the tissue making up the base of the core of the tomato.
 - (3) Other insect injury which has penetrated or damaged the flesh.
- (b) Serious damage due to freezing, blossom end rot, mosaic, alkali spot, sunscald, bruises, catfaces, growth cracks, or other causes. Damage is serious when it wastes 10 percent, by volume, of the individual tomato. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 25, No. 4). For former section, See Registers 74, No. 27 and 55, No. 10.
- Amendment filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41).
- 3. Amendment of subsection (a) filed 5–18–2006; operative 5–18–2006 pursuant to Food and Agriculture Code section 42802 (Register 2006, No. 20).

§ 1472.1. Tomatoes, Growth Cracks.

Growth cracks generally affect the stem end of the tomato. To determine the amount of waste caused by this defect, the normal method used in preparing the tomato for table use is a practical method of removing the damaged portion. In instances where there are three or more growth cracks, cut or slice under the affected portion from the point of the longest growth crack to remove the damage. The cut may have more depth to include portions of the defect which penetrates more deeply, or less depth where damage is not as deep.

In other instances where there are one or two growth cracks, opposite each other, gouge out the damaged portion. In the case of other combinations of cracks, use the same principle.

Growth cracks may also extend in a complete or partial circle on the top half (stem end or shoulder), in which case the method described in the first paragraph above is suggested.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New sections 1471, 1471.1 and 1472 filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1471 filed 1–26–75; effective thirtieth day thereafter (Register 75, No. 4). For prior history, see Register 71, No. 2.
- 3. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 1472.2. Tomatoes, Catfaces.

Catfaces generally affect the blossom end of the tomato, and they take such varied twists and gnarls that only a general principle is suggested.

In some instances, scarred tissue considered damaged can be removed by slicing it off; if so, such flesh or tissue can be added to determine if 10 percent, by weight, has been damaged from this defect. In other instances when you cannot see the full depth of the catface, it may be necessary to halve the tomato and with a slanting cut (similar in some respects to that suggested for growth cracks), slice off from each half the affected portion and add it to the weight of the defective tissue.

In either method, only include in the defective portion, the pulp or tissue which has the abnormal rough growth characteristic of a catface. Distortion in the shape of the tomato alone cannot be considered as damage. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1471.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 1472.3. Tomatoes, Tolerances.

Not more than 10 percent, by weight, of the tomatoes in any one container or bulk lot may be below the requirements prescribed by this article. Not more than one-half of this tolerance shall be allowed for any one cause.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75: effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 74, No. 7.
- 2. Amendment filed 10–5–83; effective thirtieth day thereafter (Register 83, No. 41).

§ 1472.4. Tomatoes, Marking Requirements.

In addition to basic marking requirements of Section 1359, every nonconsumer container of tomatoes shall be marked with a grower and lot identification code to enable traceback. Every nonconsumer type container of tomatoes of the Roma, "saladette", or "plum" type shall be clearly and conspicuously marked with a weight statement of 25 lbs. accompanied by the words "net weight" or "net wt."

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 5–18–93; operative 6–17–93 (Register 93, No. 21). For prior history, see Register 75, No. 18.
- 2. Amendment filed 5–18–2006; operative 5–18–2006 pursuant to Food and Agriculture Code section 42802 (Register 2006, No. 20).

§ 1472.5. Tomatoes, Vine Ripened Defined.

Tomatoes labeled with the term "vine ripened" shall be considered mislabeled unless the skin surface or the flesh of each tomato has attained some discernible degree of pink or red color at the time of harvest.

NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Sections 42941 and 42943, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–20–59; effective thirtieth day thereafter (Register 59, No. 12).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Renumbering from Section 1371.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 74, No. 27.
- 4. Amendment filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41).
- Amendment of section heading, section and Note filed 8–10–2004; operative 9–9–2004 (Register 2004, No. 33).

§ 1472.6. Tomatoes, Standard Container Requirements.

All green tomatoes which are not wrapped shall be in standard container numbers 22C, 53, 54, 55, 56, 56A, 57, 57A, 57B, 57C, or 57D.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–23–78; effective thirtieth day thereafter (Register 78, No. 25). For prior history, see Register 75, No. 44.
- 2. Amendment filed 5–19–82; effective thirtieth day thereafter (Register 82, No. 21)

§ 1472.7. Tomatoes, New Container Requirements.

All tomatoes shall be in new and unused containers. This provision shall not apply to tomatoes that are reconditioned and repacked into the original containers by the original packer of the tomatoes, or to tomatoes that are reconditioned and repacked by a commercial repacker who is registered with the Secretary of the Department of Food and Agriculture as provided in Section 1472.7.1.

NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New Sections 1472.1 through 1472.9 filed 1–4–71 as an emergency, effective upon filing. Certificate of Compliance included (Register 71, No. 2).

- 2. Renumbering from Section 1472.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For former section, see Register 74, No. 27.
- 3. Repealer filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41).
- 4. New section filed 2-2-95; operative 3-6-95 (Register 95, No. 5).
- 5. Editorial correction of cross reference section number 1472.4.1 to 1472.7.1 (Register 95, No. 6).

§ 1472.7.1. Tomatoes, Registration of Commercial Repackers.

- (a) A commercial repacker is a person or firm who is engaged in repacking of tomatoes in used containers, and has facilities for receiving, storing, and grading tomatoes. Every commercial repacker shall register with the Secretary of the Department of Food and Agriculture. Registration shall be on a Department form and shall include only the following:
- (1) The name, address (including zip code), and telephone number of the repacking company;
 - (2) The name of the principal owner(s) of the repacking company.
- (3) The address of each location where the tomatoes are being repacked.
- (b) Registration shall be valid for one year beginning April 1 and ending March 31 of the following year.
- (c) To be approved by the Secretary, repacking facilities shall have the following:
 - (1) Lighting adequate for inspection by an enforcing officer;
 - (2) Tables for grading and sorting tomatoes;
 - (3) A drinkable water supply;
- (4) Approved weighing scales for assuring quantity of containers packed to net weight.

NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 2-2-95; operative 3-6-95 (Register 95, No. 5).

§ 1472.7.2. Tomatoes, Registration of a Handler.

- (a) For purposes of this section, a handler is any individual or company that engages in the operation of selling, marketing, or distributing tomatoes that have been produced, purchased, or acquired from a producer, and are first marketed on behalf of a producer, whether as an owner, agent, employee, broker, or otherwise, but shall not include retailers or restaurants, and Certified Producers as defined in Section 1392.2.
- (b) Prior to commencing packing, handlers shall register with the Secretary of the Department of Food and Agriculture. Registration shall be on a Department form and shall include only the following:
- (1) The name, address (including zip code), and telephone number of the handler.
 - (2) The name of the principal owner(s) of the company.
- (c) In the event of a suspected violation of this article, a handler shall provide, upon request of the Secretary or his representative, records related to field location, grower, harvest date, pack date, transporter, and purchaser of packed tomatoes. Such records shall be maintained for the current marketing year.

NOTE: Authority cited: Sections 407, 42681, 42802 and 42808, Food and Agricultural Code. Reference: Sections 42681 and 42808, Food and Agricultural Code.

HISTORY

 New section filed 5-18-2006; operative 5-18-2006 pursuant to Food and Agriculture Code section 42802 (Register 2006, No. 20).

§ 1472.8. Tomatoes, Greenhouse Grown Defined.

Tomatoes labeled with the term "greenhouse grown" shall be considered mislabeled unless tomatoes are grown in a fixed steel structure using irrigation and climate control, in an artificial medium that substitutes for soil.

NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Sections 42941 and 42943, Food and Agricultural Code.

HISTORY

1. New section filed 8-10-2004; operative 9-9-2004 (Register 2004, No. 33).

NOTE: Authority cited: Sections 407, 41161, 41162 and 41163, Food and Agricultural Code.

History

- 1. New sections 1488 through 1494 filed 6–24–55; effective thirteenth day thereafter (Register 55, No. 9).
- 2. Amendment filed 4–28–67; effective thirtieth day thereafter (Register 67, No. 17).
- 3. Repealer of Group 5 (Sections 1488–1494) filed 12–30–81; effective thirtieth day thereafter (Register 82, No. 1). For prior history, see Registers 76, No. 41; 76, No. 32; 73, No. 33; 71, No. 17; 67, No. 17; 61, No. 7; and 55, No. 9.

Subchapter 6. Honey

§ 1495. Markings on Containers of Honey.

Subcontainers of five ounces or less need not bear the name and address of the producer or distributor of honey provided all markings required do appear on the master container when sold as a unit directly to the consumer.

NOTE: Authority cited: Sections 407 and 29443, Food and Agricultural Code. Reference: Sections 29671 and 29673, Food and Agricultural Code.

HISTORY

- 1. New Sections 1495, 1496 and 1497 filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 6–25–62; effective thirtieth day thereafter (Register 62, No. 13).

§ 1495.1. Abbreviation of Color Markings.

The color classification terms on other than opaque containers of honey may be labeled with the following abbreviations:

W. White Ex. White White Ex. L. Amber L. Amber Amber D. Amber

NOTE: Authority cited: Sections 407 and 29443, Food and Agricultural Code. Reference: Sections 29671 and 29673, Food and Agricultural Code.

HISTORY

- 1. New Sections 1495.1 and 1495.3 through 1495.9 filed 6–25–62; effective thirtieth day thereafter (Register 62, No. 13).
- 2. Editorial correction of NOTE filed 8-23-83 (Register 83, No. 35).

§ 1495.3. U.S. Grade Terms.

NOTE: Authority cited: Sections 407 and 29443, Food and Agricultural Code. Reference: Section 29582, Food and Agricultural Code.

HISTORY

1. Repealer filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1495.4. Determining Foreign Material.

Honey strained through a metal sieve measuring 23 meshes per inch, or other meshes per inch as provided in the U.S. grades currently in effect, shall be considered equal to honey strained through standard bolting cloth of the same number of meshes per inch, and may be used in lieu of the standard bolting cloth.

To determine whether honey is free from foreign material, as required for the various grades, a four—ounce sample of honey heated to 130 degrees Fahrenheit shall be strained through the standard bolting cloth or sieve. If any foreign material is left on the cloth or sieve, the honey does not meet the requirements of the grade.

NOTE: Authority cited: Sections 407 and 29443, Food and Agricultural Code. Reference: Section 29671, Food and Agricultural Code.

HISTORY

1. Amendment filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1495.5. Chunk or Bulk Comb Honey.

Containers of chunk or bulk comb honey shall not be considered mislabeled as to grade when the term "unclassified" is used as a grade term. NOTE: Authority cited: Sections 407 and 29443, Food and Agricultural Code. Reference: Sections 29671 and 29673, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1495.6. Color of Chunk or Bulk Comb Honey.

NOTE: Authority cited: Sections 407 and 29443, Food and Agricultural Code. Reference: Sections 29582 and 29583 Food and Agricultural Code.

HISTORY

1. Repealer filed 8-23-83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1495.7. Foreign Material.

Leaves, blossoms, wax cappings, parts of any plant or other visible material in the honey shall be considered foreign material.

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

[The next page is 205.]

§ 1495.8. Crystallized Honey and Partially Crystallized Honey.

The term "crystallized" as it applies to extracted honey shall include crystallized and partially crystallized honey as defined in the U.S. grades for honey.

To determine the color of honey in crystallized form, a sample of the honey shall be liquefied by heating in a container of hot water (to prevent overheating) at a temperature of 140 degrees to 160 degrees Fahrenheit and immediately chilled, and the honey graded on the liquid basis.

NOTE: Authority cited: Sections 407 and 29443, Food and Agricultural Code. Reference: Sections 29617 and 29673, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1495.9. Means of Color Classification.

The color classification of honey as determined by means of the U.S.D.A. permanent glass color standards for honey as provided in the U.S. grades currently in effect shall be considered equal to the color classification of the Pfund color grader.

Subchapter 8. Emergency Standards

(Originally Printed 7–25–45)

HISTORY

Sections 1565 through 1586.2 have expired by their own terms. For prior history
of specific sections, see Register 63, No. 22, and Register 68, No. 5 (Register
69, No. 11).

Subchapter 9. Poultry and Rabbit Meat Classes

Article 1. Inspection and Application

§ 1600. Duties of Enforcing Officers.

NOTE: Authority cited for Group 9: Section 16, and Article 2, Chap. 8, Div. 5 of Agriculture Code.

HISTORY

- 1. New Group 9 (§§ 1600 through 1613) filed 5–31–56; effective thirtieth day thereafter (Register 56, No. 10).
- 2. Repealer filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1601. Inspection and Sampling.

Compliance or noncompliance with the requirements of Article 2, Chapter 8, Division 5 of the Agricultural Code, shall be determined by the examination of a representative sample of the poultry meat in any given lot. A representative sample shall consist of the number of carcasses or packages at least equal to the square root of the number of carcasses or individual packages in any lot of poultry meat, and shall be taken at random from such lot. If the poultry meat is placed in master containers, the representative sample, defined here, shall be taken from no less than the following number of containers:

From all containers if the lot consists of three containers or less.

From three containers if the lot consists of not less than four containers and not more than 20 containers.

From five containers if the lot consists of not less than 21 containers and not more than 50 containers.

From seven containers if the lot consists of not less than 51 containers and not more than 140 containers.

Over 140 containers, from 5% of the number in the lot.

§ 1602. Rejection Procedure.

HISTORY

1. Repealer filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1603. Rejection Notice Form.

HISTORY

1. Repealer filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1604. Proper Markings As to Class.

As to markings of the class of poultry meat, as affected by Sections 1111, 1114.1 and as required by Sections 1113 and 1114 of the Agricultural Code:

- (a) The designation of class, when placed upon the carcass or the wrapper of a carcass, or the package of cut-up poultry meat, shall be on the surface normally exposed to view when being displayed for sale, and in conspicuous letters at least one-fourth of an inch in height, or
- (b) In the case of poultry carcasses, or packages of cut-up poultry meat which are marked with tags or clips securely attached to the carcasses or packages, the designation of class may be placed upon such tags or clips, in which case such marking shall be in a conspicuous place on the surface normally exposed to view, and in letters at least one-eighth of an inch in height, or
- (c) In the case of poultry meat bearing the designation of class in conjunction with the official inspection mark as required by Section 377.4 of the Agricultural Code, and approved by the Director of the Department of Agriculture, the designation of class shall be in the size of lettering as approved, or
- (d) In the case of poultry meat bearing the designation of class in conjunction with the official inspection mark required, and approved by the Poultry Division of the Agricultural Marketing Service of the United States Department of Agriculture as provided for in Section 1116, subsection (a), of the Agricultural Code, the designation of class shall be in the size of lettering as approved.

(e) The markings used to show the class of poultry meat shall comply with the requirements of Section 1111, subsection (e), of the Agricultural Code and shall not be abbreviated.

HISTORY

1. Amendment filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1605. Classification Terms, Section 1112 Agr. Code.

The class designations may consist of different forms of the words used, or terms may appear in different order, and additional descriptive terms may be used such as "frying chicken" in lieu of "fryer," or "roasting rabbit" in lieu of "rabbit roaster," or "stewing hen" in lieu of "hen," or other similar combinations. When additional words are used to describe the class of poultry meat, each such grouping of descriptive terms shall contain the adequate class designations, and such additional terms shall not be misleading.

When two or more words are required by the law to designate the class, such as "stewing chicken" or "young tom turkey," or "rabbit fryer," all the words in the specified class must appear and such words must appear adjacent to, or in conjunction with, each other in the class designation marking.

HISTORY

1. Amendment filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1606. Caponette Class Requirements.

HISTORY

1. Repealer filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1607. Rabbits, Weight Requirements, Section 1112 Agr. Code.

"Ready-to-cook weight" as applied to rabbits, shall mean the weight of a rabbit which has been slaughtered for human food, from which the head, blood, skin, feet and inedible viscera have been removed.

The weight measurements in each class shall apply to an individual carcass and, in the case of packages of cut-up rabbits consisting of all of the parts of the carcass in "ready-to-cook" form, shall apply to the weight of the individual carcass used.

History

1. Amendment filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1608. Mislabeling, Section 1111 Food and Agr. Code.

Poultry meat, and each carcass, cut—up poultry or poultry parts or their containers shall be considered mislabeled as defined in Section 1111(f) of the Food and Agricultural Code, if such poultry meat fails to meet the class as marked. Poultry meat classes shall be considered as specifying certain characteristics of use for said classification.

HISTORY

1. Amendment filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1609. Poultry Meat Cut Up into Small Pieces; Processing Exemption.

HISTORY

1. Repealer filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1610. Exempt When Classed by Federal Inspector.

Poultry meat or the containers thereof are exempt from the provisions of Article 2, Chapter 8, Division 5 of the Food and Agricultural Code when marked with the official class, as prescribed by the Poultry Division of the Agricultural Marketing Service of the United States Department of Agriculture, only if such poultry meat has been inspected and passed by the official inspection service of said division, and the designation of class as marked meets the requirements of Article 2, and is accompanied by evidence of such U. S. D. A. approval or inspection.

§ 1611. Exemption When Slaughtered on Premises Where Produced, Section 1116 Food and Agr. Code.

(a) Poultry meat to be exempt from the provisions of Article 2, Chapter 8, Division 5 of the Food and Agricultural Code, as provided in Section

- 1116, paragraphs (c) and (d), must be produced and slaughtered in California.
- (b) The term "producer" as defined in part (3) of subsection C of Section 1116 of the Food and Agricultural Code, and in Section 1111(i) of the Food and Agricultural Code applies to the term "producer" as used in subsections (1) and (2) of subsection C of said Section 1116.

HISTORY

1. Amendment filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1612. Poultry Meat Processed and Stored Prior to July 1, 1956.

HISTORY

1. Repealer filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1613. Definitions, Section 1116, Food and Agr. Code.

As used in Article 1 of these regulations, "slaughter," "slaughtering" and "slaughtered" mean the process of killing and preparing poultry for market in the form of poultry meat. "Produce" means to grow, feed and care for poultry. "Production" means the process of producing poultry.

HISTORY

1. Amendment filed 3–5–58; effective thirtieth day thereafter (Register 58, No. 4).

§ 1614. Poultry Meat Labeling—Point of Origin.

- (a) The marking requirements of Section 1116.1 of the Food and Agricultural Code pertaining to whole carcasses of chicken poultry meat may be met by—
- (1) Designating the name and address of the plant where the chicken was slaughtered preceded by any of the words "packed by," "packed at," "processed by," "processed at," "slaughtered by," "slaughtered at," "dressed by," "dressed at," or other similar words which are in their commonly accepted primary meaning synonymous with the word "slaughtered" as applied to poultry, or
- (2) Designating the name and address of the plant where slaughtered without other descriptive words, or
- (3) Designating the name of the state in which the chicken was raised or grown followed by the words "raised" or "grown" or preceded by the words "grown in" or "raised in."
- (b) All markings required shall be plain, legible, and conspicuous so as to be clearly visible, and not deceptive or misleading.
- (c) In addition, any other name and address permitted by law may be placed on the label provided it is not misleading or deceptive and does not convey the impression that the chicken was grown or slaughtered at any place other than the actual place of growing or slaughtering.

 NOTE: Authority cited: Sections 16 and 1115, Food and Agricultural Code. Reference: Section 1116.1, Food and Agricultural Code.

HISTORY

1. New section filed 6–21–62; effective thirtieth day thereafter (Register 62, No. 12).

Subchapter 10. Raw Products Inspection for Processing Analysis Different

Article 1. Inspection of Grapes for Wine and By-Products

§ 1650. Notification.

Notification in writing shall be made by the winery requesting inspection to the Director or county agricultural commissioner of the county in which the testing location is designated. Grapes shall be inspected at a location designated by the winery.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–22–74 as an emergency; effective upon filing (Register 74, No. 30). For prior history, see Register 67, No. 20.
- 2. Certificate of Compliance filed 11-19-74 (Register 74, No. 47).
- 3. Repealer and new Article 1 (Sections 1650–1662, not consecutive) filed 12–30–81; effective thirtieth day thereafter (Register 82, No. 1). For prior histo-

ry, see Registers 76, No. 41; 76, No. 32; 74, No. 47; 74, No. 30; 72, No. 52; and 72, No. 35.

§ 1650.1. Prior Notice.

Notification shall be made five (5) or more days prior to the date of inspection.

Less than five days notification may be made if it has been established to the satisfaction of the Director or county agricultural commissioner that the inspection facilities, equipment, and trained personnel are available

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1650.2. Prior Agreement.

The date, time, and hours of the day that inspection will be conducted shall be based on the availability of the inspection facilities, equipment, and trained personnel. An agreement shall be established prior to inspection between the Director or county agricultural commissioner and the winery requesting inspection.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1650.15. Request for Defect Inspection.

- (a) After January 1, 1994, the Director shall be notified by May 1, of each year, by the person requesting defect inspection of the selection of the "hand sort method" or an "approved immunoassay procedure".
- (b) Persons not specifying a method by May 1, may not utilize the immunoassay procedure that harvest season unless the Director determines that adequate facilities, equipment, supplies, and trained personnel are available.

NOTE: Authority cited: Sections 14, 407 and 41194, Food and Agricultural Code. Reference: Section 41192, Food and Agricultural Code.

HISTORY

1. New section filed 4-30-93; operative 5-31-93 (Register 93, No. 18).

§ 1652. Inspection Facilities.

Each winery shall provide a safe and adequate inspection facility approved by the Director or county agricultural commissioner for inspection, sampling, and certification.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1652.1. Adequate Facilities.

Adequate facilities are defined as a grading platform and equipment established at a location or area of inspection that will accomplish the objectives of the Director or county agricultural commissioner.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1652.2. Inspection Station Requirements.

The inspection platform and other facilities required for material other than grapes or defect inspection are as follows:

- (a) Grading platform or area shall be approximately 15 feet wide by 20 feet in length for one grading table, and 18 feet by 25 feet for two grading tables. The platform shall be high enough so that the inspector may observe the top of the load of grapes to be graded and designate the sample locations. The grading platform or area shall be covered by a roof.
- (b) A standard grading table built according to the specifications of the Director. Grading table specifications are available from the Department.
- (c) An approved mechanized sampling tube which will concurrently produce a sample of approximately 35 pounds and a sample of at least 6 1/2 pounds.
 - (d) Potable water supply.
 - (e) Toilet facilities.
 - (f) Adequate lighting.
- (g) An adequate temperature controlled enclosed area, if the approved immunoassay procedure is to be used.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Repealer and new subsection (c) and new subsection (g) filed 4–30–93; operative 5–31–93 (Register 93, No. 18).

§ 1655. Additional Winery Personnel.

If additional personnel are required at the station, they shall be furnished without charge by the winery upon the request of the Director or county agricultural commissioner. The additional personnel may probe for inspection samples, crush and obtain the grape juice for testing, and perform other duties as designated by an authorized inspector. The additional personnel shall be under the immediate direction of an authorized inspector and shall not assist in any determination of the testing, grading, or activity of inspection that could influence the results of inspection. NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1656. Formula for Fees.

The Department hereby adopts a formula to establish a fee charged to each winery to defray the cost of State inspection or reinspection upon request, as specified by Section 41194 of the Food and Agricultural Code.

- (a) The formula for the fee each winery will pay the Wine Grape Inspection Program is: divide the estimated annual budget of the program by the estimated tons inspected. The result is the cents per ton. The cents per ton is multiplied by the net tons per load as determined by a certified weight certificate on each load inspected. For wineries that receive small tonnages per week, a minimum tonnage inspected shall be established per week for the season. Wineries that receive tonnage below the minimum shall be charged an hourly rate comparable to the tonnage rate charged to large tonnage wineries.
- (b) At the end of each calendar week, the winery requesting inspection shall remit to Cashier, California Department of Food and Agriculture, the fee for inspection for the week.
- (c) Upon written demand of the Department, a winery requesting inspection shall remit an advance deposit of \$1,000 to Cashier, California Department of Food and Agriculture prior to the start of inspection. This requirement shall be based upon the Department's knowledge of the financial status of a winery or the winery's past performance in remitting its inspection fees to the Department.

At the close of each inspection season, the amount of advance deposit not used for inspection purposes shall be refunded to the winery from which it was received.

 $Note: Authority\ cited: Sections\ 407\ and\ 41194, Food\ and\ Agricultural\ Code.\ Reference:\ Sections\ 41191\ and\ 41192,\ Food\ and\ Agricultural\ Code.$

HISTORY

1. Amendment of section heading and section filed 7–13–2000; operative 8–12–2000 (Register 2000, No. 28).

§ 1657. Contract.

Prior to inspection, each winery shall provide, on request of the Director or county agricultural commissioner, written evidence that a contract exists between the winery and the grower for loads of grapes to be presented for inspection.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1658. Sampling Procedure.

The authorized inspector may require samples from any location in the load or lot of grapes in order to produce by such sampling a fair representation of the entire load or unit.

All samples shall be taken from widely separated parts of the load or lot being inspected. The number of samples from each load or lot of grapes shall be designated by the authorized inspector, and shall be taken according to the sampling method provided in these regulations.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1658.1. Lot or Load Definition.

A lot or load shall consist of a single delivery of the same ownership and shall be sampled and inspected as one unit, except where different varieties are separated by container. The Director, county agricultural commissioner, grower, or winery representative may request a separate sample and inspection of a lot or load when the lots are clearly segregated. Separate inspections shall be made and a certificate shall be issued for each inspection.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1658.2. Mixed Varieties of Grapes.

Varieties of grapes mixed in one tank shall be graded as mixed, and a certificate issued specifying the variety as "mixed."

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1658.3. Reinspection.

- (a) Inspectors, of their own volition, or at the request of a winery representative, or a grower, or a grower representative, may make a second inspection if reasonably necessary, based on the inspection results of previous deliveries
- (b) A complete and new representative sample shall be obtained for reinspection. The results of the first and second inspections shall be averaged together and the average shall be the final result for the lot or load inspected.
- (c) Not more than one reinspection shall be made on any one lot or load. If it is established to the satisfaction of the Director or county agricultural commissioner that an inspection is not representative of the lot or load, the inspection may be discarded and a new inspection made.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

Designation of subsections and amendment of subsection (c) filed 4-30-93; operative 5-31-93 (Register 93, No. 18).

§ 1658.4. Bulk Load (Gondola Sampling).

The following schedule will be used on gondola loads:

1 or 2 tanks	2 samples
3 or 4 tanks	3 samples
5 or 6 tanks	4 samples
7 or more tanks	5 samples

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1658.5. Sampling Tube.

The sampling tube shall be pushed from the top to the bottom level of the grapes in the load in order to obtain, from each sample, grapes from the top, center, and bottom layers.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1658.6. Box Load (Grapes in Boxes) Sampling.

The number of boxes selected for inspection shall be according to the following table:

Lots or loads having:

2 to 50 boxes,	sample 2 boxes	
51 to 100 boxes,	sample 3 boxes	
101 to 250 boxes,	sample 4 boxes	
251 to 400 boxes,	sample 5 boxes	
401 to 600 boxes,	sample 6 boxes	
601 and over,	sample 7 boxes	

Not less than 10 percent by volume of the grapes shall be taken, at random, from each of the boxes selected.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1659. Receiving-Hopper Sampling.

When grapes are placed in the receiving hopper, the bulk load (gondola) sampling procedure is applicable. Tube samples may be taken from the hopper, provided the load is separate from other loads of grapes and stationary, to avoid mixing with other lots or loads.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1659.1. In-Line Testing.

- (a) The Director or county agricultural commissioner may take in-line samples for determination of the average percentage of soluble solids in any lot or load placed in a crusher or which has been field crushed.
- (b) The samples shall be taken from the pipeline which delivers the grape juice into the winery. All grapes or grape juice from the previous lot or load shall be out of the crusher or pipeline prior to sampling.
- (c) A representative juice sample shall be obtained from the pipeline by taking equal samples at four (4) intervals during delivery of the grape juice into the winery. The sample may also be used by the Director for an approved immunoassay procedure determination.
- (d) The samples shall total approximately five (5) gallons and shall be combined, stirred, and strained of all skins, seeds, and other foreign material.

NOTE: Authority cited: Section 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Designation of subsections and amendment of section heading and subsection (c) filed 4–30–93; operative 5–31–93 (Register 93, No. 18).

§ 1660. Method of Testing for Soluble Solids.

All grape samples collected for soluble solids testing from the same lot or load shall be combined and completely crushed without unnecessary crushing of the stems. The juice sample shall be stirred and mixed thoroughly prior to testing.

A sieve or metal screen strainer shall be used to strain any pulp or solids from the sample to be tested.

The juice sample shall be tested, using a hand-held temperature compensating refractometer or refractometer analytical unit approved by the Secretary.

The refractometer or refractometer analytical unit shall be clean and free from any contamination prior to each test.

The hand-held refractometer shall be immersed to a depth in the juice sample that will ensure complete coverage of the prism. The prism cover shall be closed immediately and the refractometer lifted out of the sample and read to the nearest 0.1 degree.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Amendment filed 12-4-95; operative 1-3-96 (Register 95, No. 49).

§ 1660.1. Equipment.

The hand refractometer shall be temperature compensating, read directly in Brix percentage scale, with divisions not more than 0.2 degrees, that can be read with accuracy to 0.1 degree, have a sharp demarcation line (shadow), and be without interference by color or an indistinct line, and sealed with acid–proof material on the face, where the juice is placed. NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Amendment filed 12-4-95; operative 1-3-96 (Register 95, No. 49).

§ 1660.2. Refractometer Analytical Unit.

The refractometer analytical unit shall be temperature compensated, not affected by turbid solution, read directly in Brix percentage scale, with the smallest division, 0.1 degree.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1660.3. Refractometer Accuracy Testing.

Refractometers and refractometer analytical units shall be tested for accuracy by the Director or county agricultural commissioners prior to each grape season. The accuracy of each unit shall be tested periodically during each day of inspection.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1660.4. Soluble Solids Sample Screen.

The screen or sieve shall not be less than eight mesh per linear inch. NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

Page 208

§ 1660.5. Hand Sampling Tube Specifications.

The hand sampling tube shall have an inside diameter of four (4) inches and a length of approximately 54 inches. The open end, which is pushed into the grapes, shall at all times have edges sharp enough to cut through the grapes and stems. The sampling tube shall be constructed to retain a minimum of 6 1/2 pounds.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1660.6. Equipment Material Specifications.

Any equipment used shall be made of a material that will not affect or be affected by the grape stems or grape juice that would cause an incorrect test.

NOTE: Authority cited: Sections 407 and 41194. Food and Agricultural Code. Reference: Sections 41191 and 41192 Food and Agricultural Code.

§ 1660.7. Standard Sample Container.

A standard plastic sample container shall be used for holding each probe of grapes obtained by the standard mechanized sampling tube. The sample container shall not hold less than 35 pounds.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

§ 1661. Method of Grading.

The Director shall perform inspection for material other than grapes and defects.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Editorial correction inserting inadvertently omitted section (Register 95, No. 23).

§ 1661.1. Material Other Than Grapes Inspection.

- (a) Material other than grapes inspection may be done in conjunction with hand sort defect inspection.
- (b) The grapes in each sample selected shall be placed on the grading table and inspected.
- (c) Material other than grapes, such as leaves, canes, and other material foreign to grapes, shall be sorted from the sample.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

Designation of subsections and amendment of subsection (a) filed 4-30-93; operative 5-31-93 (Register 93, No. 18).

§ 1661.2. Defects Definition.

"Defects" shall be considered defective grapes due to evidence of mold, rot, or mildew resulting in decomposition.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Amendment filed 4-30-93; operative 5-31-93 (Register 93, No. 18).

§ 1661.3. Official Charts.

The official charts issued by the Director may be used to determine the percentage and pounds per ton of material other than grapes and percentage of hand sorted defects. The charts are used for the mathematical computations necessary to report the inspection results.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Amendment filed 4-30-93; operative 5-31-93 (Register 93, No. 18).

§ 1661.4. Request for Discontinuing Inspection for Hand Sorted Defect Samples.

A written request by the winery to discontinue inspection may be granted by the Director when the amount of grapes considered defective and removed from the sample is equal to or greater than the percentage specified in the request. The word "exceeds" and the percent specified in the request shall be entered on the certificate.

Example: PERCENT ROT DEFECTS

exceeds 10%

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

1. Amendment of section heading filed 4–30–93; operative 5–31–93 (Register 93, No. 18).

§ 1662. Certification.

- (a) A certificate of inspection or a combination of the inspection and weight certificates shall be issued for each lot or load inspected. Each certificate shall provide all information relevant to the inspection.
- (b) The certificate shall bear the statement that inspection and certification have been conducted under authority of Division 16, Chapter 3, of the Food and Agricultural Code of California, and shall provide space for the authorized inspector to sign the certificate.
- (c) When applicable, and on completion of inspection of the required number of samples, the following shall be reported on the certificate as the true results of the inspection by the Director.
- (d) Soluble solids test shall be reported as Brix percentage on the certificate.
- (e) Material other than grapes and hand sorted defects shall be weighed and may be reported in ounces, pounds per ton, and/or percentage.
- (f) The results of inspections for defects determined by an approved immunoassay procedure shall be reported in a manner approved by the Director.
- (g) Each certificate shall bear the name of the agency issuing the certificate and shall be numbered serially.
- (h) Each inspection certificate shall provide the name of the grower or growers and shall bear the date, time, weight certificate number, and the license numbers (when applicable), and the total number of samples, including retests or regrades.
- (i) The original or duplicate original of the certificate shall be retained by the Director or county agricultural commissioner. Each certificate copy shall be a duplicate original.
- (j) A certificate or duplicate original shall be invalid if it has been altered in any way, unless the alteration is initialed by an authorized inspector. Any alterations, properly initialed, shall be made on the original and on all duplicate originals of the certificate.
- (k) The official inspection certificate may be combined with the official weight certificate used by the winery, provided the combined form is approved by the Director or county agricultural commissioner.

NOTE: Authority cited: Sections 407 and 41194, Food and Agricultural Code. Reference: Sections 41191 and 41192, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–18–83; effective thirtieth day thereafter (Register 83, No. 34).
- 2. Designation of subsections, amendment of subsection (e) and new subsection (f) filed 4-30-93; operative 5-31-93 (Register 93, No. 18).

Article 2. Garlic and Onions for Dehydration

§ 1675. Sampling Procedure.

The percentage or weight of defects in a lot or load of garlic or onions for dehydration shall be determined by the examination of the onions or garlic in a representative sample. All of the sample selected shall be weighed and placed on the grading table for inspection. A lot or load shall consist of a single delivery of the same ownership and shall be sampled and inspected as one unit. The director reserves the right to require samples from any location in a lot or load in order to produce, by such sampling, a fair representation of the entire lot or load. An authorized state inspector shall, according to the sampling methods provided in these regulations, designate the number of samples to be taken, the sample locations, and the sampling procedures to be used on each load or lot.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Sections 41731 and 41752, Food and Agricultural Code.

HISTORY

- 1. New Article 2 (Sections 1675–1688) filed 4–11–79; effective thirtieth day thereafter (Register 79, No. 15).
- 2. Editorial correction of NOTE (Register 82, No. 1).

§ 1676. Sample Size.

Each master sample shall weigh approximately 50 pounds and be comprised of two (2) samples, each weighing approximately 25 pounds.

The samples to be taken shall be determined by one of the following methods:

- (a) Bulk Load. A minimum of two (2) samples shall be taken. Each sample shall be from a different trailer, or from a different portion of a single trailer.
- (b) Bin Load or Lot. The number of bins to be sampled shall be determined by the total number of bins in a load or lot. Each bin to be sampled shall be plainly marked or identified on an exposed surface prior to sampling. The number of bins to sample is as follows:

The subsamples for excessive moisture, external defects, and internal defects shall be selected by using an eight–section sampling grid. The random sampling grid charts shall be furnished by the director. The subsamples for onions shall be as follows:

- (a) Select two sections, using the random charts, for use as the excessive moisture sample.
- (b) Select two sections, using the random charts, for use as the external and internal defects sample.

The subsamples for garlic shall be as follows:

- (a) Select two sections, using the random charts, for use as the excessive moisture sample.
- (b) Select one section, using the random charts, for use as the defects sample.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Sections 41731 and 41752, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–25–79 as an emergency; effective upon filing (Register 79, No. 21).
- 2. Certificate of Compliance filed 9-7-79 (Register 79, No. 36).
- 3. Editorial Correction of NOTE (Register 82, No. 1).

§ 1677. Inspection Without Undue Delay.

All loads or lots of onions or garlic for dehydration which are required to be inspected shall be sampled and inspected within 48 hours for onions and 72 hours for garlic after arrival at the inspection location.

NOTE: Authority cited: Sections 407, 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

§ 1678. Defects—Onions.

An onion that has one or more of the following defects is scorable when:

- (a) Insect Damage. Two or more fleshy scales have been penetrated by an insect in two or more areas.
- (b) Wet Sunscald. Wet sunscald is identifiable anywhere on the bulb.
- (c) Dry Sunscald. Dry sunscald affects an aggregate area of more than 900 square millimeters on the outside fleshy scales.
- (d) Decay—Outside. Decay affects an aggregate area of more than a 25 millimeter circle on the outside fleshy scales.
 - (e) Decay—Inside. Decay is identifiable anywhere inside the bulb.
- (f) Wet Breakdown. Wet breakdown is identifiable anywhere on the bulb.
- (g) Mold. The moldy area on one or more fleshy scales exceeds an aggregate area of a circle 25 millimeters in diameter or spore masses between the papery scales are present on 50 percent or more of the onion.
- (h) Burst/Cracks. The burst area or crack extends three or more fleshy scales in depth.
 - (i) Seed Stems. It has a seed stem that is tough or woody.
 - (j) Off Color. Of a color that is not typical of the variety or strain.
- (k) Scallions, Bottlenecks. The diameter of the neck at the shoulder exceeds 1/3 of the bulb diameter.
- (*l*) Green Sprouts. A sprout is externally visible or a sprout is medium green or darker and longer than one inch (25.4 millimeters) in the bulb.
- (m) Greening. Greening exceeds an aggregate area of a 32-millimeter-in-diameter circle and is medium green or darker.
- (n) Freeze Damage. Freeze damage is identifiable in three or more fleshy scales.

- (o) Mechanical Damage. Mechanical damage extends through three or more fleshy outer scales.
- (p) Undersize. The diameter is less than 1.25 inches (31.75 millimeters). Diameter is measured at the widest portion of a cross section at a right angle to a straight line drawn from the top to the root end.

NOTE: Authority cited: Sections 407, and 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

HISTORY

- Amendment filed 4–24–81; effective thirtieth day thereafter (Register 81, No. 17).
- 2. Editorial Correction of NOTE (Register 82, No. 1).

§ 1679. Dirt and Cull Material.

The director shall determine and record on a certificate the percentages or weights of dirt and cull material in a representative sample of onions or garlic for dehydration.

Dirt shall include clods; loose, fine dirt; and dirt adhering to the raw product in the sample.

Cull material shall include tops, roots, rocks, loose outer scales, and material other than raw product.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–25–79 as an emergency; effective upon filing (Register 79, No. 21).
- 2. Certificate of Compliance filed 9-7-79 (Register 79, No. 36).
- 3. Amendment filed 4–24–81; effective thirtieth day thereafter (Register 81, No. 17).
- 4. Editorial Correction of NOTE (Register 82, No. 1).

§ 1680. Excessive Moisture.

Except when the amount of the purchase price is not based on percentage of moisture loss, the director shall determine and record on a certificate the weight loss due to excessive moisture in a representative sample of onions or garlic for dehydration.

The moisture sample shall be weighed prior to placing in a forced-air heating chamber for 48 hours at a constant temperature of 95 degrees or on a drying tunnel. The sample shall be weighed at time of removal. The difference in weights is used to calculate the percentage of excessive moisture in the sample.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

HISTORY

1. Editorial Correction of NOTE (Register 82, No. 1).

§ 1681. Defects—Garlic.

A clove of garlic that has one or more of the following defects is scorable when:

- (a) Decay. Decay is identifiable anywhere on the clove. Decay is identified as soft, watery, discolored tissue, with a strong, musty odor.
- (b) Waxy Breakdown. Waxy breakdown is identifiable anywhere on the clove. Waxy breakdown is identified as a waxy, yellow or brown, transparent appearance of the affected flesh.
- (c) Insect Damage. Insect damage penetrates into the meaty portion of the clove.
- (d) Green Sprouts. A sprout has extended outside of the clove, or when an internal sprout is medium green or darker and extends more than one—half the length of the inside of the clove.
- (e) Greening. Greening exceeds an aggregate area of a six (6) millimeter diameter circle and is medium green or darker.
- (f) Damage. Damage, including mechanical damage, extends into the flesh and exceeds an aggregate area of a six (6) millimeter–in–diameter circle.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

HISTORY

- Amendment filed 4–24–81; effective thirtieth day thereafter (Register 81, No. 17).
- 2. Editorial Correction of NOTE (Register 82, No. 1).

§ 1681.1. Stiff Neck-Garlic.

A garlic bulb shall be scored as "stiff neck" when there is little or no clove development in the bulb.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

HISTORY

1. New section filed 4–24–81; effective thirtieth day thereafter (Register 81, No. 17).

§ 1682. Exempt Loads or Lots.

The following specific deliveries of garlic or onions are exempt from mandatory inspection and certification:

- (a) Garlic or onions produced in a foreign country and delivered for dehydration in California.
- (b) Garlic or onion cull-outs from production for fresh market consumption. "Cull-outs" are defined as garlic or onions undesirable for commercial, fresh marketing channels.
- (c) A load or lot of mixed ownership where each grower has received a certified weight certificate and the amount of the purchase price is not based on percentage of defects.

NOTE: Authority cited: Sections 407, 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

§ 1683. Daily Load Information.

Each dehydrator shall provide the director, by 5:00 p.m. daily, with the number of expected loads of onions or garlic for the next day.

NOTE: Authority cited: Sections 407, 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

§ 1684. Load or Lot Identification.

Prior to inspection, the director shall be furnished with the name of the grower, the name of the dehydrator, and the contract or other numbers applicable to the load.

NOTE: Authority cited: Sections 407, 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

§ 1685. Acreage or Load Information.

Each dehydrator shall provide to the director, by March 1 of each year, the anticipated total onions and the total garlic to be inspected through each inspection site. This information may be in tons, acres to be harvested, or loads. Any additions or deletions to the list shall be submitted promptly to the director.

NOTE: Authority cited: Sections 407, 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

§ 1686. Growers List.

Each dehydrator shall provide to the director, by March 1 of each year, a list of the growers using each inspection site. The list shall include the grower's name, address, and a contract or other identifying number, if applicable. Any additions to the list shall be submitted promptly to the director.

NOTE: Authority cited: Sections 407, 41721, Food and Agricultural Code. Reference: Section 41752, Food and Agricultural Code.

§ 1687. Adequacy of Inspection Sites.

The director shall review inspection sites for adequacy of facilities prior to April 1 of each year. The safety and sanitation inspections are for the safety and health of state employees working at the sites and do not preempt compliance with other regulations for occupational safety or public health.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Section 41757, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 1).

§ 1688. Inspection Site Requirements.

Each inspection site shall include, but is not limited to, the following:

- (a) Grading tables
- (b) Covered inspection area
- (c) Electricity—properly grounded
- (d) Potable water
- (e) Sampling equipment

- (f) Writing, office, and storage area
- (g) Adequate toilet facilities, with running water
- (h) Floors in the inspection area with a nonskid surface
- (i) Properly located fire extinguishers
- (j) First aid kit
- (k) Lighting
- (1) Scales, approved for use in California, which are sealed. The scales shall have the capacity and increments necessary to weigh samples and defects.
 - (m) Parking for state employees
 - (n) Designated lunch and break areas
 - (o) Fans for cooling and insect control

All equipment, supplies, and work area shall be adequate, safe, and sanitary.

NOTE: Authority cited: Sections 407 and 41721, Food and Agricultural Code. Reference: Section 41757, Food and Agricultural Code.

HISTORY

1. Editorial Correction of NOTE (Register 82, No. 1).

Chapter 2. Markets

Article 1. Reports by Grape Processors

§ 1700. Grape Pricing Districts.

Every processor who crushes grapes in California shall report the information required by Section 55601.5 of the Food and Agricultural Code to the Director, for each grape pricing district, as follows:

District 1-Mendocino County

District 2—Lake County

District 3—Sonoma and Marin Counties

District 4—Napa County

District 5—Solano County

District 6—Alameda, Contra Costa, Santa Clara, San Francisco, San Mateo, and Santa Cruz Counties

District 7—Monterey and San Benito Counties

District 8—San Luis Obispo, Santa Barbara and Ventura Counties

District 9—Yolo County north of Interstate 80 to the junction of Interstate 80 and U.S. 50 and north of U.S. 50; Sacramento County north of U.S. 50; Del Norte, Siskiyou, Modoc, Humboldt, Trinity, Shasta, Lassen, Tehama, Plumas, Glenn, Butte, Colusa, Sutter, Yuba, and Sierra Counties

District 10—Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne and Mariposa Counties

District 11—San Joaquin County north of State Highway 4; and Sacramento County south of U.S. 50 and east of Interstate 5

District 12—San Joaquin County south of State Highway 4; Stanislaus and Merced Counties

District 13—Madera, Fresno, Alpine, Mono, Inyo Counties; and Kings and Tulare Counties north of Nevada Avenue (Avenue 192)

District 14—Kings and Tulare Counties south of Nevada Avenue (Avenue 192); and Kern County

District 15-Los Angeles and San Bernardino Counties

District 16—Orange, Riverside, San Diego and Imperial Counties

District 17—Yolo County south of Interstate 80 from the Solano County line to the junction of Interstate 80 and U.S. 50 and south of U.S. 50 and Sacramento County south of U.S. 50 and west of Interstate 5 NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 55601.5, Food and Agricultural Code.

HISTORY

- 1. New Article 1 (Section 1700) filed 7-13-79; effective thirtieth day thereafter (Register 79, No. 28).
- Amendment filed 8–20–80; effective thirtieth day thereafter (Register 80, No. 34).
- 3. Amendment filed 7–24–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 30).

Chapter 2.2. Market Enforcement

Subchapter 1. Licensing

Article 1. General Provisions

§ 1700.1. Definitions.

Unless otherwise defined, the captions used in these regulations have no regulatory effect. Words and phrases carry their usual and customary meanings. For purposes of interpretation, the following special definitions apply:

- (a) "The Act" refers to Chapters 6 and 7 of Division 20 of the Food and Agricultural Code, commencing with section 55401;
 - (b) "Applicant" means only the legal entity applying for a license.
- (c) "Control" means the possession of the power to direct or cause the direction of the management and policies of any person.
- (d) "License" means official permission to do something. It includes any indicia of authority issued by the Department. These indicia include documents entitled license, registration, exemption, permit, or certificate. The terms, "indicia of authority," "registration," "exemption," "permit," or "certificate," mean "license."
- (e) "Person" includes an individual, partnership, corporation, limited liability company, firm, company, or other entity. For all purposes pertinent to these regulations a limited liability company shall be treated the same as a corporation.
- (f) "Principal Creditor" means a single creditor, secured or unsecured, who has provided long-term financing of a significant financial interest in the business licensed.
- (g) "Significant Financial Interest" means ownership of at least 10% of the shares of a corporation or at least 10% of the equity of a partnership or limited liability company.
- (h) "Significant Shareholder" means a shareholder who owns or controls at least 10% of the shares of a corporation.

NOTE: Authority cited: Sections 262 and 407, Food and Agricultural Code. Reference: Sections 55401 and 56101, Food and Agricultural Code.

HISTORY

1. New chapter 2.2, subchapter 1 (articles 1–7), article 1 (sections 1700.1–1700.3) and section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1700.2. Records.

- (a) Licensees shall keep the records required by The Act for the later of four years or the resolution of any outstanding complaints.
- (b) For all purposes associated with enforcement of The Act, the licensee's retention of each document required by Food and Agricultural Code section 56273.1 is prima facie evidence of a complete account of sale, but partial absence of such documentation is not conclusive evidence that the account of sale is incomplete. If the absence of documentation arises from factors beyond the control of the licensee, the licensee's testimony may be sufficient substitute for the documents themselves, and the resulting record may be considered complete.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 55611 and 56301, Food and Agricultural Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1700.3. Confidentiality of Records.

The Act requires the Department and its employees hold confidential information derived from the operation of The Act. The Department and its employees may release this information to the public only under certain circumstances specified in The Act. Every employee who works within the programmatic purview of The Act shall read and sign a statement to that effect. The Department shall place this statement in the employee's personnel file.

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 404, 55435.5 and 55483(b), Food and Agricultural Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

Article 2. The Application Process

§ 1701. Application.

- (a) Applicants shall use the Department's preprinted form.
- (1) Applicants shall obtain an application for license package from the Department's Market Enforcement Branch. This package includes, as a minimum, the Department's preprinted forms (Application for License [28–003 (Rev. 04/00)]; Application for Agent License [28–004 (Rev. 04/00)]; Market Enforcement License Affidavit [28–003B (Rev. 04/00)]/Cash Buyers Statement [28–016 (Rev. 04/00)], a two–sided form; Notice of Review of Criminal Information [28–003C (Est. 1/98)/Notice of Review of Credit Information [28–003D (Est. 3/98)], a two–sided form), a copy of the applicable statutes, and a copy of these regulations. The statutes and regulations shall only be sent to first–time applicants. An applicant should read both the regulations and the statutes prior to completing the application.
- (b) Applicants shall submit the completed application to the Department's Market Enforcement Branch.

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 55483, 55522 and 56182, Food and Agricultural Code.

HISTORY

1. New article 2 (sections 1701–1701.8) and section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1701.1. Application for Sole Proprietor, Partnership or Agent's License.

- (a) The first-time applicant shall supply the following information:
- (1) The business name, address, telephone number, mandatory social security number, birth date, and driver's license(s)/identification number(s) of the applicant;
- (2) The names, addresses, and telephone numbers of principal creditors of the business, if any;
- (3) The principal place of business and telephone number in California;
 - (4) The date of submission;
- (5) Self-disclosure of previous license revocation(s) or suspension(s), convictions for financial crimes as described in Section 1702.1(a)(5);
 - (6) A description of the business to be licensed.
- (7) If the application is for an agent's license only, the name, address and telephone number of the person whom the agent represents and the signature of the person's authorized officer or principal endorsing the application;
- (b) The first-time applicant shall attach the following documents prior to submission:
- (1) A list of any current licenses and/or licenses from the previous five years issued by the Department for the applicant;
- (2) A list by an individual of any current licenses and/or licenses from the previous five years issued by the Department for a partner or affiliate of a partnership applicant;
- (3) A list by an individual of any current licenses and/or licenses from the previous five years issued by the Department for any agent of the applicant:
- (4) A signed acknowledgment that the applicant has been informed of the Department's authority to obtain financial information concerning the applicant from credit reporting agencies, creditors, or financial institutions:
- (5) A signed acknowledgment that the applicant has been informed of the Department's authority to obtain criminal record information concerning the applicant or its agent(s);

- (6) The affidavit, required by Food and Agricultural Code section 56189, if any;
- (7) A Schedule of Charges if the applicant is acting as a broker and/or commission merchant;
 - (8) Full payment of all fees required on the application;
 - (9) A list of California commodities handled;
- (10) For Cash Buyers and Cash Buying Processors, a statement of understanding that all transactions shall be made in cash;
- (11) A list of farm products creditors owed sums that are delinquent, if any, including their names, addresses, and amounts owed; and,
- (12) A copy of the formal fictitious name statement for an applicant who notes a "doing business as" (d.b.a.). This is the statement on file with the county in which the applicant does business.

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 404, 5484.75, 55485, 55523, 55524.75, 55525, 56183.5, 56186, 56189 and 56571.7, Food and Agricultural Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1701.2. Application for Limited Liability Company or Corporation.

- (a) The first–time applicant shall supply the following information:
- (1) The business name, business address, telephone number, and taxpayer identification number of the limited liability company or corporation. In addition, the birth date and driver's license(s)/identification number(s) of any chief executive officer/president or chief financial officer/treasurer of any California based limited liability company or corporation. For any non-California based limited liability company or corporation, the birth date and driver's license(s)/identification number(s) of the agent for service of summons listed with the Secretary of State;
- (2) Other information required for all applicants in Section 1701.1(a)(2) through 1701.1(a)(6) of these regulations.
 - (b) The application shall be signed by an authorized representative.
- (c) The first-time applicant shall attach the following documents prior to submission:
- (1) A list by an individual of any current licenses and/or licenses from the previous five years issued by the Department for any member of a limited liability company, corporate officer, or significant shareholder of a corporate applicant;
- (2) For corporations or partnerships, an acknowledgment of criminal record access signed by the authorized company representative and each agent:
- (3) A limited liability company or corporation not registered with the California Secretary of State shall attach its Articles of Incorporation and registration with its State or County of incorporation;
- (4) Other attachments required for all applicants by Section 1701.1(b)(3) through Section 1701.1(b)(12).

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 404, 5484.75, 55485, 55523, 55524.75, 55525, 56183.5, 56186, 56189 and 56571.7, Food and Agricultural Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1701.3. Application Renewal.

Renewal applications need only provide changes to the information requested in Sections 1701.1 or 1701.2 of these regulations.

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 404, 5484.75, 55485, 55523, 55524.75, 55525, 56183.5, 56186, 56189 and 56571.7, Food and Agricultural Code.

HISTORY

1. New section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1701.4. Application Processing.

- (a) The Department shall reject an incomplete application, but the applicant may cure defects if he or she does so within the prescribed time frame
- (1) After initial submission and review, the Department shall provide an applicant whose application is incomplete written notice at the appli-

cant's address listed on the application. This notice shall specify the missing information. The applicant has sixty (60) calendar days from the date of the notice to supply the missing information. The notice shall also specify that failure to postmark a complete application within the sixty (60) days may result in denial of the application.

- (b) After submission of the application, applicants shall additionally submit the following if the Department asks the applicant to do so:
- (1) Proof of Bond if the Department requires a bond, as described in the Act:
- (A) the applicant may obtain an endorsement on a pre-existing bond if:
 - 1. the prior bond holder agrees in writing, and
- 2. the bond was established for the same or a similar purpose. This includes a bond obtained to satisfy the requirements of the federal Perishable Agricultural Commodities Act (PACA).
- (b) Subject to statutory minimums, the face value of the bond shall be at least 20% of the dollar volume of the applicant's business. The applicant may submit a Certificate of Deposit or another document of like integrity as the bond. The substitute shall be disapproved if the Department is not fully satisfied that the substitute is of like integrity.
- (2) A Request for Exemption and the Department–approved exemption package, if applicant requests exemption for someone convicted of a crime affecting licensure under The Act, as described in Section 1702.1 of these regulations.
- (c) The 90-day time frame in which the Department shall decide whether to approve the license does not begin until after the Department receives the last of the requested documents.
 - (d) Application Fees are not refundable.
- (e) The Department shall consider an application incomplete, and deny it, unless the applicant submits requested documents and full payment of fees within sixty (60) calendar days from the date the Department requests them, with one exception. The exception is:
- (1) Proof of Bond. If the applicant applied for a bond, but has not yet received proof from the bonding company, the Department may approve a conditional license instead of denying one altogether. The applicant shall have met all other conditions of licensure. If the Department approves the conditional license, the following conditions shall be met:
- (A) the licensee shall, within ninety (90) days, submit proof that the bond has been secured;
- (B) the licensee shall post the proof beside the license until issuance of a new, unconditional license;
- (2) If the licensee fails to secure a bond within ninety (90) days, the conditional license automatically expires; and,
- (A) failure to submit and post proof within ninety (90) days is prima facie evidence of a failure to secure the bond.
- (f) The Conditional License shall state that it is conditional, and the conditions listed above shall be printed on the face of the Conditional License

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 263, 404, 55435.5(a), 55435.5(b), 55483, 55484.75, 55485, 55524.75, 55525, 55527.6, 55741(c), 56183.5, 56185, 56185.75, 56186 and 56571, Food and Agricultural Code; and Section 15376, Government Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1701.5. License Processing.

- (a) The Department shall not issue a license to certain persons specified in Food and Agricultural Code Sections 55484.75, 55524.75, and 56185.75. If the Department finds that an applicant is one of those persons, the Department shall cease review of the application and notify the applicant as soon as possible. This notice is not a denial under the law and does not convey any rights to a hearing.
- (b) The Department shall accept or deny an application within 90 days of receipt of the completed application as defined in Section 1701.4 of these regulations. The Department does not have the power to grant extensions of time. Denial of an application means the applicant shall not

reapply for thirty (30) days. Applicants should ensure required material can be timely collected to prevent denial by operation of law.

- (c) If the Department approves the license, the Department shall issue the applicant a document evidencing the approval. If the Department denies the license, the Department shall notify the applicant in writing. The notice shall include a statement of issues setting forth the grounds for denial
 - (d) If the Department denies the license:
- (1) The Department shall track the denial by the name(s) and social security numbers of the applicants. Submission of the application to the Department operates as consent to this tracking.
- (2) The Department shall not consider a new application from the same applicant for a period of time required by statute. That period is thirty (30) days from *the later* of the date found on an uncontested Notice of Denial or the effective date of the Decision and Order upholding a contested Notice of Denial, as described in Article 7 of these regulations. If the Department finds such a prior denial, the Department shall cease to consider the application and notify the applicant as soon as possible. This notification shall not be construed to be a denial. It conveys no hearing rights under Article 7 of these regulations.

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c) Food and Agricultural Code. Reference: Sections 263, 404, 55485, 55488(e) and (f), 55525, 55528(e) and (f), 56186, 56190(e) and (f), Food and Agricultural Code; Chapter 4.5 (commencing with Section 11400), Chapter 5 (commencing with Section 11500); and Section 15376, Government Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1701.6. Appeal Procedures When License Is Denied.

(a) If the license is denied, there are two methods by which an appeal can be made: a writ pursuant to the Code of Civil Procedure, or an administrative hearing as described in Article 7 of these regulations. The Department shall not tell the applicant the course he or she should follow. However, it is considered best practice to pursue administrative remedies first. Denied applicants may wish to seek the advice of counsel.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 55528 and 56190, Food and Agricultural Code; and Section 1084, et seq., Code of Civil Procedure.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1701.7. License Period; Forfeiture.

- (a) A license is valid for one full year from date of issuance. A licensee shall renew his or her license each year for it to remain valid. The licensee can expect it to be renewed unless the Department revokes it or unless it has been forfeited due to one of the following events:
 - (1) the holder surrenders the license;
 - (2) the holder dies;
 - (3) the partnership dissolves;
- (4) the holder of a significant financial interest in a corporation or limited liability company transfers his or her interest to another person or entity; or,
- (5) the holder files for bankruptcy under provisions other than those permitting and governing reorganization under bankruptcy.
- (b) Forfeiture takes place by operation of law. The licensee has no administrative hearing rights. The Department shall not "reissue" a license that is forfeited or "rescind" a forfeiture. The former licensee shall submit a new application, in order to receive a license. It shall be treated in all respects except one, bonding, as an initial application. Licensees should time transfers of ownership so as not to forfeit the old license before the Department issues the new license. The Department shall not change the result of a mistimed transfer of ownership.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 262, 404, 55485.5, 55524.75, 56133.5(b), 56182.6, 56185.75 and 56186.5, Food and Agricultural Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1701.8. Bonding.

- (a) Under circumstances outlined in The Act, the Department shall require a bond. This statutory requirement may affect the denied applicant who subsequently seeks to become an agent as well as the denied applicant who reapplies for the original license type. A bond may be required on both the agent and the employer.
- (b) Bonding procedures are described in Section 1701.4 of these regulations.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 55435.5(b), 55527.6, 56133.5(b) and 56189.5, Food and Agricultural Code

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

Article 3. Investigations

§ 1702. Reasonable Grounds for Investigation.

- (a) The Act authorizes the Department to investigate a Verified Complaint submitted (including but not limited to complaints submitted to initiate Alternate Dispute Resolution (ADR) as described in Section 1703 of these regulations) and requires that the Department investigate if, "in the opinion of the Department," there appears to be "reasonable grounds" to investigate.
- (1) "In the opinion of the Department" means the Department has some discretion. This discretion is limited by case law, practice, The Act, and these regulations.
- (2) "Reasonable grounds" means the Department has information which a reasonable and trained investigator would recognize as supporting, although not necessarily proving, the essential elements of a flagrant or repeated violation of a licensing requirement. Gossip, innuendo, or unverified and anonymous tips are insufficient to constitute reasonable grounds.
- (3) The Department may investigate the financial stability of an agent or individual with a significant financial interest during the course of an investigation. A signed release authorizing the Department to obtain financial information concerning an agent or an individual with a significant financial interest from credit reporting agencies, creditors, or financial institutions shall be requested by the Department in the event of such an investigation.
- (4) These principles apply not only to the initial decision to investigate or not to investigate, but to decisions to keep an investigation going or to close it.
- (5) Complainants may obtain Verified Complaint forms [28–012 (Rev. 11/98)] at the Market Enforcement headquarters office.
- NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 404, 408, 55721, 56381 and 56382.5, Food and Agricultural Code.

HISTORY

1. New article 3 (sections 1702–1702.1) and section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1702.1. Criminal Records Exemption.

- (a) The Act requires that an exemption be obtained for a licensee to associate individuals specified in The Act who have been convicted of a crime that includes as one of its elements the financial victimization of another. Such crimes are exemplified in California by the California Penal Code chapter/sections which follow, but include similar crimes from other jurisdictions (which are not listed):
 - (1) Title 8, Chapter 4, section 211 et seq. (Robbery);
- (2) Title 9, Chapter 9 [319 et seq. (Lottery)], Chapter 10 [330 et seq. (Gaming)], Chapter 10.5 [337.1 et seq. (Horse Racing)], Chapter 11 [343 et seq. (Gold Purchasing)], and Chapter 12, section 350 (counterfeit of registered mark), section 351a (false use of sales dealer's name), section 356 (false mark in lumber sale);
 - (3) Title 10, section 395 (false statements to affect market price);
- (4) Title 12, section 424 et seq. (Crimes Against the Revenue and Property of the State); and

- (5) Title 13, Chapters 2 [section 458 et seq. (Burglary)], 4 [section 470 et seq. (Forgery and Counterfeiting)], 5 [section 484 et seq. (Theft)], 6 [section 503 et seq. (Embezzlement)]; 7 [section 518 et seq. (Extortion)]; 8 [section 528 et seq. (False Personation and Cheats)]; 10 [section 548 et seq. (Insurance fraud)]; 12.5 [section 560 et seq. (Bailments)]; 12.6 [section 565 et seq. (Crimes involving dairy equipment)]; 14 [section 557 et seq. (Fraudulent documentation of title to merchandise)].
- (b) The Department shall obtain a criminal record from the California Department of Justice (DOJ) when it has reasonable basis to believe a person has been convicted of a crime as set out herein, or when investigating the licensee for alleged violations of the Act. The Department shall not otherwise obtain such records on all applicants or persons specified in The Act.
- (c) If the criminal record discloses a relevant conviction, the Department shall give notice to the licensee of the need to obtain an exemption. If granted, the exemption permits the licensee to employ the designated person or, in the case where the convicted person is the licensee, to maintain the license.
- (1) The notice shall not communicate the specifics of the conviction. The notice shall only include the fact that a relevant conviction appeared during the criminal record review. The notice shall be accompanied by an exemption packet which shall provide the applicable documentations.
- (2) The Department may set and adjust the time frame for response, considering the circumstances of the licensee, a reasonable time allowance for obtaining documentation, and the egregiousness, frequency, and recency of the underlying crime(s).
- (d) If the Department does not grant an exemption, the Department shall notify the licensee using a Statement of Issues (if an application is in progress) or an Accusation (if the license has already been issued), even if the Department is not expecting to actually discipline the licensee. The licensee may either submit a Plan of Correction that eliminates the association of the non–exempt person or submit a Notice of Defense to appeal the decision.
- (1) Where the exemption denial is for an employee, the matter may be appealed by the licensee/applicant, the employee, or both.
- (e) The appeal shall be heard under the standards set out in The Act for appeals from exemption decisions and the procedures set out in these regulations for denial or revocation under Article 7. The burdens of proof and producing evidence standards shall apply to an exemption appeal depending upon whether it is in conjunction with an initial application or a revocation as described in Article 7 of these regulations.
- (f) A licensee or applicant should review Food and Agricultural Code section 55435.5 or 56133.5 as applicable to his or her license.

NOTE: Authority cited: Sections 407, Food and Agricultural Code. Reference: Sections 263, 404, 55435.5, 55485.75, 55488, 55525.75, 55528, 56133.5, 56134.75, 56186.75 and 56190, Food and Agricultural Code; and Chapter 4.5 (commencing with section 11400), Chapter 5 (commencing with section 11500), Government Code; and Part 2 (commencing with section 307), Code of Civil Procedure.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

Article 4. Private Disputes

§ 1703. Alternative Dispute Resolution Initiation.

- (a) An aggrieved grower or licensee may initiate Alternative Dispute Resolution (ADR) through the Department by filing a Verified Complaint within nine (9) months of when a dispute arises, as specified in the Act.
- (1) Compliance with the 9-month time frame is jurisdictional and the complainant shall prove compliance.
- (A) The provisions of a valid, written contract between the complainant and the licensee are conclusive evidence of due date where the contract addresses due date for account of sales.
- (B) In the absence of a written contract the complainant may prove dates through other competent evidence. This evidence could include—

but is not limited to—past practice, affidavits, letters, indicative behavior of parties, or timing which establishes the account of sale could not have been due longer ago than nine (9) months from the filing of the Verified Complaint.

- (C) Lacking a written contract or competent evidence, the Department shall conclude the complainant has not established compliance with the 9-month time frame.
- (D) It is not necessary for the purposes of this section that the licensee render an actual, conforming account of sales.
- (E) A purported "Account of Sale" is not complete unless it meets each and every element established by Food and Agricultural Code Section 56273.1. The issue in these circumstances is when an accounting was due, not whether one was done.
- (b) If the underlying transaction is subject to the federal Packers and Stockyards Act, 1921 or the federal Perishable Agricultural Commodities Act, 1930 (PACA), the grower shall not initiate ADR. This requirement is jurisdictional. The Department shall not waive it. Satisfying this requirement is the complainant's responsibility, not the Department's. The complainant shall secure written confirmation, signed by an appropriate official, that the transaction is not subject to the Federal laws stated in this subdivision.

NOTE: Authority cited: Sections 407 and 55721, Food and Agricultural Code. Reference: Sections 404 and 56382.5, Food and Agricultural Code; and Section 15376, Government Code.

HISTORY

1. New article 4 (sections 1703–1703.5) and section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1703.1. Alternative Dispute Resolution Pursuant to Parties' Written Contract.

- (a) If, within the time frame found in The Act, the respondent elects to pursue a different ADR process pursuant to the parties' written contract, the Department shall cede authority to that process. The Department's jurisdiction may be restored under certain circumstances. These circumstances are set out in The Act.
- (1) If one of the parties believes the other is not pursuing ADR in good faith, then he or she may be able to restore Department jurisdiction. These circumstances are set out in the Act.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 56382.5, 56444 and 55743, Food and Agricultural Code; and Section 15376, Government Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1703.2. Instituting Department's Alternative Dispute Resolution Procedure.

- (a) Submission of a Verified Complaint, written denial of federal jurisdiction, two copies of relevant documents in the complainant's possession, and payment of \$60 trigger the jurisdiction of the Department's ADR process, subject to the reservations set out in Section 1703(a).
- (1) The Department shall notify the respondent and demand relevant records within five business days of the receipt of a Verified Complaint by sending a notice and demand by certified mail. A Verified Complaint shall consist of either a copy of complainant's PACA complaint or a completed Department form complaint. The Department shall enclose one copy of the complainant's documents with the notice and demand. The respondent shall deliver two sets of the records demanded within thirty (30) calendar days of the date on the notice and demand letter.
- (A) The Department shall determine which records are relevant based upon the complaint and specify those records in its notice and demand letter.
- (B) Exercise of a party's election to pursue a contract ADR process, as described in Section 1703.1, does not cut off this requirement. Respondent shall turn over two sets of the records regardless of whether or not a contract ADR process is pursued. The Department shall use the records to decide whether they provide a reasonable basis for discipline. The Department shall retain them in case ADR jurisdiction is restored.

- (C) The Department shall send one copy of the records to the complainant and shall retain one copy for its own purposes.
- (D) Willful failure to deliver the records to the Department is cause for discipline as a flagrant violation of The Act. It is also cause for civil penalties and possible criminal prosecution. The Department shall issue a second notice by registered mail if the respondent fails to deliver the records on time. Failure to deliver following a second notice establishes a rebuttable presumption the failure is willful.
- (E) Multiple simple failures to deliver records to the Department is also cause for discipline as repeated violations of The Act.
- (F) If the Department establishes the charge at hearing, the hearing Administrative Law Judge may not rule "de minimus" either a willful failure or repeated failures, but shall impose discipline at the next step in severity due under the doctrine of "Progressive Discipline."
- (2) The Department shall issue a summary based upon a reading of the records received. The Department may attempt to verify the accuracy of the records received through investigation.

NOTE: Authority cited: Sections 407, 55721 and 56183.5(c), Food and Agricultural Code. Reference: Sections 404 and 56382.5, Food and Agricultural Code; and Section 6250 et seq., and 15376, Government Code.

HISTORY

1. New section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1703.3. Request for Formal Alternative Dispute Resolution.

- (a) If parties have not achieved a settlement within thirty (30) days after the summary has been issued, as described in Section 1703.2, either the complainant or the respondent may initiate formal ADR by submitting the Department's prescribed "Request for Formal ADR" form [28–013 (Rev. 11/99)]. If the Department receives such a request, it shall provide all parties with a listing of acceptable alternative dispute resolution entities in order for ADR to commence within ninety (90) calendar days of receipt.
- (1) If the Department does not receive such a request within sixty (60) calendar days from the date it mails its summary, the Department shall close the file.
 - (2) Both parties must agree to a mutually acceptable ADR entity.
- (A) If the Respondent refuses, neglects, or fails to participate in the ADR process, the Department shall take appropriate disciplinary action against the license held by the Respondent.
- (B) If the complainant refuses, neglects, or fails to participate in the ADR process, the Department shall no longer pursue the matter.
- (3) ADR entities shall conduct proceedings in accordance with standard procedures promulgated by the American Arbitration Association or other alternative dispute resolution entity acceptable to both parties.
- (A) It is the responsibility of parties to deal with the ADR entity directly to complete arrangements and notify the Department if parties need the Department's assistance (including financial under subparagraph (c), following).
 - (b) Parties may wish to seek the advice of counsel.
- (c) If the ADR entity's hearing officer orders an audit, an act in his or her sole discretion, the Department shall, upon notification, advance the costs. The ADR hearing officer shall apportion all costs (including those of the audit) at the close of the hearing.
- (1) The Department may not absorb these costs. The Department shall pursue all available remedies to collect reimbursement of these costs once they are apportioned by the ADR hearing officer. The Department may not forgive the debt.
- (2) The Department shall require the parties to sign a promissory note prior to advancing the costs of an audit. The promissory note shall require the parties to repay as ordered by the ADR hearing officer and shall notify the parties of the possibility of enforcement measures.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 55722.5 and 56382.5, Food and Agricultural Code; and Section 6250 et seq., Government Code.

HISTORY

- 1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).
- Amendment of section and NOTE filed 11-17-2004; operative 12-17-2004 (Register 2004, No. 47).

§ 1703.4. AAA Hearing.

- (a) The AAA hearing officer shall render a written decision and furnish the Department with a copy at the time he or she sends it to the parties
- (1) The Department shall not interfere with the independent judgment or process of the AAA hearing officer.
- (2) Determinations that conditions of licensure have been violated are not within ADR's jurisdiction. Any purported findings of such violations, whether express or implied, may not be construed res judicata or collateral estoppel, nor in any other way binding or persuasive authority in the Department's imposition of licensing discipline.
- (3) The Department shall consider this decision in its independent consideration of what discipline, if any, may be appropriate.
- (4) If the Department determines that a party did not participate in good faith during the dispute resolution process, that party shall be subject to license discipline. Examples of a failure to negotiate in good faith include, but are not limited to, failure to abide by the terms of the agreement reached during the dispute resolution process, and failure to pay the required costs incurred during the process, either to AAA or to the Department.
- (b) The AAA hearing officer may not order the decision or record sealed. Parties may not agree to seal them. However, as an investigative tool being used in an investigation in progress, neither the decision nor the record shall be construed to be a public record subject to public disclosure unless and until it leads in some way to the filing of an action to impose discipline.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 55744, 56382.5 and 56445, Food and Agricultural Code; and Section 6250 et seq. and 15376, Government Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1703.5. What If I Filed A Verified Complaint Prior to January 1998?

- (a) Beginning January 1, 1998, the Department shall offer complainants who filed Verified Complaints prior to January 1, 1998, and respondents the opportunity to use the new Alternate Dispute Resolution process instead of the settlement and hearing process in effect when the complaints were filed. This offer shall be in writing and served by registered mail at the last known address of complainant first. If the complainant agrees in writing within thirty (30) calendar days from receipt, the Department shall extend the offer to the respondent (again in writing and served by registered mail at respondent's last known address). Unless the respondent objects in writing within thirty (30) calendar days from date of receipt, the Department shall convert the pre–January 1, 1998 case to the post–January 1, 1998 system and notify parties of the next step due under that process.
- (b) Whether or not complainant elects to use the new process for resolving the private dispute, licensing hearings shall be conducted according to the procedure described in these regulations no matter when the issues arose or how they came to the attention of the Department.
- (1) The substantive law which applies to complaints filed prior to January 1, 1998 shall continue to be the pre–January 1, 1998 law.
- (2) A complainant's decision to continue under the old process for resolving private disputes may result in the joint conduct of a licensing hearing and a private dispute hearing. In that circumstance, the presiding Administrative Law Judge shall hold a pre-hearing conference to work out order of hearing and related issues.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 55483(c), 55485.75, 55488, 55525.75, 55528, 55721, 55722.5, 56185.5, 56186.75, 56190 and 56382.5, Food and Agricultural Code; and Chapter

4.5 (commencing with Section 11400); and Chapter 5 (commencing with Section 11500), Government Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

Article 5. Discipline of Licensees

§ 1704. Violations.

- (a) The Department has several options for dealing with violations of licensing law, including but not limited to civil penalties, criminal charges, or administrative discipline. These options are not mutually exclusive. The Department may pursue one or all, at the same time or in phases, at its discretion. These regulations address only administrative discipline.
- (b) Once an initial license has been issued unconditionally, a license becomes vested. The Department shall meet both substantive and procedural requirements if it intends to discipline the licensee. The Department bears both the burden of proof and the burden of producing evidence. The Department shall prove each disputed element of any charge which the Department contends warrants discipline.
- (1) Although The Act refers to Renewal Applications, "denials" of renewal applications shall be treated as "revocations" for all procedural and substantive due process purposes.
- (2) The standard of proof is "preponderance of the evidence" rather than either "clear and convincing" or "beyond a reasonable doubt."
- (c) If the Department reasonably believes a licensing action is warranted, the Department may bring charges against the licensee. The Department shall notify the licensee in writing. The notice shall include a statement of charges, called an "Accusation," that sets out the elements which are grounds for discipline.
- (1) The Department may issue an Accusation even where a settlement or plan of correction has been negotiated. That Accusation is a public record subject to public disclosure. The contents of an Accusation are subject to settlement.
- (d) The Department shall follow a policy of "progressive discipline" in most circumstances. As applied to The Act, "progressive discipline" means that discipline shall be imposed in increments of severity over time unless circumstances warrant a quicker resort to a more severe response. A corrective action plan shall generally be imposed first, followed by Probation and/or Suspension of the License, followed by Revocation. However, discipline may progress faster depending on the severity of the misconduct or the licensee's intentions when committing the violation(s).

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 263, 404, 55435.5, 55484, 55484.75, 55485.5, 55524, 55524.5, 55524.75, 55722, 56133.5, 56185.5 and 56185.75, Food and Agricultural Code; and Sections 6250, 6252, Chapter 4.5 (commencing with section 11400), Chapter 5 (commencing with section 11500), Government Code.

HISTORY

1. New article 5 (sections 1704–1704.2) and section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1704.1. Appeal Procedures.

If the licensee wishes to appeal the disciplinary action undertaken by the Department, the procedures under Section 1706.1 of these regulations shall be followed.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 55485.75, 55488, 55525.75, 55528, 56186.75 and 56190, Food and Agricultural Code; and Chapter 4.5 (commencing with section 11400), Chapter 5 (commencing with section 11500), Government Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

§ 1704.2. Effect of a Revocation.

If a license is revoked, the Department shall not consider a new application from the same licensee for a period of time required by statute. That period is two years from *the later* of the date found on an uncontested Accusation or the effective date of the Decision and Order adopting

a contested Accusation. If the Department finds such a prior revocation, the Department shall cease to consider the application and shall notify the applicant as soon as possible. Such notification is not a denial and does not convey any rights to a hearing.

NOTE: Authority cited: Sections 407, 55483(c) and 56183.5(c). Food and Agricultural Code Reference: Sections 404, 55435.5(b), 55485.5, 55488, 55484.75, 55524.75, 55525.75, 55528, 56183.5(b), 56186.5, 56185.75, 56186.75 and 56190, Food and Agricultural Code; and Chapter 4.5 (commencing with section 11400), Chapter 5 (commencing with section 11500), Government Code.

HISTORY

1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).

Article 6. Dismissals, Range of Discipline, and Settlements

§ 1705. General.

- (a) Neither the Secretary nor anyone acting on behalf of the Secretary, including the hearing ALJ, shall dismiss a case in which the Department proves a violation, however minor, of The Act.
- (b) Notwithstanding subdivision (a), the Department may settle a revocation or a denial prior to or after a hearing. It may, following hearing, adjust discipline based upon factors set out in The Act.
- (1) Settlements may include, by way of example and not limitation, tailoring admissions or the effective date of action in exchange for longer than statutory prohibitions on reapplication; Conditional Licenses; stays of revocation pending performance on probationary status; licensee payment for heightened scrutiny during probation; suspensions; restitution; sealing of the stipulation; modifying the Accusation or Statement of Issues, or any combination of conditions that tailor the discipline to the circumstances of the case.
- (2) Settlements shall be in writing and signed by the parties or their respective counsel.
- (c) An order shall be issued even where based upon sealed stipulation. A deputy to whom the Secretary has delegated the authority shall sign on behalf of the Department.
- (1) The order shall incorporate the settlement by reference and note the sealing of the stipulation.
- (d) While stipulations may be sealed, the Accusation or Statement of Issues and the order shall not be sealed.

NOTE: Authority cited: Sections 407, 55483.5(c) and 56183.5(c), Food and Agricultural Code. Reference: Sections 404, 55484.5, 55485.75(d), 55524.5, 55525.75(d), 56185.5 and 56186.75, Food and Agricultural Code.

HISTORY

1. New article 6 (section 1705) and section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

Article 7. Hearing Procedures

§ 1706. License Denial.

- (a) If a hearing is requested under Article 3 of these regulations, the following procedures apply:
- (1) The Department shall issue a Statement of Issues. The following documents shall accompany the notice:
- (A) a Notice of Defense form with preprinted address and facsimile telephone number for filing, so that the applicant may request a hearing by either of these means;
- (B) a Request for Discovery form with preprinted address for filing, so that the applicant may request discovery; and,
- (C) a copy of the Statutes and regulations applicable to the reasons for the Department's denial.
- (b) If the applicant submits a Notice of Defense within the time frame, the Department shall schedule a hearing within 90 calendar days of its receipt. If the applicant does not submit the Notice of Defense within the time frame set out in statute, the Department's denial is final for all purposes.

- (1) An applicant may "waive time." The Department and an applicant may agree in writing to a later date to begin a hearing. The Department may do so if the applicant says it would improve the applicant's presentation of his or her case or fit his or her schedule better. The Department shall not agree to an extension that would postpone the hearing more than one (1) year from the Department's receipt of the Notice of Defense.
- (c) An appellant applicant may obtain a brochure from the Market Enforcement headquarters office that explains procedures under Chapters 4.5 and 5 of the Government Code. The Department follows these procedures generally, although it does not require strict compliance with the Office of Administrative Hearing's (OAH) "Rules of Court."
- (1) The Code authorizes either Administrative Law Judges (ALJ) appointed by the Department or by OAH to conduct the hearing. The Department shall assign its own ALJ unless the applicant specifically requests an OAH hearing or unless the Department determines an OAH assignment to be warranted by the circumstances of a particular case or case load. If an applicant desires an OAH hearing, the Department shall arrange one if the applicant meets two conditions: (A) the applicant shall agree in writing to be bound by the OAH "Rules of Court"; and (B) the applicant shall pay the Department in advance the estimated difference in cost between the two types of proceedings. The Department calculates the estimated difference based on the following formula: the sum of the difference between the OAH daily billing rate and the Department's daily rate, multiplied by the party's estimate as to the duration of trial. The Department shall remit any credit balance to the applicant after issuance of the final decision. The Department shall bill the applicant for any debit balance
- (d) ALJs hearing Market Enforcement cases have some limitations that OAH judges hearing other types of cases do not. Food and Agricultural Code sections 55488, 55528, and 56190 describe these limitations. These limits apply whether the presiding judge is a Department employee or an OAH Administrative Law Judge.
- (e) An applicant shall meet both substantive and procedural requirements. An applicant bears both the burden of proof and the burden of producing evidence adequate to convince the Department that the Department should license the applicant.
- (f) The appellant may expect a written decision within sixty (60) calendar days after submission. Submission means the party's presentation has concluded.
- (1) Sometimes judges require written closing arguments or give parties the opportunity to send in documents after the hearing. The sixty days shall not begin to accrue until after the submission of these documents.
- (2) The sixty (60) days are guideline, not mandate. The Department has no power to force a judge to actually produce the decision within sixty (60) calendar days.
- (g) The Department may settle with the appellant at any time prior to the release of a final decision. Settlement, called a "Stipulation and Order," may include (but is not limited to) the issuance of a Conditional License on terms negotiated between parties.

NOTE: Authority cited: Sections 407, 55483(c) and 56183.(c), Food and Agricultural Code Reference: Sections 404, 55485.75, 55488, 55525.75, 55528, 56186.75 and 56190, Food and Agricultural Code; and Chapter 4.5 (commencing with section 11400), Chapter 5 (commencing with section 11500) 15376, Government Code.

HISTORY

1. New article 7 (sections 1706–1706.1) and section filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).

§ 1706.1. Accusation.

- (a) Hearings commenced pursuant to Article 5 of these regulations are conducted with the procedures described in Section 1706 with the following exceptions:
- (1) The document notifying the licensee that licensing discipline is being undertaken is called an Accusation.
- (2) The Department bears the burdens of proof and producing evidence to convince the ALJ that the licensing discipline should be upheld. NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 404, 55528(f) and 56190(f), Food and Agricultural Code.

HISTORY

Chapter 2.5. Export Market Development

Article 1. Criteria for State Funds and Cooperator Funds

§ 1710. Criteria for Qualifying Cooperator Contributions.

A claimed contribution shall:

- (a) Be clearly related to an activity described in an approved marketing plan.
- (b) Be for activities conducted during the period covered by the project agreement.
 - (c) Be documented by the cooperator, showing:
 - (1) Dates of the activity.
 - (2) Purpose of the activity.
 - (3) Location of the activity.
 - (4) Who conducted the activity.
 - (5) Who participated in the activity. Identify groups or individuals.
 - (6) The method of computing the reported contribution.
- (7) The method of computing the contributions of personnel, materials, facilities, services, and supplies expressed in terms of United States dollar value.
 - (d) Be verifiable by audit. The cooperator shall:
- (1) Keep a record of the methods used to compute the value of noncash contributions.
- (2) Retain documents used as the basis for reporting contributions, these include:
- (A) If available, copies of invoices or receipts for expenses paid by the cooperator or third party cooperator; or
- (B) If invoices are not available, an itemized statement from the cooperator or third party cooperator as to what costs it incurred; or

- (C) If neither of the foregoing is available, a statement from the cooperator or third party cooperator as to what goods and services it provided; or
- (D) If none of the foregoing are available, a memo to the file of the cooperator's estimate of what contributions were made by the cooperator or third party cooperator, item by item, and the method used to assign a value to each. The memo to the file must contain the reason(s) that the documentation in (a) through (c) above could not be obtained.
- (e) Be in addition to what would have been spent if there had been no foreign agricultural market development program.
- (f) Be reported by the cooperator annually as specified in the project agreement showing contributions by country.

NOTE: Authority cited: Sections 407, 58563 and 58574, Food and Agricultural Code. Reference: Sections 58563 and 58574, Food and Agricultural Code.

HISTORY

1. New Subchapter 2.5 (Article 1, Sections 1710–1712) filed 5–30–86; effective thirtieth day thereafter (Register 86, No. 22).

§ 1711. Cooperator Contributions and State Funds.

Project funds, both cooperator and third party cooperator contributions and State funds, must be expended on direct foreign market development activities for California agricultural products.

- (a) Authorized Uses. Project funds, both cooperator and third party cooperator contributions and State funds, may be used to pay costs which are essential to, and clearly identifiable with, the carrying out of activities specified in the cooperator annual marketing plans, or amendments thereto, approved by the Director. Authorized uses include:
- (1) A cooperator's own funds and those of a third party cooperator, as stated in the project agreement, may qualify as a contribution if used for foreign agricultural market development activities, and meet the criteria in Section 1710. These activities, for which State funds may also be expended, include, but are not limited to, the following:
- (A) Transportation and shipping costs of export market development materials.
 - (B) Cost of consumer samples.

[The next page is 213.]

- (C) Cost of displays and promotional materials.
- (D) Advertising costs.
- (E) Rent for facilities in foreign countries.
- (F) In-store demonstrations.
- (G) Participation in approved trade fairs, exhibits, etc.
- (H) Merchandising costs.
- (I) Public relations costs.
- (J) Introduction of new products.
- (K) Market research cost.
- (2) The cost of cooperator personnel employed to work exclusively on foreign agricultural market development projects, or addressing constraints.
- (b) Unauthorized Uses. Project funds, both cooperator and third party cooperator contributions and State funds, shall not be spent on the following unauthorized uses:
- (1) The cost of individual salaries of a cooperator's staff or a third party cooperator's staff not exclusively devoted to the foreign agricultural market development project.
- (2) Except as may otherwise be specifically provided in the Marketing Plan, travel, personal expense, per diem and living costs and value of time of cooperator board or committee members, third party cooperators, or trade team members, participating or attending foreign market development activities.
 - (3) The cost of membership in clubs and professional organizations.
- (4) Insurance on household goods and personal effects, including privately-owned automobiles, whether overseas or stored in the U.S.
 - (5) Payment of indemnity or fidelity bond costs.
- (6) Prizes or awards in connection with contests or similar activities. This does not preclude the use of project funds to purchase appropriate trophies to be awarded in connection with an approved activity of the Cooperator.
 - (7) Fees for credit cards.
 - (8) Printing business cards.
 - (9) Purchasing and mailing seasonal greeting cards.
 - (10) Office parking fees.
 - (11) Gift items.
- (12) Refreshments for office staff such as coffee, tea, etc., and any related equipment such as coffee pots, cups, glasses, and other such items.
 - (13) Transportation expenses for prospective job applicants.
- (14) Subscriptions to non-trade related publications or publications which are for the personal convenience of staff.
- (15) Capital investments such as permanent structures, real estate, office equipment and furniture.
- (16) Services generated by USDA or the State for which the cooperator made no expenditure of funds.
 - (17) The value of free publicity generated by the cooperator.
 - (18) Giveaways, price off deals or price discounts on the product.
- (19) Value of time spent by general audiences who attend and observe a cooperator–sponsored conference, workshop, demonstration or trade seminar.

NOTE: Authority cited: Sections 407, 58563 and 58574, Food and Agricultural Code. Reference: Sections 58563 and 58574, Food and Agricultural Code.

§ 1712. Transfer of State Funds.

- (a) State funds may be transferred to the cooperator as a reimbursement
- (1) after the cooperator has completed the total approved marketing plan and project agreement, or
- (2) after an identifiable part of the approved marketing plan and project agreement has been completed.
- (b) State funds not to exceed fifty percent of the approved expenditure shall be paid to the cooperator upon submission of properly documented, authorized expenses which have been incurred and which have been approved by the Director.

NOTE: Authority cited: Sections 407, 58563 and 58574, Food and Agricultural Code. Reference: Sections 58563 and 58574, Food and Agricultural Code.

Chapter 3. Milk Stabilization and Marketing of Milk and Dairy Products

Subchapter 1. Unlawful Practices in Marketing Milk and Dairy Products

Article 1. General Provisions

§ 1800. Authority to Promulgate.

NOTE: Authority cited: Sections 16, 4143, 4361.5, Food and Agricultural Code. 1. Subchapter 3 originally printed 7–25–45 (Title 3).

- 2. Revised subchapter 3 filed 4–9–56; effective thirtieth day thereafter (Register 56, No. 7). For prior amendments in subchapter 3 refer to Registers 14, No. 5, and 54, No. 3.
- 3. Repealer filed 7-9-64; effective thirtieth day thereafter (Register 64, No. 15).
- 4. Editorial correction of printing error in HISTORY 2. (Register 91, No. 24).

§ 1801. Definition

"Code," as used in these regulations means the Food and Agricultural Code.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Section 61341, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).
- 2. Amendment filed 10–25–82; effective thirtieth day thereafter (Register 82, No. 44).

- 3. Repealer filed 8-8-2005; operative 9-7-2005 (Register 2005, No. 32).

§ 1811. Cost Components of Dairy Processing — Manufacturers, Distributors and Handlers.

In determining whether a manufacturer, distributor, or handler sold milk, cream, or any other dairy product(s) below cost, the Department shall evaluate the total consideration paid or exchanged for the raw product and the total expenses incurred and allocated for manufacturing, processing, handling, sale, and delivery.

(a) Milk processing and distributing costs shall be calculated using cost element categories which include, but which are not limited to, those

specified below. All costs and expenses incurred, and any non-cash or other value received or given must be included in cost calculations.

- (1) Ingredient Cost. Procurement of raw milk and other ingredients including, but not limited to additives and flavorings, premiums, service charges, federal, state, or local assessments.
- (2) Labor Costs. All salaries, wages, benefits, and other compensation for workers and staff.
- (3) Packaging Costs. All costs for purchasing packaging materials and for packaging products for sale.
- (4) Shipping and Freight/Transportation/Storage Expense. All costs related to storing and transporting products.
- (5) Waste, Shrinkage, Spoilage. All costs or values related to ingredient and finished product waste, shrinkage, spoilage.
- (6) Manufacturing and Administrative Costs. All fixed and variable costs directly related to processing, manufacturing, sales and distribution of products, and associated administrative activities. For handlers, manufacturers, and distributors with more than one product line, costs should be allocated to each line using an allocation method that is both consistently applied and which is consistent with Generally Accepted Accounting Principles.
- (A) Fixed Costs. Land and property expenses, property taxes, financing, leases, insurance, and other costs that are commonly considered fixed.
- (B) Variable Costs. Plant expenses incurred to manufacture or produce product lines, including maintenance and testing of plant and equipment, non-capitalized furniture and fixtures, supplies, utilities, taxes, and other costs that are commonly considered variable.
- (7) Asset Charges. Costs related to capital equipment and assets including depreciation, amortization, and capital repairs.
- (b) Allocation methods selected for distributing costs must be fair, consistent with Generally Accepted Accounting Principles, and consistently applied.
- (c) Other Costs. Handlers, manufacturers and distributors must capture all other costs, benefits or value resulting from activities which are directly related to sales of dairy products. These costs include, but are not limited to, promotions, advertising, coupons, slotting allowances, sweepstakes, or any other sales promotions or incentives, as well as the following:
- (1) Low interest loans. For any low interest loan provided to or guaranteed on behalf of a customer, the handler, manufacturer or distributor must recognize as a cost the value of the portion of the interest rate that is below market, the value of any terms that are more favorable than commercially available, or the value of the guarantee afforded.
- (2) Discounts or rebates on non-dairy items. For any product other than regulated dairy products that are sold at a discount greater than that afforded to other customers or when non-dairy products are given free of charge to a customer as a direct or indirect part of the sale of a dairy product, the value of the discount or of the free product must be captured and included in the cost calculations.
- (3) Payments made on behalf of the customer. Any payments or debts forgiven on behalf of a customer as a direct or indirect consequence of a dairy product must be captured and included in the cost calculations.
- (4) Equipment. For any equipment given or loaned to a customer without a related rental fee, the manufacturer or distributor must capture and include in its costs the value of the gifted equipment or the value of the rental payments foregone.
- (5) Advertising and Promotions. For any advertising campaign, promotion, giveaway, coupons, or other incentives, the costs related to that campaign must be recognized as a cost following the provisions established in Article 3 of this subchapter.
- (6) Gifts, Prizes, Sales Awards. The value of any gifts, prizes, sales awards, vacations, trips, gift certificates, cash or items of property given to any customer as a direct or indirect consequence of a sale of a dairy product must be included in the cost calculations.

- (7) Expenses Foregone. The value of any expenses foregone in connection with the sale of any dairy product must be included in the cost calculations.
- (8) Special or Prepaid Account. Any transfer of anything of value in connection with the sale of any dairy product, including special accounts or funds used to reduce the invoice cost of a dairy product must be included in the cost calculations.
- (d) Retention of Data. Handlers, manufacturers, and distributors are responsible for retaining sufficient records to demonstrate compliance with Article 4, Chapter 1, Part 3, Division 21 of the Food and Agricultural Code and this subchapter.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383, 61384, 61441, 61442 and 61443, Food and Agricultural Code.

HISTORY

1. New section filed 8-8-2005; operative 9-7-2005 (Register 2005, No. 32).

§ 1812. Cost Components of Dairy Processing — Wholesale Customers.

In determining whether any wholesale customer sold milk, cream, or any other dairy product below cost, the Department shall evaluate the total consideration paid or exchanged for the processed dairy product as reflected on such wholesale customer's invoice, or the expense of replacement, whichever is lower, plus that wholesale customer's Cost of Doing Business. For the purposes of this subchapter, "Cost of Doing Business" shall include all costs and expenses related to the wholesale customer's total operation including, but not limited to the following:

- (a) Discounts or rebates on non-dairy items. For any products other than regulated dairy products that are sold at a discount greater than that afforded to other customers, or when such products are given free of charge to a customer as a direct or indirect part of the sale of dairy product(s), the value of the discount or of the free product must be captured and included in the cost calculations.
- (b) Gifts, Prizes, Sales Awards. The value of any gift, prize, sales award, vacation, trip, gift certificate, cash, or any other item of property given to any customer as a direct or indirect consequence of a sale of a dairy product must be included in the cost calculations.
- (c) Advertising and Promotions. For any advertising campaign, promotion, giveaway, coupon, or other incentives, the costs related to that campaign must be recognized as a cost following the provisions of Article 3 of this subchapter.

Costs that directly or indirectly result from activities within a specific region or activity shall be allocated to the dairy product sold or distributed in that region or throughout that activity.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383, 61384, 61441, 61442 and 61443, Food and Agricultural Code.

HISTORY

1. New section filed 8-8-2005; operative 9-7-2005 (Register 2005, No. 32).

Article 2. Record Keeping Requirements

§ 1831. Record Keeping Requirements.

- (a) Every distributor shall maintain for the Secretary's inspection and copying, written price schedules which set forth the prices at which each distributor is selling, offering, or agreeing to sell to distributors or wholesale customers, any dairy product and any product sold in conjunction with any dairy product. Such written price schedules shall be maintained and kept for a period of three years from their initial recordation or for a period of three years from their expiration date, whichever period is longer.
- (b) Every distributor in maintaining written price schedules shall do all of the following:
 - (1) Clearly state the effective date of each price schedule.
- (2) Define the geographic area in which each price schedule is effective.

(c) Every distributor shall maintain such other records as are required by section 61441 of the Code.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61441, 61442 and 61443, Food and Agricultural Code.

HISTORY

- 1. Repealer of article 2 (sections 1830–1834) and new article 2 (sections 1831–1833) filed 5–15–80; effective thirtieth day thereafter (Register 80, No. 20). For prior history see 79, No. 24; 77, No. 52; 77, No. 41; 73, No. 6; 70, No. 9; and 64, No. 15.
- 2. Repealer of subsection (d) filed 10–25–82; effective thirtieth day thereafter (Register 82, No. 44).
- 3. Amendment of subsections (a) and (c) filed 9-1-83; effective thirtieth day thereafter (Register 83, No. 36).
- 4. Amendment of subsection (b) filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37).
- Change without regulatory effect amending section filed 8–16–90 pursuant to section 100, title 1, California Code of Regulations (Register 90, No. 44).
- Amendment of subsection (a) and Note filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32).

§ 1832. Terms and Conditions.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61377 and 61441, Food and Agricultural Code.

History

- Amendment of NOTE filed 10-25-82; effective thirtieth day thereafter (Register 82, No. 44).
- Amendment filed 9-1-83; effective thirtieth day thereafter (Register 83, No. 36).
- 3. Renumbering and amendment of former Section 1832 to Section 1940 filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37).

§ 1833. Wholesale Price Variations to Public Agencies.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61377 and 61382–61384, Food and Agricultural Code.

HISTORY

- 1. Amendment of NOTE filed 10–25–82; effective thirtieth day thereafter (Register 82, No. 44).
- 2. Amendment of subsection (c) filed 9-1-83; effective thirtieth day thereafter (Register 83, No. 36).
- 3. Renumbering of Section 1833 to Section 1942(b) filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37).

Article 3. Advertising and Sales Promotion

§ 1850. Determining and Allocating Costs for Promotions.

Handers, manufacturers, distributors, including any producer—distributor or non-profit cooperative association acting as a handler, manufacturer, or distributor, and wholesale customers must capture costs related to or resulting from all incentives, advertisements, marketing, sweep-stakes, coupons, or any other activity intended to promote sales of dairy products. Such costs include expenses incurred and any and all value derived, gained, or realized.

- (a) Advertising, Incentives and Sales Promotions. Any person engaging in any activity regulated by this section must define the benefit period of each sales or advertising campaign that is directly a cost of selling the involved dairy product (the "Defined Benefit Period"). For the purposes of calculating the cost of the involved dairy product, all advertising and sales costs must be allocated to each of the affected products over the applicable Defined Benefit Period. Actual or imputed costs for slotting allowances, exclusive agreements or other related agreements and activities shall be determined and allocated over the appropriate Defined Benefit Period.
- (b) Sweepstakes, Drawings, Instant Prizes, and Other Such Sales Campaigns. Any person conducting any such activity shall estimate the approximate costs of the awards actually distributed to winners and allocate them over the Defined Benefit Period. The costs of actual redemption shall be determined, and estimated costs shall be adjusted to reflect actual costs incurred over the Defined Benefit Period.
- (c) Coupons. Any person issuing a coupon shall estimate the value of the expected redemption of the coupon and allocate that value over a Defined Benefit Period. Estimated costs shall be adjusted to reflect actual coupon redemption during that Defined Benefit Period.

(d) Compliance with Section. If, upon determination of the actual costs of any activity regulated by this Section 1850, a handler, manufacturer, distributor, or wholesale customer experiences an actual redemption rate for that activity which results in an otherwise prohibited sale below cost, but that handler, manufacturer, distributor or wholesale customer can demonstrate that its estimates of the approximate cost of the redemption made according to the preceding provisions of this Section were made in good faith, and according to Generally Accepted Accounting Principles, and projected sales above its cost, that handler, manufacturer, distributor or wholesale customer shall be deemed to have complied with the Code and this Subchapter.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383, 61384, 61441, 61442 and 61443, Food and Agricultural Code.

HISTORY

1. Repealer and new section filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32). For prior history, see Register 79, No. 24.

§ 1851. Wholesale Customer Advertising.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Section 61378, Food and Agricultural Code.

HISTORY

- Repealer of Subarticle 6 (Sections 1910–1919) filed 6–11–79; effective thirtieth day thereafter (Register 79, No. 24).
- 2. Change without regulatory effect repealing Article 6 heading and renumbering former Article 9 to Article 6 filed 8–16–90 pursuant to section 100, title 1, California Code of Regulations (Register 91, No. 18).
- 3. Editorial correction adding HISTORY 2. (Register 91, No. 18).

§ 1929. Procedure for Authorization to Install.

NOTE: Section 4138, Agricultural Code.

HISTORY

1. Renumbering of former section 1930 to new section 1929 filed 8–29–96; operative 9–28–96 (Register 96, No. 35).

§ 1930. Definitions.

Unless the context otherwise requires, the following definitions shall govern the construction of this Chapter 3.

- (a) "Meeting Competition" means meeting a lawful competitive price.
- (b) "Geographic Marketing Area" means one of the following two regions of counties: the Northern California geographic marketing area shall be composed of the counties of Monterey, Kings, Kern, Inyo and all counties north to the Oregon border. The Southern California geographic marketing area shall be composed of the counties of San Luis Obispo, Ventura, Los Angeles, and San Bernardino and all counties south to the Mexican Border.
- (c) "Multi-Unit Price" is defined as the total price paid for two or more units or packages of any dairy product.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Section 61384, Food and Agricultural Code.

HISTORY

- Repealer of Article 7 (Sections 1930 and 1931) filed 11–24–61; effective thirtieth day thereafter (Register 61, No. 23).
- Change without regulatory effect repealing Article 7 heading and renumbering former Article 10 to Article 7 filed 8–16–90 pursuant to section 100, title 1, California Code of Regulations (Register 91, No. 18).
- 3. Editorial correction adding HISTORY 2 (Register 91, No. 18).
- 4. Renumbering of former section 1930 to new section 1929 and new section filed 8–29–96; operative 9–28–96 (Register 96, No. 35).
- Amendment of subsection (c) and NOTE filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32).

§ 1931. Meeting Competition—Retail Sales by Wholesale Customers.

Wholesale customers may meet a lawful competitive price of dairy products of similar defined composition or standard only within the same geographic marketing area. It shall be lawful to meet a competitive price subject to the following provisions:

- (a) A price offered by the wholesale customer to meet a competitor's lawful price may be offered only while competitor's price is effective and may not be lower than such competitor's price; and
- (b) A lawful competitive price may be met whether or not that price results in a below cost sale by the wholesale customer.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383 and 61384, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-29-96; operative 9-28-96 (Register 96, No. 35).
- 2. Amendment of subsection (a) and NOTE filed 8-8-2005; operative 9-7-2005 (Register 2005, No. 32).

§ 1932. Meeting Competition—"Multi-Unit Price".

(a) A lawful multi-unit price may be met by a wholesale customer by dividing the number of units sold together to arrive at an individual unit price.

EXAMPLE: A wholesale customer's lawful multi-unit price for two one-gallon milk containers is priced at \$4.20. Another wholesale customer may meet competition by dividing the multi-unit price by two and lawfully sell a one-gallon unit for \$2.10 (\$4.20 divided by 2 = \$2.10). When the number to be divided is an odd number, the result shall be rounded up.

(b) It is unlawful to divide the weight or volume of a dairy product in a single container to arrive at a per–unit price for the purpose of meeting competition.

EXAMPLE: The price of a five-gallon tub of butter may not be divided by five to arrive at a one pound unit price.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383 and 61384, Food and Agricultural Code.

HISTORY

1. New section filed 8-29-96; operative 9-28-96 (Register 96, No. 35).

2. Amendment of section heading, section and NOTE filed 8–8–2005; operative 9-7-2005 (Register 2005, No. 32).

Article 5. Terms and Conditions, Price Differences and Meeting Competition

§ 1940. Terms and Conditions.

- (a) Schedules setting forth the price of each product sold by a distributor shall include any terms and conditions which are applicable in determining the ultimate net price available to the customer for each product purchased. As used herein, "terms and conditions" include the factors stated in section 1942.
- (b) Within the boundaries of each geographic area defined in a distributor's written price schedule, terms and conditions shall be uniformly applicable and available to all customers receiving products by the same methods of delivery, and under the same conditions of sale, as such methods of delivery and conditions of sale are defined in section 1942.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383, 61384 and 61441, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 1832 to section 1940 filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37). For history of former section 1940, see Register 65, No. 2 and 61, No. 8.
- Change without regulatory effect of renumbering former article 8 to article 5 filed 8-16-90 pursuant to section 100, title 1, California Code of Regulations (Register 90, No. 44).
- 3. Editorial correction of printing error (Register 91, No. 18).
- 4. Amendment of Note filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32)

§ 1941. Price Discrimination.

- (a) Discrimination in price by a distributor between customers that purchase milk, cream or any dairy product of like grade and quality, under like conditions of service, is prohibited if the effect of such discrimination may be substantially to lessen competition or to injure or destroy or prevent competition with the person that either grants or knowingly receives the benefit of such price discrimination.
- (b) The establishment of price schedules by a distributor which offer to any customer special prices or services which are not offered to all customers purchasing any milk, cream, or dairy product of like quantity, under like terms and conditions, within the same area is prohibited.
- (c) Discrimination in price by a wholesale customer between consumers that purchase milk, cream or any dairy product of like grade and quality, under like conditions of service, is prohibited if the effect of such discrimination may be substantially to lessen, injure, destroy or prevent competition with the wholesale customer that grants such price discrimination, or substantially to produce competitive detriment to consumers who are not afforded the benefit of such price discrimination.
- (d) A distributor who is not a processor, purchasing processed milk from a distributor that is a processor, whether such milk is packaged under the label of the selling distributor or the label of the purchasing distributor, shall not, except for the purpose of meeting a lawful competitive price or lawful competitive condition, offer or establish lower wholesale prices for such milk than those offered or established by the selling distributor, if the effect of the price differences may be substantially to lessen competition or tend to create a monopoly, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of them.
- (e) Proof of any sale of, or offer or agreement to sell, milk, cream, or any dairy product, by a distributor at less than the prices offered to other like customers subject to the provisions of Chapter 1, Part 3, Division 21 of the Code and these regulations, or offer by such distributor to sell any other product in combination with any dairy product at less than cost, establishes a rebuttable presumption of a violation of said Chapter 1 and these regulations. This presumption is a presumption affecting the burden of producing evidence. Offers or agreements to sell, as used in this section, include offers, or agreements to sell which are conditional, or for which price schedules will be established at a future date.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383 and 61384, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–29–65; effective thirtieth day thereafter (Register 65, No. 2).
- 2. Amendment filed 10—77; effective thirtieth day thereafter (Register 77, No. 41)
- New subsections (e) and (f) filed 6-12-79; effective thirtieth day thereafter (Register 79, No. 24).
- Repealer and new subsections (e) and (f) filed 5–15–80; effective thirtieth day thereafter (Register 80, No. 20).
- Amendment of subsection (b) filed 10-25-82; effective thirtieth day thereafter (Register 82, No. 44).
- Amendment of subsections (a)–(c) and (f) filed 9–1–83; effective thirtieth day thereafter (Register 83, No. 36).
- 7. Amendment filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37).
- Amendment of Note filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32).

§ 1942. Permissible Price Variations in Distributor's Price Schedules.

- (a) A distributor may vary prices to customers for milk, cream or any dairy product if such price variations, as contained in the distributor's established written price schedules, are based upon the following factors:
- (1) Methods of Delivery Price schedules may vary to reflect the following applicable methods of delivery only: at processor dock or nonprocessing depot; at customer's dock; delivery by limited service; and delivery by full service.
- (2) Conditions of Sale Price schedules may vary to reflect applicable conditions of sale.
- (3) Classes of Trade Price schedules may vary among the following classes of trade: retail stores, food service establishments, public agencies and private schools.
- (A) "Food service establishments" as used in this section is defined as follows: establishments where dairy products are sold for consumption on the premises by the consumer.
- (b) Wholesale Price Variations to Public Agencies and Private
- (1) Wholesale prices for milk, cream or dairy products offered or established by a distributor for public agencies only, for a fixed term contract not to exceed one year, may vary from the distributor's regular wholesale price schedule.
- (2) Such wholesale prices offered or established for public agencies shall be subject to the discriminatory pricing provisions as set forth in Section 61382, the below cost standards contained in sections 61383 and 61384, and to all other provisions of Chapter 1, Part 3, Division 21 of the Code
- (3) A distributor may, at a particular public agency location, meet a current lawful competitive price schedule, including conditions for the sale of milk or any dairy product, without alteration or amendment of the distributor's established wholesale price schedules for such milk or dairy products. When meeting a lawful competitive public agency fixed term price schedule, or a lawful bid or offer for a public agency fixed term contract, such schedule, bid or offer shall be met in its entirety, including all prices, terms and conditions.
- (4) If a distributor offers or establishes wholesale prices for public agencies, the distributor may elect to offer such prices to private schools (as "private schools" is defined in subsection (5) of this section), subject to the same quantity and service conditions as are applicable to the distributor's public agency prices, and if so offered, public agency prices shall be applicable to all private schools serviced by the distributor. Public agency prices offered to private schools under this subsection shall be subject to all provisions of this section.
 - (5) "Private Schools" as used in this section is defined as follows:
- (A) Non-public schools that offer instruction in or maintain grades kindergarten through high school (K-12) and provide non-profit food service or lunch programs; or

- (B) Non-public post secondary educational institutions that offer the same academic degrees as public universities and colleges and provide a non-profit food service program.
- (c) All price variations, within a distributor's price schedules, shall be based upon identifiable costs and shall otherwise conform to the requirements of Chapter 1, Part 3, Division 21 of the Code. Delivery cost factors shall be determined and applied on the basis of a single delivery at a single delivery location.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61382, 61383 and 61384, Food and Agricultural Code.

HISTORY

- New section filed 10-6-77; effective thirtieth day thereafter (Register 77, No. 41).
- 2. Amendment filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).
- 3. Repealer and new section filed 5–15–80; effective thirtieth day thereafter (Register 80, No. 20).
- 4. Amendment of note filed 10–25–82; effective thirtieth day thereafter (Register 82, No. 44).
- 5. Amendment of subsection (a) filed 9-1-83; effective thirtieth day thereafter (Register 83, No. 36).
- 6. Amendment filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37).
- Amendment of subsections (a) and (b) filed 7-15-91; operative 8-14-91 (Register 91, No. 43).
- 8. Amendment of subsections (b)(2) and (c) and amendment of NOTE filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32).

§ 1943. Prices Offered to Meet Competition Generally.

This article does not prohibit establishment of price schedules, or particular location price variations as provided for in Sections 1944 and 1945, which meet in good faith lawful competitive prices or lawful competitive conditions in the sale of milk or dairy products. "Meeting competition" is a question of fact to be determined under all the facts and circumstances of a particular instance. As a general rule, a distributor shall be deemed to have met in good faith a lawful competitive price or a lawful competitive condition if facts exist which would lead a reasonable and prudent person in the position of such a distributor to believe in good faith that his granting of a particular price (whether or not such price is less than the cost of such distributor as the term "cost" is defined in the Code and these regulations) would in fact meet, but not be lower than a lawful competitive price.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Section 61384, Food and Agricultural Code.

HISTORY

- Renumbering and amendment of former Section 1943 to Section 1944 and new Section 1943 filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37).
- 2. Amendment of Note filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32).

§ 1944. Prices Offered to Meet Competition at a Particular Location.

A distributor may, at a particular location, other than that authorized for a public agency by Section 1942(b), meet a current lawful competitive price, including conditions, for the sale of milk or any dairy product, without alteration or amendment of the distributor's regular, established price schedule for such milk or dairy product, if done to retain the milk or dairy products business of an existing customer of the distributor. Note: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Ref-

erence: Section 61384, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–6–77; effective thirtieth day thereafter (Register 77, No. 41).
- 2. Amendment of Note filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).
- Repealer and new section filed 5–15–80; effective thirtieth day thereafter (Register 80, No. 20).
- 4. Amendment of NOTE filed 10–25–82; effective thirtieth day thereafter (Register 82, No. 44).
- Amendment filed 9-1-83; effective thirtieth day thereafter (Register 83, No. 36).
- Renumbering and amendment of former Section 1944 to Section 1945 and renumbering and amendment of former Section 1943 to Section 1944 filed 9-12-84; designated effective 11-1-84 (Register 84, No. 37).

7. Amendment of Note filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32).

§ 1945. Records to Be Kept As to Price Variation to Meet Competition at a Particular Location.

- (a) A distributor who in good faith meets, or has met, pursuant to the provisions of section 1944, a lawful competitive price, including conditions relating to milk and dairy products, shall retain in his files for the period during which the distributor meets such lawful competitive price, including conditions, and for a period of three years thereafter, information detailing the circumstances applicable to the distributor's meeting of the lawful competitive price, including conditions. Such record information shall include the lawful competitive price and conditions met, the effective date of such price and conditions, and such other information as may be required by the director to determine that the competitive price, including conditions met, represents current marketing practices.
- (b) The meeting of competitive prices pursuant to section 1944 and this section shall be subject to the record keeping requirements of section 61441 and 61442 of the Code.
- (c) All meeting of competitive prices by a distributor pursuant to section 1944 shall be subject to review by the Secretary at any time in order that the Secretary may verify that such exceptions are current lawful competitive prices and conditions.
- (d) Not less often than once every six (6) months, the distributor shall review his records as to meeting competition under the provisions of section 1944, in order to verify that such records, and the prices and conditions therein, are current lawful competitive prices and conditions. If such review discloses that the competitive prices and conditions no longer exist, the distributor shall bring such prices into conformity with his current lawful price.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61384, 61441 and 61442, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–6–77; effective thirtieth day thereafter (Register 77, No. 41).
- 2. Amendment of NOTE filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).
- 3. Repealer and new section filed 5–15–80; effective thirtieth day thereafter (Register 80, No. 20).
- 4. Amendment of subsections (b) and (d) filed 9-1-83; effective thirtieth day thereafter (Register 83, No. 36).
- 5. Renumbering and amendment of former section 1944 to section 1945 filed 9-12-84; designated effective 11-1-84 (Register 84, No. 37).
- Change without regulatory effect amending subsection (a) filed 8–16–90 pursuant to section 100, title 1, California Code of Regulations (Register 90, No. 44).
- 7. Amendment of subsection (c) and Note filed 8–8–2005; operative 9–7–2005 (Register 2005, No. 32).

§ 1946. Burden of Proof.

Upon proof being made, in any enforcement proceedings brought by the Secretary under the provisions of Chapter 1, Part 3, Division 21 of the Code, that there has been price discrimination by a distributor, the burden of establishing cost justification for any variations by the distributor in prices between customers, or of otherwise rebutting the prima facie case of price discrimination made by the Secretary, shall be upon such distributor.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Cod. Reference: Sections 61382 and 61384, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–6–77; effective thirtieth day thereafter (Register 77, No. 41).
- 2. Amendment of NOTE filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).
- 3. Amendment filed 9-1-83; effective thirtieth day thereafter (Register 83, No. 36)
- 4. Amendment filed 8-8-2005; operative 9-7-2005 (Register 2005, No. 32).

Article 6. Generally Acceptable Cost Accounting Procedures—Sales by Distributors

§ 1950. Records to Be Kept.

Each distributor, manufacturer, handler, and wholesale customer shall maintain a record of prices at which such distributor, manufacturer, handler, and wholesale customer is selling, offering or agreeing to sell fluid milk and dairy products, and current cost records to reflect costs under the accounting procedures required by Section 61384 of the Code and this subchapter.

For purposes of uniform and impartial enforcement of the "sales below cost" standards contained in Article 4, Chapter 1, Part 3, commencing with Section 61381 of the Code, any distributor, manufacturer, and wholesale customer, upon written demand by the Secretary and within seven calendar days after receipt of such demand, shall submit in writing to the Secretary cost data developed in compliance with the requirements of Article 4, Chapter 1, Part 3, commencing with Section 61381 of the Code and this subchapter in respect to a particular price on one or more dairy products. In cases where a distributor, manufacturer, handler, and wholesale customer have a history of repeated violations, or of not providing cost data timely, the Secretary may require cost data to be submitted within 48 hours of a written demand.

NOTE: Authority cited: Sections 407 and 61341, Food and Agricultural Code. Reference: Sections 61384, 61441 and 61442, Food and Agricultural Code.

- 6. Editorial correction of Article title (Register 91, No. 19).

§ 2031. Cancellation of Inactive Licenses.

Cancellation of Inactive Licenses. Every licensed handler who (a) within 60 days after issuance of the license fails to actively engage in the business activities permitted by the license; or (b) ceases for 60 consecutive days to engage in the business activities permitted by the license, shall surrender the license to the director for cancellation. Such cancellation shall be without prejudice to an application for another license at such time as the applicant is ready to actively engage in the business activities permitted by the license. A license reissued to the same person for the same premises during the year in which it was cancelled shall not require an additional license fee for the remainder of said year.

- 5. Editorial correction of HISTORY 4. (Register 91, No. 19).

§ 2039. Payment for Manufacturing Milk.

Manufacturing milk handlers and/or market milk handlers purchasing manufacturing milk from producers of manufacturing milk shall pay for such milk in accordance with the date and method of payment provided in section 61411 of the Code and the conforming contract between the producer and handler. If said contract requires an earlier or larger payment than required by section 61411, then payment shall be made in accordance with such contract. Each payment shall be made by cash, or valid check which is immediately negotiable. Payments shall not be made by promissory note, post–dated check, or other evidence of indebtedness. NOTE: Authority cited: Sections 407 and 61341. Food and Agricultural Code. Reference: Section 61411, Food and Agricultural Code.

HISTORY

1. Repealer of article 5 (sections 1883–1886) and new article 5 (section 1880) filed 10–25–82; effective thirtieth day thereafter (Register 82, No. 44). For prior history, see Registers 79, No. 24; 74, No. 41; 73, No. 6; and 64, No. 15).

 Change without regulatory effect renumbering former section 1880 to section 2039 filed 8–16–90 pursuant to section 100, title 1, California Code of Regulations (Register 90, No. 44).

Article 3. Payment by Handlers to Producers for Manufacturing Milk and Market Milk

§ 2040. Payment for Market Milk.

Handlers purchasing market milk from producers shall pay for such milk in accordance with provisions of section 62191 of the Code and the conforming contract between the producer and handler; provided, however, if said contract requires an earlier or higher percentage of payment, or both, than that required by section 62191, then payment shall be made in accordance with the contract. Each payment shall be made on or before the date due, shall be in the full amount required and shall be made by cash or valid bank check which is immediately negotiable. Payment shall not be made by promissory note, post–dated check or other evidence of indebtedness.

NOTE: Authority cited: Sections 407 and 61891, Food and Agricultural Code. Reference: Section 62191, Food and Agricultural Code.

HISTORY

- New article 4 (section 2040) filed 4-9-62; effective thirtieth day thereafter (Register 62, No. 7).
- 2. Amendment filed 9–10–63; effective thirtieth day thereafter (Register 63, No. 15)
- 3. Amendment filed 6–12–79, effective thirtieth day thereafter (Register 79, No. 24)
- 4. Renumbering of article 4 (sections 2040 and 2041) to article 3 (sections 2040 and 2041) filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).
- Change without regulatory effect amending section 2040 filed 8–16–90 pursuant to section 100, title 1, California Code of Regulations (Register 90, No. 44).

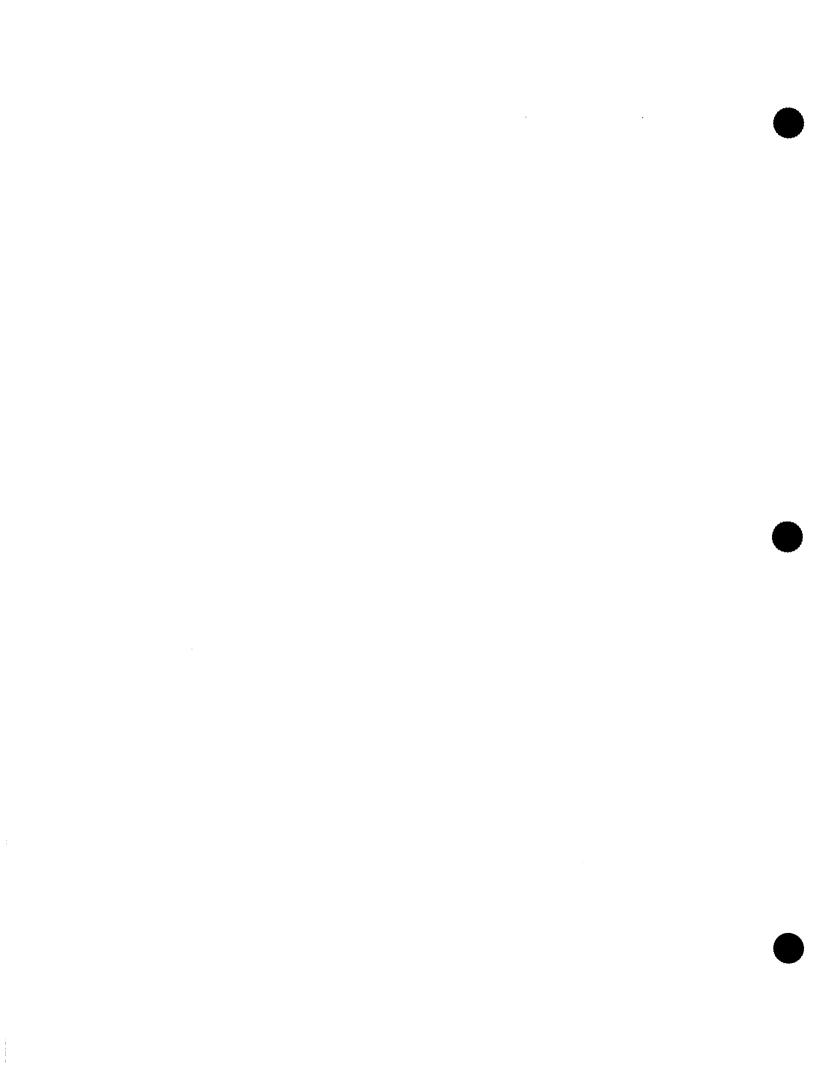

§ 2041. Bond Indemnification Agreement Prohibited.

Bond Indemnification Agreement Prohibited. No bond filed with the director pursuant to sections 61404–61407.3 or 62181–62190, inclusive, of the Code shall contain or at any time be subject to any indemnification agreement, waiver or cosignature by any producer from whom the handler purchases manufacturing milk or market milk during the period the bond is in force.

The undertaking of such an obligation by such a producer and the acceptance of the benefits thereof by such a handler are declared to be unlawful trade practices proscribed by sections 61400, 61415, 62078, 62095, and 62095.1 of the Code.

NOTE: Authority cited: Sections 407 and 61891, Food and Agricultural Code. Reference: Sections 61400, 61415, 62078, 62095, and 62095.1, Food and Agricultural Code.

§ 2042. Allocation of Handler Payments to Producers for Bulk Milk for Surety Bond and Milk Producers Security Trust Fund Coverage.

- (a) For the purpose of determining whether or not a handler has properly paid producers for milk purchased, all payments shall be applied first to bulk milk sales for all amounts due and payable on the date the payment is made, except in the following situations:
- (1) If the handler and producer have historically engaged in a pattern of allocating payments in a manner different from that described above, and that pattern is documented in writing, then payments may be allocated in accordance with that pattern, as long as the execution of the documentation by both parties is simultaneous with the beginning of the pattern of allocating payments; or,
- (2) If, simultaneously with payment, the handler delivers to the producer a written notice or remittance device which notifies the producer that the payment is for a specific invoice, delivery, commodity, expense, allowance or other charge.
- (b) Payments by a handler to a producer for the purposes of any action by the Secretary associated with a surety bond or the Fund shall be credited first to interest and then to the remaining unpaid principal. Upon the payment of all outstanding interest, principal payments shall be applied first to the amount due for the oldest unpaid delivery, and then successively, in sequence, to the amounts due for the next oldest unpaid delivery.

Article 4. Contracts for Purchase of Manufacturing Milk or Market Milk

§ 2050. Prohibition Against Procurement Options in Contracts.

Prohibition Against Procurement Options in Contracts. No contract entered into between a handler and a producer in accordance with the provisions of section 61411 or 62191 of the Code shall provide for an option of the handler to purchase any milk of the producer in excess of the amount which the handler has obligated itself to purchase under the contract, nor shall said contract contain any right of first refusal by the handler to purchase such excess milk no matter whether the right of first refusal is on like terms and conditions as competing purchasers or not. No handler shall require as a condition, whether oral or written, of execution or renewal of a contract, that the producer grant to the handler an option to purchase or any right of first refusal with regard to milk of the producer in excess of the amount the handler has obligated itself to purchase under the contract.

NOTE: Authority cited: Sections 407 and 61891, Food and Agricultural Code. Reference: Sections 61411 and 62191, Food and Agricultural Code.

- Repealer of Article 6 (Sections 2060–2062) filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).

Subchapter 3. Petitions and Hearings

Article 1. Procedures for Filing of Petitions and Conduct of Hearings

§ 2080. Purpose.

NOTE: Authority cited: Sections 407 and 61891, Food and Agricultural Code. Reference: Sections 61808.5, 61903, 61991–62032, 62705 and 62717, Food and Agricultural Code.

HISTORY

- 1. New Group 3 (Sections 2080–2080.3) filed 3–3–78; effective thirtieth day thereafter (Register 78, No. 9).
- 2. Repealer filed 12–15–82 by OAL pursuant to Government Code Section 11349.7(j) (Register 82, No. 51).

§ 2080.1. Petition for Adoption, Amendment or Repeal of Regulations.

NOTE: Authority cited: Sections 407 and 61891, Food and Agricultural Code. Reference: Sections 61808.5, 61903, 61991–62032, 62705 and 62717, Food and Agricultural Code.

HISTORY

- 1. NOTE filed 6-12-79 (Register 79, No. 24).
- 2. Editorial correction of subsection (b) filed 5-15-80 (Register 80, No. 20).
- 3. Repealer filed 12-15-82 by OAL pursuant to Government Code Section 11349.7(j) (Register 82, No. 51).

§ 2080.2. Petition for Adoption, Amendment or Termination of Stabilization and Marketing Plans or Milk Pooling Plan.

(a) Procedures for the adoption, amendment or termination of stabilization and marketing plans are stated in Sections 61991–62032 of the Food and Agricultural Code. Procedures for the adoption, amendment or termination of the milk pooling plan are stated in Sections 62705 and 62717 of the Food and Agricultural Code. In addition to the secretary's authority to adopt, amend or terminate stabilization and marketing plans or the milk pooling plan, any interested person may petition the secretary requesting the adoption, amendment or termination of a stabilization or marketing plan or the milk pooling plan. The petition shall be submitted using the format available from the Department. The format shall be laid out so that the petition shall clearly and concisely give:

- (1) a brief written description of the requested changes including a copy of the suggested language to amend the plan;
- (2) specifications as to why the petitioner recommends the proposed changes including relevant analysis, comments and data supporting the request; and
 - (3) The authority of the secretary to take the action requested.
- (b) Upon receipt of such petition at the designated Departmental office, the secretary shall notify the petitioner in writing of its receipt. The secretary shall also notify all interested parties of record in writing of the receipt of the petition. Within 15 days of the petition's receipt at the designated office, the secretary shall either schedule the matter for public hearing or deny the petition in writing indicating why the secretary has reached such a decision on the merits of the petition.
- (c) The secretary may grant or deny such a petition in whole or in part, and may grant such other relief or take such other action as the secretary may determine to be warranted and shall notify the petitioner in writing of such action.
- (d) Any interested person may request reconsideration of any part or all of a decision of the secretary on any petition submitted. Any such request shall be submitted in accordance with subsection (a) of this Section and shall include the reason(s) why the secretary should reconsider the previous decision no later than 60 days after the date of the decision involved. The secretary's reconsideration of any matter relating to a petition shall be subject to the provisions of subsection (b) of this Section. Note: Authority cited: Sections 407 and 61891, Food and Agricultural Code. Reference: Sections 61903, 61991–61998, 62031, 62032, 62705 and 62717, Food and Agricultural Code.

HISTORY

- 1. NOTE filed 6-12-79 (Register 79, No. 24)
- 2. Amendment of NOTE filed 9–1–83; effective thirtieth day thereafter (Register 83, No. 36).
- 3. Amendment of NOTE filed 9–12–84; designated effective 11–1–84 (Register 84, No. 37).
- Amendment of subsection (a), repealer and new subsections (a)(1) and (a)(2), amendment of subsection (a)(3), repealer and new subsection (b), and amendment of subsections (c) and (d) filed 7-2-96; operative 8-1-96 (Register 96, No. 27).

§ 2080.3. Mandatory Hearing to Amend or Terminate a Stabilization and Marketing Plan(s) or to Terminate the Milk Pooling Plan.

- (a) Procedures for a mandated hearing to amend or terminate a stabilization and marketing plan are stated in Section 62032 of the Food and Agricultural Code. Procedures for a mandated hearing to terminate the milk pooling plan are stated in Section 62717 of the Food and Agricultural Code. In addition to the procedures laid out in Section 2080.2 to adopt, amend or terminate stabilization and marketing plans or the milk pooling plan, interested procedures may petition the secretary requesting a mandated hearing to amend or terminate a stabilization and marketing plan or to terminate the milk pooling plan. The petition shall be submitted using the format available from the Department, as specified herein. The format shall be laid out so the petition shall clearly and concisely give:
- (1) a brief description of the requested changes including a copy of the suggested language to amend the plan;
- (2) specifications as to why the petitioner recommends the proposed changes including relevant analysis, comments and data supporting the request; and
 - (3) the authority of the secretary to take the action requested.
- (b) Upon receipt of such petition at the designated Departmental office, the secretary shall notify the petitioner in writing of its receipt. The secretary shall also notify all interested parties of record in writing of the receipt of the petition. Within 60 days of the receipt of the petition, the secretary shall notice the mandated hearing provided that:
- (1) the petition meets all the requirements of subsection (a) of this Section;

and

(2) the petition clearly shows the number of market milk producers who have signed the petition and/or are being represented by a petition-

ing cooperative, including their names and producer numbers issued by the Milk Pooling Branch (or their address if they have no such number), as well as the volume of milk produced individually by such producers for the latest available month; the number of producers and volume of milk shall be tabulated by the marketing areas the producers' milk is shipped into;

and

(3) both the number of producers and volume of milk equals or exceeds 55 percent (25 percent for a pooling hearing) of the number of producers shipping into and volume of milk being shipped into each of the marketing areas affected by the petition;

and

- (4) in addition, for any nonprofit agricultural cooperative marketing association petitioning, the petition shall be signed by the board of directors or, with proof of authority, by a person so delegated by that board and the petition shall attach proof that the board has been granted specific or general authority by its members to petition the secretary.
- (c) If the petition does not meet all the requirements of subsection (b) of this Section, then it shall be subject to the provisions of Section 2080.2, except that the secretary shall have 60 days rather than 15 days from the petition's receipt at the designated office to either schedule the matter for public hearing or deny that petition in writing indicating why the secretary has reached such a decision on the merits of the petition.

NOTE: Authority cited: Sections 407, 61891, 62032 and 62717, Food and Agricultural Code. Reference: Sections 61903, 61991–61998, 62031 and 62705, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (f) filed 6–12–79; effective thirtieth day thereafter (Register 79, No. 24).
- 2. Repealer of reproduction of Food and Agriculture Code section 61903 filed 12–15–82 by OAL pursuant to Government Code section 11349.7(j) (Register 82, No. 51).
- 3. Amendment of NOTE filed 9–1–83; effective thirtieth day thereafter (Register 83, No. 36).
- 4. Amendment of subsection (i) filed 9-12-84; designated effective 11-1-84 (Register 84, No. 37).
- Change without regulatory effect amending subsections (g) and (i) filed 8-16-90 pursuant to section 100, title 1, California Code of Regulations (Register 90, No. 44).
- 6. Repealer and new section filed 7-2-96; operative 8-1-96 (Register 96, No. 27).

§ 2080.4. Conduct of Hearings for Adoption, Amendment or Termination of Stabilization and Marketing Plans or Milk Pooling Plan.

- (a) Hearing Officer and Panel. The secretary or secretary's designee may conduct the hearing, or may select a panel to receive evidence and question witnesses. A hearing officer will preside at the hearing. No member of the panel will be a witness.
- (b) Department Exhibits. Department exhibits and Departmental proposals, if any, will be presented by a person who is not a member of the panel. Exhibits which the Department anticipates introducing at the hearing will be available for public inspection at the Department's Sacramento office not less than seven calendar days prior to the hearing. All exhibits will also be available for review during the hearing.
- (c) Hearing Roster. Any person desiring to testify shall sign, at the hearing, a roster prepared for such purpose. At the hearing, the hearing officer will announce the manner in which the roster will be used to determine the order of witnesses.
- (d) Testimony by Petitioners. If the hearing results from a petition, the petitioners will normally testify immediately after Department officials have introduced explanatory and statistical material, if any. Petitioners will then explain the proposal and submit supporting documents. In such cases, the petitioners, as a group, normally will be allowed up to one hour for testimony. If the hearing results from more than one petition, the multiple groups of petitioners normally will collectively be allowed up to 90 minutes for testimony. The group can (1) divide up the 90 minutes as they wish, (2) have the 90 minutes allocated to each group on a prorata basis, or (3) each have 20 minutes for testimony. In any case, if there does not

Page 222

appear to be large number of witnesses, the hearing officer may grant each group of petitioners up to an additional 20 minutes of time.

- (e) Testimony by Persons Submitting Alternative Proposals. Any person who has submitted an alternative proposal in response to a petition for a public hearing shall be allowed up to 30 minutes for testimony. However, if there does not appear to be a large number of witnesses, the hearing officer may grant up to an additional 20 minutes of time for such testimony.
- (f) Other Testimony. Oral testimony shall not exceed the time limit specified by the hearing officer. However, a witness may supplement oral testimony by submitting a written statement at the time the testimony is given. Normally, each witness, or group of witnesses appearing together, will be allowed 20 minutes for direct testimony. However, if there does not appear to be a large number of witnesses, the hearing officer may grant each witness up to an additional 20 minutes of time. After all persons wishing to testify have had an opportunity to do so, not more than an additional 20 minutes of time will be provided to each witness or petitioner who desires to present further testimony.
- (g) Questioning of Witnesses. At the conclusion of their testimony, witnesses will be subject to questioning by members of the hearing panel. With respect to Department witnesses, the hearing officer shall permit additional questioning by members of the audience. Any member of the audience may submit questions to the hearing officer for possible use by the hearing panel. Questions of witnesses shall be related to their testimony and pertinent to the call of the hearing.
- (h) Written Statements. Any interested person may file a written statement concerning the matter at the hearing. Written statements may be of any length, but limited to relevant matters. They must be signed. Preferably, written statements should be typewritten or printed. Written statements may be delivered personally or by mail any time after the notice of hearing, and shall be received by the Department prior to the close of the hearing. Such statements should be addressed to the hearing officer at the designated Departmental office. Written statements will be available for review during the hearing.
- (i) Posthearing Briefs. With respect to posthearing briefs, the provision of Section 61903 of the Code shall be applicable.
- (j) Hearing Transcripts. The hearing shall be recorded by a reporter or recorder. Copies of the transcript may be obtained directly from the hearing reporter, or from the Department at the current rate for copies of public records. The Department will maintain and make available for public inspection a hearing transcript at its Sacramento office and, upon reasonable request, at the regional office of the Department nearest the location at which the public hearing was held.

NOTE: Authority cited: Sections 407 and 61891, Food and Agricultural Code. Reference: Sections 61903, 61991–61998, 62031, 62032, 62705 and 62717, Food and Agricultural Code.

HISTORY

1. New section filed 7-2-96; operative 8-1-96 (Register 96, No. 27).

Subchapter 4. Milk Producers Security Trust Fund

Article 1. Eligibility for Coverage

§ 2100. Definition of Beneficial Ownership Interest.

- (a) For purposes of Milk Producer Security Trust Fund (hereinafter "Fund") coverage criteria for milk shipped by a producer to a handler, as set forth in Food and Agricultural Code Section 62580, the term "beneficial ownership interest" shall be defined as set forth in (b) of this Section.
- (b) Except as otherwise provided by law, any person or any other legally constituted business entity, including but not limited to, a corporation, limited partnership, limited liability company, joint venture, association, or any other form of cooperative ownership, shall be deemed to have a beneficial ownership interest through owning an interest in a handler, as

defined in Food and Agricultural Code Section 62521(d), in any form, such that they have any interest in the profits, losses, or equity of that handler, with the authority to influence or create policy which affects the handler's policies and business decisions.

- (c) Authority to influence or create policy includes service in any discretionary capacity associated with a handler's policies and business decisions, and shall not be limited to service in an official capacity, such as a member of a Board of Directors, or employment as an officer or any administrative position.
- (d) An individual possesses a beneficial ownership interest only if he/she owns a 10 percent or greater interest in the equity and/or profits and/or losses of a handler, with the exception that an individual who owns a 10 percent interest or greater interest as community property with his/her spouse shall be deemed to possess a beneficial ownership interest.
- (e) A producer who has extended credit to a handler does not possess a beneficial ownership interest unless the terms of the agreement under which such credit was extended permit the producer to acquire a 10 percent or greater ownership interest in the handler in any form.
- (f) For the purpose of determining beneficial ownership interests, cooperatives shall be treated as producers for all transactions involving the handling of their members' milk in bulk form, and shall be treated as handlers for all transactions involving non-member bulk milk.
- (1) A cooperative will be deemed to have a beneficial ownership interest in a handler if any member of that cooperative owns a 10 percent or greater interest in the handler's gross revenues and /or profits and/or losses and/or equity capital or stock.
- (2) A cooperative shall also be treated as having a beneficial ownership interest in any handler in which the cooperative has a 10 percent or greater interest in such handler's profits and/or losses, equity capital or stock.
- (g) Producers and cooperative members specifically possess beneficial ownership interests, beyond the general provisions of (b) and (c) in this Section, in the following circumstances:
- (1) A producer who is a member of a cooperative has a beneficial ownership interest in that cooperative.
- (2) All members of a cooperative, including producers, additionally have beneficial ownership interest in any other cooperatives in which their cooperative has such an interest.
- (3) All members of a cooperative, including producers, have a beneficial ownership interest in any handler in which their cooperative has a beneficial ownership interest.
- (h) For the purpose of determining beneficial ownership interests, cooperatives shall be treated as producers for all transactions involving the handling of their members' milk in bulk form, and shall be treated as handlers for all transactions involving non-member bulk milk.
- (1) In addition to the general provisions of (b) and (c) in this Section, a cooperative will be deemed to have a beneficial ownership interest in a handler if any member of that cooperative owns a 10 percent or greater interest in the handler's gross revenues and/or profits and/or losses and/or equity capital or stock.
- (2) In addition to the general provisions of (b) and (c) in this Section, a cooperative shall also be treated as having a beneficial ownership interest in any handler in which the cooperative has a 10 percent or greater interest in such handler's profits and/or losses and/or equity capital or stock.
- (i) For purposes of determining whether a corporation possesses a beneficial ownership interest, there are "S" corporations as defined and regulated by the Internal Revenue Service, and "C" corporations, which are all corporations other than "S" corporations.
- (1) In determining whether an "S" corporation has a beneficial ownership interest in a handler, all beneficial ownership interests in a handler held by any person/entity who owns or controls any of the "S" corporation's stock shall be deemed to be owned by the "S" corporation.
- (2) In determining whether a "C" corporation has a beneficial ownership interest in a handler, all beneficial ownership interests in a handler

held by any person/entity who owns five percent or more of the "C" corporation's stock, regardless of class, shall be deemed to be owned by the "C" corporation.

- (3) In addition to the general provisions of (b) and (c) in this Section, any beneficial ownership interest of a "C" corporation shall be attributed to any stockholder who owns a 5 percent or greater interest in any class of stock of the corporation.
- (j) A "Controlled Group of Corporations" (hereinafter "CGC") is defined as any group of corporations, partnerships, joint ventures or any other business entities, where a common parent entity owns or controls the largest number of outstanding shares, or any other ownership interest, in each member of the group.
- (1) In addition to the general provisions of (b) and (c) of this Section, if a CGC cumulatively owns, as the parent entity of any group of corporations, partnerships, joint ventures or other business entities, as defined in (j) of this Section, a 10 percent or greater interest in any handler derived from these entities, the CGC shall be deemed to have a beneficial ownership interest in that handler.
- (2) In addition to the general provisions of (b) and (c) of this Section, if a producer or cooperative owns a 10 percent or greater interest in a handler, and that handler is also a member of a CGC, the producer or cooperative shall be deemed to have a beneficial ownership interest in all corporations, partnerships, joint ventures or other business entities of the CGC.
- (3) In addition to the general provisions of (b) and (c) of this Section, any beneficial ownership interest of an "S" corporation shall be attributed to each stockholder of the corporation.
- (4) Any beneficial ownership interest held by any common owner or subsidiary company of a CGC shall be considered as being held by each member of the group.
- (k) A partnership, limited partnership, joint venture, estate or trust will be deemed to own any beneficial ownership interest attributed to any of its partners or beneficiaries.
- (1) A beneficial ownership interest owned by a partnership shall be attributed to each partner of the partnership.
- (2) Joint ventures and/or similar arrangements involving the participation of corporate participants shall be treated as partnerships.
- (3) All participants in joint ventures and/or similar arrangements shall be treated as partners.
- (4) In situations involving trusts and estates, where the beneficiaries have no rights to direct or influence the entity's decisions, these beneficiaries shall be treated like "C" corporation shareholders.
- (*l*) In addition to the general provisions of (b) and (c) of this Section, any beneficial ownership interest owned by a Limited Liability Company (hereinafter "LLC") shall be attributed to each member of the company. Conversely, any beneficial ownership interest owned by a member of a LLC shall be attributed to the LLC.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 62580 and 62587, Food and Agricultural Code.

HISTORY

1. New subchapter 4 (articles 1–2), article 1 (sections 2100–2101) and section filed 10–6–2004; operative 11–5–2004 (Register 2004, No. 41).

§ 2101. Definition of Milk Eligible for Trust Fund Coverage.

"Milk" means bulk milk of any composition of milk solids—not—fat, fat, and fluid carrier that has not been altered in any way that further restricts its usage from the milk in its original or natural form. Milk that has been altered by adding processed products, whether dairy or non—dairy, other than for fortifying bulk milk, bulk low fat milk, bulk reduced—fat milk, or bulk skim milk, changes the bulk product such that it can no longer be considered as farm or producer milk, and is therefore ineligible for Trust Fund coverage.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 62521(e), Food and Agricultural Code.

HISTORY

1. New section filed 10-6-2004; operative 11-5-2004 (Register 2004, No. 41).

Article 2. Payment of Claims

§ 2102. Calculation of Trust Fund Obligation to a Producer.

The amount paid to each eligible producer shall be determined as follows:

- (a) The total amount owed by the handler to all producers shall be called the "gross default". From the gross default, any surety bond recovery shall be deducted. The resulting amount is called the "adjusted default".
- (b) From the adjusted default, any amounts ineligible for coverage per FAC Section 62580 shall be deducted. The resulting amount is called the "net default"
- (c) The \$200,000 deductible required by FAC Section 62624 shall be deducted from the net default. The resulting amount is the total maximum exposure of the Fund.
- (d) An eligible producer who claims reimbursement from the Fund will be paid his/her pro rata shares from the total maximum exposure

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 62580, 62623 and 62624, Food and Agricultural Code.

HISTORY

1. New article 2 (section 2102) and section filed 10–6–2004; operative 11–5–2004 (Register 2004, No. 41).

Chapter 4. Shipping Point Inspection

§ 2200. Schedule of Fees or Charges.

In accordance with the requirements of Division 5, Chapter 1, of the Agricultural Code of the State of California and the provisions of the cooperative agreement between the California Department of Agriculture and the U.S. Department of Agriculture entered into under the authority of said division and chapter, a reasonable schedule of fees or charges shall be established and from time to time amended, for the services provided for under said division and chapter and said co-operative agreement and shall be based upon the approximate costs of the services rendered.

Such costs shall be determined in accordance with generally accepted accounting procedures applicable in the circumstances, and will include the following:

- (a) Costs. Costs shall include, but not be limited to, administrative salaries, inspectors' wages, clerical wages, vacation, sick leave, and other compensated time off, health benefits, automobile, travel, rent, retirement, utilities, communications, supplies, depreciation on equipment, departmental administrative pro rata, fees to the U.S. Department of Agriculture required under the co-operative agreement, and all other costs pertinent to the operation of the Bureau of Shipping Point Inspection
- (b) Reserve. A reasonable reserve, in addition to costs, to provide for a proper working capital and unforeseen contingencies. Unexpended funds collected during any marketing season may be carried forward for use during subsequent seasons.

NOTE: Authority cited: Sections 16 and 751, Agricultural Code.

HISTORY

1. New Subchapter 4 (Sections 2200–2202) filed 9–11–62; effective thirtieth day thereafter (Register 62, No. 19).

§ 2201. Necessary Data for Establishing Fees.

In establishing the fee schedule for any commodity, or group of commodities, pursuant to Section 2200, the director shall take into consideration all data and information available from producers and handlers and official agencies relating to production, marketing conditions, weather conditions, volume of inspections needed and location of inspection points, which have a bearing upon the cost of such service.

§ 2202. Availability of Schedules.

The fee schedule established pursuant to Section 2200 and as amended from time to time shall be open to public inspection during office hours at each branch office of the Bureau of Shipping Point Inspection and at the headquarters office of said bureau and a copy thereof shall be furnished to any person on request.

Chapter 5. California Beef Council Law Assessments

§ 2250. Registration of Out-of-State Beef Processors.

- (a) The registration form provided by the director shall include, but not be limited to, the name of the person, firm, or corporation, business address and telephone number. Any change in the name, business address or telephone number shall be reported to the director within 15 days of the change.
 - (b) There shall be no fee charged for registration.
- (c) The registration form shall be completed by the out-of-state beef processor and returned to the director within 21 days of mailing by the director.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 64717, Food and Agricultural Code.

HISTORY

- 1. New Subchapter 5 (Sections 2250–2252) filed 4–8–82 as an emergency; effective upon filing (Register 82, No. 16).
- 2. Order of Repeal of 4–8–82 emergency order filed 4–16–82 by OAL pursuant to Government Code Section 11349.6 (Register 82, No. 16).
- 3. New Subchapter 5 (Sections 2250–2252) filed 6–7–83; effective thirtieth day thereafter (Register 83, No. 24).

§ 2251. First Handler: Preparation of List.

- (a) The first handler of beef in the state which has been shipped beef from out-of-state shall submit to the director a list of all out-of-state beef processors from whom beef has been received each quarter. For purposes of this section, a "quarter" shall be January through March; April through June; July through September; and October through December of each calendar year.
- (b) The list shall be due not later than the fifteenth (15th) day of the month following the end of the quarter. The postmark on the envelope containing the list shall be considered the date of submittal regardless of the date entered on the list.

NOTE: Authority cited: Sections 407 and 64718, Food and Agricultural Code. Reference: Section 64718, Food and Agricultural Code.

§ 2252. Assessments: Beef Shipped into the State.

- (a) The assessments on all beef shipped into this state by an out-of-state beef processor shall be remitted to the director with an assessment report prescribed by the director. This report shall include, but not be limited to, the following:
- (1) Name, address and telephone number of the out-of-state beef processor.
 - (2) Month in which the assessment is due.

- (3) Except as provided in subdivision (e), computation of the assessment shall be based on the weight of slaughtered beef multiplied by the assessment of \$0.0015 per pound for chilled carcass beef; \$0.00175 per pound for boxed beef; or \$0.00242 per pound for boxed beef.
 - (4) Total assessment payable.
- (5) Statement describing the procedure for calculating the assessment due.
 - (6) Certification of accuracy of the report.
 - (7) Date the report is completed.
 - (8) Signature of authorized agent.
- (b) Assessments are due and payable to the director on or before the 15th day of the month next succeeding the month in which slaughtered beef is shipped into this state. The postmark on the envelope containing the assessment payment and the assessment report shall be considered the date of payment regardless of the date entered on the assessment payment or the assessment report.
 - (c) Assessments do not apply to the following:
- (1) Chilled carcass beef, boxed beef and boned beef shipped into California for processing and subsequently transferred to a location outside of California.
- (2) Chilled carcass beef, boxed beef and boned beef shipped in transit through California to a location outside of California.
- (d) Every out-of-state beef processor shall keep a complete and accurate record of each sales transaction of chilled carcass beef, boxed beef and boned beef shipped into California by month. The records shall be preserved by the out-of-state processor for a period of two years and shall be available for inspection at any reasonable time upon request of the California Department of Food and Agriculture or the California Beef Council for purposes of verifying assessment payments and accuracy of records.
- (e) To avoid an assessment payment in excess of the equivalent of one dollar (\$1) per head, an out-of-state beef processor may compute the assessment due using the following information:
- (1) State on the out–of–state beef processor assessment report, the average live weight, average yield, and pounds of beef shipped into California during the period covered by the assessment submitted.
- (2) When calculating the assessment due for boxed beef, a reduction factor of 9% shall be utilized. When calculating the assessment due for boned beef converted from chilled carcass beef, a reduction factor of 24% shall be utilized. When calculating the assessment for boned beef converted from boxed beef, a reduction factor of 15% shall be utilized.
- (3) Any out-of-state beef processor who ships chilled carcass beef, boxed beef, or boned beef into California which did not originate from animals slaughtered by the out-of-state beef processor may reduce the total assessment due by 8%.
- (f) Any out-of-state beef processor who requests a refund of any portion of a paid assessment in excess of the equivalent of one dollar (\$1) per head shall provide the Director of Food and Agriculture with the information required in subdivision (e) and any necessary computations to substantiate the request.

Chapter 1. Chemistry

Subchapter 1. Fertilizing Materials

Article 1. Standards and Labeling

§ 2300. Fertilizing Materials—General Provisions.

- (a) Labels of fertilizing materials, shall comply with the requirements of this article.
- (b) Efficacy data, which may be required as stated in Sections 14601 and 14631 of the Food and Agricultural Code, is data required to demonstrate the product's effectiveness when used as directed for all label claims. The data shall be obtained under California environmental use conditions or in areas that have essentially the same environmental use conditions.
- (c) All guarantees shall be based on an Association of Official Analytical Chemists (AOAC) laboratory method or when no AOAC method is available, a method developed for specific analyses by the Department shall be used.
- (d) The guaranteed analysis must be stated on an "as is" basis at time of sale or delivery to whoelesale and retail customers
- (e) "Zero" guarantees shall not appear in the guaranteed analysis statement.
- (f) Brand names, trademarks and tradenames are prohibited in the derivation statement or list of ingredients. They may appear as part of the product name in an area of the label separate from the list of ingredients or the derivation statement. However, trademarks and tradenames may not be similar to that of a recognized fertilizing material.
- (g) The statement "State of California approved" or other indication of official approval is prohibited in labeling and advertising.
- (h) A warning or caution statement shall appear on the label of any commercial fertilizer product which contains 0.1 percent or more by weight of boron in water soluble form. This statement shall carry the word "WARNING" or "CAUTION" conspicuously displayed, shall state the crop(s) for which the fertilizing material is to be used or state that the use of the fertilizing material on any crops other than those recommended may result in serious injury to the crop(s).
- (i) A warning or caution statement shall appear on the label of any commercial fertilizer product which contains 0.001 percent or more by weight of molybdeneum (Mo). This statement shall carry the word "WARNING" or "CAUTION" conspicuously displayed and the statement that the application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.
- (j) When the name of a fertilizing material appears on the label, outside of the guaranteed analysis statement, the percentage of that ingredient is required in the guaranteed analysis statement.

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agricultural Code. Reference: Sections14501(b), 14502 and 14631, Food and Agricultural Code.

HISTORY

- Amendment filed 10–11–68; effective thirtieth day thereafter (Register 68, No. 38).
- 2. Repealer of group I (articles 1–5, sections 2300–2321) and new group I (articles 1–4, sections 2300–2316) filed 7–29–82; effective thirtieth day thereafter (Register 82, No. 31). For prior history, see Registers 79, No. 26; 55, No. 3; and 24, No. 2
- 3. Repealer of paragraph following article 1 heading and amendment of section filed 8-2-91; operative 8-2-91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

4. Editorial correction deleting repealed paragraph following article 1 heading (Register 95, No. 8).

§ 2300.1. Instructions of Use.

NOTE: Authority cited: Sections 407 and 14502, Food and Agricultural Code. Reference: Sections 14562 and 14591, Food and Agricultural Code.

HISTORY

- New section filed 11-14-88 as an emergency; operative 11-14-88 (Register 88, No. 48). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3-14-89.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 98, No. 29).

§ 2300.5. Guaranteed Analysis.

NOTE: Authority cited: Sections 407 and 14502, Food and Agricultural Code. Reference: Section 14591, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–1–83; effective thirtieth day thereafter (Register 83, No. 27).
- 2. Repealer of section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2301. Use of Numerals to Describe the Guaranteed Analysis.

When any series of numerals are used in labeling of or in advertising to describe the formula or analysis, or in connection with the name, brand, or trademark, such numerals shall be arranged so that the first will be the guaranteed percentage of nitrogen; the second, the guaranteed percentage of available phosphoric acid; and the third, the guaranteed percentage of soluble potash. The guaranteed percentages shall be consistent with the guaranteed analysis.

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agricultural Code. Reference: Sections 14591 and 14631, Food and Agricultural Code.

HISTORY

1. Amendment of section heading filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2302. Non-Nutritive Standards.

- (a) Inorganic commercial fertilizer and agricultural mineral products shall not exceed the following standards for the non–nutrient metals arsenic, cadmium and lead:
- (1) For each percent iron, manganese or zinc, the fertilizing material shall not exceed the following concentrations of non-nutrient metals: arsenic, 13 parts per million; cadmium, 12 parts per million; lead, 140 parts per million.
- (2) For each percent available phosphate (P₂O₅), the fertilizing material shall not exceed the following concentrations of non–nutrient metals:
- (A) Effective January 1, 2002 through December 31, 2002: arsenic, 4 parts per million; cadmium, 6 parts per million; lead, 20 parts per million.
- (B) Effective January 1, 2003 through December 31, 2003: arsenic, 3 parts per million; cadmium, 5 parts per million; lead, 20 parts per million.
- (C) Effective January 1, 2004: arsenic, 2 parts per million; cadmium, 4 parts per million; lead, 20 parts per million.
 - (3) The concentration limits are applied as follows:
- (A) For micronutrient materials with guaranteed available iron, manganese or zinc multiply the percentage of guaranteed micronutrient material (Minor Element) by the arsenic, cadmium and lead maximum concentrations as expressed in parts per million (ppm). Example: A 12% Iron product will have the following limits: arsenic, 156 parts per million (13 ppm X 12); cadmium, 144 parts per million (12 ppm X 12); and lead, 1,680 parts per million (140 ppm X 12).
- (B) For phosphate (P_2O_5) materials multiply the guaranteed percentage of P_2O_5 by the arsenic, cadmium and lead maximum concentrations as expressed in parts per million (ppm). Example: from January 1, 2002 through December 31, 2002: A guaranteed available 52% (P_2O_5) phosphate product will have the following limits: arsenic 208 parts per million (4 ppm X 52); cadmium 312 parts per million (6 ppm X 52); and lead 1,040 parts per million (20 ppm X 52).
- (4) For specialty fertilizers that guarantee less than 6% available phosphate (P_2O_5) but make no micronutrient claim, the maximum allowable concentrations of non–nutrient metals shall not exceed:

- (A) Effective January 1, 2002 through December 31, 2002 specialty fertilizers shall not exceed: arsenic, 20 parts per million; cadmium, 30 parts per million; and lead, 100 parts per million.
- (B) Effective January 1, 2003 through December 31, 2003 specialty fertilizers shall not exceed: arsenic, 15 parts per million; cadmium, 25 parts per million; and lead, 100 parts per million.
- (C) Effective January 1, 2004 specialty fertilizers shall not exceed: arsenic, 10 parts per million; cadmium, 20 parts per million; and lead, 100 parts per million.
- (5) For specialty fertilizers that guarantee less than 6% available phosphate (P_2O_5) and make a micronutrient claim, multiply the guaranteed percentage of micronutrient by the arsenic, cadmium and lead maximum concentrations as expressed in parts per million (ppm) and add the following values to that total:
- (A) Effective January 1, 2002 through December 31, 2002 add: arsenic, 20 parts per million; cadmium, 30 parts per million; and lead, 100 parts per million.
- (B) Effective January 1, 2003 through December 31, 2003 add: arsenic, 15 parts per million; cadmium 25 parts per million; and lead 100 parts per million.
- (C) Effective January 1, 2004 add: arsenic, 10 parts per million; cadmium, 20 parts per million; and lead 100 parts per million.
 - (6) The concentration limits are applied as follows:
- (A) A guaranteed available 3% (P_2O_5) phosphate product with 2% guaranteed zinc will have the following limits. Example: from January 1, 2002 through December 31, 2002: arsenic, 46 parts per million (13 ppm X 2 zinc = 26 ppm + 20 ppm); cadmium, 54 parts per million (12 ppm X 2 zinc = 24 ppm + 30 ppm); and lead, 380 parts per million (140 ppm X 2 zinc = 280 ppm + 100 ppm).
- (b) Waste and hazardous waste shall be defined as specified in Title 22, CCR Division 4.5, Chapter 11 Identification and Listing of Hazardous Waste, commencing with Section 66261.1.
- (c) Recyclable material used in fertilizing material manufacture shall meet all applicable requirements in the Code of Federal Regulations, Chapter 1, Title 40, Part 266, Subpart C Recyclable Materials Used In a Manner Constituting Disposal, commencing with Section 266.20.
- (d) Recyclable material used in fertilizing material manufacture shall be sampled and tested in accordance with procedures specified in Title 22, CCR, Division 4.5, Chapter 11 Identification and Listing of Hazardous Waste, commencing with Section 66261.1.
- (1) A copy of test results shall be submitted to the department for each source of recyclable material used in the manufacture of zinc, manganese or iron products utilized as a base fertilizing material ingredient. Additional test results shall not be required by the department unless the process or operation generating the recyclable material changes.
- (e) No recyclable material may be used in fertilizing material manufacture if its use is denied pursuant to Title 22, CCR, Division 4.5, Chapter 16, Article 8.5 Requirements for Management of Recyclable Materials Used in Agriculture, Section 66266.115.
- (f) No recyclable hazardous waste may be used in fertilizing material manufacture unless the generator of such recyclable hazardous waste complies with Title 22, CCR, Division 4.5, Chapter 16, Article 8.5 Requirements for Management of Recyclable Materials Used in Agriculture, commencing with Section 66266.115.
- (g) By December 31, 2004, the department shall publish a report concerning results of research that evaluates the protectiveness of these regulations on both human health and the environment. Additionally, the report shall include an analysis of and recommendations for regulating cobalt, copper, mercury, molybdenum, nickel, selenium and dioxins. NOTE: Authority cited: Sections 407, 14502 and 14682, Food and Agriculture Code. Reference: Section 14682, Food and Agriculture Code.

HISTORY

1. New section filed 10–19–2001; operative 1–1–2002 (Register 2001, No. 42). For prior history, see Register 92, No. 7.

§ 2303. Labeling Requirements.

The label information for fertilizing materials required by Section 14631 of the Food and Agricultural Code, shall include the following:

- (a) Product name.
- (b) Measurement
- (1) Net weight, of dry materials (for commercial fertilizer, agricultural minieral and auxiliary soil and plant substance labels).
- (2) Volume (for packaged soil amendments and liquid specialty fertilizers).
- (3) Density, (pounds per gallon at 68 degrees Fahrenheit), for bulk liquids only.
 - (c) Grade (for commercial fertilizer labels only).
 - (d) The licensee's name and address.
- (e) Purpose of the product (for packaged soil amendments and specialty fertilizers only).
- (f) Directions for use (for auxiliary soil and plant substances, packaged soil amendments and specialty fertilizers only).
- (g) The statement "NONPLANT FOOD INGREDIENT" printed in capital letters (for auxiliary soil and plant substance products).
- (h) A statement of composition showing the percent of each active ingredient, which is the agent in a product primarily responsible for the intended effects (for auxiliary soil and plant substances).
- (i) A guaranteed analysis using the following format, terminology and order presented:

(1) Total Nitrogen (N)	%
% Ammoniacal Nitrogen	
% Nitrate Nitrogen	
% Water Soluble Organic Nitrogen or Oth-	
er recognized and determinable forms	
of nitrogen	
% Water Insoluble Organic Nitrogen or	
Water Insoluble Nitrogen	
Available Phosphoric Acid (P_2O_5)	%
Soluble Potash (K ₂ O)	——— _%
(2) Secondary and micronutrient guarantee minimums. (if	
Calcium (Ca)

Moisture, maximum (BULK ONLY)	%

- (4) Other guarantees: (if claimed, and approved by the director)
- (j) A derivation statement (for commercial fertilizers and agricultural mineral labels only).

- (1) Abbreviations shall not appear in the derivation statement.
- (k) A list of ingredients in decreasing amounts present. (For packaged soil amendments only).
- (*l*) The following format and guarantees, as applicable for the following products or ingredients, shall appear following the derivation statement of agricultural mineral and commercial fertilizer labels:

"ALSO CONTAINS NONPLANT FOOD INGREDIENT(S):"

X% Humic Acids (Derived from . . . state the source of the humic acids)

X% Polymers (state the name of the specific polymer). (For auxiliary soil and plant substances only).

Wetting Agents (state the name of the specific wetting agent on the application only – not required on the label)

- (m) Additional information, other than secondary or micronutrient guarantees, shall not appear in the guaranteed analysis statement.
- (n) The guarantees for the forms of nitrogen must add up to the total nitrogen guarantee claimed and are recommended in the order appearing in the format shown in section 2303(i)(1).
- (o) Zeros are required before the decimal points when less than one percent.
- (p) For packaged products, the information found in section 2303(a) through (o) shall either:
 - (1) Appear on the label, or
- (2) Be printed on a tag and attached to the package. This information shall be in a conspicuous form.
- (q) For bulk products, the information found in section 2303(a) through (o) shall be in written or printed form and shall accompany the delivery. This information shall be in a conspicuous form.
- (r) The manufacturer of any base fertilizing material ingredient that claims iron, manganese, zinc or phosphates shall provide a guarantee statement that the product does not exceed standards established for arsenic, cadmium and lead.
- (1) For purposes of the labeling guarantee, base fertilizing material ingredient shall be defined as phosphate, zinc, manganese, or iron products utilized singly or as material ingredient in blended or formulated fertilizing material products. Examples of such base fertilizing material ingredients include, but are not limited to, phosphoric acid, monoammonium phosphate, diammonium phosphate, zinc oxide, zinc sulfate, zinc from galvanizer skimmings, zinc from electric arc furnace dust, metallic zinc, refined zinc from the copper pickling process, zinc from circuit board recycling, iron II & III oxide, iron ore deposits, iron from recycling of bailing wire, rust or photographic operations, and manganese oxide.
- (2) The guarantee statement shall report in parts per million the maximum total concentration of arsenic, cadmium and lead in the base fertilizing material ingredient.
- (s) Packaged product labels for commercial fertilizer and agricultural mineral products, with the exception of gypsum, liming materials, manure, wood or coal fly ash, sewage sludge, composted products, potting soils, potting mix, blood meal, bone meal, feather meal, kelp meal or seaweed, cottonseed meal, fish meal, sphagnum moss and seed mix shall include either an informational statement of laboratory test results or provide an informational statement providing the maximum levels in parts per million of arsenic, cadmium, cobalt, copper, lead, mercury, molybdenum, nickel and selenium.
- (1) In lieu of a statement on the label, the information may be provided by either of the following statements:

"Information regarding the contents and levels of metals in this product is available by calling 1–800–XXX–XXXX."

Or

"Information regarding the contents and levels of metals in this product is available on the Internet at http://www.regulatory-info-xx.com." Each registrant shall substitute a unique alphanumeric identifier for "xx". This statement may be used only if the licensee establishes and maintains the Internet site; there is a clearly visible, direct hyperlink to a government web site; and, the Internet site contains no advertising or company—

specific information. A government web site internet address on the label is an acceptable alternative to a web site established and maintained by the licensee.

- (t) Testing methodology for the informational statement of laboratory test results shall conform to either sample preparation method 3050B or 3051 and conform to analysis methods as described in US EPA Publication SW–846 (Revision 3, December 1996), which is hereby incorporated by reference.
- (u) Labeling provisions in Section 2303 (r) shall be met no later than January 1, 2002. Labeling provisions in Section 2303 (s) shall be met no later than July 1, 2002 for all products entering into channels of trade.
- (v) The publication of inaccurate information regarding the contents and levels of metals is a misbranding violation pursuant to Section 14681 of the Food and Agriculture Code.

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agricultural Code. Reference: Section 14631, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).
- 2. New subsections (r)–(v) filed 10–19–2001; operative 1–1–2002 (Register 2001, No. 42).
- 3. Change without regulatory effect amending subsection (t) filed 6–13–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 24).
- 4. Amendment of subsections (r)(1) and (s) filed 11-6-2003; operative 12-6-2003 (Register 2003, No. 45).

§ 2304. Biotics.

All fertilizing materials for which claims are made relating to organisms, enzymes or organisms by-products are auxiliary soil and plant substances and are subject to the registration requirement of Section 14601 of the Food and Agricultural Code, whether or not the material would otherwise be exempt from registration as a commercial fertilizer.

In addition to the information required by Section 14601 of the Food and Agricultural Code, the label of each product which contains organisms, enzymes, and other biologically active by-products of organisms for which claims are made shall state:

- (a) Name of each species and strains as part of the statement of composition and name of each by-product, if claimed.
- (b)(1) The percentage or number of viable units of microorganisms per cubic centimeters.
- (2) The concentration in percentage of enzymes or other organism byproducts claimed.
 - (c) The expiration date for use.
 - (d) Storage conditions.

A generally accepted laboratory method for assaying the viable and attenuated units, and the by-products claimed must be submitted with the registration application.

When used for the purpose intended, the product must not be pathogenic to plants or pathogenic to animals which may consume the treated plant. Biotic products such as Rhizobium spp., Gingaspora spp., Glomus spp., and Pisolithus spp., are acceptable for registration. Other biotic products are acceptable based on efficacy data.

NOTE: Authority cited: Sections 407, 14502, 14601 and 14631, Food and Agricultural Code. Reference: Sections 14594, 14601 and 14631, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–12–83; effective thirtieth day thereafter (Register 83, No. 3).
- 2. Repealer of former section 2304 and renumbering of former section 2305 to section 2304 filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).
- 3. Editorial correction amending first and second paragraphs (Register 98, No. 29).

§ 2305. Chelating Agents.

The label of each product for which a chelation claim is made shall state:

- (a) The name of the chelating agent.
- (b) The percent of the guaranteed micronutrient content which is chelated, for example, in the following format:

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agricultural Code. Reference: Sections 14502 and 14631, Food and Agricultural Code.

HISTORY

 Renumbering of former section 2305 to section 2304 and renumbering and amendment of former section 2306 to section 2305 filed 8-2-91; operative 8-2-91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2306. Fish Emulsion.

When a product is labeled as fish emulsion, it shall contain a minimum of 40 percent total solids.

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agricultural Code. Reference: Sections 14502 and 14631, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former section 2306 to section 2305 and renumbering and amendment of former section 2307 to section 2306 filed 8-2-91; operative 8-2-91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2307. Hydroponics, Continuous Liquid Feed Products and Ready-to-Use Foliar Products.

The minimum percentages acceptable for micronutrients stated in Section 2303, do not apply to guarantees for those water soluble nutrients or micronutrients on products labeled only for hydroponic, continuous liquid feed programs or ready—to—use foliar products.

NOTE: Authority cited: Sections 407, 14502 and 14631 of the Food and Agricultural Code. Reference: Section 14631 of the Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 2307 to section 2306 and new section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).
- 2. Amendment of section heading and section filed 10-15-96; operative 11-14-96 (Register 96, No. 42).

§ 2308. Packaged Soil Amendments.

- (a) Packaged soil amendments shall be measured by volume (quarts/cubic feet). If other measurement information is shown, it shall be in parentheses following the volume statement, e.g. weight, cubic inches, fractions of cubic feet and metric conversions.
- (b) No claim shall be made for chemical composition or nutritive consituents, except as provided in (d) and (f) of this section.
- (c) When a packaged soil amendment is labeled as a specific material, such as peat moss or leaf mold, the product shall consist of not less than 95 percent of that material.
- (d) Organic products such as bark, wood chips, wood sawdust and peat or peat moss claimed to be nitrogen fortified, nitrogen stabilized, or with other terms to inform that the product contains nitrogen added to compensate for nitrogen likely to be taken from soil due to the amendments decomposition therein, are soil amendments when such additional nitrogen is 0.5 percent or less. Any claim for such nitrogen stabilization or fortification or similar term made on the label of a packaged soil amendment shall be accompanied by a statement of the total percent of nitrogen contained therein
 - (e) Packaged soil amendments may contain wetting agents.
- (1) The claim "wetting agent added" can be made without guaranteeing the specific wetting agent or the percentage of such, but the chemical name of the wetting agent must be submitted at the time of registration along with the analytical method.
 - (f) Iron (Fe), may be guaranteed at less than 0.1 percent.
- (g) If reference is made to the acidity or alkalinity of the product, or its influence on the soil, a range or specific pH must be guaranteed.

 NOTE: Authority cited: Sections 407, 14502, 14601 and 14631, Food and Agricultural Code. Reference: Sections 14601 and 14631, Food and Agricultural Code.

 HISTORY
- 1. Repealer and new section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2309. Phosphorus Materials.

(a) Products that contain phosphorous acid shall state on the label the percentage of "Total phosphoric acid", upon conversion of phosphorous acid.

- (1) Phosphorous acid products are for use as a supplemental fertilizer treatment
- (2) Upon foliar application, the phosphite ions are taken up directly by the plant foliage and may undergo a degree of conversion to phosphate ions, or will be used directly by plants, as phosphite ions.
- (3) As a soil application to annual crops, a lesser response from the initial crop, with a corresponding superior response from succeeding crops. may be observed. In addition, placement close to seeds or root zones may be injurious to crops. The effect may be aggravated by a soil pH below 6.5.
- (b) Products that contain Phosphoric acid shall state on the label the percentage of "Available Phosphoric Acid". If, in addition, a percentage of "Total Phosphoric Acid" is stated, the percentage of "Insoluble Phosphoric Acid" (Citrate–Insoluble Phosphorus) must be stated immediately below, for example:

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agricultural Code. Reference: Section 14631, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).
- New subsections (a)–(a)(3) and redesignation and amendment of existing section as subsection (b) filed 11–6–2003; operative 12–6–2003 (Register 2003, No. 45).

§ 2310. Seed and Plant Food Mixture.

A packaged combination of viable seeds for planting intermixed with nitrogen, available phosphoric acid, or potash, added singly or in combination totaling one percent or less, solely to stimulate the sprouting seeds after planting is not classed as any form of fertilizing material as defined in Section 14533 of the Food and Agricultural Code.

NOTE: Authority cited: Section 407 and 14502 of the Food and Agricultural Code. Reference: Section 14502 of the Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former section 2310 to section 2313 and new section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2311. Slow Released Plant Nutrients.

- (a) The label shall not state or imply that a plant nutrient or micronutrient contained in a fertilizer is released slowly over a period of time, unless such nutrients or micronutrients are identified and guaranteed.
 - (b) The types of slow released products recognized are:
- (1) Water insoluble (N products only), such as natural organics, urea formaldehyde, isobutylidene diurea and oxamide.
- (2) Coated slow release such as sulfur coated urea and other encapsulated soluble fertilizers.
- (3) Products containing water soluble nitrogen such as ureaform materials, urea formaldehyde products, methylenediurea (MDU), dimethylene triurea (DMTU), dicyanodiamide (DCD).
- (4) Occluded slow release, where fertilizers or fertilizer materials are mixed with waxes, resins, or other inert materials and formed into particles

The terms "water insoluble," "coated slow release," "slowly available water soluble" and "occluded slow release" are accepted as descriptive of these products provided the claim is substantiated by a research study as required by section 2300(b).

- (5) Products containing phosphorous acid such as potassium phosphite and ammonium phosphite which undergo a degree of conversion in plants or soils to available phosphoric acid (P₂O₅).
- (6) Effective January 1, 2006, products containing elemental sulfur are a source of nutrient sulfur when applied to soil. Other application techniques for elemental sulfur must be substantiated by scientific research as required by Section 2300(b) that demonstrates availability of an efficacious amount of nutrient sulfur for plant uptake generally consistent with soil application.

Page 228 Register 2005, No. 26; 7-1-2005

- (c) When slowly released nutrients are less than 15 percent of each total of the guarantee for either total nitrogen (N), available phosphoric acid (P_2O_5), or soluble potash (K_2O), as appropriate, the label shall not refer to slow release of the materials.
- (d) Association of Official Analytical Chemist's (AOAC) latest method shall be used to confirm the coated slow release and occluded slow release nutrients and others whose slow release characteristics depend on particle size and AOAC latest method shall be used to determine the water insoluble nitrogen of organic materials.

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agricultural Code. Reference: Section 14631, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 2311 to section 2315 and new section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).
- 2. New subsection (b)(5) filed 11–6–2003; operative 12–6–2003 (Register 2003, No. 45).
- 3. Editorial correction of subsection (b)(3) (Register 2005, No. 26).
- 4. New subsection (b)(6) filed 7–1–2005; operative 1–1–2006 pursuant to Government Code section 11343.4(b) (Register 2005, No. 26).

§ 2312. Gypsum Equivalent.

Any of the following four compounds, singly or in combination, shall be expressed as a percent gypsum equivalent on the label:

Hydrated Calcium Sulfate (CaSO₄2H₂O)

Anhydride Calcium Sulfate (CaSO₄)

Hydrated Calcium Sulfite

Anhydride Calcium Sulfite

NOTE: Authority cited: Sections 407, 14502 and 14631, Food and Agriculture Code. Reference: Section 14631, Food and Agriculture Code.

HISTORY

1. Renumbering and amendment of former section 2312 to section 2316 and new section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

Article 2. Samples

§ 2313. Official Samples.

A sample of fertilizing materials drawn by the director for the purpose of analysis, in accordance with Sections 14641 and 14642 of the Food and Agricultural Code, shall be known as an "official sample" and shall be drawn in a manner prescribed by this article to represent the entire lot from which it is taken.

NOTE: Authority cited: Sections 407 and 14502, Food and Agricultural Code. Reference: Section 14605, Food and Agricultural Code.

HISTORY

 Renumbering of former section 2313 to section 2317 and renumbering and amendment of former section 2310 to section 2313 filed 8-2-91; operative 8-2-91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2314. Subsamples.

Subsamples shall be provided to interested parties after laboratory analysis by the department, with the condition that the requesting party agree to provide analytical results of the subsample to the Department of Food and Agriculture, Feed, Fertilizer and Livestock Drug Branch within 21 days of receipt.

NOTE: Authority cited: Sections 407, 14502 and 14645, Food and Agricultural Code. Reference: Sections 14645 and 14646, Food and Agricultural Code.

HISTORY

Repealer and new section filed 8-2-91; operative 8-2-91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2315. Sampling Procedure.

Each official sample shall consist of at least one pound of dry material or one pint of liquid material taken in the following manner:

- (a) Packaged Dry Materials.
- (1) Use a sampler that removes a core diagonally from end-to-end of the container.

(2) The lot and the sample size will be established in the following

Lot Size Containers Sample Size Containers	s
Less than 5	l
6–15	5
16–30	5
31–60	7
61–100	3
101–200)
201–300)
301–500	ı
501 or more	2

- (3) Small packages of dry fertilizer material in packages of 80 pounds or less, when not practical to sample according to subsection (2), shall be represented by one unbroken package which will constitute the official sample.
 - (4) Place all cores into sample container and send to the laboratory.
- (b) Sampling Dry Fertilizing Materials in Bulk Lots. Dry bulk material shall be sampled by one of the following methods:
- (1) Use a bulk cup—type sampler with an opening width at least three times the diameter of the largest particle being sampled and long enough to cut the complete stream. The delivery stream must be "cut" with the sampler at least ten times at equal intervals during the delivery.

The registrant mixing the material must supply a safe and convenient access to a stream of the material being loaded for the sampler.

- (2) Use a "Missouri D" probe according to the following system:
- (i) At least 12 cores must be drawn in different locations.
- (ii) When a single lot of fertilizing material is in two separate compartments, take a minimum of six cores from each compartment.
- (iii) When a single lot of fertilizing material is in three or more compartments, take a minimum of four cores from each compartment.
 - (c) When sampling gypsum, the following procedure is accepatable:
 - (1) Scrape outer surface aside before inserting sampler.
- (2) Take approximately 20 approximately equal cores from fairly evenly distributed parts of the quantity.
- (3) Portions may be taken with a trowel when the material contains large lumps or when for other reasons it is not possible to use a sampler.
- (4) Place all portions into sample container and send to the laboratory for mixing and quartering.
- (d) Liquid fertilizing materials must be sampled by one of the following systems:
- (1) Full horizontal cylindrical or spherical tanks are sampled with a restricted fill liquid sampling device. Lower the liquid sampler just below the surface and allow to fill, the liquid sampler is then recovered and emptied into a suitable container. This process is repeated twice at the center level of the tank and once at the bottom. All four aliquots are thoroughly mixed and tested; or a sample of the four aliquots consisting of not less than one pint shall be sent to the laboratory for testing.
- (2) Sample vertical cylindrical, cubic or rectangular shaped tanks by proceeding as in "(1)" except one aliquot is taken from the center level rather than taking two aliquots from the center level.
- (3) Nonpressurized nitrogen solutions, nitrogen-phosphate mixtures, and other clear solutions may be sampled at the sight gauge or outlet after these openings have been drained and flushed with the solution. Fertilizer suspensions or slurries must be completely agitated before sampling; when a homogenous mixture is achieved, sample as above.
- (4) Streamcutting a homogenous mixture from a valve while loading is an acceptable sampling procedure.
- (5) Small packages of liquid fertilizing materials, when not practical to sample according to subsection (d)(1)(2)(3), shall be represented by one unbroken package which will constitute the official sample.

NOTE: Authority cited: Sections 407, 14052 and 14646, Food and Agricultural Code. Reference: Section 14606, Food and Agricultural Code.

HISTORY

1. Repealer and renumbering and amendment of former section 2311 to section 2315 filed 8-2-91; operative 8-2-91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2316. Identification of Official Sample.

A sample of a fertilizing material shall be identified before removal from premises where it was drawn. The identification shall consist of the date; name of product as given on the label, if any; inspector's initials and sample number.

NOTE: Authority cited: Sections 407, 14502 and 14645, Food and Agricultural Code. Reference: Sections 14645 and 14646, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–28–85; effective thirtieth day thereafter (Register 85, No. 35).
- Repealer and renumbering of former section 2312 to section 2316 filed 8-2-91; operative 8-2-91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2317. Description of Sample.

An inspector's Product Sample Data official form showing pertinent information concerning the sample shall be prepared at the time each official sample is drawn. Where reasonably possible, a label shall be taken from the lot represented by the sample and accompany the inspector's Product Sample Data.

NOTE: Authority cited: Sections 407, 14502 and 14645, Food and Agricultural Code. Reference: Sections 14605, 14645 and 14646, Food and Agricultural Code. HISTORY

1. Renumbering of former section 2313 to section 2317 filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

Article 3. Licensing

§ 2318. Licensing.

In addition to requirements found in Section 14591 of the Food and Agricultural Code, the following information is required.

(a) A place of business.

NOTE: Authority cited: Sections 407, 14502 and 14591, Food and Agricultural Code. Reference: Section 14591, Food and Agricultural Code.

HISTORY

1. New section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

§ 2319. Experimental Use of a Fertilizing Material.

Experimental use of a fertilizing material for noncommercial value is exempt from licensing.

NOTE: Authority cited: Sections 407, 14502 and 14591, Food and Agricultural Code. Reference: Sections 14531 and 14591, Food and Agricultural Code.

HISTORY

1. New section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

Article 4. Registration

§ 2320. Registration.

In addition to requirements found in Section 14601 of the Food and Agricultural Code, the following information is required.

Each auxiliary soil and plant substance, packaged agricultural mineral, packaged soil amendment and specialty fertilizer shall be registered in the name of the legal entity or person whose name appears on the label before being distributed in this state.

These materials shall not be distributed or sold unless the product is registered.

NOTE: Authority cited: Sections 407, 14502 and 14601, Food and Agricultural Code. Reference: Section 14601, Food and Agricultural Code.

HISTORY

1. New section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

Article 5. Tonnage Reporting

§ 2321. Tonnage Reporting.

In addition to the requirements found in Sections 14621, 14622 and 14623 of the Food and Agricultural Code, the following is required.

(a) The tonnage report shall be made semi-annually no later than July 31, and no later than January 31 of each year for tonnage of one ton or greater. Zero reports are not required.

NOTE: Authority cited: Sections 407, 14502, 14621, 14622 and 14623, Food and Agricultural Code. Reference: Sections 14621 and 14622, Food and Agricultural Code.

HISTORY

1. New section filed 8–2–91; operative 8–2–91 pursuant to Government Code section 11346.2(d) (Register 92, No. 7).

Subchapter 2. Economic Poisons

(Originally printed 7–25–45)

Article 1. General Provisions

§ 2330. Name, Brand, or Trademark of Economic Poison.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 1 (Sections 2327–2331, consecutive) and new Article 1 (Sections 2330 and 2331) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Register 65, No. 6.
- 2. Editorial renumbering of Section 2330 to Section 6235 filed 7–19–85 (Register 85, No. 29).
- 3. Editorial correction deleting repealed Section 2327 (Register 95, No. 8).

§ 2331. Commercial Pest Control Service.

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer filed 5-3-85; effective thirtieth day thereafter (Register 85, No. 18).

§ 2332. Operational Protocol for Pesticide Registration and Evaluation Manual.

NOTE: Authority cited: Sections 407, 12781, 12976, 12981 and 14005, Food and Agricultural Code. Reference: Sections 12751 through 14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 4-24-80 as an emergency; designated effective 4-24-80 (Register 80, No. 17). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-23-80.
- 2. Certificate of Compliance filed 7-3-80 (Register 80, No. 27).
- 3. Editorial renumbering of Section 2332 to Section 6160 filed 7–19–85 (Register 85, No. 29).

Article 2. Definitions

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. HISTORY

- 1. Repealer of Subarticle 2 (Sections 2336–2338) and new Article 2 (Section 2340) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Register 65, No. 6.
- 2. Repealer of Article 2 (Section 2340) filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32).

Article 3. Exemptions

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12753 and 12801, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 3 (Sections 2343–2345) and new Article 3 (Section 2350) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history see Register 65, No. 6.
- 2. Renumbering of Article 3 (Section 2350) to Chapter 6 (Section 6210) filed 8-4-82; designated effective 1-1-83 (Register 82, No. 32).

Article 4. Registration Procedures

§ 2360. Application.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–5–79; designated effective 1–4–80 (Register 79, No. 49). For prior history, see Registers 79, No. 5; 78, No. 52; and 65, No. 6.
- 2. Amendment of subsections (a) and (d) filed 5-1-80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-30-80.
- 3. Certificate of Compliance filed 7–3–80 (Register 80, No. 27).
- 4. Amendment of subsections (a) and (e) filed 1–19–82; effective thirtieth day thereafter (Register 82, No. 4).
- 5. Editorial renumbering and amendment of Section 2360(a) to Section 6170, renumbering of Section 2360(b) to Section 6171, renumbering and amendment of Section 2360(c) to Sections 6151 and 6156, renumbering of Section 2360(d) to Section 6157, renumbering of Section 2360(e) to Section 6158, renumbering of Section 2360(f) to Section 6230 and renumbering of Section 2360(g) to Section 6231 filed 7–19–85 (Register 85, No. 29).

§ 2360.1. Adverse Effect Disclosure.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- 2. Editorial renumbering of Section 2360.1 to Section 6210 filed 7–19–85 (Register 85, No. 29).

§ 2361. Acceptance of Labeling.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2361 to Section 6238 filed 7–19–85 (Register 85, No. 29).

§ 2362. Brands.

NOTE: Authority cited: Sections 407, 1152, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- 2. Editorial renumbering of Section 2362 to Section 6152 filed 7–19–85 (Register 85, No. 29).

§ 2363. Transfer of Registration.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2363 to Section 6153 filed 7–19–85 (Register 85, No. 29).

§ 2364. Change of Name.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2364 to Section 6154 filed 7–19–85 (Register 85, No. 29).

§ 2365. Computation of Retail Value.

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer filed 5–3–85; effective thirtieth day thereafter (Register 85, No. 18).

§ 2366. Renewal.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- 2. Editorial renumbering and amendment of Section 2366 to Section 6215 filed 7-19-85 (Register 85, No. 29).

§ 2367. Reevaluation.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- Editorial renumbering of Section 2367(a) to Section 6220, renumbering of Section 2367(b) to Section 6221, renumbering and amendment of Section 2367(c) and (d) to Section 6222, renumbering of Section 2367(e) to Sections 6223 and 6224, renumbering of Section 3267(f) to Section 6225 and renumbering of Section 2367(g) to Section 6226 filed 7-19-85 (Register 85, No. 29).

§ 2368. Annual Review.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- 2. Editorial renumbering of Section 2368 to Section 6227 filed 7–19–85 (Register 85, No. 29).

Article 5. Data Requirements

§ 2369. Review and Evaluation.

NOTE: Authority cited: Sections 407, 12781 and 12824, Food and Agricultural Code. Reference: Sections 11501, 12751–13102, Food and Agricultural Code.

[The next page is 229.]

HISTORY

- 1. Repealer of Article 5 (Section 2370) and new Article 5 (Sections 2369–2380, not consecutive) filed 12–5–79; designated effective 1–4–80 (Register 79, No. 49). For prior history, see Register 78, No. 52.
- New subsection (f) filed 4–28–80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8–27–80.
- 3. Certificate of Compliance filed 7-3-80 (Register 80, No. 27).
- Amendment of subsection (d) filed 1–19–82; effective thirtieth day thereafter (Register 82, No. 4).
- Repealer of subsection (f) filed 4–14–82; effective thirtieth day thereafter (Register 82, No. 16).
- Editorial renumbering and amendment of Section 2369(a)–(c) to Section 6159, renumbering and amendment of Section 2369(d) to Section 6170(c) and renumbering of Section 2369(e) to Section 6206 filed 7–19–85 (Register 85, No. 29).

§ 2369.5. Conditional Registration.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 11501 and 12824–12825, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–14–82, effective thirtieth day thereafter (Register 82, No. 16).
- 2. Amendment of subsection (i)(4) filed 12–27–82; designated effective 1–1–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 1).
- 3. Editorial renumbering and amendment of Section 2369.5 to Section 6200 filed 7–19–85 (Register 85, No. 29).

§ 2370. Safety Related to Exposure.

Note: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- Repealer of subsection (f)(4) and renumbering of subsection (f)(5) filed 5-1-80
 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of
 Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-30-80.
- 2. Certificate of Compliance filed 7-3-80 (Register 80, No. 27).
- 3. Editorial renumbering of Section 2370(a) to Section 6176, renumbering of Section 2370(b) to Section 6177, renumbering of Section 2370(c) to Section 6178, renumbering of Section 2370(d) to Section 6179, renumbering of Section 2370(e) to Section 6180, renumbering of Section 2370(f)(1) to Section 6181, renumbering of Section 2370(f)(2)–(f)(4) to Section 6182 and renumbering of Section 2370(g) to Section 6183 filed 7–19–85 (Register 85, No. 29).

§ 2371. Residue Test Method.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- Amendment of subsection (b) filed 5-1-80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-30-80.
- 2. Certificate of Compliance filed 7-3-80 (Register 80, No. 27)
- 3. Editorial renumbering of Section 2371 to Section 6184 filed 7–19–85 (Register 85, No. 29).

§ 2372. Residue Data.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121,12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–19–82; effective thirtieth day thereafter (Register 82, No. 4).
- 2. Editorial renumbering and amendment of Section 2372 to Section 6185 filed 7–19–85 (Register 85, No. 29).

§ 2373. Efficacy.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. Amendment filed 1–19–82; effective thirtieth day thereafter (Register 82, No. 4).

2. Editorial renumbering of Section 2373 to Section 6186 filed 7–19–85 (Register 85, No. 29).

§ 2374. Hazards to Bees.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code

HISTORY

1. Editorial renumbering of Section 2374 to Section 6187 filed 7–19–85 (Register 85, No. 29).

§ 2375. Closed System Compatibility.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. Editorial renumbering and amendment of Section 2375 to Section 6188(a) filed 7–19–85 (Register 85, No. 29).

§ 2376. Effects on Pest Management.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2376 to Section 6189 filed 7–19–85 (Register 85, No. 29).

§ 2378. Inert Ingredient Hazard.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. Editorial renumbering and amendment of Section 2378 to Section 6190 filed 7–19–85 (Register 85, No. 29).

§ 2379. Volatile Organic Compounds.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2379 to Section 6191 filed 7–19–85 (Register 85, No. 29).

§ 2379.5. General Toxicity Data.

NOTE: Authority cited: Sections 407, 12781 and 12824, Food and Agricultural Code. Reference: Sections 11501, 12824–12825, Food and Agricultural Code.

History

- 1. New section filed 1–19–82; effective thirtieth day thereafter (Register 82, No. 4).
- 2. Editorial renumbering of Section 2379.5 to Section 6172 filed 7–19–85 (Register 85, No. 29).

§ 2380. Other Data.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2380 to Section 6192 filed 7–19–85 (Register 85, No. 29).

Article 6. Labeling

§ 2389. Scope of Labeling Requirements.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12751–13102, Food and Agricultural Code.

HISTORY

- New section filed 5-1-80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-30-80.
- 2. Certificate of Compliance filed 7-3-80 (Register 80, No. 27).
- 3. Editorial renumbering of Section 2389 to Section 6243 filed 7–19–85 (Register 85, No. 29).

§ 2390. Placement of Label.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 6 (Section 2364) and new Article 6 (Sections 2390–2397, consecutive) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For history of former Article 6, see Registers 77, No. 6 and 65, No. 6.
- 2. Editorial correction of History Note 1 (Register 79, No. 5)
- 3. Editorial renumbering of Section 2390 to Section 6237 filed 7–19–85 (Register 85, No. 29).

§ 2391. Name and Address of Manufacturer, Distributor, Packer, Formulator, or Registrant.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2391 to Section 6239 filed 7–19–85 (Register 85, No. 29).

§ 2393. Legibility of Label and Labeling.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2393 to Section 6240 filed 7–19–85 (Register 85, No. 29).

§ 2394. Registration Number.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2394 to Section 6241 filed 7–19–85 (Register 85, No. 29).

§ 2395. Warning or Caution Statement.

NOTE: Authority cited: Sections 407, 12781, and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering and amendment of Section 2395 to Section 6242 filed 7–19–85 (Register 85, No. 29).

§ 2396. Sub-Packaging of Certain Economic Poisons for Resale to Consumers.

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2396 to Section 6247 filed 7–19–85 (Register 85, No. 29).

§ 2397. False and Misleading Statements.

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer filed 5-3-85; effective thirtieth day thereafter (Register 85, No. 18).

Article 7. Criteria

§ 2400. Wettable and Soluble Powders.

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 7 (Sections 2369, 2370 and 2371) filed 4–9–65; effective thirtieth day thereafter (Register 65, No. 6).
- New Article 7 (Section 2400) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52).
- 3. Editorial correction of History Notes 1 and 2 (Register 79, No. 5).
- 4. Editorial renumbering of Section 2400 to Section 6193 filed 7–19–85 (Register 85, No. 29).

§ 2401. Rodenticide Bait Safety.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).

2. Editorial renumbering of Section 2401 to Section 6180(b)–(e) filed 7–19–85 (Register 85, No. 29).

§ 2402. Closed System Compatibility.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- Editorial renumbering of Section 2402 to Section 6188(b) filed 7–19–85 (Register 85, No. 29).

Article 8. Findings of the Director

§ 2420. Findings of the Director of Food and Agriculture.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824 and 12825, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 8 (Sections 2375–2378) and new Article 8 (Sections 2420–2425, consecutive) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history see Register 65, No. 6.
- 2. Renumbering and amendment of Section 2420 to Section 6350 filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32).

§ 2421. Findings of the Director of Food and Agriculture.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824 and 12825, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of Section 2421 to Section 6352 filed 8-4-82; designated effective 1-1-83 (Register 82, No. 32).

§ 2422. Findings of the Director of Food and Agriculture.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824 and 12825, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of Section 2422 to Section 6354 filed 8-4-82; designated effective 1-1-83 (Register 82, No. 32).

§ 2423. Inorganic Arsenic.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824 and 12825, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–30–80; effective thirtieth day thereafter (Register 80, No. 22).
- Renumbering and amendment of Section 2423 to Section 6356 filed 8-4-82; designated effective 1-1-83 (Register 82, No. 32).

§ 2424. Findings of the Director of Food and Agriculture.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824 and 12825, Food and Agricultural Code.

HISTORY

 Renumbering and amendment of Section 2424 to Section 6358 filed 8-4-82; designated effective 1-1-83 (Register 82, No. 32).

§ 2425. Suspension of Registration and Use of Economic Poisons Containing 1,2–Dibromo–3–Chloropropane (DBCP).

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824, 12825 and 12826, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of Section 2425 to Section 6370 filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32).

§ 2426. Suspension of Registration and Use of Economic Poisons Containing N–3–Pyridylmethyl N⁷-p Nitrophenyl Urea (Vacor).

 $NOTE: Authority\ cited: Sections\ 407\ and\ 12781, Food\ and\ Agricultural\ Code.\ Reference:\ Sections\ 12824,\ 12825\ and\ 12826,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. New section filed 2–22–79 as an emergency; effective upon filing (Register 79, No. 8).
- 2. Certificate of Compliance filed 6-19-79 (Register 79, No. 25).
- 3. Renumbering and amendment of Section 2426 to Section 6372 filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32).

§ 2427. Ethylene Dibromide.

NOTE: Authority cited: Sections 407, 12781 and 14102, Food and Agricultural Code. Reference: Sections 11501(b), 12824, 12825, 14001 and 14102, Food and Agricultural Code.

Page 230 (4-1-90)

HISTORY

- 1. New section filed 3–10–82 as an emergency; designated effective 3–10–82 (Register 82, No. 13). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 7–8–82.
- Certificate of Compliance transmitted to OAL 7–1–82 and filed 7–29–82 (Register 82, No. 31).
- Amendment filed 3–30–84; effective thirtieth day thereafter (Register 84, No. 13).
- 4. Editorial renumbering of Section 2427 to Section 6359 filed 7–19–85 (Register 85, No. 29).

§ 2428. Cadmium Compounds.

NOTE: Authority cited: Sections 407, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12825, 12995 and 14102, Food and Agricultural Code.

- 1. New section filed 12–8–82; effective thirtieth day thereafter (Register 82. No. 50).
- 2. Editorial renumbering of Section 2428 to Section 6360 filed 7–19–85 (Register 85, No. 29).

Article 9. Mill Assessment

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Section 12841, Food and Agricultural Code.

HISTORY

- Repealer of Article 9 (Section 2380) and new Article 9 (Sections 2430–2435, consecutive) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 77, No. 6, and 65, No. 6.
- 2. Renumbering and amendment of Article 9 (Sections 2430–2435) to Chapter 6 (Sections 6380–6392, not consecutive) filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32). For prior history, see Registers 80, No. 12; 79, No. 52; and 79, No. 28.

Article 9.5. Mill Assessment Disbursement Criteria

NOTE: Authority cited: Sections 407, 12781 and 12844, Food and Agricultural Code. Reference: Section 12844, Food and Agricultural Code.

HISTORY

- 1. New Article 9.5 (Sections 2436–2439.5) filed 7–9–79 as an emergency; effective upon filing. Certificate of Compliance included (Register 79, No. 28).
- Amendment of subsection (c) filed 12–24–79; effective upon filing (Register 79, No. 52). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 4–23–79.
- 3. Certificate of Compliance including amendment of subsection (c) filed 3–21–80 (Register 80, No. 12).
- 4. Repealer of Article 9.5 (Sections 2436–2439.5) and new Article 9.5 (Sections 2436–2438) filed 10–16–81; effective thirtieth day thereafter (Register 81, No. 42).
- 5. Repealer of Article 9.5 (Sections 2436–2439 and 2439.9, not consecutive) filed 7–8–83; effective thirtieth day thereafter (Register 83, No. 28). For prior history, see Register 81, No. 49.

Article 10. Violations

§ 2440. Misbranding.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code.
HISTORY

- 1. Repealer of Article 10 (2390 and 2391) and new Article 10 (Section 2440) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history see Registers 77, No. 6 and 65, No. 6.
- 2. Repealer of Article 10 (Section 2440) filed 8-4-82; designated effective 1-1-83 (Register 82, No. 32).

Article 11. Pesticide Regulatory Program

§ 2440.5. Unregistered Products.

NOTE: Authority cited: Sections 407, 12781, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Section 12995, Food and Agricultural Code.

HISTORY

1. New section filed 1–3–83; effective thirtieth day thereafter (Register 83, No. 2).

Editorial renumbering of Section 2440.5 to Section 6301 filed 7–19–85 (Register 85, No. 29).

§ 2441. Purpose.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7. Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New Article 11 (Sections 2441–2445) filed 12–5–79; designated effective 1–4–80 (Register 79, No. 49). For prior history, see Register 78, No. 52.
- 2. Editorial renumbering of Section 2441 to Section 6100(a) filed 8–13–85 (Register 85, No. 33).

§ 2442. Definitions.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2442 to Section 6000.1 filed 8–13–85 (Register 85, No. 33).

§ 2443. Pesticide Registration, Renewal, and Reevaluation.

Note: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- Amendment of subsections (b) and (c) filed 5-1-80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-30-80.
- 2. Certificate of Compliance filed 7–3–80 (Register 80, No. 27).
- 3. Editorial renumbering of Section 2443(a) to Section 6252, renumbering of Section 2443(b) to Section 6253, renumbering of Section 2443(c)–(e) to Section 6254 and renumbering of Section 2443(f) to Section 6255 filed 7–19–85 (Register 85, No. 29).

§ 2444. Standards and Regulations.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New Article 19 (§ 2444) filed 3–3–72 as an emergency; designated effective 3–4–72 (Register 72, No. 10). For history of former Article 19, see Register 66, No. 9.
- 2. Certificate of Noncompliance (repealer by operation of Section 11422.1, Government Code) filed 7–12–72 (Register 72, No. 29).
- 3. Amendment of subsection (a)(3) filed 5–1–80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8–30–80.
- 4. Certificate of Compliance filed 7-3-80 (Register 80, No. 27).
- 5. Editorial renumbering of Section 2444(a) and (b) to Section 6110, renumbering of Subsections (c) and (d) to Section 6116, and renumbering of Subsection (e) to Section 6118 filed 8–13–85 (Register 85, No. 33).

§ 2445. Commissioner Consultation.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, 14001–14104, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of Section 2445 to Section 6122 filed 8–13–85 (Register 85, No. 33).

Article 12. Application for Registration

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 12 (Sections 2402–2408.6, not consecutive) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 78, No. 23; 77, No. 50; 77, No. 33; 77, No. 6; 72, No. 43; 72, No. 29; 72, No. 18; 71, No. 50; 71, No. 37; 71, No. 27; 71, No. 20; 70, No. 33; 70, No. 16; 69, No. 31; 65, No. 6.

Page 231 (4-1-90)

Article 13. Transfer of Registration

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 13 (Sections 2412 and 2413) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 77, No. 50 and 65, No. 6.

Article 14. Commercial Pest Control Service

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 14 (Sections 2418 and 2419) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 77, No. 6 and 65, No. 6.

Article 15. Toxicity Definitions and Caution Statements

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 15 (Sections 2424 and 2425) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 77, No. 6 and 65, No. 6.

Article 16. Labeling

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 16 (Sections 2430–2434, consecutive) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 77, No. 6; 71, No. 23; 65, No. 6.

Article 17. Misbranding

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 17 (Sections 2435–2436, consecutive) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 77, No. 6; 75, No. 27; 65, No. 6.

Article 17.1. Advertising and Sales Documents

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

 Repealer of Article 17.1 (Section 2440) file 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 75, No. 27; 72, No. 39; 72, No. 15.

Article 17.2. Mill Assessments

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 17.2 (Sections 2440.5–2440.7) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 75, No. 27; 75, No. 24; 73, No. 24; 72, No. 35.

Article 17.3. Mill Assessment Reimbursement to Counties

NOTE: Authority cited: Sections 407, 12781 and 14005. Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 17.3 (Sections 2441 and 2441.1) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Registers 75, No. 27; 72, No. 35.

Article 18. Products Containing Lead

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Repealer of Article 18 (Sections 2442 and 2443) filed 12–29–78; effective thirtieth day thereafter (Register 78, No. 52). For prior history, see Register 73, No. 8

Article 19. Restricted Materials

NOTE: Authority cited: Sections 407 and 14005, Agricultural Code. Reference: Sections 14001–14035, Agricultural Code.

HISTORY

- 1. New Article 19 (§ 2444) filed 3–3–72 as an emergency; designated effective 3–4–72 (Register 72, No. 10). For history of former Article 19, see Register 66, No. 9.
- 2. Certificate of Noncompliance (repealer by operation of Section 11422.1, Government Code) filed 7–12–72 (Register 72, No. 29).

Article 20. Restricted Materials

§ 2450. Restricted Materials.

NOTE: Authority cited: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, 14006.7 and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (n) filed 4–3–84 as an emergency; effective upon filing (Register 84, No. 14). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8–1–84. For prior history, see Register 83, No. 41.
- 2. New subsection (k)(25) filed 8-24-84 as an emergency; effective upon filing (Register 84, No. 36). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12-22-84.
- 3. Repealer of subsection (k)(25) by operation of Government Code Section 11346.1(g) (Register 85, No. 1).
- 4. New subsection (k)(25) filed 12–31–84 as an emergency; effective upon filing (Register 85, No. 1). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–30–85.
- Reinstatement of subsection (n) as it existed prior to emergency amendment filed 4-3-84 by operation of Government Code Section 11346.1(f) (Register 85, No. 9).
- 6. Amendment of subsection (n) filed 2-28-85; effective thirtieth day thereafter (Register 85, No. 9).
- Order of Repeal of 12–31–84 emergency order filed 5–20–85 by OAL pursuant to Government Code Section 11349.6(b) (Register 85, No. 21).
- New subsection (k)(25) filed 5-21-85 as an emergency; effective upon filing. (Register 85, No. 21). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 9-18-85.
- 9. Editorial renumbering of Section 2450 to Section 6400 filed 8–13–85 (Register 85, No. 33).

§ 2450.5. Designation of Restricted Materials.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671 and 12751–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- 2. New subsection (d) filed 1–2–80 as an emergency; designated effective 1–4–80 (Register 80, No. 1). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 5–4–80.
- 3. Expired by own terms (Register 80, No. 18).
- Amendment filed 5-1-80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-30-80.

Page 232 (4-1-90)

- 5. Certificate of Compliance filed 7–3–80 (Register 80, No. 27).
- 6. Editorial renumbering of Section 2450.5 to Section 6228 filed 7-19-85 (Register 85, No. 29).

§ 2451. Definitions.

NOTE: Authority cited: Sections 407, 12781, 12976, 12979, 14004.5, 14005, 14033, 14063 and 14102, Food and Agricultural Code. Reference: Sections 12751-13102 and 14001-14104, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsections (a) and (d) filed 12-6-78; effective thirtieth day thereafter (Register 78, No. 49)
- 2. Amendment of subsection (a) filed 12-19-80; effective thirtieth day thereafter (Register 80, No. 51)
- 3. Amendment of subsection (d) filed 10-15-81; effective thirtieth day thereafter (Register 81, No. 42).
- 4. Editorial renumbering of Section 2451 to Section 6000.2 filed 8-13-85 (Register 85, No. 33).

§ 2452. Restricted Material Permit Requirements.

NOTE: Authority cited: Sections 407, 14005 and 14006, Food and Agricultural Code. Reference: Sections 14001, 14006, 14006.5 and 14007, Food and Agricultural Code.

HISTORY

- 1. New subsections (j), (k) and (l) filed 12-5-79; designated effective 1-4-80
- (Register 79, No. 49). For prior history, see Register 78, No. 49.
 2. Amendment of subsection (j) filed 1–2–80 as an emergency: designated effective 1-4-80 (Register 80, No. 1). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 5-4-80.

 3. Amendment of subsection (d)(13) filed 3-20-80; effective thirtieth day thereaf-
- ter (Register 80, No. 12).
- 4. Amendment of subsection (j), repealer of subsection (k) and relettering of subsection (l) to (k) filed 5-1-80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-30-80.
- 5. Certificate of Compliance filed 7-3-80 (Register 80, No. 27)
- 6. Amendment of subsection (d)(1) filed 10-15-81; effective thirtieth day thereafter (Register 81, No. 42).
- 7. Amendment of subsections (e), (f), (i) and (j) filed 1-14-82; effective thirtieth day thereafter (Register 82, No. 3)
- 8. Amendment of subsection (j)(10) filed 3-2-82; effective thirtieth day thereafter (Register 82, No. 10).
- 9. Editorial correction of subsection (j)(10) filed 5-19-82 (Register 82, No. 21).
- 10. Editorial renumbering of Section 2452(a) to Section 6412, Section 2452(b) and (c) to Section 6414, Section 2452(d) to Section 6400(p), Section 2452(e) to Section 6420, Section 2452(f) to Section 6422(a), Section 2452(g) to Section 6412, Section 2452(h) to Section 6408(a), Section 2452(i) to Section 6424(a), Section 2452(j)(1)(A)-(G) to Section 6000.3, Section 2452(j)(2) to Section 6422(b), Section 2452(j)(3) and (4) to Section 6426(a) and (b), Section 2452(j)(5) to Section 6428, Section 2452(j)(6) to Section 6434(a), Section 2452(j)(7) to Section 6430, Section 2452(j)(8) to Section 6432(a), Section 2452(j)(9) to Section 6432(b), last sentence of Section 2452(j)(9)(A) to Section 6410, Section 2452(j)(10) to Section 6434(b), Section 2452(j)(11) to Section 6122(b), Section 2452(j)(12) to Section 6436, Section 2452(j)(13) to Section 6408(b), Section 2452(j)(14) to Section 6424(b), and Section 2452(k) to Section 6100(b) filed 8-13-85 (Register 85, No. 33).

§ 2452.1. Employer-Employee Responsibility.

NOTE: Authority cited: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005 and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-6-80; effective thirtieth day thereafter (Register 80, No. 6).
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 2452.5. Refusal, Suspension or Revocation of a **Restricted Material Permit.**

NOTE: Authority cited: Sections 407, 12979, 14004.5, 14005, 14033 and 14063, Food and Agricultural Code. Reference: Sections 14001-14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-6-78; effective thirtieth day thereafter (Register 78, No.
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 2453. Chloropicrin and Methyl Bromide Restrictions.

NOTE: Authority cited: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001-14104, Food and Agricultural Code.

HISTORY

- 1. New subsection (d) filed 2-6-80; effective thirtieth day thereafter (Register 80,
- 2. Editorial renumbering of Section 2453(a) to Section 6450, Section 2453 (b) and (c) to Section 6452(a) and (b), and Section 2453(d) to Section 6454 filed 8-13-85 (Register 85, No. 33).

§ 2454. Sodium Arsenite Restrictions.

NOTE: Authority cited: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005 and 14102, Food and Agricultural Code. Reference: Sections 12980-12982, 14001-14003, 14006, 14006.5, 14007, 14011, and 14103, Food and Agricultural Code.

HISTORY

- 1. New subsections (d)-(h) filed 2-6-80; effective thirtieth day thereafter (Register 80, No. 6).
- 2. Amendment filed 10-15-81; effective thirtieth day thereafter (Register 81, No. 42).
- 3. Editorial renumbering of Section 2454 to Section 6456 filed 8–13–85 (Register 85, No. 33).

§ 2455. Restrictions on Planting Seeds Treated with Mercury Compounds.

HISTORY

1. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 2456. Propanil Restrictions.

NOTE: Authority cited: Sections 407, 12781, 12976, 14001, 14005 and 14102, Food and Agricultural Code. Reference: Sections 14006 and 14033, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) and new subsection (b) filed 7-30-81 as an emergency; effective upon filing (Register 81, No. 31). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11-27-81.
- 2. Certificate of Compliance as to 7-30-81 order transmitted to OAL 11-27-81 and filed 12-11-81 (Register 81, No. 50).
- 3. New subsection (c) filed 6-29-82 as an emergency; effective upon filing (Register 82, No. 28)
- 4. Order of Repeal of 6–29–82 emergency order filed 7–8–82 by OAL pursuant to Government Code Section 11349.6 (Register 82, No. 28).
- 5. New subsection (c) filed 7–9–82 as an emergency: effective upon filing (Register 82, No. 28). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11–6–82.
- 6. Subsection (b) expired by own terms (Register 83, No. 25).
- 7. New subsection (b) filed 6-14-83 as an emergency; effective upon filing (Register 83, No. 25). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 10-12-83.
- 8. Editorial correction of subsection (b) filed 7-28-83 (Register 83, No. 31).
- 9. Amendment of subsection (c) filed 4-13-84 as an emergency; effective upon filing (Register 84, No. 15). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8-11-84.
- 10. Certificate of Compliance as to 4-13-84 order transmitted to OAL 8-10-84 and filed 9-10-84 (Register 84, No. 37)
- 11. Editorial renumbering of Section 2456 to 6462 filed 8-13-85 (Register 85, No.

§ 2457. Restrictions on Highly Volatile Liquid Herbicides.

HISTORY

1. Editorial renumbering of Section 2457 to Section 6464(a) filed 8-13-85 (Register 85, No. 33).

§ 2458. Herbicide Restrictions.

NOTE: Authority cited: Sections 407, 11502, 12005, 12731, 12781, 12976, 12979, 12981, 14001, 14004.5, 14005, 14033, 14063 and 14102, Food and Agricultural Code. Reference: Sections 11401-11531, 12981 and 14001-14104, Food and Agricultural Code.

HISTORY

- 1. New subsection (e)(12) filed 4-28-78 as an emergency; effective upon filing (Register 78, No. 17).
- 2. Amendment of subsection (e) (10) filed 5-11-78 as an emergency; effective upon filing (Register 78, No. 19).
- 3. Certificate of Compliance filed 9-8-78 (Register 78, No. 36).
- 4. New subsection (e)(12) refiled 9–15–78 as an emergency; effective upon filing (Register 78, No. 37).
- 5. Amendment of subsections (a), (d) and (e) filed 12-6-78; effective thirtieth day thereafter (Register 78, No. 49).
- 6. Amendment filed 6-18-79 as an emergency; effective upon filing. Certificate of Compliance included (Register 79, No. 25).

- 7. Amendment of subsections (b)–(d) filed 2–6–80; effective thirtieth day thereafter (Register 80, No. 6).
- Amendment of subsection (f)(5)(B) filed 4–17–81 as an emergency; effective upon filing (Register 81, No. 16). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8–15–81
- 9. Certificate of Compliance as to 4–17–81 order transmitted to OAL 8–13–81 and filed 8–28–81 (Register 81, No. 35).
- 10. Amendment of subsection (e)(10)(C) and repealer of subsections (e)(2) and (e)(10)(B) filed 4–30–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 18).
- 11. Editorial renumbering of Section 2458(a)–(c) to Section 6460(a)–(c) and Section 2458(d)–(f) to Section 6464(b)–(d) filed 8–13–85 (Register 85, No. 33).

§ 2458.1. Sodium Fluoroacetate Restrictions.

NOTE: Authority cited: Sections 407, 12979, 14004.5, 14005, 14033, and 14063, Food and Agricultural Code. Reference: Sections 14001 through 14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–6–78; effective thirtieth day thereafter (Register 78, No. 49).
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).
- 3. Editorial correction of NOTE (Register 97, No. 37).

§ 2458.2. Paraguat Restrictions.

NOTE: Authority: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code..

HISTORY

- 1. New section filed 2-6-80; effective thirtieth day thereafter (Register 80, No. 6).
- 2. Editorial renumbering of Section 2458.2 to Section 6466 filed 8–13–85 (Register 85, No. 33).

§ 2458.3. 1,3–Dichloropropene and Ethylene Dibromide Restrictions.

NOTE: Authority: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–6–80; effective thirtieth day thereafter (Register 80, No. 6).
- Editorial renumbering of Section 2458.3 to Section 6468 filed 8–13–85 (Register 85, No. 33).

§ 2458.4. Cotton Harvest Aid Restrictions.

NOTE: Authority: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–11–79 as an emergency; designated effective 8–1–79 (Register 79, No. 28.)
- 2. Repealed by operation of section 11422(c), Government Code (Register 80, o. 6).
- $3.\ New\ section\ filed\ 2-6-80; effective\ thirtieth\ day\ thereafter\ (Register\ 80, No.\ 6).$
- 4. Amendment of subsection (a) filed 9–1–81 as an emergency; effective upon filing (Register 81, No. 37).
- 5. Order of Repeal of 9–1–81 emergency order filed 9–10–81 by OAL pursuant to Government Code Section 11349.6 (Register 81, No. 37).
- 6. Editorial renumbering of Section 2458.4 to Section 6470 filed 8–13–85 (Register 85, No. 33).

§ 2458.5. Ethylene Dichloride Use Restrictions.

NOTE: Authority: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–6–80; effective thirtieth day thereafter (Register 80, No. 6).
- 2. Editorial renumbering of Section 2458.5 to Section 6472 filed 8–13–85 (Register 85, No. 33).

§ 2458.6. Chlordane Restrictions on Citrus, Grapes, and Strawberries.

NOTE: Authority: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–6–80; effective thirtieth day thereafter (Register 80, No. 6).
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 2458.7. Carbofuran Restrictions.

NOTE: Authority: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–6–80; effective thirtieth day thereafter (Register 80, No. 6).
- 2. Editorial renumbering of Section 2458.7 to Section 6474 filed 8–13–85 (Register 85, No. 33).

§ 2458.8. Fenamiphos Restrictions.

NOTE: Authority: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–6–80; effective thirtieth day thereafter (Register 80, No. 6).
- 2. Editorial renumbering of Section 2458.8 to Section 6476 filed 8–13–85 (Register 85, No. 33).

§ 2458.9. Termiticide Restrictions.

NOTE: Authority cited: Sections 407, 12781, 12976, 14005, and 14102, Food and Agricultural Code. Reference: Sections 14001 through 14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–20–80; effective thirtieth day thereafter (Register 80, No. 12).
- 2. Editorial correction of printing error in subsection (k) (Register 91, No. 33).
- 3. Repealer filed 5–31–95; operative 6–30–95 (Register 95, No. 22).

§ 2458.10. 2,4-Dichlorophenyl p-Nitrophenyl Ether Restrictions.

NOTE: Authority cited: Sections 407, 11502, 12781, and 14005, Food and Agricultural Code. Reference: Sections 11401–12121 and 12751–14104, Food and Agricultural Code.

HISTORY

- New section filed 4-29-80 as an emergency; effective upon filing (Register 80, No. 18). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 8-28-80.
- 2. Certificate of Compliance filed 8-20-80 (Register 80, No. 34).
- 3. Amendment filed 8–22–80 as an emergency; effective upon filing (Register 80, No. 34). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12–22–80.
- Reinstatement of section as it existed prior to emergency amendment filed 8-22-80 by operation of Section 11346.1(f), Government Code (Register 81, No. 48).
- Editorial renumbering of Section 2458.10 to Section 6480 filed 8–13–85 (Register 85, No. 33).

§ 2458.11. Phenoxy Herbicide Restrictions on Timberland.

NOTE: Authority cited: Sections 407, 14001, 14005 and 14006, Food and Agricultural Code. Reference: Sections 14004, 14006.5 and 14009, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–17–82 as an emergency; effective upon filing (Register 82, No. 13)
- 2. Order of Repeal of 3–17–82 emergency order filed 3–26–82 by OAL pursuant to Government Code Section 11349.6 (Register 82, No. 13).
- 3. New section filed 4–12–82 as an emergency; effective upon filing (Register 82, No. 16).
- 4. Order of Repeal filed 4–12–82 by OAL pursuant to Government Code Section 11349.6 (Register 82, No. 16).
- 5. New section filed 3–2–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 10).
- Amendment filed 7–30–84, effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 31).
- 7. Renumbering and amendment of Section 2458.11 to Section 6443 filed 9-14-87; operative 10-14-87 (Register 87, No. 38).

§ 2459. Reports and Records.

NOTE: Authority cited: Sections 407, 12781, 12976, 14005, 14102, Food and Agricultural Code. Reference: Sections 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–19–80; effective thirtieth day thereafter (Register 80, No. 51).
- 2. Editorial renumbering of Section 2459 to Section 6440 filed 8–13–85 (Register 85, No. 33).

§ 2460. Generalized Symptoms, Residues, and Health Hazards.

HISTORY

1. Editorial renumbering of Section 2460 to Section 6444 filed 8–13–85 (Register 85, No. 33).

§ 2461. Dealer Responsibilities.

HISTORY

1. Editorial renumbering of Section 2461 to Section 6568 filed 8–13–85 (Register 85, No. 33).

§ 2462. Exempt Materials.

HISTORY

1. Editorial renumbering of Section 2462 to Section 6402 filed 8–13–85 (Register 85, No. 33).

§ 2463. Hearings Pursuant to Section 14009 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 407 and 14005, Food and Agricultural Code. Reference: Sections 14006.5 and 14007–14011, Food and Agricultural Code.

HISTORY

- 1. New section filed 5–12–78 as an emergency; effective upon filing (Register 78, No. 19).
- 2. Certificate of Compliance filed 9-8-78 (Register 78, No. 36).
- 3. Editorial renumbering of Section 2463 to Section 6442 filed 8–13–85 (Register 85, No. 33).

Article 21. Applicator Certification

§ 2465. Certification Requirements.

NOTE: Authority cited: Sections 407, 12979, 14004.5, 14005, 14033, and 14063, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 21 (Sections 2460–2466) and new Article 21 (Sections 2465–2469) filed 12–7–77; effective thirtieth day thereafter (Register 77, No. 50). For prior history, see Registers 29, No. 3, 55, No. 15, 61, No. 16, 68, No. 48, 70, No. 5, 70, No. 22, 70, No. 43, 71, No. 31, 73, No. 5, 73, No. 12, 73, No. 15, 73, No. 25, 74, No. 15, 74, No. 23, 74, No. 40, 75, No. 32, 76, No. 31, and 77, No. 37.
- 2. Repealer of Article 21 (Sections 2460–2466) and new Article 21 (Sections 2465–2469) refiled 1–16–78 as an emergency; effective upon filing. Certificate of Compliance filed 1–26–78. For technical reasons, corrected order and Certificate of Compliance printed in Register 77, No. 50.
- 3. Amendment of section, and title of Article 21 filed 12–6–78; effective thirtieth day thereafter (Register 78, No. 49).
- Editorial renumbering of first sentence of Section 2465 to Section 6404 and renumbering of remaining Section 2465 to Section 6406 filed 8–13–85 (Register 85, No. 33).

§ 2466. Applications.

NOTE: Authority cited: Sections 407, 14005 and 14102, Food and Agricultural Code.

HISTORY

 Repealer filed 4–30–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 18).

§ 2467. Categories and Examinations.

NOTE: Authority cited: Sections 407, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14001 and 14102, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 2467 to Section 6530 filed 4-30-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 18).

§ 2468. Refusal, Revocation, and Suspension of a Commercial Applicator Certificate.

NOTE: Authority cited: Sections 407, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14001 and 14102, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–6–78; effective thirtieth day thereafter (Register 78, No. 49).
- 2. Renumbering and amendment of former Section 2468 to Section 6534 filed 4-30-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 18).

§ 2469. Non-Certified Applicator Supervision.

NOTE: Authority cited: Sections 407, 12979, 14004.5, 14005, 14033, and 14063, Food and Agricultural Code. Reference: Sections 14001–14104, Food and Agricultural Code.

HISTORY

1. Repealer filed 12–6–78; effective thirtieth day thereafter (Register 78, No. 49).

Article 22. Regulation of Environmentally Harmful Materials Used by Structural Pest Control Operators

§ 2470. Regulation of Environmentally Harmful Materials Used by Structural Pest Control Operators.

NOTE: Authority cited: Sections 407, 12781, 12976, 12981, 14001, 14004.5, 14005, 14010, 14011 and 14102, Food and Agricultural Code. Reference: Sections 14101–14104, Food and Agricultural Code.

HISTORY

- 1. Repealer of article 22 (sections 2470–2472) filed 12–6–78; effective thirtieth day thereafter (Register 78, No. 49). For former history, see Register 54, No. 13.
- 2. New article 22 (section 2470) filed 8–3–79 as an emergency; effective upon filing (Register 79, No. 31). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 12–1–79.
- 3. Certificate of Compliance filed 11-30-79 (Register 79, No. 48).
- 4. Editorial correction of printing error in subsections (Register 91, No. 33).
- 5. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

Article 23. Pesticide Worker Safety

§ 2475. Purpose of Article.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12782, 12979, 12981 and 14005, Food and Agricultural Code. Reference: Sections 11401–12121, 12751–12994, and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 23 (Sections 2475 through 2488, inclusive) and new Article 23 (Sections 2475 through 2487, inclusive) filed 7–28–76; effective thirtieth day thereafter (Register 76, No. 31). For prior history, see Register 74, No. 15, and Register 75, No. 24.
- 2. Repealer of Article 23 (Sections 2475 through 2487) and new Article 23 (Sections 2475 through 2487) filed 2–2–77; effective thirtieth day thereafter (Register 77, No. 6).
- 3. Renumbering and amendment of Article 23 (Sections 2475, 2477–2487) to Chapter 6, Subchapter 3, Group 3 (Sections 6700–6778, not consecutive), and renumbering and amendment of Section 2476 to Chapter 6, Subchapter 1, Group 1 (Section 6000.4) filed 10–25–85; effective thirtieth day thereafter (Register 85, No. 43). For prior history, see Registers 83, No. 41; 79, No. 29; and 79, No. 1.

Subchapter 3. Tolerances and Exemptions from Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities

§ 2490. Findings of Fact: Incorporation of Federal Regulations.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

1. Repealer of Group 3 (Sections 2490.1 through 2490.1018, not consecutive) and new Group 3 (Sections 2490, 2490.1 and 2490.2) filed 2–22–74; effective thir-

tieth day thereafter (Register 74, No. 8). For prior history, see Registers 60, No. 16; 63, No. 12; 64, No. 15; 67, Nos. 11 and 24; 68, No. 41.

- 2. New subsection (c) filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- 3. Editorial renumbering of Section 2490 to Section 6490 filed 8-13-85 (Register 85, No. 33).

§ 2490.1. Limitation on Residues of Pesticide Chemicals.

HISTORY

1. Editorial renumbering of Section 2490.1 to Section 6492 filed 8–13–85 (Register 85, No. 33).

§ 2490.2. Tolerances for DDT and Toxaphene.

HISTORY

1. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 2490.3. Severance.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005, and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102, and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-5-79; designated effective 1-4-80 (Register 79, No. 49).
- 2. Editorial renumbering of Section 2490.3 to Section 6102 filed 8–13–85 (Register 85, No. 33).

Chapter 2. Field Crops

(Originally Printed 7-25-45)

Subchapter 1. Bonded Warehouses

NOTE: Authority cited for repealer of Group 1: Section 407, Agricultural Code. Reference: Sections 54601–54861, Agricultural Code.

HISTORY

1. Repealer of Group 1 (§§ 2500 through 2627) filed 3–21–69; effective thirtieth day thereafter (Register 69, No. 22). For former sections, see original Title 3.

Subchapter 2. Commercial Feed

Article 1. Definitions

§ 2675. Definitions.

Unless otherwise apparent from the context the following definitions apply to this Group 2:

- (a) "Mineral feed" means a commercial feed intended to supply primarily mineral elements or inorganic nutrients for animal nutrition.
- (b) "Official sample" means a sample of commercial feed taken by the secretary or his agent for regulatory purposes.
- (c) "Process" means any treatment that changes a feed ingredient so that it can no longer be restored to its previous form.
- (d) "Official name" of ingredients means those defined in Article 14 of this Group 2, provided that in the absence of a definition, the common English name shall be used.
- (e) "Food additive" has the same meaning as defined in the Food, Drug and Cosmetics Act 21, United States Code, section 321(s).
- (f) "Sell" includes offer for sale, expose for sale, possess for sale, exchange, barter, or trade.
- (g) "Inert material" means ingredients that are not assimilated in the digestive process, including sand, granite grit, charcoal and clay.
- (h) "Prohibited Mammalian Tissue" is any protein—containing portion of mammalian animals, excluding: blood and blood products, gelatin, inspected meat products which have been cooked and offered for human food and further heat processed for feed (such as plate waste and used cellulosic food casings), milk products (milk and milk proteins), and any product whose only mammalian protein consists entirely of porcine or equine protein; or any material specified in Title 21, Code of Federal Regulations (CFR) Part 589.2000, April 1, 2001.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14925, 14991, 14992(e), 15011 and 15042, Food and Agricultural Code.

HISTORY

- 1. Repealer of Group 2 (Secs. 2675–2815 not consecutive) and new Group 2 (Secs. 2675–2802), filed 6–13–73; effective thirtieth day thereafter (Register 73, No. 24). For history of former Group 2, see Registers 59, No. 8; 67, No. 46; 68, No. 2; 70, No. 3 and 71, No. 4.
- 2. Repealer of subsections (a)–(c), (g)–(j), (l), (m) and (o), and relettering and amendment of subsections (d)–(f), (k), (n) and (p) to subsections (a)–(f) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 3. Amendment of subsection (a) and new subsection (g) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).
- 4. Amendment of subsection (b), new subsection (h) and amendment of Note filed 1-30-2002; operative 1-30-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

Article 2. Commercial Feed Containing Drugs, Food Additives, or Harmful Substances

§ 2676. Safety and Efficacy of Drugs and Food Additives.

(a) Prior to use or sale of commercial feed containing any additive (including any drug, food additive, or other special purpose additive, or

- non-nutritive additive) the distributor shall submit evidence to the secretary to show the safety and efficacy of the commercial feed when used according to the directions stated on the label.
- (b) In determining whether satisfactory evidence of safety and efficacy is shown, the secretary will consider:
- (1) Whether each additive conforms to the requirements of the applicable regulations in Title 21, Code of Federal Regulations, Parts 570, 573 and 582 or are "prior sanctioned" or "generally recognized as safe (GRAS)" for stated uses.
- (A) "Prior Sanctioned" is defined in Title 21, Code of Federal Regulations, Part 570.3, as an explicit approval granted with respect to use of a substance in food prior to September 6, 1958, by the Food and Drug Administration or the United States Department of Agriculture pursuant to the Federal Food, Drug and Cosmetic Act, the Poultry Products Inspection Act, or the Meat Inspection Act.
- (B) "Generally Recognized as Safe (GRAS)" is defined in Title 21, Code of Federal Regulations, Part 570.3, definition of safe, as a reasonable certainty in the minds of competent scientists that the substance is not harmful under the intended conditions of use, and Part 570.30, where general recognition of safety may be based only on the views of experts qualified by scientific training and experience to evaluate the safety of substances directly or indirectly added to food.
- (2) Whether the feed itself is a drug as defined in Section 14928 of the Food and Agricultural Code and is generally recognized as safe and effective for the label use, or is approved by the Food and Drug Administration under 21 United States Code 360 b.
- (c) Premixes that contain more than 272.4 milligrams per pound (600 parts per million) added selenium shall be maintained by a daily inventory record that includes the following:
- (1) The quantity of selenium premixes on hand at the beginning and end of the workday (up to 24 hours).
- (2) A daily comparison of the actual amount of selenium premix used, with the theoretical or calculated usage.
 - (3) Actions taken to reconcile any discrepancies.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14903, 15011, 15031 and 15041, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (b) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Amendment of subsection (b) filed 10–26–82; effective thirtieth day thereafter (Register 82, No. 44).
- 3. Amendment of subsections (a) and (b), new subsections (c)–(c)(3) and amendment of Note filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).
- 4. Amendment of subsection (c) filed 4–20–2004; operative 4–20–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 17).

§ 2677. Unlawful Sale or Use of Poisonous Substances.

It is unlawful to use or sell a commercial feed containing any poisonous or deleterious substance or any substance which when fed in accordance with label directions or when used in accordance with usual feeding practices may impair the health of the animal being fed or result in an illegal or harmful residue or constituent in or on human food.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14903, 15011 and 15041(a), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2678. Unlawful Sale or Use of Material Containing Pesticide Residue.

- (a) It is unlawful to sell or use commercial feed which contains pesticide residue or drug residue in excess of the tolerance permitted by regulations of the Food, Drug, and Cosmetic Act, Title 21, Part 556, and Title 40, Part 180, Code of Federal Regulations or tolerances set by the director.
 - (b) Tolerances established by the director are:
- (1) DDT, DDD (TDE), and DDE, total residue: 0.5 part per million in or on commercial feed for animals.

0%

- (2) Toxaphene: 2.0 parts per million in or on commercial feed used by dairies for dairy animals; 7.0 parts per million for ruminant meat animal production and equines.
- (3) Kelthane (1,1-bis (p-chlorophenyl)-2,2,2-trichloroethanol): 1.5 parts per million in or on commercial feed for ruminant meat animal production and equines.
- (4) DEF (S,S,S, Tributyl Phosphorotrithioite), 4 parts per million in or on commercial feed for ruminant meat animal production and equines.
- (5) Folex (Tributyl Phosphorotrithioite), 0.25 part per million in or on commercial feed for ruminant meat animal production and equines.
- (c) This section does not authorize application of any pesticide. NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14903, 15011 and 15041(a), Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–25–74; effective thirtieth day thereafter (Register 74, No. 26).
- 2. Amendment of subsection (a) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).
- 3. Amendment of subsection (a) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

§ 2679. Fluorine Tolerances.

- (a) The fluorine content of any mineral or mineral mixtures to be used directly for feeding shall not exceed 0.20 percent for breeding and dairy cattle; 0.30 percent for slaughter cattle; 0.30 percent for sheep; 0.35 percent for lambs; 0.45 percent for swine; and 0.60 percent for poultry.
- (b) Any fluorine bearing ingredients may be used only in such limited amounts in commercial feed so that they will not increase the flurorine content of the total ration, exclusive or roughage, above the following amounts: for breeding and dairy cattle 0.004 percent; for slaughter cattle 0.009 percent; for sheep 0.006 percent; for lambs 0.01 percent; for swine 0.015 percent; and for poultry 0.03 percent.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 2. Amendment filed 7-17-97; operative 8-16-97 (Register 97, No. 29).

§ 2680. Heavy Metals Prohibited.

It is unlawful to sell or use commercial feed intended for direct feeding which contains a heavy metal; provided, however, the following tolerances are permitted: arsenic fifty (50) parts per million, lead thirty (30) parts per million, and mercury two (2) parts per million. Heavy metal contained in drugs which are otherwise permissible, are not subject to this prohibition.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 2. Amendment filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

§ 2681. Animal Proteins Prohibited in Ruminant Feed.

(a) The manufacture, distribution and use of commercial feed containing protein derived from prohibited mammalian tissues shall comply with the requirements of Title 21, Code of Federal Regulations, Parts 589.2000, April 1, 2001.

 $Note: Authority\ cited: Sections\ 407\ and\ 14902,\ Food\ and\ Agricultural\ Code.\ Reference:\ Sections\ 14903,\ 15011\ and\ 15041,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. New section filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).
- 2. Amendment filed 4–20–2004; operative 4–20–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 17).

Article 3. Special Mixes

§ 2683. Special Mixes.

(e) Ash, maximum

- (a) On or before the date of the first delivery of a load, each person that manufactures or prepares a special mix for another person shall furnish to the purchaser either a label that meets the conditions of section 2694 or the following information on an invoice or other document furnished to the purchaser:
- (1) A numbered invoice or an attached document stating the date of sale and formula number.
 - (2) A guaranteed analysis stating the following:
 - (a) Crude Protein, minimum
 (b) Equivalent Crude Protein from
 Nonprotein Nitrogen, maximum (If Present)
 (c) Crude Fat, minimum
 (d) Crude Fiber, maximum

 %
- (f) Maximum percentage of sodium, if more than one-half of one percent (0.5%) of sodium is present.
- (g) In the case of any formula feed which contains more than nine percent ash, the minimum and maximum percentage of calcium (Ca), minimum percentage of phosphorus (P) and the maximum percentage of sodium (if present).
- (3) The official name and percent or pounds of each ingredient and if any formula feed is used, the percent or pounds of the formula feed.
- (4) If a formula feed is used, the label for the formula feed meeting the requirements of section 2694 must be attached to the numbered invoice.
- (5) A special mix that contains a drug must be accompanied by all information required in section 2701 with each delivery.
- (b) The shipping document that accompanies each subsequent delivery shall provide a label which meets the terms of section 2694, or shall plainly and prominently show the original special mix in the following manner: "Ingredient listings and guarantee of analysis accompanying formula number () applies to this delivery." The shipping document must also contain the name, address and telephone number of the purchaser. Whenever any change is made in the composition of the special mix the purchaser shall be supplied with a newly numbered formula showing the required information on or before the date of the first delivery. Upon request, the manufacturer must provide the above documentation as required by director.
- (c) The seller shall retain a copy of each formula for one year subject to inspection by the director. No two formulas issued in one calendar year shall bear the same number.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992(e), 14993 and 14994, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of Note filed 8–17–82 (Register 82, No. 34).
- 2. Amendment of section filed 9–10–91; operative 10–10–91 (Register 92, No. 2).
- 3. Amendment of subsections (a)(1), (a)(2)(a), (a)(2)(f) and (a)(2)(g) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

§ 2684. Bulk Sale.

The net weight of any special mix which is sold in bulk shall be affirmed by a weighmaster's certificate of weight and measure.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 14993, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2685. Packaged Sale.

If packaged, each package of a special mix shall have attached to it a label with all the information required in Section 2683.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991, 14992 and 14993, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

2. Amendment filed 7-17-97; operative 8-16-97 (Register 97, No. 29).

§ 2686. Resale.

It is unlawful to resell a special mix unless properly labeled to meet the requirements of this Group 2.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991 and 14994, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

Article 4. Labeling and Use Requirements

§ 2688. Required Use of Official Names.

The official name of each ingredient in reference to commercial feed in labeling and advertising shall be from the official feed name found in Article 14.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991 and 14992(e), Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 2. Amendment filed 7-17-97; operative 8-16-97 (Register 97, No. 29).

§ 2689. Classification of Ingredients.

The director will examine all ingredients used in feed on the basis of materials, label and advertising claims, and generally accepted usage, and determine whether each is a drug, food additive, special purpose additive or nutritional ingredient.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991 and 14992(e), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2690. Specificity of Directions.

The director may disapprove directions which are incapable of being followed, or are unlikely to be followed in usual feeding practices.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991 and 14992(f), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2691. Statement of Ingredients Outside List.

It is unlawful to show any ingredient outside the list of ingredients, whether in a tradename, trademark or otherwise, unless the percentage of the ingredient in the mix is shown in the same size type. Such statement shall not be shown in a misleading manner.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991 and 14992, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2692. Inert Materials.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991, 14992(d) and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 2. Repealer filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

§ 2693. Complete Label Required.

Each lot or parcel of commercial feed shall bear a complete label as required by sections 14991 and 14992 of the Food and Agricultural Code. Any supplemental representation of the commercial feed, whether or not attached to the label, must correspond fully with the information stated on the label and apply to the complete feed.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991 and 14992, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2694. Label Statements.

The tag or label shall contain a legible and plainly printed statement which certifies to all of the following:

- (a) Minimum percent of crude protein.
- (1) Commercial feeds containing non-protein nitrogen must be labeled in accordance with Section 2707.
 - (b) Minimum percent of crude fat.
 - (c) Maximum percent of crude fiber.
 - (d) Maximum percent of ash.
- (1) Guarantees for the minimum and maximum percentage calcium, minimum percentage phosphorus, and maximum percentage of sodium may be stated in lieu of the ash guarantee.
- (2) In the case of any formula feed which contains more than 9.0 percent ash, the minimum and maximum percentage of calcium, minimum percentage of phosphorus and maximum percentage of sodium shall be guaranteed, if present.
- (e) Recognized official name of each ingredient in order of decreasing amounts present. The name of each ingredient shall appear in the same size, style and color and shall not be misleading. The following descriptive terms used in identification of ingredients in article 14 are not required in the list of ingredients unless it expressly states: "Mechanically Extracted," "Solvent Extracted," or "Feed Grade."
- (f)(1) A single ingredient product using the official name defined in Article 14, Definitions and Standards, is not required to have an ingredient statement.
- (2) The labeling for a single ingredient shall contain guarantees required by this section and the minimum and/or maximum specifications included in the product definition in Article 14, Definitions and Standards
- (3) A single ingredient is not required to guarantee maximum percentage of ash unless it is specified by definition in Article 14.
- (g) Maximum percentage of low nutrition ingredients in a formula feed if they singly or collectively make up more than one percent.
- (h) Trademarked products can be contained in the ingredient listing in parentheses with the ingredients in the product listed in decreasing amounts present.
- (i) Inert materials contained in a formula feed shall be guaranteed if they singly or collectively make up no more than one percent.
- (j) Maximum percentage of sodium, if more than 0.5 percent of sodium is present.
- (k) Numerical value shall be guaranteed for any special quality claimed, including vitamin potency, amino acid content or special mineral content
- (1) Maximum percentage of moisture or minimum percentage dry matter shall be guaranteed when moisture exceeds 15.0 percent. When dried animal waste is used in a mixed feed, the moisture of the mixed feed shall not exceed 12.0 percent.
- (m) Vitamins shall be guaranteed in the terms specified in section 2702. Guarantees for vitamins are not required when commercial feed is neither formulated for nor represented in any manner as a vitamin supplement.
- (n) Any ingredient that is used as a carrier for vitamin, medicated or mineral premixes, may be omitted from the label and substituted with the collective term "roughage products," if the premix makes up one percent or less of the formula feed. The term "roughage products" may be omitted from the formula feed listing of ingredients.
- (o) Additional guarantees must be measurable by an analytical method approved by the Secretary.
- (p) Commercial feeds containing added selenium must be labeled in accordance with section 2697 (Labeling for Special Purposes).

NOTE: Authority cited: Sections 407, 14902 and 14992, Food and Agricultural Code. Reference: Sections 14992, 15011 and 15042, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11-4-76; effective thirtieth day thereafter (Register 76, No.
- 2. Repealer of subsections (a)–(c), and relettering and amendment of subsections (d)–(o) to subsections (a)–(l) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 3. New subsection (m) filed 5-4-90; operative 6-3-90 (Register 90, No. 24).

- 4. Amendment filed 7-17-97; operative 8-16-97 (Register 97, No. 29).
- 5. Amendment of subsections (d), (j) and (*l*), new subsection (p) and amendment of NoTE filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2695. Collective Terms.

- (a) The term "grains" may be used as an ingredient name. However, when one or more grains are named, no substitution shall be made. The form of the grain may be rolled, burred, cracked, ground, whole or pelleted. A statement of form is optional. The ingredients which may be included as "grains" are:
 - (1) Barley, as defined in section 2776(a);
 - (2) Corn, as defined in section 2782(c);
 - (3) Grain sorghums, as defined in section 2797(a);
 - (4) Oats, as defined in section 2791(a);
 - (5) Rye, as defined in section 2795(a); and
 - (6) Wheat, as defined in section 2800(a).
- (b) The term "roughage products" may be used as an ingredient name only in labeling medicated, mineral and vitamin premixes if the labeled recommended use level of the premix in the total ration is specified to be one percent or less of the total ration. The ingredients which may be included as "roughage products" are:
 - (1) Almond Hull products, as defined in section 2773.5;
 - (2) Barley Hulls, as defined in section 2776(d);
 - (3) Corn Cob Fractions;
 - (4) Cottonseed Hulls, as defined in section 2783(i);
 - (5) Grape Pomace, as defined in section 2785(a);
 - (6) Oat Hulls, as defined in section 2791(c);
 - (7) Rice products, as defined in section 2794(f) and (g);
 - (8) Rye, Mill Run, as defined in section 2795(a);
 - (9) Soybean Hulls, as defined in section 2798(c);
 - (10) Soybean Mill Feed, as defined in section 2798(i);
 - (11) Soybean Mill Run, as defined in section 2798(j);
 - (12) Citrus Meal, Dried Citrus Pulp, as defined in section 2802(f); and,
 - (13) Wheat products, as defined in Section 2800.

NOTE: Authority cited: Sections 407, 14902 and 14992, Food and Agricultural Code. Reference: Section 14992(e), Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (d) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Amendment filed 5-4-90; operative 6-3-90 (Register 90, No. 24).
- 3. Amendment of subsections (b)(11)–(12) and new subsection (b)(13) filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2696. Guarantees.

- (a) All guarantees shall apply to the whole feed rather than any single ingredient, except as required in section 2683, and shall be based on a recognized laboratory method of determination.
- (b) Misleading and indefinite statements concerning ingredients and value of ingredients of the feed are prohibited. Included within this prohibition is the use of such terms as "better," "high," "increased," "greater," "low," "decreased," and "less."
- (c) All guarantees shall be stated in percent unless expressly provided to the contrary as required by sections 2683 and 2702.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 14992(d), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2697. Labeling for Special Purposes.

- (a) Each delivery of commercial feed, other than a special mix, shall be accompanied by a label containing the information required by section 2694.
- (b) The guarantees required by section 2694 may be replaced with guarantees pertinent to special purpose commercial feeds and feed ingredients when the feed is sold primarily for drug, mineral, or vitamin content; or when labeled in accordance with Sections 2783.5, 2788(g), (h), (i), (j), (l), (m), 2789(p), (r), (t), (u), 2790, 2790.5, 2790.7 and 2802(e).

- (c) Premixes processed by a manufacturer for use in commercial feed shall be identified. These products are subject to inspection, and shall conform to the definitions and standards which apply to the product or the claims made.
- (d) Commercial feeds containing more than 0.3 parts per million (ppm) added selenium shall include the following on the label:
- (1) A guaranteed analysis statement for the minimum and the maximum parts per million (ppm) of selenium.
- (2) Feeding and/or mixing instructions that bear adequate directions for the safe and permitted use of a feed containing added selenium, including the maximum permitted levels of use for a specific species.
- (3) The statement "Caution: Follow label directions: Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited."
- (e) Computer, generated labels may be used provided all labeling requirements are met.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14903, 14993, 15011 and 15041, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (b) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Amendment of subsection (a) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).
- New subsections (d)–(d)(3), subsection relettering, amendment of newly designated subsection (e) and amendment of NOTE filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2698. Labeling Liquid Feed.

All liquid feed supplements shall be labeled in accordance with the requirements found in Section 2694. In addition, the label shall include the minimum percentage of total sugar expressed as invert and maximum percentage of moisture or the minimum percentage of dry matter. Guarantees for crude fat or crude fiber are not required in liquid feed when there is less than one percent of either constituent.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14991, 14992 and 14993, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 2. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 3. Amendment filed 7-17-97; operative 8-16-97 (Register 97, No. 29).

Article 5. Commercial Feeds Containing Drugs and Special Provisions

§ 2700. Use of Drugs in Commercial Feed.

All feeds containing drugs and food additives shall comply with the requirements of Title 21, Code of Federal Regulations, Parts 225, 558, 570. 573 and 582.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14903, 15011, 15031 and 15041, Food and Agricultural Code. HISTORY

- 1. Amendment filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27)
- 2. Amendment of section filed 9–10–91; operative 10–10–91 (Register 92, No. 2).

§ 2701. Labeling of Feeds Containing Drugs.

Without exception, each delivery of commercial feed containing drugs must be accompanied by a label, invoice or delivery document stating in a prominent manner:

- (a) The name and quantity of each drug and active ingredient.
- (b) The purpose of each drug and active ingredient.
- (c) The term "MEDICATED" prominently displayed immediately above or below the name of the feed.
 - (d) Adequate directions for use.
- (e) Warnings against use of the feed under contra-indicated conditions, including danger to the health of the animal, and warnings against use of the animal or its products for particular purposes when necessary.
- (f) Withdrawal warnings where necessary to assure compliance with residue limitations imposed by regulation.

Page 242 Register 2004, No. 17; 4-23-2004

(g) Each batch or production run of medicated feed shall be identified with its own individual batch or production run number, code, date or other suitable identification. Bulk feed shall have this information stated on the label, invoice or shipping document. Sacked or packaged feed shall have the lot number applied to the label, sack or package. This identification shall be adequate to facilitate the tracing of the complete manufacturing and distribution history of the product.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14903, 14992(f) and 15011, Food and Agricultural Code.

History

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 2. Amendment of subsections (a) and (b), new subsection (c), subsection relettering, and amendment of newly designated subsection (f) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).
- 3. New subsection (g) filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2702. Drug and Food Additive Guarantees.

Drugs and food additives in commercial feed shall be guaranteed in percentage except:

- (a) Drugs, where the statement of dosage is in milligrams, shall be guaranteed in milligrams per pound.
- (b) Antibiotics shall be guaranteed in milligrams per pound, except as required by subsection (c).
- (c) Commercial feed containing antibiotics in amounts less than 2,000 grams per ton of feed shall be labeled to show the grams of antibiotic per ton; or if present in amounts more than 2,000 grams per ton shall be labeled to show the grams of antibiotic per pound of feed.
- (d) Vitamin A shall be guaranteed in International United States Pharmacopoeia (U.S.P.) units per pound.
- (e) Vitamin D shall be stated in International or United States Pharmacopoeia (U.S.P.) units per pound.
- (f) Vitamin E shall be guaranteed in International Units (I.U.) per pound.
 - (g) All other vitamins shall be guaranteed in milligrams per pound.
- (h) All guarantees for vitamin content shall be stated as true vitamins, not compounds. Vitamin K shall be guaranteed as Menadione. The actual form of the vitamin added may be stated as the true vitamin (examples include D–Activated Animal Sterol, Vitamin A Acetate, A–Tocopherol Acetate) or as other commonly recognized terms (examples include Vitamin D₃ Supplement, Vitamin A Supplement, Vitamin E Supplement). Note: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14903, 14991 and 14992(e), Food and Agricultural Code.

HISTORY

- Amendment filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- Amendment of subsections (d) and (j) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).
- 3. Amendment of subsection (j) filed 9–10–91; operative 10–10–91 (Register 92, No. 2).
- 4. Repealer of subsections (d) and (f), subsection relettering, and amendment of newly designated subsections (d), (e) and (h) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

§ 2703. Net Weight Statement.

The net weight statement on the label shall comply with requirements of Division 5 of the Business and Professions Code.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 14992(a), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2704. Screenings in Wheat Products.

The admixture of any proportion of wheat screenings with wheat bran or wheat shorts requires a declaration to that effect in the principal brand name. For example: (a) wheat bran with ground wheat screenings; (b) wheat shorts with ground wheat screenings; (c) wheat mixed feed with wheat screenings.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 14992(e), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2705. Standards Not Changed by Addition of Screenings.

The crude fiber standards, as shown in the various definitions for grains and mill by-products, shall not be altered by the addition of screenings.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 15041(b) and (c), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2706. Materials Requiring Percentage Listings.

The director may require the percentage listing of any material which he finds to be of minimal nutritional value.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code, Reference: Section 14992(d), Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2707. Use of Nonprotein Nitrogen Products.

- (a) Urea and other nonprotein nitrogen products defined in section 2790.7 are acceptable ingredients in commercial feeds for ruminants. They may be used in commercial feed for other animals only with approval by the Director.
- (b) Ingredient sources of non-protein nitrogen such as Urea, DiAmmonium Phosphate, Ammonium Polyphosphate Solution, Ammonium Sulfate, or other basic non-protein nitrogen ingredients defined by regulation shall be guaranteed as follows:
 - (1) Minimum percentage of Nitrogen.
- (2) Minimum percentage of Equivalent Crude Protein from Non–Protein Nitrogen.
- (c) Formula feed containing nonprotein nitrogen products shall be labeled as follows: The maximum percent of equivalent crude protein from nonprotein nitrogen shall appear immediately below the guarantee for the minimum percent of crude protein.
- (d) If the commercial feed, including liquid feed contains more than 8.75 percent equivalent crude protein from all forms of nonprotein nitrogen, or if the equivalent crude protein from all forms of nonprotein nitrogen exceeds one—third of the total crude protein, the label shall bear a warning statement followed by feeding directions for the safe use of the feed. The warning statement shall be in prominent bold type against a contrasting background.

WARNING EXCESSIVE CONSUMPTION MAY RESULT IN ADVERSE TOXIC REACTION USE ONLY AS DIRECTED

(e) Directions for use must be stated in a manner that when followed correctly will prevent toxic reaction from over—consumption. The directions shall include the following: Consumption should be carefully controlled until animals become adjusted to the feed. Additional care should be exercised with starved, stressed or debilitated animals. Recommended daily intake levels shall be given, as well as the statement that all manufacturer's directions for use must be followed carefully.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992(d) and (f), Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 2. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- New subsections (b)–(b)(2), subsection relettering, and amendment of newly designated subsections (c) and (d) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

§ 2708. Vitamin Premixes.

All vitamin premixes shall be labeled to show all vitamin potencies in terms described in section 2702. The carrier shall be stated, if the premix is to make up more than one percent of the total ration; otherwise, the collective term "roughage products" may be used. When mineral compounds are present they shall be listed and guaranteed in percent of the

elemental form. Premixes carrying drugs shall be labeled in conformity with section 2701. The label shall include a statement showing the date manufactured.

NOTE: Authority cited: Sections 407, 14902 and 14992, Food and Agricultural Code. Reference: Sections 14991 and 14992(e), Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Amendment filed 5-4-90; operative 6-3-90 (Register 90, No. 24).

Article 6. Advertising

§ 2712. Misleading Advertising Prohibited.

No printed, written, or advertising matter concerning commercial feed shall contain any statement, design, or device which is false, or misleading.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 15031, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

Article 7. Reports of Inspection and Analysis

§ 2717. Reports of Inspection and Analysis.

- (a) When an official sample has been taken and the analysis made, all financially interested parties shall be supplied with a copy of the report of inspection and analysis.
- (b) If the analysis of an official sample shows that a lot of commercial feed has been sold or offered for sale in violation of any requirement of law or regulation, the report of inspection and analysis shall state the violations found.
- (c) Reports of inspection and analysis apply only to the specific lot represented by the sample.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14902 and 15021, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2719. Use of Reports in Advertising Prohibited.

It is unlawful to use the name of the Department of Food and Agriculture or any of its employees or any reference to a report of inspection and analysis made by the Department in connection with any advertising of commercial feed.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 14902, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

Article 8. Containers

§ 2725. Reuse of Containers.

Containers used in the manufacture, distribution and sale of commercial feed shall be suitable for the intended use, sanitized when necessary and cleaned after use, when necessary, to prevent contamination or adulteration of the product.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 14902, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

Article 9. Misbranding Adulteration

§ 2733. Misbranding.

A commercial feed shall be deemed to be misbranded:

- (a) If it is distributed under the name of another commercial feed.
- (b) If it purports to be or is represented as a commercial feed, or if it purports to contain or is represented as containing a feed ingredient or in-

gredients, unless the commercial feed or feed ingredients conform to the definitions prescribed in this Group 2.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 15031, Food and Agricultural Code.

HISTORY

1. Repealer of subsections (a), (c) and (e), and relettering of subsections (b) and (d) to subsections (a) and (b) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).

§ 2734. Adulteration.

A commercial feed shall be deemed to be adulterated:

- (a) (1) If it bears or contains any poisonous or deleterious substance which may render it injurious to health; but in case the substance is not an added substance, such commercial feed shall not be considered adulterated under this subsection if the quantity of such substance in such commercial feed does not render it injurious to health; or
- (2) If it bears or contains any added poisonous, added deleterious, or added nonnutritive substance which is unsafe within the meaning of section 406 of the Federal Food, Drug, and Cosmetic Act (other than one which is (i) a pesticide chemical in or on a raw agricultural commodity; or (ii) a food additive); or
- (3) If it is, or it bears or contains any food additive which is unsafe within the meaning of section 409 of the Federal Food, Drug, and Cosmetic Act; or
- (4) If it is a raw agricultural commodity and it bears or contains a pesticid chemical which is unsafe within the meaning of section 408(a) of the Federal Food, Drug, and Cosmetic Act: Provided, that where a pesticide chemical has been used in or on a raw agricultural commodity in conformity with an exemption granted or a tolerance prescribed under section 408 of the Federal Food, Drug, and Cosmetic Act and such raw agricultural commodity has been subjected to processing such as canning, cooking, freezing, dehydrating, or milling, the residue of such pesticide chemical remaining in or on such processed feed shall not be deemed unsafe if such residue in or on the raw agricultural commodity has been removed to the extent possible in good manufacturing practice and the concentration of such residue in the processed feed is not greater than the tolerance prescribed for the raw agricultural commodity unless the feeding of such processed feed will result or is likely to result in a pesticide residue in the edible product of the animal, which is unsafe within the meaning of section 408(a) of the Federal Food, Drug, and Cosmetic Act.
- (5) If it is, or it bears or contains any color additive which is unsafe within the meaning of section 721 of the Federal Food, Drug and Cosmetic Act.
- (6) If it contains more than 20 parts per billion Aflatoxin B₁ except as provided in Section 2735(e).
- (b) The use or intended use in ruminant feed of any material that contains protein derived from prohibited mammalian tissues causes the feed to be adulterated and in violation of the Food and Agricultural Code. NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 15011 and 15041, Food and Agricultural Code.

HISTORY

- Repealer of subsections (b)–(d) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. New subsection (a)(6) filed 8-27-82 as an emergency; effective upon filing (Register 82, No. 35). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12-25-82.
- 3. Certificate of Compliance transmitted to OAL 11-30-82 and filed 12-27-82 (Register 83, No. 1).
- 4. Amendment of subsections (a)(5)–(6) filed 2–23–96 as an emergency; operative 2–23–96 (Register 96, No. 8). A Certificate of Compliance must be transmitted to OAL by 6–22–96 or emergency language will be repealed by operation of law on the following day.
- 5. Editorial correction of printing error in subsection (a)(6) (Register 96, No. 28). 6. Certificate of Compliance as to 2–23–96 order transmitted to OAL 6–3–96 and
- filed 7–12–96 (Register 96, No. 28).

 7. New subsection (b) and amendment of Note filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002. No.

1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2735. Supplemental Cottonseed Product Controls.

This section supplements the control of cottonseed products to ensure that these products meet the tolerance for aflatoxin B_1 , established in Section 2734(a)(6).

Page 244

- (a) Each lot, or truck, railcar, ship, barge, container, air transport, or any other means of transportation of cottonseed products originating outside of California, as a condition of entry into California, shall be accompanied by the following:
- (1) A completed form furnished by the secretary (Certificate of Movement of Cottonseed Products, Rev. 5–97), incorporated by reference, stating the origin and destination of the cottonseed products.
- (2) An analysis certificate reporting the results of sampling and laboratory testing for aflatoxin B_1 , showing compliance with the aflatoxin B_1 tolerances stated in Section 2734(a)(6), the name of the testing laboratory, and the testing laboratory report number representing the lot of cottonseed products identified on the certificate.
- (3) A label with guaranteed analyses that complies with Section 2694 and Section 2783.
- (b) Shipment of cottonseed products, which do not meet the tolerance for aflatoxin B_1 established in Section 2734(a)(6), shall be refused entry into California, except for entry for transportation to a site operating under authority of the secretary for aflatoxin detoxification or oil extraction, with the exception of products intended for export or non–feed usage, or exempted by subsection (e) of this section.
- (c) Documentation for all shipments, originating outside of California, by railcar, truck, ship, barge, container, or air transportation, with the exception of products intended for export or non-feed usage, shall be mailed to the Department on or before the shipment date and documents shall be affixed to, or accompany the lot to the purchaser. All truck shipments shall submit to inspection at California border stations and a copy of all required documentation shall accompany the lot to the purchaser. Failure to obtain such document inspection, or diversion after document inspection, shall be grounds for seizure and quarantine of the shipment.
- (d) Cottonseed products originating in Riverside and Imperial counties of California shall move only to a detoxification or oil extraction site approved by the secretary, unless the products are certified by laboratory testing showing that the product is within the tolerance for aflatoxin B_1 established in Section 2734(a)(6). Such laboratory certifications shall be affixed to, or accompany the lot to the purchaser.
- (e) Cottonseed meal exceeding the 20 ppb tolerance for aflatoxin B_1 but below the federal action level for aflatoxin B_1 of 300 ppb. may be fed to beef cattle in Imperial County under the following conditions:
- (1) Shipments into Imperial County shall be made by sealed trailer or sealed railcar.
- (2) All cottonseed meal entering Imperial County that exceeds the 20 ppb tolerance for aflatoxin B_1 but below the federal action level for aflatoxin B_1 of 300 ppb shall be accompanied by an analysis certificate showing the results of laboratory sampling and testing, as required by Section 2735(a).
- (3) All Imperial County beef cattle feedlots receiving shipments of cottonseed meal, meeting the requirements of Section 2735(e), shall sign the Certificate of Movement on Cottonseed Products and return it, as required by Section 2735(b), to the Department of Food and Agriculture, Division of Inspection Services, 1220 N Street, Sacramento, California, 95814.
- (4) Once delivered to a beef cattle feedlot in Imperial County, cottonseed meal exceeding the 20 ppb tolerance for aflatoxin B_1 but below federal action level for aflatoxin B_1 of 300 ppb shall not be removed from the feedlot premises except for testing purposes.
- (5) It is a violation of Sections 15071, 15071.5 and 15072, Food and Agricultural Code, for any person to distribute, sell or transport or otherwise remove cottonseed meal exceeding the 20 ppb tolerance for aflatoxin B_1 but below the federal action level for aflatoxin B_1 of 300 ppb from a beef cattle feedlot in Imperial County.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 15041, 15071, 15071.5, 15072 and 15073, Food and Agricultural Code.

HISTORY

 New section filed 11-3-82 as an emergency; effective upon filing (Register 82, No. 45). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3-3-83.

- 2. Certificate of Compliance, including editorial corrections, transmitted to OAL 2–10–83 and filed 3–10–83 (Register 83, No. 11).
- 3. Amendment of subsection (a), new subsections (b) and (d) and subsection relettering filed 11–16–93; operative 11–16–93 pursuant to Government Code section 11346.2(d) (Register 93, No. 47).
- Amendment of subsection (a) and new subsections (e)–(e)(5) and amendment of NOTE filed 2–23–96 as an emergency; operative 2–23–96 (Register 96, No. 8). A Certificate of Compliance must be transmitted to OAL by 6–22–96 or emergency language will be repealed by operation of law on the following day.
- 5. Editorial correction of printing error in subsection (a) (Register 96, No. 28).
- 6. Certificate of Compliance as to 2–23–96 order including amendment of subsections (e), (e)(2), (e)(4) and (e)(5) transmitted to OAL 6–3–96 and filed 7–12–96 (Register 96, No. 28).
- 7. Editorial correction of subsection (a) (Register 2004, No. 17).
- 8. Amendment filed 4–20–2004; operative 4–20–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 17).

Article 10. Removal from Sale

§ 2746. Removal from Sale.

(a) The results of analysis determining whether the seized commercial feed is in violation of law shall be made known to the person having control of the feed within 5 working days.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 15076, Food and Agricultural Code.

HISTORY

1. Repealer of subsections (a) and (b) and relettering of subsection (c) to subsection (a) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).

Article 11. Inspection Tax and Plant Licenses

§ 2750. Tax Payment.

- (a) Each person holding a commercial feed license shall pay the inspection tonnage tax as required in section 15062 of the Food and Agricultural Code.
- (b) Reports of taxable sales shall be made quarterly to the director not later than one calendar month after March 31, June 30, September 30, and December 31 on a form furnished by the director. Quarterly reports and payments become delinquent on May 1, August 1, November 1, and February 1, for the respective preceding quarter.
- (c) Sales of commercial feed amounting to a tonnage tax of zero dollars (0) or up to five hundred dollars (\$500) may be submitted as an estimate for the entire year on the first quarter tonnage tax payment. A fourth quarter report shall be required if there are any adjustments for the calendar year's tonnage tax payment.
- (d) A completed tax report must be filed for each quarter whether or not taxable sales have been made in that period, except as provided in Section 2750(c).
- (e) Each licensee shall keep accurate records of sales of commercial feed which shall be available for examination by the director and shall include the date of sale, to whom sold, the name and net weight of the product sold. The records shall be maintained to support the reports for the previous 3 years.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 15061 and 15062, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (b), repealer of subsection (c), and relettering of subsections (d) and (e) to subsections (c) and (d) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 3. New subsection (c), subsection relettering, and amendment of newly designated subsection (d) filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

§ 2751. Licensing.

- (a) Exemptions from license requirements provided in Section 15051 of the Food and Agricultural Code shall apply only to retail stores selling bagged or packaged commercial feed labeled by a licensed feed manufacturer.
- (b) Beginning July 1, 2008, the annual commercial feed licensure fee shall be three hundred dollars (\$300.00) for each location.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 15051 and 15053, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 2. Amendment of subsection (a) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- Amendment of section heading, repealer of subsection (a) and subsection relettering filed 7–17–97; operative 8–16–97 (Register 97, No. 29).
- New subsection (b) and amendment of Note filed 6-17-2008; operative 7-1-2008 pursuant to Government Code section 11343.4 (Register 2008, No. 25).

Article 12. Damaged Feed

§ 2760. Damaged Feed.

- (a) Damaged feed shall be deemed adulterated and unlawful for sale except under permit of the director. Feed shall be deemed damaged when it or any ingredient has been affected by smoke, heat, water, mold, or contamination by any foreign substance to such an extent as to affect the nutritive value, therapeutic value, palatability, or wholesomeness of the feed
- (b) Any person in possession of damaged feed shall notify the director as soon as practicable after the event causing the damage and shall withhold use of the damaged feed until approved by the director. Within 5 working days of receipt of notification, except in emergency conditions, the director will make such inquiry and tests as he deems necessary, or may require the person in possession to demonstrate the extent of damage by sampling, testing, and other procedures as the director deems necessary.
- (c) If the director determines that the damaged feed is suitable for use as commercial feed without restriction, he shall so notify the person in possession. Such feed shall not be deemed adulterated.
- (d) If the director finds that he damaged feed should be permitted to be used only upon certain conditions, including reconditioning and special labeling, he may issue a permit to the person in possession for such use, requiring such conditions to be met, and may require protective controls and reports as he deems necessary.
- (e) If the director determines that the feed is damaged to such an extent as to be unsuitable for use as commercial feed, he shall require the person in possession to destroy the feed or dispose of it in such a manner that it cannot be used as feed and may require controls and reports as he deems necessary.
- (f) The director will require that all damaged feed containing drugs be disposed of as provided in subsection (e) and it is unlawful to sell or use such damaged feed.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 15041, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

Article 13. Violations

§ 2765. Violations.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 15072, Food and Agricultural Code.

HISTORY

1. Repealer filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).

§ 2766. Medicated Feed.

It is unlawful to use any medicated feed except in compliance with all directions on the tag or label.

NOTE: Authority cited: Sections 407, and 14902, Food and Agricultural Code. Reference: Section 15073, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 2. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

Article 14. Definitions and Standards

§ 2770. Feed Ingredients.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14902 and 15011, Food and Agricultural Code.

HISTORY

1. Repealer filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).

§ 2773. General Provisions for Processed Alfalfa Products.

- (a) Chopped alfalfa, alfalfa meal, dehydrated alfalfa, alfalfa leaf meal, alfalfa stem meal, alfalfa straw meal, alfalfa pellets, alfalfa wafers, alfalfa cubes, and other forms of processed alfalfa shall be prepared only from the processing of entire alfalfa hay without the addition of foreign materials, except as specifically permitted herein, and shall not contain more than 10 percent of other crops and weeds.
- (b) Alfalfa products may contain state or federally approved antioxidants and in addition may contain not more than 2 percent of added animal or vegetable fat to control dustiness without stating same as part of the name of the product; provided, however, the label shall state the presence of such antioxidant and added animal or vegetable fat.
- (c) The label may include a guarantee of the beta carotene content of alfalfa products, expressed in milligrams per pound, and such guarantee may be accompanied by an expiration date. No reference shall be made to the quantity of vitamin A equivalent which may be derived by the animal.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2773.1. Alfalfa Products.

- (a) The name of an alfalfa product may include the word "dehydrated" only when the product is prepared entirely from freshly cut alfalfa having a moisture content of not less than 70.0 percent before being artificially dried at a temperature of not less than 212 degrees Fahrenheit for a period of not more than 45 minutes. Dehydrated alfalfa products shall contain not less than 15.0 percent crude protein and not more than 28.0 percent crude fiber. If the product does not meet the above standards it shall be called a dehydrated forage product.
- (b) Chopped Alfalfa is the entire alfalfa hay, chopped but not ground finely enough to become a meal, without the addition of any alfalfa stems, alfalfa straw, or other foreign material, or removal of the leaves and containing not less than 15.0 percent protein and not more than 30.0 percent crude fiber.
- (c) Alfalfa Meal is obtained from the grinding of the entire alfalfa hay, without the addition of any alfalfa stems, alfalfa straw, or foreign material, or the removal of the leaves and containing not less than 15.0 percent protein and not more than 30.0 percent crude fiber.
- (d) Alfalfa Leaf Meal is the ground product consisting chiefly of leafy materials separated from alfalfa hay containing not more than 18.0 percent crude fiber.
- (e) Forage Meal is a mixture of alfalfa hay with alfalfa straw or other hays, straws or legumes and contains not less than 8.0 percent protein and not more than 38.0 percent fiber.
- (f) Alfalfa Stem Meal is the ground product remaining after the separation of the leafy material from alfalfa hay or meal. When used in a mixture, the maximum percent of stem meal shall be stated in the list of ingredients.
- (g) Alfalfa pellets, cubes, wafers, and other extruded forms of alfalfa are obtained from processing the entire alfalfa, without the addition of any alfalfa stems, alfalfa straw or foreign material and shall contain not less than 15.0 percent crude protein and not more than 30.0 percent crude fiber.
- (h) Alfalfa Nutrient Concentrate is the product obtained from the extracted juice of freshly cut alfalfa, by coagulation, separation from the alfalfa solubles and subsequent dehydration. The product should express both protein and Xanthophyll guarantees.

Page 246 Register 2008, No. 25; 6-20-2008

- (i) Concentrated Alfalfa Solubles is the product obtained by the concentration of the liquid remaining after the separation of Alfalfa Nutrient Concentrate from the juice of freshly cut alfalfa. The moisture level should not exceed 50.0 percent.
- (j) If the alfalfa products defined in this section do not comply with the standards indicated in every respect, the term "forage" must be substituted for the word "alfalfa" in the name of the product.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- Amendment of subsection (h) filed 11-4-76; effective thirtieth day thereafter (Register 76, No. 45).
- 2. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 3. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2773.5. Almond Hull Products.

- (a) Almond hulls are obtained by drying that portion of the almond fruit which surrounds the nut. They shall not contain more than 13.0 percent moisture, nor more than 15.0 percent crude fiber, and not more than 9.0 percent ash. If they contain more than 15.0 percent but less than 29.0 percent crude fiber, they shall be labeled "Almond Hull and Shell," and the maximum percent of crude fiber shall be stated. If the crude fiber exceeds 29.0 percent, the product shall be labeled "Almond Shell." If the ash exceeds 9.0 percent, the term "and dirt" shall be included in the product name. Almond hull products shall be free of foreign material, including plastic, glass, and metal except in such trace amounts as unavoidably occur in good manufacturing practices.
- (b) When the following almond hull products are used in a mixed feed, the maximum percent shall be stated.
 - (1) Almond hull and shell.
 - (2) Almond shell.
 - (3) Almond products containing more than 9.0 percent ash.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

History

- 1. Amendment filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 2. Editorial correction of Note filed 8-17-82 (Register 82, No. 34).
- 3. Amendment of subsections (a) and (b)(3) filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2774. Animal Products.

- (a) General Provision: The following general provisions apply to animal products: (1) If an approved antioxidant is added to animal products, it need not be shown in the brand name. However, the name of the antioxidant shall be clearly shown on the label. Digestibility tests referred to in this section shall use the A.O.A.C. method. (2) Animals other than livestock shall be excluded from all animal products except dry rendered tankage. (3) All animal products must be pathogen free and produced by a commercial renderer operating in conformance with the standards of section 1180.26 of this Title 3. Any animal protein product sold as pure porcine shall be so labeled, pursuant to Title 21 CFR 589.2000, April 1, 2001.
- (b) Meat Meal is the dry rendered product from mammal tissues, exclusive of any added blood, hair, hoof, horn, hide trimmings, manure, stomach and rumen contents, except in such amounts as may occur unavoidably in good manufacturing practices. It shall not contain added extraneous materials not provided for by this definition. The Calcium (Ca) level shall not exceed the actual level of Phosphorus (P) by more than 2.2 times. It shall not contain more than 12.0 percent Pepsin indigestible residue and not more than 9.0 percent of the crude protein in the product shall be pepsin indigestible. The label shall include guarantees for minimum crude protein, minimum crude fat, maximum crude fiber, minimum Phosphorus (P) and minimum and maximum Calcium (Ca).
- (c) Meat and Bone Meal is the dry rendered product from mammal tissues, including bone, exclusive of any added blood, hair, hoof, horn, hide trimmings, manure, stomach and rumen contents, except in such

- amounts as may occur unavoidably in good manufacturing processing practices. It shall not contain added extraneous materials not provided for in this definition. It shall contain a minimum of 4.0 percent phosphorus (P) and the calcium (Ca) level shall not be more than 2.2 times the actual Phosphorus (P) level. It shall not contain more than 12.0 percent pepsin indigestible residue and not more than 9.0 percent of the crude protein in the product shall be pepsin indigestible. The label shall include guarantees for minimum crude protein, minimum crude fat, maximum crude fiber, minimum Phosphorus (P) and minimum and maximum Calcium (Ca).
- (d) Blood Meal is produced from clean, fresh animal blood, exclusive of all extraneous materials such as hair, stomach belchings and urine, except as might occur unavoidably in good processing practices. The process used must be listed as a part of the product name such as conventional cooker dried, steamed or hydrolyzed.
- (e) Poultry By-Product Meal consists of the ground, rendered, clean parts of the carcass of slaughtered poultry, such as necks, feet, undeveloped eggs, and intestines, exclusive of feathers, except in such amounts as might occur unavoidably in good processing practices. The label shall include guarantees for minimum crude protein, minimum crude fat, maximum crude fiber, minimum phosphorus (P), and minimum and maximum calcium (Ca). The Calcium (Ca) level shall not exceed the actual level of phosphorus (P) by more than 2.2 times.
- (f) Poultry Hatchery By-Product is a mixture of egg shells, infertile and unhatched eggs, and culled chicks which have been cooked, dried, and ground, with or without removal of part of the fat.
- (g) Hydrolyzed Poultry Feathers is the product resulting from the treatment under pressure of clean, undecomposed feathers from slaughtered poultry, free of additives and accelerators. Not less than 75.0 percent of its crude protein content shall be digestible by the pepsin digestibility method.
- (h) Dry Rendered Tankage is a dry rendered product consisting of undecomposed whole animals, including hair, hoof, horn, hide, feathers, and viscera, with no additional hair, hoof, horn, hide, feathers, or viscera added.
- (i) Dried Meat Solubles is obtained by drying the defatted water extract of the clean, wholesome parts of slaughtered animals prepared by steaming or hot water extraction. It shall be designated according to its crude protein content which shall be no less than 70.0 percent.
- (j) Fleshings Hydrolysate is obtained by acid hydrolysis of the flesh from fresh or salted hides. It is defatted, strained, and neutralized. If evaporated to 50.0 percent solids, it shall be designated "Condensed Fleshings Hydrolysate". It shall have a minimum crude protein and maximum salt guarantee.
- (k) Animal By-Product Meal is the rendered product from animal tissues, exclusive of any added hair, hoof, horn, hide trimmings, manure, stomach and rumen contents, except in such amounts as may occur unavoidably in good processing practices. It shall not contain added extraneous materials not provided for by this definition. This ingredient definition is intended to cover those individual rendered animal tissue products that cannot meet the criteria as set forth elsewhere in this section. This ingredient is not intended to be used to label a mixture of animal tissue products.
- (1) Hydrolyzed Hair is a product prepared from clean, undecomposed hair, by heat and pressure to produce a product suitable for animal feeding. Not less than 80.0 percent of its crude protein shall be digestible by the pepsin digestibility method.
- (m) Hydrolyzed Leather Meal is produced from leather scrap that is treated with steam for not less than 33 minutes at a pressure not less than 125 pounds per square inch and further processed to contain not more than 10.0 percent moisture, not less than 60.0 percent crude protein, not more than 6.0 percent crude fiber, not more than 2.75 percent chromium, and with not less than 80.0 percent of its crude protein digestible by the pepsin digestibility method. Hydrolyzed leather meal may be utilized in livestock feeds as provided in food additive regulation, Title 21 of the Code of Federal Regulations, CFR Part 573.540, April 1, 2001.

- (n) Sprayed Dried Animal Blood is produced from clean, fresh animal blood, exclusive of all extraneous material such as hair, stomach belching, urine, except in such traces as might occur unavoidably in good factory practice. Moisture is removed from the blood by a low temperature evaporator under vacuum until it contains approximately 30.0 percent solids. It is then dried by spraying into a draft of warm, dry air which reduces the blood to finely divided particles with a maximum moisture of 8.0 percent and a minimum crude protein of 85.0 percent. It shall be designated according to its minimum water solubility.
- (o) Egg Shell Meal is a mixture of egg shells, shell membranes and egg content obtained by drying the residue from an egg breaking plant in a dehydrator to an end product temperature of 180° Fahrenheit. It shall be designated according to its crude protein and calcium content.
- (p) Egg Product is product obtained from egg graders, egg breakers and/or hatchery operations that is dehydrated, handled as liquid, or frozen. This product shall be free of shells or other non-egg materials except in such amounts which might occur unavoidably in good processing practices, and contain a maximum ash content of 6.0 percent on a dry matter basis.
- (q) Poultry Meal is the dry rendered product from a combination of clean flesh and skin with or without accompanying bone, derived from the parts of whole carcasses of poultry or a combination thereof, exclusive of feathers, heads, feet, and entrails. It shall be suitable for use in animal food. If it bears a name descriptive of its kind, it shall correspond thereto.
- (r) Blood Meal, Flash Dried is produced from clean, fresh animal blood, exclusive of all extraneous material such as hair, stomach belchings and urine except as might occur unavoidably in good manufacturing processes. A large portion of the moisture (water) is usually removed by a mechanical dewatering process or by condensing by cooking to a semisolid state. The semi-solid blood mass is then transferred to a rapid drying facility where the more tightly bound water is rapidly removed. The minimum biological activity of lysine shall be 80.0 percent.
- (s) Glandular Meal and Extracted Glandular Meal is obtained by drying liver and other glandular tissues from slaughtered mammals. When a significant portion of the water soluble material has been removed, it may be called Extracted Glandular Meal.
- (t) Animal Plasma is the product obtained by spray drying plasma which has been separated away from the cellular matter (red and white blood cells) of fresh whole blood by chemical and mechanical processing. The protein portion of this product is primarily albumin, globulin, and fibrinogen type proteins. The minimum percent crude protein and the maximum percent ash shall be guaranteed on the label.
- (u) Ensiled Paunch Product is a product composed of the contents of rumen of slaughtered cattle. The moisture level is reduced to 50.0–68.0 percent. The product is then packed into an airtight environment, such as a silo, where it undergoes an acid fermentation that retards spoilage. The ensiled product will have a pH of 4.0 or less.
- (v) Leather Hydrolyzate is obtained from leather trimmings that are pressure cooked with the addition of steam and sodium hydroxide. Chromium is precipitated and separated so that not over 30 ppm (Solids Basis) remain in the hydrolyzate. This product can be used as a liquid ingredient or as a powder. In either event, the analysis on "as a solids basis" will not be less than 75.0 percent crude protein and not less than 85.0 percent of the protein shall be pepsin digestible.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992, 15011 and 15041, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) and new subsection (h) filed 6-25-74; effective thirtieth day thereafter (Register 74, No. 26).
- 2. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 3. Amendment of section and NoTE filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2774.5. Processed Animal Waste Products.

It is unlawful to sell or use commercial feed containing animal waste products in violation of this section.

- (a) Licensing and Processing Requirements.
- (1) Commercial feed licensees shall apply to the director for endorsement to the license authorizing the processing, manufacturing, and selling of processed animal waste products. It is unlawful to process, manufacture or sell processed animal waste products without being licensed with a commercial feed license so endorsed.
- (2) The applicant shall submit to the director a description of the facilities and equipment to be used in the processing and manufacturing of animal waste products, and protocol to be followed during operation. If the director is satisfied that the facilities, equipment and protocol are adequate to fulfill the requirements for the product, he shall issue the endorsement, subject, however, to the condition that it may be summarily suspended whenever the director has reason to believe that the approved procedures are not being complied with or that the product may contain pathogenic organisms.
- (3) Each process approved by the director shall result in pathogen free products at all times, and be substantiated by process controls. The director may require the use of recording devices and thermometers, and a periodic schedule of sampling and laboratory examinations, and such other records he deems necessary.
 - (b) General Provisions.
- (1) Processed animal waste is a processed product composed of total excreta, with or without litter, from poultry or ruminant animals. It shall not contain levels of drug residue, pesticide residue, or other toxic or deleterious substances that could be harmful to animals or result in harmful or unlawful residue levels in their tissues or by–products.
- (2) Commercial feeds containing dried animal waste products shall not exceed 12 percent moisture.
 - (3) It shall not be used in feed for lactating dairy animals.
- (4) When used in a mixed feed, the maximum percentage shall be stated.
- (5) Animal waste products wherever sold, held for sale or offered for sale shall conform with the requirements of this section. Such products which are produced and utilized on the premises and are used entirely for feeding on the premises by the person whose animals produced the products, shall conform generally to the provisions of this section provided, however, the secretary may grant a non–fee restricted license and endorsement to such users.
- (6) Any processed animal waste product which does not meet the standards for the product shall be immediately destroyed or subjected to further processing until the standards are met. Any noncomplying products may be condemned and disposed of in a manner prescribed by the secretary at the expense of the licensee or person in possession.
- (c) Dried Poultry Waste is processed undiluted poultry excreta collected from cage layer flocks. The product must be uniform and contain not less than 25.0 percent crude protein, not more than 15.0 percent crude fiber and not more than 35.0 percent ash. It shall be labeled to show the maximum moisture, minimum crude protein, maximum equivalent crude protein from non–protein nitrogen, minimum fat, maximum fiber, maximum ash, the maximum and minimum calcium (Ca) and the minimum percent of phosphorus (P). The product shall not contain more than 1.0 percent feathers. Dried poultry waste products not meeting the protein guarantee shall be labeled "dried poultry litter," but said product shall meet all other requirements generally applicable to poultry waste.
- (d) Dried Poultry Litter is the processed combination of total poultry excreta and litter that occurs in the floor production of poultry. The product shall be uniform and contain not less than 18.0 percent protein. The type of litter shall be a part of the product name. It shall be labeled to show minimum crude protein, maximum equivalent crude protein from non-protein nitrogen, minimum crude fat, maximum crude fiber, lignin and ash, the maximum and minimum calcium (Ca), minimum phosphorus (P), and maximum copper (Cu).
- (e) Dried Ruminant Waste is processed bovine excreta free of extraneous material such as straws, wood shavings, dirt and similar materials. The product must be uniform and contain not less than 12.0 percent crude protein and not more than 30.0 percent crude fiber and 20.0 percent ash.

It must be labeled to show minimum protein, maximum equivalent crude protein from nonprotein nitrogen, minimum crude fat, maximum crude fiber, lignin, ash and maximum sodium (Na).

(f) Processed Animal Waste products in excess of 12.0 percent moisture including slurries, silages, and other semidry products must conform to the licensing and processing requirements and general provisions except Section 2 of the general provisions. If sold for feeding purposes; these products shall be labeled to show type of process, maximum moisture, minimum crude protein, maximum equivalent crude protein from nonprotein nitrogen, minimum crude fat, maximum crude fiber, lignin and ash, and maximum sodium (Na).

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992, 15011, 15041 and 15051, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–25–74; effective thirtieth day thereafter (Register 74, No. 26).
- 2. Amendment of subsections (a), (b), (c) and (d) filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 3. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 4. Amendment of subsections (b)(2) and (b)(5)–(f) and amendment of Note filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2775. Apple Products.

- (a) Dried Apple Pomace is the sound, dried residue remaining after the removal of cider from apples.
- (b) Dried Apple Pectin Pulp is the sound, dried residue remaining after the removal of pectin from apple products.
- (c) Wet Apple Pomace is the sound, wet residue remaining after the removal of cider juice from apples.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- New subsection (c) filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2776. Barley Products.

- (a) Ground Barley or Rolled Barley is the product obtained by grinding or rolling barley of such quality that the resulting processed material contains not more than 7 percent crude fiber.
- (b) Ground Light Barley or Rolled Light Barley is the product obtained by grinding or rolling barley of such quality that the resulting processed material contains not more than 9 percent crude fiber.
- (c) Barley Mixed Feed is the entire offal from the milling of barley flour from clean barley, and is composed of barley hulls and barley middlings.
- (d) Barley Hulls is the product consisting of the outer coverings of the barley. When used in a mixture, the maximum percentage present shall be stated.
- (e) Barley Feed is the entire by-product resulting from the manufacture of pearl barley from clean barley.
 - (f) Hulled Barley is barley from which the hull has been removed.
- (g) Ground Hulled Barley, Rolled Hull Barley is the product obtained by grinding or rolling barley from which the hull has been removed. Note: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2777. Beet Products.

- (a) Dried Beet Pulp is the dried residue from sugar beets which have been cleaned and freed from leaves and sand, and from which the sugar has been extracted.
- (b) Wet Beet Pulp is the residue from sugar beets which have been cleaned and freed from leaves and sand, and from which the sugar has been extracted
- (c) Molasses Dried Beet Pulp is the dried material remaining after the sugar has been extracted from sugar beets to which molasses has been added.

(d) Molasses Dried Beet Pulp Product is the dried material remaining after the extraction of sugar to which molasses and beet molasses residue has been added.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2778. Brewers' and Distillers' Products.

- (a) Brewers Dried Grains is the dried extracted residue of barley malt alone or in mixture with other cereal grain or grain products resulting from the manufacture of wort and may contain pulverized dried spent hops in an amount not to exceed 3.0 percent, evenly distributed.
- (b) Brewers Wet Grains is the extracted residue resulting from the manufacture of wort from barley malt alone or in mixture with other cereal grains or grain products. The guaranteed analysis shall include the maximum moisture.
- (c) Malt Sprouts is the product removed from malted barley consisting primarily of sprouts which may include some of the malt hulls, other parts of malt and containing not less than 24 percent crude protein. The term malt sprouts when applied to a corresponding portion of other malted cereals shall be used in qualified form: i.e., "Rye Malt Sprouts," "Wheat Malt Sprouts," etc.
- (d) Malt Cleanings is the cleanings of malted barley or from the recleaning of malt which does not meet the minimum crude protein standard of malt sprouts. It shall be labeled according to its crude protein content.
 - (e) Malt Hulls consists of the hulls obtained in cleaning malted barley.
 - (f) Dried Spent Hops is the dried material filtered from hopped wort.
- (g) Molasses Distillers Dried Solubles is the dried residue from the yeast fermentation of molasses after the removal of the alcohol by distillation
- (h) Molasses Distillers Condensed Solubles is the condensed residue from the yeast fermentation of molasses after the removal of the alcohol by distillation.
- (i) Potato Distillers Dried Residue is the dried product obtained after the manufacture of alcohol and distilled liquors from potatoes or from a mixture in which potatoes predominate.
- (j) Distillers Dried Solubles is the dried thin stillage fraction after the removal of ethyl alcohol by distillation from the yeast fermentation of a grain or a grain mixture. The predominating grain shall be stated as the first word in the name.
- (k) Distillers Dried Grains is the dried grain or grain mixture after the removal of ethyl alcohol by distillation from the yeast fermentation by separating the resultant coarse grain fraction of the whole stillage. The predominating grain shall be stated as the first word in the name.
- (*l*) Distillers Dried Grains with Solubles is the product obtained after the removal of ethyl alcohol by distillation from the yeast fermentation of a grain or a grain mixture by condensing and drying at least 3/4 of the solids of the resultant whole stillage. The predominating grain shall be stated as the first word in the name.
- (m) Condensed Distillers Solubles is the condensed thin stillage fraction after the removal of ethyl alcohol by distillation from the yeast fermentation of a grain or a grain mixture. The predominating grain shall be stated as the first word in the name.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of Note filed 8-17-82 (Register 82, No. 34).
- 2. New subsection (b) and subsection relettering filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2781. Coconut Products.

(a) Coconut Meal or Copra Meal, mechanically extracted, is the ground residue which remains after removal of most of the oil from dried meat of coconuts by a mechanical extraction process.

(b) Coconut Meal or Copra Meal, Solvent Extracted, is the ground residue which remains after removal of most of the oil from dried meat of coconuts by a solvent extraction process.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2782. Corn Products.

- (a) Corn Bran is the outer coating of the corn kernel, with little or none of the starchy part or germ.
- (b) Corn Feed Meal is the fine siftings obtained in the manufacture of screened corn chop, screened ground corn, or screened cracked corn with or without its aspiration products added.
- (c) Ground Corn, Corn Meal, Cracked Corn, Corn Chop is the entire product made by grinding, cutting, or chopping the grains of sound Indian corn, and may be fine, medium, or coarse, and contains not more than 4.0 percent of foreign material.
- (d) Screened Corn Chop, Screened Ground Corn, or Screened Cracked Corn is the coarse portion of corn chop, ground corn, or cracked corn from which most of the fine particles have been removed, and contains not more than 4.0 percent of foreign material.
- (e) Corn Grits or Hominy Grits is the fine or medium sized, hard, flinty portions of sound Indian corn and contains 5.0 percent or less of the bran or germ
- (f) Ear Corn Chops is corn and cob chopped, without the husk, with no greater proportion of cob than occurs in the ear corn in its natural state.
- (g) Corn Gluten Meal is that part of commercial shelled corn that remains after the extraction of the larger part of the starch and germ, and the separation of the bran by the process employed in the wet milling manufacture of corn starch or syrup. It may contain corn solubles and corn oil meal.
- (h) Corn Gluten Feed is that part of the commercial shelled corn that remains after the extraction of the larger portion of the starch, gluten, and germ by the processes employed in the wet milling manufacture of corn starch or syrup. It may or may not contain fermented corn extractives or corn germ meal.
- (i) Hominy Feed is a mixture of corn bran, corn germ, and a part of the starchy portion of either white or yellow corn kernels or mixture thereof as produced in the manufacture of pearl hominy, hominy grits, or table meal and contains not less than 4.0 percent crude fat. If prefixed with the words "white" or "yellow," the product must correspond thereto.
- (j) Corn Germ Meal (Wet Milled) is ground corn germ from which most of the solubles have been removed by steeping and most of the oil removed by hydraulic, expeller, or solvent extraction processes, and is obtained in the wet milling process of manufacture of corn starch, corn syrup, or other corn products.
- (k) Corn Germ Meal (Dry Milled) is ground corn germ which consists of corn germ with other parts of the corn kernel from which part of the oil has been removed and is the product obtained in the dry milling process of manufacture of corn meal, corn grits, hominy feed, and other corn products.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 2. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2783. Cottonseed Products.

- (a) Cottonseed Meal, Mechanically Extracted, is the product obtained by finely grinding the cake which remains after removal of most of the oil from cottonseed by a mechanical extraction process. It shall contain not less than 36.0 percent crude protein.
- (b) Cottonseed Meal, Solvent Extracted, is the product obtained by finely grinding the flakes which remain after removal of most of the oil from cottonseed by a solvent extraction process. It shall contain not less than 36.0 percent crude protein.
- (c) Cottonseed Cake, Mechanically Extracted, is the unground product composed of the kernel and such portions of the lint, hull, and oil as re-

- main after removal of most of the oil from cotton seed by a mechanical process. It shall contain not less than 36.0 percent crude protein.
- (d) Cottonseed Flakes, Mechanically Extracted, is the unground product, composed of the kernel and such portions of the lint, hull, and oil as remain after removal of the oil from cottonseed by a mechanical extraction process. It shall contain not less than 36.0 percent crude protein.
- (e) Cottonseed Flakes, Solvent Extracted, is the unground product, composed of the kernel and such portions of the lint, hull, and oil as remain after removal of the oil from cottonseed by a solvent extraction process. It shall contain not less than 36.0 percent crude protein.
- (f) Whole–Pressed Cottonseed, Mechanically Extracted, is composed of sound, mature, clean, delinted, and unhulled cottonseed, from which most of the oil has been removed by mechanical pressure. It shall be designated and sold by its crude protein content. If ground, it must be so designated.
- (g) Low Gossypol Cottonseed Meal, Mechanically Extracted, is a meal in which the gossypol is not more than 0.04 percent free gossypol.
- (h) Low Gossypol Cottonseed Meal, Solvent Extracted, is a meal in which the gossyol is not more than 0.04 percent free gossypol.
- (i) Cottonseed Hulls is the outer covering of the cottonseed. When used in a mixture, the maximum percent present shall be stated.
- (j) Whole cottonseed is seed remaining after removal of fiber in the ginning process. It shall contain not more than 15.0 percent free fatty acids in the oil. It shall contain not more than 13.0 percent moisture and not more than 2.0 percent foreign material. It shall be labeled to include the maximum percent ash.
- (k) Prime whole cottonseed is seed remaining after the removal of fiber in the ginning process. It shall contain not more than 3.0 percent free fatty acids in the oil. It shall contain not more than 13.0 percent moisture and not more than 2.0 percent foreign material. It shall be labeled to include the maximum percent ash.
- (1) Cracked or ground pima is pima cottonseed that has been processed but from which the oil has not been extracted. It shall be labeled to include the maximum percent ash.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (j) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).
- 3. Amendment of subsection (j), new subsection (k) and subsection relettering filed 4–20–2004; operative 4–20–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 17).

§ 2783.5. Fats and Oils.

- (a) General Provisions: Any mixture of two or more fats or fat derivatives defined below shall be identified by listing each component, for example, "animal fat and hydrolyzed vegetable oil." Any antioxidant used shall be named and followed by the word "preservative." All fats and oils used in commercial feed shall be pathogen free and safe for use as animal feed. The percentage of fatty matter is the total percentage of moisture, insoluble matter and unsaponifiable matter subtracted from 100. The use of sewer plant fats and oils is prohibited.
- (b) Animal Fat is obtained from the tissues of mammals and/or poultry in the commercial processes of rendering or extracting. It consists predominantly of glyceride esters of fatty acids and contains no additions of free fatty acids or other materials obtained from fats. It must contain, and be guaranteed for, not less than 90 percent total fatty acids, not more than 2.0 percent unsaponifiable matter, and not more than 1.0 percent insoluble impurities. Maximum free fatty acids and moisture must also be guaranteed. If the product bears a name descriptive of its kind or origin; i.e., "beef", "pork", "poultry", it must correspond thereto. If an antioxidant is used, the common name or names shall be indicated, followed by the words "used as a preservative".
- (c) Fat Product, Feed Grade is any fat product which does not meet the definitions for animal fat, vegetable fat or oil, hydrolyzed fat or fat ester. It shall be sold on its individual specifications which will include the

Page 250 Register 2004, No. 17; 4-23-2004

minimum percentage of total fatty acids, the maximum percentage of unsaponifiable matter, the maximum percentage of insoluble impurities, the maximum percentage of free fatty acids and moisture. The above listed specifications shall be guaranteed on the label. If an antioxidant(s) is used, the common name or names shall be indicated, followed by the words "used as a preservative".

- (d) Vegetable Fat or Oil is the product of vegetable origin obtained by extracting the oil from seeds or fruits which are commonly processed for edible purposes. It consists predominantly of glyceride esters of fatty acids, and contains no additions of free fatty acids, or other materials obtained from fats. It shall contain and be guaranteed for not less than 90 percent total fatty acids, not more than 2.0 percent unsaponifiable matter and not more than 1.0 percent insoluble impurities. Maximum percent free fatty acids, and moisture shall also be guaranteed. If the product bears a name descriptive of its kind or origin, i.e., "soybean oil", "cottonseed oil", it shall correspond thereto. If an antioxidant(s) is used, the common name or names shall be indicated, followed by the words "used as a preservative".
- (e) Hydrolyzed Fat or Oil (feed grade) is a product obtained by the fat processing procedures commonly used in edible fat processing or soap making. It consists predominantly of fatty acids, and shall contain, and be guaranteed for, not less than 85.0 percent total fatty acids, not more than 6.0 percent unsaponifiable matter, and not more than one (1) percent insoluble impurities. Maximum moisture must also be guaranteed. Its source shall be stated in the product name, i.e., "hydrolyzed animal fat," "hydrolyzed vegetable," "hydrolyzed animal and vegetable fat." If an antioxidant(s) is used, the common name or names must be indicated, followed by the words "used as a preservative".
- (f) Ester (feed grade) is the product consisting of methyl, ethyl or other nonglyceride ester of fatty acids derived from animal and/or vegetable fats. It consists predominantly of the ester and shall contain not less than 85.0 percent total fatty acids, not more than 10.0 percent free fatty acids, not more than 6.0 percent unsaponifiable matter, (2.0 percent for methyl esters), and not more than 1.0 percent insoluble matter. Its source shall be stated in the product name, i.e., "methyl ester of animal fatty acids," "ethyl ester of vegetable oil fatty acids." Methyl esters shall contain not more that 150.0 parts per million (0.015 percent) free methyl alcohol. If an antioxidant(s) is used, the common name or names must be indicated, followed by the word "preservative(s)".
- (g) Corn Endosperm Oil is obtained by the extraction of oil from corn gluten. It consists predominantly of free fatty acids and glyceride, and shall contain not less than 85.0 percent total fatty acids, not more than 14.0 percent unsaponifiable matter, and not more than 1.0 percent insoluble matter. if an antioxidant(s) is used, the common name or names shall be indicated followed by the word "preservatives".
- (h) Corn Syrup Refinery Insolubles, Feed Grade is obtained in the refining of a corn syrup. It consists predominantly of the fatty fraction of corn starch together with protein and residual carbohydrate. It may contain water and not more than 7.0 percent ash nor less than 50.0 percent fat on a water–free basis.
- (i) Calcium Salts of Long-Chain Fatty Acids are the reaction products between calcium and long-chain fatty acids of vegetable and/or animal origin. They shall contain a maximum of 20.0 percent lipid not bound in the calcium salt form and percent total fat shall be indicated. The unsaponifiable matter (exclusive of calcium salts) shall not exceed 4.0 percent and moisture shall not exceed 5.0 percent. If an antioxidant(s) is used, its common name(s) must be indicated on the label. Prior to conducting an assay for total fats, hydrolysis of the calcium salts should be performed to liberate the lipid fraction.
- (j) Hydrolyzed Sucrose Polyesters, Feed Grade is the product resulting from the acid hydrolysis of sucrose polyesters, such as olestra, to make them digestible. It shall consist predominately of fatty acids and contain, and be guaranteed for, not less than 85.0 percent total fatty acids, not more than 2.0 percent Sucrose Polyesters (hex ester and above), not more than 2.0 percent unsaponifiable matter, and not more than 2.0 percent insoluble impurities. Maximum moisture shall also be guaranteed. Its

source shall be stated in the product name, i.e., "Hydrolyzed animal sucrose polyesters", "Hydrolyzed vegetable sucrose polyesters", or "Hydrolyzed animal and vegetable sucrose polyesters". If an antioxidant(s) is used, the common name or names shall be indicated, followed by the words "used as a preservative".

(k) Vegetable Oil Refinery Lipid, Feed Grade, is obtained in the alkaline refining of a vegetable oil for edible use. It consists predominantly of the salts of fatty acids, glyceride, and phosphates. It may contain water and not more than 22.0 percent ash on a water—free basis. It may or may not be acidulated before using in commercial feeds, but if acidulated, it shall be neutralized.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–25–74; effective thirtieth day thereafter (Register 74, No. 26).
- 2. Amendment filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 3. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 4. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2785. Grape Products.

- (a) Grape Pomace is the residue after the juice has been expressed in the production of wine from grapes. It consists of skins and seeds. When used in a mixed feed the maximum percent present shall be stated.
- (b) Raisin Stem Meal is the ground or chopped product obtained in the grading and stemming of raisins. It consists of stems and may contain raisins. When used in mixed feeds the maximum percent present shall be stated.
- (c) Raisin Seed Meal consists of the ground seed obtained in the manufacture of seeded raisins with or without the extraction of part of the oil. When used in mixed feeds the maximum percent present shall be stated. NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2787. Flax Products.

- (a) Linseed Meal, Mechanically Extracted, is the product obtained by grinding the cake or chips which remain after removal of most of the oil from flaxseed by a mechanical extraction process and contains not more than 10 percent fiber.
- (b) Linseed Meal, Solvent Extracted, is the product obtained by grinding the flakes which remain after removal of most of the oil from flaxseed by a solvent extraction process and contains not more than 10 percent fiber.
- (c) Flaxseed Screenings Meal, Solvent Extracted, is the ground product obtained after solvent extraction of part of the oil from the smaller imperfect flaxseeds, weedseeds, other oilseeds and other foreign material having feeding value, separated in cleaning flaxseed.
- (d) Flax Plant Product is that portion of the flax plant having feeding value remaining after harvesting the seed and separation of the bast fibers and flax shives. It consists of the leaves, corticle tissues, flax seed bolls, broken and immature flax seeds, and contains a minimum of 9 percent crude protein and a maximum of 35 percent crude fiber.
- (e) Flax Straw By-Product is the ground product remaining after the removal of the longer fiber material from flax straw by mechanical processing and contains not less than 2 percent crude protein and not more than 70 percent crude fiber.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Amendment of section heading filed 7–2–82; effective thirtieth day thereafter (Register 82 No. 27).

§ 2788. Marine Products.

(a) Marine products containing more than 3.0 percent sodium must state the percentage. No marine product shall contain more than 7.0 percent sodium.

- (b) Fish Meal is clean, dried, ground tissues of undecomposed whole fish and/or fish cuttings with or without the extraction of part of the oil. It shall contain not more than 10.0 percent moisture. If it contains more than 3.0 percent sodium (Na), the amount of sodium shall constitute a part of the brand name, provided that in no case must the sodium content of this product exceed 7.0 percent.
- (c) Fish Residue Meal is the clean, dried, undecomposed residue from the manufacture of glue from non-oily fish. If it contains more than 3.0 percent sodium (Na), the amount of sodium shall constitute a part of the brand name, provided that in no case shall the sodium content of this product exceed 7.0 percent.
- (d) Fish Market Scrap Meal is the clean, dried, ground tissues and/or viscera of fish and other sea food from fish markets, with or without the extraction of part of the oil.
- (e) Crab Meal is undecomposed dried waste of the crab and contains the shell, viscera, and part or all of the flesh. It shall contain not less than 25.0 percent crude protein. If it contains more than 3.0 percent sodium (Na) the amount of sodium shall constitute a part of the brand name, provided that in no case shall the sodium content of this product exceed 7.0 percent.
- (f) Shrimp Meal is undecomposed dried waste of shrimp and contains the head, hull, and/or the whole shrimp. If it contains more than 3.0 percent sodium (Na), the amount of sodium shall constitute a part of the brand name, provided that in no case shall the sodium content of this product exceed 7.0 percent.
- (g) Anchovy Oil is the product obtained by extraction of part of the oil from the whole Pacific anchovy, or from cannery refuse of this species of fish.
- (h) Tuna Oil is the product obtained by extraction of part of the oil from the cannery refuse of tuna.
- (i) Condensed Fish Solubles are obtained by evaporating excess moisture from the stickwater, aqueous liquids, resulting from the wet rendering of fish into fish meal, with or without removal of part of the oil.
- (j) Fish Glandular and Liver Hydrolysate is the partially dehydrated, ground entire coelomic contents of the fish, digested by the enzymes naturally present in fish, The solids content of this product shall not be less than 40.0 percent.

HISTORY

- 1. Repealer of subsection (g) and relettering of subsections (h)–(p) to subsections (g)–(o) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Editorial correction of Note filed 8-17-82 (Register 82, No. 34).
- 3. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2789. Milk Products.

- (a) Dried Buttermilk contains 8.0 percent maximum moisture, 13.0 percent maximum ash, and 5.0 percent minimum milk fat using the Roese–Gottlieb method.
- (b) Condensed Buttermilk contains 27.0 percent minimum total solids, 0.055 percent minimum milk fat for each percent of total solids, and 0.14 percent maximum ash for each percent of total solids.
- (c) Dried Skimmed Milk is dried defatted milk containing 8.0 percent maximum moisture.
- (d) Condensed Skimmed Milk is evaporated defatted milk containing 27.0 percent minimum total solids.
- (e) Dried Cultured Skimmed Milk is dried lactic acid bacteria cultured defatted milk containing 8.0 percent maximum moisture.
- (f) Condensed Cultured Skimmed Milk is evaporated lactic acid bacteria cultured defatted milk containing 27.0 percent minimum total solids
- (g) Dried (Dry) Whey is the product obtained by removing water from whey. It contains not less than 11.0 percent protein nor less than 61.0 percent lactose.
- (h) Condensed Whey is evaporated whey. The minimum percent total whey solids shall be stated on the label.

- (i) Dried (Dry) Whey Solubles is the product obtained by drying the whey residue after the removal of whey protein, with or without partial removal of lactose. Minimum percent of crude protein and lactose and maximum percent ash shall be guaranteed on the label.
- (j) Condensed Whey Solubles is evaporated whey residue from the manufacture of lactose after removal of milk albumin and part of the lactose. It shall be labeled to show the minimum percent of total whey product solids, crude protein, fat, lactose and the maximum percent ash.
- (k) Dried Hydrolyzed Whey is dried lactose enzyme hydrolyzed whey containing 30.0 percent minimum total glucose and galactose.
- (1) Condensed Hydrolyzed Whey is evaporated lactose enzyme hydrolyzed whey containing 50.0 percent minimum total solids and 0.3 percent minimum total glucose and galactose for each percent total solids.
- (m) Condensed Whey-Product is the product obtained by partially removing water from whey from which a portion of the lactose, protein and/or minerals been removed. The minimum percent solids, crude protein and lactose and the maximum percent of ash shall be guaranteed on the label. It may also be labeled "condensed reduced minerals whey" or "condensed reduced lactose whey", if appropriate.
- (n) Dried (Dry) Whey-Product is the product obtained by drying whey from which a portion of the lactose, protein and/or minerals have been removed. The minimum percent solids, crude protein, and lactose and the maximum percent ash shall be guaranteed on the label. It may also be labeled "dried reduced minerals whey" or "dried reduced lactose whey", if appropriate.
- (o) Condensed Cultured Whey is evaporated cultured whey. The minimum percent total cultured whey solids shall be guaranteed on the label.
- (p) Whey is the product obtained as a fluid by separating the coagulum from milk, cream or skimmed milk and from which a portion of the milk fat may have been removed.
- (q) Casein is the solid acid or rennet coagulation from defatted milk and contains 80.0 percent minimum crude protein.
- (r) Cheese Rind is cooked cheese trimming devoid of fat other than milk fat.
- (s) Dried Lactalbumin is the dried coagulated protein residue from whey. It contains 80.0 percent minimum crude protein on a moisture-free basis
- (t) Dried Whole Milk is dried milk containing 8 percent maximum moisture and 26.0 percent minimum milk fat using the Roese–Gottlieb method.
- (u) Dried Milk Protein is dried coagulated protein residue resulting from the controlled co-precipitation of casein, lactalbumin, and minor milk proteins from defatted milk.
- (v) Dried Hydrolyzed Casein is the dried watersoluble product resulting from the enzymatic digestion of casein and contains 74.0 percent minimum crude protein.
- (w) Condensed Whey Permeate is the product resulting from the removal of proteins from whey permeate. It shall be labeled to show the minimum percent total whey product solids, crude protein and lactose and the maximum percent ash and equivalent crude protein from nonprotein nitrogen.
- (x) Condensed Delactosed Whey Permeate is the product resulting from the removal of lactose from whey permeate. It shall be labeled to show the minimum percent total whey product solids, lactose, crude protein and crude fat and the maximum percent ash and equivalent crude protein from nonprotein nitrogen.
- (y) Fermented Ammoniated Condensed Whey is the product produced by the Lactobacillus bulgaricus fermentation of whey with the addition of ammonia. It shall contain 35.0 percent to 55.0 percent crude protein and not more than 42.0 percent equivalent crude protein from nonprotein nitrogen. It shall be labeled to show the minimum percent total whey product solids, lactose, crude protein, and fat and the maximum percent ash and equivalent crude protein from nonprotein nitrogen.

The label of the additive and of any feed additive supplement, feed additive concentrate or feed additive premix prepared therefrom shall con-

tain the following information in addition to any other required information:

- (1) The name of the additive.
- (2) The maximum percentage of equivalent crude protein from nonprotein nitrogen.
 - (3) Directions for storage and use as stated below:

"Store in closed vented tank equipped for agitation. Agitate five (5) minutes before using. Do not store at temperatures above $110^{\circ}F$ ($43^{\circ}C$).

Mix with grain, roughage, or grain and roughage prior to feeding.

The maximum equivalent crude protein from fermented ammoniated condensed whey and equivalent crude protein from all other added forms of nonprotein nitrogen should not exceed 30.0 percent of the dietary crude protein" and a prominent statement: "WARNING"—"This feed shall be used only in accordance with the directions furnished on the label."

(z) Dairy Food By-Products are the products resulting from the collection of solids contained in the washwater from the normal processing and packaging of various food manufacturing plants. Dairy products are the primary source but non-dairy products may occasionally constitute a minor amount of the total volume. No sanitary sewer waste may be included. This product is to be fed at levels less than 25.0 percent of the animal's total dry matter intake.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (j) and new subsections (v), (w) and (x) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2790. Mineral Feeds.

- (a) Formula feeds containing more than 9.0 percent of Ash require, in addition to the usual label declaration of the chemical feed analysis, a declaration of each ingredient and the guarantees for the following, if present:
 - (1) maximum and minimum percentage of Calcium (Ca);
 - (2) minimum percentage of Phosphorus (P);
 - (3) maximum percentage of Sodium (Na);
- (4) guarantees for crude protein, crude fat and crude fiber are not required when the commercial feed is intended for purposes other than to furnish these substances. Mineral ingredients shall be stated as their official names.
- (b) Shell Marl is ground shells of oysters, clams, or other mollusks with impurities of sand and clay and containing less than 90.0 percent of calcium carbonate. It may bear a name descriptive of its kind. It shall be labeled to state plainly the minimum percentage of calcium carbonate (CaCO₃) and the equivalent amount of calcium (Ca).
- (c) Marl is a natural mixture of chalk, sand, and clay. It may bear a name descriptive of its kind. It shall be labeled to state plainly the minimum percentage of calcium carbonate (CaCO₃) and the equivalent amount of calcium (Ca).
- (d) Trace Mineralized Salty is common salt containing significant amounts of trace minerals which are recognized as essential for animal nutrition. Significant amounts defined are not less than 0.010 percent cobalt, 0.033 percent copper, 0.160 percent iron, 0.007 percent iodine, 0.200 percent manganese, and 0.005 percent zinc.
- (e) Bone Ash is the ash obtained by burning bones with free access to air, and containing a minimum of 15.3 percent phosphorus (P). The label must show a guarantee for calcium (Ca) and phosphorus (P).
- (f) Bone Charcoal is obtained by charring bones in a closed retort and contains a minimum of 14.0 percent phosphorus (P). It must be labeled with guarantees for calcium (Ca) and phosphorus (P). (This product is sometimes referred to as "Bone Black," however, bone charcoal shall be used in all labeling.)
- (g) Calcite is an acceptable source of calcium carbonate. It shall be true to name and contain not less than 33.0 percent calcium (Ca).

- (h) Oyster Shell Flour is an acceptable source of calcium carbonate. It shall be true to name and contain not less than 33.0 percent calcium (Ca)
- (i) Shell Flour is an acceptable source of calcium carbonate. It shall be true to name and contain not less than 33.0 percent calcium (Ca).
- (j) Chalk Rock is an acceptable source of calcium carbonate. It shall be true to name and contain not less than 33.0 percent calcium (Ca).
- (k) Calcium Carbonate, Precipitated, is an acceptable source of calcium carbonate. It shall be true to name and contain not less than 33.0 percent calcium (Ca).
- (*l*) Chalk, Precipitated, is an acceptable source of calcium carbonate. It shall be true to name and contain not less than 33.0 percent calcium (Ca). Precipitated chalk must be used in all labeling.
- (m) Limestone, Ground, is an acceptable source of calcium carbonate. It shall be true to name and contain not less than 33.0 percent calcium (Ca). Ground limestone must be used in all labeling.
- (n) Calcium Carbonate is a product true to name which contains a minimum of 38.0 percent calcium (Ca).
- (o) Limestone, Magnesium, or Dolomitic, is an acceptable source of magnesium and calcium carbonate. The terms are synonymous and designate a native mineral composed of mixtures of magnesium carbonate (MgCO₃), and calcium carbonate (CaCO₃). It contains not less than 10.0 percent magnesium (Mg) and shall be stated as an ingredient as magnesium limestone or dolomitic limestone.
- (p) Phosphate, Defluorinated, includes either calcined, fused, or precipitated calcium phosphate. It contains not more than one part of fluorine (F) to 100 parts of phosphorus (P). The minimum percent of calcium (Ca) and phosphorus (P) and the maximum percent of fluorine (F), and Sodium (Na), shall be stated on the label. The term "defluorinated" shall not be used as a part of the name of any product containing more than one part of fluorine (F) to 100 parts of phosphorus (P). The term "defluorinated phosphate" shall be used in labeling ingredient listings.
- (q) Iodized Salt is salt (NaCl) containing not less than 0.007 percent iodine, uniformly distributed.
- (r) Bone Phosphate is the residue of bones that have been treated first in a caustic solution, then in a hydrochloric acid solution, and thereafter precipitated with lime and dried. It contains a minimum of 17.0 percent phosphorus (P). It shall be labeled with guarantees for calcium (Ca) and phosphorus (P).
- (s) Rock Phosphate, Soft, is the very finely divided by–product (washings) obtained from mining Florida rock phosphate by the hydraulic process. It contains a minimum of 9.0 percent phosphorus (P) and 15.0 percent calcium (Ca), and not more than 30.0 percent clay and 1.5 percent fluorine (F). The term "soft rock phosphate" shall be used in labeling.
- (t) Diammonium Phosphate is the product resulting from the neutralization of phosphoric acid, feed grade, or defluorinated wet–process phosphoric acid which contains not less than 17.0 percent nitrogen (N) and 20.0 percent phosphorus (P). It contains not more than 1 part fluorine (F) to 100 parts phosphorus (P), 75 ppm of arsenic (As), and 30 ppm of heavy metals reported as lead. It does not include diammonium phosphate made from by–product ammonia absorbed from coke–oven gas. It shall be used only in ruminant feeds as a source of phosphorus and nitrogen in an amount that supplies not more than 2.0 percent of equivalent crude protein in the total daily ration. If a premix, concentrate, or supplement contains more than 2.0 percent of equivalent crude protein from diammonium phosphate, the label must contain adequate directions for use and a prominent statement, "Caution: Use only as directed." The caution statement shall be in prominent bold type against a contrasting background.
- (u) Bone Charcoal, Spent, is the product resulting from the repeated charring of bone charcoal after use in clarifying sugar solutions. It contains a minimum of 11.5 percent phosphorus (P). It shall be labeled with guarantees for phosphorus (P) and calcium (Ca). (This product is sometimes referred to as "Spent Bone Black," however, spent bone charcoal shall be used in labeling.)

- (v) Bone Meal, Steamed, is the dried and ground product sterilized by cooking undecomposed bones with steam under pressure. Grease, gelatin, and meat fiber may or may not be removed. It shall be labeled with guarantees for phosphorus (P) and calcium (Ca). "Steamed Bone Meal" shall be used in labeling.
- (w) Phosphoric Acid, Feed Grade ___ percent is a solution of phosphoric acid in water. It contains not more than 100 ppm fluorine (F), 3.2 ppm arsenic (As), and 1.3 ppm of heavy metals reported as lead for each percentage of phosphorus. If manufactured by the electric furnace method, the color is to be white or amber, and turbidity clear to faintly hazy. If manufactured by the wet–process method, the color is dark brown to blackish, with marked turbidity. When this ingredient is used as a constituent in mixed feeds, it must be called phosphoric acid in the ingredient list.
- (x) Rock Phosphate, Ground, is ground phosphate rock. It shall be labeled with guarantees for calcium (Ca) and phosphorus (P) and a maximum guarantee for fluorine (F). "Ground Rock Phosphate" shall be used in labeling.
- (y) Rock Phosphate, Ground, Low Fluorine is ground phosphate rock that contains not more than 0.5 percent fluorine (F). "Low Fluorine Ground Rock Phosphate" shall be used in labeling. It shall be labeled with guarantees for minimum percentages of calcium (Ca) and phosphorus (P) and for a maximum percentage of fluorine (F).
- (z) Ammonium Polyphosphate Solution is the product resulting from the neutralization of superphosphoric acid. It shall contain not less than 9.0 percent nitrogen (N) and 13.0 percent phosphorus (P). It shall contain not more than one part fluorine (F) to 100 parts phosphorus (P). 75 ppm of arsenic (As), and 30 ppm of heavy metals reported as lead. It may be used in ruminant feeds as a source of both phosphorus and nitrogen in an amount that supplies not more than 2.0 percent of equivalent crude protein in the total daily ration.
- (aa) Metal Proteinate is the product resulting from the chelation of a soluable salt with amino acids or partially hydrolyzed protein. It shall be declared as an ingredient as the specific metal proteinate: i.e., "Copper Proteinate," "Zinc Proteinate," etc.
- (bb) Smectite-Vermiculite is a natural occurring magnesium, iron, and potassium layer silicate. It shall be labeled with guarantees for magnesium (Mg), iron (Fe), and potassium (K).
- (cc) Calcium Periodate is a source of iodine produced by reacting calcium iodate with calcium hydroxide or calcium oxide to form a substance consisting of not less than 60.0 percent by weight of penta calcium orthoperiodate containing 28.0 to 31.0 percent by weight of iodine. It may be used in salt for livestock as a source of iodine.
- (dd) Mono-ammonium Phosphate is the product resulting from the neutralization of phosphoric acid, feed grade, or defluorinated wet-process phosphoric acid with ammonia and shall contain not less than 9.0 percent nitrogen (N), and 24.0 percent phosphorus (P). It shall contain not more than one part fluorine (F) to 100 parts phosphorus (P), 75 ppm of arsenic (As), and 30 ppm of heavy metals reported as lead. It shall be used only in ruminant feeds as a source of phosphorus and nitrogen in an amount that supplies not more than 2.0 percent of equivalent crude protein in the total daily ration. If a premix, concentrate or supplement contains more than 2.0 percent of equivalent crude protein from mono-ammonium phosphate, the label must contain adequate directions for use, and a prominent statement, "Caution: Use only as directed." The caution statement shall be in prominent bold type against a contrasting background.
- (ee) Ammonium Sulfate is the product resulting from the neutralization of sulfuric acid with ammonia. It shall contain not less than 21.0 percent nitrogen (N) and not less than 24.0 percent sulfur (S). It shall contain not more than 75 ppm arsenic (As) and 30 ppm heavy metals reported as lead. This does not include ammonium sulfate made from by-product ammonia recovered from coke-oven gas. It shall be used only in ruminant feeds as a source of sulfur and nitrogen in an amount that supplies not more than 2.0 percent of equivalent crude protein from ammonium

sulfate. The label shall have adequate directions for use and a prominent statement, "Caution — This feed shall be used only in accordance with directions furnished on the label".

(ff) Metal Polysaccharide Complex is the product resulting from complexing of a soluble salt with a polysaccharide solution declared as an ingredient as the specific metal complex: i.e., copper polysaccharide complex; zinc polysaccharide complex; iron polysaccharide complex, etc.

(gg) Additional Officially Recognized Mineral Ingredients.

The following inorganic (mineral) chemicals are recognized as suitable ingredients in animal feeds under controlled conditions. They shall be of purity equal to the commonly recognized "commercial grade" for the article and shall be declared as ingredients by the following names:

Calcium Gluconate Magnesium Oxide Calcium Iodate Magnesium Sulfate Manganese Acetate Calcium Iodobehenate Calcium Sulfate (Anhydrous) Manganese Carbonate Calcium Sulfate (Dihydrate) Manganese Chloride Cobalt Acetate Manganese Citrate (Soluble) Cobalt Carbonate Manganese Gluconate Cobalt Chloride Manganese Orthophosphate Cobalt Oxide Manganese Phosphate Cobalt Sulfate (Di-basic) Copper Carbonate Manganese Sulfate Copper Chloride Manganous Oxide Copper Gluconate Monocalcium Phosphate Copper Hydroxide Monosodium Phosphate Copper Orthophosphate Potassium Bicarbonate Copper Oxide Potassium Carbonate Copper Pyrophosphate Potassium Chloride Copper Sulfate Potassium Iodate Potassium Iodide Cuprous Iodide Dicalcium Phosphate Potassium Sulfate

Diiodosalicylic Acid Salt

Iron Ammonium Citrate

Disodium Phosphate Sodium Bicarbonate
Ethylenediamine Dihydriodide Sodium Iodate
Ferrous Fumarate Sodium Iodide
Sodium Selenate

Sodium Selenate Sodium Selenite Sodium Sulfate

Iron Carbonate Sodium Tripolyphosphate

Iron Chloride
Iron Gluconate
Iron Oxide
Iron Oxide
Iron Phosphate
Iron Pyrophosphate
Iron Sulfate

Iron Sulfate Zinc Chloride
Reduced Iron Zinc Oxide
Magnesium Carbonate Zinc Sulfate
(hh) Dicalcium Phosphate is a calcium salt of phosphore

- (hh) Dicalcium Phosphate is a calcium salt of phosphoric acid, generally expressed as CaHPO4, and its hydrated forms. Minimum percent phosphorus (P), minimum percent calcium (Ca) and maximum percent fluorine (F) must be specified. It shall be labeled to show a maximum of 1 part fluorine (F) to 100 parts phosphorus (P).
- (ii) Monocalcium Phosphate is a calcium salt of phosphoric acid, generally expressed as CaH4(PO4)2, and its hydrated forms. Minimum percent phosphorus (P), minimum percent calcium (Ca) and maximum percent fluorine (F) must be specified. It shall be labeled to show a maximum of 1 part fluorine (F) to 100 parts phosphorus (P).

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsections (p) and (gg) and new subsections (hh) and (ii) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 2. Editorial correction of Note filed 8-17-82 (Register 82, No. 34).
- 3. Amendment of subsection (a), including new subsection (a)(1)–(4) designators, filed 7–17–97; operative 8–16–97 (Register 97, No. 29).

Page 254 Register 2002, No. 5; 2-1-2002

- 4. Editorial correction of subsection (a) (Register 2002, No. 5).
- 5. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2790.5. Molasses Products.

- (a) General Provisions: All molasses products and liquid mixtures containing molasses products, including special mixes, shall be labeled to show the minimum percentage of total sugars expressed as invert sugar, and the maximum percent of moisture. In addition, liquid mixtures containing molasses products shall be labeled to show minimum percent of crude protein and the maximum percent of ash. All guarantees shall apply to the entire mixture.
- (b) Beet Molasses is a by-product of the manufacture of sucrose from sugar beets. It shall contain not less than 48.0 percent total sugars expressed as invert sugar and its density determined by double dilution shall be not less than 79.5 degrees Brix. The minimum percent of total sugars expressed as invert sugar and the maximum percent of moisture shall be stated.
- (c) Citrus Molasses is the partially dehydrated juices obtained from the manufacture of dried citrus pulp. It shall contain not less than 45.0 percent total sugars expressed as invert sugar and its density determined by double dilution shall be not less than 71.0 degrees Brix. The minimum percent of total sugars expressed as invert sugar and the maximum percent of moisture shall be stated. Any citrus molasses product which does not meet the above specifications shall be called citrus peel liquor and shall be labeled to show maximum moisture, minimum total sugars expressed as invert sugar and minimum Brix.
- (d) Cane Molasses is a by–product of the manufacture or refining of sucrose from sugar cane. It shall contain not less than 43.0 percent total sugars expressed as invert sugar. If its moisture content exceeds 27.0 percent, its density determined by double dilution shall not be less than 79.5 Brix.
- (e) Starch Molasses is a by-product of the manufacture of dextrose from starch derived from corn or grain sorghums in which the starch is hydrolyzed by use of enzymes and/or acid. It contains not less than 43.0 percent reducing sugars expressed as dextrose and not less than 50.0 percent total sugars expressed as dextrose. It shall contain not less than 73.0 percent total solids. The minimum percent of total sugars expressed as dextrose, and the maximum percent of moisture shall be stated.
- (f) Hemicellulose Extract is a by-product of the manufacture of pressed wood. It is the concentrated soluble material obtained from the treatment of wood at elevated temperature and pressure without the use of acids, alkalies, or salts. It contains pentose and hexose sugars, and other carbohydrates. The minimum percent of total sugars expressed as invert sugar and the maximum percent of moisture shall be stated.
- (g) Concentrated Separator By–Product (CSB) is obtained as a by–product of the recovery of sucrose from beet molasses by utilization of molecular exclusion chromatography. The minimum percent of total sugars expressed as invert sugar and the maximum percent of moisture shall be stated.
- (h) Concentrated Steffen Filtrate (CSF) is obtained as a by–product of the recovery of sucrose from beet molasses by utilization of the Steffen process (precipitation with calcium oxide).

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Section 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–25–74; effective thirtieth day therefor (Register 74, No. 26).
- 2. Amendment filed 11-4-76; effective thirtieth day thereafter (Register 76, No. 45).
- Amendment of subsection (d) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).
- Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2790.7. Non-Protein Nitrogen Products.

(a) Urea may contain other nontoxic nitrogenous compounds which are by-products from commercial synthesis and processing. It shall con-

tain not less than 45 percent nitrogen (N) (equivalent to 281.25 percent crude protein). If it contains less than 45 percent N but 41 percent or more N, it shall be designated as "Urea and Conditioner(s)." If the name of the conditioner(s) does not appear in the product name, the ingredient listing must contain the specific name of the conditioner(s).

- (b) Feed Grade Biuret contains a minimum of 60 percent biuret together with related non-toxic nitrogenous compounds resulting from the cotrolled pyrolysis of urea and subsequent processing. It shall contain not less than 35 percent nitrogen (equivalent to 218.75 percent crude protein) with not more than 7 percent nitrogen (equivalent to 43.75 percent crude protein) from urea. It shall not contain more than 0.5 percent mineral oil.
- (c) Other non-protein nitrogen products (Diammonium Phosphate, Ammonium Polyphosphate, Ammonium Sulfate, and Mono-Ammonium Phosphate) are defined in section 2790.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2791. Oat Products.

- (a) Ground Oats, Pulverized Oats, Crushed Oats and Crimped Oats consist of the entire product made by grinding, cutting, crushing, or crimping whole oats. They shall contain not more than 10 percent of other grains, weed seeds, and other foreign material containing not more than 15 percent crude fiber.
 - (b) Oat Groats are cleaned oats with the hulls removed.
- (c) Oat Hulls consist primarily of the outer covering of oats, obtained in the milling of table cereals or in the groating of oats from clean oats. When used in a mixture the maximum percentage shall be stated.
- (d) Feeding Oat Meal is obtained in the manufacture of rolled oat groats, or rolled oats and consists of broken rolled oat groats, oat groat chips, and floury portions of the oat groats, with only such quantity of finely ground oat hulls resulting from good manufacturing process. It shall not contain more than 4 percent crude fiber.
- (e) Clipped Oat By-Product is obtained in the manufacture of clipped oats. It may contain the light chaffy material broken from the end of the hulls, empty hulls, light immature oats, and dust. When used in a mixture the maximum percentage shall be stated.
- (f) Oats shall contain a minimum of 80 percent sound cultivated oats and not more than 10 percent wild oats; 3 percent heat damaged kernels of oats, other grains, and wild oats; and 5 percent foreign material. It shall contain not more than 15 percent crude fiber. Foreign material includes all matter except cultivated oats, other grains, and wild oats, and includes oat clippings, and detached oat hulls.
- (g) Mixed Feed Oats consists of a mixture of grains containing at least 30 percent cultivated oats; provided that the mixture consists of either (1) not less than 65 percent of cultivated and wild oats combined or (2) not less than 65 percent of wild oats. It shall contain more than 25 percent of other grains, not more than 6 percent heat damaged kernels of oats, wild oats, and other grains, and not more than 10 percent foreign material, which may include 4 percent fine seeds. Foreign material consists of all matter except wild oats and grains for which standards have been established under the United States Grain Standards Act.
- (h) Oat Mill By-Product is the by-product obtained in the manufacture of oat groats, consisting of oat hulls, and particles of the groat, and containing not more than 22 percent crude fiber. When used in a mixture the maximum percentage shall be stated.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2793. Peanut Products.

(a) Peanut Meal and Hulls, Mechanical Extracted and Solvent Extracted is a product of shelled peanuts, composed principally of the kernels and hulls, with such portion of the oil, as may be left in the ordinary course of manufacture.

- (b) Peanut Skins is the outer covering of the peanut kernel, exclusive of hulls, as obtained in ordinary commercial processing. The product may contain broken peanut kernels.
- (c) Peanut Meal Mechanical Extracted is a ground product of the shelled peanuts, composed principally of the kernels, with such portion of the hull, or fiber, and oil as may be left in the ordinary course of manufacture. It shall contain not more than 7.0 percent crude fiber.
- (d) Peanut Hulls consists of the outer hull or the peanut shell. When used in a mixed feed, the maximum percentage must be stated.

HISTORY

- 1. Amendment filed 6–25–74; effective thirtieth day thereafter (Register 74, No. 26).
- 2. Amendment filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 3. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 4. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2794. Rice Products.

- (a) Rice Polish is a by-product of rice obtained in the milling operation of brushing the grain to polish the kernel.
- (b) Rice Bran is the pericarp or bran layer and germ of the rice containing not more than 13.0 percent crude fiber with hull fragments, chipped, broken, or brewers rice, and calcium carbonate as may result from good manufacturing processing. When the calcium carbonate exceeds 3.0 percent (Ca.–1.2 percent), the percentage must be declared in the brand name; i.e., Rice Bran with Calcium Carbonate not exceeding ___percent.
- (c) Rice Bran, Solvent Extracted, is obtained by removing the part of the oil from the rice bran by the use of solvents and shall contain not less than 14.0 percent crude protein, and not more than 14.0 percent crude fiber
- (d) Ground Rough Rice or Ground Paddy Rice is the entire product obtained by grinding the whole rice grain including the hull and contains not more than 10 percent fiber.
- (e) Ground Paddy Rice Screenings is the product resulting from the cleaning of paddy rice and consists of immature rice kernels, water grass seed, rice hulls, straw, dirt and sand. It shall be free of unpalatable or injurious weed seeds. When used in a mixture, the maximum percentage shall be stated.
- (f) Rice Hulls are the outer coverings of the rice kernel. When used in a mixture, the maximum percentage shall be stated.
- (g) Rice Mill By-Product is the total offal obtained in the production of milled rice. It consists of rice hulls, rice bran, rice polishings and broken rice grains. It shall be free of unpalatable and injurious weed seeds, and dirt and straw. It contains not more than 30.0 percent crude fiber and not more than 16.0 percent ash. When used in a mixture, the maximum percentage shall be stated.
- (h) Chipped Rice, Broken Rice, or Brewers Rice is the small fragments of rice kernels that have been separated from the larger kernels of milled rice.
- (i) Ground Brown Rice is the entire product obtained in grinding the rice kernels after the hulls have been removed.
- (j) Parboiled Rice Bran is about 5.0 to 7.0 percent by weight of Parboiled Rough Rice and is a mixture of a combination of several botanical tissues: pericarp, seed coat, nucellus, and the outer most portion of the endosperm (the aleurone layer). It may contain hull fragments, broken grains and traces of added calcium carbonate as is unavoidable in the milling of parboiled rice.
- (k) Stabilized Rice Bran is the bran which has been treated soon after milling by heat or other means that will substantially reduce the lipase activity. Free fatty acid content of the crude fat extracted shall not exceed 4.0 percent.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- 2. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2795. Rye Products.

- (a) Rye, Mill Run consists of the mill run of the outer covering of the rye kernel and the rye germ with small quantities of rye flour and aleurone and contains not more than 9.5 percent crude fiber.
- (b) Rye Middlings consist of rye feed and rye red dog combined in the proportions obtained in good manufacturing process of milling rye flour and contains not more than 8.5 percent crude fiber.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2795.5. Safflower Products.

- (a) Safflower Meal is obtained by extraction of oil and hulls from safflower seed and contains not less than 40 percent crude protein. If solvent extracted, it shall be so designated.
- (b) Whole–Pressed Safflower Seed is the ground residue obtained by extraction of oil from whole safflower seed by a mechanical or solvent extraction process and contains not less than 20 percent protein and not more than 40 percent fiber. If solvent extracted, it shall be so designated.
- (c) Safflower Hull consist of the outer covering of safflower seed. When used in a mixture, the percentage shall be stated.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2796. Screenings.

Screenings is the by-product obtained in the cleaning of crop seed. It may include light and broken grains and other agricultural seeds, weed seeds, hulls, chaff, joints, straw, elevator or mill dust, sand and dirt. It shall be graded and designated according to the following definitions: No grade of screenings shall contain any seeds or other material that is either injurious to animals or will impart an objectionable odor or flavor to their milk or flesh. All screenings must be processed by grinding or otherwise to render the seed of any pest incapable of reproduction.

- (a) Grain Screenings contains 70.0 percent or more grain including light and broken grains. It may contain wild buckwheat and wild oats. The term "Grain Screening" may be used for unspecified kinds of grain, or the predominating kind of grain (if in excess of 50.0 percent) may be declared as the first word or words in the name. It may contain no more than 6.5 percent ash.
- (b) Seed Screenings shall consist of 70.0 percent or more seed, light and broken and contain not more than 6.5 percent ash. The name of the seed shall be a part of the name.
- (c) Mixed Screenings is screenings from grain and seed which does not meet the standards of subsections (a) or (b). It may include hulls, chaff, straw, dust, sweepings, sand, dirt, grains and seeds and contains not more than 27.0 percent crude fiber and not more than 15.0 percent ash. If it contains more than 15.0 percent ash, the words "sand" or "dirt" shall appear on the label as part of the name of the product. When used in a mixture, the maximum percent shall be stated.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of Note filed 8-17-82 (Register 82, No. 34).
- 2. Amendment filed 10–26–82; effective thirtieth day thereafter (Register 82, No. 44)
- 3. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2796.5. Sesame Products.

(a) Sesame Oil Cake is the product obtained by removing most of the oil from sesame seed by crushing, cooking, and the use of pressure or solvents. The process used in the production (expeller or solvent) shall be a part of the brand name.

Page 256

(b) Sesame Oil Meal is ground sesame oil cake. The process used in the production (expeller or solvent) shall be a part of the brand name. Note: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

Amendment filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).

§ 2797. Sorghum Products.

- (a) Ground Grain Sorghum is the entire product made by grinding the grains of grain sorghum.
- (b) Grain Sorghum Gluten Feed is that part of the grain of grain sorghums that remains after the extraction of the larger part of the starch and germ, by the processes employed in the wet milling manufacture of starch or syrup.
- (c) Grain Sorghum Gluten Meal is that part of the grain of grain sorghums that remains after the extraction of the larger part of the starch and germ, and the separation of the bran by the processes employed in the wet milling manufacture of starch or syrup.
- (d) Grain Sorghum Germ Cake or Grain Sorghum Germ Meal consists of the germ of grain sorghum grains from which part of the oil has been pressed and is the product obtained in the wet milling process of manufacture of starch, syrup, and other grain sorghum products.
- (e) Rolled Grain Sorghums is obtained by running whole grain sorghums through rollers. Then it is properly dried and cooled.
- (f) Grain Sorghum Grits consists of the hard flinty portions of grain sorghums containing 5 percent or less bran or germ.
- (g) Gelatinized Sorghum Grain Flour is obtained from the endosperm of sorghum grain which has been gelatinized and reduced to a finely ground meal containing not more than 1 percent crude fiber.
- (h) Partially Aspirated Gelatinized Sorghum Grain Flour is obtained from whole sorghum grain which has been partially aspirated and has been gelatinized and reduced to a finely ground meal containing not more than 2.5 percent crude fiber.
- (i) Grain Sorghum Mill Feed is a mixture of grain sorghum bran, grain sorghum germ, part of the starchy portion of grain sorghum kernels, or mixture thereof as produced in the manufacture of grain sorghum grits and refined meal and flour containing not less than 5 percent crude fat and not more than 6 percent crude fiber.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Amendment of subsection (e) filed 7-2-82; effective thirtieth day thereafter (Register 82, No. 27).

§ 2798. Soybean Products.

- (a) Ground Soybean is ground whole soybeans without cooking or removing any of the oil.
- (b) Ground Soybean Hay is the ground soybean plant including the leaves and beans. It must be reasonably free of other crop plants and weeds and shall contain not more than 33.0 percent crude fiber.
- (c) Soybean Hulls consist of the outer covering of the soybean. When used in a mixture, the maximum percentage shall be stated.
- (d) Soybean Feed, Solvent Extracted, is the product remaining after the partial removal of protein and nitrogen free extract from dehulled solvent extracted soybean flakes. When used in a mixture, the maximum percentage shall be stated.
- (e) Soy Flour is the finely powered material resulting from the screened and graded product remaining after removal of most of the oil from selected, sound, cleaned and dehulled soybeans by a mechanical or solvent extraction process. It shall contain not more than 4.0 percent crude fiber.
- (f) Soybean Meal, Mechanically Extracted, is the product obtained by grinding the cake or chips which remain after removal of most of the oil from soybeans by a mechanical extraction process. Heat must be applied during the process. It shall contain not more than 7.0 percent crude fiber. It may contain calcium carbonate or an anti-caking agent not to exceed

- 0.5 percent to reduce caking and improve flowability. The name of the conditioning agent shall be shown as an added ingredient.
- (g) Soybean Meal, Solvent Extracted, is the product obtained by grinding the flakes which remain after removal of most of the oil from soybeans by a solvent extraction process. It shall contain not more than 7.0 percent crude fiber. It may contain calcium carbonate or an anti-caking agent not to exceed 0.5 percent to reduce caking and improve flowability.
- (h) Soybean Meal, Dehulled, Solvent Extracted, is obtained by grinding the flakes remaining after removal of most of the oil from dehulled soybeans by a solvent extraction process. It shall contain not more than 3.5 percent crude fiber. It may contain calcium carbonate or an anti–caking agent not to exceed 0.5 percent to reduce caking and improve flowability. The name of the conditioning agent must be shown as an added ingredient. When listed as an ingredient in a manufactured feed it may be identified as "Dehulled Soybean Meal."
- (i) Soybean Mill Feed is composed of soybean hulls and the offal from the tail of the mill which results from the manufacture of soy grits or flour and contains not less than 13.0 percent crude protein and not more than 32.0 percent crude fiber. When used in a mixture, the maximum percentage shall be stated.
- (j) Soybean Mill Run is composed of soybean hulls and such bean meats that adhere to the hulls which results from normal milling operations in the production of dehulled soybean meal and contains not less than 11.0 percent crude protein and not more than 35.0 percent crude fiber
- (k) Soy Phosphate or Soy Lecithin is the mixed phosphatide product obtained from soybean oil by a degumming process. It contains lecithin, cephalin, and inositol phosphatides, together with glycerides of soybean oil and traces of tocopherols, glucosides, and pigments. It shall be designated and sold according to conventional descriptive grades with respect to consistency and bleaching.
- (1) Heat Processed Soybeans is the product resulting from heating whole soybeans without removing any of the component parts. It may be ground, pelleted, flaked, or powdered. The maximum pH rise using standard urease testing procedure should not exceed 0.10 pH units. It shall be sold according to its crude protein, crude fat and crude fiber content.
- (m) Soy Protein Concentrate is prepared from high quality sound, clean, dehulled soybean seeds by removing most of the oil and water soluble non-protein constituents and contains not less than 65.0 percent protein on a moisture-free basis.
- (n) Kibbled Soybean Meal is the product obtained by cooking ground solvent extracted soybean meal under pressure and extruding from an expeller or other mechanical pressure device. It shall be designated and sold according to its protein content and shall contain not more than 7.0 percent crude fiber.
- (o) Condensed Soybean Solubles is the product resulting from the washing of Soy Flour or Soybean Flakes with water and acid; water, alkali and acid; or water and alcohol. The wash water is then concentrated to a solids content of not less than 50.0 percent.
- (p) Soy Flour is the finely powdered material resulting from the screened and graded product after removal of most of the oil rom the oil from selected, sound, cleaned and dehulled soybeans by a mechanical or solvent extraction process. It shall contain not more than 4.0 percent crude fiber.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).
- Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2798.5. Sunflower Products.

(a) Sunflower Meal, Dehulled, Mechanically Extracted, is obtained by grinding the residue remaining after the extraction of most of the oil from dehulled sunflower seed by a mechanical extraction process.

- (b) Sunflower Meal, Dehulled, Solvent Extracted, is the ground residue remaining after extraction of most of the oil from dehulled sunflower seed by a solvent extraction process.
- (c) Sunflower Meal, Mechanically Extracted, is the ground residue remaining after extraction of most of the oil from whole sunflower seed by a mechanical extraction process.
- (d) Sunflower Meal, Solvent Extracted, is the ground residue remaining after extraction of most of the oil from whole sunflower seed by a solvent extraction process.
- (e) Sunflower Hulls consist of the outer covering of sunflower seeds. When used in a mixture the maximum percentage shall be stated.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2799. Other Oilseed Products.

- (a) Canola Meal low erucic acid low glucosinolate consists of the meal obtained after the removal of most of the oil, by a direct solvent or prepress solvent extraction process, from the whole seeds of the species Brassica napus or Brassica campestris the oil component of which seed contains less than 2.0 percent erucic acid and the solid component of which seed contains less than 30 micromoles of any mixture of 3-butenyl glucosinolate, 4 pentenyl glucosinolate, 2-hydroxy-3-butenyl glucosinolate and 2-hydroxy-4-pentenyl glucosinolate per gram of air dry, oil free solid. It must contain a maximum of 12.0 percent crude fiber and a maximum of 30 micromoles of glucosinolates per gram of air dry, oil free solid. It must contain a maximum of 12.0 percent crude fiber and a maximum of 30 micromoles of glucosinolates per gram.
- (b) Rapeseed Meal, Mechanically Extracted, is obtained by grinding the cake which remains after removal of most of the oil by mechanical extraction of the seed from the rapeseed plant (Brassica) and contains a minimum of 32.0 percent protein and a maximum of 12.0 percent crude fiber.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. New section filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2800. Wheat Products.

See Section 2704 for definitions of wheat products containing screenngs.

- (a) Wheat Bran is the coarse outer covering of the wheat kernel separated from cleaned and scoured wheat in good commercial milling practice
- (b) Wheat Feed Flour consists principally of wheat flour together with fine particles of wheat bran, wheat germ, and the offal from the "tail of the mill." This product shall be obtained from good commercial milling process. It shall contain not more than 1.5 percent crude fiber.
- (c) Wheat Germ Meal is wheat germ together with bran and middlings or shorts resulting from good commercial processing. It shall contain not less than 25 percent crude protein and 7 percent crude fat.
- (d) Wheat Mill Run is coarse wheat bran, fine particles of wheat bran, wheat shorts, wheat germ, wheat flour, and the offal from the "tail of the mill." This product shall be obtained in the usual process of commercial milling containing not more than 9.5 percent crude fiber.
- (e) Wheat Middlings consists of fine particles of wheat bran, wheat shorts, wheat germ, wheat flour, and some of the offal from the "tail of the mill." This product shall be obtained in good commercial milling practice and contain not more than 9.5 percent crude fiber.
- (f) Wheat Shorts consists of fine particles of wheat bran, wheat germ, wheat flour, and offal from the "tail of the mill" obtained in good commercial milling practice and contain not more than 7 percent crude fiber.
- (g) Wheat Red Dog consists of offal from the "tail of the mill" together with some fine particles of wheat bran, wheat germ, and wheat flour. This product is obtained in good commercial milling practice and contains not more than 4 percent crude fiber.

(h) Defatted Wheat Germ Meal is wheat germ meal from which part of the oil or fat has been removed and contains not less than 30 percent crude protein.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

§ 2801. Yeast Products.

- (a) Primary Dried Yeast or Dried Yeast is the dried, non-fermentative yeast of the botanical classifications Saccharomyces which has been separated from the medium in which propagated. It shall consist of yeast cells with no fillers and contain not less than 40.0 percent crude protein.
- (b) Irradiated Dried Yeast, is the dried, non-fermentative yeast which has been subjected to ultraviolet rays in order to produce anti-rachitic potency.
- (c) Yeast Culture is the product composed of yeast grown on malt, in a base of cereal meals and capable of producing active fermentation. The ingredients shall be stated on the label. Products resembling Yeast Cultures but not having reproductive activity shall be labeled "Inactivated Yeast Culture" followed by the statement "Will Not Produce Fermentation."
- (d) Active Dry Yeast is yeast which has been dried in such a manner as to preserve a large portion of its fermenting power. It shall consist of yeast cells and contain no added cereal or filler and shall contain not less than 15 billion live yeast cells per gram.
- (e) Brewers Dried Yeast is the dried, non-fermentative, non-extracted yeast of the botanical classification Saccharomyces resulting as a by-product from the brewing of beer and ale. It must not contain less than 35.0 percent crude protein. It must be labeled according to its crude protein content.
- (f) Torula Dried Yeast or Candida Dried Yeast is the dried, non-fermentation yeast of the botanical classification (torulopsis) Candida utilis (formerly Torulopsis utilis) which has been separated from the medium in which propagated. It must contain not less than 40.0 percent crude protein
- (g) Yeast Culture is the dried product composed of yeast and the media on which it was grown, dried in such a manner as to preserve the fermenting activity of the yeast. The media must be stated on the label.
- (h) Molasses Yeast Condensed Solubles is obtained by condensing to a syrup consistency the broth remaining after the removal of baker's yeast cells propagated on molasses.
- (i) Brewers Liquid Yeast is the non-fermentative, non-extracted yeast of the botanical classification Saccharomyces resulting as a by-product from the brewing of beer and ale. It must contain not less than 35.0 percent crude protein on a dry weight basis. The guaranteed analysis shall include the maximum moisture.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of Note filed 8-17-82 (Register 82, No. 34).
- 2. Amendment of subsections (a) and (b) and new subsections (d)–(i) filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2802. Miscellaneous Products.

- (a) Oil Cake is the product obtained after the extraction of part of the oil by crushing, cooking, and pressing, or by crushing, heating, and the use of solvents, from vegetable seeds which have been screened and cleaned of weed seed, hulls, and other foreign materials by a commercial process. A name indicative of the source shall be prefixed to the words "oil cake."
- (b) Oil Meal is oil cake ground to a meal. A name indicative of the source shall be prefixed to the words "oil meal."
- (c) Silage is green fodder that has been preserved with or without additives by ensiling. Normally the material is finely cut and blown into a chamber such as a pit or bag where it is pressed to exclude air and where it undergoes an acid fermentation that retards spoilage. The materials shall be labeled to show the kind of silage, for example, corn silage, oat

Page 256.2 Register 2002, No. 5; 2-1-2002

silage, hay silage. When the product is sold in a formula or mixed feed, all ingredients shall be stated on the label. The label shall state the following guarantees: minimum percent crude protein, minimum percent crude fat, maximum percent crude fiber, maximum percent ash and maximum and minimum percent moisture.

- (d) Ground Bean Screenings or Ground Pea Screenings is the ground, broken and culled beans or peas removed from field run beans or peas in the process of recleaning. They shall be free from dirt, pods, and straw.
- (e) Charcoal (vegetable) is charred hard or soft wood, nut shells, or fruit pits. If it is wood charcoal, it shall bear a designation indicating whether it is hard wood charcoal or soft wood charcoal. Charcoal from nut shells or fruit pits shall be designated as shell charcoal. When used in a mixed feed the maximum percent shall be stated on the label.
- (f) Dried Citrus Pulp, Citrus Meal is the dried, peel and residue of the inside portions, and occasional cull fruits of the citrus family with or without the extraction of part of the juice and part of the oil of the peel. If a neutralizing agent, e.g., calcium oxide, calcium carbonate, or calcium hydrate is added as an aid in processing, the maximum percentage shall be stated. If it bears a name descriptive of its kind, it shall correspond thereto.
- (g) Wet Citrus Pulp, is the peel and residue of the inside portions, and occasional cull fruits of the citrus family with or without the extraction of part of the juice and part of the oil of the peel. If a neutralizing agent, e.g. calcium oxide, calcium carbonate, or calcium hydrate is added as an aid in processing, the maximum percentage shall be stated. If it bears a name descriptive of its kind, it shall correspond thereto.
- (h) Coca Bean Shells or Coca Bean Hulls is the hard outside coating of the coca bean.
- (i) Ground Cull Nut Meats or Ground Nut Meat Screenings is the ground fragments, immature, and culled nut meats obtained in the cleaning and grading of nut meats. They shall be free of shells, hulls, dirt, and other foreign material.
- (j) Feeding Dried Fruits consists of the culled substandard fruit or surplus production of the dried fruit industry. It may contain an artificial color or flavoring matter which has been approved by the secretary. It shall bear a name descriptive of its kind.
- (k) Ground Straw or Chopped Straw is ground or chopped cereal or other straws from which the seeds have been removed. It shall bear a name descriptive of its kind. When used in a mixture, the maximum percentage shall be stated.
- (*l*) Ground Dried Vegetables is dried, ground vegetables. It shall bear a name descriptive of its kind.
- (m) Buckwheat Middlings is that portion of the buckwheat grain immediately under the hull after separation of the flour containing no more hulls than is obtained in good commercial buckwheat milling practice, and containing not more than 10.0 percent crude fiber.
- (n) Dried Kelp is dried seaweed. The maximum percentage of sodium (Na) and the minimum percentage of potassium (K) shall be declared. If the kelp is sold as a source of iodine (I), the minimum percentage of iodine shall be declared. If the product is prepared by artificial drying, it may be called "Dehydrated Kelp."
- (o) Dehydrated Silage Pellets are wholesome silage (ensilage) which has been dried by thermal means and formed into pellets by a mechanical process. The product should bear a name descriptive of the type of silage pelleted, such as "Dehydrated Alfalfa Silage Pellets," etc.
- (p) Paunch Product, Dehydrated, is a product composed of the contents of the rumen of slaughtered cattle, dehydrated at temperatures over 100 degrees centigrade to a moisture content of 12.0 percent or less, and sufficient to destroy all pathogenic organisms. It shall be dehydrated promptly after removal from the rumen to prevent decomposition.
- (q) Bagasse is the portion of the stalk (leaves and tops removed) of sugar cane remaining after extraction of the juice.
- (r) Coastal Bermudagrass Hay is the dried aerial portion of the perennial hybrid grass, Coastal Bermuda (Cynodon dactylion) (L.) (Pers.), free of other crop plants, and weeds which have been cultivated as a crop and harvested during a period of active growth. If it is fully ground, it shall

be designated as "Coastal Bermudagrass Meal." If it is dried by thermal means, it may be designated as "Dehydrated Coastal Bermudagrass Hay" or "Dehydrated Coastal Bermudagrass Meal."

- (s) Dried Tomato Pomace is a dried mixture of tomato skins, pulp, and crushed seeds. If the pomace contains spices used in the production of a tomato product, this shall be shown in the name as "Dried Spiced Tomato Pomace."
- (t) Ground Straw is the ground product remaining after separation of the seed from mature forage plants. The source of the material shall constitute a part of the name of the product; i.e., "Ground Blue Grass Straw," "Ground Alfalfa Straw."
- (u) Ground Grass is obtained by drying and grinding grass which has been cut before formation of the seed. If a specie name is used, the product shall correspond thereto.
- (v) Dehydrated Garbage is artificially dried, undecomposed animal and vegetable table waste, from which crockery, glass, metal, string and similar materials have been removed, processed at a temperature sufficient to destroy pathogenic organisms. If part of the grease and fat is removed, it shall be designated as "Degreased Dehydrated Garbage."
- (w) Cereal Food Fines consists of particles of breakfast cereals obtained as a by-product of their processing.
- (x) Dried Bakery Product is a mixture of bread, cookies, cake, crackers, flours, and doughs which has been mechanically separated from non-edible materials, artificially dried and ground. If the product contains more than 3.5 percent sodium, the maximum percentage of sodium shall be a part of the name; i.e., Dried Bakery Product with __ percent sodium.
- (y) Buckwheat Hulls is the outer covering of the buckwheat obtained in the milling of buckwheat flour.
- (z) Guar Meal is whole guar beans after removal of most of the endosperm. If the product is heat treated, it may be designated as "heat treated" or "toasted."
- (aa) Synthetic Fatty Alcohol is a blend of long chain linear and branched alcohols with carbon numbers ranging from C_{20} through C_{32} and of hydrocarbons ranging from C_{24} through C_{40} . The product is an off white (straw) color, soft solid, with a melting point of approximately $115^{\circ}F$. The product shall contain not less than 95.0 percent long chain alcohols. It shall be labeled to show the minimum percent long chain alcohols, and maximum percent moisture, insoluble and unsaponifiable matter. The statement "For use in ruminant feeds only, not to exceed 5.0 percent of the ration," shall appear on the label. When used in blended fat or other fat products, the percent shall be stated.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. Repealer of subsection (c) filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 2. New subsections (c) and (aa) and amendment of subsection (p) filed 7–2–82; effective thirtieth day thereafter (Register 82, No. 27).
- 3. Amendment filed 1–30–2002; operative 1–30–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 5).

§ 2803. Lignin Sulfonate.

- (a) General Provisions: Lignin Sulfonate is ammonium, calcium, magnesium, or sodium salt, or a combination, of spent sulfite liquor derived from the sulfite digestion of wood in either a liquid or dry form. The moisture shall not exceed 6 percent by weight in the dry form, or 50 percent by weight in the liquid form. The label shall state whether the product is the ammonium, sodium, magnesium, or calcium salt or the combination thereof. Where the ammonium is used, the percent of equivalent crude protein from nonprotein nitrogen shall be guaranteed as applicable. The label shall show total sugars expressed as invert sugar, maximum moisture, maximum ash, and maximum sodium for sodium lignin sulfonate, maximum magnesium for magnesium lignin sulfonate, and maximum calcium for calcium lignin sulfonate.
- (b) Spent lignin sulfonate is lignin sulfonate with part or all of the sugar removed by fermentation or other process and shall be labeled with the same guarantee as lignin sulfonate in subsection (a).

(c) When lignin sulfonate is added to a mixed feed, in an amount not exceeding 2 percent of the total mixture, the type of lignin sulfonate need not be stated in the list of ingredients of the mixed feed.

NOTE: Authority cited: Sections 407 and 14902, Food and Agricultural Code. Reference: Sections 14992 and 15011, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–25–74; effective thirtieth day thereafter (Register 74, No. 26).
- 2. Amendment filed 11–4–76; effective thirtieth day thereafter (Register 76, No. 45).
- 3. Editorial correction of NOTE filed 8-17-82 (Register 82, No. 34).

Subchapter 3. Field Crops Standards, Inspection and Certification

Article 1. Standards

§ 2835. Standards.

The uniform standards for field crop products include the standards for grain established by the Secretary of the United States Department of Agriculture under the authority of the United States Grain Standards Act, 7 USC 71 in 7 Code of Federal Regulations, Chapter VIII Parts 800, 801, 802 and 810, and standards for other field crop products and the manufactured products and by–products of such field crops established under the authority of the Agricultural Marketing Act of 1946, 7 USC 1621 in 7 Code of Federal Regulations Parts 57 and 68.

NOTE: Authority cited: Sections 407 and 52002, Food and Agricultural Code. Reference: Sections 52001 and 52002, Food and Agricultural Code.

- 1. Originally published 7-25-45 (Title 3).
- 2. Revision filed 11–16–49 designated to be effective 1–1–50 (Register 18, No. 6).
- Repealer and new section filed 5-27-55; designated effective 7-1-55 (Register 55, No. 8).
- 4. Amendment filed 2-19-65; designated effective 6-1-65 (Register 65, No. 3).
- Amendment filed 11–4–82; effective thirtieth day thereafter (Register 82, No. 45).

§ 2836. Standards for Safflower Seed.

- (a) Terms defined.
- (1) For purposes of the Official Standards of the State of California for Safflower Seed:
- (A) Safflower Seed. Safflower Seed shall be any seed which, before the removal of dockage, consists of 50 percent or more of safflower seed.
- (B) Grades. Grades shall be "Safflower Seed," "Sample grade Safflower Seed," and special grades provided for in the standards.
- (C) Dockage. Dockage shall be weed seeds, weed stems, chaff, straw, grain other than safflower seed, empty hulls, sand, dirt, and other foreign material; also underdeveloped, shriveled, and small pieces of safflower seed kernels removed in properly separating the material other than safflower seed and which cannot be recovered by properly rescreening or recleaning.
- (D) Damaged Kernels. Damaged kernels shall be kernels and pieces of kernels of safflower seed which are damaged by blight and/or mold, or which are heat damaged, sprouted, frosted, badly ground damaged, badly weather damaged, or otherwise materially damaged.
- (E) Heat-damaged Kernels. Heat-damaged kernels shall be kernels and pieces of kernels of safflower seed which have been damaged by heat.
- (F) Stones. Stones shall be concreted earthy or mineral matter and other substances of similar hardness that do not disintegrate readily in water.
- (G) Other Grains. Other grains in safflower seed shall consist of kernels of wheat, barley, oats, corn, sorghum, rye and triticale.
 - (b) Principles Governing the Application of the Standards.
- (1) The following principles shall apply in the determination of the grades of safflower seed:
- (A) Basis of Determination. Each determination of other grains, dockage, moisture, temperature, odor, live weevils or other insects injurious to stored safflower seed, and distinctly low quality shall be upon the basis

- of the seed as a whole. All other determinations shall be upon the basis of the seed when free from dockage.
 - (B) Percentages. All percentages shall be upon the basis of weight.
- (C) Moisture. Moisture shall be ascertained by the air—oven method prescribed by the United States Department of Agriculture as described in Service and Regulatory Announcement No. 147 (1959 revision), issued by the Agricultural Marketing Service and available from the Department of Food and Agriculture, Grain and Commodity Inspection, 1220 N Street, Sacramento, California 95814, or ascertained by any method which gives equivalent results.
 - (c) Grades, Grade Requirements, and Grade Designations.
- (1) The following grades, grade requirements, and grade designations are applicable under these standards:
- (A) Safflower Seed. The grade "Safflower Seed" shall be safflower seed with not more than 3.0 percent damaged kernels, not more than 0.1 percent heat-damaged kernels, not more than 3.0 percent other grains, and not more than 8.0 percent moisture.
- (B) Sample Grade Safflower Seed. The grade "Sample grade Safflower Seed" shall be safflower seed which does not meet the requirements for the grade Safflower Seed; or which contains stones; or which is musty, or sour, or heating; or which has any commercially objectionable foreign odor; or which is otherwise of distinctly low quality.
- (C) Grade Designation. The grade designation for safflower seed shall include the words "Safflower Seed" or the words "Sample grade Safflower Seed," as the case may be; the name of each applicable special grade; and the word "dockage" together with the percentage thereof.
- (D) Dockage. The quantity of dockage shall be calculated in terms of percentage based on the total weight of the seed including the dockage. Dockage shall be stated in terms of tenths (1/10) of percent.
 - (d) Special Grades for Safflower Seed
 - (1) Weevily safflower seed.
- (A) Requirements. Weevily safflower seed shall be safflower seed which is infested with live weevils or other insects injurious to stored safflower seed.
- (B) Grade Designation. Weevily safflower seed shall be graded and designated according to the grade requirements of the standards applicable to such safflower seed if it were not weevily, and there shall be added to, and made part of the grade designation, the word "weevily." The specifications of these standards shall not excuse failure to comply with applicable federal and state laws governing the sales of such commodities. Note: Authority cited: Sections 407 and 52002, Food and Agricultural Code. Reference: Sections 52001 and 52002, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-19-65; designated effective 6-1-65 (Register 65, No. 3).
- 2. Amendment filed 5-5-67; effective thirtieth day thereafter (Register 67, No. 18).
- 3. Amendment of subsection (a)(1)(G) filed 7–3–74; effective thirtieth day thereafter (Register 74, No. 27).
- 4. Amendment filed 11–4–82; effective thirtieth day thereafter (Register 82, No. 45).

§ 2837. Standards for Tame Cultivated Mustard Seed.

NOTE: Authority cited: Sections 407 and 52002, Food and Agricultural Code.
HISTORY

- 1. New section filed 3-26-68; effective thirtieth day thereafter (Register 68, No. 13)
- 2. Repealer filed 11-4-82; effective thirtieth day thereafter (Register 82, No. 45).

§ 2838. Standards for Wild Rice.

- (a) Terms Defined.
- (1) For purposes of the Official Standards of the State of California for Wild Rice:
- (A) Wild Rice. Wild Rice shall be whole or broken kernels of wild rice (Zizania pallustris L.) from which the hulls have been removed and which contain not more than ten percent (10.0%) of seeds, unhulled kernels, or foreign material, either singly or combined.
- (B) Grades. Grades shall be numerical, 1 through 4, and Sample Grade, as provided for in the standards.

Page 256.4

- (C) Classes. Wild Rice shall be divided into six classes: Large Class, Medium Class, Thin Class, Short Wild Rice, Broken Wild Rice, and Mixed Wild Rice as provided for in the standards.
- (D) Damaged Kernels. Whole or broken kernels of Wild Rice which are distinctly damaged by water, heat, insects, mold or any other means.
- (E) Distinctly Low Quality. Wild Rice that is obviously of an inferior quality because of an unusual state or condition, and that cannot be graded properly by use of other grading factors provided in the standards.
- (F) Foreign Material. Foreign material shall be all matter other than Wild Rice.
- (G) Related Foreign Material. Related foreign material shall be hulls, germs, and the bran of Wild Rice which have been separated from the Wild Rice.
- (H) Unrelated Foreign Material. Unrelated foreign material shall be foreign material other than related foreign material, seeds, unhulled kernels and damaged kernels.
- (I) Unhulled Kernels. Whole or broken kernels of Wild Rice having a portion or portions of the hull remaining which covers one—eighth (1/8) or more of the total surface area of the kernel.
 - (J) Seeds. Whole or broken seeds of any plant other than Wild Rice.
- (K) 6 Plate. A laminated metal plate 0.142 inch thick, perforated with rows of round holes 6/64 inch in diameter.
- (L) 12 Plate. A laminated metal plate 0.142 inch thick, perforated with rows of round holes 12/64 inch in diameter.
- (M) 20 Plate. A laminated metal plate 0.142 inch thick, perforated with rows of round holes 20/64 inch in diameter.
 - (b) Principles Governing the Application of the Standards.
- (1) The following principles shall apply in determining the grades of Wild Rice:
- (A) Distinctly Low Quality. The determination of distinctly low quality shall be made on the basis of the lot as a whole at the time of sampling, or, for submitted samples, the sample as a whole at the time of grading.
- (B) Certain Quality Determinations. Each determination for rodent pellets, bird droppings, other animal filth, broken glass, castor beans, cockleburs, crotalaria seeds, insect infestation, odor, metal fragments, stones, unknown foreign substances, and any commonly recognized harmful or toxic substances shall be made on the basis of the sample as a whole. When a condition exists that may not appear in the representative sample, the determination may be made on the basis of the lot as a whole at the time of sampling.
- (C) Seeds, Unhulled Kernels, Related or Unrelated Foreign Material shall be on the basis of 500 grams cut from the original sample.
- (D) Moisture shall be made on the basis of 250 grams cut from the original sample.
- (E) Damaged kernels shall be on the basis of not less than 25 grams cut from the original sample.
- (F) Determination for grade shall be based on not less than 25 grams cut from the original sample.
- (G) Percentages. All percentages except for moisture, shall be on the basis of weight. The percentages of all factors shall be recorded to the nearest tenth of a percent.
- (H) Moisture. Water content of Wild Rice shall be determined by a device approved by the Secretary.
- (I) Length Determination. Lengths of kernels shall be determined by use of equipment or by any method which gives equivalent results.
- (J) Width Determination. Widths of kernels shall be determined by use of equipment or by a method which gives equivalent results.
- (K) All other determinations shall be made on the basis of the original sample.
 - (c) Classes.
 - (1) The following classes are applicable under these standards:
- (A) Large Class. Large Class Wild Rice shall be Wild Rice which is equal to or greater than 1.50 mm in width and has ninety percent (90.0%) or more of kernels that are more than 20/64 inch in length and not more than five percent (5.0%) less than or equal to 12/64 inch. Large Class Wild Rice shall contain not more than nine percent (9.0%) of Medium

- Class Wild Rice and not more than one percent (1.0%) of Thin Class Wild Rice.
- (B) Medium Class. Medium Class Wild Rice shall be Wild Rice which is equal to or greater than 1.15 mm and less than 4/64 inch in width and has eighty–five (85.0%) or more of kernels that are more than 20/64 inch in length and not more than five percent (5.0%) of kernels that are less than or equal to 12/64 inch in length. Medium Class Wild Rice shall contain not more than fifteen percent (15.0%) of Large Class Wild Rice and not more than five percent (5.0%) of Thin Class Wild Rice.
- (C) Thin Class. Thin Class Wild Rice shall be Wild Rice which is less than 1.15 mm in width and has eighty (80.0%) or more of kernels that are more than 20/64 inch in length and not more than five percent (5.0%) that are less than or equal to 12/64 inch in length. Thin Wild Rice shall contain not more than ten percent (10.0%) of Medium Class Wild Rice.
- (D) Short Wild Rice. Short Wild Rice shall be whole or pieces of Wild Rice kernels that has eighty percent (80.0%) or more of kernels that are more than 12/64 inch and equal to or less than 20/64 inch in length. The remaining twenty percent (20.0%) of Short Wild Rice shall be any combination of length greater than 6/64 inch.
- (E) Broken Wild Rice. Broken Wild Rice shall be whole or pieces of Wild Rice kernels that have eighty percent (80.0%) or more of kernels that are more than 6/64 inch and equal to or less than 12/64 inch in length and not more than one percent (1.0%) of kernels that are less than 6/64 inch in length.
- (F) Mixed Wild Rice. Mixed Wild Rice shall be Wild Rice that does not meet the requirements for Classes Large, Medium, Thin, Short, or Broken Wild Rice.
 - (d) Grades, Grade Requirements, and Grade Designations.
- (1) The following grades, grade requirements, and grade designations are applicable under these standards:
 - (A) Grades and Grade requirements

Grade	Unhulled Kernels	Seeds	Damaged Kernels	Unrelated Foreign Material	Total (Related & Unrelated Foreign Material
Basis	500 Grams	500 GR.	25 Grams	500 Grams	500 Grams
No. 1	3	2	3	0.1%	0.3%
No. 2	5	4	6	0.1%	0.3%
No. 3	8	6	9	0.1%	0.3%
No. 4	12	8	12	0.1%	0.3%
Sample Grade	>12	>8	>12	>0.1%	>0.3%

(B) Grade Designations. The Grade and Class Designation for Wild Rice shall include in the following order: the letters "CA"; the number of the Grade or the words "Sample Grade", as warranted; the words "or better", when applicable and requested by the applicant prior to inspection; the class of Wild Rice; and the term "Wild Rice".

NOTE: Authority cited: Sections 407, 52001 and 52002, Food and Agricultural Code. Reference: Sections 52001 and 52002, Food and Agricultural Code.

HISTORY

1. New section filed 4-16-97; operative 5-16-97 (Register 97, No. 16).

Article 2. Field Crops Inspection and Certification and Fees

§ 2840. Inspection Services Performed by the Director Under Agreement with Federal Grain Inspection Service.

(a) The Director shall have the authority pursuant to contract with the county involved to designate the county agricultural commissioner and employees of the agricultural commissioner to act as agents of the Director in the performance of services performed by the Director pursuant to cooperative agreements with, and delegations of authority by, the United States Department of Agriculture, Feeral Grain Inspection Service, pur-

suant to the provisions of the United States Grain Standards Act, as amended, 7 U.S.C. 71 et seq., 7 CFR Parts 800, 801, 802 and 810, or under related authority of the U.S. Secretary of Agriculture.

(b) County agricultural commissioners and employees of the agricultural commissioner shall be deemed employees of the Directory of Food and Agriculture when performing services designated in subsection (a) above and shall, when performing such services, be directly responsible to and under control of the Director of Food and Agriculture to the same extent as employees of the Director.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 482, 483, 2281 and 52002, Food and Agricultural Code.

HISTORY

1. New section filed 11-13-87; operative 12-13-87 (Register 87, No. 47).

§ 2841. Fees and Charges.

All fees, as fixed by the director, are for services performed during regular work hours of business at or near inspection offices, and at such other inspection points as may be established from time to time. Additional charges will be made to pay for travel, excessive standby time, overtime, mileage, shipping of samples, reporting by telephone or telegraph, and any other costs which are not of normal occurrence.

The director may collect such fees and charges in advance of performing the services but is not required to do so if in his opinion the benefits of such services would be lessened by such payments.

Invoices for fees and charges shall be rendered monthly and are due and payable within 30 days of the date of the invoice. If the invoice is not paid within the time specified, services may be withheld until the delinquent account has been paid and there has been deposited with the department a cash deposit guaranteeing the payment of future services. The amount to be deposited shall be determined by the director based upon expected charges. Additional deposits may be required for services requested beyond those covered by the initial deposit.

§ 2845. Hop Inspection Fees.

HISTORY

1. Repealer filed 11-29-62; designated effective 1-2-63 (Register 62, No. 24).

§ 2846. Peanuts, Unshelled or Shelled. Inspection Fees.

HISTORY

1. Repealer filed 7–29–60; effective thirtieth day thereafter (Register 60, No. 16).

§ 2847. Rice Inspection Fees.

History

1. Repealer filed 11-29-62; designated effective 1-2-63 (Register 62, No. 24).

§ 2848. Inspection Fees and Charges, Miscellaneous Commodities and Services.

HISTORY

1. Repealer filed 11-29-62; designated effective 1-2-63 (Register 62, No. 24).

Subchapter 4. Grain Warehouses

HISTORY

1. Repealer of Group 4 (Sections 2878–2899, not consecutive) by operation of Chapter 1344, 1969 Statutes (Register 73, No. 12). For prior history, see Register 58, No. 3.

Subchapter 5. Rice Identity Preservation

Article 1. Definitions

§ 2850. Terms and Definitions.

For the purposes of this group:

- (a) "Planted area" means that portion of the field that may be planted to the rice variety specified in that section.
- (b) "Dryer" means a facility where rice is transported to lower its moisture content.
- (c) "Banking out" means the process of transferring rice from the harvester to a trailer.
- (d) "Broadcasting" means the action of spreading rice seeds on the surface of the field by hand or machine.
- (e) "Foundation seed" means seed stock produced from breeder seed by or under the direct control of an agricultural experiment station. Foundation seed is the source of certified seed, either directly or through registered seed organizations.
- (f) "Basic seed" means a class of seed produced under the responsibility of the breeder according to the generally accepted practices for the maintenance of the cultivars that is intended for the production of Certified Seed.

NOTE: Authority cited: Section 55022, Food and Agricultural Code. Reference: Sections 55040 and 55047, Food and Agricultural Code.

HISTORY

1. New subchapter 5 (articles 1–3, sections 2850–2857), article 1 (section 2850) and section filed 1–27–2004; operative 1–27–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 5).

Article 2. Production and Handling Protocols

§ 2851. Production and Handling of Conventionally Bred Specialty Rice.

Except as provided in subsection (b), the protocol specified in this section shall apply to the production and handling of rice varieties A–201, A–301, Calmati 201, Akita Komachi, Calhikari 201, Calmochi 101, Calpearl, Hitomebore, Koshihikari, NFD 108, NFD 109, SP–2, Sasanishiki, Surpass, WRS–4431, Arborio, Calriso, and koganemochi.

- (a) Protocol:
- 1. The producer shall keep any verifiable attribute as evidence of the seed grown in the planted area; such as, but not limited to, the bill of sale indicating the seed variety, seed certification number, etc.
 - 2. Seeding may be by air, ground seeding or broadcasting.
- 3. There shall be a buffer zone with a distance of at least twenty (20) feet between a field planted with rice specified in this section and a field planted with any type of rice not specified in this section. The producer shall keep the buffer zone clear of rice seedlings and rice plants by removing any such rice and avoiding irrigation of the area to prevent germination of the rice. Foundation or basic seed produced in accordance with industry seed production standards shall have a buffer zone of at least ten (10) feet from any other rice not specified in this section.
- 4. Producers shall clean all planting equipment after it is used to plant rice, or require that any person who plants rice for the producer clean the planting equipment. Cleaning may be by air, liquid or other means that removes all rice seed from the planting equipment.
- 5. Producers shall clean all harvesting and transportation equipment after it is used to harvest or transport rice, or require that any person who performs these activities clean the equipment. Cleaning may be by air, liquid or other means that removes all rice seed from the harvesting and transportation equipment.
- 6. The person in physical possession of rice specified in this section shall ensure that the container or conveyance truck holding the rice continually exhibit a tag or mark that is clearly and immediately identifiable. The tag or mark shall specify lot number, variety, field number, and grower name.
- 7. Handlers and warehouse operators shall clean all conveyance and storage equipment to prevent mixing of rice. Cleaning may be by air, liquid or other means that removes all rice seed from the conveyance and storage equipment.
- 8. Rice varieties specified in this section may only be mixed for commercial purposes.
- (b) Any person who proposes to use a protocol more restrictive than subsection (a) shall submit the protocol to the Committee for verification. Any such proposal shall be submitted to the Committee by December 31 of the year preceding the growing season in which the rice will be produced or handled.
- (c) Compliance with protocols used by persons subject to this section may be audited and verified by the Commission. All protocol records shall be retained for two years and shall be submitted for inspection at a reasonable time upon written demand of the Commission or its duly authorized agent.

NOTE: Authority cited: Section 55022, Food and Agricultural Code. Reference: Sections 55040(b)–(c), 55045(a)–(c) and 55047, Food and Agricultural Code.

HISTORY

1. New article 2 (sections 2851–2852) and section filed 1–27–2004; operative 1–27–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 5)

§ 2852. Production and Handling of Colored Bran Rice.

The following protocol specified in this section shall apply to the production and handling of rice varieties LBJ 489 "Black Japonica," LWE

218 "Wehani," HKB 102 "Hong Kong Black," Sun West "Rojito," and Sun West "Black Rice."

- (a) Protocol:
- (1) Planting
- (A) The producer shall keep any verifiable attribute as evidence of the seed grown in the planted area; such as, but not limited to, the bill of sale indicating the seed variety, seed certification number, etc.
 - (B) Aerial application is prohibited.
- (C) Producers shall plant by ground seeder only or require that any person who plants for the producer do so by ground seeder only.
- (D) There shall be a buffer zone with a distance of at least twenty (20) feet between a field planted to rice specified in this section and a field planted with any type of rice not specified in this section. The producer shall keep the buffer zone clear of rice seedlings and rice plants by removing any such rice and avoiding irrigation of the area to prevent germination of the rice. Foundation or basic seed produced in accordance with industry seed production standards shall have a buffer zone of at least ten (10) feet from any other rice not specified in this section.
- (E) Producers shall use a tarp or other material at least six mil thick to cover loads of rice seed to prevent dispersal, or require that any person who performs this activity for the producer prevent dispersal of the rice seed.
- (F) Producers shall require that rice seed is delivered and loaded into the ground seeder at the field being planted.
- (G) Producers shall clean all planting equipment after it is used to plant rice, or require that any person who plants rice for the producer clean the planting equipment. Cleaning may be by compressed air, liquid or other means that removes all rice seed from the planting equipment.
- (H) Producers shall maintain written records known as "clean out logs" that specify the name of the person, time, date, and location that the clean out occurred on all planting equipment, or require that any person who cleans the planting equipment maintains clean out logs.
 - (2) Production
- (A) Producers shall prevent dispersal of rice seed beyond the planted area.
- (B) Producers shall inspect all buffer zones and eliminate rice seedlings and rice plants.
- (C) Producers shall place screens on all drains during field flooding to prevent movement of rice seeds or rice seedlings. Screen mesh diameter shall be no larger than 1/8 inch.
- (D) Fields planted with rice specified in this section shall not be planted with any other rice not subject to this section in the following year. Producers shall inspect such fields for rice volunteers for one year and all rice volunteers shall be removed and destroyed.
 - (3) Harvesting
- (A) Producers shall prevent the dispersal of rice beyond the planted area when operating harvesting equipment, or require that any person who operates the harvesting equipment for the producer prevent the dispersal of rice beyond the planted area.
- (B) Banking out of rice and loading of trailers shall be performed at the field being harvested or at designated areas. Designated areas mean uncultivated land adjacent to the planted area. The route from the field and the designated areas may be located in the buffer zone.
- (C) Producers shall clean all harvesting equipment after it is used to harvest rice, or require that any person who harvests for the producer clean the equipment in the field or designated area. All material resulting from the cleaning must be collected and returned to the field where the crop was grown. Cleaning may be by compressed air, liquid or other means that removes all rice seed from the harvesting equipment.
- (D) Producers shall maintain written records known as "clean out logs" that specify the name of the person, time, date, and location that the clean out occurred on all harvesting equipment, or require that any person who cleans the harvesting equipment maintains clean out logs.

- (E) The owner or operator of equipment that has harvested rice specified in this section shall notify the owner or operator of the next rice field in which the equipment is used, that the equipment has harvested such rice.
 - (4) Transporting
- (A) Producers shall use a tarp or other material at least six mil thick to cover loads of harvested rice to prevent dispersal, or require that any person who performs this activity for the producer prevent dispersal of the harvested rice.
- (B) A harvest delivery receipt specifying the name of the producer, harvest location, rice variety, and weight shall accompany all rice loads to storage.
- (C) The person in physical possession of rice specified in this section shall ensure that the container or conveyance truck holding the rice continually exhibit a tag or mark that is clearly and immediately identifiable. The tag or mark shall specify lot number, variety, field number, and grower name.
- (D) Producers shall clean all transportation equipment after it is used to transport rice, or require that any person who transports for the producer clean the equipment. Cleaning may be by air. liquid or other means that removes all rice seed from the transportation equipment.
- (E) Producers shall maintain written records known as "clean out logs" that specify the name of the person, time, date, and location that the clean out occurred on all transportation equipment, or require that any person who cleans the transportation equipment maintains clean out logs.
- (F) Laboratories that receive samples of rice specified in this section shall not mix the rice for commercial purposes after it is used for testing or analysis.
 - (5) Drying and Storage
- (A) Handlers and warehouse operators shall maintain physical separation of each rice variety received to prevent mixing of rice samples.
- (B) Handlers and warehouse operators shall clean all conveyance and storage equipment to prevent mixing of rice. Cleaning may be by compressed air, liquid or other means that removes all rice seed from the conveyance and storage equipment.
- (C) Handlers and warehouse operators shall maintain written records known as "clean out logs" that specify the name of the person, time, date, and location that the clean out occurred on all conveyance and storage equipment.
- (D) Handlers and warehouse operators shall document product receipt and delivery. Documentation shall include harvest delivery receipt and weight certification matching the field and rice variety being harvested. Final sales records and all other documentation shall be available for audit.
- (b) Compliance with the protocol used by persons subject to this section may be audited and verified by the Commission. All protocol records shall be retained for two years and shall be submitted for inspection at a reasonable time upon written demand of the Commission or its duly authorized agent.

NOTE: Authority cited: Section 55022, Food and Agricultural Code. Reference: Sections 55040(b)–(c), 55045(a)–(c) and 55047, Food and Agricultural Code.

1. New section filed 1–27–2004; operative 1–27–2004 pursuant to Government

Code section 11343.4 (Register 2004, No. 5).

§ 2853. Scope of Coverage.

Any person, or his or her duly authorized representative (respondent), may contest a notice of alleged violation and request an informal hearing as specified in this article.

Article 3. Informal Hearing Procedures

NOTE: Authority cited: Sections 407 and 55022, Food and Agricultural Code. Reference: Sections 55045 and 71131, Food and Agricultural Code; and Sections 11400.20 and 11445.20, Government Code.

HISTOR

1. New article 3 (sections 2853–2857) and section filed 1–27–2004; operative 1–27–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 5).

§ 2854. Filing Deadlines and Procedures.

- (a) The respondent may request an informal hearing in writing and file the request with the California Rice Commission (Commission).
- (b) The request for an informal hearing shall be received by the Commission within 30 days from the date of the notice of alleged violation.
- (c) The request for an informal hearing shall be received by the Commission within 72 hours from the date of the notice of alleged violation if the Commission states in the notice that it intends to take action to enjoin the movement of rice from a specified site.
- (d) Failure to file a timely request for an informal hearing constitutes a waiver of the respondent's right to contest the notice of alleged violation

NOTE: Authority cited: Sections 407 and 55022, Food and Agricultural Code; and Section 11400.20, Government Code. Reference: Sections 55040, 55045 and 71131, Food and Agricultural Code.

HISTORY

1. New section filed 1–27–2004; operative 1–27–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 5).

§ 2855. Informal Hearing Schedule and Notification.

- (a) The Commission shall schedule an informal hearing within 30 days from the receipt of the request for an informal hearing from the respondent.
- (b) The Commission shall schedule the informal hearing to be held within 72 hours from the receipt of the request for an informal hearing if the Commission states in the notice that it intends to take action to enjoin the movement of rice from a specified site.
- (c) Upon scheduling an informal hearing, the Commission shall provide notice of the informal hearing to the respondent, which shall contain the following information:
 - (1) Date, location, and time of the informal hearing;
- (2) Commission telephone and facsimile numbers, and any other relevant contact information;
 - (3) Subject matter of the alleged violation; and,
- (4) Any other information or documentation relative to the alleged violation.

NOTE: Authority cited: Sections 407 and 55022, Food and Agricultural Code; and Section 11400.20, Government Code. Reference: Sections 55045 and 71131, Food and Agricultural Code.

HISTORY

1. New section filed 1–27–2004; operative 1–27–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 5).

§ 2856. Conduct of Informal Hearing.

- (a) Informal hearings shall be conducted as follows:
- (1) The Commission shall designate a person who will preside as the hearing officer.
- (2) The standard of proof to be applied by the hearing officer shall be the preponderance of the evidence. The burden of proof shall be on the respondent.
- (3) Informal hearings may be conducted in person or by telephone at the discretion of the hearing officer.
- (4) The decision of the hearing officer shall be in writing, with a statement of findings and the conclusion, and shall be issued within 14 days of the completion of the informal hearing.
- (5) The decision shall be served on the respondent either by personal service or by facsimile transmission upon issuance of decision.
- (6) The decision shall be effective immediately and shall be final unless appealed pursuant to Section 71131, Food and Agricultural Code.
- (7) The Commission shall provide a copy of the decision to any interested party upon written request.

Chapter 3. Entomology and Plant Quarantine

Subchapter 1. Apiaries

Article 1. Apiary Inspection Procedures

§ 2924. Specimens for Laboratory Examination.

The inspector may remove from any apiary specimens of bees or comb for laboratory examination.

NOTE: Authority cited: Sections 407 and 29032, Food and Agricultural Code. Reference: Sections 29151, 29154, 29161 and 29162, Food and Agricultural Code.

HISTORY

- 1. Amendment of Group 1 (Sections 2924–2926 and 2976–2978) filed 1–30–63; effective thirtieth day thereafter (Register 63, No. 2). For prior history, see Register 58, No. 3.
- 2. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).

§ 2925. Marking of Diseased Colonies.

Upon finding a colony to be diseased with American foulbrood the inspector shall plainly mark on each hive body, super and cover of such diseased colony the letters AFB preceded by a numeral indicating the total number of hive bodies and supers occupied by the diseased colony, followed by the date and the initials of the inspector.

NOTE: Authority cited: Sections 407 and 29032, Food and Agricultural Code. Reference: Section 29154, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).

§ 2926. Written Consent for Abatement of Disease.

The inspector may abate the disease in the manner set forth in Sections 29204 and 29207 of the Food and Agricultural Code prior to the expiration of the abatement notice upon consent of the owner or person in charge or in possession of the diseased apiary. Such consent shall contain a release of liability in a form prescribed by the Department.

NOTE: Authority cited: Sections 407 and 29301, Food and Agricultural Code. Reference: Sections 29204 and 29207, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).
- 2. Amendment of section and Note filed 4–24–97; operative 5–24–97 (Register 97, No. 17).

Article 1.1. Bee Colony Assessments

§ 2950. Assessment.

Each beekeeper, apiary owner, apiary operator or the person in possession of any apiary shall pay to the Director an annual fee in the amount stated in section 2951 based upon the largest number of colonies of bees in California under his ownership, possession or control during the preceding 12 month period.

NOTE: Authority cited: Sections 407 and 29032, Food and Agricultural Code. Reference: Section 29301, Food and Agricultural Code.

HISTORY

- 1. New Article 1.1 (Sections 2950–2954) filed 6–29–63 as an emergency; effective upon filing (Register 73, No. 26).
- 2. Certificate of Compliance filed 8-28-73 (Register 73, No. 35).

- 3. Editorial correction (Register 82, No. 1).
- 4. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).
- 5. Editorial correction of NOTE (Register 83, No. 48).

§ 2951. Assessment Fee.

The apiary assessment fee is 15 cents (\$0.15) per colony of honey bees.

NOTE: Authority cited: Sections 407 and 29032, Food and Agricultural Code. Reference: Section 29301, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).
- Amendment filed 6–2–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 23).
- Amendment filed 6-7-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 23).

§ 2952. Penalties.

A penalty fee of one-half the amount due shall be added to the required fee for all payments which are not paid within 31 days after receipt of notice from the Director, mailed to the business address, that payment is due; or which are delinquent 31 days and due from a person who has failed to file his business address with the Director.

NOTE: Authority cited: Sections 407 and 29032, Food and Agricultural Code. Reference: Section 29302, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).

§ 2953. Filing of Business Address.

Each beekeeper, apiary owner, apiary operator or person in possession of any apiary who has under his ownership, possession or control any colonies of bees in California during the reporting year shall file with the Director his business address and telephone number and any changes thereto, within 15 days after obtaining such ownership, possession or control.

NOTE: Authority cited: Sections 407 and 29032, Food and Agricultural Code. Reference: Section 29302, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).

§ 2954. Payment Form.

Each assessment payment shall be accompanied by a duly completed return on a form available from the Director and shall certify under penalty of perjury that the information on the return is true and correct.

NOTE: Authority cited: Sections 407 and 29032, Food and Agricultural Code. Reference: Sections 29301 and 29302, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).

Article 2. Construction and Operation of Licensed Wax-Salvage Plants

§ 2976. Definitions.

All terms defined in the Food and Agricultural Code, when used in this article, have the meaning therein defined, unless a different meaning is apparent from the context. In addition, as used in this article:

- (a) "Plant" means the structure and equipment employed by a wax-salvage plant licensed under the provisions of Article 7 (commencing with Section 29191) of the Food and Agricultural Code.
- (b) "Enclosure" means the room or building of a plant constructed in accordance with the specifications in this article in which wax-salvage operations are performed.
- (c) "Contaminated" means infected, exposed to infection, or liable to carry infection, with the pathogen causing American foulbroad disease of bees.

 $Note: Authority\ cited: Sections\ 407\ and\ 29032, Food\ and\ Agricultural\ Code.\ Reference: Sections\ 29192\ and\ 29194,\ Food\ and\ Agricultural\ Code.$

HISTORY

1. Editorial correction of NOTE filed 10-21-82 (Register 82, No. 43).

§ 2977. Uniform Specifications for Plant Installations.

Plants which may be licensed in California to salvage wax, hives and appliances from diseased apiaries shall be constructed in accordance with the following uniform specifications:

- (a) Local Restrictions. Plant installations shall comply with all local ordinances, including those regarding building, sanitation, and zoning.
- (b) Floors shall be of smooth finish concrete or other suitable water—tight material and shall be sloped toward an adequate drainage outlet connected directly to a settling tank.
 - (c) A sanitary cove shall be provided at the junction of floor and walls.
- (d) Walls and ceiling may be of any suitable rigid material. All joints, cracks, and openings, including doors, windows and vents, shall be made bee-tight.
- (e) Windows and vents shall be double screened with wire screen not less than 16 mesh to the inch, the screens not less than three inches apart.
- (f) Vestibule. Any entrance to the enclosure shall be provided with a vestibule which shall be not less than six feet in length, either tightly walled or double screened in the same manner as specified for windows and vents, and with a tightly fitted door at each end.
- (g) Doors shall be solid, or double screened in the same manner as specified for windows and vents.
- (h) Vats shall be of durable construction and shall be equipped with an adequate heating device or provided with an adequate source of steam capable of maintaining water or lye water solution at the boiling point continuously for the required period of time. Each vat shall be provided with a drainage outlet connected directly to a settling tank or as may be approved by the Director.
- (i) Drainage from the floor or vats shall flow directly into a settling tank and thence directly into a sewage disposal system or a cesspool, except that the Director may prescribe other suitable means of disposal for the lye water solution.
- (j) Settling tanks for trapping wax and other solids in waste water shall have adequate capacity to contain all drainage water from all source connections during continuous operation of the plant. Settling tanks located outside the enclosure shall be underground and tightly covered or otherwise constructed in a manner that will make their contents inaccessible to bees.
- (k) Cesspools shall have adequate capacity to contain all drainage water from all source connections during continuous operation of the plant and shall be tightly capped or covered.
- (1) Drainage connections located outside of the enclosure shall be watertight pipe and permit no leaks or seepage of waste water accessible to bees.
- (m) An incinerator or other adequate means of completely disposing of contaminated material shall be provided to the satisfaction of the Director.
- (n) Pallets shall be provided in the enclosure for handling of hives, appliances and wax which have undergone treatment.

NOTE: Authority cited: Sections 407, 29032, 29192 and 29193, Food and Agricultural Code. Reference: Sections 29192 and 29193, Food and Agricultural Code.

1. Editorial correction of NOTE filed 10–21–82 (Register 82, No. 43).

§ 2978. Operation of Licensed Wax-Salvage Plants.

All licensed wax–salvage plants in California shall be operated in accordance with the following:

- (a) A record shall be kept at the plant itemizing all diseased hives, appliances and comb received for treatment and showing the name and address of the owner of such diseased material. Such records shall be made available to the inspector upon request.
- (b) Contaminated material received at a plant shall at no time be exposed to robbing by bees.
- (c) All diseased hives, appliances and comb awaiting treatment at the plant shall be stored within the enclosure.
- (d) All salvage operations shall be performed within the enclosure, except as provided in Subsection (j).

Page 258.2

- (e) Doors into the vestibule shall remain closed except during entry or exit.
- (f) No bees shall be permitted to escape from the enclosure or vestibule.
- (g) All comb and the contents of all frames shall be held not less than 30 minutes in boiling water in a vat.
 - (h) Honey shall not be salvaged.
- (i) The frames, after removal of their contents, shall be boiled not less than 20 minutes in a solution of lye water in a vat.
- (j) The hive bodies, supers, covers and bottom boards shall be boiled not less than 20 minutes in a solution of lye water in a vat or shall be disinfected by scorching. Such articles may be removed from the enclosure for immediate scorching at the premises provided they are free of bees, honey and adhering comb.
- (k) Hives and appliances having surfaces which cannot be disinfected by scorching shall be boiled not less than 20 minutes in a solution of lye water in a vat.
 - (1) The lye water solution shall be prepared using not less than one

- pound of lye to each 10 gallons of water. Before treated articles are removed from the lye water solution, all scum and other floating waste shall be skimmed or otherwise removed from the surface of the solution. After removal of treated articles, the vat shall be drained and new solution prepared or sufficient lye shall be added to restore the solution to its original strength.
- (m) Hives, appliances and wax, which have undergone treatment as herein prescribed, may be removed from the enclosure providing such treated articles are immediately placed on clean pallets to prevent contact with the floor and are otherwise handled within the enclosure in a manner to prevent contact with any contaminated object or material.
- (n) All solid refuse, including press cake, awaiting disposal, treatment or processing shall be kept within the enclosure.
- (o) Solid refuse which has been boiled 20 minutes in the lye water solution or press cake may be removed from the enclosure and buried at a site which has been approved by the Agricultural Commissioner of the county in which the plant is located.

[The next page is 259.]

- (p) All solid refuse which has not been boiled 20 minutes in the lye water solution shall be burned to ash in an incinerator at the premises, except that dry press cake may be delivered to a solvent extraction plant for further processing.
- (q) If the incinerator is detached from the enclosure, no contaminated material or material from within the enclosure shall be placed in the incinerator except during the actual process of burning, and no unburned combustible material shall be left in the incinerator.
 - (r) Floors shall be cleaned at the end of each day's operation.
- (s) Settling tanks located outside the enclosure shall at no time be open when bees are flying.
- (t) The contents of a cesspool containing waste from an enclosure may be emptied only with the approval of the Agricultural Commissioner of the county in which the plant is located, under such safeguards as the Commissioner may prescribe to prevent exposure of contaminated waste to bees at any time during the removal, transportation and ultimate disposal of such waste.

HISTORY

- New Article 3 (Section 2990) filed 9-12-84 as an emergency; effective upon filing (Register 84, No. 38). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-10-85.
- 2. Order of Repeal of 9-12-84 emergency order filed 1-22-85 by OAL pursuant to Government Code Section 11349.6(b) (Register 85, No. 5).
- 3. New Article 3 (Section 2990) filed 1–22–85 as an emergency; effective upon filing (Register 85, No. 5). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–22–85.
- 4. Certificate of Compliance filed 4-17-85 (Register 85, No. 16).
- 5. Repealer filed 2-5-88, operative 3-6-88 (Register 88, No.7).

§ 2991. African Honey Bee Quarantine.

NOTE: Authority cited: Sections 407, 5322, 29032 and 29061, Food and Agricultural Code. Reference: Sections 5006, 29003, 29006, 29007, 29061 and 29063, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-1-85 as an emergency; effective upon filing (Register 85, No. 32). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11-29-85.
- Repealed by operation of Government Code Section 11346.1(g) (Register 87, No. 2).

§ 2992. Honey Bee Tracheal Mite Control.

NOTE: Authority cited: Sections 407, 29110 and 29301, Food and Agricultural Code. Reference: Sections 29009, 29070, 29072, 29073, 29110 and 29111, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-13-88; operative 8-12-88 (Register 88, No. 29).
- 2. Repealer filed 3-5-97; operative 4-4-97 (Register 97, No. 10).

§ 2993. Varroa Mite Exterior Quarantine.

NOTE: Authority cited: Sections 407, 29110, and 29301, Food and Agriculture Code. Reference: Sections 29110 and 29111, Food and Agriculture Code.

HISTORY

- New section filed 6-10-88 as an emergency; operative 6-10-88 (Register 88, No. 25). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 10-10-88.
- Certificate of Compliance including amendment of subsection (d) transmitted to OAL 10-11-88 and filed 11-10-88 (Register 88, No. 47).
- 3. Repealer filed 3-5-97; operative 4-4-97 (Register 97, No. 10).

Subchapter 2. Nursery Stock

(Originally Printed 7-25-45)

Article 1. Registration and Certification of Citrus Trees

§ 3000. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. New Article 1 (Sections 3000 through 3003) filed 7–9–62; effective thirtieth day thereafter (Register 62, No. 14).
- 2. Amended Article 1 filed 6–18–71; effective thirtieth day thereafter (Register 71, No. 25).
- 3. Amendment filed 12–13–73; effective thirtieth day thereafter (Register 73, No. 50).
- 4. Renumbering and amendment of former Section 3000 to Section 3001 and new Section 3000 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3001. Definitions.

- (a) "Virus-infected" means infected by any of the virus or virus-like diseases listed in this article.
- (b) "Index" means testing a plant for infection of a specific virus disease by grafting with tissue from it to an indicator plant or by other means approved by the director. Information regarding such other means may be obtained from the Department's Pest Exclusion Unit.
- (c) "Virus-tested" means tested for specific virus or virus-like diseases listed in this article using procedures as outlined in this article.
- (d) "Off-type" means different from the variety for which registration or certification had been applied.
- (e) "Selected tree" means a seed or scion tree for which registration is requested.
- (f) "Registered" means a registration number has been assigned by the Department to a seed or scion tree that has been inspected and tested in accordance with the provisions of this article to serve as a source of propagating material for certified nursery stock.
- (g) "Foundation block" means an outdoor planting of citrus trees, maintained by the University of California, in which trees may be registered to serve as a primary source of propagating material.
- (h) "Protected foundation block" means an indoor planting, maintained by state or federal agencies, in which trees may be registered to serve as a primary source of propagating material.
- (i) "Nursery increase block" means a planting of citrus nursery stock, propagated directly from registered trees.
- (j) "Certified block" means a planting of citrus nursery stock for the production of certified nursery stock.
- (k) "Foundation stock" means propagating material produced from a registered tree in any foundation block or from properly indexed material propagated and grown in an approved state, federal, or university glasshouse or screenhouse.
- (l) "Registered stock" means propagating material from a registered tree.
- (m) "Registered increase stock" means propagating material from a nursery increase block.
- (n) "Certified citrus nursery stock" means trees propagated by using scions from registered stock, and certified in accordance with the provisions of this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3001 to Section 3002 and renumbering and amendment of former Section 3000 to Section 3001 filed 12–30–83; effective thirtieth day thereafter. (Register 84, No. 1). For prior history, see Register 73, No. 50.

§ 3002. General Provisions.

Participation in this program is voluntary and may be withdrawn at the option of the applicant. Except as otherwise specified, certification, registration, approvals, determinations, inspections, index tests and supervision shall be conducted by the Department.

- (a) Except as otherwise provided, certification is based solely on visual inspections of sample plants from each variety in a planting which are found not to exceed the percentages stated in Section 3003(g)(7).
- (b) Responsibility of Applicant: The applicant shall be responsible for the:
 - (1) Selection of the tree for testing.
- (2) Selection of the location and of the proper maintenance of any plants being grown under the provisions of this article.
- (3) Application for the registry or re–registry of plants being grown under the provisions of this article.
 - (4) Maintaining the identity of all plants entered in this program.
 - (5) Farming and sanitation practices.
- (6) Notifying the Department of the date and material of all pest control treatments applied in the plantings for which inspections must be made.
- (7) Notifying the Department at least one week in advance of the harvesting as to when it will commence.
- (8) Placing the information required on each certification tag furnished by the Department including the participant's name and the block number.
- (c) Location of Plantings: Each planting location shall be subject to approval and shall be in an area having minimal risks for spread of infectious pests by drainage, flooding, irrigation, or by other means.

A nursery increase block and certified block shall be located not less than 50 feet distant from any established citrus tree. Each nursery increase block and certified block shall be a separate planting sufficiently apart from any other planting to maintain its identity.

Selected seed or scion trees for registration may be selected from any location with the approval of the Department.

(d) Maintenance of Plants: All plants entered in this program shall be kept in a thrifty growing condition and pests shall be effectively controlled. Suitable precautions shall be taken in cultivation, irrigation, movement and use of equipment, and in other farming and nursery practices to guard against spread of pests to plants entered in this program.

To assure that inspections may be made properly and to provide close working knowledge of field operations, the applicant shall notify the Department in advance of any planting, propagating or pruning operation or removal of nursery stock or trees in any planting entered in this program.

All pruning shears, saws or other implements shall be disinfected in an approved manner prior to any fruit picking or cutting of any selected or registered tree, or any clonal selection within an increase block or certified block.

Any plant found to be off-type, showing symptoms characteristic of stubborn disease, or infected with a virus, may be required to be removed immediately from any planting. Approval may be given to remove off-type parts of a registered tree without revoking registration of the tree.

Labeling of each selected or registered tree and of nursery stock growing in plantings entered in the program to identify it as to rootstock and as to its scion source shall be done in an approved manner.

- (e) Eligibility and Planting Requirements:
- (1) Rootstock Propagation: The rootstock of any plant entered in the program may be grown from registered seed or it may be vegetatively propagated providing the propagating wood meets the same requirements as the scion to be used for the plant.
- (2) Foundation Block: A selected tree may be planted in a foundation block when propagated with a scion from a registered tree in a foundation block or when propagated from a greenhouse—or screenhouse—grown scion that has passed the short–term inspection and testing procedures required in Section 3003 and has completed or is under the cachexia–xyloporosis index. The tree may be registered when inspection and testing

procedures prescribed in Section 3003 have been completed with satisfactory results and when the tree has produced sufficient fruit to give acceptable evidence that it is not off-type. A selected tree found to be ineligible for registration shall be removed from a foundation block.

- (3) Selected Trees: Any individual orchard, yard, or container seed or scion tree may be selected for inspection and indexing for registration under the terms of this article.
- (4) Nursery Increase Block: Scions used to propagate the nursery stock in a nursery increase block shall be from registered trees. Within 18 months of propagation, scions may be taken from the block for use in growing certified nursery stock. Trees in a nursery increase block also may be certified.
- (5) Certified Block: Scions used to propagate the nursery stock in a certified block for certification shall be from registered trees or from a nursery increase block.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3002 to Section 3003 and renumbering and amendment of former Section 3001 to Section 3002 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Registers 77, No. 31 and 73, No. 50.

§ 3003. Inspection and Testing Procedures.

Inspection and indexing procedures prescribed in this article may be made by the University of California, the United States Department of Agriculture, or the Department and shall be conducted in an approved manner at times determined as suitable by the Department. In the indexing procedures required in this section, the Department may approve the substitution of other indicator plants, if equally suitable, or may approve indexing on a fewer number of indicator plants, or may approve other procedures for testing for virus infection if determined equally suitable.

Additional inspections or indexing other than provided in this section may be required by the Department if seasonal conditions or other factors tend to obscure virus symptoms or make adequate inspection impossible, or when virus infection is suspected, or when virus symptoms may be masked in a particular variety.

The Department shall assign an identification numbered tag to a selected seed or scion tree pending registration.

(a) Trees in a Foundation Block: The scion parent of any tree planted in a foundation block shall have been indexed for and not found to be infected with the specific viruses listed by using the specific indicator plants listed in the following table:

Indicator Plant Disease
Citrus excelsa
Dweet tangor psorosis, concave gum
Etrog citron Exocortis
Mexican lime Tristeza, vein enation
seedling yellows, yellowveir
Sour orange seedling yellows
Sweet orange psorosis, concave gun
Rusk citrange citrange stun
Parson's special mandarin cachexia–xyloporosis

Only the tristeza and exocortis indexes shall be required if the scion parent of the selected tree is a registered tree in a foundation block. Trees to be planted in a foundation block must be grown in an approved glasshouse or screenhouse.

Following planting in a foundation block, a tree shall be indexed for tristeza, vein enation, psorosis and exocortis viruses within the 12-month period before registration. In subsequent years after registration, tristeza indexing shall be repeated within one year prior to budwood collection from a registered tree. Each registered tree shall be reindexed for exocortis virus every third year and for psorosis virus every sixth year. Each foundation block tree shall receive one or more visual inspections each year. The fruit of bearing trees, except lemons, shall also be inspected each year after color break.

(b) Testing for virus or viroid infection of scion trees other than those in a foundation block planting shall be by use of specific methods or indi-

Page 260 Register 97, No. 17; 4-25-97

cator plants for specific virus or virus-like diseases as stated below and in the following table:

 Indicator Plant
 Disease

 Mexican lime
 Tristeza

 Sweet orange
 Psorosis, concave gum

 Etrog citron
 Exocortis

For the production of increase and certified block plantings propagated from registered trees, indexing for tristeza virus is required each year in which approval for cutting budwood is requested; indexing for psorosis and exocortis is required every third year.

Each tree shall be given one visual inspection each year in which testing is requested.

- (c) A selected seed tree and trees adjacent to it shall be given at least one visual inspection by the Department prior to registration. The selected seed tree shall be index-tested for the psorosis disease using the sweet orange indicator plant or other means of detection approved by the director. Information regarding such other means may be obtained from the Department's Pest Exclusion Unit.
- (d) Order of Indexing: Indexing shall be made in the order in which applications are received and as indicator host plants are available.
- (e) Registration Period: Registration for a scion tree is for a three—year period and six years for a seed source tree.

Registration may be continuous provided application for inspection and testing is filed with the Department prior to the expiration date of registration.

- (f) Nursery Increase Block, Certified Block: One visual inspection shall be made each year of plants in a certified block. In a nursery increase block the inspection shall be made before buds are cut.
- (g) Refusal or Cancellation of Registration or Certification: Registration or certification may be refused or canceled for any plants in part or all of a planting if:
 - (1) The requirements of this article have not been met.
 - (2) A selected or registered plant is found to be off-type.
- (3) A tree is found to be within the range of possible root graft of another tree found to be virus—infected.
- (4) The pest cleanliness requirements for nursery stock, Section 3060.2 of the nursery inspection regulations, have not been met.
- (5) For any reason the identity of a plant becomes uncertain or has not been properly maintained.
 - (6) A registration number is misused or misrepresented.
- (7) An accumulated percentage of more than one-half percent of the trees of the same variety on the same kind of rootstock are found virus-infected in a nursery increase block or more than two percent virus-infected or stubborn affected trees in a certified block. Either visual inspections or the results of indexing or both may be used as a basis for calculating the number of trees that may be infected.
 - (8) A tree is found to be in a high risk area for tristeza.
- (9) A tree is found, by current procedures, to be infected with any of the virus or virus—like diseases listed in subsections (a) or (b).
- (10) At the discretion of the Department, a seed tree determined to be or likely to be virus—infected with a virus other than psorosis may be reistered when it is growing in an area where such virus is known to be prevalent and is not being subjected to eradication or control by the Department

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

Renumbering and amendment of former Section 3003 to Section 3004 and renumbering and amendment of former Section 3002 to Section 3003 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 77, No. 31.

§ 3004. Application and Fees.

(a) Application. The applicant shall furnish information requested and shall give consent to the Department to take plant materials from any planting for reinspection or indexing purposes. An application shall be submitted for the acceptance of any plant or planting and for subsequent inspections, approvals, registration or certification, and may be refused

unless made sufficiently in advance of time of planting to permit the Department to establish the origin of the stock, to determine the suitability of the location, and to supervise any treatment that may be required.

(b) Fees. Fees established in this article are payable in advance of the work to be done and are for the sole purpose of defraying expenses incurred in the inspection, indexing, approval, registration and certification procedures herein provided and are not to obtain any right or privilege.

Fees shall not be charged the University of California or the United States Department of Agriculture for registration or for the inspection and testing of trees providing there shall be no expense to the Department other than for observation of the inspection and indexing required in this article and for the keeping of records. When the procedures are conducted by the University of California or by the United States Department of Agriculture, they shall not be less than provided in this article and the Department shall be notified each year of the trees to be entered or continued in the program.

- (1) Fees. The Department shall establish a schedule of fees for services provided in this article. The fee shall be based upon the approximate cost of the services rendered.
- (2) Refunds. Fees paid for services that are not rendered shall be refunded to the applicant.

Article 3. Registration and Certification of Deciduous Fruit and Nut Trees

§ 3015. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3015 to Section 3015.1 and new Section 3015 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 79, No. 3.

§ 3015.1. Definitions.

- (a) "Virus-infected" means infected by a virus or having symptoms or behavior characteristic of a virus disease listed in this article.
- (b) "Index" means testing a plant for specific virus infection using specific indicator plants listed in Sections 3015.3 and 3015.4.
- (c) "Off-type" means different from the variety or selection listed on the application for registration or certification.
- (d) "Registered" means that a registration number has been assigned by the Department to a tree that has been inspected and tested in accordance with the provisions of this article to serve as a source of propagating material for certified nursery stock.
- (e) "Foundation block" means a planting of trees, maintained by the University of California, which are to serve as a primary source of propagating material.
- (f) "Mother block" means a planting of trees to be registered and maintained by an applicant as a source for growing certified nursery stock.
- (g) "Nursery increase block" means a planting of nursery stock which may be used as a propagating source to produce registered stock for the growing of certified nursery stock, or which may be used for growing trees which may be planted in a scion orchard.
- (h) "Scion orchard" means an orchard planting of trees which may be registered to serve as a source of registered scion wood for the growing of certified nursery stock.
- (i) "Certified block" means a planting of nursery stock for the production of certified nursery stock.

Page 262 Register 97, No. 17; 4-25-97

- (j) "Foundation stock" means propagative material from the foundation block.
- (k) "Registered stock" means propagating material produced in a mother block, in a nursery increase block, from registered trees in a scion orchard, and/or seed or liners grown from seed from registered seed source trees.
- (1) "Certified nursery stock" means yearling or younger trees propagated from registered stock and certified in accordance with the provisions of this article.
- (m) "Virus-tested" means tested for virus or other graft-transmissible disease listed in and using procedures outlined in this article.
- (n) "Seed source tree" means a tree which may be tested and registered to produce registered seed.

HISTORY

- 1. Amendment of Article 3 (§§ 3015–3018) filed 11–8–68; effective thirtieth day thereafter (Register 68, No. 42). For history of former article, see Registers 62, No. 8, and 63, No. 6.
- 2. Amendment of subsection (m) and new subsections (o) and (p) filed 1–19–79; effective thirtieth day thereafter (Register 79, No. 3).
- 3. Renumbering and amendment of former Section 3015 to Section 3015.1 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3015.2. Requirements for Participants' Plantings and Stock.

(a) Generally. Participation in this program is voluntary and may be

withdrawn at the option of the applicant.

Registration, certification, approvals and supervision shall be conducted by the Department. Except as otherwise provided, certification is based solely on visual inspections of sample plants from each variety in a planting which are found not to exceed the percentages stated in Section 3015.3(c)(6).

- (b) Responsibility of Applicant. The applicant shall be responsible for:
- (1) The selection of the location and the proper maintenance of a planting being grown under the provisions of this article.
 - (2) Maintaining the identity of all plants entered in the program.
- (3) Application for registry or re–registry of plants being grown under the provisions of this article.
- (4) Selection of the trees for index-testing for the Prunes ring-spot virus and prune dwarf virus.
 - (5) Farming and sanitation practices.
- (6) Notifying the Department at least one week in advance of the harvesting as to when harvesting will commence.
- (7) Placing the information required on each certification tag furnished by the Department.
 - (c) Location of Plantings.
- (1) Each planting location shall be subject to approval and shall be in an area having minimal risks for spread of infectious pests by drainage, flooding, irrigation, or by other means.

[The next page is 267.]

- (2) A mother block shall be located not less than 300 feet from any other plant of the same genus not entered in this program and not less than 1/2 mile from any commercial planting of the same genus and the ground in such planting and a distance of 25 feet surrounding the planting shall be kept free of other vegetation. Trees in a mother block shall be planted in rows which are at least 10 feet apart, and trees in each row shall be at least five feet apart.
- (3) A scion orchard, a nursery increase block or a certified block shall be a separate planting sufficiently apart from other nursery stock to maintain its identity and shall be located at least 300 feet from any commercial orchard planting of peach and nectarine.
- (4) No restrictions are placed on the location for a registered seed source tree.
 - (d) Maintenance of Plantings.
- (1) Plantings entered in this program shall be kept in a thrifty growing condition and pests shall be effectively controlled. Suitable precautions shall be taken in cultivation, irrigation, movement and use of equipment, and in other farming practices to guard against spread of soil—borne pests to plantings entered in this program.
- (2) To assure that inspections may be made properly and to provide close working knowledge of field operations, the applicant shall notify the Department in advance of any planting, propagating or pruning operation or removal of nursery stock or trees in any planting entered in this program so that approval can be granted before the work is done.
- (3) Any plant found to be off-type or virus infected may be required to be removed immediately from any planting. Approval may be given to remove off-type parts of a registered tree without revoking registration of the tree.
- (4) Identification of each registered tree and of nursery stock growing in plantings entered in the program to identify it as to rootstock and scion sources shall be done in an approved manner.
- (e) Eligibility and Planting Requirements. Any variety of deciduous fruit and nut tree when approved by the Department is eligible for entry in this program as provided in this article.
- (1) Eligibility of Stock. To be acceptable for registration or certification or to be eligible for any planting entered in this program, a plant shall have been inspected and tested, and not found to be virus—infected or off—type, as provided in Sections 3015.3 and 3015.4, or the plant shall have an equivalent known history which has been approved. In addition:
- (A) Registered stock scion wood shall be taken from a nursery increase block within four years from the time the scions were initially placed in the nursery increase block.
- (B) For planting and registration of a tree in a scion orchard, the Department shall be notified at the time of planting of the applicant's intention to seek registration and application for registration shall be filed within six years of the time of the original planting of the scion orchard. Verification of trueness of the fruit shall be the responsibility of the applicant. Prior to registration of a tree in a scion orchard it shall be tested by indexing in a Shirofugen cherry or by other methods approved by the director for the detection of Prunes ring–spot virus and prune dwarf virus and shall be given a visual inspection. Information regarding such other methods may be obtained from the Department's Pest Exclusion Unit.
 - (2) Plants eligible for planting shall be as follows:
- (A) In a Mother Block—Foundation stock. Only mahaleb rootstock shall be used for cherries.
- (B) In a Nursery Increase Block—Foundation stock or registered stock scions directly from a registered mother block tree.
 - (C) In a Certified Block—Foundation stock or registered stock.
- (D) In a Scion Orchard—Foundation stock produced in a nursery increase block.

HISTORY

1. Amendment of subsection (b) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).

- 2. Amendment of subsection (e)(1)(E) filed 1–19–79; effective thirtieth day thereafter (Register 79, No. 3).
- 3. Renumbering and amendment of former Section 3016 to Section 3015.2 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1.)

§ 3015.3. Inspection and Testing Procedures for Prunus Species.

- (a) Generally. Inspection and testing procedures prescribed in this article for an applicant's plantings will be made by the Department and shall be conducted at times determined as suitable by the Department. In the indexing procedures required in this section, the Department may approve the substitution of other indicator plants, if equally suitable, or may approve other procedures for testing for virus infection if determined equally suitable. Additional inspections or tests other than provided in this section may be required by the Department if seasonal conditions or other factors tend to obscure virus symptoms or make adequate inspection impossible, or when virus infection is suspected, or when virus symptoms may be masked in a particular variety.
- (1) At the Department's discretion and under its close supervision, the applicant may provide the Shiro-fugen cherry indicator trees and the labor to collect budwood from selected trees and to perform the budding and related testing tasks. However, the Department shall make all of the disease readings and determinations.
 - (b) Qualification of Stock.
- (1) Registered Trees—Mother Block. Each registered tree in the mother block shall be tested each year by indexing in Shiro-fugen cherry or by other methods approved by the director for the detection of Prunes ring-spot virus and prune dwarf virus and shall be visually inspected prior to stock distribution.
- (2) Registered Trees—Scion Orchard. Registered trees in a scion orchard shall be indexed in Shiro-fugen cherry or by other methods approved by the director for the detection of Prunes ring-spot virus and prune dwarf virus and visually inspected each year in which scion wood is harvested.
- (3) Seed Source Trees. A Prunes species tree may be registered as a seed source tree after being tested by indexing in Shiro-fugen cherry or by other methods approved by the director for the detection of Prunes ring-spot virus and prune dwarf virus and at least one visual inspection.
- (4) Nursery Increase Block, Certified Block. At least one visual inspection shall be made each year of plants in a nursery increase block or in a certified block.
- (5) Information regarding other methods approved by the director in (1), (2) and (3) may be obtained from the Department's Pest Exclusion Unit.
- (c) Refusal, Suspension or Cancellation of Registration or Certification. Registration or certification may be refused, suspended or canceled for any plants in part or all of a planting if:
 - (1) The requirements of this article have not been met.
 - (2) The plant is found to be virus-infected or off-type.
- (3) A registered tree is found virus—infected and it is determined that plants propagated from it also are liable to be infected.
 - (4) Yellow leaf roll virus disease of peach is found within 300 feet.
- (5) The pest cleanliness requirements for nursery stock in the nursery inspection regulations, Section 3060.2, have not been met.
- (6) An accumulated percentage of more than 1/2 percent of the trees of the same variety on the same kind of rootstock are found virus—infected in an increase block or more than 2 percent in a certified block unless all such virus—infected trees are removed under the supervision of the Department. Either visual inspections or the results of indexing or both may be used as a basis for calculating the number of trees that may be infected.
- (7) For any reason the identity of a plant becomes uncertain or has not been properly maintained.
 - (8) A registration number is misused or misrepresented.

(9) Registered stock is not used primarily to produce certified nursery stock.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1-19-79; effective thirtieth day thereafter (Register 79, No.
- 2. Renumbering and amendment of former Section 3017 to Section 3015.3 filed 12-30-83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3015.4. Foundation Stock Requirements.

The University of California is responsible for the selection, propagation, trueness to variety, identification, index-testing and pest cleanliness of all plants in the foundation block.

An inventory of eligible trees in the foundation block shall be provided to the Department annually. A record of foundation stock distributed shall be provided to the Department within 60 days following distribution and shall include the names and addresses of the program participants to whom the stock was distributed.

To be eligible for foundation stock, the plant, including the rootstock if used, shall have been index-tested and found free of specific virus diseases by using the specific indicator plants listed in the following table:

Indicator Plant Disease

Peach yellows, little peach, peach rosette, rosette Elberta Peach mosaic, phony peach mosaic, x-disease complex,

yellow bud mosaic, wart, peach mottle, prunes stem

pitting and astroid spot.

Bing Cherry Western-x, rusty mottle, mottle leaf, rasp leaf. twisted leaf, tatter leaf, small bitter cherry, and peach

mottle.

Kwanzan Cherry Green ring mottle.

Shiro-fugen Cherry Prunes ring-spot complex and prune dwarf virus. Tilton Apricot

Ring pox Shiro Plum Line Pattern

The indicator plants shall be observed for two successive growing seasons, except Shiro-fugen cherry which shall be observed for a minimum of 30 days.

Each tree in a foundation block shall be tested for the Prunes ring-spot virus complex and prune dwarf virus by approved detection methods

Other procedures for virus detection approved by the Department may be used if determined to be equally suitable.

The foundation block shall be located at least 300 feet from any other plant of the same genus not entered in the program and at least one-half mile from any commercial planting of the same genus.

Trees in a foundation block shall not be registered until variety identification is confirmed

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. New section filed 12-30-83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3015.5. Application and Fees.

- (a) Application. The applicant shall furnish any information requested and shall give consent to the Department to take plants from any planting for inspection or testing purposes. An application shall be submitted for the acceptance of any planting and for subsequent inspections, approvals, registration or certification therein and it may be refused unless made sufficiently in advance of time of planting to permit the department to establish the origin of the stock, to determine the suitability of the location and to supervise any treatment that may be required.
- (b) Fees. The Department shall establish a schedule of fees for services provided in this article. Fees are payable in advance of the work to be done and are for the sole purpose of defraying expenses incurred in the inspection, approval, registration and certification procedures herein provided and are not to obtain any right or privilege.
- (c) Exemption from Fees. No fees shall be charged the University of California or the United States Department of Agriculture for registration or for the inspection and testing of trees provided there is no additional

expense to the Department other than for observation of the inspection and testing required in this article and for the keeping of records. When the procedures are conducted by the University of California or by the United States Department of Agriculture, they shall not be less than are provided in this article and the Department shall be notified each year of the trees to be entered or continued in the program.

(d) Refund. Fees paid for services that are not rendered shall be refunded to the applicant.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) filed 7–28–77 as procedural and organizational; effective upon filing (Register 77, No. 31).
- 2. Amendment filed 1-19-79; effective thirtieth day thereafter (Register 79, No. 3).
- 3. Renumbering of former Section 3018 to Section 3015.5 and amendment of NOTE filed 12-30-83; effective thirtieth day thereafter (Register 84, No. 1).

Article 4. Registration and Certification of **Pome Fruit Tree Nursery Stock**

Pome fruit trees, for which provisions have been included in this article, may be registered for the purpose of providing rootstock and scion sources for the propagation of certified nursery stock when inspected and tested for virus diseases and other pests by procedures outlined in this article. Registration and certification are limited to varieties or clones that are considered to be the best available in the industry from a pest cleanliness standpoint.

§ 3020. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering of former Section 3020 to Section 3020.1 and new Section 3020.1 filed 12-30-83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 77, No. 31.

§ 3020.1. Definitions.

- (a) "Certified block" means a planting of nursery stock for the production of certified nursery stock.
- (b) "Certified nursery stock" means yearling or younger trees propagated from registered stock and certified in accordance with the provisions of this article.
- (c) "Foundation block" means a planting of trees, maintained by federal or state agencies, which are registered or are to be registered to serve as a primary source of propagating material.
- (d) "Foundation stock" means propagative material from the foundation block.
- (e) "Index" means testing a plant for virus infection by grafting with tissue from the plant to an indicator plant or by other approved means.
- (f) "Mother block" means a planting of trees to be registered and maintained by an applicant as a source for establishing an increase block and as a propagative source for growing certified nursery stock.
- (g) "Nuclear stock" means plants which were propagated from indexed sources and which have been regularly re-indexed and protected continuously from virus infection by federal or state agencies.
- (h) "Nursery increase block" means a planting of nursery stock, maintained by the applicant, which may be used as a propagating source to produce registered stock for growing of certified nursery stock, or which may be used for growing trees which may be planted in a mother block.
- (i) "Off-type" means different from the variety or selection listed on the application for registration or certification.
- (j) "Registered" means that a registration number has been assigned by the Department to a tree that has been inspected and tested in accordance with the provisions of this article to serve as a source of propagating material to produce certified nursery stock.

Page 268 (4-1-90)

- (k) "Registered stock" means propagating material produced in a mother, nursery increase, or from registered rootstock stool blocks.
- (*l*) "Registered rootstock stool block" means a planting of vegetatively propagated rootstocks, maintained by the applicant, propagated from foundation stock.
- (m) "Virus-infected" means infected by a virus or having symptoms or behavior characteristics of a virus disease.

HISTORY

- 1. New Article 4 (Sections 3020–3023) filed 7–25–77; effective thirtieth day thereafter (Register 77, No. 31).
- 2. Renumbering and amendment of former Section 3020 to Section 3020.1 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3020.2. Requirements for Plantings and Stock.

(a) Generally. Participation in this program is voluntary and may be cancelled at the option of the applicant.

Registration, certification, approvals, and supervision shall be conducted by the Department.

Except as otherwise provided, certification is based solely on visual inspections of sample plants from each variety in a planting.

- (b) Responsibility of the Applicant: The applicant shall be responsible for:
- (1) The selection of the location and the proper maintenance of the plantings being grown under the provisions of this article.
 - (2) Maintaining the identity of all plants entered in the program.
- (3) Notifying the Department in advance of any planting, propagating, or pruning operation or removal of nursery stock or trees in any planting entered in this program so that approval can be granted before the work is done.
- (4) The application for registry or re–registry of the plants being grown under the provisions of this article.
 - (5) Farming and sanitation practices.
- (6) Notifying the Department of the date of and material used for all pest control treatments in the plantings for which inspections must be made.
- (7) Notifying the Department at least one week in advance of the harvesting as to when it will commence.
- (8) Placing the information required on each certification tag furnished by the Department including the participant's name and the block number.
 - (c) Location of Plantings:
- (1) Each planting location shall be subject to approval and shall be in an area having minimal risks for spread of infectious pests by drainage, flooding, irrigation, or by other means.
- (2) A mother block or a planting of nursery stock being grown for planting in a mother block shall be located at least 100 feet from any other plant of the same genus not entered in this program to maintain plant identity and at least 300 feet from any commercial planting of the same genus to minimize disease infection. The ground in such planting and a distance of 25 feet surrounding the planting shall be kept free of other vegetation. Trees in a mother block shall be planted in rows which are at least ten feet apart and trees in each row shall be no less than five feet apart to maintain plant identity.
- (3) A nursery increase, certified, seed bed, or a rootstock stool block shall be a separate planting 12 feet apart from other nursery stock to maintain its identity and shall be located at least 300 feet from any commercial planting of the same genera to minimize disease infection.
 - (d) Maintenance of Plantings:
- (1) Plantings entered in this program shall be kept in a thrifty growing condition and pests shall be effectively controlled. Suitable precautions shall be taken in cultivation, irrigation, movement and use of equipment, and in other farming practices to guard against spread of soil–borne pests to plantings entered in this program.
- (2) Identification of each registered tree, increase, certified, or stool block entered in the program shall be done in an approved manner.

- (3) Any plant found to be off-type or virus-infected may be required to be removed immediately from any planting. Approval may be given to remove off-type parts of a registered tree without revoking registration of the tree.
- (e) Eligibility and Planting Requirements. Any kind or variety of pome fruit tree, when approved by the Department, is eligible for entry in this program.
- (1) Eligibility of Stock. To be acceptable for registration and/or certification or to be eligible for any planting entered in this program, a plant shall have been inspected and tested, and not found to be virus—infected or off–type, as provided in Section 3020.3 or the plant shall have an equivalent known history which has been approved by the Department. In addition:
- (A) Mother block trees shall be propagated by using nuclear or foundation stock scions and eligible rootstocks.
- (B) Increase block trees shall be propagated by using nuclear, foundation, or mother stock scion and eligible rootstocks. The rootstock may be seedlings.
- (C) Certified block trees shall be propagated by using nuclear foundation, mother, or increase scion wood. The rootstock may be seedlings or stock produced in a registered stool block.
- (D) Registered rootstock stool blocks shall be propagated by using either nuclear or foundation rootstocks.
- (2) Planting Requirements. Plants eligible for planting and requirements for plantings shall be as follows:
- (A) Mother Block. Application for the registration of trees in a mother block shall be filed prior to the planting of the tree in an approved location. Trees in a mother block may be required to be index—tested ten years after planting in the block.
- (B) Increase Block. To be eligible as registered stock, scion wood shall be taken from a nursery increase block within five years from the time the scions were initially placed in the nursery increase block.
- (C) Certified Block. Any seed source to produce seedling understock may be used as well as understock from a registered stool block.
- (D) Registered Rootstock Stool Block. Furnigation of the stool block location is required. The furnigant dosages shall be those prescribed in Schedule "A" of the "Approved Treatments," Item #12 in the Department's Nursery Inspection Procedure Manual. Registration of the block will be for a 10-year period.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3021 to Section 3020.2 filed 12-30-83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3020.3. Inspection and Testing Procedures for Pome Fruit Trees.

- (a) Generally. Inspection and testing procedures prescribed in this article may be made by the University of California, the United States Department of Agriculture, other state agencies with comparable indexing programs, or the Department, and shall be conducted in an approved manner at times determined as suitable by the Department. In the indexing procedures required in this section, the Department may approve the substitution of other indicator plants, if equally suitable, or may approve indexing on a fewer number of indicator plants if the plant being tested is itself a good indicator for a particular disease, or may approve other procedures for testing for virus infection if determined equally suitable. Additional inspections or tests other than provided in this section may be required by the Department if seasonal conditions or other factors tend to obscure virus symptoms or make adequate inspection impossible or when virus infection is suspected, or when virus symptoms may be masked in a particular variety.
 - (b) Qualification of Stock.
- (1) Registered Trees in a Mother Block. Each registered tree may be given a visual inspection annually. Index testing may be required for registered trees in a mother block ten years from the planting date of the trees or sooner if virus infection is suspected.

Page 269 (4-1-90)

- (2) Nursery Increase Block, Certified Block, Registered Rootstock Stool Block. At least one visual inspection shall be made each year of plants in a nursery increase block, a certified block, and a registered rootstock stool block. A registered rootstock stool block is required to be root sampled for the detection of harmful nematodes each year after the second growing season of the block.
- (3) Other Qualified Stock. Pome fruit propagative stock from other state agencies, USDA, and other countries, which were produced under a program with the same requirements as provided in this regulation, will be accepted into this program.
- (c) Refusal, Suspension, or Cancellation of Registration or Certification. Registration or certification may be refused, suspended, or cancelled for any plants in part or all of a planting for any of the following reasons:
 - (1) The requirements of this article have not been met;
 - (2) The plant is found to be virus-infected or off-type;
- (3) A registered tree is found virus–infected and it is determined that plants propagated from it also are liable to be infected;
- (4) The pest cleanliness requirements for nursery stock in Section 3060.2 of the nursery inspection regulations have not been met;
- (5) For any reason the identity of a plant becomes uncertain or has not been properly maintained; or
- (6) A registration number is misused or misrepresented.

HISTORY

1. Renumbering and amendment of former Section 3022 to Section 3020.3 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3020.4. Foundation Stock Requirements.

The University of California or other government agencies supplying foundation or nuclear stock are responsible for the selection, propagation, trueness to variety, identification, index-testing and pest cleanliness of the plants.

An inventory of eligible trees in the foundation or nuclear blocks shall be provided to the Department annually. A record of stock distributed shall be provided to the Department within 60 days of the distribution and shall include the names and addresses of the persons to whom the stock was distributed.

To be eligible for foundation or nuclear stock, the plant, including the rootstock if used, shall have been index-tested for and found free of virus infection using the following indicator plants: Virginia crabapple; Spy 27, Russian seedling R12740–7A, Golden Delicious, Lord Lambourne, Gravenstein, and Sparten apples; Quince C7/1; *Pyrus veichii*; and Hardy, Bartlett, and Bosc pears. A procedure determined equally suitable to detect virus infection may be used instead of index-testing provided the procedure has been approved by the Department.

The following are the location and planting requirements for founda-

The foundation block planting shall be located at least 300 feet from any commercial planting of the same genus to minimize disease infection. The ground in such planting and a distance of 25 feet surrounding the planting shall be kept free of other vegetation.

The foundation block planting shall be located in an area having minimal risks for spread of infectious pests by drainage, flooding, irrigation, or other means.

Trees in a foundation block shall be planted in rows which are at least ten feet apart and trees in each row shall be at least five feet apart to maintain plant identity.

Each tree planted in a foundation block shall be labeled as to variety and source.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. New section filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3020.5. Application and Fees.

- (a) Application. The applicant shall furnish any information requested and shall give consent to the Department to take plants from any planting for inspection or testing purposes. An application shall be submitted for the acceptance of any planting and for subsequent inspections, approvals, registration or certification therein and it may be refused unless made sufficiently in advance of time of planting to permit the Department to establish the origin of the stock, to determine the suitability of the location, and to supervise any treatment that may be required.
 - (b) Fees.
- (1) The Department shall establish a schedule of fees for the services provided in this article.
- (2) Fees shall be paid in advance of the work done. Fees paid by participants are for the sole purpose of defraying expenses incurred in the inspection, approval, registration, and certification services provided and are not to obtain any right or privilege.
- (c) Exemption from Fees. No fees shall be charged the University of California or the United States Department of Agriculture for registration or for the inspection and testing of trees provided there is no additional expense to the Department other than for observation of the inspection and testing required in this Article and for record keeping.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3023 to Section 3020.5 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

Article 5. Registration and Certification of Grapevines

§ 3024. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3024 to Section 3024.1 and new Section 3024 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 71, No. 25.

§ 3024.1. Definitions.

- (a) "Virus-infected" means infected by a graft-transmissible disease listed in Section 3024.3(a).
- (b) "Index-tested" means tested for specific graft-transmissible diseases using indicator plants as specified in Section 3024.3(a).
- (c) "Off-type" means different from the variety which is registered in the foundation block.
- (d) "Registered" means that a grapevine in a foundation block or in an increase block has qualified as a propagative source by meeting the inspection and testing required in this article.
- (e) "Foundation block" means a planting of grapevines propagated from indexed sources and maintained by the University of California in which each vine has been registered to serve as a source of foundation stock.
- (f) "Increase block" means a planting of grapevines, established with stock from a foundation block, which serves as a propagation source for the production of California Certified Grape Nursery Stock.
- (g) "Foundation stock" means plants which have been produced in a foundation block.
- (h) "Registered stock" means plants which have been produced in an increase block.
- (i) "Progeny vine" means a vine propagated from a rootstock and/or a top-stock source that is indexed and is intended for planting in a foundation block
- (j) "California Certified Grape Nursery Stock" means vines, rootings, cuttings, grafts or buds taken or propagated from foundation or registered stock and certified in accordance with the provisions of this article.

Page 270 (4-1-90)

HISTORY

- 1. Amendment of Article 5 (§§ 3024–3027) filed 4–30–64; effective thirtieth day thereafter (Register 64, No. 9). For prior history of Article, see Register 61, No. 8 and Register 62, No. 8.
- 2. Amendment of Sections 3024 through 3027 filed 5–14–70; effective thirtieth day thereafter (Register 70, No. 20).
- 3. Amendment filed 6–18–71; effective thirtieth day thereafter (Register 71, No. 25).
- 4. Renumbering and amendment of former Section 3024 to Section 3024.1 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3024.2. General Provisions.

Participation in this program is voluntary and may be withdrawn at the option of the applicant. With the exception of the foundation block, registration, certification, approvals, and supervision shall be conducted by the Department.

Indexing tests and inspections performed by the University of California on original source vines followed by visual inspections of vines from each subsequent planting in the participant's approved planting sites form the basis for certification by the Department.

(a) Responsibility of the University of California. The University of California shall be responsible for the selection of source vines, indextesting, trueness to varietal identity, and disease status of the foundation stock.

The University shall notify all current participants in the registration and certification program when foundation stock which participants are using is found to be disease infected.

- (b) Responsibility of Applicant. The applicant shall be responsible for:
- (1) The selection of the location and the proper maintenance of a planting being grown under the provisions of this article.
- (2) Maintaining the identity of all nursery stock entered in the program.
 - (3) Submitting the application for certification.
 - (4) Farming and sanitation practices.
- (5) Notifying the Department at least one week in advance of the harvesting as to when it will commence.
- (6) Placing the information required on each certification tag furnished by the Department.
- (7) Maintaining records, on an inventory sheet provided by the Department, of the certification tags used and the stock produced and sold.
- (c) Location of Plantings. Each planting shall be located in an area where contamination by soil-borne virus diseases of grapes from drainage, flooding, irrigation or other means is not likely to occur.

Each planting shall be located at least 100 feet from any land on which grapevines have grown within the past ten years, and shall be in a location approved by the Department. The 100–foot distance may be waived provided stock planted within the 100–foot area is foundation, registered, or certified stock.

Treatment to eliminate soil-borne pests in a manner approved by and under supervision of the Department may be required.

(d) Maintenance of Plantings. Any planting entered in this program shall be kept in a thrifty growing condition, and pests shall be kept under intensive control. Suitable precautions shall be taken in cultivation, irrigation, movement, and use of equipment and in other farming practices to guard against spread of soil-borne pests to plantings entered in this program.

The Department shall be notified in advance of the planting, replanting, grafting, budding, rebudding, pruning, removal of nursery stock, or removal of vines in any planting entered in this program in order that necessary inspections may be made or approval granted before the work is done.

Any plant found to be off-type shall be removed from any planting. Nursery stock, including cuttings, produced under the provisions of this article shall be stored, heeled-in, or calloused in media, beds, or storage areas approved by the Department. The Department may require such treatment as may be necessary to protect against infection or infestation with pests.

- (e) Eligibility for Planting.
- (1) In a Foundation Block. To be acceptable for planting in a foundation block, a plant shall be foundation stock, or its rootstock and top—stock sources and the plant itself shall have been inspected and tested and not found to be virus—infected or off—type, as provided in Sections 3024.3(a) and (f). The index readings shall have been completed within 24 months, or the plant shall have an equivalent known history approved by the Department.

The plant shall have been protected from possible virus infection in an approved manner from the time it was originally propagated until it is planted in a foundation block.

- (2) In an Increase Block. Foundation stock shall be acceptable for planting in an increase block. When approved by the Department, propagating wood from a field planted permanent increase block may be planted in the same increase block to increase its size or as replacements.
- (3) In a Nursery Planting. Foundation or registered stock shall be acceptable for planting or propagation in a nursery planting for certification. Vines in a field nursery planting for certification which are 12 months old or less from time of propagation may be used as a supplemental source of cuttings for production of additional certified stock after inspection and approval by the Department.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–18–71; effective thirtieth day thereafter (Register 71, No. 25).
- 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Renumbering and amendment of former Section 3025 to Section 3024.2 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3024.3. Inspection and Testing Procedures.

Inspection and testing procedures prescribed in this article may be made by the University of California, the United States Department of Agriculture, or the Department, and shall be conducted in a manner and at times determined by the Department as suitable.

- (a) Testing Progeny Vines.
- (1) The rootstock and top-stock sources of a progeny vine for which registration is planned and registered foundation vines for retesting shall be index-tested by using the specific indicator plants for the diseases as stated in the following table:

Indicator Plant St. George grapevine

Disease Fan leaf degeneration, fleck, asteroid mosaic,

and corky bark

Cabernet franc, LN-33, or Mission grapevine LN-33 grapevine Chenopodium sp.

Leafroll Corky bark and leafroll Grape decline (yellow vein) and/or fanleaf degeneration

- (2) Propagating wood to produce the progeny vines for a foundation block shall be taken from the parent rootstock and top-stock sources in the same growing season that tissue is taken from the parent sources for indexing. The progeny vines shall be visually inspected at least twice each growing season prior to planting in a foundation block.
 - (b) Inspection.
- (1) In a Foundation Block. At least two visual inspections of each vine shall be made by University personnel each growing season.
- (2) In an Increase Block. At least one visual inspection shall be made each year prior to the removal of fruit, if any, from the vines.
- (3) In a Nursery Planting. At least one visual inspection shall be made of grapevines in the nursery row. In addition, nursery stock shall be inspected at the time of digging.

To be eligible for certification or for approval as registered stock, nursery stock shall not remain in the nursery row more than two growing seasons.

- (4) Additional inspections or tests may be required if seasonal conditions or other factors tend to obscure disease symptoms or make adequate inspection impossible, or when virus infection is suspected or disease symptoms may be masked in a particular variety. When index—testing is required, the indicator plants in subsection (a)(1) shall be used to test for the diseases indicated therein.
- (c) Registration or certification of grapevines entered in this program is based on index–testing to detect specific diseases as stated in subsection (a)(1).

In the event a graft-transmissible disease is detected in the registered foundation vines by index-testing, registration shall be suspended on all vines, including foundation, registered increase blocks and certified plantings. In addition, the participant shall notify in writing all recipients of the nursery stock from suspended vines that a graft-transmissible disease has been detected and reported by the University of California. The registration or certification of the nursery stock of the suspended vines will be reinstated upon receipt of an agreement by each grower and/or seller that all invoices, sales slips, and certification tags will clearly specify the virus disease present. This agreement shall be filed with the Department prior to the re-registration or certification of nursery stock produced from suspended vines. Records shall be kept by the seller and/or grower of all sales transactions of nursery stock produced from suspended vines and a copy of the records shall be submitted to the Department

Certification of infected stock propagated from suspended vines shall be limited to propagation units already processed to produce nursery stock

- (d) Refusal of Approval or Cancellation of Registration or Certification. Registration or certification may be refused or cancelled for any plants or planting if:
 - (1) The requirements of this article have not been met;
- (2) Any vine in the planting is found virus-infected with a soil-borne virus:
 - (3) The plant is off-type;
- (4) Any vine in the planting is found infected with any of the transmissible diseases listed in subsection (a)(1) that is not known to be soil—borne unless such vine is removed under supervision;
- (5) It is determined that a registered foundation block vine or registered increase block vine is transmissible disease—infected and the plants propagated from such source also are liable to be infected;
- (6) The pest cleanliness requirements for nursery stock, in Section 3060.2 of the nursery inspection regulations, have not been met.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 3026 to Section 3024.3 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).
- 2. Amendment of subsection (a)(1) filed 12–21–2000; operative 1–1–2001 pursuant to Government Code section 11343.4(d) (Register 2000, No. 51).

§ 3024.4. Application and Fees.

- (a) Application. The applicant shall furnish information requested and shall give consent to the Department to take plants from any planting for inspection or testing purposes. An application shall be submitted for the acceptance of any planting and for subsequent inspections, approvals, registration or certification therein, and it may be refused unless made sufficiently in advance of time of planting to permit the Department to establish the origin of the stock, to determine the suitability of the location, and to supervise any treatment that may be required.
- (b) Fees. Fees established in this article are payable in advance of the work to be done, and are for the sole purpose of defraying expenses incurred in the inspection, approval, registration, and certification procedures herein provided, and are not to obtain any right or privilege.
- (1) No fees shall be charged the University of California or the United States Department of Agriculture for registration or for the inspection and testing of vines provided there shall be no expense to the Department other than for observation of the inspection and testing required in this

article, and for the keeping of records. When the procedures prescribed in this article are conducted by the University of California, or by the United States Department of Agriculture, they shall not be less than provided in this article and the Department shall be notified each year of the grapevines to be entered or continued in the program.

- (2) The Department shall establish a schedule of fees for services provided in this article.
- (3) Refunds. Fees paid for services that are not rendered shall be refunded to the applicant.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–18–71; effective thirtieth day thereafter (Register 71, No. 25)
- 2. Amendment of subsection (a) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Renumbering of former Section 3027 to Section 3024.4 and new NOTE filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

Article 6. Certification of Avocado Nursery Stock

§ 3030. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

 Renumbering and amendment of former Section 3030 to Section 3031 and new Section 3030 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3031. Definitions.

- (a) "Certified block" means a planting of nursery stock for the production of certified nursery stock.
- (b) "Certified nursery stock" means trees propagated and certified in accordance with the provisions of this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822 Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 6 (§§ 3030–3034) and new Article 6 (§§ 3030–3033) filed 2–18–69; effective thirtieth day thereafter (Register 69, No. 51). For prior history, see Register 62, No. 8.
- 2. Amendment filed 5–3–78; effective thirtieth day thereafter (Register 78, No. 18).
- 3. Renumbering and amendment of former Section 3031 to Section 3032 and renumbering and amendment of former Section 3030 to Section 3031 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3032. Requirements for Plantings and Stock.

- (a) Generally. Participation in this program is voluntary and may be withdrawn at the option of the applicant. Certification, approvals and supervision shall be conducted by the Department.
 - (b) Responsibility of Applicant. The applicant shall be responsible for:
 - (1) The selection of the location of the planting.
 - (2) The proper maintenance of all planting and storage areas.
 - (3) Maintaining the identity of all plants entered in the program.
 - (4) Farming and sanitation practices.
 - (5) Submitting the application for certification or approvals.
- (6) Placing the information required on each certification tag furnished by the Department.
 - (7) Maintaining records of the certification tags used.
 - (c) Location of Plantings.
- (1) Each planting and storage location shall be subject to approval and shall be in an area having minimal risks for spread of Phytophthora cinnamomi or other infectious pests by drainage, flooding, irrigation, or by other means.
- (2) A certified block shall be a separate planting at least 12 feet apart from other nursery stock to maintain its identity.
 - (d) Treatment and Handling.

Page 272 Register 2000, No. 51; 12–22–2000

- (1) Avocado nursery stock for certification shall be grown in soil or other planting media treated by the following approved methods and materials.
- (A) Two pounds of actual methyl bromide per 100 cubic feet of soil with the soil depth not exceeding 12 inches with the soil temperature, in accordance with the product label, between 40°F. and 80°F. (4.4°C. and 26.7°C.) and enclosed by a gas proof tarp of not less than 1.5 mil. thickness. Soil in containers shall be enclosed by a gas proof tarp of not less than 6 mil. thickness and soil in containers shall not be more than 15 inches in depth. When treated with methyl bromide, the soil shall be prepared to a fine seed bed condition and there shall be no excessive moisture in the soil at time of treatment.
- (B) Aerated steam in a closed chamber may be used provided all soil reaches a temperature of not less than 140°F. (60°C.) and is maintained for a period of not less than 30 minutes.
- (C) Live steam in a closed chamber may be used provided all soil reaches a temperature of not less than 180°F. (82°C.) and is maintained for a period of not less than 30 minutes.
- (2) Vegetation shall not be permitted within 25 feet of a certified block except other nursery stock meeting similar sanitary conditions subject to approval of the Department. When a certified block is grown in an approved enclosure, the 25 foot isolation barrier may be waived.
- (3) A certified block shall be enclosed by an approved fence. At the discretion of the Department, the 25 foot isolation barrier may also be required to be enclosed by the approved fence.
- (4) A vocado seed for growing certified avocado nursery stock shall be immersed in hot water at a temperature of 120°F. to 122°F. for 30 minutes in a suitable dipping vat with adequate agitation to maintain even temperature. The treatment shall be conducted in an approved manner and in an approved vat.
- (5) Containers shall be treated in an approved manner except no treatment shall be required of new clean containers.
- (6) Certified nursery stock and treated seed shall be stored in an approved area to protect against infection by *Phytophthora cinnamomi*.
- (7) Storage areas shall be treated in an approved manner.

HISTORY

- Amendment of subsection (d)(1) filed 10–26–73; effective thirtieth day thereafter (Register 73, No. 43).
- 2. Amendment of subsection (b) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- Amendment filed 5-3-78; effective thirtieth day thereafter (Register 78, No. 18).
- 4. Renumbering and amendment of former Section 3032 to Section 3032.1 and renumbering and amendment of former Section 3031 to Section 3032 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3032.2. Inspection and Testing Procedures and Requirements; Refusal, Suspension or Cancellation of Certification.

- (a) Inspection and Testing. (1) Avocado nursery stock for certification may be required to be inspected and tested for *Phytophthora cinnamomi* by using approved laboratory methods.
- (b) Refusal, Suspension or Cancellation of Certification. Certification may be refused, suspended or cancelled for any plants in part or all of a planting if:
 - (1) The requirements of this article have not been met,
- (2) A planting for certification is found infected with *Phythophthora cinnamomi*,
- (3) The pest cleanliness requirements for nursery stock in the Nursery Inspection Regulations, Section 3060.2, have not been met.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a)(1) filed 10–26–73; effective thirtieth day thereafter (Register 73, No. 43).
- 2. Renumbering and amendment of former Section 3032 to Section 3032.1 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3033. Application and Fees.

- (a) Application. The applicant shall furnish any information requested and shall give consent to the Department to take plants from any planting for inspection or testing purposes. An application shall be submitted for the acceptance of any planting and for subsequent inspections, approvals or registration therein and it may be refused unless made sufficiently in advance of time of planting to permit the Department to establish the origin of the stock, to determine the suitability of the location and to supervise any procedures that may be required.
- (b) Fees. The Department shall establish a schedule of fees for service provided in this Article. The fee shall be based upon the approximate cost of the services rendered.
- (c) Refunds. Fees paid for services that are not rendered shall be refunded to the applicant.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–15–72; effective thirtieth day thereafter (Register 72, No. 51).
- 2. Amendment of subsection (a) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31)
- 3. New NOTE filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

Article 6.1. Registration of Avocado Trees

§ 3033.1. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5821, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3033.1 to Section 3033.2 and new Section 3033.1 and Article 6.1 heading filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Registers 75, No. 43 and 71, No. 8.)

§ 3033.2. Definitions.

- (a) "Viroid-infected" means infected by the sunblotch viroid.
- (b) "Index" means testing a plant for viroid infection by grafting with tissue from it to avocado seedling indicator plants.
- (c) "Off-type" means different from the variety or selection listed on the application for registration.
- (d) "Candidate tree" means a selected tree for which registration as foundation stock is intended when inspection and testing for freedom from sunblotch viroid are completed.
- (e) "Foundation stock" refers to candidate trees after testing by the Department and/or University of California and are registered to serve as primary sources of scion budwood or seed propagating material.
- (f) "Increase block" means an orchard planting of trees propagated from registered budwood and foundation rootstock trees or from previously established increase blocks to provide sunblotch-tested propagative material.
- (g) "Registered" means that a registration number has been assigned by the Department to: (1) foundation stock trees, (2) increase blocks, and (3) nursery planting blocks found to be free of sunblotch viroid after inspection and testing in accordance with the provisions of this article.
- (h) "Registered stock" means seed, seedlings, cuttings, or scionwood produced from either registered foundation or registered increase block trees.
- (i) "Registered nursery tree" means trees propagated using seed and scionwood from registered foundation stock or registered increase block trees.
- (j) "Test" means any testing procedure using plant material or its extracts to determine the presence or absence of a disease agent in or on the tested plant material.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5821, Food and Agricultural Code.

HISTORY

- 1. New Sections 3033.1, 3033.2, 3033.3 and 3033.4 filed 2–18–71; effective thirtieth day thereafter (Register 71, No. 8).
- 2. Amendment filed 10–24–75; effective thirtieth day thereafter (Register 75, No. 43).
- 3. Renumbering and amendment of former Section 3033.2 to Section 3033.3 and renumbering and amendment of former Section 3033.1 to Section 3033.2 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 77, No. 31.
- Amendment of subsection (b) and new subsection (j) filed 4–4–2002; operative 5–4–2002 (Register 2002, No. 14).

§ 3033.3. General Provisions.

Participation in this program is voluntary and may be withdrawn at the option of the applicant. Registration, approvals, and supervision shall be conducted by the Department.

- (a) Responsibility of Applicant. The applicant shall be responsible for:
- (1) The selection of the candidate tree.
- (2) The location of the increase block or nursery's tree plantings.
- (3) Application for registry or reregistry.
- (4) The proper maintenance of a planting being grown under the provisions of this article.
- (5) Maintaining the identity in an approved manner of all plants entered in the program.
- (6) Arrangements with the owner of the property on which the candidate trees or increase block trees are located so that inspections and collections of budwood for index-testing can be done with the owner's consent.
 - (7) Farming and sanitation practices.
- (8) Placing the information required on each certification tag furnished by the Department including the participant's name and the block number.
 - (9) Disinfection of cutting tools.
- (b) Location of Planting. Each increase block planting shall be subject to the approval of the Department. A registered increase block or nursery tree planting (other than container–grown trees) in the ground shall be at least 300 feet from established nonregistered avocado trees. If nonregistered avocado trees are located within 300 feet of established registered avocado trees, the Department will determine whether or not the registered trees require testing.
- (c) Increase blocks or nursery plantings (in the ground) shall not be on land previously planted to avocados.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5821, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10–24–75; effective thirtieth day thereafter (Register 75, No. 43). For prior history, see Register 71, No. 8.
- 2. Amendment of subsection (a) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Renumbering and amendment of former Section 3033.3 to Section 3033.4 and renumbering and amendment of former Section 3033.2 to Section 3033.3 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).
- Amendment of subsection (b) filed 4–4–2002; operative 5–4–2002 (Register 2002, No. 14).

§ 3033.4. Inspection and Testing Procedures; Eligibility of Stock; Refusal, Suspension or Cancellation of Registration.

(a) Generally. Inspection and testing procedures prescribed in this article may be made by the University of California and the Department, and shall be conducted in an approved manner at times determined as suitable by the Department. In the testing procedures required in this section, the Department may approve the substitution of other indicator plants if equally suitable or may approve indexing on a fewer number of indicator plants, if the plant being tested is itself a good indicator for the sunblotch viroid or may approve other procedures for testing if determined equally suitable. Additional inspections or tests other than provided in this section may be required by the Department if any of these conditions exist: seasonal conditions or other factors tend to obscure the sunblotch viroid symptoms or make adequate inspection impossible;

sunblotch viroid infection is suspected; sunblotch viroid symptoms may be masked in a particular variety.

- (b) Eligibility of Stock.
- (1) Candidate Tree. Each candidate tree shall be assigned an in-test identification number and shall be either:
- (A) indexed for sunblotch viroid in an approved greenhouse facility under the supervision of the University of California and the Department. Each index test shall include indexing for sunblotch viroid by inoculating a minimum of 12 Guatemalan or West Indian variety avocado seedlings grown from registered foundation stock and graft–inoculated with tissue from the candidate tree. The inoculated seedlings shall be observed for a period of at least two years, except where results show a candidate tree is infected with sunblotch viroid. If no evidence of sunblotch viroid is found, the candidate tree may be registered as a foundation stock tree.

٥r

(B) tested using the approved Polymerase Chain Reaction (PCR) developed to identify the sunblotch viroid. This test shall be performed by the University of California. Testing shall done in accordance with procedures developed by R. J. Schnell in 1997 as amended by J. A. Dodds in 1997. These procedures are available from the department upon request.

If no evidence of sunblotch viroid is found, the candidate tree may be registered as a foundation stock tree.

- (2) Foundation Stock Tree. Candidate trees found to be free of sunblotch viroid following testing may be registered for use as primary sources of stock for the production of registered seed and scion materials. Registration is for a two-year period beginning with the start of the testing of the candidate tree. The in-test identification number of each candidate tree will become the tree registration number unless registration is refused or canceled as hereinafter provided.
- (3) Increase Block. Trees propagated using foundation stock seed and budwood shall be acceptable for planting in an increase block. Propagative material from an increase block may be planted in the same increase block to replace plants or increase its size or to establish other increase blocks.
- (A) The Department will assign a registration block number to each applicant's increase block upon receipt of an acceptable application and the proper fees.
- (B) Registration of increase block trees shall be for a period of two years from June 30 in the calendar year in which the registration was issued
- (C) Registration of an increase block may be continuous provided application is filed with the Department prior to the expiration date of the original registration.
- (4) Registered Nursery Tree. Nursery trees shall be propagated using registered seed and scionwood.
- (A) Seed and budwood collection shall be done in a manner approved by the Department.
- (B) The Department, upon receipt and acceptance of an application and fees for a registered nursery planting, will assign a registration number to the nursery planting block.
- (C) Registration of a nursery planting shall be for a period of two years from June 30 in the calendar year in which the registration was issued.
- (c) Refusal, Suspension or Cancellation of Registration. Registration may be refused, suspended, or canceled for any planting or portion thereof when:
 - (1) The requirements of this article have not been met, or
- (2) The plant or plantings are found to be sunblotch viroid infected or off-type, or
- (3) A registered tree is found sunblotch viroid infected and it is determined that plants propagated from it also are liable to be infected, or
- (4) For any reason the identity of a plant or planting becomes uncertain or has not been properly maintained, or
- (5) A registration number is misused or misrepresented.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5821, Food and Agricultural Code.

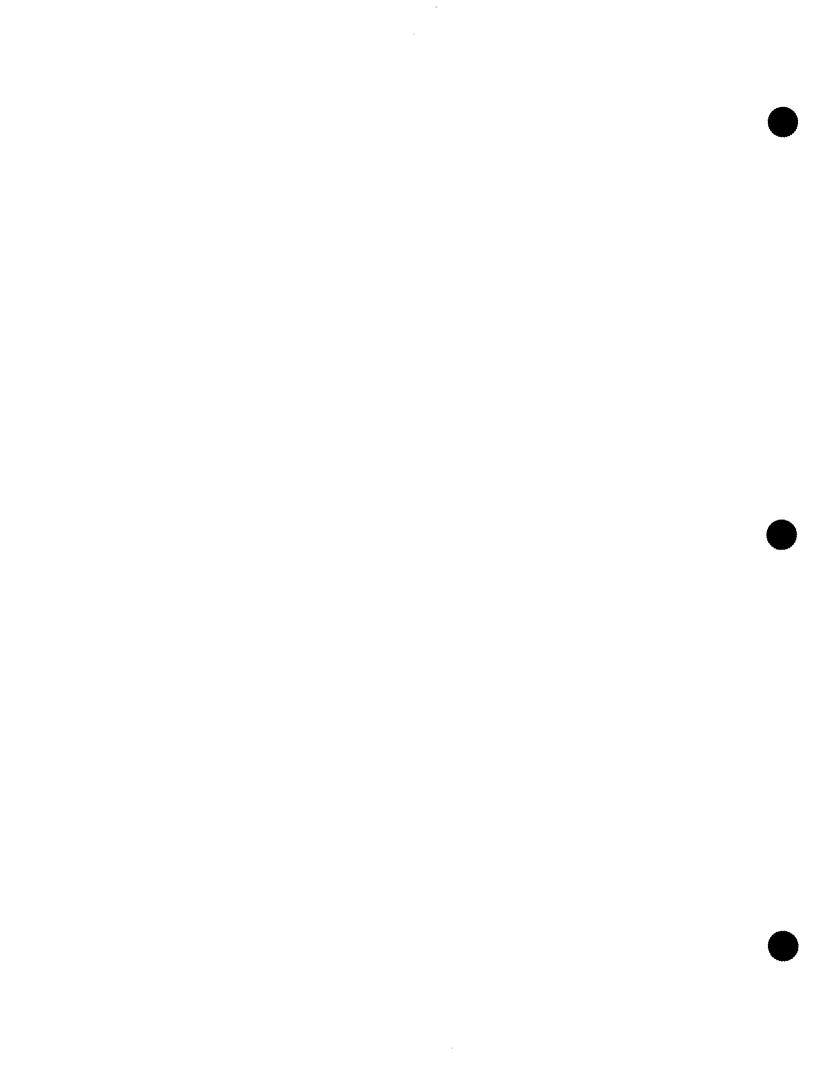

HISTORY

- 1. Amendment filed 10–24–75; effective thirtieth day thereafter (Register 75, No. 43).
- 2. Renumbering of former Section 3033.4 to Section 3033.5 and renumbering and amendment of former Section 3033.3 to Section 3033.4 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 77, No. 31.
- 3. Amendment filed 4-4-2002; operative 5-4-2002 (Register 2002, No. 14).

§ 3033.5. Application and Fees.

(a) Application. The applicant shall furnish any information requested and shall give consent to the Department to take plants from any planting for inspection or testing purposes. An application shall be submitted for the acceptance of any planting and for subsequent inspections, approvals or registration therein and it may be refused unless made sufficiently in

[The next page is 275.]

advance of time of planting to permit the Department to establish the origin of the stock, to determine the suitability of the location and to supervise any procedures that may be required.

- (b) Fees. The Department shall establish a schedule of fees for service provided in this article. The fee shall be based upon the approximate cost of the services rendered.
- (c) Refunds. Fees paid for services that are not rendered shall be refunded to the applicant.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 2. Renumbering of former Section 3033.4 to Section 3033.5 and new NOTE filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1)

Article 7. California Certified Seed Potatoes

§ 3035. Seed Potato Certification Agencies.

The secretary, after consultation with the University of California and the seed potato industry of California, as provided in Section 52651, Food and Agricultural Code, finds that the following is qualified to certify as to variety, quality, and freedom from pests of diseases of seed potatoes, and is hereby officially approved and recognized as a seed potato certification agency:

California Crop Improvement Association, a nonprofit corporation incorporated under the laws of the State of California.

NOTE: Authority cited: Sections 407 and 52651, Food and Agricultural Code. Reference: Section 52651, Food and Agricultural Code.

HISTORY

- 1. New Article 7 (\S \$ 3035–3035.8) filed 4–19–66; effective thirtieth day thereafter (Register 66, No. 10).

Article 8. California Certified Seed Garlic

§ 3044. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3044 to Section 3044.1 and new Section 3044 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 69, No. 36.

§ 3044.1. Definitions.

- (a) "Garlic" means plantlets, plants, bulbs, or cloves or any part of *Allium sativum* and its cultivars.
- (b) "Off-type" means different from the variety listed on the application for registration or certification or exhibiting symptoms of a genetic or non-transmissible disorder.
- (c) "Foundation block" means a garlic planting established using garlic subjected to laboratory disease elimination procedures and propagated under the supervision of the Department for the production of foundation stock.
 - (d) "Foundation stock" means garlic produced in a foundation block.
- (e) "Nursery increase block" means a garlic planting which has been established using foundation or registered stock for the production of registered stock.
- (f) "Registered stock" means garlic produced in an nursery increase block.
- (g) "Certified block" means a garlic planting which has been established using registered stock for the production of certified stock.
- (h) "Certified stock" means garlic that has been produced in a certified block.
- (i) "Certified seed garlic" means garlic certified in accordance with the provisions of this article.
- (j) "Participant" means any person or legal entity whose application has been submitted to and accepted by the Department.
- (k) "Farm" means an enterprise that includes all land, growing facilities, equipment, storage facilities, and labor that are utilized in a common effort to produce garlic and other *Allium* sp. crops.
- (1) "Program" means the seed garlic certification program administered by the Department pursuant to these regulations.
- (m) "Department" means the California Department of Food and Agriculture, the Secretary of Food and Agriculture, and its agents, employees, or representatives.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment of Article 8 (§§ 3044–3048) filed 9–4–69; effective thirtieth day thereafter (Register 69, No. 36). For prior history, see Registers 62, No. 8 and 63, No. 6.
- 2. Renumbering and amendment of former Section 3044 to Section 3044.1 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).
- 3. Repealer and new section filed 4–24–97; operative 5–24–97 (Register 97, No. 17).

§ 3044.2. General Provisions.

Participation in this program is voluntary and may be withdrawn at the option of the participant. Approval, supervision, inspection, sampling, determination, registration and certification, shall be conducted by the Department or its authorized agents.

(a) Approval of Registration or Certification. Planting locations accepted by the Department, laboratory examinations, and visual inspec-

tions form the basis for approval of registration as a propagative source and certification as California certified seed garlic. The Department may authorize the use of official certification tags or other indicia of certification for the identification of garlic which meets the requirements of this article. Except as otherwise provided, certification is based solely on a sample of garlic from each planting entered in the program.

- (1) Approval of Registration. The Department may approve the registration as a source of propagative material, either foundation or registered stock which has tested and found free of stem and bulb nematode, *Ditylenchus dipsaci*, and has been inspected and found free of white rot fungus, *Sclerotium cepivorum*.
- (2) Certification. The Department may certify garlic as California Certified Seed Garlic stock which has been inspected and found free of white rot fungus. *Sclerotium cepivorum*.
- (b) Refusal, Suspension or Cancellation of Registration or Certification. The Department may refuse certification services to anyone or may refuse, suspend, or cancel registration or certification for part or all of a planting under the following conditions, whether or not caused by actions or omissions of participants.
 - (1) The requirements of this article have not been met; or
- (2) The participant has failed to comply with participant responsibilities as specified in Section 3044.3 during current or past program participation; or
- (3) The participant has failed to pay in a timely manner, any fee or late charge required by this article.
- (4) Any condition exists which would hinder or prevent the accurate determination of whether or not the disease, pest, varietal purity, or other requirements of this article have been met; or
 - (5) The planting is infested with stem and bulb nematode; or
 - (6) The planting is infected with white rot fungus; or
- (7) The planting is infected or infested with any pest new to or of limited distribution within the State, unless the Department determines that the pest is of minor economic importance or determines that the pest can be safely delimited and the infected or infested garlic can be treated or rogued to eliminate the pest; or
- (8) A plant or plants are found to be off-type unless rogued to the satisfaction of the Department; or
- (9) For any reason the identity of the garlic becomes uncertain or has not been maintained; or
- (10) The certification seals or tags are misused or stock is materially misrepresented, whether or not the participant knew or should have known of the misrepresentation.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (b) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 2. Renumbering and amendment of former Section 3045 to Section 3044.2 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).
- 3. Repealer and new section filed 4–24–97; operative 5–24–97 (Register 97, No. 17).

§ 3044.3. Participant Responsibilities.

All participant responsibilities specified in this article shall be performed at the expense of the participant. Notifications as specified are required in order to assure that approval(s) may be granted before work is performed, to ensure that inspections may be made properly and in accordance with state laws governing worker health and safety for pesticide exposure, and to provide close working knowledge of filed operations. The participant shall be responsible for:

- (a) Application for registration or certification of a planting.
- (b) Selection of the planting location.
- (c) Selection and trueness to variety of garlic in a planting.
- (d) Propagation, record keeping, and pest freedom of all garlic subjected to laboratory disease elimination to be planted in a foundation block.

Page 276 Register 2007, No. 18; 5-4-2007

- (e) Culture, maintenance, farming and sanitation practices of a planting.
 - (f) Maintaining the identity of all garlic entered in the program.
- (g) Protecting garlic in possession from exposure to or damage from conditions and pests, including diseases, which could materially reduce the viability or productivity of the stock.
- (h) Notifying the Department at least one week in advance of planting and replanting, propagation operations, harvest and storage location, and movement of stock during storage.
- (i) Notifying the Department of the date of all pest control treatments in plantings for which inspections or other departmental activities are scheduled, the product(s) used, dosage(s) and any re-entry or worker safety requirements which apply. Such notification need not be made at times when inspections or other departmental activities are not scheduled to be performed.
- (j) The proper use of certification seals and tags provided by the Department and for marking on each tag the participant's name, harvest date (month, year), variety and the assigned block number and other information for identification purposes specified by the Department.
- (k) Maintaining production, tag use and sales records of the stock produced and/or sold. The tag use records shall be kept on an inventory sheet(s) supplied by the Department, unless otherwise specified by the Department in writing, and shall be submitted annually after the close of the season for sale or distribution of certified stocks.
- (*l*) Compliance with the requirements of this article and with other lawful orders specified by the Department.

HISTORY

- Renumbering and amendment of former Section 3046 to Section 3044.3 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).
- Amendment of section heading and repealer and new section filed 4–24–97; operative 5–24–97 (Register 97, No. 17).

§ 3044.4. Eligibility Requirements.

To be accepted for approval of registration or certification, garlic shall have been inspected and tested in prior growing season of production by the Department, as provided in Section 3044.6 or by another jurisdiction performing said inspections or testing under standards at least as strict, and not found to be infested with stem and bulb nematode or infected with white rot fungus. Garlic which has been exposed to a stem and bulb nematode infestation or a white rot fungus shall not be eligible for recertification.

- (a) In a Foundation Block. To be eligible for planting, garlic plants shall be produced via laboratory disease elimination techniques. Garlic planted in a foundation block shall be subject to inspection and testing procedures during the first year growth and development of the bulb.
- (b) In an Nursery Increase Block or Certified Block. To be eligible for planting, garlic shall be foundation stock or registered stock.
- (c) Qualification of Stock. A history of compliance may be established by inspection and testing as prescribed by this article for any garlic for which the disease status cannot be demonstrated to the satisfaction of the Department. The stock may be approved as registered stock or as certified stock at the end of three successive growing seasons provided it meets the requirements of this article. In addition, the initial amount to be entered shall be not more than 100 pounds and shall be inspected, sampled, and tested for stem and bulb nematode and white rot fungus as specified by the Department prior to planting.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 3048 to Section 3044.4 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).
- 2. Amendment of section heading and repealer and new section filed 4–24–97; operative 5–24–97 (Register 97, No. 17).

§ 3044.5. Requirements for Plantings.

(a) Location of Plantings. Each planting location shall be subject to inspection by the Department and shall be in a geographic area where con-

- tamination by stem and bulb nematode and white rot fungus from drainage, flooding, irrigation or other means is not likely to occur. The location requirements may be waived if the planting is made in a facility approved by the Department or if the land or soil has been treated in a manner approved by the Department to eliminate soil—borne pests.
- (1) Each planting shall be on land which no *Allium* sp. has grown for five years prior to planting.
- (2) Each planting shall be on land which is not known to be infested with white rot fungus.
- (3) Each planting shall be on a farm where all plantings of garlic shall be planted with garlic that has been certified or the equivalent, and all plantings on the farm of any *Allium* sp. planting shall be subject to inspection and testing as required in this article.
- (4) Each planting shall be at least 500 feet from any *Allium* sp. planting not entered in the program. This requirement may be waived if, in the judgement of the Department, there exists a sufficient natural barrier or if garlic not entered in the program has has an equivalent history.
- (5) Each planting in an area which the disease status is unknown or cannot be demonstrated to the satisfaction of the Department may be granted a conditional acceptance. The Department may accept a site after a history of compliance has been established at the end of three successive growing seasons. At the end of such time, the Department may certify the stock as registered or certified provided the requirements of this article have been met.
- (b) Maintenance of Plantings. Plantings entered in this program shall be kept in a good growing condition and pests shall be kept under effective control. Precautions shall be taken in cultivation, irrigation, movement and use of equipment and in other farming practices to guard against spread of soil-borne pests to plantings entered in this program.
- (1) Laboratory propagation of garlic to be entered in this program shall be carried out under standard aseptic microbiological techniques at all stages prior to potting. Potting media shall be sterile. Suitable precautions shall be taken to guard against the introduction or spread of soil-borne pests into greenhouse facilities being used to grow-out such laboratory propagated garlic.
- (2) Each foundation block, nursery increase block, and certified block shall be a separate planting of garlic. There shall be a minimum of six feet or one or more blank beds separating blocks or varieties within a block unless suitable precautions are taken to maintain identity.
- (c) Harvesting, Cracking, and Storage of Garlic. Precautions shall be taken during harvesting, cracking, and storage to prevent the contamination by stem and bulb nematode and white rot fungus.
- (1) Garlic shall be harvested, cracked, and stored separately in such a manner to preclude intermixing.
- (2) Garlic shall be kept in containers that are new or clean and not previously used for any *Allium* sp. or that have been sanitized.
- (3) Garlic shall be stored in sanitized storage areas after harvest and shall not be stored within the same storage facility with *Allium* sp. known to be infested with stem and bulb nematode or infected with white rot fungus. Certified garlic may be stored, with prior approval by the Department, with non–certified garlic provided that the non–certified garlic is not known to be infested with stem and bulb nematode or infected with white rot fungus, and further provided, that suitable precautions have been taken to preclude intermixing.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).
- Amendment of section heading and repealer and new section filed 4–24–97; operative 5–24–97 (Register 97, No. 17).

§ 3044.6. Inspection and Testing Procedures.

Inspection and testing procedures approved by the Department to detect stem and bulb nematode and white rot fungus shall be conducted at times determined as suitable. To establish a history of compliance for the qualification of stock, Section 3044.4(c), or for a location, Section 3044.5(a)(4), the inspection and testing procedures shall be the same as

those required for an nursery increase block. Additional inspections or tests may be required by the Department if seasonal conditions or other factors tend to obscure disease symptoms or make adequate inspection, or when stem and bulb nematode or white rot fungus or other serious pests are suspected. The Department may sample garlic from any planting or storage facility for inspection or testing purposes. Samples shall be furnished without charge.

- (a) Inspections. To determine eligibility of a planting, the following inspections shall be made:
- (1) For laboratory/greenhouse production, at least two inspections shall be made annually and may include the grow—out of laboratory propagated stock in greenhouse facilities.
- (2) For all field plantings including plantings not entered in the program and other *Allium* sp., at least one growing season inspection.
 - (3) Harvest and/or storage inspection.
- (b) Nematode Testing. Laboratory examination of a sample of garlic for the stem and bulb nematode shall be conducted for all plantings except as otherwise provided. Sampling for nematodes may be combined with the growing season inspection at the discretion of the Department.
- (1) For laboratory/greenhouse production, a sample may be collected of mother stock or explant.
- (2) For foundation plantings, a sample of garlic shall be collected at approximately 20–foot intervals and composited on a one acre basis; for plantings less than a quarter acre, a reasonable sample, but not more than 5% of the plants shall be collected from each selection or variety.
- (3) For nursery increase block plantings, a sample of garlic shall be collected at approximately 20-foot intervals and composited on a one acre basis.
- (4) For certified block plantings, at the option and on the request of the participant, a sample of garlic bulbs may be collected at approximately 40–foot intervals and composited on a four acre basis.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 3047 to Section 3044.6 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For history of former Section 3047, see Register 77, No. 31.
- Amendment of section heading and repealer and new section filed 4–24–97; operative 5–24–97 (Register 97, No. 17).

§ 3044.7. Application and Fees.

- (a) Application. Upon submitting an application, the applicant shall furnish information requested regarding each planting and shall consent to the taking of samples or plants by the Department from any planting for inspection or testing purposes. A separate application shall be submitted for each planting and may include more than one variety provided that they are entered as the same class.
- (1) In the case of participants engaged in laboratory/greenhouse production, application, along with the required fees, shall be made 15 days prior to initiation of propagation or planting.
- (2) A preliminary application for site approval of field plantings along with the required fees shall be submitted by August 1, prior to planting.
- (3) A final application for all field plantings, including farm survey when required, along with the required fees shall be submitted for each planting by March 15.
- (4) A late application may be accepted by the Department provided that a late fee is paid and that the application is made sufficiently in advance of the times required to determine the eligibility of the stock and the suitability of the location, to supervise any treatment that may be required, and to adequately perform the inspections and tests outlined in this article.
- (b) Fees. Fees established in this article are payable in advance of the work to be done and are for the sole purpose of defraying expenses incurred in the approval, inspection, testing, registration and certification procedures herein provided and are not to obtain any right or privilege. The schedule of fees for the services provided in this article are based upon the approximate cost of the services rendered. The Secretary of

Food and Agriculture, pursuant to Section 5822 of the Food and Agricultural Code, hereby establishes fees for approvals and inspections, including sampling and testing for the seed garlic certification program. The fees shall be:

- (1) Laboratory/Greenhouse Production. \$200.00 for each facility.
- (2) Preliminary Application. \$150.00 for all field plantings at the same location.
- (3) Acreage Fee. In addition to the preliminary application fee, an acreage fee for each acre in excess of one acre or portion of an acre for the following field plantings:
 - (A) Foundation Block. \$75.00 per acre or portion of an acre.
 - (B) Nursery Increase Block. \$75.00 per acre or portion of an acre.
 - (C) Certified Block. \$25.00 per acre or portion of an acre.
- (D) Qualification of Stock or Site Inspection for a New Location. \$75.00 per acre.
- (4) Farm Survey of Non Certified Garlic and Other *Allium* sp. \$10.00 per acre or portion of an acre.
 - (5) Stem and Bulb Nematode Testing.
 - (A) Qualification of Stock. \$200.00 per variety or selection submitted.
- (B) Optional Field Testing For Certified Plantings. \$15.00 per acre or portion of an acre.
- (6) The late fee shall be \$100.00 for each application postmarked after the times established in this article.
- (7) The Department may charge additional fees when due to conditions, total acreage entered, or number of tests performed, the fees established do not cover the cost of the service.
- (8) The hourly rate for certification services shall be \$50.00 per hour applied to travel time (portal to portal), field time, and documentation time.
- (9) Fees paid for services that are not rendered shall be refunded to the applicant, less direct costs incurred by the Department.
- (10) No fees shall be charged to the University of California or the United States Department of Food and Agriculture for registration or for inspection and testing of garlic provided there is no additional expense to the Department other than for observation of the inspection and testing required by this article and for the keeping of records. When the procedures prescribed in this article are conducted by the University of California, or by the United States Department of Agriculture, they shall not be less than provided in this article, and the Department shall be notified each year of the garlic to be entered or continued in the program.

HISTORY

 Renumbering and amendment of Section 3047 to Section 3044.6 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 77, No. 31.

§ 3048. Approval and Certification.

HISTORY

1. Renumbering and amendment of Section 3048 to Section 3044.4 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

Article 9. Regulations for California Certified Strawberry Plants

§ 3049. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3049 to Section 3049.1 and new Section 3049 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

Page 278 Register 2007, No. 18; 5-4-2007

§ 3049.1. Definitions.

- (a) "Virus infected" means infected by a virus or having symptoms or behavior characteristic of a virus disease listed in Section 3049.3(a)(1)(B).
- (b) "Index" means to test for virus infection by making a graft with tissue from the plant to be tested to an indicator plant or by other methods approved by the director. Information regarding such other methods may be obtained from the Department's Pest Exclusion Unit.
- (c) "Off-type" means any strawberry plant different from the variety stated on the application for approval or certification.
- (d) "Nuclear stock" means strawberry plants which were originally indexed and their progeny, which have been regularly reindexed and protected continuously from virus infection by Federal or State agencies.
- (e) "Foundation stock" means strawberry plants that are first year propagation from plants that have been approved on the basis of annual indexing.
- (f) "Registered stock" means strawberry plants that are first year propagation from foundation stock.
- (g) "Certified stock" means strawberry plants that are first year propagation from registered stock.
- (h) "Foundation block" means a planting of strawberry plants for the production of foundation stock.
- (i) "Increase block" means a planting of strawberry plants for the production of registered stock.
- (j) "Certified block" means a planting of strawberry plants for the production of certified stock.
- (k) "Nuclear meristem stock" means strawberry plants which were propagated with meristematic tissue from a plant which had heat therapy and were originally index-tested and found free of known viruses by Federal or State agencies.
- (l) "Clone" means a progeny of an individual strawberry plant which was produced asexually.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment of Article 9 (Sections 3049–3053) filed 6–6–63 (Register 63, No. 10). For prior history see Register 62, No. 8.
- 2. Editorial correction (Register 76, No. 38).
- 3. Amendment filed 3–10–78 as an emergency; effective upon filing (Register 78, No. 10)
- 4. Certificate of Compliance filed 5-22-78 (Register 78, No. 21).
- 5. Renumbering and amendment of former Section 3049 to Section 3049.1 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3049.2. General Provisions.

Participation in this program is voluntary and may be withdrawn at the option of the applicant.

Registration, certification, approvals and supervision shall be conducted by the Department.

(a) Except as otherwise provided, certification is based solely on visual inspections of sample plants from each planting.

- (b) Responsibility of Applicant. The applicant shall be responsible for:
- (1) The selection of the location and the proper maintenance of a planting being grown under the provisions of this article.
- (2) Maintaining the identity of all nursery stock entered in the program.
- (3) Notifying the Department at least one week in advance of planting and harvesting as to when they will commence and notifying the Department of the location where the plants will be trimmed and stored.
- (4) Maintaining the identity of each lot of plants in the participant's possession and placing the required information on each certification tag furnished by the Department.
 - (c) Location of Plantings.
- (1) General. Each planting location shall be in an area which is isolated from plantings for strawberry fruit production to prevent spread of infectious pests or virus diseases. Any land planted shall have been free of strawberry plants for the previous year, except when treated for soilborne pests in an approved manner under the supervision of the Department. Any planting may be enclosed by an approved insect-proof screenhouse, and when this is done the distance from other plantings or plants as specified in this article to minimize spread of virus diseases shall not be required providing varieties, plant blocks and plants to be indexed are kept separate in an approved manner to maintain plant identity. Native strawberry plants presenting no evidence of virus infection are excluded from required isolation distances for planting.
- (2) Foundation blocks shall be located at least one mile from any other strawberry plants except those in foundation blocks determined to be of equal pest status. Foundation blocks shall be clone planted. Each plant in a foundation block selected for testing by indexing together with its runners shall be kept separate from all other plants in the block by an open space of 12 inches or by an artificial barrier to maintain plant identity.
- (3) Increase blocks shall be located at least one mile from any other strawberry plants to prevent spread of virus disease. When danger of possible spread of virus diseases from one block to another does not appear to exist the one mile distance may be waived and increase blocks and certified blocks may be planted adjacent to each other.
- (4) Certified blocks shall be located at least one mile from any strawberry plants maintained for the purpose of commercial fruit production and not less than 500 feet from any other strawberry plants not entered in the program to maintain plant identity and prevent spread of virus diseases.
 - (d) Maintenance of Plantings.
- (1) Any planting entered in this program shall be kept in a thrifty growing condition and pests shall be kept under intensive control. To maintain plant identity, each variety shall be planted at least 12 feet from any other variety and runners shall not be permitted to cross over an open space of 12 inches maintained between such varieties. If a screenhouse is used for any planting, it shall be maintained in such condition that insect vectors cannot enter. Plants of each variety shall be harvested separately from all other varieties and continuously kept separate. In a foundation block each plant that has been tested by indexing, together with its runner plants,

[The next page is 285.]

shall be harvested separately. Plants must be harvested after one growing season in order to be eligible for approval or certification.

- (2) Any plant found to be off-type shall together with its runner plants be removed immediately from any planting.
 - (e) Eligibility for Planting.
- (1) In a foundation block: To be acceptable for planting in a foundation block, a plant shall be (A) nuclear meristem stock; (B) nuclear stock; (C) foundation stock; or (D) registered stock, certified stock, or plants determined to have an equivalent known history providing each plant in the foundation block is to be tested by indexing or by other approved methods for the detection of virus infection. More than one variety may be planted in a foundation block providing they are of equal pest status.
- (2) In an increase block: To be acceptable for planting in an increase block a plant shall be first year propagation from foundation stock produced in a foundation block.
- (3) In a certified block: To be acceptable for planting in a certified block a plant shall be first year propagation from registered stock produced in an increase block or first year propagation from foundation stock produced in a foundation block.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- Amendment filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 2. Amendment of subsection (d) filed 3–10–78 as an emergency; effective upon filing (Register 78, No. 10).
- 3. Certificate of Compliance filed 5-22-78 (Register 78, No. 21).
- 4. Renumbering and amendment of former Section 3050 to Section 3049.2 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3049.3. Inspection and Testing Procedures; Refusal or Cancellation of Approval or Certification.

- (a) To Determine Eligibility for Approval or Certification:
- (1) Inspection and testing procedures prescribed in this article shall be conducted by the Department in a manner and at times determined as suitable. The applicant will be notified of the findings of pests. Any plant in any planting may be tested by indexing or by other approved methods for the detection of virus infection. Testing procedures shall be conducted in a greenhouse.
- (A) Each clone in a foundation block and a minimum of 3 percent of the plants planted therein shall be tested one or more times annually by indexing or by other approved methods for the detection of virus infection. All plants in a foundation block shall be tested in such a manner if the source of any of the propagating stock is registered stock or certified stock or has an equivalent known history.
- (B) Foundation stock shall be tested for the specific virus diseases using the specific indicator plants listed below:

Indicator Plant Disease Fragaria virginiana selection Leafroll Mottle Veinbanding Witchesbroom Latent "C Fragaria (alpine) vesca selection Crinkle Feather leaf **Pallidosis** Necrotic shock Mild yellow edge Tomato ringspot Pseudo mild

- (C) At least two visual inspections shall be made of each planting prior to harvest and in addition plants shall be inspected at digging time. Inspection for the detection of harmful nematode pests may be made using laboratory methods and is required for approval as foundation stock or as registered stock.
 - (b) Refusal or Cancellation of Approval or Certification:
- (1) Failure to comply with the requirements of this article shall be cause for refusal or cancellation of approval of plants as "foundation stock," "registered stock," or certification as "California certified strawberry plants."
- (2) The certification or approval as foundation stock or as registered stock of a plant or plants in part or all of a planting shall be refused or cancelled when it is determined that:

- (A) the plant is off-type;
- (B) the plant, clone or planting is virus infected;
- (C) the pest cleanliness requirements for nursery stock in Section 3060.2 of the nursery inspection regulations have not been met.

Reactions to indicator plants caused by unknown factors may also be cause to disqualify the specific foundation selection tested.

- (3) Any plant or clone found virus infected or suspected of virus infection may be required to be rogued or may be refused for further propagation. Any planting in which a plant is found to be virus infected may be refused, if it is determined that spread of the virus may have occurred, except: (A) when the total of virus infected plants in a certified block does not exceed 0.5 percent; (B) aster yellows disease is found in a planting and it is determined that the infected plants are readily identifiable and can be removed under the supervision of the Department.
- (4) Any planting in which off-type plants are found to exceed 0.2 percent shall be refused, except that in a planting which has been clone planted, the off-type plants may be removed under the supervision of the Department if it is determined that all of the off-type plants are readily identifiable and can be removed.
- (5) Each plant together with all its runner plants shall constitute one unit, and the results of either field inspections or index tests or both may be used, as a basis for calculating percentages.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 4-7-65; effective thirtieth day thereafter (Register 65; No. 6).
- 2. Amendment filed 3–10–78 as an emergency; effective upon filing (Register 78, No. 10).
- 3. Certificate of Compliance filed 5-22-78 (Register 78, No. 21).
- 4. Renumbering and amendment of former Section 3051 to Section 3049.3 filed 1230–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3049.4. Approval and Certification.

- (a) Approval: The Department will approve as "foundation stock" or "registered stock" plants that have met the requirements of this article, and will, for their identification, authorize the use of official tags for "foundation stock" or "registered stock."
- (b) Certification: The Department will certify plants that have met the requirements of this article for certification and will authorize for the identification of such stock, the use of official certification tags.
- (c) Identity: Any person selling "foundation stock," "registered stock" or "California certified strawberry plants" is responsible for maintaining identity of the nursery stock bearing an official tag while the stock is in possession of the seller and for such nursery stock meeting the requirements of this article.
- (d) Accountability: Persons issued tags authorized by this article shall account for sock produced and sold and tags used and shall record such production, sale, and use on an inventory sheet provided by the Department. The inventory sheet shall be submitted to the Department annually.
- (e) Certification by a Second Party: Strawberry plants produced by a participant in the certification program in accordance with the provisions of this article may be eligible for certification by a second party provided:
- (1) The second party submits an application, pays the required fees, and signs the agreement required by Section 3069;
- (2) The certification tags are stamped by the second party with his name and address and the block number of the producer of the plants. NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3053 to Section 3049.4 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3049.5. Application and Fees.

(a) Application. The applicant shall furnish information requested and shall give consent to the Department to take plants from any planting for inspection or testing purposes. An application shall be submitted for the acceptance of any planting and for subsequent inspections, approvals or certification and may be refused unless made sufficiently in advance of the time of planting to permit the Department to establish the origin of

the stock, determine the history of the location and supervise any treatment that may be required.

- (b) Fees. The Department shall establish a schedule of fees for services provided in this article. Fees are payable in advance of the work to be done and are for the sole purpose of defraying expenses incurred in the inspection, approval and certification services provided and are not to obtain any right or privilege. Fees shall be submitted at the time of application, except that fees may be paid after planting upon prior approval by the Department.
- (1) No fees shall be charged the University of California or the United States Department of Agriculture for registration or for the inspection and testing of plants provided there shall be no expense to the Department other than for observation of the inspection and testing required in the article, and for the keeping of records. When the procedures prescribed in the article are conducted by the University of California, or by the United States Department of Agriculture, they shall not be less than provided in this article, and the Department shall be notified each year of the plants to be entered or continued in the program.
- (2) With respect to all of the fees, the Department may require a larger fee on any or all plantings entered when, because of conditions and total acreages entered, the fees will not cover the cost of the service. This may apply to districts or the entire State.
- (c) Refunds. Fees paid for services that are not rendered shall be refunded to the applicant.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Section 5822, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 4–7–65; effective thirtieth day thereafter (Register 65, No. 6).
- 2. Amendment of subsection (a) filed 7–28–77 as organizational and procedural, effective upon filing (Register 77, No. 31)
- 3. Amendment filed 3–10–78 as an emergency; effective upon filing (Register 78, No. 10).
- 4. Certificate of Compliance filed 5-22-78 (Register 78, No. 21).
- 5. Renumbering and amendment of former Section 3052 to Section 3049.5 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

§ 3050. General Provisions.

HISTORY

1. Renumbering and amendment of Section 3050 to Section 3049.2 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 78, No. 21.

§ 3051. Inspection and Testing Procedures.

HISTORY

1. Renumbering and amendment of Section 3051 to Section 3049.3 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 78, No. 21.

§ 3052. Application and Fees.

HISTORY

1. Renumbering and amendment of Section 3052 to Section 3049.5 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1). For prior history, see Register 78, No. 21.

§ 3053. Approval and Certification.

HISTORY

1. Renumbering and amendment of Section 3053 to Section 3049.4 filed 12–30–83; effective thirtieth day thereafter (Register 84, No. 1).

Article 10. Nursery Stock Nematode Certification

§ 3055. Disclaimer of Warranties and Financial Responsibility.

The provisions of Section 3069 shall apply to this article.

NOTE: Authority: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

1. New article 10 and section filed 8–16–94 as an emergency; operative 8–16–94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL

- by 12–14–94 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

§ 3055.1. Definitions.

- (a) "Approved treatment" means any soil preparation, treatment, and post-treatment recontamination preventative measures that are approved, documented, and supervised by the Department as a means of producing nursery stock free of nematodes.
- (b) "Soil" includes, but is not limited to, what is generally known as soil, mixtures of soil and horticultural soil amendments, and horticultural soil amendments alone, as blends, or as mixtures, used as a plant growing medium.
- (c) "Approved laboratory methods" means any soil sampling plans; growing plot or sample identification methods; sample protection, transportation, and processing methods; nematode extraction methods; and nematode diagnostic procedures approved by the Department to test soil and plants for the presence of nematodes.
- (d) "Free of nematodes" means free of nematodes consistent with the capacity of the approved treatment and approved laboratory methods prescribed in this article respectively to yield nursery stock free of nematodes or to detect low level nursery stock nematode infestations. It does not mean complete freedom and nematodes may be present consistent with the limitations inherent to the prescribed approved treatment and approved laboratory methods.
- (e) "Nematode" means nematode species that the Department determines to be economically important.
- (f) "Participant" means any person for whom the Department has approved an application for nursery stock nematode certification.
- (g) "Program" means the nursery stock nematode certification program administered by the Department pursuant to these regulations.
- (h) "Department" means the California Department of Food and Agriculture, the Secretary of Food and Agriculture, and its agents, employees, or representatives.

NOTE: Authority: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- New section filed 8–16–94 as an emergency; operative 8–16–94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–14–94 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

§ 3055.2. General Provisions.

- (a) California grown nursery stock may be certified to nematode cleanliness when grown and handled in accordance with the procedures outlined in this article.
- (b) Participation in this program is voluntary and may be withdrawn at the option of the applicant.
- (c) Approvals, inspections, tests, supervision, determinations, and certifications shall be conducted by the Department or its authorized agents.
 - (d) Refusal, Suspension, or Termination of Certification.
- The Department reserves the right to refuse certification services to anyone and may refuse, suspend, or terminate certification for part or all of a planting if:
 - (1) The requirements of this article have not been met; or,
 - (2) Participant responsibilities specified in this article are not met; or,
- (3) Any condition which hinders or prevents proper treatment, approval, field or plant sampling, or laboratory nematode diagnostics; or,
- (4) A planting or part of a planting is found to be nemotode infested; or.
- (5) The identity of the stock becomes uncertain or has not been properly maintained; or,
 - (6) Indicia of certification are misused or stock is misrepresented.

Page 286

NOTE: Authority: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. New section filed 8–16–94 as an emergency; operative 8–16–94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–14–94 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

§ 3055.3. Participant Responsibilities.

All participant responsibilities specified in this article shall be performed at the expense of the participant. The participant shall be responsible for:

- (a) Application for nursery stock nematode certification.
- (b) Selection of planting location(s).
- (c) Soil treatments.
- (d) Post-treatment cultural and sanitation practices necessary to help prevent nematode recontamination.
- (e) Notifying the Department of the date of all pest control treatments in plantings for which inspections are scheduled, the product used, dosage and any re—entry or worker safety requirements which apply. This notification is required to assure that approvals and inspections may be made properly and in accordance with state law governing worker health and safety for pesticide exposure. Such notification need not be made at times when inspections are not scheduled.
- (f) Proper use of all official indicia of certification provided by the Department.
- (g) Compliance with the requirements of this article and with all other applicable laws and regulations.

NOTE: Authority: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-16-94 as an emergency; operative 8-16-94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12-14-94 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

§ 3055.4. Eligibility.

Any clearly identified block or lot of nursery stock being grown in soil which, at the time of application, can be determined to be free of nematodes may be entered for certification of nematode freedom at the time of harvest and/or sale. Nursery stock meeting the requirements of this article shall be eligible for certification using official indicia of certification for a period of not more than two growing seasons after approved soil treatment and planting; or, 12 months after the nursery stock has been determined to be free of nematodes based on approved laboratory methods. In either of the foregoing cases, eligibility will be invalidated if, after harvest, nursery stock is stored in untreated soil or otherwise exposed to nematodes.

NOTE: Authority: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- New section filed 8-16-94 as an emergency; operative 8-16-94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12-14-94 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 8-16-94 order transmitted to OAL 12-14-94 and filed 1-26-95 (Register 95, No. 4).

§ 3055.5. Certification.

The Department will issue and authorize the use of official tags, seals or other indicia of certification on nursery stock which meets the requirements of this article. Nursery stock may be certified for nematode freedom in accordance with subsection (a) or (b) below.

(a) Certification Based on Approved Treatment.

Certification based on approved treatment involves the planting of nursery stock (including seed, unrooted cuttings, rooted cuttings, plantlets or seedlings) in approved treated soil and protecting it against nematode contamination until harvest and sale. Rooted planting stock must be determined to be free of nematodes using approved laboratory methods prior to planting in approved treated soil. Prescribed soil preparation requirements must be documented and approved chemical treatments must be both supervised and documented by the Department. All documentation and required supervision may be performed at the time of treatment.

- (1) Field Treatment.
- (A) Pre-Treatment Soil Preparation.
- 1. Trash Removal.

Plant material must be removed and the planting site shall be disced to reduce the size of trash remaining so that the treatment will be effective. Both trash removal and discing shall be performed to the satisfaction of the Department.

2. Waiting Period.

A clean-fallow period shall be maintained, after trash removal and before treatment, as follows:

- a. Not less than 24 months following removal of an orchard or vineyard that has been in place for more than one year.
- b. Not less than nine months following removal of a previous woody nursery crop which has been in place for more than one year.
- c. Not less than six months following removal of a nematode host crop which has been in place for less than one year.
- d. No waiting period is required after the removal of an annual vegetable plant crop.
- 3. Soil shall be worked to a depth of two to three feet to break up hardpan or plowsole. Soil moisture and cultivation shall be adequate to render the soil in seed bed condition.
 - (B) Treatment.

All applications of pesticides must be made in compliance with the applicable laws and regulations.

- 1. Soil temperature at depth of injection shall be $40^{\circ}F$ and $80^{\circ}F$. If the soil temperature is above $80^{\circ}F$, but $85^{\circ}F$ or less, the dosage of methyl bromide should be increased by 5% over the minimum specified by the Department.
 - 2. Materials and Schedules of Dosages.

The rate per acre for the fumigant used shall not be less than the minimum prescribed by the Department. Treatments for soils containing more than 30% clay may not be approved.

- 3. Treatments in accordance with these procedures shall be good for 18 months from the date of treatment to planting date provided that the treated area is clean–fallowed and otherwise not exposed to nematode reinfestation.
- 4. Application methods include dual application, tarping (solid and strip), or any other suitable method as approved by the Department. The tarp used in a methyl bromide fumigation shall remain in place for 48 hours.
- 5. Any lot of rooted nursery stock which has not been approved in the nematode control program must be sampled using approved laboratory methods, and found to be free of nematodes, prior to planting in approved treated soil.
- 6. Nursery stock produced in accordance with these approved procedures shall be stored, healed—in, or calloused in media, beds, or storage areas approved by the Department. Treatments may be required to protect against nematode infestation.
 - (2) Container, Flat, and Frame Grown Nursery Stock.

All soil, containers, flats, and soil within frames shall be treated prior to planting. Following treatment, the soil and containers shall be protected from reinfestation by nematodes. The following are approved treatments:

- (A) Aerated steam in a closed chamber until all soil reaches a temperature of not less than $140^{\rm o}F$ and is maintained for not less than 30 minutes; or
- (B) Steamed in a closed chamber until temperature of all soil reaches 180°F; or,

- (C) Fumigated under a plastic tarpaulin or in a gas-tight chamber for 24 hours using two pounds of methyl bromide per 100 cubic feet. Soil temperature shall not be lower than 50°F at start of treatment.
 - (b) Certification Based on Approved Laboratory Methods.

The following, or other, laboratory methods approved by the Department shall be used to determine nematode freedom. Any sample in which nematode is detected shall be considered infested and not eligible for certification under the provisions of this article unless there is a Department–approved eradicative treatment and the participant so treats the nursery stock.

(1) Field Grown Nursery Stock, Generally.

Collect samples on a 40 foot x 40 foot grid interval throughout the planting. Samples may be composited on an acre or nursery stock variety basis. Alternatively, at the discretion of the Department, samples may be collected on an 80 foot x 80 foot grid interval and composited on a two-acre basis when either of the following conditions have been met:

- (A) The planting site has been treated at the product labeled rate for the kind of nursery stock being produced.
- (B) No nematodes have been found by laboratory methods in the previous two successive nursery crops on the growing site.
 - (2) Container, Flat, and Frame Grown Nursery Stock.

A composite sample is to be obtained from every 100 square feet of bench or frame space. Each sample should be kept to a logical and practical size as determined by the Department.

(3) Delimitation.

When an original sample is positive for nematodes, delimitation sampling may be performed on a 20 foot x 20 foot grid interval with samples composited on a 1/4–acre basis. All delimitation shall be done at the Department's discretion. Any nursery stock represented by a delimitation sample in which a nematode is detected is considered infested. Any nursery stock represented by a delimitation sample that is free of nematodes shall be eligible for certification.

(4) Bare root sampling may be performed using procedures approved by the Department.

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Reference: Sections 5821 and 5822, Food and Agricultural Code.

HISTORY

- 1. New section filed 8–16–94 as an emergency; operative 8–16–94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–14–94 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

§ 3055.6. Application and Fees.

(a) Application.

The applicant shall furnish any information requested regarding the planting and shall consent to the taking of samples by the Department for inspection or testing purposes. The required fees shall accompany each application submitted.

- (1) An application for approval of a soil treatment shall be submitted with the Department 15 days prior to the planned start of treatment to allow for scheduling of inspections and to verify stock eligibility.
- (2) An application for testing using approved laboratory methods shall be submitted to the Department by not less than 15 days prior to the month in which sampling must be performed to allow for workload scheduling.
- (3) A late application may be accepted as workload, scheduling, and staffing permit. If workload, scheduling, or staffing do not allow for required testing using approved laboratory methods, a late application will be refused.
 - (b) Fees.

Fees established by this article are payable in advance of the work to be done and are for the sole purpose of defraying expenses incurred in the approval, inspection, sampling, and determination procedures and are not to obtain any right or privilege.

- (1) The Department shall establish a schedule of fees for the services provided in this article based upon the approximate cost of the service rendered
- (2) The Department may charge additional fees when due to conditions, total acreage entered, or number of samples and/or determinations made, the fees established will not cover the cost of the service.
 - (3) The Department may establish a late fee for applications.
- (4) Fees paid for services that are not rendered shall be refunded to the applicant provided, however, that amounts refunded may be prorated based on the amount of work actually performed by the Department in the administration of the requirements of this article.
 - (c) Fee Schedule.
- (1) The Secretary of Food and Agriculture, pursuant to Section 5822 of the Food and Agricultural Code, hereby establishes fees for inspections, including sampling and testing, and special treatments for the nursery stock nematode certification program. The fees shall be:
 - (A) Supervision of Soil Treatments.
- 1. \$45.00 per hour per site when the application is postmarked a minimum of fifteen (15) days prior to initiation of the treatment.
- 2. \$100.00 late fee plus \$45.00 per hour per site when the application is postmarked less than fifteen (15) days prior to initiation of the treatment.
 - (B) Sampling. \$45.00 per hour.
 - (C) Testing. \$40.00 per sample submitted.
 - (D) Supervision of Commodity Treatments.
- 1. \$45.00 per hour when application is postmarked a minimum of fifteen (15) days prior to initiation of the treatment.
- 2. \$100.00 late fee plus \$45.00 per hour when application is post-marked less than fifteen (15) days prior to initiation of the treatment.
- (2) When calculating service charges, the hourly rate shall be applied to travel time (portal to portal), field time, and documentation time. NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Code. Ref-

NOTE: Authority cited: Sections 407 and 5823, Food and Agricultural Coerence: Section 5822, Food and Agricultural Code.

HISTORY

- New section filed 8-16-94 as an emergency; operative 8-16-94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12-14-94 or emergency language will be repealed by operation of law on the following day.
- 2. New subsections (c)–(c)(2) filed 8–30–94 as an emergency; operative 8–30–94 (Register 94, No. 35). A Certificate of Compliance must be transmitted to OAL by 12–28–94 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 8–30–94 order, including amendment of subsection (c)(1) transmitted to OAL 11–29–94 and filed 1–11–95 (Register 95, No. 2)
- Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).
- Amendment of subsections (c)(1)(A)–(B) and (c)(1)(D)1.–2. filed 9–29–2003; operative 10–29–2003 (Register 2003, No. 40).

§ 3056. Tree Identification.

NOTE: Authority cited: Sections 407 and 435, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–19–52; effective thirtieth day thereafter (Register 27, No. 5).
- 2. Editorial change of article number from 4 to 10 (Register 62, No. 8).
- 3. Repealer of Article 10 (Section 3056) filed 12-30-83; effective thirtieth day thereafter (Register 84, No. 1).

Article 11. Nursery Inspection

§ 3060. Nursery and Seed Inspection.

Definitions. The following definitions, in addition to those stated in Subarticle 10 Sections 25–49 and 5001–5008 of the Food and Agricultural Code, apply to this article.

- (a) "Qualified nursery and seed inspector" means a representative of the County Agricultural Commissioner who:
- (1) Possesses a State certificate of qualification in Nursery and Seed Regulation and Plant Quarantine and Pest Detection, or

- (2) A member of a Commissioner's staff possessing required experience and education, studying for State certification, and working under the supervision of a qualified nursery and seed inspector.
- (b) "Noxious weed seed" is as defined in Subarticle 10 Section 52256 of the Food and Agricultural Code.
- (c) "Turf" means field cultivated turfgrass sod consisting of grass varieties, or blends of grass varieties, and Dichondra for use in residential and commercial landscapes.

NOTE: Authority cited for Sections 3060 through 3060.5: Sections 407, 6901–6904, 6961–6970, and 52333, Food and Agricultural Code. Reference: Sections 5821–5827, 6901–6904, 6961, 6965, 6968, and 52333, Food and Agricultural Code.

HISTORY

- Amendment of Sections 3060 through 3060.5 filed 10–10–68; designated effective 12–15–68 (Register 68, No. 38). For prior history, see Register 64, No. 2.
- 2. New subsection (d) filed 1-23-73; effective thirtieth day thereafter (Register 73, No. 4).
- Amendment filed 9–11–79; effective thirtieth day thereafter (Register 79, No. 37).

§ 3060.1. Inspection of Nurseries.

(a) Each Commissioner shall inspect nursery stock, other than seed, which is being grown or sold as often as is required to assure compliance with pest cleanliness.

NOTE: Authority cited: Sections 407, 6502, 6901, and 6902, Food and Agricultural Code. Reference: Sections 6502, 6901–6904, and 6961, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–23–73; effective thirtieth day thereafter (Register 73, No. 4).
- 2. Amendment filed 9–11–79; effective thirtieth day thereafter (Register 79, No. 37).
- 3. Amendment of subsection (b) filed 2-11-81; effective thirtieth day thereafter (Register 81, No. 7).
- 4. Amendment of subsection (a) and repealer of subsection (b) filed 8–16–94 as an emergency; operative 8–16–94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–14–94 or emergency language will be repealed by operation of law on the following day.
- 5. Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

§ 3060.2. Standard of Cleanliness.

Any person selling, handling or growing nursery stock, other than seed, produced, held, or offered for sale, shall maintain the following standard of cleanliness of nursery stock in his possession.

- (a) All nursery stock shall be kept commercially clean in respect to established pests of general distribution. Commercially clean shall mean that pests are under effective control, are present only to a light degree, and that only a few of the plants in any lot or block of nursery stock or on the premises show any infestation or infection, and of these none show more than a few individuals of any insect, animal or weed pests or more than a few individual infestations of any plant disease.
 - (b) All nursery stock shall be kept free of:
- (1) Pests of limited distribution including pests of major economic importance which are widely, but not generally distributed, except as provided in section 3060.4 (a)(1)(C) below; and
- (2) Pests not known to be established in the State. Included in the meaning of this paragraph is that turf shall be kept free of noxious weeds.
- (c) Where the Commissioner or Secretary determines that a history of weed pest problems exists, turf shall be grown on soil treated with methyl bromide in accordance with treatment and handling procedures approved by the Department. Weed pests established in and around the growing grounds shall be controlled to a point that they are not likely to infest the growing turf. In addition, the Commissioner or Secretary may require clean fallowing, trap cropping, or other cultural controls as may be necessary to assure the pest cleanliness of the turf when shipped.

NOTE: Authority cited: Sections 407 and 6901, Food and Agricultural Code. Reference: Sections 6901–6904, Food and Agricultural Code.

HISTORY

1. Amendment of subsections (b) and (c) and new subsection (d) filed 1–23–73; effective thirtieth day thereafter (Register 73, No. 4).

- 2. Amendment of subsection (b) filed 11–14–74; effective thirtieth day thereafter (Register 74, No. 46).
- 3. Amendment filed 9–11–79; effective thirtieth day thereafter (Register 79, No. 37).
- 4. Amendment of subsection (c)(2) filed 7–28–86; effective thirtieth day thereafter (Register 86, No. 32).
- 5. Repealer of subsections (c)–(c)(2) and subsection redesignation and amendment filed 8–16–94 as an emergency; operative 8–16–94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–14–94 or emergency language will be repealed by operation of law on the following day.
- 6. Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

§ 3060.3. Plants That Are Pests.

A plant that is a pest does not meet the standards of cleanliness contained in Section 3060.2 and may not be produced, held or offered for sale as nursery stock.

(a) All plants defined as a noxious weed under Title 3, California Code of Regulations, Section 4500, are a pest plant.

NOTE: Authority cited: Sections 407, 5322 and 6901, Food and Agricultural Code. Reference: Sections 403, 407, 5322 and 6901, Food and Agricultural Code.

HISTORY

1. New section filed 6-24-2008; operative 7-24-2008 (Register 2008, No. 26). For prior history, see Register 97, No. 19.

§ 3060.4. Enforcement.

- (a) The Commissioner shall keep records of inspections made and of orders issued to enforce this article.
- (1) Inspections of the growing grounds, storage yards, and sales places of nursery stock, other than seed, shall be performed by a qualified nursery and seed inspector who shall make a sufficient examination of all varieties and all lots or blocks of nursery stock and all established plants, appliances, and other things thereon as may be necessary to determine compliance with this article.
- (A) The inspection shall be substantiated by the filing with the Commissioner of a report of such inspection showing the names of pests and infested or infected host plants and their location in the nursery, and the disposition of all blocks of stock found infested or infected to a degree greater than the minimum requirements of this article.
- (B) The Commissioner or the Director may require by a written order that any nursery stock found infested or infected with a pest shall be isolated or safely delimited in a manner approved by the Commissioner or the Director, and may specify that the pest shall be controlled or eradicated, or that the infested or infected plants shall be disposed of in a manner satisfactory to the Commissioner or the Director within a reasonable specified length of time.
- (C) The Secretary may permit nursery stock which may be infested with pests, subject to quarantine regulations or Section 3060.2(b)(1), to be sold for planting or for resale for planting, within the area under quarantine or area infested with a specified pest, where the nursery stock is offered for sale, provided that:
- 1. a quarantine or other pest shall not be eligible for movement as described in this section unless it has been so designated herein by the Secretary (the Secretary has designated *Homalodisca coagulata*, glassywinged sharpshooter, as eligible for movement as described in this section); and
- 2. the nursery stock is moved between points within the area under quarantine or within the area infested with the specified pest and involves no movement outside thereof; and
- 3. the pest is not under eradication in the quarantine or infested area; and
- 4. movement of the nursery stock is not specifically prohibited by the quarantine regulation or local ordinance; and
 - 5. the nursery stock is commercially clean.
- (D) Nursery stock which does not meet the standards of cleanliness prescribed in Subarticle 10 Section 3060.2 shall not be sold except as provided in (C) above or under a written agreement between the buyer and seller which discloses the following:
 - 1. failure to comply with the standards of cleanliness;

- 2. affirmation of the buyer's agreement to purchase the stock on an "as is" basis; and
- 3. written agreement by the destination department of agriculture the stock for planting by the buyer or resale at retail for non–farm use in the destination county or state.
- (2) Inspection of seed for the purpose of issuing nursery stock certificates shall be in accordance with the methods prescribed for official sampling and examination of seed for noxious weed seed under the California Seed Law. Sampling and examination shall be performed by a qualified nursery and seed inspector or by a seed botanist of the Department. The inspection is to be substantiated by the filing with the Commissioner of a report by the inspector for each six—month period showing that the shipper has complied with this article.
 - (b) Notification.
- (1) When an application to sell nursery stock is received from a person not previously licensed at the location involved, the Director shall notify the Commissioner allowing 15 days for the Commissioner to make whatever recommendations he deems appropriate regarding the issuance of the license.
- (2) Upon receipt of notice from the Commissioner that a licensee or applicant for a license has failed to comply with the standard of cleanliness set forth herein or has failed to comply with a written order issued by the Commissioner, the Director will take appropriate action against the application or license involved.
- (3) The Commissioner shall notify the Director of the issuance, suspension, or revocation of nursery stock certificates to any shipper.
- (4) The Commissioner shall notify the Director when a shipment of nursery stock from within the State is found infested or infected with a pest in violation of the standard of cleanliness herein established.
- (c) Suspension. The use of nursery stock certificates shall be suspended, as to all nursery stock, other than seed, or as to infested or infected and exposed host plants:
- (1) Upon finding in the nursery any new pest, determined by the Director to be of serious importance to agriculture or pending such determination, until isolation, clean up, or eradication in a manner approved by the Director is complied with; or
- (2) Upon finding in the nursery any pest that is required by this article to be kept under intensive control until either
- (A) All hosts or carriers likely to be infested or infected are prohibited movement by a written hold order or
- (B) Adequate precautions or intensive control measures have been applied which will assure the pest cleanliness of hosts or carriers when shipped; or
- (3) Upon finding in the nursery an infestation or infection or any established pest of general distribution in a degree greater than commercially clean, until such infestation or infection is controlled to the satisfaction of the Commissioner or Director.
 - (d) Revocation. Nursery stock certificates shall be revoked:
- (1) As to nursery stock, other than seed, upon repeated findings within the preceding twelve months that the shipper has failed to maintain the standard of cleanliness herein prescribed;
- (2) As to nursery stock, including seed, upon finding that the shipper has violated any law or regulation pertaining to nursery stock, including seed, or the requirements of this article.
- (e) Refusal. Issuance of nursery stock certificates may be refused if during the preceding twelve months:
- (1) An authorization of the shipper to use nursery stock certificates has been revoked; or
- (2) The shipper has failed or refused to comply with any law or regulation pertaining to nursery stock or pests; or
- (3) Conditions in or around the nursery have exposed nursery stock to infestation by pests, including weed seeds, and for which adequate precautions or control measures cannot be or have not been applied.

NOTE: Authority cited: Sections 407, 6901 and 6961, Food and Agricultural Code. Reference: Sections 6901–6904 and 6961, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsections (a) (2), (b) (1), (c) (3), (e) (2) and new subsection (e) (3) filed 1–23–73; effective thirtieth day thereafter (Register 73, No. 4).
- 2. New subsection (a)(1)(C) filed 11-14-74; effective thirtieth day thereafter (Register 74, No. 46).
- 3. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 4. Amendment filed 9–11–79; effective thirtieth day thereafter (Register 79, No. 37).
- 5. New subsection (a)(1)(D) filed 7–28–86; effective thirtieth day thereafter (Register 86, No. 32).
- 6. Amendment of subsection (a)(1)(C) filed 4–4–2000 as an emergency; operative 4–4–2000 (Register 2000, No. 14). A Certificate of Compliance must be transmitted to OAL by 8–2–2000 or emergency language will be repealed by operation of law on the following day.
- 7. Certificate of Compliance as to 4–4–2000 order transmitted to OAL 8–1–2000 and filed 9–7–2000 (Register 2000, No. 36).

§ 3060.5. Certificates.

- (a) Form of Certificates.
- (1) Nursery stock certificates shall be in essentially the following form:

CALIFORNIA NURSERY STOCK CERTIFICATE For Interstate and Intrastate Shipments

No. _____

This plant material or nursery or premises from which this shipment was made has been inspected and found free from especially injurious plant pests and disease symptoms.

THIS SHIPMENT NEED NOT BE HELD FOR INSPECTION IN CALIFORNIA

(date optional) Issued by:

(county) County Agricultural Commissioner and California Department of Food and Agriculture, Sacramento 95814

- (2) Certificates shall bear an identification number issued or authorized by the Commissioner.
- (3) A Commissioner may either issue certificates or authorize a shipper to reproduce a facsimile of the nursery stock certificate in the form and manner approved by the Commissioner. Such certificates shall be reproduced in a legible and conspicuous manner.
 - (b) Use of Certificates.
 - (1) No nursery stock certificate shall be used:
- (A) On any shipment of nursery stock, other than seed, any portion of which was grown by a nursery not eligible to use nursery stock certificates, unless such portion of the shipment is duly inspected and found to meet the minimum requirements for pests set forth herein;
 - (B) By any person other than the shipper to whom issued;
- (C) On any shipment of nursery stock for which movement from certain areas is restricted by specific California quarantine regulations unless accompanied by the required quarantine certificate or permit;
- (D) On any shipment into any county where such movement is restricted by a requirement of the Commissioner of the county of destination pursuant to Subarticle 10 Sections 6505 and 6961 of the Food and Agricultural Code;
- (E) On any shipment of plants not in compliance with the minimum standards of cleanliness prescribed in this article.
- (2) The Commissioner may affix a nursery stock certificate on a noncommercial shipment of plants which the Commissioner inspects and finds to meet the requirements of this article.

NOTE: Authority cited: Sections 407, 6901–6904, 6961, and 52333, Food and Agricultural Code. Reference: Sections 6901–6904, 6961, and 52333, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 2. Amendment filed 9–11–79; effective thirtieth day thereafter (Register 79, No. 37).

§ 3060.6. Requirements of Shippers of Nursery Stock Removed from Established Plantings.

- (a) Nursery stock also includes trees, shrubs, or other plants which are removed from established farm or landscape plantings or from their native habitat for planting, propagation or ornamentation. A license to sell nursery stock is required for sale of such nursery stock.
- (b) Such nursery stock shall not be moved unless accompanied by a shipping permit issued by the Commissioner, or a nursery stock certificate if all conditions for its issuance have been met. Nursery stock found not in compliance with the standard of cleanliness, or for which an adequate inspection cannot be made, or on a property infested with a pest described in paragraph (b) of Subarticle 10 Section 3060.2, shall be placed under hold order until brought into compliance or adequately inspected, unless movement of such stock is permitted only under restriction with the knowledge of the Commissioner at point of destination and the person receiving the stock. The Commissioner shall notify the Director when finding nursery stock has been moved in violation of this article.

NOTE: Authority cited: Sections 407, 6901–6904, 6961, and 52333, Food and Agricultural Code. Reference: Sections 5701, 6721, 6901–6904, 6961, 6965, and 6968, and 52333, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–11–71; effective thirtieth day thereafter (Register 71, No. 7). For history of former section, see Register 68, No. 38.
- 2. Amendment of subsection (b) filed 1–23–73; effective thirtieth day thereafter (Register 73, No. 4).
- 3. Amendment of subsection (b) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- Amendment filed 9–11–79; effective thirtieth day thereafter (Register 79, No. 37).

Article 12. Nursery Stock Grades and Standards

§ 3061. Labeling.

The following is established as an exception of the individual plant labeling requirement specified in Food and Agricultural Code Subarticle 10 Section 53482:

Nursery stock, when offered for sale, may be labeled as to botanical name, kind or variety or common name at the discretion of the person offering it for sale. If such stock is labeled, it must comply with Section 53841 et seq., Food and Agricultural Code.

NOTE: Authority cited: Sections 407, 53391, 53392 and 53482, Food and Agricultural Code. Reference: Sections 53392 and 53481–53483, Food and Agricultural Code.

HISTORY

- 1. New article 6 (§§ 3061 and 3062) filed 6–20–58; effective thirtieth day thereafter (Register 58, No. 11).
- 2. Editorial change of article number from 6 to 12 (Register 62, No. 7).
- 3. Amendment filed 1–30–79 as an emergency; effective upon filing (Register 79, No. 5).
- 4. Certificate of Compliance filed 4-9-79 (Register 79, No. 15).
- 5. Amendment filed 8-2-79; designated effective 1-1-80 (Register 79, No. 31).
- Amendment filed 9–15–82; effective thirtieth day thereafter (Register 82, No. 38).
- 7. Repealer of subsection (a) designation and amendment of text, repealer of subsections (a)(1)–(f) and new final paragraph filed 8–16–94 as an emergency; operative 8–16–94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–14–94 or emergency language will be repealed by operation of law on the following day.
- 8. Certificate of Compliance as to 8-16-94 order transmitted to OAL 12-14-94 and filed 1-26-95 (Register 95, No. 4).

§ 3062. Grade-Sizes.

(a) General Provisions. Nursery stock, when offered for sale, need not be graded and tagged at the discretion of the person offering the stock for sale; but if it is graded and tagged, it must meet the requirements of this article. Nursery stock when graded by size shall have a well–developed root system and the canes or top–growth shall have proportionate weight and caliper according to grade–size and variety. The number and length of the canes or top–growth specified for each grade–size shall refer to the

number and length before such canes or top-growth are cut back or pruned in preparation for sale. Nursery stock which has been cut back or pruned may be compared with other stock of the same class which has not been cut back or pruned, to determine compliance with the grade-size established herein.

(b) Roses. Field-grown bare root rose bushes harvested after the second season of root growth shall be labeled with the grade-size on each bundle when sold at wholesale. Rose bushes which do not meet the lowest grade-sizes shall be labeled as "substandard" whenever sold at wholesale.

The grade–sizes hereby established for each classification of rose bushes are minimum sizes and not more than 10 percent of the roses in any lot shall be below the size specified.

- (1) Tea, Hybrid Tea, Grandiflora, Rugosa Hybrids, Hybrid Perpetuals, and Moss Roses. No. 1 rose bushes shall have three or more strong canes, 16 inches and up, branched not higher than three inches above the bud union.
- No. 1 1/2 rose bushes shall have two or more strong canes, 15 inches and up, branched not higher than three inches above the bud union.

No. 2 rose bushes shall have two or more strong canes, 12 inches and up, branched not higher than three inches above the bud union.

No. 3 rose bushes shall be of good salable and plantable quality.

(2) Floribunda Roses. No. 1 rose bushes shall have three or more strong canes, 15 inches and up, branched not higher than three inches above the bud union.

No. 1 1/2 rose bushes shall have two or more strong canes, 14 inches and up, branched not higher than three inches above the bud union.

No. 2 rose bushes shall be of good salable and plantable quality.

(3) Polyantha and Low Growing Floribunda Roses. No. 1 rose bushes shall have four or more canes, 10 inches and up, branched not higher than three inches above the bud union.

No. 11/2 rose bushes shall have three or more canes, eight inches and up, branched not higher than three inches above the bud union.

No. 2 rose bushes shall be of good salable and plantable quality.

(4) Climbing Roses. No. 1 rose bushes shall have three or more strong canes, 24 inches and up, branched not higher than three inches above the bud union or crown.

No. 1 1/2 rose bushes shall have two strong canes 18 inches and up, branched not higher than three inches above the bud union or crown.

No. 2 rose bushes shall be of good salable and plantable quality.

Effective September 1, 1985, the grade–sizes for roses shall be as hereafter specified. At the same time, the foregoing grade–sizes for roses shall be void. The grade–sizes for each group of bush rose classifications are minimum sizes and not more than ten percent of the roses in any bundle shall be below the size specified. As used in the grade–sizes below, "strong cane" means a cane that is at least 3/16 of an inch in caliper regardless of its length, and is healthy, vigorous, and fully developed so that it is hardened off throughout the specified length for the grade.

(1) Tea, Hybrid Tea, Grandiflora, Rugosa Hybrids, Hybrid Perpetuals, Moss, and Climbing Roses.

No. 1 rose bushes shall have at least three strong canes, 16 inches (40.6 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

No. 1 1/2 rose bushes shall have at least two strong canes, 15 inches (38.1 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

No. 2 rose bushes shall have at least two canes one of which shall be a strong cane, 12 inches (30.5 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

(2) Floribunda Roses.

No. 1 rose bushes shall have at least three strong canes, 15 inches (38.1 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

No. 1 1/2 rose bushes shall have at least two strong canes, 14 inches (35.6 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

No. 2 rose bushes shall have at least two canes one of which shall be a strong cane, 12 inches (30.5 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

NOTE: Although the grades for floribunda roses are not significantly different from those for the hybrid teas, grandifloras, and others of that group, as applied they normally should be expected to result in the marketing of rose bushes which are, on the average, lighter for this class.

(3) Polyantha and Low Growing Floribunda Roses.

No. 1 rose bushes shall have at least four canes, 10 inches (25.4 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

No. 1 1/2 rose bushes shall have at least three canes, 8 inches (20.3 cm) and up, branched not higher than three inches (7.6 cm) from the bud union.

No. 2 rose bushes shall have at least two canes, eight inches $(20.3 \ cm)$ and up, branched not higher than three inches $(7.6 \ cm)$ from the bud union.

- (c) Deciduous Fruit, Almond, Walnut and Pecan Trees. Grade-sizes are hereby established for the following kinds of nursery stock: almond, apple, apricot, cherry, fig, nectarine, peach, pear, pecan, persimmon, plum, prune, quince and walnut. Whenever these kinds are sold bare root in lots of ten or more of one variety, each bundle shall be labeled with the grade-size except that the grade-size shall not be required for flowering ornamental varieties, dwarf trees, multiple budded trees, dormant budded trees, unbudded rootstocks, or for trees individually packaged for use in the retail trade. The grade-size specified is the lower limit of a range of sizes up to the next highest grade-size specified. Not more than 10 percent of the trees in any bundle shall be less than the lower limit of the size specified and not more than 20 percent shall exceed the upper limit. Trees shall be graded by caliper to be measured two inches above the center of the bud union or, if not budded, two inches above the crown.
- (1) Yearling trees (two-year-old roots) and older shall be graded in the following sizes:

1/4 inch (6.4 mm), 5/16 inch (7.9 mm), 3/8 inch (9.5 mm), 1/2 inch (12.7 mm), 5/8 inch (15.9 mm), 3/4 inch (19.1 mm), 1 inch (25.4 mm). Grade–sizes less than 1/4 inch shall be graded "substandard." Grade–size larger than 1 inch (25.4 mm) shall be graded and labeled in 1/4 inch (6.4 mm) increments.

(2) June buds (one-year-old roots) shall be graded in the following sizes:

3/16 inch (4.8 mm), 1/4 inch (6.4 mm), 5/16 inch (7.9 mm), 3/8 inch (9.5 mm), 1/2 inch (12.7 mm), 5/8 inch (15.9 mm), 3/4 inch (19.1 mm) and up. Grade-sizes less than 3/16 inch shall be graded "substandard."

- (d) Grapevines. Whenever grapevines are sold bare root in lots of 25 or more of one variety each bundle shall be labeled with the grade–size. The grade–sizes hereby established are minimum sizes and not more than 10 percent of the vines in any lot shall be below the size specified. In addition to the minimum size specifications established for grapevines, rooted cuttings of grape rootstock varieties shall be graded by length and caliper size of the original cutting: length of rootstock to be measured from the uppermost node from which the top–growth originates to the basal node where roots develop; caliper size to be measured equidistant between the node from which the top–growth develops and the node immediately below. The following grade–sizes are hereby established:
- (1) No. 1 grapevines shall have a well-matured top-growth at least eight inches (20.3 cm) in length and shall have a well-developed root system originating from the basal node of the original cutting.

If such vines have been produced by grafting or budding, the unions

thereof shall be complete and sound without surplus callus tissue; no roots or suckers shall proceed from the scion portion, and no suckers shall proceed from the rootstock portion thereof.

Rooted cuttings of grape rootstock varieties shall be at least 14 inches (35.6 cm) in length and have a caliper size of at least 1/4 inch (6.4 mm).

Grapevines which meet the minimum size specifications for a No. 1 grapevine and in addition have one or more 14-inch (35.6 cm) canes of well-matured top-growth may be labeled with the grade-size designation, "Jumbo."

(2) No. 2 grapevines shall have healthy live roots originating from the basal node of the original cutting and shall have a well-matured top-growth at least four inches (10.2 cm) in length or a total of at least eight inches (20.3 cm) of well-matured top-growth.

If such vines have been produced by grafting or budding, the unions thereof shall be sound without a prominent surplus of callus tissue.

Rooted cuttings of grape rootstock varieties shall be at least 10 inches (25.4 cm) in length and have a caliper size of at least 1/4 inch (6.4 mm).

- (3) Substandard grapevines are grapevines that have some root and top growth, but which do not otherwise meet the minimum size specifications prescribed herein. Such grapevines shall be labeled "substandard."
- (e) Exemptions. All nursery stock requiring grading as described in this section shall be graded as provided except when by written agreement, buyer and seller agree that the nursery stock will be graded after sale by the buyer and before reselling. When a written agreement of this type is made, a copy of such agreement shall be provided upon request to the Department of Food and Agriculture or the County Agricultural Commissioner of the county in which the nursery stock was produced. NOTE: Authority cited: Sections 407, 53391 and 53392, Food and Agricultural Code. Reference: Sections 53392 and 53481, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (e) filed 1–26–68; designated effective 6–1–68 (Register 68, No. 4). For prior history, see Register 66, No. 29.
- 2. New subsection (f) filed 10–26–73; effective thirtieth day thereafter (Register 73, No. 43).
- 3. Amendment filed 9–15–82; effective thirtieth day thereafter (Register 82, No. 38).
- 4. Amendment of subsection (b) filed 10–7–83; effective thirtieth day thereafter (Register 83, No. 41).
- 5. Amendment of subsection (b) filed 10–23–84; effective thirtieth day thereafter (Register 84, No. 43).
- 6. Amendment of subsection (a) filed 8-16-94 as an emergency; operative 8-16-94 (Register 94, No. 33). A Certificate of Compliance must be transmitted to OAL by 12-14-94 or emergency language will be repealed by operation of law on the following day.
- 7. Certificate of Compliance as to 8–16–94 order transmitted to OAL 12–14–94 and filed 1–26–95 (Register 95, No. 4).

Article 13. Origin Inspection of Nursery Stock from Other States

§ 3064. Release of Nursery Stock Inspected at Origin.

Nursery stock inspected at origin by representatives of the origin state Department of Agriculture may be released without inspection at California destination points upon compliance with all of the conditions specified in this section.

(a) Interstate Origin Inspection Agreements and Shipments from Approved Growing Grounds. Each participating nursery, as a condition of approval, shall sign an Interstate Origin Inspection Agreement agreeing to comply with all the requirements of this section and any other requirements that the California Department of Food and Agriculture deems

[The next page is 291.]

necessary to assure compliance with the California pest cleanliness standards.

Those growing grounds which have been licensed as nurseries, and recommended for this program by the origin state Department of Agriculture and approved by the California Department of Food and Agriculture, are designated as areas from which plant shipments may be released without inspection at destination. The release of plant material without inspection is limited to the types described in the particular Interstate Origin Inspection Agreement.

- (b) Advance Notice of Nurseries Intending to Ship Required. The origin state Department of Agriculture shall notify the California Department of Food and Agriculture, within 15 days prior to the first shipment, of the name of any nursery requesting approval of growing grounds to ship under this section.
- (c) Notice of Serious or New Pests Found. The origin state Department of Agriculture shall notify the California Department of Food and Agriculture of any serious or new pest found in any nursery authorized to ship to California under this section or found within one mile of such nursery.
- (d) Nursery Requirements. Nurseries authorized to ship into California under this section shall:
- (1) Maintain a regular pest control program monitored by the origin state Department of Agriculture and meet all pest cleanliness standards outlined by the California Department of Food and Agriculture.
- (2) Furnish the California Department of Food and Agriculture with a map of all approved growing grounds and a list of all types of approved plant material to be shipped under this section.
- (3) Ship pursuant to this section only plant material as named above and grown on approved growing grounds. Each shipment shall be accompanied by a special origin inspection certificate authorized by the origin state and California Departments of Agriculture.
- (4) Maintain a chronological record of all shipments to California receivers and upon request, make such records available to officials of the origin state Department of Agriculture and the California Department of Food and Agriculture. Unless otherwise provided, the record shall include the kinds and quantity of all plant material shipped, the date of shipment and the name of the consignee.
- (5) Comply with all other requirements the California Department of Food and Agriculture deems necessary to assure compliance with California pest cleanliness standards.

Article 15. California Certified and/or Registered Nursery Stock Programs

§ 3069. Disclaimer of Warranties and Financial Responsibility; Implementing Agreements and Forms.

- (a) Nature of "Registration" and/or "Certification." The terms "registration" and/or "certification" as used in these Programs mean that Department employees or agents have visually inspected growing grounds and crops thereon as described in this article. The terms do not mean that the Department has inspected or is responsible for nuclear or parent stock, or that the Department has control over the labeling of the stock by Program participants. Registration and/or certification does not guarantee or warrant that the articles to which foundation, registration or certification tags are attached, or which are otherwise represented as foundation, registered or certified are merchantable or fit for a particular purpose.
- (b) The Department of Food and Agriculture disclaims all express or implied warranties, including without limitation, implied warranties of merchantability and fitness for a particular purpose, regarding all plants, plant parts, and plant materials under any Nursery Stock Registration and/or Certification Program. The Department is not responsible for disease, genetic disorders, off-type, failure of performance, mislabeling, or otherwise, in connection with these Programs. In any event, Department liability is limited to the cost or purchase price of the plants, plant parts, or plant material involved. No grower, nursery, dealer, government official or other person is authorized to give any express or implied warranty, or accept any financial responsibility on behalf of the Department regarding these Programs, except as provided in this section.
- (c) Each participant in a specific Program shall be required to sign the following Agreement as a condition of participation:

CALIFORNIA NURSERY STOCK REGISTRATION AND/OR CERTIFICATION PROGRAM

3 California Administrative Code Subarticle 10 Section 3069. et seq.

READ THIS DOCUMENT CAREFULLY AND COMPLETELY BEFORE SIGNING DISCLAIMER OF WARRANTIES AND

NONLIABILITY AND INDEMNIFICATION AGREEMENT

(1) The undersigned grower is a participant in the (specific Registration and/or Certification) Program of the Department of Food and Agriculture. Applicant understands that the following limitations of liability apply:

LIMITATIONS OF LIABILITY

(A) The Department of Food and Agriculture disclaims all express or implied warranties, including without limitation, implied warranties of merchantability and fitness for a particular purpose.

- (B) The Department is not responsible for disease, genetic disorders, off-type, failure of performance, mislabeling, or otherwise, in connection with the Program.
- (C) In any event, Department liability is limited to the cost or purchase price of the plants, plant parts, or plant material.
- (D) No grower, nursery, dealer, government official or other person is authorized to give any express or implied warranty, or accept financial responsibility on behalf of the Department regarding the Program, except as provided in 3 California Administrative Code Subarticle 10 Section 3069.
- (2) Participant agrees to the above limitations of liability and further agrees:
- (A) To waive any and all causes of action for damages, indemnification, or otherwise, which may accrue to the applicant in any manner against the State of California, the Department, its officers, agents, and employees in connection with the Department's participation in the Program:
- (B) To indemnify, defend and save harmless the State of California, the Department and its officers, agents, and employees from any and all claims or losses occurring or resulting from the Department's participation in the Program in connection with participant's activities;
- (C) To attach to each container of foundation, registered or certified nursery stock a tag, accurately and fully completed. In lieu of a tag on each container, a notice, accurately and fully completed, may be printed on or attached to each bulk delivery invoice. Each tag and notice will be in the form provided by 3 California Administrative Code Subarticle 10 Section 3069(d); and
- (D) Not to advertise or otherwise represent that the Department certifies freedom from disease, genetic disorder, off-type or any aspect of performance, nor that the Department has any financial responsibility with regard to the Program.

This agreement shall be deemed to incorporate future amendments to the Food and Agricultural Code and 3 California Administrative Code relating to the Nursery Stock Registration and/or Certification Program.

The agreement shall remain in effect for the current and each succeeding year of Program participation.

Date	Name of Growe
	Ву
	Title
	Street Address
	City and Zip Code

NOTE: If participant is a sole proprietorship, the owner must sign; if a partnership, a managing partner; if a corporation, an executive officer. Keep a signed copy for your file.

(d) Following is the statement required on each tag or notice which is to be used by Program participants, as stated in Subsection (c):

(1) Tag

(FRONT OF TAG, WHICH STATES PROGRAM NAME) NOTICE OF NONLIABILITY AND DISCLAIMER OF WARRANTIES.

THE CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE DISCLAIMS ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, REGARDING ALL PLANTS, PLANT PARTS AND PLANT MATERIALS UNDER THE PROGRAM. (CONTINUED ON REVERSE OF THIS TAG.)

The Department is not responsible for disease, genetic disorders, off-type, failure of performance, mislabeling, or otherwise, in connection with the Program. In any event, Department liability is limited to the cost or purchase price of the plants, plant parts, or plant materials involved. No grower, nursery, dealer, government official or other person is authorized to give any express or implied warranty, or accept any financial responsibility on behalf of the Department regarding the Program, except as provided in 3 California Administrative Code Subarticle 10 Section 3069.

The grower, whose name and participation number appear on the other side, is responsible for all information filled in on this tag.

Inquiries should be addressed to: California Department of Food and Agriculture, Pest Exclusion/Nursery Program, 1220 N Street, Room 427, Sacramento, California 95814, telephone (916) 445–2388. Include the participant's name and the lot or block number and serial number shown on the face of this tag.

(2) Bulk Delivery Invoice Notice (which states Program name).
DISCLAIMER OF WARRANTIES AND NOTICE OF NONLI-ABILITY

THE CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE DISCLAIMS ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, REGARDING ALL PLANTS, PLANT PARTS, AND PLANT MATERIALS UNDER THE PROGRAM.

The Department is not responsible for disease, genetic disorders, off-type, failure of performance, mislabeling, or otherwise, in connection with the Program. In any event, Department liability is limited to the cost or purchase price of the plants, plant parts, or plant materials involved. No grower, nursery, dealer, government official or other person is authorized to give any express or implied warranty, or to accept any financial responsibility on behalf of the Department regarding the Program, except as provided in 3 California Administrative Code Subarticle 10 Section 3069.

The grower, whose name and participation number appear on this document, is responsible for all information filled in on this document.

Inquiries should be addressed to: California Department of Food and Agriculture, Pest Exclusion/Nursery Program, 1220 N Street, Room 427, Sacramento, California 95814, telephone (916) 445–2388. Include the participant's name and the lot number shown on this document.

Subchapter 4. Plant Quarantine

(Originally Printed 7-25-45)

Article 1. Definitions

NOTE: Authority cited for regulations in Group 4: Subarticle 1 Sections 403, 404, 407, 5024, 5301, 5302, 5303, 5322, 5721, 5741, 6443 and 7502, Food and Agricultural Code. Issuing agency: Director of Food and Agriculture and/or the Governor.

HISTORY

- 1. Amendment filed 10–4–60; effective thirtieth day thereafter (Register 60, No. 21).
- 2. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22)
- 3. Editorial change of internal references to conform to Food and Agricultural Code, 1967 Stats., c. 15 (Register 68, No. 13).
- Repealer of Article 1 (Subarticle 1 Section 3150) filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

Article 2. General Provisions of Quarantine Regulations

§ 3152. Pests Requiring No Action.

Armored scales of the family Diaspididae found infesting commercial shipments of botanical fruits, without leaves, stems, or contaminants, and intended for consumption shall not be subject to any regulatory actions pertaining to its being a plant pest.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 407 and 5322, Food and Agricultural Code.

HISTORY

- 1. New section filed 8–10–2007 as an emergency; operative 8–10–2007 (Register 2007, No. 32). A Certificate of Compliance must be transmitted to OAL by 2–6–2008 or emergency language will be repealed by operation of law on the following day. For prior history, see Register 83, No. 14.
- 2. Certificate of Compliance as to 8-10-2007 order transmitted to OAL 12-6-2007 and filed 1-18-2008 (Register 2008, No. 3).

§ 3153. Federal Experimental Shipments Exempted.

Federal experimental shipments moved into this State by, or at the request of the United States Department of Agriculture, are exempted from the provisions of exterior quarantine regulations.

NOTE: Authority cited: Subarticle 2 Sections 407 and 5302, Food and Agricultural Code. Reference: Subarticle 2 Section 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22)
- 2. Editorial correction adding NOTE filed 6–3–83; effective thirtieth day thereafter (Register 83, No. 23).

§ 3154. Director May Issue Special Permits.

The director may issue special permits allowing entry into the state or movement within the state of articles or commodities otherwise prohibited by quarantine subject to limitations, conditions, and/or provisions to prevent introduction, escape or spread of the pest quarantined against. Such limitations, conditions, and/or provisions may vary depending on the intended use of the articles or commodities and the potential risk of pest escape and will be specified in the permit.

NOTE: Authority cited: Subarticle 2 Sections 407, 5302 and 5322, Food and Agricultural Code. Reference: Subarticle 2 Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22).
- 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3155. Disposition of Violations.

HISTORY

- 1. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22).
- 2. Repealer filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3156. Hold for Inspection.

HISTORY

- 1. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22).
- Amendment filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Repealer filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3157. Warning Tags.

HISTORY

- 1. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22).
- Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Repealer filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3158. Director May Designate Exemptions.

HISTORY

- 1. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22)
- 2. Repealer filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3159. Violation Is Misdemeanor.

HISTORY

- 1. Amendment filed 7–14–66; effective thirtieth day thereafter (Register 66, No. 22).
- Editorial change in internal reference to conform to Food and Agricultural Code, 1967 Stats., c. 15 (Register 68, No. 13).
- 3. Repealer filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3160. Reimbursement for Services.

- (a) Pursuant to Section 6303(d), Food and Agricultural Code, fees may be charged for reimbursable services. Reimbursable services are those which a shipper or receiver requests; or those services which are required prior to the release of any quarantined shipment which has been prohibited entry into California or which must be returned out of state unless the shipment is unloaded under supervision, inspected, or treated under supervision as necessary to eliminate any pest or pest risk.
- (b) The Secretary or agricultural commissioner may charge for the services rendered in connection with subsection (a) at a rate equal to the actual cost of the service, portal to portal, adopted as a fee by a county board of supervisors and published in the fee schedule of the county. If the actual cost of the service has not been adopted as a fee by a county board of supervisors and published in the fee schedule of the county, then the rate shall be \$35 per hour and \$0.30 per mile, portal to portal.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 6303, 6462 and 6464, Food and Agricultural Code.

HISTORY

- 1. New section filed 11-20-89; operative 12-20-89 (Register 89, No. 47).
- 2. Amendment of subsection (b) filed 7–24–95; operative 8–23–95 (Register 95, No. 30)

§ 3161. Incorporation of Federal Quarantine Regulations.

The Secretary of the Department of Food and Agriculture has determined that violations of federal plant quarantine regulations pose a threat to the agricultural industry of this State and hereby adopts, through reference, the regulations in the Code of Federal Regulations, Title 7, Parts 301 through 369, inclusive, and any subsequent amendments to those regulations.

Note: Authority cited: Sections 407 and 6301.1, Food and Agricultural Code. Reference: Sections 5028, 5311, 6301 and 6301.1, Food and Agricultural Code. HISTORY

- 1. New section filed 12-22-95 as an emergency; operative 1-1-96 (Register 95, No. 51). A Certificate of Compliance must be transmitted to OAL by 4-29-96 or emergency language will be repealed by operation of law on the following day
- Certificate of Compliance as to 12–22–95 order transmitted to OAL 3–21–96 and filed 4–24–96 (Register 96, No. 17).

Article 3. Exterior Quarantine (Regulations)

§ 3250. Citrus Pests Exterior Quarantine.

A quarantine is established against the following pests, their hosts and possible carriers.

- (a) Pests. Any species of fruit flies of the family Tephritidae known to attack citrus; citrus canker, Xanthomonas axonopodis pv. citri; and any other injurious insect or other animal or plant disease pest of citrus which does not occur, or is not generally established in California.
- (b) Area Under Quarantine. All states, districts, and territories of the United States, except the State of Arizona.
 - (c) Articles and Commodities Covered.
 - (1) From the area under quarantine, except the State of Florida:
 - (A) All species and varieties of citrus fruits;
- (B) All plants and propagative parts, except seed, belonging to, or hybrids of, the genera Citrus (true citrus), Fortunella (kumquats), Poncirus (trifoliate oranges), Aeglopsis (dwarf powder-flask fruit), and Afraegle (African powder-flask fruit).
 - (2) From the State of Florida:
 - (A) All species and varieties of citrus fruits;
- (B) All plants and plant parts, except seed, belonging to, or hybrids of, the plant family Rutaceae, including, but not limited to, the genera Citrus (true citrus), Fortunella (kumquats), Murraya (mock orange), Poncirus (trifoliate oranges), Aeglopsis (dwarf powder-flask fruit), and Afraegle (African powder-flask fruit).
 - (d) Restrictions.
- (1) Trees, Plants, Scions, Buds, Cuttings, and Understock Prohibited. All plants and propagative materials (except seed) of all species, varieties, and hybrids of plant material listed in subsection (c)(1)(B) are prohibited entry into California from the area under quarantine except the State of Florida unless authorized entry under permit issued by the department or when shipped by, or at the request of, the United States Department of Agriculture for experimental purposes.
- (2) Trees, Plants, and Plant Parts Prohibited. All plants and plant parts (except seed) of all species, varieties, and hybrids of plant material listed in subsection (c)(2)(B) are prohibited entry into California from the State of Florida except when authorized entry under permit issued by the department or when shipped by, or at the request of, the United States Department of Agriculture for experimental purposes.
- (3) Requirements for Entry of Citrus Fruit from Florida or Texas. Commercial shipments of citrus fruit made by commercial packing houses, may be admitted into this state from Florida or Texas provided conditions are met as listed under (A) or (B), and (C) and (D) of this para-
- (A) Shipments of Florida citrus fruit, except lemons and sour limes, must be accompanied by a certificate issued by an official of the Florida Department of Agriculture and Consumer Services indicating the fruit was treated in accordance with methods approved by the department.
- (B) Shipments of Texas citrus fruit, except lemons and sour limes, must be accompanied by a Federal Master Permit issued under provisions of the United States Mexican Fruit Fly Quarantine and by an agent of the United States Department of Agriculture.
- (C) Surface Pests. Treatment for surface pests (scale, insects, mites, etc.) is not required as a condition of entry for all citrus fruit, including lemons and sour limes, from Florida and Texas destined to California when the fruit has been cleaned by washing and scrubbing with brushes in a commercial packing house in preparation for interstate shipment. If the fruit has not been so cleaned, prepared and handled, then the fruit shall be treated to assure the fruit is free of surface pests under official supervision prior to shipment and be so certified by an authorized agricultural official of the state of origin.
- (D) All containers in which citrus fruit are shipped to California shall be new.
- (4) Citrus fruit from the area under quarantine is prohibited entry into California except as provided herein.
- (5) Automobiles, Other Vehicles, and Their Contents, Subject to Inspection. Automobiles, trailers, trucks, and other vehicles, baggage, personal effects, household goods, and camping implements, arriving in California from any state or territory of the United States may be placed in quarantine by the department until it has been determined by inspec-

tion that the same are free from all varieties of citrus fruits and citrus plants, and parts thereof, except seeds.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10-27-72 as an emergency; designated effective 11-1-72 (Register 72, No. 44). For prior history, see Register 68, No. 17. Certificate of Compliance filed 12–15–72 (Register 72, No. 51)
- 3. Amendment filed 7–11–73; effective thirtieth day thereafter (Register 73, No.
- 4. Amendment filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 5. Repealer and new section filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14).
- 6. Amendment of section heading, section and NOTE filed 6-30-98 as an emergency; operative 6-30-98 (Register 98, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-28-98 or emergency language will be repealed by
- operation of law on the following day.

 Certificate of Compliance as to 6–30–98 order, including amendment of section, transmitted to OAL 10-26-98 and filed 12-8-98 (Register 98, No. 50).

§ 3251. Chestnut Bark Disease and Oak Wilt Disease **Exterior Quarantine (Quarantine** Proclamation 2).

A quarantine is established against the following pests, their hosts, and possible carriers.

- (a) Pests. Chestnut bark disease (Endothia parasitica), a fungus carried by birds, insects, water, wind, and shipment of nursery stock and unpeeled wood; and oak wilt disease (Ceratocystis fagacearum), a fungus carried under the bark of live or dead trees or parts of trees and also by oak bark beetles and sap beetles.
- (b) Area Under Quarantine. All states and districts of the United States except the State of Arizona.
- (c) Commodities Covered. All species and varieties of chestnut (Castanea spp.), chinquapin (Castanopsis spp.), oak (Quercus spp.), and tanbark oak (Lithocarpus densiflora) trees, plants, and parts thereof including grafts, cuttings, scions, nuts (except acorns), leaf mold, firewood and unpeeled logs are hereby declared to be hosts and possible carriers of the pests herein quarantined against.
 - (d) Restrictions.
- (1) Commodities Covered Prohibited From Area Under Quarantine. Except as provided in paragraph (4) hereof, all commodities covered shall be refused admittance into the State of California from the area under quarantine unless each lot or shipment is accompanied by an official certificate evidencing compliance with paragraph (2) or (3) below
- (2) Commodities Covered Produced in Western States Admitted Under Certificate of Origin. All commodities covered produced in and shipped from that portion of the area under quarantine west of the states of Montana, Wyoming, Colorado, and New Mexico are admissible into California, provided that each lot or shipment is accompanied by an official certificate issued by, and bearing an original or facsimile signature of, the authorized agricultural inspection official of the state in which the commodities were grown or shipped, affirming that chestnut bark disease and oak wilt disease are not known to occur in the state where grown, and also setting forth the name of the state where produced and the kind and amount of commodities covered by the certificate.
- (3) Commodities Covered Admissible Under Certificate of Treatment. Commodities covered may be shipped to California from the area under quarantine subject to prior approval by the Director of the method of treatment to be used. Except as provided in subsection (d)(2), each shipment of a commodity covered must be accompanied by an official certificate issued by, and bearing an original or facsimile signature of, the authorized agricultural official of the state of origin indicating the method of treatment, quantity of commodity covered, identification or license number of carrier, and the names and addresses of the shipper and consignee.
- (4) No Restrictions on Foreign Nuts. No restrictions are placed by this quarantine upon the nuts of all species and varieties of chestnut and chinquapin (Castanea spp. and Castanopsis spp.) grown in and imported

Common Name

from foreign countries when reshipped into or arriving in this State in an unopened original container.

NOTE: Authority cited: Subarticle 2 Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Subarticle 2 Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 12-15-75; effective thirtieth day thereafter (Register 75, No. 51). For prior history, see Register 73, No. 28.

 2. Amendment of subsections (a) and (c) filed 7–11–84; effective thirtieth day
- thereafter (Register 84, No. 28).
- 3. Amendment of subsection (d)(3) filed 3-3-94; operative 4-4-94 (Register 94, No. 9)

§ 3252. Caribbean Fruit Fly Exterior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers.

- (a) Pest. Caribbean fruit fly, Anastrepha suspensa, of the family Tephritidae is, in the adult stage, a yellowish-brown fly from one and a half to two times the size of a housefly. This insect is a serious pest of many kinds of fruit.
- (b) Area Under Quarantine. The Commonwealth of Puerto Rico and all the State of Florida south of and including Hernando, Sumter, Lake, and Volusia counties.
 - (c) Articles and Commodities Covered.
- (1) The fruit or berries of all plants listed below are declared to be hosts and possible carriers of the Caribbean fruit fly.

nd possible carriers of the Carrobea	minuti my.
Common Name	Botanical Name
Akee	Blighia sapida
Allspice	Pimenta dioica
Apple	Malus sylvestris
Avocado, except commercial	•
fruit	Persea americana
Barbados Cherry	Malpighia glabra
Bell Pepper, except commercial	7 0 0
fruit	Capsicum frutescens
Blackberry	Rubus hybrid
Box Orange	Severinia buxifolia
Calabur	Muntingia calabura
Calamondin	X Citrofortunella mitis
Carambola	Averrhoa carambola
Ceylon Gooseberry	Dovyalis hebecarpa
Cherry of the Rio Grande	Eugenia aggregata
Cocoplum	Chrysolbalanus icaco
Egg Fruit	Pouteria campechiana
Fig	Ficus carica
Governor's Plum	Flacourtia indica
Grapefruit	Citrus paradisi
Grumichama	Eugenia brasiliensis
Guava (all)	Psidium spp.
Guiana Plum	Drypetes lateriflora
Imbe	Garcinia livingstonei
Jaboticaba	Myrciaria cauliflora
Jambolan Plum	Syzygium cumini
Japanese Pear	Pyrus pyrifolia
Japanese Persimmon	Diospyros kaki
Java Apple	Syzygium samarangense
Kei Apple	Dovyalis caffra
Kieffer Pear	Pyrus pyrifolia x Pyrus communis
Kiwi	Actinidia chinensis
Kumquat	Fortunella crassifolia
Kumquat (oval)	Fortunella margarita
Lime	Citrus aurantifolia
Limeberry	Triphasia trifolia
Limequat	X Citrofortunella floridana
Longan, except commercial fruit	Dimocarpus longan
Loquat	Eriobotrya japonica
Loquat	гиоди уа јарониса

Lychee except commercial fruit. Litchi chinensis

Common Name	Botanical Name
Mango	Mangifera indica
Miracle Fruit	Synsepalum dulcificum
Natal Plum	Carissa grandiflora
Nectarine	Prunus persica
Orange Jasmine	Murraya paniculata
Jack Orangequat	Citrus nobilis 'unshiu' x
5 1	Fortunella sp.
Otaheite Apple	Spondias cytherea
Papaya	Carica papaya
Peach	Prunus persica
Pear	Pyrus communis
Pitomba	Eugenia luschnathiana
Pomegranate	Punica granatum
Pond Apple	Annona glabra
Rangpur Lime	Citrus limonia
Rose Apple	Syzygium jambos
Sapodilla	Manilkara zapota
Sour Orange	Citrus aurantium
Sugar Apple	Annona squamosa
Surinam Cherry	Eugenia uniflora
Sweet Lemon	Citrus limetta
Sweet Orange	Citrus sinensis
Tangelo	Citrus paradisi x Citrus reticulata
Tangerine	Citrus reticulata Blanco
Temple Orange	Citrus sinensis x Citrus reticulato
Tomato, except commercial	
fruit	Lycopersicon esculentum
	(L. Lycopersicum)
Tropical Almond	Terminalia catappa
Velvet Apple or Velvet	
Persimmon	Diospyros blancoi
Wampi	Clausena lansium
White Sapoti	Casimiroa edulis
Wild Balsam Apple	Mormodica charantia
Wild Cinnamon	Canella winteriana
Wild Dilly	Manilkara jaimiqui ssp.
ř	emarginata
	Annona hybrid
	Atalantia citriodes
	Eugenia coronata
	Eugenia ligustrina
	Ficus altissima
	Garcinia xanthochymus
	Manilkara roxburghiana
	Myrcianthes fragrans
	Myrcianines fragrans Myrciaria glomerata
	Pseudanamomis umbellulifera
	Rheedia aristata
	Terminalia muelleri
	Trevisia palmata
(2) (2, 2)	Trevisia painala

Botanical Name

- (2) Soil or planting media within the drip area of plants producing, or which have produced, fruit of the plants listed in (1) above.
- (3) Exemptions. The following are exempt from provisions of this regulation.
- (A) Green sour lime fruit which shows no yellow coloring.
- (B) Lemons regardless of color.
- (d) Restrictions. Articles and commodities covered are prohibited entry into California from the area under quarantine, except as provided
- (1) Articles and Commodities Covered Admissible When Treated At Origin. Articles and commodities covered are admissible into California from the area under quarantine provided each lot or shipment is accompanied by a certificate issued by an authorized representative of the origin state department of agriculture or the United States Department of Agriculture affirming that the lot or shipment was treated for Caribbean fruit fly, prior to shipment and under supervision of the origin state depart-

ment of agriculture or the United States Department of Agriculture, in a manner approved by the Secretary of the Department of Food and Agriculture and was not exposed to reinfestation by the fly.

NOTE: Authority cited: Sections 407, 5301, and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-1-75; effective thirtieth day thereafter (Register 75, No.
- 49). For former history see Register 74, No. 32.

 2. Amendment of subsection (d) filed 10–24–79; effective thirtieth day thereafter (Register 79, No. 43).
- 3. Amendment filed 7–3–80; effective thirtieth day thereafter (Register 80, No.
- 4. Amendment filed 8–10–84; effective thirtieth day thereafter (Register 84, No. 32).
- 5. Amendment of section heading, subsections (a), (c)(1) and (d)(1), and NOTE filed 2–21–97; operative 3–23–97 (Register 97, No. 8).

§ 3253. Eastern Filbert Blight Exterior Quarantine (Quarantine Order 4).

1. Repealer filed 8-8-74; effective thirtieth day thereafter (Register 74, No. 32).

§ 3254. Cotton Pests Exterior Quarantine.

A quarantine is established against the following pest, its hosts and possible carriers.

- (a) Pest. Boll weevil, Anthonomus grandis.
- (b) Area Under Quarantine. All states and districts of the United States except the States of Arizona and North Carolina.
- (c) Articles and Commodities Covered. The following are hereby declared to be hosts or possible carriers of the pests herein quarantined against:
- (1) Okra, Hibiscus esculentus, and kenaf, Hibiscus cannabinus, all parts of the plants including seeds and pods.
- (2) Cotton and wild cotton plants of the genera Gossypium and Thurberia and all parts of such plants.
- (3) Used bagging, used cotton picker sacks, and other used containers and used wrappers for any products from cotton plants.
- (4) Used cotton harvesting equipment, ginning and oil mill equipment, and other cotton processing machinery, and other farm equipment which has been used in connection with growing, harvesting, ginning, compressing, or processing raw cotton or raw cotton products.
 - (d) Restrictions.
- (1) Cotton Plants and Gin Trash Prohibited. Cotton plants and parts thereof, as such or as packing or as contamination or in association with any other product, article or thing, and gin trash, are prohibited entry into California from the area under quarantine, except that harvested seed cotton and products derived from seed cotton may be admitted as hereinafter
- (2) Certificates or Permits Required. Except as hereinafter exempted, articles and commodities covered may be admitted into this state if accompanied by a certificate of treatment or under permit issued by the director or the United States Department of Agriculture.
- (3) Approval of Treatment and Processing Methods. Any method of treatment of processing to destroy boll weevil on the basis of which a certificate or permit may be issued shall be approved and prescribed by the director in administrative instructions issued supplemental hereto or prescribed by the United States Department of Agriculture.
- (4) Exemptions. The following articles and commodities are exempt from the certificate or permit requirements:
- (A) Compressed baled cotton lint, linters, and lint cleaner waste when such products have been given standard or equivalent compression (22) pounds per cubic foot) and if free from surface contaminants capable of harboring boll weevil.
- (B) Samples of cotton lint and cotton linters of the usual trade size, if free from cotton seed and cotton trash.
 - (C) Edible okra during the period of January 1 to March 15.
- (5) Certificates of Treatment. A treatment certificate issued by an authorized Department of Agriculture representative at origin shall accompany each lot or shipment unless exempt. The certificate shall affirm that the shipment or lot accompanied thereby was cleaned, or otherwise

treated to destroy boll weevil as prescribed by the director. Each certificate shall also set forth the kind and quantity of articles and commodities treated thereby, date and method of treatment, dosage used, the initials and number of the railway car, or license number of the truck in which shipped, and the names and addresses of the consignee and consignor. NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–28–77 as organizational and procedural; effective upon fil-
- ing (Register 77, No. 31). For prior history, see Register 74, No. 12. 2. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 3. Amendment of section heading, subsection (b) and Note filed 1–19–96; operative 2-18-96 (Register 96, No. 3).

§ 3255. Vetch Weevil Exterior Quarantine.

HISTORY

- 1. Originally published 7-25-45 (Title 3).
- 2. Repealer filed 7–21–50 as an emergency; effective upon filing (Register 21, No.

§ 3256. Cherry Fruit Fly Exterior Quarantine.

A quarantine is established against the following pests, their hosts and possible carriers:

- (a) Pests. Cherry fruit flies (Rhagoletis indifferens and Rhagoletis fausta).
 - (b) Area Under Quarantine.

Infested Area:

Idaho. The entire state.

Colorado. The entire state, except for Delta and Mesa Counties.

Montana. The entire state.

New Mexico. The entire state.

Oregon. The entire state.

Utah. The entire state.

Washington. The entire state.

Noninfested Area:

Colorado. Delta and Mesa Counties.

- (c) Articles and Commodities Covered. Cherry fruits of all domesticated and wild cherries are declared to be hosts and possible carriers of the pest quarantined against.
 - (d) Restrictions.
- (1) Cherry Fruits Admitted From Area Under Quarantine If Treated in Approved Manner at Origin. Cherry fruits grown, packed, or stored in or shipped from the area under quarantine may be admitted into California, provided each lot or shipment is officially certified by an authorized representative of the Department of Agriculture at origin, affirming that the accompanied cherry fruits were treated to destroy cherry fruit flies in a manner approved by the director.
- (2) Cherry Fruits Admitted From Area Under Quarantine Without Treatment When Under Permit From the Director. The Director may issue to the proper official of the Department of Agriculture of any state in the area under quarantine, as specified in subsection (b) above, a master permit designating conditions under which cherry fruits may be admitted into the state without treatment and setting forth therein requirements for: sampling, inspecting of samples, maintaining identity, transportation, certification and other instructions which must be met at point of origin. To be eligible for such master permit the state of origin shall:
- (A) Maintain California-approved mandatory pest control districts for control of cherry fruit fly.
- (B) Carry on a trapping program for adult cherry fruit flies to determine proper timing for application of control materials.
- (C) Require the application of pesticides at specified intervals as recommended by an official agricultural regulatory agency.
- (D) Furnish a list of shippers approved by the state of origin including the shippers' addresses and assigned identification numbers to the California Department of Food and Agriculture prior to the beginning of the shipping season.
- (3) The master permit shall only be valid for shipments of cherry fruit meeting the following requirements:
- (A) Cherry fruit shipped to California must be grown in orchards located in the approved pest control districts.

Page 300 Register 2008, No. 3; 1-18-2008

- (B) All cherry fruit shall be sampled and inspected for cherry fruit fly at origin as outlined in the master permit.
- (C) The identity of each container of sampled cherry fruit shall be maintained by marking each container with the identification number of the approved shipper.
- (D) Trucks transporting cherry fruit from approved shippers to California shall be sealed by an agricultural representative of the state of origin. These seals will be applied before the truck leaves the premises of the approved shipper. The seals will not be broken except in the presence of a state plant quarantine officer after the truck arrives in California.
- (E) The cherry fruit, upon arrival, must be found free from cherry fruit fly larvae.
- (F) Any other requirements as may be necessary and as stated in the master permit.
- (4) Cherry Fruits Admitted From Noninfested County of the Area Under Quarantine With Certificate of Origin. Cherry fruits grown, packed, and stored within and shipped from a noninfested county in the area un-

der quarantine may be admitted into California, provided each shipment is accompanied by a certificate of origin issued by an authorized agricultural official of the origin state giving the name and address of the shipper, and the number and kind of containers in the shipment. The certificate shall state that the shipment originated in a noninfested area county. NOTE: Authority cited: Sections 407, 5301, 5302, 5303 and 5304, Food and Agricultural Code. Reference: Sections 5301, 5302, 5303 and 5304, Food and Agricultural Code.

HISTORY

- 1. New subsection (3)(d) filed 3–6–73; effective thirtieth day thereafter (Register 73, No. 11).
- 2. Amendment filed 10–25–73; effective thirtieth day thereafter (Register 73, No. 43)
- 3. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 4. Amendment of subsection (b) filed 7–11–84; effective thirtieth day thereafter (Register 84, No. 28).
- 5. Amendment of section heading, subsection (b) and Note and new subsection (d)(4) filed 3–25–94; operative 4–25–94 (Register 94, No. 12).

§ 3257. Sweet Potato Weevil Exterior Quarantine.

- A quarantine is established against the following pest, its hosts and possible carriers:
- (a) Pest. Sweet potato weevil (*Cylas formicarius elegantulus*) which feeds on all parts of host plants, but primarily roots or tubers.
- (b) Area Under Quarantine. The entire states of Alabama, Arkansas, Florida, Georgia, Hawaii, Louisiana, Mississippi, South Carolina, Tennessee and Texas.
- (c) Articles and Commodities Covered. Sweet potato plants, vines, cuttings, draws, and slips, and sweet potato tubers, or so-called yams (*Ipomoea batatas*), and morning-glory plants (*Ipomoea* and *Convolvulus* spp.).
 - (d) Restrictions.
- (1) All Articles and Commodities Covered Prohibited from Area Under Quarantine. All articles and commodities covered are prohibited entry into California if grown, packed or stored within or shipped from the area under quarantine except as specified in (2), (3), (4), and (5) below.
- (2) Seed sweet potato tubers for planting or propagation are admissible only under a permit issued to the receiver by the Secretary (see Title 3, Sections 300 and 3154).
- (3) Other Sweet Potato Tubers Grown, Packed or Stored Within or Shipped From the Area Under Quarantine Admitted If Treated at Origin. Sweet potato tubers grown, packed, or stored within or shipped from the area under quarantine, will be admitted into California provided they have been certified by an authorized agricultural official of the state of origin as having been treated (at owner's risk) for sweet potato weevil and were free from post–treatment infestation by sweet potato weevil.
- (4) Articles and Commodities Covered, Except Seed Sweet Potato for Planting or Propagation. From a Noninfested County or Parish in the Area Under Quarantine Admitted Under Certification of Origin. Articles and commodities covered, if grown, packed and stored (if stored) within and shipped from a noninfested county in the area under quarantine, except seed sweet potato for planting or propagation, will be admitted into California provided each lot or shipment is accompanied by a certificate of origin issued by an authorized agricultural official of the origin state giving the name and address of the shipper, number and kind of container in shipment or lots, manner of shipment, and car initials and number if shipped by rail. The certificate shall state that the lot or shipment originated in a noninfested county or parish.
- (5) Exception. Morning–glories from a noninfested county or parish in the area under quarantine are admissible without a certificate of origin. NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6-11-68; effective thirtieth day thereafter (Register 68, No. 22). For prior history see Register 67, No. 15.
- 2. Amendment filed 10–27–71; effective thirtieth day thereafter (Register 71, No. 44).
- 3. Amendment of subsection (b-1) filed 5-24-73; effective thirtieth day thereafter (Register 73, No. 21).
- Amendment of subsection (b-1) filed 12-6-76; effective thirtieth day thereafter (Register 76, No. 50).
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- Amendment of subsection (b) filed 7-11-84; effective thirtieth day thereafter (Register 84, No. 28).
- Amendment of section heading and subsection (d)(1), new subsection (d)(2) and subsection renumbering, amendment of newly designated subsections (d)(3) and (d)(4), and amendment of NOTE filed 12–12–94; operative 1–11–95 (Register 94, No. 50).

§ 3258. Citrus White Fly Exterior Quarantine (Quarantine Proclamation 10).

HISTORY

1. Repealer filed 6–9–76; effective thirtieth day thereafter (Register 76, No. 24). For prior history, see Register 64, No. 10).

§ 3259. Peach Yellows, Little Peach and Red Suture Diseases Exterior Quarantine (Quarantine Proclamation 11).

A quarantine is established against the following pests, their hosts, and possible carriers:

- (a) Pests. The pathogens which cause either peach yellows, little peach, or red suture diseases on peach. The pathogen that causes peach yellows disease is a mycoplasma–like organism. All three diseases are presently considered to be caused by strains of the same pathogen.
- (b) Area Under Quarantine. The entire states of Connecticut, Delaware, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Michigan, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, West Virginia, and the District of Columbia.
- (c) Articles and Commodities Covered. Trees and all parts capable of propagation (budsticks, scions, rootstocks, etc.), except seed (fruit pits), of all species of the genus *Prunus* are declared hosts and possible carriers, except three cherries: *P. avium*, mazzard cherry, sweet cherry; *P. besseyi*, sand cherry, western sand cherry; *P. cerasus*, sour cherry; and the evergreens: *P. caroliniana*, American cherry laurel, Carolina cherry laurel; *P. ilicifolia*, hollyleaf cherry, California cherry; *P. laurocerasus*, cherry laurel, English laurel; *P. lusitanica*, Portugal laurel; *P. lyonii*, atalina cherry
- (d) Restrictions. All commodities and/or articles covered are prohibited entry into the state unless specific conditions are met.
- (1) Symptomless Carriers Prohibited. Plum trees and all parts capable of propagation (including their use as understock for other species), except seed, are prohibited entry into the state, specifically: *Prunus americana*, American plum; *P. cerasifera*, myrobalan plum, cherry plum; *P. cerasifera* 'Atropurpurea,' purple–leaf plum; *P. domestica*, European plum, prune; *P. hortulana*, hortula plum; *P. munsoniana*, wild goose plum; *P. salicina*, Japanese plum; their hybrids; and wild native species of plum.
- (2) Nursery Stock. Nursery stock of the restricted Prunus species (other than symptomless carriers, or stock budded onto symptomless carriers, paragraph (1) above) is permitted entry provided all the labeling and certification requirements listed below are met.
- (A) Each species and variety shall be properly labeled as to scientific name and state of origin.
- (B) Each lot or shipment shall be accompanied by a certificate issued by the Department of Agriculture of the state of origin verifying that surveys were made at the proper time in relation to the diseases and hosts. The survey findings shall show that:
- 1. no symptomless plum species or other species on symptomless plum understock existed on the growing grounds during production of the nursery stock; and
- 2. a one-mile zone, free of symptomless hosts and free from peach yellows, little peach, and red suture diseases, existed around the bud source for two years prior to taking the budwood and around the growing grounds for two years prior to digging the nursery stock.
- (3) Reshipment Permitted Under Certificate. An agricultural official of a state in the area under quarantine may issue a certificate for reshipment of dormant host trees and propagative parts which have been produced outside of the area under quarantine and have remained dormant while within the area. Certificates shall set forth the name of the state where produced and state that the material remained dormant while in the area under quarantine.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11–26–63; effective thirtieth day thereafter (Register 63, No. 24).
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3260. Nut Tree Pests Exterior Quarantine (Quarantine Proclamation 12).

A quarantine is established against the following pests, their hosts and possible carriers:

- (a) Pests.
- (1) Two nut tree casebearers, *Acrobasis juglandis* (LeBaron) and *A. nuxvorella* (Neunzig). Both insects are serious pests of pecan; the former also attacks hickory and walnut.
- (2) The pathogen that causes brooming disease of walnut. Brooming is a virus-like disease that drastically reduces nut production and sometimes causes death of the host tree.
 - (3) Pecan phylloxera, Phylloxera devastatrix.
 - (b) Area Under Quarantine.
- (1) On account of the nut tree casebearers, all states and districts east of and including Montana, Wyoming, Colorado, Oklahoma, and Texas; in New Mexico, the counties of Chaves, Eddy, and Lea.
- (2) On account of pecan phylloxera, the states of Alabama, Arkansas, Louisiana, Mississippi, Oklahoma and Texas.
- (3) On account of brooming disease, all states and districts of the United States, except Arizona.
- (c) Articles and Commodities Covered. Trees and all parts capable of propagation (buds, scions, rootstocks, etc.), except nuts, of all species of the genera *Juglans* (walnut and butternut) and *Carya* (hickory and pecan).
- (d) Restrictions. All commodities and articles covered are prohibited entry into the state from the area under quarantine unless specified conditions (listed below) are met.
- (1) All species of *Juglans* (walnut, butternut) trees and parts capable of propagation, except nuts, are:
- (A) Prohibited entry into California from any state east of the eastern borders of Idaho, Utah, and Arizona.
- (B) Admissible into California from Idaho, Nevada, Oregon, Utah, and Washington provided each lot is accompanied by a certificate issued by the Department of Agriculture of the state of origin affirming (1) The material was grown in the state of origin, (2) Brooming disease is unknown in the state of origin, and (3) The amount and kind of commodities covered.
- (2) All species of *Carya* (hickory, pecan) trees, buds, and scions from the area under quarantine in subsections (b)(1) and (b)(2) are:
- (A) Admissible if treated at origin provided each lot is accompanied by a certificate issued by an authorized agricultural official affirming that the trees, buds, and/or scions have been treated for the pests quarantined against by a method approved by the director.
- (B) Admissible provided each lot is accompanied by a certificate issued by an authorized representative of the origin Department of Agriculture:
- (1) affirming the commodities were grown in the state of origin in a county which is not infested with pecan phylloxera and the nut tree case-bearers quarantined against, and
- (2) setting forth the amount and kind of commodities covered by the certificate.
- (C) Admissible by permit, issued by the Director of the California Department of Food and Agriculture, requiring treatment at destination. Entry subject to treatment for the pests quarantined against upon arrival at destination may be allowed by permit obtained prior to shipment of the restricted material. The permit may specify the disinfection or treatment, restrict the method of transportation, and limit the size and quantity of the shipment, as well as designate terminal point of delivery where treatment facilities are available.

NOTE: Authority cited: Sections 407, 5301 and 5302. Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

1. Amendment of subsection (b) (2) filed 6–5–72; effective thirtieth day thereafter (Register 72, No. 24). For prior history, see Register 60, No. 21.

- 2. Amendment filed 5–14–76; effective thirtieth day thereafter (Register 76, No. 20).
- 3. Amendment of subsections (a) and (b)(1) filed 11–21–78; effective thirtieth day thereafter (Register 78, No. 47).
- 4. Repealer filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14).
- 5. Amendment filed 3–7–84; effective thirtieth day thereafter (Register 84, No. 10).

§ 3261. Ozonium Root Rot Exterior Quarantine (Quarantine Proclamation 13).

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Ozonium root rot (*Phymatotrichum Ozonium omnivorum*), a fungus carried on the roots of plants and in moist soil.
 - (b) Area Under Quarantine.

Arizona. Entire state.

Arkansas. Entire counties of Lafayette, Little River, and Miller.

Louisiana. The entire parishes of Bossier and Caddo.

Nevada. Entire county of Clark.

New Mexico. Entire counties of Chaves, Dona Ana, Eddy, Grant, Hidalgo, Lea, Luna, Sierra.

Oklahoma. Entire state.

Texas. Entire state.

Utah. Entire county of Washington.

- (c) Articles and Commodities Covered. All soil, nursery stock, or plants with roots, except as provided in subsection (d) (2) below, are declared to be hosts or possible carriers of the pest herein quarantined against
- (d) Restrictions. Articles and commodities covered are prohibited entry into California from the area under quarantine except as provided below:
- (1) Certification Requirement. Articles and commodities covered will be permitted entry into California from the area under quarantine provided they are accompanied by a certificate issued by a duly authorized agricultural official of the state of origin, establishing the fact that all material contained in the lot or shipment was grown in a manner approved by the director to assure freedom from ozonium root rot or originated on premises determined by methods approved by the director to be free from ozonium root rot.
- (2) Exceptions—Exemptions of Certain Commodities. No restrictions are placed by this regulation upon the entry of the following:
 - (A) House plants grown in the home and not for sale.
- (B) Smooth root vegetables such as potatoes, sweet potatoes, carrots, onions, turnips, and beets if not for planting and free from moist clods of soil, except that this exemption does not apply to mangels and sugar beets.
- (C) Sugar beets for processing provided the beets are screened prior to or while loading to remove moist clods of soil.
- (D) Cactus plants with roots, provided the roots are dry and free of soil.
- (E) Aquatic plants such as water hyacinth and water lilies; dry resurrection plants; orchid plants growing in osmunda fibre; and air-layered rooted cuttings, if free from soil.
- (F) Articles and commodities covered when determined by the director not to present a risk of carrying ozonium root rot because of their condition or their manner of growth or production.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- Amendment filed 7-8-1; effective thirtieth day thereafter (Register 73, No. 48).
 Not previously printed. For prior history, see Register 25, No. 4.
- 2. Amendment filed 11–27–73; effective thirtieth day thereafter (Register 73, No. 48)
- 3. Amendment of subsection (d)(3)(A) and new subsection (d)(3)(G) filed 10–13–78; effective thirtieth day thereafter (Register 78, No. 41).
- 4. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

5. Amendment of subsection (d) filed 7-11-84; effective thirtieth day thereafter (Register 84, No. 28).

§ 3262. Peach Mosaic Disease Exterior Quarantine (Quarantine Proclamation 14).

A quarantine exists against the following pests, their hosts and possible carriers:

- (a) Pest. Peach mosaic and any virus capable of causing symptoms identical with those of peach mosaic disease.
 - (b) Area Under Quarantine:

Arizona: Entire state.

Colorado: Counties of Delta, Garfield, Mesa, Montezuma and Montrose.

New Mexico: Entire state.

Oklahoma: Counties of Alfalfa, Bryan, Johnston and Woods.

Texas: Counties of Brown, Callahan, Camp, Cherokee, Comanche, Dallas, Eastland, El Paso, Erath, Fisher, Floyd, Freestone, Hale, Harrison, Hudspeth, Jones, Limestone, Palo Pinto, Runnels, San Saba, Smith, Tarrant, Taylor, Upshur and Young.

(c) Articles and Commodities Covered. The following trees and parts capable of propagation (buds, scions, rootstock, etc.), except seed (fruit pits) are declared to be hosts and thereby possible carriers of the pest: all species, varieties, and hybrids of almond, apricot, peach, plum, prune, and nectarine; Manchu cherry (*Prunus tormentosa*); and western sand cherry (*P. besseyi*).

[The next page is 303.]

- (d) Restrictions. All articles and commodities listed in paragraph (c) above are prohibited entry into California from the area under quarantine.
- (e) Director May Issue Special Permits. The Director may issue special permits allowing entry of articles or commodities otherwise prohibited. The permit shall state any and all mandatory provisions or conditions under which entry will be allowed.

NOTE: Authority cited: Sections 407, 5301, and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- Amendment of subsection (b) filed 1-17-77; effective thirtieth day thereafter (Register 77, No. 4). For prior history, see Register 63, No. 5.
- 2. Amendment filed 7–3–80; effective thirtieth day thereafter (Register 80, No. 27).

§ 3263. European Corn Borer Exterior Quarantine.

A quarantine is established against the following pest, its host and possible carriers:

- (a) Pest. European corn borer, *Ostrinia nubilalis*. A moth, family Pyralidae, which is damaging to a wide variety of important food and floral crops.
- (b) Area Under Quarantine. All states, districts, and territories of the United States.
 - (1) Infested Area.
- (A) Alabama, Arkansas, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, Wyoming, and the District of Columbia.
- (B) In Florida the counties of Calhoun, Escambia, Gadsden, Hamilton, Holmes, Jackson, Jefferson, Madison, Okaloosa, and Santa Rosa.
- (C) In Louisiana the parishes of Bossier, Caddo, Concordia, East Carroll, Franklin, Madison, Morehouse, Natchitoches, Ouachita, Red River, Richland, Tensas, and West Carroll.
- (D) In Texas the counties of Carson, Dallam, Deaf Smith, Gray, Hansford, Hartley, Hutchinson, Lipscomb, Moore, Ochiltree, Oldham, Potter, Randall, Roberts, and Sherman.
- (2) All parishes, counties, states, districts, and territories of the United States not named in the infested area shall be known as the noninfested area
 - (c) Articles and Commodities Covered.
- (1) Corn, broom corn, sorghum, and sudangrass plants and all parts thereof (including shelled grain and stalks, ears, cobs, and all other parts, fragments, or debris of said plants);
 - (2) Beans in the pod and pepper fruits;
- (3) Plants of aster, chrysanthemum, geranium, hollyhock, dahlia and gladiolus.
 - (d) Restrictions.
- (1) Articles and commodities covered are prohibited entry into California from the infested area unless accompanied by a certificate, issued by an authorized representative of the origin State Department of Agriculture, as provided in (A) or (B) below:
- (A) Certificate of Treatment specifying that all of the commodities and articles in the lot or shipment were treated by a method and in a manner prescribed by the director; or
- (B) Certificate of Processing and Inspection specifying that all of the commodities and articles in the lot or shipment were processed and inspected in conformity with a method and in a manner prescribed by the director.
- (C) Articles and commodities covered originating in the parishes of Louisiana and the counties of Florida and Texas which are not infested with European corn borer may enter California if accompanied by a certificate of origin issued by an authorized representative of the origin state Department of Agriculture specifying that no portion of the articles or commodities in the lot or shipment was grown in an area where the European corn borer is known to occur. Origin certification is not required for

entry into California of articles and commodities covered which originated in states, districts, and territories in the noninfested area.

- All certificates must be dated and set forth the kind and quantity of articles or commodities constituting the lot or shipment covered thereby, the initials and number of the railway car or license number of the truck, and the names and addresses of the shipper and consignee.
- (2) Exemptions. Certification requirements are waived on the following articles and commodities covered:
- (A) Shelled popcorn, seed for planting, or clean sacked grain for human consumption.
- (B) Beans in the pod or pepper fruits in lots or shipments of ten pounds or less.
- (C) Seedling plants or divisions without stems of the previous year's growth of aster, chrysanthemum or hollyhock.
 - (D) Dahlia tubers without stems.
 - (E) Gladiolus corms without stems.
 - (F) Very pungent types of pepper fruit.
- (G) Articles and commodities covered when they have been processed or manufactured in a manner that eliminates all danger of carrying European corn borer.
- (e) All lots or shipments in violation of this regulation shall be disposed of with the following exceptions:
- (1) Inspecting officers may release small lots or shipments of articles and commodities covered which may be adequately inspected, provided no living stage of European corn borer is found; or such small lots may be treated in a manner approved by the director under official supervision and thereafter released.
- (2) Certified Shipments of Shelled Corn Not in Conformity May be Treated or Processed in California.
- (A) Shipments of shelled corn entering California under certificate from states in the European corn borer infested area, which are found to be contaminated with plant portions or fragments capable of or actually harboring larvae of European corn borer, may be treated or processed in California to destroy such larvae if the state which issued the certificate has entered into a program to strengthen its origin inspection and certification for European corn borer. If a state wishes to enter this program, a signed agreement from the origin state agricultural regulatory agency must be received and accepted by the director. The agreement shall affirm that the origin state agricultural regulatory agency agrees to:
- 1. Use specified type of uniform screening and/or treatment certificates.
 - 2. Certify as to all the following conditions:
 - a. Inspection of each car or truck before loading;
- b. Constant checking of screens and loading procedures (includes replacement of damaged or broken screens as necessary);
- c. Moving corn through screening and loading process at an established rate which assures only clean corn going into the railroad car or truck; and
- d. Checking corn after screening and prior to loading to make certain it is free of debris capable of carrying European corn borer larvae.
- 3. Each lot of shelled corn grown in or shipped from the infested area shall be accompanied by a certificate issued by an authorized representative of the origin state Department of Agriculture stating:
- a. The grain has passed through a 1/2 inch or smaller size mesh screen, or
- b. The grain has been treated for European corn borer in a manner approved by the director.
- 4. Screening, processing, or treating shall be done under state supervision.
- 5. California agricultural regulatory officials will monitor shelled corn shipped from infested states to determine program conformity. If within a one–year period more than three violations from one location are found, the agricultural regulatory officials of the origin state will be informed and they will terminate issuance of the specified program certificates for shelled corn from that location. The origin state will be required to tighten

its certification program before resumption of shelled corn certification shipments from that location.

(B) Before any shelled corn is treated or processed in California under (e)(2)(A), permission must be obtained from the director (through the Pest Exclusion Branch). The location where treatment or processing will take place will be specified when permission is given.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–20–74; effective thirtieth day thereafter (Register 74, No. 12). For prior history, see Register 73, No. 11.
- 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- Amendment of subsections (c) and (e)(2) filed 10–13–78; effective thirtieth day thereafter. Correction of erroneous history note which appeared in Register 78, No. 37 (Register 78, No. 41).
- 4. Amendment of subsection (b-1) filed 11-21-78 as an emergency; effective upon filing (Register 78, No. 47).
- 5. Certificate of Compliance filed 3–12–79 (Register 79, No. 11).
- Amendment filed 6–11–80; effective thirtieth day thereafter (Register 80, No. 24).
- 7. Amendment filed 7–11–84; effective thirtieth day thereafter (Register 84, No. 28).
- 8. Amendment filed 6–11–86; effective thirtieth day thereafter (Register 86, No. 24)

§ 3264. Colorado Potato Beetle Exterior Quarantine (Quarantine Proclamation 16).

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. Colorado potato beetle (Leptinotarsa decemlineata).
- (b) Quarantine Area. All States, Districts and territories of the United States except the States of Alaska, Hawaii and Nevada.
- (c) Articles and Commodities Covered. Plants of tomato (*Lycopersicon esculentum*), pepper (*Capsicum frutescens*), eggplant (*Solanum melongena*), Irish potato (*Solanum tuberosum*); Irish potato tubers; and soil in association with or attached to all such tubers or plants.
- (d) Restrictions. The articles and commodities covered are prohibited except as provided for below.
- (1) Origin Certificates from Noninfested Localities. Articles and commodities covered will be permitted entry into the State of California from said quarantine area if each shipment or lot is officially certified by an authorized Department of Agriculture representative at origin, establishing the fact that all articles and commodities covered contained in the lot or shipment were grown in and shipped from a locality free from Colorado potato beetle.
- (2) Exemptions. The following articles and commodities are exempt from the certification requirements of this quarantine:
- (A) Potato tubers free from soil and plant parts. "Free from" means the amount of soil and plant parts shall not be sufficient to harbor any stage of the Colorado potato beetle.)
- (B) From the period of January 1 to March 31, seedling plants with or without soil and not over 8" high, of tomato, pepper, eggplant and Irish potato.
- (3) Small Lots. A State Plant Quarantine officer may release small lots or shipments of Irish potatoes of 100 (one hundred) pounds, or less, which are contaminated with soil or other commodities provided the contamination is removed and destroyed under his or her supervision.
- (4) Director May Issue Special Permits. The Director may issue special permits allowing entry of articles or commodities otherwise prohibited. The permit shall state any and all provisions or conditions under which entry will be allowed.

NOTE: Authority cited: Sections 407, 5301, and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 63, No. 5.
- 2. Amendment filed 7–3–80; effective thirtieth day thereafter (Register 80, No. 27).

§ 3265. Persimmon Root Borer Exterior Quarantine (Quarantine Proclamation 19).

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. The persimmon root borer, Sannina uroceriformis, an insect which causes serious damage to the Oriental persimmon on Oriental rootstock.
- (b) Area Under Quarantine. All states, districts and territories of the United States.
- (c) Articles and Commodities Covered. All species and varieties of persimmon (*Diospyros* spp.) trees, parts capable of propagation (including rootstocks) and green (unseasoned) wood are declared to be hosts or possible carriers of the pest except fruits, seeds, buds, and/or scions.
- (d) Restrictions. All articles and commodities listed in (c) are prohibited entry into California from the area under quarantine.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Section 5301 and 5302, Food and Agricultural Code.

HISTORY

1. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3266. Plum Curculio and Blueberry Maggot Exterior Quarantine.

A quarantine is established against the following pests, their hosts, and possible carriers:

- (a) Pests. Plum curculio (*Conotrachelus nenuphar*) and blueberry maggot (*Rhagoletis mendax*). Plum curculio is a coleopterous insect belonging to the family Curculionidae. The blueberry maggot is a dipterous insect belonging to the family Tephritidae. These insect pests in their larval stages live within the fruit of their host plants often causing extensive damage to fruit of certain crops.
 - (b) Area Under Quarantine.
- (1) In Utah, because of the plum curculio, the counties of Box Elder and Salt Lake.
- (2) In the eastern United States, because of the plum curculio and blueberry maggot, all states and districts east of and including the states of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma and Texas.
 - (c) Articles and Commodities Covered.
- (1) Fresh fruit of all plants listed below are declared to be hosts and possible carriers of plum curculio.

Common Name	Botanical Name
Apple	Malus spp.
Apricot	
Blueberry, highbush	Vaccinium corymbosum
Blueberry, lowbush	V. angustifolium
Cherry, black	
Cherry, choke	P. virginiana
Cherry, pin	P. pensylvanica
Cherry, sand	P. pumila
Cherry, sour	P. cerasus
Chery, sweet	
Crabapple	
Hawthorne (haw)	
Huckleberry, black	Gaylussacia baccata
Huckleberry, dwarf	
Nectarine	
Peach	
Pear	Pyrus communis
Plum, Allegheny	
Plum, American (wild)	P. americana
Plum, beach	P. maritima
Plum, European	P. domestica
Plum, Japanese	P. salicina
Prune	P. spp.
Quince	Cydonia oblonga

(2) Fresh fruit of all plants listed below are declared to be hosts and possible carriers of blueberry maggot.

Common Name	Botanical Name
Blueberry, highbush Blueberry, lowbush Huckleberry, black Huckleberry, dwarf	V. angustifolium Gaylussacia baccata

Page 304 Register 94, No. 24; 6-17-94

- (3) Soil or other growing medium within the drip area of plants producing, or which have produced, fruit as listed in (c)(1) or (2) above.
 - (d) Restrictions.
- (1) Certification Required. Articles and commodities covered which are produced in or shipped from the area under quarantine are prohibited entry into the State of California unless each lot or shipment is accompanied by a certificate issued by and bearing the original or facsimile signature of the authorized agricultural official of the state from which the article or commodity is shipped evidencing compliance with paragraphs (3), (4), (6) or (7) below. No certificate is required for commodities meeting the requirements of paragraphs (2) or (5) below.
- (2) Reshipments in Original Containers from Area Under Quarantine of Commodities Grown Outside Thereof. Commodities in original unopened containers, each bearing labels or other identifying marks evidencing origin outside the area under quarantine, may be reshipped to this state from any point within the area under quarantine.
- (3) Repacked Commodities Admissible from Area Under Quarantine if Certified Grown Outside Thereof. Provided each lot or shipment is certified by an authorized agricultural official to have been grown outside the area under quarantine and that continued identity has been maintained while within the area under quarantine, the commodities may be repacked and shipped by common carrier from any point within the area under quarantine to this state. The certificate shall set forth the state in which commodities were grown, point of repacking and reshipment, amount and kind of commodities comprising the lot or shipment, and the names and addresses of the shipper and consignee.
- (4) Apples Exposed to Controlled Atmosphere (CA) Storage Admissible Under Certificate. Apples which are exposed to controlled atmosphere (CA) storage for a continuous period of ninety (90) days, during which period the temperature within the storage room is maintained at thirty–eight degrees (38°) Fahrenheit (3.3°C.) or less, may be admitted into California provided said storage room or building is approved by the proper authorities in the state of origin as a controlled atmosphere facility and further provided each lot or shipment of such apples to California is accompanied by a certificate, as stated in (1) above, evidencing compliance with the minimum requirements of this paragraph.
- (5) Solid Frozen Fruits Exempt. No restrictions are placed by this regulation on the entry into this State of fruits which upon arrival are frozen solid and which are under refrigeration to assure their solid frozen state.
- (6) Shipments from Cold Storage at 32°F. (0°C.). Commodities covered which are held in cold storage for a continuous period of forty (40) days or more, during which period the temperature within the storage room is maintained at thirty–two degrees Fahrenheit (32°F.) (0°C.) or less, may be admitted into California provided each lot or shipment is accompanied by a certificate, as stated in (1) above, evidencing compliance with the minimum requirements of this paragraph.
- (7) Soil or Growing Media When Certified. Soil or growing media specified in (c)(3) is admissible when certified as treated at origin in a manner approved by the Secretary.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 2–24–83; effective thirtieth day thereafter (Register 83, No. 9). For prior history, see Register 82, No. 19.
- 2. Amendment filed 7–20–83; effective thirtieth day thereafter (Register 83, No. 30).
- 3. Amendment of subsections (b) and (c) and repealer of subsection (e) filed 10–12–84; designated effective 1–1–85 (Register 84, No. 41).
- 4. Amendment of subsections (b) and (c) filed 8-16-85; effective thirtieth day thereafter (Register 85, No. 33).
- 5. Amendment of subsection (c)(1) filed 6–26–86; effective thirtieth day thereafter (Register 86, No. 26).
- Amendment of section heading and text filed 6-17-94; operative 7-18-94 (Register 94, No. 24).

§ 3267. Elm Tree Diseases Exterior Quarantine (Quarantine Proclamation 21).

NOTE: New authority cited: Sections 407, 5301, and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–28–77; as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 73, No. 51.
- 2. Amendment of subsection (b-1) filed 10-13-78; effective thirtieth day thereafter (Register 78, No. 41).
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 4. Repealer filed 6-28-94; operative 7-28-94 (Register 94, No. 26).

§ 3268. Peach Wart Disease Exterior Quarantine.

NOTE: Authority cited: Sections 407, 5301, and 5302 of the Food and Agricultural Code. Reference: Sections 5301 and 5302 of the Food and Agricultural Code.

HISTORY

- 1. New section filed 7-11-47 (Register 8).
- 2. Repealer filed 7-3-80; effective thirtieth day thereafter (Register 80, No. 27).
- 3. Editorial correction of HISTORY NOTE No. 2 (Register 83, No. 48).

§ 3269. Oak Wilt Disease Exterior Quarantine (Quarantine Proclamation 23).

HISTORY

- 1. Amendment of subsection (b-1) filed 5-24-73; effective thirtieth day thereafter (Register 73, No. 21). For prior history, see Register 72, No. 24.
- 2. Repealer filed 12-15-75; effective thirtieth day thereafter (Register 75, No. 51).

§ 3270. Pickleworm Exterior Quarantine.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–8–77; effective thirtieth day thereafter (Register 77, No. 33). For prior history, see Register 63, No. 5.
- 2. Amendment of subsection (c) filed 10–13–78; effective thirtieth day thereafter (Register 78, No. 41).
- 3. Repealer filed 6–30–80 as an emergency; effective upon filing (Register 80, No. 27). A Certificate of Compliance must be transmitted to OAH within 120 days or emergency language will be repealed on 10–28–80.
- 4. Certificate of Compliance filed 10-23-80 (Register 80, No. 43).
- 5. Editorial correction of NOTE (Register 81, No. 4).

§ 3271. Burrowing and Reniform Nematode Exterior Quarantine.

A quarantine is established against the following pests, their hosts and possible carriers:

- (a) Pests. Burrowing nematode (*Radopholus similis*) and reniform nematode (*Rotylenchulus reniformis*), parasites of the roots of citrus and many other plants.
- (b) Area Under Quarantine. Infested Area. The states of Alabama, Arkansas, Florida, Georgia, Hawaii, Louisiana, Mississippi, North Carolina, South Carolina, Texas, and the Commonwealth of Puerto Rico.
- (c) Articles and Commodities Covered. The following articles and commodities are restricted entry into California when arriving from the area under quarantine.
 - (1) All earth (including sand and soil) and potting media.
 - (2) All plants and plant parts with roots (including aerial roots).
 - (3) All parts of plants produced below the ground or soil level.
 - (4) All plant cuttings for propagation.
- (5) Exemptions. The following articles and commodities are exempt from the quarantine:
 - A. Industrial sand and clay.
- B. Air plants (including certain orchids and other plants produced epiphytically) if growing exclusively in or on soil–free material such as osmunda fiber, tree fern trunk, or bark.
- C. Aquatic plants (those species normally growing in, on or under permanent water, either rooted in soil or free-floating) if free from soil.
- D. Plants secured by air–layering if roots are established and enclosed in the original soil–free moss wrappings.

- E. Cuttings of ti (*Cordyline* spp.) if free from roots and soil.
- F. Dormant bulbs and corms for propagation, if free from roots and soil, but not including taro corms for propagative purposes.
- G. All fleshy roots, corms, tubers, and rhizomes for edible or medicinal purposes if washed or otherwise freed of soil.
 - (d) Restrictions.
- (1) Certification Requirements for Commodities From Area Under Quarantine. All commodities covered moving from the "Area Under Quarantine" listed in (b) above, whether moved direct from said area or by diversion or reconsignment from any other point (without regard to period of time held or grown at any intermediate point), are prohibited entry unless each shipment or lot is accompanied by a certificate issued by the authorized agricultural official of the state, district, or commonwealth where produced establishing that all material contained in the lot or shipment meets either A, B, or C below:
- (A) It has been determined through surveys, conducted at annual intervals (or during the one-year period prior to shipment), that burrowing and reniform nematodes do not exist on the property or premise or facility used to grow the nursery stock, and that the seed or plant parts used for production of the plants were determined by the certifying officer to be free from burrowing and reniform nematodes (the survey methods shall have been approved by the California Department of Food and Agriculture); or
- (B) The plants or plant parts being shipped to California were protected from burrowing and reniform nematode infestation by all the following sanitation methods:
- 1. Propagated from clean seed or from cuttings taken at least 12 inches above ground level.
- 2. Planted in sterilized soil or other suitable material prepared or treated to assure freedom from burrowing and reniform nematode.
 - 3. Retained in sterilized pots, containers, or beds.
- 4. Placed on sterilized benches or sterilized supports at least 18 inches from the ground or floor level.
- 5. Area beneath benches or supports holding plants treated at sixmonth intervals with a registered nematocide or other material having nematocidal value and approved by the origin state agricultural officials, except when smooth clean flooring of concrete is present.
- 6. Plants and growing media sampled using methods approved by the California Department of Food and Agriculture and found free of burrowing and reniform nematode.
- 7. Protected from contamination by burrowing and reniform nematode until shipped, or
- (C) The shipment consists of only unrooted plant cuttings provided that the cuttings were taken from that portion of the plant which is growing at least 12 inches above ground level and were protected from contamination until shipped.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–15–74 as an emergency; effective upon filing (Register 74, No. 20). For prior history, see Register 73, No. 48.
- 2. Amendment filed 7–15–74 as an emergency; effective upon filing. Certificate of Compliance included (Register 74, No. 29).
- Amendment filed 4–25–77; effective thirtieth day thereafter (Register 77, No. 18).
- Amendment of subsection (b)(1) filed 10–13–78; effective thirtieth day thereafter (Register 78, No. 41).
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 6. Amendment of section heading and section filed 8–10–95; operative 9–9–95 (Register 95, No. 32)

§ 3272. Cornstalk Borers and Sugarcane Borer Exterior Quarantine.

A quarantine is established against the following pests, their hosts and possible carriers:

(a) Pests. Southern cornstalk borer (*Diatraea crambidoides*); southwestern corn borer (*Diatraea grandiosella*); and sugarcane borer (*Diatraea grandiosella*);

- *traea saccharalis*), moths, in the family Pyralidae, which cause extensive damage to corn and sugarcane by boring in the stalks and tap roots.
- (b) Area Under Quarantine. The entire States of Alabama, Arizona, Arkansas, Delaware, Florida, Georgia, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Nebraska. New Jersey, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Virginia.
- (c) Articles and Commodities Covered. The following articles and commodities are hereby declared to be hosts and possible carriers of the pests herein quarantined against.
- (1) Corn or Maize (*Zea mays*). Stalks or corncobs including corn on the cob (fresh or dry).
- (2) Sugarcane (Saccharum officinarum). Stalks, cuttings, rooted plants or parts thereof, except clean seed.
 - (d) Restrictions.
- (1) Certification Required. Except as provided in paragraphs (2) and (3) below, articles and commodities covered are prohibited entry into the State of California from the area under quarantine unless each shipment or lot is accompanied by a certificate issued by an authorized agricultural official of the state of origin, evidencing field treatments and inspections of the growing crop or post harvest treatment for the pests quarantined against as prescribed by the department. The certificate shall specify: treatment; the kind and quantity of the commodity constituting the lot or shipment; the initials and number of the railway car or license number of the truck or trailer; the name and address of the shipper and consignee; and the date issued.
- (2) Manufactured or Processed Products Exempt from Restrictions. No restrictions are placed by this regulation upon the entry into this state of products consisting wholly or in part of articles or commodities covered which are processed or manufactured in such a manner as to eliminate all danger of carrying the pests herein quarantined against.
- (3) Treatment Certificates for European Corn Borer Accepted. Articles or commodities moving under a certificate issued by an authorized agricultural official evidencing compliance with the certification and/or exemption requirements of Section 3263 of Title 3 of the California Code of Regulations pertaining to the European Corn Borer Exterior Quarantine, are exempted from the certification requirements of this section.
- (4) Exemptions. Department inspectors may release small lots or shipments of articles or commodities covered which have been adequately inspected for the pests quarantined against.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–23–56; effective thirtieth day thereafter (Register 56, No. 14).
- 2. Amendment filed 3–28–74; effective thirtieth day thereafter (Register 74, No. 13).
- 3. Editorial correction (Register 76, No. 38).
- 4. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 5. Amendment of section heading and subsections (b), (d)(1), (d)(3) and (d)(4) filed 8–27–98; operative 9–26–98 (Register 98, No. 35).

§ 3273. Walnut and Pecan Pests Exterior Quarantine (Quarantine Proclamation 27).

A quarantine is established against the following pests, their hosts, and possible carriers:

- (a) Pests. Walnut husk flies (*Rhagoletis suavis*), (*Rhagoletis juglandis*), and (*Rhagoletis boycei*); nut tree casebearers (*Acrobasis* spp.); butternut curculio (*Conotrachelus juglandis*); black walnut curculio (*Conotrachelus retentus*); pecan weevil (*Curculio caryae*); and hickory shuckworm (*Laspeyresia caryana*).
 - (b) Area Under Quarantine.
- (1) On account of the walnut husk flies, nut tree casebearers, and curculios, all states and districts of the United States, except the State of Arizona.
- (2) On account of the pecan weevil and hickory shuckworm, the states of Alabama, Arkansas, Florida, Georgia, Kansas, Kentucky, Louisiana,

Page 306 Register 98, No. 35; 8–28–98

Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas and Virginia.

- (c) Articles and Commodities Covered. The following articles and commodities are hereby declared to be hosts and possible carriers of the pests quarantined against:
- (1) Unhusked nuts of walnuts and butternuts (*Juglans* spp.), and any such husks or hulls or fragments thereof moved as such, or adhering to, or moved in connection with any article or thing.
- (2) Husks or hulls, and fragments thereof, and nuts in the shell of pecan and hickory (*Carya* spp.).
- (3) Boxes, sacks, and other containers, equipment, appliances, machinery and vehicles used in connection with harvesting, hulling, dehydrating, shelling, transporting, or storing of any unhusked nuts of walnut, butternut or hulls of walnut, butternut, pecan and hickory.
 - (d) Restrictions.
- (1) Certificate of Treatment Required. Restricted articles originating in or shipped from the area under quarantine shall be refused admittance into the State of California unless each lot or shipment is accompanied by a certificate issued by an authorized representative of the Department of Agriculture in the state of origin of the article or commodity evidencing treatment for the pests quarantined against approved by the director and under official supervision of an authorized representative of the Department of Agriculture in the state of origin prior to arrival in this state. The certificate must show kind and amount of articles covered, except that in the case of small noncommercial quantities of unhusked nuts of walnut and butternut transported via mail, express or as personal belongings, the director may permit the removal and destruction of husks or hulls, or permit treatment of the lot, under his supervision, at the risk and expense of the owner or receiver, after which the lot may be released.
- (2) No restrictions are placed by this regulation on the movement of nuts in the shell of walnut and butternut from which all husks or hulls have been completely removed, or on the movement of extracted nut meats of walnut, butternut, pecan, and hickory.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 72, No. 24.
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 3. Amendment filed 3–7–84; effective thirtieth day thereafter (Register 84, No. 10).

§ 3274. Cedar–Apple Rust Disease Exterior Quarantine (Quarantine Proclamation 28).

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. *Gymnosporangium juniperi-virginianae* (cedar-apple rust). This fungus pathogen causes galls to form on susceptible species of junipers and produces rust pustules on leaves, fruits and twigs of susceptible species of apples and crab apples.
- (b) Area Under Quarantine. The State of Alaska and all states and districts east of and including the States of Montana, South Dakota, Nebraska, Kansas, Oklahoma and Texas.
- (c) Articles and Commodities Covered. Viable cedar–apple galls. Living plants, trees, cuttings, branches and leaves of all species, hybrids and botanical and horticultural varieties of juniper (*Juniperus* spp.) and apple and crab apple (*Malus* spp.); except nonsusceptible junipers when properly labeled as to scientific name and apple and crab apple cuttings, scions, and trees when completely dormant and trees are bare–rooted.
- (1) Susceptible Species of Juniper. The following *Juniperus* species and all their varieties are hosts and possible carriers:

Juniperus chinensis---Chinese Juniper

- J. communis—common juniper, English juniper
- J. horizontalis—creeping juniper
- J. osteosperma—Utah juniper, desert juniper
- J. pinchotii-redberry juniper
- J. scopulorum—Rocky Mountain juniper, Western red cedar

- J. silicicola—Southern red cedar
- J. virginiana—Eastern red cedar
- (d) Restrictions. Articles and commodities covered are prohibited entry into California from the area under quarantine unless they qualify under one of the conditions listed below:
- (1) Susceptible Junipers Certification Requirements. Susceptible species and varieties must be accompanied by an official certificate of the Department of Agriculture of the state of origin which certifies that the article or commodity has been grown and handled in compliance with the following conditions:
- (A) Juniper plants produced from seed may be certified provided that they have been grown and packed for shipment at a location at least two miles distant from any susceptible apple or crab apple tree.
- (B-1) Juniper plants produced from cuttings or layers may be certified provided that they have been grown at least two years immediately previous to shipment and packed for shipment at a location at least two miles from any susceptible apple or crab apple trees.

OF

- (B-2) Juniper plants produced from cuttings or layers which have been grown less than two years at a location described in (B-1) above, may be certified only if during the growing period there have been no apple or crab apple trees grown within two miles of the location where the junipers were grown and packed for shipment and there have been no apple or crab apple trees grown within two miles of the locations of all source plants for a period of at least two years immediately previous to taking the cuttings or layers.
- (C) Unrooted juniper cuttings and rooted layers may be certified if there have been no apple or crab apple trees grown within two miles of the location of all source plants for a period of two years immediately previous to taking the cuttings or layers and provided that the cuttings or layers are packed for shipment on the source plant location.

NOTE: Authority cited: Sections 407, 5301, and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–8–61; effective thirtieth day thereafter (Register 61, No. 18).
- 2. Amendment of subsections (a) and (b) filed 10-5-72; effective thirtieth day thereafter (Register 72, No. 41).
- 3. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3275. European Pine Shoot Moth Exterior Quarantine.

- A quarantine is established against the following pest, its hosts and possible carriers:
 - (a) Pest. European pine shoot moth (Rhyacionia buoliana).
- (b) Area Under Quarantine. The states of Connecticut, Delaware, Idaho, Illinois, Indiana, Iowa, Maine, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Washington, West Virginia, and Wisconsin.
- (c) Articles and Commodities Covered. All species and varieties of pine (*Pinus* spp.) trees (with or without roots) and any branches or twigs of pine bearing terminal buds, needles or shoots are declared to be hosts and possible carriers of the pest quarantined against.
 - (d) Restrictions.
- (1) Certificate of Origin or Treatment Required. Articles and commodities covered are prohibited entry into California from the area under quarantine unless each lot or shipment is accompanied by a certificate issued by an authorized agricultural official of the origin state affirming that the material meets the requirements of either (A), (B), or (C) below:
- (A) Origin Certificate From Noninfested Areas. Shipments of articles and commodities covered may be certified provided the origin certificate is issued after the growing site or growing area has been trapped for the European pine shoot moth as prescribed by the department and found free from European pine shoot moth.
- (B) Origin Certificate From Noninfested Counties or Parishes. Shipments of articles and commodities covered may be certified provided the

Page 307

origin certificate is issued after the county or parish has been trapped for European pine shoot moth as approved by the department and found free from European pine shoot moth.

- (C) Treatment Certificate. Shipments of articles and commodities covered may be certified provided they have been treated for European pine shoot moth under supervision of an authorized agricultural official of the state of origin prior to shipment in a manner and by a method which has been prescribed by the department.
- (2) Exemptions. The following articles and commodities are exempt from the certification requirements of this regulation:
 - (A) Pine boughs in wreaths.
 - (B) Noncommercial shipments not exceeding three in number of:
 - 1. Bonsai pine trees.
 - 2. Rooted pine trees three feet or less in height.
 - 3. Cut pine Christmas trees for normal indoor use.
- 4. Cut pine branches, not to exceed the equivalent of 3 pine trees of the size for normal indoor use.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 4–20–78 as an emergency; effective upon filing (Register 78, No. 16). For prior history, see Register 72, No. 24.
- 2. Certificate of Compliance filed 6-13-78 (Register 78, No. 24).
- 3. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- Amendment of section heading and subsections (b), (d)(1) and (d)(1)(A), new subsection (d)(1)(B), subsection relettering, and amendment of newly designated subsection (d)(1)(C) filed 11–30–98; operative 12–30–98 (Register 98, No. 49).

§ 3276. Peach Rosette Disease Exterior Quarantine (Quarantine Proclamation 30).

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. The pathogen which causes peach rossette disease. The pathogen is a mycoplasma-like organism.
- (b) Area Under Quarantine. The entire states of Alabama, Arkansas, Georgia, Mississippi, Oklahoma, South Carolina, Tennessee and West Virginia.
- (c) Articles and Commodities Covered. Trees and all parts capable of propagation (budsticks, scions, rootstocks, etc.), except seed (fruit pits) of all species of the genus *Prunus* are declared hosts and possible carriers, except the evergreen species: *P. caroliniana*, American cherry laurel, Carolina cherry laurel; *P. ilicifolia*, holly—leaf cherry, California cherry; *P. laurocerasus*, cherry laurel, English laurel; *P. lusitanica*, Portugal laurel; *P. lyonii*, Catalina cherry.
- (d) Restrictions. All articles and commodities covered are prohibited entry into California from the area under quarantine except as provided in (2) below.
- (1) Symptomless Carriers Prohibited. Trees and all parts capable of propagation, except seed, of the 'Wilson' cultivar of apricot (*P. armenia-ca*) and Marianna plums (*P. cerasifera x P. munsoniana*), and any tree budded or grafted on Marianna plum understock, are declared symptomless carriers and prohibited entry.
- (2) Nursery Stock. Nursery stock of the restricted *Prunus* species (other than symptomless carriers, or stock budded onto symptomless carriers, as stated in paragraph (1) above) is permitted entry provided:
- (A) Each species and variety is properly labeled as to scientific name and state of origin; and
- (B) Each lot or shipment is accompanied by an origin certificate issued by an authorized official of the origin state Department of Agriculture verifying that the stock met all requirements for certification as prescribed by the director. Certificates may be issued under the following conditions:
- (1) Origin certificates may be issued after competent and adequate surveys have been made by the origin State Department of Food and Agriculture or the United States Department of Agriculture at the proper time

in relation to the disease and hosts. No peach rosette disease shall have been found during the last two growing seasons previous to digging the trees or taking the buds either on or within one mile of the growing grounds or bud source properties.

- (2) No certificates shall be issued for movement of host trees to this State if during the period of their production there has existed on the growing grounds any Wilson apricot or Marianna plum tree or any other tree growing on Marianna plum understock, nor if during the last two growing seasons previous to digging the trees or taking the buds any Wilson apricot or Marianna plum tree has existed within one mile of the growing grounds or bud source properties.
- (3) Seedling trees or trees budded on admissible rootstocks which are grown from seed and shipped in one growing season, may be certified provided any budwood used in the production of such trees meets all conditions in (1) and (2) of this paragraph and no peach rosette disease has occurred during the growing season either on or within one mile of the growing ground property.
- (4) Certificates may be issued for reshipments of dormant host trees and propagative parts which have been produced outside of the area under quarantine and have remained dormant while within the area. Certificates shall set forth the name of the state where produced and shall state that the trees and propagative parts remained dormant while within the area under quarantine.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–26–63; effective thirtieth day thereafter (Register 63, No. 24).
- 2. Amendment of subsections (b) and (e) filed 4-26-68; effective thirtieth day thereafter (Register 68, No. 17).
- 3. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3277. Cereal Leaf Beetle Exterior Quarantine (Quarantine Proclamation 31).

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. Cereal leaf beetle (*Oulema melanopus*). A beetle, family Chrysomelidae, which is a destructive leaf feeder. Wheat, barley, and oats are the principal crops attacked by both larva and adult.
- (b) Area Under Quarantine. All states and districts of the United States east of and including Minnesota, Iowa, Missouri, Arkansas, and Louisiana.
- (1) Infested Area. The states of Connecticut, Delaware, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia shall be known as the Infested Area
- (2) Area Not Known to be Infested. All states in the Area Under Quarantine [see (b) above] and not named in the Infested Area [see (b)(1) above] shall be known as the Area Not Known to be Infested.
- (c) Commodities and Items Covered. Small grains such as barley, oats, and wheat; ear corn; straw and hay, including marsh hay (pelletized hay is not covered); grass sod; grass and forage seed; fodder and plant litter; used harvesting equipment or machinery; and cut or balled Christmas trees of Scotch pines (*Pinus sylvestris*), red pine (*Pinus resinosa*), and Austrian pine (*Pinus nigra*), including all subspecies thereof.
 - (d) Restrictions.
- (1) Exemption of Commodities Covered. The following commodities are exempt from all restrictions of this quarantine under conditions as prescribed below.
 - (A) Grain sorghum, shelled corn, and soybeans.
- (B) Small grain seed, grass seed, and forage seed when cleaned and shipped in bags or small packages.
- (C) All straw and hay that has been used as bedding for animals during shipment.

Page 308 Register 98, No. 49; 12-4-98

- (D) Small grains shipped during the period of February 1 to April 30 inclusive, each year.
- (2) Commodities and Items Covered Admitted From Quarantined Area if Treated at Origin.
- (A) Commodities and items covered are admissible into California from the area under quarantine provided each lot or shipment is officially certified by an authorized representative of the origin state department of agriculture or the United States Department of Agriculture affirming that the lot or shipment was treated prior to shipment under official supervision in a manner approved by the Director of the Department of Food and Agriculture and was not exposed to re—infestation.
- (3) Commodities and Items Covered Admitted Under Certification as to Origin.
- (A) Commodities covered which are grown in and shipped from the Area Not Known To Be Infested are enterable into California provided each lot or shipment is officially certified by an authorized representative of the state department of agriculture where shipment was made, or the United States Department of Agriculture, giving the date and state or states where the commodities were produced.

A rubber stamp which bears a facsimile signature of the proper state official may be issued to shippers which are under state supervision. Imprints of such a stamp placed on the waybills accompanying shipments will be acceptable as an authorized certificate.

- (B) Used harvesting equipment or machinery from the Area Not Known To Be Infested may be admitted under certification from an agricultural official of the origin state. To be eligible for such certification, the used harvesting equipment or machinery shall not have been used in any infested state for a period of one year prior to shipment.
- (C) Used harvesting equipment or machinery from the area under quarantine may be admitted under certification from an agricultural official of the origin state. To be eligible for such certification the used harvesting equipment or machinery shall not have been used from April through August of the current year.
- (4) Small Grains, Grass Seed, and Forage Seed from Area Not Known to be Infested with Cereal Leaf Beetle Admitted Under Certificate of Inspection.
- (A) Small grains such as barley, oats, and wheat; and grass and forage seed, produced in an area not known to be infested as specified in subsection (b)(2) may be admitted under certification from an agricultural official of the state of origin. The certificate shall affirm that the lot or shipment has been inspected and found free of cereal leaf beetle (both live and dead). The inspection for such certification shall consist of representative samples from individual truck or rail car lots to be shipped and at least ten (10) representative samples from the top and intermediate areas (inspection holes) of silos.
- (5) Commodities and Items Covered Allowed Movement Under Permit From the Director.
- (A) The Director may issue permits admitting commodities and items covered, subject to limitations, conditions, and provisions which the Director may prescribe therein.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

History

- 1. Amendment of subsections (b) and (d)(1) filed 1–27–77; effective thirtieth day thereafter (Register 77, No. 5). For prior history, see Register 74, No. 50.
- Amendment filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Editorial correction of NOTE filed 6-3-83; effective thirtieth day thereafter (Register 83, No. 23).

§ 3278. Whitefringed Beetle Exterior Quarantine (Quarantine Proclamation 33).

NOTE: Authority cited: Sections 407, 5301, 5302, Food and Agricultural Code. Reference: Sections 5301, 5302, Food and Agricultural Code.

HISTORY

1. New section filed 5–14–76; effective thirtieth day thereafter (Register 76, No. 20).

- 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Repealer filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3279. West Indian Sugarcane Root Borer Exterior Quarantine (Quarantine Proclamation 34).

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. West Indian sugarcane root borer, *Diaprepes abbreviata*, a pest native to the West Indies, which causes serious damage to sugarcane and also attacks ornamental nursery stock, citrus, corn, sweet potatoes, cotton, and peppers.
- (b) Area Under Quarantine. State of Florida: Counties of Broward, Collier, Dade, Glades, Hendry, Highlands, Hillsborough, Indian River, Lake, Lee, Manatee, Orange, Palm Beach, Polk, St. Lucie, Seminole, and Volusia.
 - (c) Articles and Commodities Covered.
 - (1) Soil, sand or gravel separately or with other things.
- (2) All plants and plant parts and plant products capable of propaga-
- (d) Restrictions. Articles and commodities covered are admissible into California from the area under quarantine if they have been certified by an authorized agricultural inspector of the state of origin to have been treated for West Indian sugarcane root borer in an approved manner or to have originated in an area free from the sugarcane root borer.
- (1) Exemptions. The following articles are exempt from the certification requirements of this quarantine:
 - (A) Seed.
 - (B) Fruits and vegetables grown above ground.
- (C) Fleshy roots, corms, tubers, and rhizomes if washed or otherwise freed of soil.
 - (D) Defoliated bare root nursery stock.
 - (E) Privately-owned indoor decorative houseplants.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–17–77; effective thirtieth day thereafter (Register 77, No. 4).
- 2. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 3. Amendment of subsection (b) filed 6–27–94; operative 7–27–94 (Register 94, No. 26).

§ 3280. Japanese Beetle Exterior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Japanese beetle, *Popillia japonica*, a beetle, family Scarabaeidae, which in the larval stage attacks the roots of many plants and as an adult attacks the leaves and fruits of many plants.
 - (b) Area Under Quarantine.
- (1) The entire states of Connecticut, Delaware, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and the District of Columbia.
- (2) In the State of Alabama, the Counties of Blount, Calhoun, Chambers, Cherokee, Clay, Cleburne, Coosa, Dekalb, Etowah, Franklin, Jackson, Jefferson, Lee, Limestone, Macon, Madison, Marion, Marshall, Morgan, Randolph, St. Clair, Shelby, Talladega, Tallapoosa, Tuscaloosa and Winston.
- (3) In the State of Kansas, the Counties of Johnson, Sedgwick, Shawnee and Wyandotte.
- (4) In the State of Minnesota, the Counties of Carver, Dakota, Hennepin and Scott.
 - (5) In the State of Missouri:
 - (A) Counties of St. Louis, Franklin, Jefferson and Stone.
 - (B) City of St. Louis.

- (6) In the State of Wisconsin, the Counties of Dane, Door, Fond du lac, Jefferson, Kenosha, Milwaukee, Ozaukee, Racine, Rock, Sheboygan, Waukesha, and Wood.
 - (7) In Canada:
- (A) In the Province of Ontario: The Counties of Niagara, Haldimand–Norfolk and Hamilton–Wentworth.
- (B) In the Province of Quebec: The Regional Municipalities of Canada of Brome–Missiquoi, Le Haut–Richelieu, Champlain, Rousillon, and Le Bas–Richelieu.
- (c) Articles and Commodities Covered. The following are hereby declared to be hosts and possible carriers of the pest quarantined against:
- (1) Soil except when commercially packaged. For the purposes of this section, soil shall mean all growing media;
- Humus, compost, and manure (except when commercially packaged);
- (3) All plants with roots (except bareroot plants free from soil). "Free from soil" as used in this regulation shall mean free from soil in amounts that could contain concealed Japanese beetle larvae or pupae;
 - (4) Grass sod:
 - (5) Plant crowns or roots for propagation (except when free from soil);
- (6) Bulbs, corms, tubers, and rhizomes of ornamental plants (except when free from soil);
- (7) Any other plant, plant part, article, or means of conveyance when it is determined by a California State Plant Quarantine Officer to present a hazard of spreading live Japanese beetle due to infestation or exposure to infestation by Japanese beetle.
- (d) Restrictions. All articles and commodities covered are prohibited entry into California from the area under quarantine with the following exceptions:
- (1) Certificate of Treatment. All of the articles and commodities covered are approved for entry into California when accompanied by a certificate issued by an authorized state agricultural official stating that the article or shipment was treated for Japanese beetle prior to shipment or by a certificate issued by an authorized state agricultural official at origin stating that the article or commodity shipped was grown in accordance with methods and procedures approved and prescribed by the Secretary.
- (2) Certificate of Origin. Commercial plant shipments with soil may be shipped from the area under quarantine into California provided such shipments are accompanied by a certificate issued by an authorized state agricultural official at origin. Such certificates shall be issued only if the shipment conforms fully with either (A), (B) or (C) below:
- (A) The greenhouse in which the plants were produced was tightly constructed so that adult Japanese beetles would not gain entry, the plants and greenhouses were inspected and found to be free from all stages of Japanese beetle, and the plants and soil were protected from subsequent infestation while being stored, packed and shipped; or
- (B) The plants were not produced in the regulated area, were transported into the regulated area in a closed conveyance or closed containers and at all times thereafter were protected from becoming infested with Japanese beetle; or
- (C) States or portions of states listed in the area under quarantine may have counties that are not infested with Japanese beetle. Shipments of articles and commodities covered will be accepted from these noninfested counties if annual surveys are made in such counties and the results of such surveys are negative for Japanese beetle. A list of counties so approved will be maintained by the Secretary. The agricultural officials of other states may recommend a noninfested county be placed on the approved county list by writing for such approval and stating how the surveys were made giving the following information:
 - I. Area surveyed.
 - II. How survey was carried out.
 - III. Personnel involved.
 - IV. If county was previously infested, give date of last infestation.

The recommendation for approval of such counties will be evaluated by Pest Exclusion, Division of Plant Industry, California Department of Food and Agriculture.

If heavy infestations occur in neighboring counties, approval may be denied. To be maintained on the approved list, each county must be reapproved every twelve (12) months. Shipments of articles and commodities covered from noninfested counties will only be allowed entry into California if the noninfested county has been placed on the approved list prior to the arrival of the shipment in California.

(3) Privately owned houseplants grown indoors may be inspected and passed by California State Plant Quarantine Officers if found free from Japanese beetle.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–12–77; effective thirtieth day thereafter (Register 77, No. 38).
- Repealer of subsection (e) filed 10–13–78 as an emergency; effective upon filing (Register 78, No. 41).
- 3. Certificate of Compliance filed 1-19-79 (Register 79, No. 3).
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- Amendment filed 7-11-84; effective thirtieth day thereafter (Register 84, No. 28).
- 6. Amendment of section heading and section filed 8–1–96; operative 8–31–96 (Register 96, No. 31).
- 7. Amendment of subsection (c)(3) filed 4–2–97; operative 4–2–97 pursuant to Government Code section 11343.4(d). Submitted to OAL for printing only (Register 97, No. 14).

§ 3281. Hydrilla Exterior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Hydrilla, *Hydrilla verticillata*, an aquatic weed that can, by its thick growth, restrict water flow and make recreational lakes and ponds unusable.
- (b) Area Under Quarantine. All States, Districts and Territories of the United States.
 - (c) Articles and Commodities Covered.
- (1) Hydrilla plants or parts of plants capable of growing, including parts of stems, tubers, and turions.
- (2) Any products, articles, implements, conveyances (including boats), or any appliances capable of transporting viable plant parts of hydrilla.
- (3) Aquatic plants including those used as vegetation in shipments of live fish.
 - (d) Restrictions.
- (1) Articles and commodities covered in (c)(1) are prohibited entry into California from the area under quarantine.
- (2) Articles and commodities covered in (c)(2) from the area under quarantine are subject to inspection upon entry into California and, if found contaminated with hydrilla, shall be cleaned to eliminate hydrilla, treated for hydrilla by a method approved by the director, or returned out–of–state to the shipper.
- (3) Articles and commodities covered in (c)(3) are prohibited entry into California from the area under quarantine unless accompanied by a certificate, issued by a plant regulatory official of the state of origin, verifying the shipment is free of hydrilla.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302.

HISTORY

- 1. New section filed 9–12–77; effective thirtieth day thereafter (Register 77, No. 38).
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- Amendment filed 4–8–86; effective thirtieth day thereafter (Register 86, No. 15).

§ 3282. Lethal Yellowing and Lethal Decline of Palm Exterior Quarantine.

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. The pest is a pathogen, a non-cultivable mollicute (formerly called a mycoplasma-like organism), which causes lethal yellowing of palm in Florida and Texas.
 - (b) Areas Under Quarantine.
- (1) Florida. The counties of Broward, Collier, Dade, Hendry, Lee, Martin, Monroe, and Palm Beach.
 - (2) Texas. The counties of Cameron, Hidalgo, and Willacy.
- (c) Articles and Commodities Covered. Susceptible palm trees, screw pine, and hosts of *Myndus crudus* (the vector of lethal yellowing of palm), and all parts capable of propagation, except seed, are the articles and commodities covered. The following species of palm and screw pine are considered susceptible and the following grasses and sedges may host *Myndus crudus*:
 - (1) Aiphanes lindeniana
 - (2) Allagoptera arenaria
 - (3) Andropogon virginicus, broomsedge
 - (4) Arenga engleri
 - (5) Arikuryroba schizophylla, Arikury palm
 - (6) Borassus flabellifer, Palmyra palm
 - (7) Caryota mitis, Cluster fishtail palm
 - (8) Chrysalidocarpus cabadae, Cabada palm
 - (9) Cocos nucifera, Coconut palm
 - (10) Corypha elata, Buri palm
 - (11) Cynodon dactylon, bermudagrass
 - (12) Cyperus spp., sedges
 - (13) Dictyosperma album, Princess palm
 - (14) Eremochloa ophiuroides, centipedegrass
 - (15) Gaussia attenuata, Puerto Rican gaussia
 - (16) Howea belmoreana, Belmore sentry palm
 - (17) Hyophorbe verschaffeltii [Mascarena v.], Spindle palm
 - (18) Latania spp., Latan palm
 - (19) Livistona chinensis, Chinese fan palm
 - (20) Livistona rotundifolia
 - (21) Nannorrhops ritchiana, Mazari palm
 - (22) Panicum purpurascens, paragrass
 - (23) Panicum bartowense
 - (24) Pandanus utilis, screw pine
 - (25) Paspalum notatum, bahiagrass
 - (26) Neodypsis decaryi, Triangle palm
 - (27) Phoenix canariensis, Canary Island date palm
 - (28) Phoenix dactylifera, Date palm
 - (29) Phoenix reclinata, Senegal date palm
 - (30) Phoenix sylvestris, Wild date palm
 - (31) Pritchardia spp.
 - (32) Ravenea hildebrandtii
 - (33) Setaria spp., foxtail
 - (34) Stenotaphrum secundatum, St. Augustine grass
 - (35) Syagrus schizophylla
 - (36) Trachycarpus fortunei, Japanese fan palm
 - (37) Veitchia spp.
 - (d) Restrictions.
- (1) Prohibited. All articles and commodities covered, listed in (c) above, are prohibited entry into California when grown in or shipped from the areas under quarantine. Grasses and sedges covered may be admissible if each shipment is accompanied by an official certificate evidencing treatment for *Myndus crudus*, as indicated in (d)(2), below.
- (2) Certificate of Treatment. Grasses and sedges covered may be shipped to California from the area under quarantine subject to prior approval by the Secretary of the method of treatment to be used. Each ship-

ment must be accompanied by an official certificate issued by and bearing an original or facsimile signature of an authorized agricultural official of the state of origin indicating the method of treatment, quantity of commodity covered, identification or license number of carrier, and the names and addresses of the shipper and consignee.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–13–78; effective thirtieth day thereafter (Register 78, No. 41).
- 2. Amendment filed 11–13–81; effective thirtieth day thereafter (Register 81, No. 46)
- 3. Amendment of section heading and section filed 10–16–95; operative 11–15–95 (Register 95, No. 42).

§ 3283. Soybean Cyst Nematode Exterior Quarantine.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–3–80; effective thirtieth day thereafter (Register 80, No. 27).
- 2. Amendment filed 7–17–85; effective thirtieth day thereafter (Register 85, No. 29).
- 3. Amendment of subsection (b)(1) filed 5–27–86; effective thirtieth day thereafter (Register 86, No. 22).
- 4. Repealer filed 6-28-94; operative 7-28-94 (Register 94, No. 26).

§ 3284. Asparagus Aphid Exterior Quarantine (Quarantine Proclamation 39).

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–31–83 as an emergency; effective upon filing (Register 83, No. 14). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 7–29–83.
- 2. Certificate of Compliance filed 7-28-83 (Register 83, No. 31).
- 3. Amendment of subsection (d) filed 10–17–84; effective thirtieth day thereafter (Register 84, No. 42).
- 4. Repealer filed 3–5–97; operative 4–4–97 (Register 97, No. 10).

§ 3285. Gypsy Moth Exterior Quarantine (Quarantine Proclamation 40).

HISTORY

- New section filed 9-12-84 as an emergency; effective upon filing (Register 84, No. 40). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-10-85.
- 2. Repealed by operation of Government Code Section 11346.1(g) (Register 85, No. 3)

§ 3286. Tomato Yellow Leaf Curl Virus Exterior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Tomato yellow leaf curl virus, a virus which causes tomato vellow leaf curl, a serious disease of tomatoes.
 - (b) Area Under Quarantine. The entire state of Florida.
- (c) Articles and Commodities Covered. All plants and plant parts of tomato (*Lycopersicon esculentum*), except fruit and seed.
- (d) Restrictions. Articles and commodities covered are prohibited entry into California from the area under quarantine.

NOTE: Authority cited: Sections 407, 5301 and 5302, Food and Agricultural Code. Reference: Sections 5301 and 5302, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–3–97 as an emergency; operative 12–3–97 (Register 97, No. 49). A Certificate of Compliance must be transmitted to OAL by 4–2–98 or emergency language will be repealed by operation of law on the following
- 2. Certificate of Compliance as to 12–3–97 order transmitted to OAL 3–13–98 and filed 4–22–98 (Register 98, No. 17).

Article 4. Interior Quarantine (Regulations)

§ 3400. Peach Mosaic Disease Interior Quarantine (Quarantine Regulation 1).

A quarantine is established against the following pest, its hosts, and possible carriers.

- (a) Pest. Peach mosaic virus disease.
- (b) Area Under Quarantine.
- (1) Los Angeles County. All that portion of Los Angeles County bounded on the north by the township line separating Townships 2 and 3 North, and bounded on the west by a line drawn in a generally southerly direction, starting at the point of intersection of said township line separating Townships 2 and 3 North with the range line separating Ranges 9 and 10 West; then south along said range line to its intersection with the San Gabriel River; then southwesterly along the center of the San Gabriel River channel (or wash) to its intersection with Valley Blvd.; then southeasterly along Valley Blvd. to its intersection with Sunset Ave.; then northeasterly along Sunset Ave. to its intersection with Merced Ave.; then southeasterly along Merced Ave. to its intersection with Glendora Ave.; then southerly along Glendora Ave. to its intersection with Merced Ave.; then east along Merced Ave. to its intersection with Azusa Ave.; then southerly along Azusa Ave. and its southerly extension (west boundary of Section 35, Township 1 South, Range 10 West) to its intersection with the township line separating Townships 1 and 2 South; then east along said township line to its intersection with the range line separating Ranges 9 and 10 West; then south along said range line to its intersection with the Los Angeles-Orange County boundary line.
- (2) Riverside County. All that portion of Riverside County lying west of the range line separating Ranges 9 and 10 East.
- (3) San Bernardino County. All that portion of San Bernardino County lying west of the range line between Ranges 2 and 3 East, and south of the township line between Townships 2 and 3 North.
 - (4) San Diego County. Entire County.
 - (All township and range lines are S.B.B.M.)
- (c) Articles and Commodities Covered. All species including the flowering forms of almond, apricot, nectarine, peach, plum, and prune trees or parts thereof capable of propagation, except fruit pits, are declared to be hosts or possible carriers of said pest.
 - (d) Restrictions.
 - (1) Definition of Terms—as used in this regulation:
 - (A) "Trees" means any kind of tree named in subsection (c).
- (B) "Growing ground" means any property within the area under quarantine on which trees are produced from seeds or grafts for movement or distribution therefrom as nursery stock.
- (C) "Sales yard" or "distribution point" means any property within the area under quarantine onto which finished trees have been moved under permit as provided in (4) below and from which such trees are to be moved as nursery stock.
- (2) Conditions Governing Movement of Articles and Commodities Covered.
- (A) Unless authorized movement under permit as hereinafter provided, articles and commodities covered, including budwood and cuttings, and trees for planting in commercial orchards, shall not be transported or moved by any means from the area under quarantine.
- (B) No restrictions are placed on movements of trees within the area under quarantine for planting on properties not containing commercial orchards.
- (3) Property and Environs Inspection. Wherever official inspection of a property and its environs is required as a condition of certifying or permitting movements of restricted products in this section, an inspection shall be made of trees on the property and its environs within four–tenths mile. The inspection shall be made at the proper time in relation to the disease and host, and shall be completed during the growing season previous to moving trees from the property or taking buds from the source

tree. The certificate or permit may be issued if there is no peach mosaic disease found and there is no record of said disease having occurred on the property or its environs within one year previous to the date restricted products are moved.

- (4) Seasonal Dealer Permits for Handling Dormant Trees Secured Outside Area Under Quarantine. The county agricultural commissioner may issue dealer permits valid for one season, authorizing dealers within the area under quarantine to handle dormant trees, secured outside the area under quarantine for distribution to any point in this state, without certificate. In consideration of such permit, the dealer shall sign an agreement with the agricultural commissioner, designating the sales yard or distribution point property from which all such trees shall be distributed, and shall agree to abide by the following conditions:
- (A) That dealer controls all movements of nursery stock to and from said property.
- (B) That during the period of such permit, all host nursery stock trees on said property shall be dormant stock secured directly from sources outside the area under quarantine.
- (C) That immediately on arrival on said property of each shipment of such trees, the dealer will notify the agricultural commissioner, and hold the shipment intact together with the shipping permit, intercounty nursery stock certificate, waybill, and other identifying papers and markings until released by the agricultural commissioner.
- (D) That immediately when any host stock on the property breaks dormancy, the dealer will notify the agricultural commissioner and either destroy all remaining host stock on the property or thereafter restrict distribution of that stock to points within the area under quarantine.
- (5) Conditions Governing Movement of Budwood Into Area Under Quarantine From Points Outside Thereof. All budwood or cuttings secured from points outside the area under quarantine shall be reported to the agricultural commissioner of the county in the area under quarantine in which such budwood or cuttings will be propagated. Said commissioner will cause a record to be kept of origin, kind, amount, and date of arrival and of trees into which such budwood or cuttings are placed.
- (6) Movement in Transit Through Area Under Quarantine. Articles and commodities covered may be moved from points outside the area under quarantine, through the area under quarantine without delay or diversion while within said area, to points outside thereof only in tightly wrapped bales, bundles, or containers, or in a similarly tight conveyance while within the area under quarantine.

HISTORY

- 1. Amendment filed 2–7–63; effective thirtieth day thereafter (Register 63, No. 3). For prior history see Register 60, No. 1.
- Amendment filed 10–16–64; effective thirtieth day thereafter (Register 64, No. 21).
- 3. Amendment of subsection (d)(6) and (7) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 4. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3401. Ozonium Root Rot Interior Quarantine (Quarantine Regulation 2).

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Ozonium root rot (*Phymatotrichum [Ozonium] omnivorum*), a fungus carried on the roots of plants and in moist soil.
 - (b) Area Under Quarantine.

Imperial County: The entire county.

Riverside County: All that portion of Riverside County described as follows:

Palo Verde Area: Beginning at the point of intersection of the north line of Township 5 South, San Bernardino Meridian, and the mid–line of the Colorado River; then running due west along said north line of Township 5 South to the west line of Range 21 East; then south on said west line of Range 21 East to the south line of Township 8 South; then east on the south line of Township 8 South to the mid–line of the Colorado River;

Page 312 Register 98, No. 49; 12-4-98

then northerly along the mid-line of the Colorado River to the point of beginning.

Coachella Valley Area: (1) Beginning 548 feet south of northwest corner of the northwest one–fourth Section 22 in Township 5 South, Range 7 East, San Bernardino Meridian; then south 528 feet; then east 2.625 feet; then north 528 feet; then west 2,625 feet to the point of beginning; and (2) all that portion of Riverside County described as follows: The south 50 feet of the 5–acre tract located in the northwest one–fourth of Section 22 in Township 5 South, Range 7 East, San Bernardino Meridian, described as follows: Beginning 20 feet south and 427.5 feet west of the northeast corner of the northwest one–fourth of Section 22 in Township 5 South, Range 7 East, San Bernardino Meridian; then west 412.5 feet; then south 528 feet; then east 412.5 feet; then north 528 feet to the point of beginning.

San Diego County: All that portion of San Diego County described as follows:

Jacumba Area: Sections 4, 5, 7, 8, and 9, in Township 18 South, Range 8 East, San Bernardino Meridian.

- (c) Articles and Commodities Covered. All soil, nursery stock, or plants with roots except as provided in subsection (d) (2) are declared to be hosts or possible carriers of the pest quarantined against.
 - (d) Restrictions.
- (1) Certification Requirements. Except for those exemptions provided in subsection (d) (2), articles and commodities covered are prohibited movement from the area under quarantine unless accompanied by a certificate issued by the agricultural commissioner. The certificate shall be issued when (a) articles and commodities originate on premises free from ozonium root rot; or (b) articles and commodities originate from outside the area under quarantine and were safeguarded against infection by ozonium root rot while within the area under quarantine; or (c) articles and commodities were protected from infection by ozonium root rot and proper safeguard actions had been completed to the satisfaction of the commissioner.
- (2) Exceptions. No restrictions are placed by this regulation upon the movement of the following articles and commodities from the area under quarantine to points outside thereof:
 - (A) House plants grown in the home and not for sale.
- (B) Smooth root vegetables such as potatoes, sweet potatoes, carrots, onions, turnips, and beets if not for planting and free from moist clods of soil, except that this exemption does not apply to mangels and sugar beets
- (C) Sugar beets for processing, provided the beets are screened prior to or while loading to remove moist clods of soil.
 - (D) Cactus plants with roots, provided the roots are dry and free of soil.
- (E) Aquatic plants such as water hyacinth and water lilies; dry resurrection plants; orchid plants growing in osmunda fibre; and air—layered rooted cuttings, if free from soil.

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–2–71; effective thirtieth day thereafter (Register 71, No. 27).
- Amendment of subsection (d) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3402. Hawthorn—Juniper Rust Interior Quarantine (Quarantine Regulation 3).

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14). For prior history, see Register 77, No. 31.
- 2. Repealer filed 7-20-94; operative 8-19-94 (Register 94, No. 29).
- 3. Editorial correction of HISTORY (Register 94, No. 29).

§ 3403. Branched Broomrape Interior Quarantine (Quarantine Regulation 4).

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–31–72; effective thirtieth day thereafter (Register 72, No. 6). For prior history, see Register 65, No. 23.
- 2. Amendment of subsection (d) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Amendment filed 7–3–78 as an emergency; effective upon filing (Register 78, No. 27).
- 4. Certificate of Compliance filed 9–12–78 (Register 78, No. 37).
- 5. Editorial correction adding NOTE filed 6-3-83; effective thirtieth day thereafter (Register 83, No. 23).
- 6. Repealer filed 9-26-96; operative 10-26-96 (Register 96, No. 39).

§ 3404. Comstock Mealybug Interior Quarantine (Quarantine Regulation 5).

NOTE: Authority cited: Sections 407, 5301, 5302, and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302, and 5322, Food and Agricultural Code. HISTORY

- 1. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14). For prior history, see Register 74, No. 20.
- 2. Repealer filed 7-20-94; operative 8-19-94 (Register 94, No. 29).
- 3. Editorial correction of HISTORY (Register 94, No. 29).

§ 3405. Dutch Elm Disease Interior Quarantine (Quarantine Regulation 6).

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code; and Section 4799.10, Public Resources Code.

HISTORY

- 1. Amendment of subsections (b) and (d) filed 10–20–77, as an emergency; designated effective 10–21–77 (Register 77, No. 43). For prior history, see Register 77, No. 32.
- 2. Certificate of Compliance as to 8–2–77 filing filed 11–29–77 (Register 77, No. 49)
- 3. Amendment of subsection (d) filed 12–6–77 as an emergency; effective upon filing (Register 77, No. 50).
- 4. Certificate of Compliance as to 10–20–77 filing filed 2–7–78. Printed in Register 78, No. 13 for technical reasons.
- 5. Certificate of Compliance as to 12–6–77 filing filed 2–7–78. Printed in Register 78, No. 13 for technical reasons.
- Amendment of subsection (b)(4) and repealer of subsection (d)(4)(c) filed 9-12-78 as an emergency; effective upon filing (Register 78, No. 37).
- 7. Certificate of Compliance as to filing of 9–12–78 filed 11–17–78 (Register 78, No. 46).
- 8. Amendment of subsection (b) filed 5-25-79; effective thirtieth day thereafter (Register 79, No. 21).
- 9. New subsection (d)(4)(C) filed 6-25-79 as an emergency; effective upon filing (Register 79, No. 26).
- Certificate of Compliance filed 9–28–79 (Register 79, No. 39).
- 11. Amendment filed 2–15–80; effective thirtieth day thereafter (Register 80, No. 7).
- 12. Amendment of subsection (b) filed 7–21–82 as an emergency; effective upon filing (Register 82, No. 30). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11–18–82.
- 13. Certificate of Compliance as to 7–21–82 order filed 11–5–82 (Register 82, No. 45).
- 14. Amendment of subsection (b) filed 10–26–90 as an emergency; operative 10–26–90 (Register 90, No. 48). A Certificate of Compliance must be transmitted to OAL by 2–25–91 or emergency language will be repealed by operation of law on the following day.
- Reinstatement of section as it existed prior to emergency amendment filed 10-26-90 by operation of Government Code section 11346.1(f) (Register 91, No. 47).
- 16. Repealer filed 2-10-94; operative 3-14-94 (Register 94, No. 6).

§ 3406. Mediterranean Fruit Fly Interior Quarantine (Quarantine Regulation 7).

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Mediterranean fruit fly (*Ceratitis capitata*) of the family Tephritidae is a notorious pest of most fleshy fruit and many vegetables. The adult has banded wings and is smaller than a house fly.
- (b) Quarantine Area. The area under quarantine for Mediterranean fruit fly in California is:

Page 313

(1) In the Dixon area of Solano County: Beginning at the intersection of Boyce Road and Putah Creek Road; then, northeasterly, southeasterly and northeasterly along Putah Creek Road to its intersection with Stevenson Bridge Road; then, northeasterly and northwesterly along Stevenson Bridge Road to its intersection with Putah Creek; then, southeasterly, easterly, southeasterly, easterly and southeasterly along Putah Creek to its intersection with the South Fork of Putah Creek; then, southeasterly and easterly along the South Fork of Putah Creek to its intersection with Old Davis Road; then, southerly, westerly and southerly along Old Davis Road to its intersection with Tremont Road; then, easterly along Tremont Road to its intersection with Bulkley Road; then, southerly along Bulkley Road to its intersection with Midway Road; then, westerly along Midway Road to its intersection with Sikes Road; then, southerly along Sikes Road to its intersection with Swan Road; then, westerly along Swan Road to its intersection with Bunker Station Road; then, southerly along Bunker Station Road to its intersection with Binghamton Road; then, westerly along Binghamton Road to its intersection with State Highway 113; then, northerly along State Highway 113 to its intersection with Hawkins Road; then, westerly along Hawkins Road to its intersection with Lewis Road; then, northerly along Lewis Road to its intersection with Weber Road; then, westerly and northwesterly along Weber Road to its intersection with N Meridian Road; then, northwesterly and northerly along N Meridian Road to its intersection with Sweeny Road; then, westerly along Sweeny Road to its intersection with Halley Road; then, northerly, southwesterly and northwesterly along Halley Road to its intersection with Wolfskill Road; then, southwesterly along Wolfskill Road to its intersection with Boyce Road; then northwesterly along Boyce Road to the point of beginning.

(2) In the San Jose area of Santa Clara County: Beginning at the intersection of US Interstate 880 and Montague Expressway; then, northeasterly and easterly along Montague Expressway to its intersection with Trade Zone Boulevard; then, southeasterly and northeasterly along Trade Zone Boulevard to its intersection with Cropley Avenue; then, northeasterly along Cropley Avenue to its intersection with Old Piedmont Road; then, northwesterly along Old Piedmont Road to its intersection with Berryessa Creek; then, northeasterly, easterly, southeasterly, northeasterly, southeasterly, northeasterly, easterly and northeasterly along Berryessa Creek to its bifurcation with Berryessa Creek Branch; then, southeasterly along an imaginary line to its intersection with the intersection of Sierra Road and the boundary line of the City of San Jose; then, northerly, northeasterly, southeasterly, easterly, southwesterly, southeasterly, northeasterly, southeasterly, southwesterly and southeasterly along the boundary line of the City of San Jose to its intersection with Alum Rock Falls Road; then, southeasterly, northeasterly, southeasterly, southerly, southwesterly, southeasterly, northeasterly, southeasterly, northeasterly, easterly, southeasterly, southwesterly, northwesterly, southwesterly, southerly, southwesterly, northwesterly, southwesterly, southeasterly, easterly, southwesterly, northwesterly, westerly, southeasterly, northwesterly, westerly and southwesterly along Alum Rock Falls Road to its intersection with State Highway 130; then, southeasterly, southerly, southerly, easterly, southerly, southeasterly, easterly, southeasterly, southeasterly, southerly, easterly, southeasterly, easterly, southeasterly, southwesterly, easterly, southeasterly, northeasterly and southeasterly along State Highway 130 to its intersection with Ouimby Road; then, southwesterly, northwesterly, southwesterly, northwesterly, southwesterly and southerly along Quimby Road to its intersection with Buckeye Ranch; then, southeasterly and southwesterly along Buckeye Ranch to its southwestern most point; then, southwesterly along an imaginary line to its intersection with the northeastern most point of Fowler Road; then, southwesterly, southeasterly, easterly, southeasterly, northwesterly, southwesterly, southerly, southeasterly, southerly, westerly, northwesterly and westerly along Fowler Road to its intersection with Yerba Buena Road; then, southeasterly, southwesterly, westerly, northwesterly and southwesterly along Yerba Buena Road to its intersection with San Felipe Road; then, southeasterly, southerly and southeasterly along San Felipe Road to its intersection with Farnsworth Drive; then, southwesterly, northwesterly and southwesterly along Farnsworth Drive to its intersection with Silver Creek Valley Road; then, southeasterly, southwesterly, southeasterly, southwesterly, southeasterly, southwesterly and westerly along Silver Creek Valley Road to its intersection with Blossom Hill Road; then, westerly and southwesterly along Blossom Hill Road to its intersection with State Highway 82; then, northwesterly along State Highway 82 to its intersection with Southside Drive; then, southeasterly along an imaginary line to the northeastern most point of Hillsdale Drive; then, southwesterly along Hillsdale Drive to its intersection with Hillsdale Avenue; then, northwesterly, southwesterly, westerly, northwesterly and southwesterly along Hillsdale Avenue to its intersection with State Highway 87; then, northwesterly along State Highway 87 to its intersection with US Interstate 880; then, northeasterly and northerly along US Interstate 880 to the point of beginning.

(3) In the Rolling Hills area of Los Angeles County: Beginning at the intersection of 1st Street and 2nd Street; then, northeasterly and easterly along 2nd Street to its intersection with N Dianthus Street; then, northerly along N Dianthus Street to its intersection with 8th Street; then, easterly along 8th Street to its intersection with Aviation Boulevard; then, northerly along Aviation Boulevard to its intersection with Manhattan Beach Boulevard; then, easterly along Manhattan Beach Boulevard to its intersection with Inglewood Avenue; then, southerly along Inglewood Avenue to its intersection with W 162nd Street; then, easterly along W 162nd Street to its eastern most point; then, southeasterly along an imaginary line to the western most point of W 163rd Street; then, easterly along W 163rd Street to its intersection with Prairie Avenue; then, southerly along Prairie Avenue to its intersection with W Redondo Beach Boulevard; then, northeasterly along W Redondo Beach Boulevard to its intersection with Yukon Avenue; then, southerly along Yukon Avenue to its intersection with W 170th Street; then, easterly along W 170th Street to its intersection with Crenshaw Boulevard; then, southerly along Crenshaw Boulevard to its intersection with State Highway 91; then, easterly along State Highway 91 to its intersection with Van Ness Avenue; then, southerly along Van Ness Avenue to its intersection with W 180th Place; then, easterly along W 180th Place to its intersection with Gramercy Place; then, southeasterly and southerly along Gramercy Place to its intersection with 182nd Street; then, easterly along 182nd Street to its intersection with Western Avenue; then, southerly along Western Avenue to its intersection with W 190th Street; then easterly and northeasterly along W 190th Street to its intersection with W Victoria Street; then, northeasterly along W Victoria Street to its intersection with E Victoria Street; then, northeasterly and easterly along E Victoria Street to its intersection with Avalon Boulevard; then, southerly along Avalon Boulevard to its intersection with E University Drive; then, easterly along E University Drive to its intersection with Central Avenue; then, southerly along Central Avenue to its intersection with E Del Amo Boulevard; then, easterly along E Del Amo Boulevard to its intersection with S Alameda Street; then, southwesterly along S Alameda Street to its intersection with US Interstate 405; then, easterly along US Interstate 405 to its intersection with Santa Fe Avenue; then, southerly along Santa Fe Avenue to its intersection with W 9th Street; then, northwesterly along W 9th Street to its intersection with Edison Avenue; then, southerly, southeasterly, southwesterly and southeasterly along Edison Avenue to its southeastern most point; then, southwesterly along an imaginary line to its intersection with the northeastern most point of Carrack Avenue; then, southwesterly along an imaginary line to its intersection with W Ocean Boulevard and the eastern shoreline of Terminal Island; then, southeasterly, southwesterly, southeasterly and southerly along the shoreline of Terminal Island to its southeastern most point; then, southerly along an imaginary line to its intersection with the southeastern most point of Nimitz Road; then, southwesterly and northwesterly along Nimitz Road to its intersection with Reeves Avenue; then, southwesterly along Reeves Avenue to its intersection with Terminal Way; then, due south along an imaginary line to its intersection with the shoreline of Terminal Island; then, southwesterly, southeasterly, southeasterly, northeasterly, south-

Mango

- *Except commercial smooth lemon that have been cleaned and waxed.
- (2) Soil within the drip area of plants producing, or which have produced fruit, vegetables or berries as listed in (c)(1) above.

Grape

- (d) Restriction on Movement, Possession and Sale of Commodities Covered.
- (1) Movement of Commodities Covered; Commercial Production and Wholesale Distribution. It is unlawful to move within or from the quarantine area any commodity covered involving a commercial shipment at the production or wholesale level except in accordance with the following provisions:
- (A) The commodity was produced inside or outside the quarantine area, has been commercially processed and packaged, or after commercial processing is being transported in bulk in a manner approved by the Director specifying conditions precluding infestation;
- (B) The commodity was produced inside the quarantine area, is in unprocessed form and is moved under permit of the Director specifying conditions precluding infestation;
- (C) The commodity was produced outside the quarantine area, is in unprocessed form and is being transported:
- 1. through the area by direct route and without delay in closed vehicles or containers:
- 2. to a commercial processing plant inside or outside the quarantine area; or
- 3. under permit of the Director specifying conditions precluding infes-
- (2) Movement of Commodities Covered from Commercial Sources; Retail Level. Retail size purchases of commodities covered obtained from commercial retail sources may be moved into, within or from the quarantine area, if the person in possession has a sales slip or other comparable document showing the purchase was made from a commercial retail establishment. Other transportation of such commodities is prohibited.
- (3) Movement of Commodities Covered; Not from Commercial Sources.
- (A) Within the quarantine area, no commodity covered, including "backyard" production, shall be moved from the premises where grown without a permit from the Director;
- (B) Commodities covered not obtained from commercial sources may be transported into the quarantine area only if the person in possession

has a signed statement showing the commodity, amount, place of origin, destination and date of transportation.

- (4) Restrictions on Wholesale and Retail Sales. Within the quarantine area, no wholesale or retail establishment shall handle, sell or offer for sale any commodity covered unless such commodities at all times are maintained in such a way or manner as to preclude pest exposure as determined by the Director. No commodity covered shall be held for sale or sold from a truck, trailer or other mobile vehicle.
- (5) No person shall transport, possess, handle or sell any commodity covered in violation of the provisions of this section. No person shall knowingly prepare, possess, or use any false document, or knowingly make any false statement to any enforcement officer, in connection with the possession, sale or transportation of any commodity covered.

HISTORY

- 1. Amendment of subsection (b) filed 10–16–91 as an emergency; operative 10–16–91 (Register 92, No. 5). A Certificate of Compliance must be transmitted to OAL 2–13–92 or emergency language will be repealed by operation of law on the following day. For prior history, see Register 91, No. 24.
- 2. Certificate of Compliance as to 10–16–91 order transmitted to OAL 2–5–92 and filed 3–12–92 (Register 92, No. 13).
- 3. New subsection (b)(2) filed 8-4-92 as an emergency; operative 8-4-92 (Register 92, No. 32). A Certificate of Compliance must be transmitted to OAL 12-2-92 or emergency language will be repealed by operation of law on the following day.
- 4. New subsection (b)(1)(B) filed 9-17-92 as an emergency; operative 9-17-92 (Register 92, No. 38). A Certificate of Compliance must be transmitted to OAL 1-15-93 or emergency language will be repealed by operation of law on the following day.
- 5. Amendment of subsection (b)(1)(B) filed 10–2–92 as an emergency; operative 10–2–92 (Register 92, No. 40). A Certificate of Compliance must be transmitted to OAL 2–1–93 or emergency language will be repealed by operation of law on the following day.
- 6. Repealer of text in subsection (b)(1)(A) and deletion of subsection (B) designator, and amendment of new subsection (b)(1)(A) filed 10-8-92 as an emergency; operative 10-8-92 (Register 92, No. 41). A Certificate of Compliance must be transmitted to OAL 2-5-93 or emergency language will be repealed by operation of law on the following day.
- 7. New subsection (b)(1)(B) filed 11–24–92 as an emergency; operative 11–24–92 (Register 92, No. 48). A Certificate of Compliance must be transmitted to OAL 3–24–92 or emergency language will be repealed by operation of law on the following day.
- 8. Amendment of subsection (b)(1)(A) filed 12–2–92 as an emergency; operative 12–2–92 (Register 92, No. 49). A Certificate of Compliance must be transmitted to OAL 4–5–93 or emergency language will be repealed by operation of law on the following day.
- New subsection (b)(3)(A) filed 12–15–92 as an emergency; operative 12–15–92 (Register 92, No. 51). A Certificate of Compliance must be transmitted to OAL 4–14–93 or emergency language will be repealed by operation of law on the following day.
- 10. Amendment of subsections (b)(1)–(b)(1)(A) and repeal of subsection (b)(1)(B) filed 12–17–92 as an emergency; operative 12–17–92 (Register 92, No. 51). A Certificate of Compliance must be transmitted to OAL by 4–16–93 or emergency language will be repealed by operation of law on the following day.
- 11. Certificate of Compliance as to 8–4–92 order including amendment of subsection (b)(2)(A) transmitted to OAL 12–2–92 and filed 1–7–93 (Register 93, No. 2).
- 12. Editorial correction of printing error in subsection (b)(2)(A) (Register 93, No. 2).
- 13. Certificate of Compliance as to 9-17-92 order transmitted to OAL 1-7-93 and filed 2-4-93 (Register 93, No. 6).
- 14. Editorial correction amending HISTORY 13 (Register 93, No. 9).
- 15. Certificate of Compliance as to 10–2–92 order transmitted to OAL 1–12–93 and filed 2–22–93 (Register 93, No. 9).
- 16. Certificate of Compliance as to 10-8-92 order transmitted to OAL 1-28-93 and filed 2-23-93 (Register 93, No. 9).
- 17. Certificate of Compliance as to 11–24–92 order transmitted to OAL 3–9–93 and filed 4–2–93 (Register 93, No. 14).
- 18. Certificate of Compliance as to 12-2-92 order transmitted to OAL 4-4-93 and filed 4-7-93 (Register 93, No. 15).
- 19. Editorial correction amending HISTORY 15, 16 and 17 (Register 93, No. 15).
- Certificate of Compliance as to 12–17–92 order transmitted to OAL 3–23–93 and filed 4–23–93 (Register 93, No. 17).
- 21. Certificate of Compliance as to 12-15-92 order transmitted to OAL 3-17-93 and filed 4-28-93 (Register 93, No. 18).

- 22. Editorial correction of printing errors deleting subsection (b)(1)(B) and correcting HISTORY 10, 17, 20 and 21 (Register 93, No. 31).
- 23. New subsection (b)(1)(B) filed 7-26-93 as an emergency; operative 7-26-93 (Register 93, No. 31). A Certificate of Compliance must be transmitted to OAL by 11-23-93 or emergency language will be repealed by operation of law on the following day.
- 24. New subsection (b)(1)(C) filed 8-12-93 as an emergency; operative 8-12-93 (Register 93, No. 33). A Certificate of Compliance must be transmitted to OAL by 12-10-93 or emergency language will be repealed by operation of law on the following day.
- 25. New subsection (b)(4) filed 8-23-93 as an emergency; operative 8-23-93 (Register 93, No. 35). A Certificate of Compliance must be transmitted to OAL by 12-21-93 or emergency language will be repealed by operation of law on the following day.
- 26. Amendment of subsection (b)(1)(A) filed 8–27–93 as an emergency; operative 8–27–93 (Register 93, No. 35). Certificate of Compliance must be transmitted to OAL by 12–26–93 or emergency language will be repealed by operation of law on the following day.
- 27. Amendment of subsection (b)(1)(C) filed 9–13–93 as an emergency; operative 9–13–93 (Register 93, No. 38). A Certificate of Compliance must be transmitted to OAL by 1–11–94 or emergency language will be repealed by operation of law on the following day.
- 28. Amendment of subsection (b)(1)(B) filed 9-15-93 as an emergency; operative 9-15-93 (Register 93, No. 38). A Certificate of Compliance must be transmitted to OAL by 1-13-94 or emergency language will be repealed by operation of law on the following day.
- 29. Amendment of subsection (b)(1)(A) filed 9–30–93 as an emergency; operative 9–30–93 (Register 93, No. 40). A Certificate of Compliance must be transmitted to OAL by 1–28–94 or emergency language will be repealed by operation of law on the following day.
- 30. Amendment of subsection (b)(4) filed 10–5–93 as an emergency; operative 10–5–93 (Register 93, No. 41). A Certificate of Compliance must be transmitted to OAL by 2–2–94 or emergency language will be repealed by operation of law on the following day.
- 31. Amendment of subsection (b)(1)(A) and repealer of subsections (b)(2)–(3) filed 10–20–93 as an emergency; operative 10–20–93 (Register 93, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–17–94 or emergency language will be repealed by operation of law on the following day.
- 32. Amendment of subsection (b)(1)(A) filed 10–25–93 as an emergency; operative 10–25–93 (Register 93, No. 44). A Certificate of Compliance must be transmitted to OAL by 2–22–94 or emergency language will be repealed by operation of law on the following day.
- 33. Amendment of subsection (b)(4) filed 11–8–93 as an emergency; operative 11–8–93 (Register 93, No. 46). A Certificate of Compliance must be transmitted to OAL by 4–25–94 or emergency language will be repealed by operation of law on the following day.
- 34. Amendment of subsection (b)(1)(C) filed 11-8-93 as an emergency; operative 11-8-93 (Register 93, No. 46). A Certificate of Compliance must be transmitted to OAL by 4-25-94 or emergency language will be repealed by operation of law on the following day.
- 35. Certificate of Compliance as to 7–26–93 order transmitted to OAL 11–12–93 and filed 12–9–93 (Register 93, No. 50).
- 36. Amendment of subsection (b)(1)(A) filed 12–10–93 as an emergency; operative 12–10–93 (Register 93, No. 50). A Certificate of Compliance must be transmitted to OAL by 4–11–94 or emergency language will be repealed by operation of law on the following day.
- 37. Certificate of Compliance as to 8–10–93 order transmitted to OAL 11–3–93 and filed 12–20–93 (Register 93, No. 52).
- 38. Certificate of Compliance as to 8–23–93 order transmitted to OAL 12–16–93 and filed 12–22–93 (Register 93, No. 52).
- 39. Amendment of subsection (b)(1)(A) filed 12–24–93 as an emergency; operative 12–24–93 (Register 93, No. 52). A Certificate of Compliance must be transmitted to OAL by 4–22–94 or emergency language will be repealed by operation of law on the following day.
- 40. New subsection (b)(2) filed 1-3-94 as an emergency; operative 1-3-94 (Register 94, No. 1). A Certificate of Compliance must be transmitted to OAL by 5-3-94 or emergency language will be repealed by operation of law on the following day.
- 41. Certificate of Compliance as to 9–15–93 order transmitted to OAL 1–6–94 and filed 1–25–94 (Register 94, No. 4).
- 42. Certificate of Compliance as to 8-27-93 order transmitted to OAL 12-17-93 and filed 1-28-94 (Register 94, No. 4).
- 43. Amendment of subsection (b)(1)(A) and repealer of subsections (b)(1)(B)–(C) and (b)(4) filed 2–4–94 as an emergency; operative 2–4–94 (Register 94, No. 5). A Certificate of Compliance must be transmitted to OAL by 6–6–94 or emergency language will be repealed by operation of law on the following day.
- 44. Certificate of Compliance as to 9–13–93 order transmitted to OAL 1–6–94 and filed 2–16–94 (Register 94, No. 7).
- 45. Certificate of Compliance as to 10-20-93 order transmitted to OAL 2-3-94 and filed 2-22-94 (Register 94, No. 8).
- 46. Certificate of Compliance as to 9-30-93 order transmitted to OAL 1-19-94 and filed 2-28-94 (Register 94, No. 9).

- 47. Certificate of Compliance as to 10–5–93 order transmitted to OAL 2–3–94 and filed 2–28–94 (Register 94, No. 9).
- 48. Certificate of Compliance as to 11–8–93 order transmitted to OAL 2–25–94 and filed 3–14–94 (Register 94, No. 11).
- 49. Certificate of Compliance as to 10-25-93 order transmitted to OAL 2-3-94 and filed 3-18-94 (Register 94, No. 11).
- 50. Editorial correction of HISTORY 45 (Register 94, No. 11).
- 51. Certificate of Compliance as to 11–8–94 order transmitted to OAL 2–25–94 and filed 3–31–94 (Register 94, No. 13).
- 52. Editorial correction restoring amendments to (b)(1)(A) and deleting (b)(1)(C) and (b)(4) (Register 94, No. 14).
- 53. Certificate of Compliance as to 12–10–93 order transmitted to OAL 4–1–94 and filed 5–3–94 (Register 94, No. 18).
- 54. Certificate of Compliance as to 1-3-94 order transmitted to OAL 4-18-94 and filed 5-4-94 (Register 94, No. 18).
- 55. Certificate of Compliance as to 12–24–93 order transmitted to OAL 4–1–94 and filed 5–11–94 (Register 94, No. 19).
- 56. Certificate of Compliance as to 2–4–94 order transmitted to OAL 5–17–94 and filed 6–8–94 (Register 94, No. 23).
- 57. Repealer of subsection (b)(2) filed 7–8–94 as an emergency; operative 7–8–94 (Register 94, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–7–94 or emergency language will be repealed by operation of law on the following day.
- 58. Amendment of subsection (b)(1)(A) filed 7–28–94 as an emergency; operative 7–28–94 (Register 94, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–28–94 or emergency language will be repealed by operation of law on the following day.
- 59. Editorial correction of printing error in subsection (b)(1)(A) (Register 94, No. 30).
- 60. New subsection (b)(2) filed 10–6–94 as an emergency; operative 10–6–94 (Register 94, No. 40). A Certificate of Compliance must be transmitted to OAL by 2–3–95 or emergency language will be repealed by operation of law on the following day.
- 61. Certificate of Compliance as to 7-8-94 order transmitted to OAL 11-2-94 and filed 11-28-94 (Register 94, No. 48).
- 62. Certificate of Compliance as to 7–28–94 order transmitted to OAL 11–22–94 and filed 1–3–95 (Register 95, No. 1).
- 63. Certificate of Compliance as to 10–6–94 order transmitted to OAL 1–30–95 and filed 2–22–95 (Register 95, No. 8).
- 64. Repealer of subsection (b)(2) filed 8-3-95 as an emergency; operative 8-3-95 (Register 95, No. 31). A Certificate of Compliance must be transmitted to OAL by 12-1-95 or emergency language will be repealed by operation of law on the following
- 65. Certificate of Compliance as to 8–3–95 order transmitted to OAL 11–28–95 and filed 1–4–96 (Register 96, No. 1).
- 66. Repealer of subsections (b)(1) and (b)(1)(A) filed 6–18–96 as an emergency; operative 6–18–96 (Register 96, No. 25). A Certificate of Compliance must be transmitted to OAL by 10–16–96 or emergency language will be repealed by operation of law on the following day.
- 67. Certificate of Compliance as to 6–18–96 order transmitted to OAL 9–13–96 and filed 10–24–96 (Register 96, No. 43).
- 68. New subsection (b)(1) filed 10–1–97 as an emergency; operative 10–1–97 (Register 97, No. 40). A Certificate of Compliance must be transmitted to OAL by 1–29–98 or emergency language will be repealed by operation of law on the following day.
- 69. Certificate of Compliance as to 10-1-97 order transmitted to OAL 1-15-98 and filed 1-26-98 (Register 98, No. 5).
- 70. Repealer of subsection (b)(1) filed 4–22–98 as an emergency; operative 4–22–98 (Register 98, No. 17). A Certificate of Compliance must be transmitted to OAL by 8–20–98 or emergency action will be repealed by operation of law on the following day.
- 71. New subsection (b)(1) filed 8–7–98 as an emergency; operative 8–7–98 (Register 98, No. 32). A Certificate of Compliance must be transmitted to OAL by 12–7–98 or emergency language will be repealed by operation of law on the following day.
- 72. New subsection (b)(2) filed 8–7–98 as an emergency; operative 8–7–98 (Register 98, No. 32). A Certificate of Compliance must be transmitted to OAL by 12–7–98 or emergency language will be repealed by operation of law on the following day.
- 73. Certificate of Compliance as to 4-22-98 order transmitted to OAL 7-28-98 and filed 9-9-98 (Register 98, No. 37).
- 74. New subsection (b)(3) filed 11–10–98 as an emergency; operative 11–10–98 (Register 98, No. 46). A Certificate of Compliance must be transmitted to OAL by 3–10–99 or emergency language will be repealed by operation of law on the following day.
- 75. Certificate of Compliance as to 8–7–98 order transmitted to OAL 11–24–98 and filed 12–2–98 (Register 98, No. 49).
- 76. Certificate of Compliance as to 8–7–98 order transmitted to OAL 11–24–98 and filed 1–11–99 (Register 99, No. 3).

- 77. Certificate of Compliance as to 11–10–98 order transmitted to OAL 3–4–99 and filed 3–25–99 (Register 99, No. 13).
- 78. Repealer of subsection (b)(1) and subsection renumbering filed 6–9–99 as an emergency; operative 6–9–99 (Register 99, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–7–99 or emergency language will be repealed by operation of law on the following day.
- 79. Repealer of subsection (b)(2) filed 8-17-99 as an emergency; operative 8-17-99 (Register 99, No. 34). A Certificate of Compliance must be transmitted to OAL by 12-15-99 or emergency language will be repealed by operation of law on the following day.
- 80. Repealer of subsection (b)(1) filed 8–31–99 as an emergency; operative 8–31–99 (Register 99, No. 36). A Certificate of Compliance must be transmitted to OAL by 12–29–99 or emergency language will be repealed by operation of law on the following day.
- 81. Certificate of Compliance as to 6–9–99 order transmitted to OAL 9–30–99 and filed 11–15–99 (Register 99, No. 47).
- 82. Certificate of Compliance as to 8–17–99 order transmitted to OAL 12–15–99 and filed 1–18–2000 (Register 2000, No. 3).
- 83. Certificate of Compliance as to 8–31–99 order transmitted to OAL 12–24–99 and filed 1–19–2000 (Register 2000, No. 3).
- 84. New subsection (b)(1) filed 9–7–2001 as an emergency; operative 9–7–2001 (Register 2001, No. 36). A Certificate of Compliance must be transmitted to OAL by 1–7–2002 or emergency language will be repealed by operation of law on the following day.
- 85. Certificate of Compliance as to 9–7–2001 order transmitted to OAL 1–7–2002 and filed 1–14–2002 (Register 2002, No. 3).
- 86. Repealer of subsection (b)(1) filed 6–10–2002 as an emergency; operative 6–10–2002 (Register 2002, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–8–2002 or emergency language will be repealed by operation of law on the following day.
- 87. Certificate of Compliance as 6–10–2002 order transmitted to OAL 9–27–2002 and filed 10–28–2002 (Register 2002, No. 44).
- 88. New subsection (b)(1) filed 10-7-2005 as an emergency; operative 10-7-2005 (Register 2005, No. 40). A Certificate of Compliance must be transmitted to OAL by 2-6-2006 or emergency language will be repealed by operation of law on the following day.
- 89. A mendment of subsection (b)(1) filed 10–17–2005 as an emergency; operative 10–17–2005 (Register 2005, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2006 or emergency language will be repealed by operation of law on the following day.
- 90. New subsection (b)(2) filed 10–19–2005 as an emergency; operative 10–19–2005 (Register 2005, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–16–2006 or emergency language will be repealed by operation of law on the following day.
- 91. Amendment of subsections (b)(1)–(2) filed 10–25–2005 as an emergency; operative 10–25–2005 (Register 2005, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–22–2006 or emergency language will be repealed by operation of law on the following day.
- 92. Amendment of subsection (b)(1) filed 11–23–2005 as an emergency; operative 11–23–2005 (Register 2005, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–23–2006 or emergency language will be repealed by operation of law on the following day.
- 93. Amendment of subsection (b)(1) filed 12–28–2005 as an emergency; operative 12–28–2005 (Register 2005, No. 52). A Certificate of Compliance must be transmitted to OAL by 4–27–2006 or emergency language will be repealed by operation of law on the following day.
- 94. Editorial correction of subsection (b)(2) (Register 2006, No. 8).
- 95. Certificate of Compliance as to 10-7-2005 order transmitted to OAL 1-9-2006 and filed 2-22-2006 (Register 2006, No. 8).
- 96. Certificate of Compliance as to 10–17–2005 order transmitted to OAL 1–17–2006 and filed 3–1–2006 (Register 2006, No. 9).
- 97. Certificate of Compliance as to 10-19-2005 order transmitted to OAL 2-15-2006 and filed 3-28-2006 (Register 2006, No. 13).
- 98. Certificate of Compliance as to 10–25–2005 order transmitted to OAL 2–15–2006 and filed 3–30–2006 (Register 2006, No. 13).
- 99. Editorial correction of HISTORY 98 (Register 2006, No. 15).
- 100. Certificate of Compliance as to 11-23-2005 order transmitted to OAL 3-2-2006 and filed 4-10-2006 (Register 2006, No. 15).
- 101. Certificate of Compliance as to 12–28–2005 order transmitted to OAL 3–20–2006 and filed 4–27–2006 (Register 2006, No. 17).
- 102. Repealer of subsection (b)(1), subsection renumbering and amendment of newly designated subsection (b)(1) filed 9–5–2006 as an emergency; operative 9–5–2006 (Register 2006, No. 36). A Certificate of Compliance must be transmitted to OAL by 1–3–2007 or emergency language will be repealed by operation of law on the following day.
- 103. Repealer and reservation of subsection (b)(1) filed 9–12–2006 as an emergency; operative 9–12–2006 (Register 2006, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–10–2007 or emergency language will be repealed by operation of law on the following day.
- 104. Certificate of Compliance as to 9–12–2006 order transmitted to OAL 12–6–2006 and filed 1–5–2007 (Register 2007, No. 1).

- 105. New subsection (b)(1) filed 9-17-2007 as an emergency; operative 9-17-2007 (Register 2007, No. 38). A Certificate of Compliance must be transmitted to OAL by 3-17-2008 or emergency language will be repealed by operation of law on the following day.
- 106. New subsection (b)(2) filed 10-15-2007 as an emergency; operative 10-15-2007 (Register 2007, No. 42). A Certificate of Compliance must be transmitted to OAL by 4-14-2008 or emergency language will be repealed by operation of law on the following day.
- 107. New subsection (b)(3) filed 10–29–2007 as an emergency; operative 10–29–2007 (Register 2007, No. 44). A Certificate of Compliance must be transmitted to OAL by 4–28–2008 or emergency language will be repealed by operation of law on the following day.
- 108. Amendment of subsection (b)(3) filed 11–6–2007 as an emergency; operative 11–6–2007 (Register 2007, No. 45). A Certificate of Compliance must be transmitted to OAL by 5–5–2008 or emergency language will be repealed by operation of law on the following day.
- 109. Amendment of subsection (b)(3) filed 11–27–2007 as an emergency; operative 11–27–2007 (Register 2007, No. 48). A Certificate of Compliance must be transmitted to OAL by 5–27–2008 or emergency language will be repealed by operation of law on the following day.
- 110. Amendment of subsection (b)(3) filed 12–10–2007 as an emergency; operative 12–10–2007 (Register 2007, No. 50). A Certificate of Compliance must be transmitted to OAL by 6–9–2008 or emergency language will be repealed by operation of law on the following day.
- 111. Amendment of subsection (b)(3) filed 1–11–2008 as an emergency; operative 1–11–2008 (Register 2008, No. 2). A Certificate of Compliance must be transmitted to OAL by 7–9–2008 or emergency language will be repealed by operation of law on the following day.
- 112. Certificate of Compliance as to 9–17–2007 order transmitted to OAL 2–11–2008 and filed 3–12–2008 (Register 2008, No. 11).
- 113. Certificate of Compliance as to 10–15–2007 order transmitted to OAL 2–26–2008 and filed 3–17–2008 (Register 2008, No. 12).
- 114. Certificate of Compliance as to 10–29–2007, 11–6–2007, 11–27–2007 and 12–10–2007 orders, including further amendment of subsection (b)(3), transmitted to OAL 3–21–2008 and filed 5–5–2008 (Register 2008, No. 19).
- 115. Certificate of Compliance as to 1–11–2008 order transmitted to OAL 6–3–2008 and filed 7–16–2008 (Register 2008, No. 29).

§ 3407. Citrus Tristeza Virus Interior Quarantine.

A quarantine is established against the following pest, its hosts and possible carriers:

- (a) Pest. All strains of the citrus tristeza virus.
- (b) Quarantine Area. That portion of the State which is known to be generally infected with citrus tristeza virus and where no significant efforts to control or suppress the disease are conducted. The quarantine area is the counties of Orange and Ventura, and portions of Los Angeles, Riverside, San Bernardino, San Diego and Santa Barbara counties as follows:
- (1) Los Angeles County. That portion of Los Angeles County lying south of a line drawn as follows: Beginning at the point where the north boundary of Township 4 north intersects the west county boundary line; then east along the north boundary of Township 4 north to its intersection with State Highway 14; then southerly along a straight line drawn to Men-denhall Peak lookout; then southeasterly along a straight line drawn to the point where the north boundary of Township 2 north intersects the Big Tujunga Wash; then east along the north boundary of Township 2 north to the east county boundary line. (All township and range lines are S.B.B.M.)

- (2) Riverside County. That portion of Riverside County lying west of a line drawn as follows: Beginning at the point on the north Riverside County boundary line where the San Bernardino Meridian intersects said boundary line; then, continuing southerly along said meridian to the south Riverside County boundary line.
- (3) San Bernardino County. That portion of San Bernardino County lying west of a line drawn as follows: Beginning at the point where the north boundary of Township 2 North, SBM, intersects the west San Bernardino County boundary line; then east along the north boundary of Township 2 North to its point of intersection with the east boundary of Range 6 West; then southeasterly along an imaginary line to the crest of Mount San Bernardino; then southeasterly to the point on the south San Bernardino County boundary line where an imaginary line from the crest of Mount San Bernardino to the crest of Baldy Mountain (in Riverside County) intersects said boundary line.
- (4) San Diego County. That portion of San Diego County lying west of the east boundary of Range 2 East, SBM.
- (5) Santa Barbara County. That portion of Santa Barbara County lying south of a line drawn as follows: Beginning at the Point Arguello lighthouse; then easterly along an imaginary line to the summit of El Tranquillon Mountain; then southeasterly along an imaginary line to the point of intersection of Jalama Creek and Escondido Creek; then easterly along an imaginary line to the point of intersection of Gaviota Creek and the summit of the Santa Ynez Range; then easterly along the summit of the Santa Ynez Range to the east Santa Barbara County boundary line.
- (c) Suppressive Area. The suppressive area is that portion of the State in which the citrus tristeza virus has been detected, in which a pest control district has been established, and where an active control or suppression program is being conducted. The suppressive area is the county of Kern and portions of Fresno, Tulare, and Riverside Counties as follows:
- (1) Fresno County. That portion of Fresno County known as the Central Valley Pest Control District bounded by a line drawn as follows: Beginning at the intersection of the Kings River and the Fresno-Tulare County line; then, northerly and northeasterly along said river to the Pine Flat Reservoir; then, northeasterly along the southern edge of said reservoir to the South Fork of the Kings River; then, easterly along said river to its intersection with the western boundary of the Kings Canyon National Park; then, southeasterly and southerly along said boundary to its intersection with the Fresno-Tulare County line; then, westerly and southerly along said county line to the point of beginning.
- (2) Tulare County. That portion of Tulare County known as the Southern Tulare County Citrus Pest Control District bounded by a line drawn as follows: Beginning at the intersection of the Tulare–Kings County line and the northwest corner of Section 7, Township 21 South, Range 23 East; then, east along section lines to the northeast corner of Section 8, Township 21 South, Range 27 East; then, south one–half mile along the section line to its intersection with the south line of the north half of Section 9, Township 21 South, Range 27 East; then, east along said line to the northwest corner of the northeast quarter of the southeast quarter of

[The next page is 317.]

- Section 10 Township 21 South, Range 27 East; then, south along an imaginary line to the northwest corner of the southeast quarter of the southeast quarter of said Section 10; then, east along an imaginary line to the northeast corner of the southeast quarter of the southeast quarter of said Section 10; then, south along an imaginary line to the southwest corner of Section 11, Township 21 South, Range 27 East; then, east along the south line of Sections 11 and 12, Township 21 South, Range 27 East; then, east along the south line of Sections 7 and 8, Township 21 South, Range 28 East to the southeast corner of Section 8, Township 21 South, Range 28 East; then, north two miles along an imaginary line to the 5th Standard Parallel South; then, east along said parallel to the Tulare–Inyo County line; then, southerly along said county line to its intersection with the Tulare-Kern County line; then westerly along the Tulare-Kern County line to its intersection with the Tulare–Kings County line; then, northerly along the Tulare-Kings County line to the point of beginning (all locations are Mt. Diablo Base and Meridian).
- (3) Riverside County. That portion of Riverside County known as the Coachella Valley and bounded by a line drawn as follows: Beginning at the intersection of the northwest corner of T.2S., R.4E., S.B.B. & M. and the Riverside County Line; then, easterly along said county line to its intersection with the northeast corner of T.2S., R.12E., S.B.B. & M.; then, southerly from said intersection along range line 12E. to its intersection with the Riverside County Line; then, westerly along said county line to its intersection with the southwest corner of T.8S., R.4E., S.B.B. & M.; then, northerly from said intersection along range line 4E. to the point of beginning.
- (d) Regulated Area. The regulated area is that portion of the State in which the citrus tristeza virus may occur but which is not generally infected and where efforts to control or suppress the disease may be conducted. The regulated area is all areas of California not described as a quarantine or suppressive area.
- (e) Articles and Commodities Covered. All plants and propagative parts (except seed), including any subspecies, variety, or ornamental form, of the genera Citrus (true citrus), Fortunella (kumquat), Poncirus (trifoliate orange), Aeglopsis (dwarf powder-flask fruit), and Afraegle (African powder-flask fruit), Atalantia, Citropsis, Clausena, Clymenia, Eremocitrus, Hesperethusa, Merrillia, Microcitrus, Pleiospermium, Severinia, Swinglea, and of any hybrid having at least one ancestor of Citrus, Fortunella, or Poncirus, are declared to be hosts or possible carriers of the pest.
 - (f) Restrictions.
- (1) Conditions of Movement. Unless accompanied by a moving permit or under a cutting permit as hereinafter provided, articles and commodities covered shall not be transported or moved:
- (A) From the quarantine area except to another portion of the quarantine area or except when authorized under permit as provided in paragraphs (7) and (8).
- (B) From the regulated area except to another portion of the regulated area or to the quarantine area or under permit to the suppressive area as provided in paragraph (3).
- (C) From the suppressive area except to the quarantine area, to another portion of the suppressive area under permit as provided in paragraphs (3) and (5), or under permit to the regulated area as provided in paragraph (3).
- (2) Propagation of Articles and Commodities Covered in this Section. All buds, cuttings, and scions used in the propagation of trees described in subsection (e) shall be taken from source trees which have been tested to the satisfaction of the department and found free from tristeza. No buds, cuttings, or scions from untested or tristeza infected source trees may be used for propagation of articles and commodities covered in this section. Records shall be maintained of each source tree, the quantity of propagative material taken from each source tree, and the progeny trees in the nursery produced therefrom for five years after production. The records shall be made available for review by the county agricultural commissioner during normal business hours.

- (3) Moving Permits for Movement into, within, or from the Suppressive Area. The agricultural commissioner at origin may issue moving permits authorizing movement of articles and commodities covered into, within, or from the suppressive area provided that the articles and commodities have been tested for tristeza to the satisfaction of the department and no evidence of tristeza was found, or all buds, cuttings, scions or top—worked trees used in the production of the trees, or being moved as such are from source trees or trees in a nursery increase block which have been so tested.
- (4) Record of Tested Source Trees and Trees Produced From Nursery Increase Blocks. In order that trees produced from buds, cuttings, or scions taken from tristeza tested source trees or nursery increase blocks may later be moved under a moving permit in accordance with paragraph (3), the agricultural commissioner shall cause a record to be kept of each source tree; the kind and amount of buds, cuttings, or scions taken from each source tree; and the kind, number, and location in the nursery of the progeny trees produced therefrom for five years after production.
- (5) Cutting Permit Required for Taking or Moving Budwood Within the Suppressive Area. No buds, cuttings, or scions of host trees described in subsection (e) shall be cut or otherwise taken from such trees within the suppressive area or moved within or from any such area for propagation, unless a cutting permit has been secured from the agricultural commissioner prior to cutting or taking or moving same. Cutting permits may be issued within the suppressive area provided the source tree has been tested for tristeza to the satisfaction of the department and no evidence of tristeza was found. Such a cutting permit shall set forth the amount and kind of buds, cuttings, and scions in the shipment accompanied thereby and the name and address of the consignee.
- (6) The issuance of cutting and moving permits under the terms of this regulation also applies to nursery increase blocks. Nursery increase block means a planting of citrus nursery stock propagated using budwood and/or scionwood from trees which have been tested for tristeza to the satisfaction of the department. Top—worked trees may qualify as nursery increase blocks provided that they are tested to the satisfaction of the department and found free of tristeza. The county agricultural commissioner at origin may approve such nursery or top—worked trees, which do not exceed 18 months from time of budding, to be used as a supplementary source of buds, cuttings or scions. The agricultural commissioner shall cause a record to be kept as provided in paragraph (4).
- (7) Permits Involving Movement into or through the Regulated Area for Fumigation. The agricultural commissioner may issue permits authorizing the movement of articles and commodities covered from the quarantine area into or through the regulated area for fumigation and prompt return to the quarantine area. The articles and commodities shall be treated for tristeza vector elimination immediately prior to such movement in a manner approved by the department and shall be moved in wrapped bales, bundles, or closed containers in a closed conveyance. Such permits shall be valid for only the time specified in the permit and shall not authorize the articles and commodities to remain outside the quarantine area longer than 48 hours.
- (8) Movement in Transit through the Quarantine Area. Articles and commodities covered originating outside of the quarantine area may be moved through such area without delay or diversion in wrapped bales, bundles, or closed containers, or in a closed conveyance into which no other articles and commodities covered are placed while within the quarantine area.

HISTORY

- 1. New subsection (b)(3) filed 12–14–83 as an emergency; effective upon filing (Register 83, No. 53). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–13–84. For prior history, see Register 82, No. 22.
- 2. Amendment of subsection (b) filed 2-17-84; effective thirtieth day thereafter (Register 84, No. 7).
- 3. Certificate of Compliance as to 12–14–83 order transmitted to OAL 3–20–84 and filed 4–17–84 (Register 84, No. 16).
- Amendment of subsection (b) filed 7-3-84; effective thirtieth day thereafter (Register 84, No. 27).
- 5. Amendment of subsection (b) filed 4–2–85; as an emergency; effective upon filing (Register 85, No. 15). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 7–31–85.
- Certificate of Compliance including amendment transmitted to OAL 7–19–85 and filed 8–19–85 (Register 85, No. 34).
- 7. Repealer filed 7-15-98; operative 8-14-98 (Register 98, No. 29).

§ 3409. Pink Bollworm Interior Quarantine (Quarantine Regulation 10).

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Pink bollworm, *Pectinophora gossypiella*, a moth, family Gelechiidae, which in the laval stage feeds in cotton bolls.
 - (b) Area Under Quarantine. The entire State of California.
 - (1) Infested Areas.
- (A) Generally Infested Area. Inyo County and all that part of California south of and including Los Angeles and San Bernardino counties.
- (B) Lightly Infested Area. Fresno County, Kern County, Kings County, Madera County, Merced County, San Benito County, and Tulare County.
 - (c) Articles and Commodities Covered.
- (1) Okra (*Hibiscus esculentus*) and kenaf (*Hibiscus cannabinus*), all parts of the plants including seeds and pods.
- (2) Cotton and wild cotton of the genera Gossypium and Thurberia, including all parts of the plants.
 - (3) Seed cotton.
 - (4) Cotton lint.
 - (5) Cotton linters.
- (6) Cotton waste, all waste produced from the processing of cotton at gins, cottonseed oil mills or textile mills in any form or under any trade designation. (See also Gin Trash.)
- (7) Gin trash, all the material produced during the cleaning and ginning of seed cotton, bollies, or snapped cotton, except the cotton lint, cottonseed and cotton waste.
 - (8) Cottonseed.
 - (9) Cottonseed hulls.
- (10) Used bagging, used cotton-picker sacks, and other used containers and wrappers for any products from cotton plants.
- (11) Used cotton harvesting equipment, ginning and oil mill equipment, and other cotton processing machinery, and other farm equipment which has been used in connection with growing, harvesting, ginning, compressing, or processing raw cotton or raw cotton products.
- (12) Any other products or articles, of any character whatsoever, determined by an inspector to be infested with live pink bollworm or to present a hazard of the introduction and spread of pink bollworm.

- (d) Restrictions.
- (1) Cotton Plants and General Trash Prohibited. Cotton plants and parts thereof, such as packing or as contamination or in association with any other products, article or thing, and gin trash except for harvested seed cotton and producs derived from seed cotton are prohibited movement from the infested areas, except that movement is permitted from the lightly infested area into the generally infested area.
- (2) Treatment Certificates or Permit Required. Except as hereinafter exempted, articles and commodities covered shall not be transported or moved by any means from the infested areas unless accompanied by a certificate of treatment for pink bollworm issued by the county agricultural commissioner or a permit issued by the director.
- (3) Exemptions. The following articles and commodities may be transported or moved from the infested area without a certificate of treatment or permit under the conditions set forth below:
- (A) Compressed baled cotton lint, linters, and lint cleaner waste when such products have been given standard or equivalent compression (22 pounds per cubic foot or 352.3 kilograms per cubic meter) and are free from surface contaminants capable of harboring pink bollworm.
 - (B) Samples of cotton lint and cotton linters of the usual trade size.
- (C) Cottonseed from the lightly infested area may move anywhere within California except to feed mills or persons producing feed that contains whole cottonseed and such feed is or is likely to be shipped out of state
- (D) Cottonseed from the genrally infested area may move within the generally infested area except to feed mills or persons producing feed that contains whole cottonseed and such feed is or is likely to be shipped out of state
- (4) Fumigation Required for Mechanical Picking Machines. Mechanical cotton picking machines shall not be moved from the infested areas, or within the infested areas when moving from the generally infested area to the lightly infested area, unless the commissioner determines that the machines have been fumigated as prescribed by the director, immediately prior to shipment, and issues a fumigation certificate.
- (5) Certified Okra From the Infested Areas Permitted Movement Within California. Okra grown in the invested areas may be transported or moved within California from those areas when accompanied by a certificate issued by the county agricultural commissioner at origin. No movement is permitted from the generally infested into the lightly infested area. A grower to be eligible to be issued such a certificate must:
 - (A) Designate property where the okra was grown.
- (B) Control property where the okra was grown to the extent that on such property compliance can be guaranteed as to planting and plow-up dates, or other cultural practices, that may be required by the county agricultural commissioner.
- (C) Control the packing of the okra so that only okra three and a half inches (3 1/2"; 9.89 cm) or smaller will be packed.
- (D) Make certain a valid certificate is attached to each set of bills accompanying a shipment.
- (E) Designate the name of the individual, trucking concern, or other transportation concern that will transport the okra.

Only the grower or individuals or concerns so designated will be permitted to use the certificate and transport the okra from the infested areas.

(6) Assembly of Articles and Commodities for Inspection. Persons intending to move any article or commodity covered from the infested areas shall make application for inspection as far in advance as possible, shall so handle such articles and commodities as to safeguard them from infestation, and shall assemble them at such points and in such manner as the commissioner, his deputy or inspector shall designate to facilitate inspection.

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

1. Amendment filed 12–10–76; effective thirtieth day thereafter (Register 76, No. 50). For prior history, see Register 74, No. 24.

- 2. Amendment of subsection (e) filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Repealer and new section filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3410. Hydrilla Interior Quarantine (Quarantine Regulation

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Hydrilla, Hydrilla verticillata an aquatic weed that can, by its thick growth, restrict water flow and make recreational lakes and ponds unusable. It is a monocotyledonous plant of the family Hydrocharitaceae.
- (b) Area Under Quarantine. Any body of water including lake, river, stream, canal, or pond, declared by the director to be infested with hydril-
 - (c) Articles and Commodities Covered.
- (1) Commodities Covered. Hydrilla (Hydrilla verticillata) plants or parts of plants capable of growing, including parts of stems, tubers, and turions.
- (2) Articles Covered. Any products, articles, implements, conveyances (including boats), or any appliance capable of transporting viable plant parts from the area under quarantine
 - (d) Restrictions.
- (1) Movement of Commodities Covered Prohibited. The movement of commodities covered is prohibited from the area under quarantine.
- (2) Movement of Articles Covered. All covered may be restricted from access to water infested with hydrilla. In addition said articles may be restricted movement from water infested with hydrilla.

- 4. New subsection (b)(4) filed 4-18-80; effective thirtieth day thereafter (Register 80, No. 16).
- 5. Amendment filed 10-23-80 as an emergency; effective upon filing (Register 80, No. 43). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 2-20-81.
- 6. Editorial correction filed 12–12–80; effective upon filing (Register 80, No. 50). 7. Certificate of Compliance as to 10–23–80 order filed 2–19–81 (Register 81, No.
- 8. Amendment filed 5-6-82 as an emergency; effective upon filing (Register 82,
- No. 21). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 9-3-82
- 9. Certificate of Compliance as to 5-6-82 order filed 8-16-82 (Register 82, No.
- 10. Amendment of subsection (b) filed 7-20-83; effective thirtieth day thereafter (Register 83, No. 30).

11. Repealer filed 9–26–96; operative 10–26–96 (Register 96, No. 39).

§ 3413. Club Root Disease Interior Quarantine.

NOTE: Authority cited: Sections 16, 106 and 108 (renumbered 407, 5024, 5321-5323, 5761-5763, 1967 Stats. C. 15), Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1-24-63; effective thirtieth day thereafter (Register 63, No. 2). For prior history, see Register 58, No. 8.
- 2. Repealer filed 3–30–72; effective thirtieth day thereafter (Register 72, No. 14).

§ 3414. Cherry Fruit Fly Interior Quarantine (Quarantine Regulation 17).

A quarantine is established effective July 18, 1950, against the following pest, its hosts, and possible carriers:

- (a) Pest. Western cherry fruit fly (*Rhagoletis indifferens*). The larva or maggot of the fly of the family Tephritidae feeds inside the cherry fruit causing severe losses in value of the crop.
- (b) Area Under Quarantine. The entire county of Siskiyou and portions of Humboldt, Shasta, and Trinity counties bounded by a line drawn as follows: Beginning at the northwest corner of Siskiyou County; thence east along the north boundary of Siskiyou County to the Siskiyou Modoc County line; thence south along the east boundary of Siskiyou County to the Shasta County line; thence east along the north boundary of Shasta County to the Lassen County line; thence south along the east boundary of Shasta County to State Highway 299; thence generally westerly along State Highway 299 to the Redding City limit line; thence along the northernmost portion of the Redding City limit line back to State Highway 299; thence continuing generally westerly along State Highway 299 to the point where the highway crosses the Trinity River; thence generally westerly along the north shoreline of the Trinity River to its intersection with the north line of Township 4 north (Humboldt Base); thence west along the north line of Township 4 north to the east line of Range 2 east (Humboldt Meridian); thence north along the east line of Range 2 east to the north line of Township 11 north (Humboldt Base); thence east along the north line of Township 11 north to the west boundary of Siskiyou County; thence northerly along the west boundary of Siskiyou County to the point of beginning.
 - (c) Commodities and Articles Covered.
 - (1) Fresh fruit of all domestic and wild varieties of cherries.
 - (2) Soil from under cherry trees and within the drip line.
 - (d) Restrictions.
- (1) Infested Property Defined. As used in this regulation, an "Infested Property" shall mean a property on which the pest herein quarantined against exists or has been known to exist in any living stage of development.
- (2) Cherry-Fruits and Soil Prohibited Movement From Infested Properties. Cherry-fruits, and soil as such or in association with plants are prohibited movement from any infested property, otherwise no restrictions are placed by this regulation on the movement of restricted articles between points within the area under quarantine involving no movement outside thereof.
- (3) Cherry-Fruits Prohibited Movement Outside Area Under Quarantine. Cherry-fruits are prohibited movement from any point within the area under quarantine to any point outside thereof.

NOTE: Authority cited: Sections 407, 5301, 5302, and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302, and 5322, Food and Agricultural Code. HISTORY

- 1. Amendment of subsections (a) and (c) filed 3-13-74; effective thirtieth day thereafter (Register 74, No. 11). For prior history, see Register 64, No. 17.
- 2. Amendment of subsections (a)-(c) filed 6-14-80; effective thirtieth day thereafter (Register 80, No. 24).

§ 3415. Yellow Leaf Roll of Peach, Interior Quarantine.

NOTE: New Authority cited: Sections 407, 5301, 5302, 5322 and 5761, Food and Agricultural Code.

- 1. New section filed 1-16-51 as an emergency; effective upon filing (Register 23, No. 2)
- 2. Amendment filed 5-28-59; effective thirtieth day thereafter (Register 59, No.
- 3. Amendment filed 5-6-68 as an emergency; effective upon filing. Certificate of Compliance included (Register 68, No. 18).

 4. Repealer filed 4–19–72, effective thirtieth day thereafter (Register 72, No. 17).

Hall Scale Interior Quarantine (Quarantine § 3416. Regulation 19).

1. Repealer filed 3-21-58; effective thirtieth day thereafter (Register 58, No. 5). For prior history, see Register 57, No. 11.

§ 3417. Mexican Fruit Fly Interior Quarantine.

A quarantine is established against the following pest, its hosts and possible carriers.

- (a) Pest. Mexican fruit fly (Anastrepha ludens).
- (b) Area Under Quarantine. [Reserved]
- (c) Articles and Commodities Covered. The following are declared to be hosts and possible carriers of Mexican fruit fly.
 - (1) All fruit of the following plants:

Annona spp.

Cherimoya, Annona Sapote

Casimiroa spp.

Citrus spp. Citrus, except Lemon and Sour Lime

Cydonia oblonga Quince Eugenia spp. Rose apple Apple Malus sylvestris Mammea spp. Mamey Mangifera indica Mango Avocado Persea americana

Native American plum Prunus americana

Prunus armeniaca Apricot Prunus domestica Plum, Prune Prunus persica Peach and Nectarine

Prunus salicina Japanese plum

Psidium spp. Guava Punica granatum Pomegranate Pyrus communis Pear

Sapota, Sapote, Sapodillas Sapotaceae

Sargentia spp. Sargentia

Spondias purpurea Ciruelas, Spanish plum

- (2) Soil within the drip area of plants producing, or which have produced, fruit listed in (c)(1) above.
- (3) Any other product, article, or means of conveyance when it is determined by the director or county agricultural commissioner to present a hazard of spreading live Mexican fruit fly and the person in possession thereof has been so notified.
 - (d) Restrictions.
- (1) At the wholesale level, articles and commodities covered which have been commercially produced within the area under quarantine are prohibited movement from or within the area under quarantine except in accordance with the following provisions:
- (A) The commodity has been treated for Mexican fruit fly in a manner approved by the director, is transported in a manner approved by the director to preclude exposure to Mexican fruit fly, and is accompanied by a certificate, verifying compliance with the above requirements, issued by the director or county agricultural commissioner; or,
- (B) The commodity is moving for treatment for Mexican fruit fly or processing and in a manner approved by the director to preclude exposure to Mexican fruit fly, and is accompanied by a written document affirming that movement has been authorized by the director or county agricultural commissioner.
- (2) At the wholesale level, articles and commodities covered which have been commercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when accompanied by a shipping document indicating the point of origin and destination and moved in accordance with the following provisions:
- (A) The commodity is moving directly through the area under quarantine without delay in an enclosed vehicle or completely enclosed by a covering to prevent exposure to Mexican fruit fly; or,
- (B) The commodity is destined to a permanent wholesale or retail establishment and is transported in an enclosed vehicle or completely enclosed by a covering to prevent exposure to Mexican fruit fly; or,
 - (C) The commodity is destined to a commercial processing facility.

- (3) At the retail level, articles and commodities covered which have been commercially produced are prohibited movement from or within the area under quarantine except when the person in possession has a sales slip or other comparable document showing the commodity was purchased from a commercial establishment.
- (4) Articles and commodities covered which have been noncommercially produced within the area under quarantine, including "backyard" production, are prohibited movement from the premises where grown except under written authorization of the director or county agricultural commissioner.
- (5) Articles and commodities covered which have been noncommercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when the person in possession has signed a statement showing the commodity, amount, origin, destination, and date of transportation.
- (6) Within the area under quarantine, no wholesale or retail establishment shall handle, sell, or offer for sale any article or commodity covered unless such commodities at all times are maintained in a manner approved by the director to preclude exposure to Mexican fruit fly. No commodity covered shall be held for sale or sold from a truck, trailer, or other mobile vehicle.

NOTE: Authority: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

- 1. New section filed 6-4-90 as an emergency; operative 6-4-90 (Register 90, No. 29). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 10-2-90. For prior history, see Register 84, No. 48.
- 2. New subsection (b)(2) filed 7–2–90 as an emergency; operative 7–2–90 (Register 90, No. 36). A Certificate of Compliance must be transmitted to OAL by 10-30-90 or emergency language will be repealed by operation of law on the following day.
- 3. Repealed by operation of Government Code section 11346.1(g) 120 days from effective date filed 5–21–91 (Register 91, No. 24).
 4. New section filed 11–22–91 as an emergency; operative 11–22–91 (Register 92,
- No. 7). A Certificate of Compliance must be transmitted to OAL 3-23-91 or
- emergency language will be repealed by operation of law on the following day. 5. Amendment of subsection (b) filed 2-27-92 as an emergency; operative 2-27-92 (Register 92, No. 15). A Certificate of Compliance must be transmitted to OAL 6-26-92 or emergency language will be repealed by operation of law on the following day
- 6. Certificate of Compliance as to 11-22-91 order transmitted to OAL 3-18-92 and filed 4-29-92 (Register 92, No. 19).
- 7. Editorial correction of printing error in HISTORY 6 (Register 92, No. 28)
- 8. Certificate of Compliance as to 2-27-92 order transmitted to OAL 6-18-92 and filed 7-1-92 (Register 92, No. 28).
- Amendment of subsection (b)(1) filed 11–9–93 as an emergency; operative 11–9–93 (Register 93, No. 46). A Certificate of Compliance must be transmitted to OAL by 3-9-94 or emergency language will be repealed by operation of law on the following day
- 10. Certificate of Compliance as to 11-9-93 order transmitted to OAL 2-25-94 and filed 3-10-94 (Register 94, No. 10).
- 11. Repealer of subsection (b)(1) filed 10-17-94 as an emergency; operative 10-17-94 (Register 94, No. 42). A Certificate of Compliance must be transmitted to OAL by 2-14-95 or emergency language will be repealed by operation of law on the following day.
- 12. Certificate of Compliance as to 10–17–94 order transmitted to OAL 2–9–95 and filed 2-23-95 (Register 95, No. 8).
- 13. New subsection (b) filed 11-22-95 as an emergency; operative 11-22-95 (Register 95, No. 47). A Certificate of Compliance must be transmitted to OAL by 3-21-96 or emergency language will be repealed by operation of law on the following day.
- 14. Amendment of subsection (b) filed 12-18-95 as an emergency; operative 12-18-95 (Register 95, No. 51). A Certificate of Compliance must be transmitted to OAL by 4-16-96 or emergency language will be repealed by operation of law on the following day.
- 15. Certificate of Compliance as to 11-22-95 order, including new subsection (b)(1) and (b)(2) designations, transmitted to OAL 3-4-96 and filed 4-15-96 (Register 96, No. 16)
- 16. Certificate of Compliance as to 12–18–95 order transmitted to OAL 3–21–96 and filed 5-1-96 (Register 96, No. 18). 17. Repealer of subsection (b)(2) filed 7-25-96 as an emergency; operative
- 7–25–96 (Register 96, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–22–96 or emergency language will be repealed by operation of law on the following day.
- 18. Certificate of Compliance as to 7-25-96 order transmitted to OAL 10-31-96
- and filed 11–5–96 (Register 96, No. 45).

 19. Repealer of subsection (b)(1) filed 8–21–97 as an emergency; operative 8-21-97 (Register 97, No. 34). A Certificate of Compliance must be transmitted

- to OAL by 12-19-97 or emergency language will be repealed by operation of law on the following day
- 20. New subsection (b) filed 10–23–97 as an emergency; operative 10–23–97 (Register 97, No. 43). A Certificate of Compliance must be transmitted to OAL by 2-20-98 or emergency language will be repealed by operation of law on the following day.
- 21. Certificate of Compliance as to 8-21-97 order transmitted to OAL 12-3-97 and filed 1–14–98 (Register 98, No. 3).

 22. Certificate of Compliance as to 10–23–97 order transmitted to OAL 1–29–98
- and filed 2–9–98 (Register 98, No. 7).

 23. New subsection (b)(2) filed 7–29–98 as an emergency; operative 7–29–98 (Register 98, No. 31). A Certificate of Compliance must be transmitted to OAL by 11-30-98 or emergency language will be repealed by operation of law on the following day.
- 24. Repealer of subsection (b)(1) and subsection renumbering filed 8–24–98 as an emergency; operative 8–24–98 (Register 98, No. 35). A Certificate of Compliance must be transmitted to OAL by 12-22-98 or emergency language will be repealed by operation of law on the following day.
- 25. New subsection (b)(2) filed 9-25-98 as an emergency; operative 9-25-98 (Register 98, No. 39). A Certificate of Compliance must be transmitted to OAL by 1-25-99 or emergency language will be repealed by operation of law on the
- 26. Amendment of subsection (b)(2) filed 10-27-98 as an emergency; operative 10-27-98 (Register 98, No. 44). A Certificate of Compliance must be transmitted to OAL by 2-24-99 or emergency language will be repealed by operation of law on the following day
- 27. Editorial correction of subsection (b)(1) and HISTORY 23 (Register 99, No. 1) 28. Certificate of Compliance as to 7–29–98 order transmitted to OAL 11–20–98
- and filed 12-29-98 (Register 99, No. 1) 29. Certificate of Compliance as to 8-24-98 order transmitted to OAL 12-22-98
- and filed 1–19–99 (Register 99, No. 4).

 30. Certificate of Compliance as to 9–25–98 order transmitted to OAL 1–22–99
- and filed 3-1-99 (Register 99, No. 10). 31. Certificate of Compliance as to 10–27–98 order transmitted to OAL 2–18–99 and filed 3-1-99 (Register 99, No. 10).
- 32. Repealer of subsection (b)(1) and subsection renumbering filed 6–14–99 as an emergency; operative 6-14-99 (Register 99, No. 25). A Certificate of Compliance must be transmitted to OAL by 10-12-99 or emergency language will
- be repealed by operation of law on the following day.

 33. Repealer of subsection (b)(1) filed 8–5–99 as an emergency; operative 8–5–99 (Register 99, No. 32). A Certificate of Compliance must be transmitted to OAL by 12-3-99 or emergency language will be repealed by operation of law on the
- 34. New subsection (b)(1) filed 9-10-99 as an emergency; operative 9-10-99 (Register 99, No. 37). A Certificate of Compliance must be transmitted to OAL 1-10-2000 or emergency language will be repealed by operation of law on the following day.
- 35. Certificate of Compliance as to 6–14–99 order transmitted to OAL 10–12–99 and filed 11-12-99 (Register 99, No. 46).
- 36. New subsection (b)(2) filed 11–16–99 as an emergency; operative 11–16–99 (Register 99, No. 47). A Certificate of Compliance must be transmitted to OAL 3-15-2000 or emergency language will be repealed by operation of law on the following day.
- 37. Certificate of Compliance as to 8-5-99 order transmitted to OAL 12-3-99 and filed 1-12-2000 (Register 2000, No. 2)
- 38. Certificate of Compliance as to 9-10-99 order transmitted to OAL 1-6-2000 and filed 2-4-2000 (Register 2000, No. 5).
- 39. Repealer of subsection (b)(1) and subsection renumbering filed 3–28–2000 as an emergency; operative 3-28-2000 (Register 2000, No. 13). A Certificate of Compliance must be transmitted to OAL by 7-26-2000 or emergency language will be repealed by operation of law on the following day.
- 40. Certificate of Compliance as to 11-16-99 order transmitted to OAL
- 3–15–2000 and filed 4–20–2000 (Register 2000, No. 16).
 41. Repealer of subsection (b)(1) filed 6–8–2000 as an emergency; operative 6-8-2000 (Register 2000, No. 23). A Certificate of Compliance must be transmitted to OAL by 10-6-2000 or emergency language will be repealed by operation of law on the following day.
- 42. Certificate of Compliance as to 3-28-2000 order transmitted to OAL 7–25–2000 and filed 9–5–2000 (Register 2000, No. 36).
- 43. Certificate of Compliance as to 6–8–2000 order transmitted to OAL 10–6–2000 and filed 11–2–2000 (Register 2000, No. 44).
- 44. New subsection (b)(1) filed 11-1-2002 as an emergency; operative 11-1-2002 (Register 2002, No. 44). A Certificate of Compliance must be transmitted to OAL by 3-3-2003 or emergency language will be repealed by operation of law on the following day.
- 45. New subsection (b)(2) filed 12-12-2002 as an emergency; operative 12-12-2002 (Register 2002, No. 50). A Certificate of Compliance must be transmitted to OAL by 4-11-2003 or emergency language will be repealed by operation of law on the following day.
- 46. Amendment of subsection (b)(1) filed 12–12–2002 as an emergency; operative 12-12-2002 (Register 2002, No. 50). A Certificate of Compliance must be transmitted to OAL by 4-11-2003 or emergency language will be repealed by operation of law on the following day.
- 47. Amendment of subsection (b)(2) filed 1-28-2003 as an emergency; operative 1-28-2003 (Register 2003, No. 5). A Certificate of Compliance must be trans-

- mitted to OAL by 5-28-2003 or emergency language will be repealed by operation of law on the following day.
- 48. Certificate of Compliance as to 12-12-2002 order transmitted to OAL 3-18-2003 and filed 4-1-2003 (Register 2003, No. 14)
- 49. Certificate of Compliance as to 11-1-2002 order transmitted to OAL 2-25-2003 and filed 4-7-2003 (Register 2003, No. 15).
- 50. Certificate of Compliance as to 12-12-2002 order transmitted to OAL 3–18–2003 and filed 4–21–2003 (Register 2003, No. 17).
- 51. Certificate of Compliance as to 1-28-2003 order transmitted to OAL 5-1-2003 and filed 6-3-2003 (Register 2003, No. 23).
- 52. Amendment of subsection (b)(1) filed 6-26-2003 as an emergency; operative 6-26-2003 (Register 2003, No. 26). A Certificate of Compliance must be transmitted to OAL by 10-24-2003 or emergency language will be repealed by operation of law on the following day.
- 53. Repealer of subsection (b)(1) and subsection renumbering filed 7-24-2003 as an emergency; operative 7–24–2003 (Register 2003, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–21–2003 or emergency language will be repealed by operation of law on the following day.
- 54. Repealer of subsection (b)(1) filed 9-25-2003 as an emergency; operative 9–25–2003 (Register 2003, No. 39). A Certificate of Compliance must be transmitted to OAL by 1–23–2004 or emergency language will be repealed by operation of law on the following day.
- 55. Certificate of Compliance as to 6-26-2003 order transmitted to OAL 10–7–2003 and filed 10–27–2003 (Register 2003, No. 44).
- 56. Certificate of Compliance as to 7-24-2003 order transmitted to OAL 11-13-2003 and filed 12-26-2003 (Register 2003, No. 52).
- 57. Certificate of Compliance as to 9-25-2003 order transmitted to OAL 1–14–2004 and filed 2–5–2004 (Register 2004, No. 6).
- 58. New subsection (b)(1) filed 11-16-2007 as an emergency; operative 11–16–2007 (Register 2007, No. 46). A Certificate of Compliance must be transmitted to OAL by 5–14–2008 or emergency language will be repealed by operation of law on the following day.
- 59. Certificate of Compliance as to 11–16–2007 order transmitted to OAL 3–21–2008 and filed 5–2–2008 (Register 2008, No. 18).
- 60. Amendment of subsection (b) and repealer of subsection (b)(1) filed 7-22-2008 as an emergency; operative 7-22-2008 (Register 2008, No. 30). A Certificate of Compliance must be transmitted to OAL by 1-20-2009 or emergency language will be repealed by operation of law on the following day.

§ 3418. Khapra Beetle Interior Quarantine (Quarantine Regulation 21).

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302, 5322, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-6-81 as an emergency; effective upon filing (Register 81, No. 6). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 6-5-81 (Register 81, No. 6). For prior history, see Registers 67, No. 47; and 61, No. 19
- Certificate of Compliance transmitted to OAL 5-27-81 and filed 6-17-81 Register 81, No. 2:
- 3. Repealer filed 2–17–84; effective thirtieth day thereafter (Register 84, No. 7).

§ 3419. Date Palm Disease Interior Quarantine (Quarantine Regulation 24).

A quarantine is established against the following pest, its hosts, and

- (a) Pest. A form of the fungus, Fusarium oxysporum, which initiates a serious disease in Canary Island date palm, Phoenix canariensis, and clump palm, P. reclinata. Seedlings of the date palm, P. dactylifera, are killed when injected with, or planted in soil infested with, the pathogen. There is reasonable cause to presume that this fungus isolate will be pathogenic to mature date palms, P. dactylifera, and other palms of the genus Phoenix.
- (b) Quarantine Area. The quarantine area shall be all of California except the protected area. The protected area is:
 - (1) Imperial County—the entire county.
- (2) Inyo County—Township 27 north, Range 1 east, which includes the Furnace Creek Ranch of Death Valley.
- (3) Riverside County—all of Riverside County east of the eastern boundary of Range 2 east. (This boundary line runs north and south just east of the Town of Cabazon in Riverside County.)
 - (c) Commodities Covered and Articles Covered.
- (1) All plants and parts for propagation, including seed, of the palm genus Phoenix.
- (2) Saws, knives, or other tools used for trimming or pruning palms of the genus Phoenix.
- (d) Restrictions. The commodities covered are prohibited movement into the protected area, except that trimming or pruning tools will be al-

lowed movement into the protected area when certified by a plant quarantine officer as being sterilized in an approved manner. The movement of the commodities and articles covered is not restricted in any way when such movement is entirely within the quarantine area or entirely within the protected area.

- (e) Exceptions.
- (1) There are no restrictions of movement through the area as long as the commodities covered are neither in transit more than 48 hours nor off-loaded enroute.
- (2) The Director may issue special permits allowing entry of commodities otherwise prohibited. The permit shall state any and all mandatory provisions or conditions under which entry will be allowed.

HISTORY

1. New section filed 7-3-80; effective thirtieth day thereafter (Register 80, No. 27). For prior history, see Register 58, No. 17.

§ 3420. Japanese Beetle Interior Quarantine (Quarantine Regulation 25).

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-7-83 as an emergency; effective upon filing (Register 83, No. 29). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11–4–83. For history of former section, see Registers 83, No. 14; 77, No. 31; and 57, No. 21.
- 2. Amendment of subsection (b) filed as an emergency 8-1-83; effective upon filing (Register 83, No. 33). A Certificate of Compliance must be transmitted to
- OAL within 120 days or emergency language will be repealed on 11–29–83.

 3. Certificate of Compliance as to 7–7–83 order transmitted to OAL 10–18–83 and filed 11-14-83 (Register 83, No. 47)
- 4. Certificate of Compliance as to 8–1–83 order transmitted to OAL 11–4–83 and filed 12-1-83 (Register 83, No. 51).
- 5. Amendment of subsection (b) filed 6-22-84 as an emergency; effective upon filing (Register 84, No. 27). A Certificate of Compliance must be transmitted
- to OAL within 120 days or emergency language will be repealed on 10–20–84. 6. Certificate of Compliance as to 6–22–84 order filed 10–10–84 (Register 84, No.
- 7. Repealer filed 7-15-98; operative 8-14-98 (Register 98, No. 29).

§ 3421. Apple Maggot Interior Quarantine (Quarantine Regulation 26).

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- New section filed 9-21-83 as an emergency; effective upon filing (Register 83, No. 40). A Certificate of Compliance must be transmitted to OAL within 120
- days or emergency language will be repealed on 1–19–84. 2. Certificate of Compliance as to 9–21–83 order transmitted to OAL 12–13–83
- 3. Amendment of subsection (b) filed 8–28–84 as an emergency; effective upon filing (Register 84, No. 36). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12–26–84.
- 4. Amendment of subsection (b) filed 9–6–84 as an emergency; effective upon filing (Register 84, No. 39). A Certificate of Compliance must be transmitted to
- OAL within 120 days or emergency language will be repealed on 1-4-85. 5. Amendment of subsection (b) filed 9-19-84 as an emergency; effective upon filing (Register 84, No. 39). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1–17–85.
- 6. Certificate of Compliance as to 8-28-84 order, 9-6-84 order and 9-19-84 order
- transmitted to OAL 11-30-84 and filed 1-2-85 (Register 85, No. 1).

 7. New subsections (b)(1) and (2) filed 9-16-86 as an emergency; effective upon
- filing (Register 86, No. 39). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-14-87.

 8. New subsection (b)(3) filed 9-22-86 as an emergency; effective upon filing (Register 86, No. 39). A Certificate of Compliance must be transmitted to OAL
- within 120 days or emergency language will be repealed on 1–20–87. 9. Emergency language filed 9–16–86 and 9–22–86 repealed by operation of Gov-
- ernment Code section 11346.1 (Register 87, No. 25).

 10. Amendment of subsection (b) filed 6–10–87 as an emergency; operative 6–10–87 (Register 87, No. 25). A Certificate of Compliance must be transmitted
- to OAL within 120 days or emergency language will be repealed on 10–8–87.

 11. Amendment of subsection (b)(2) filed 8–7–87 as an emergency; operative 8–7–87 (Register 87, No. 33). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12–7–87.

 12. Emergency language filed 6–10–87 repealed by operation of Government Code section 11346.1 on 10–9–87 (Register 88, No. 35).

 13. Emergency language filed 8–7–87 repealed by operation of Government Code section 11346.1 on 12–8. 87 (Register 88, No. 35).
- section 11346.1 on 12-8-87 (Register 88, No. 35).

14. Repealer filed 6-30-94; operative 8-1-94 (Register 94, No. 26).

§ 3422. Caribbean Fruit Fly Interior Quarantine (Quarantine Regulation 27).

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

- 1. New section filed 2-10-84 as an emergency; effective upon filing (Register 84, No. 7). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6-11-84.
- 2. Certificate of Compliance transmitted to OAL 5-8-84 and filed 6-5-84 (Register 84, No. 23)
- 3. Repealer filed 11-29-84; effective thirtieth day thereafter (Register 84, No. 48).

§ 3423. Oriental Fruit Fly Interior Quarantine (Quarantine Regulation 28).

A quarantine is established against the following pest, its hosts, and possible carriers.

- (a) Pest. Oriental fruit fly (Dacus dorsalis).
- (b) Area Under Quarantine.
- (1) [Reserved]
- (c) Articles and Commodities Covered. The following are declared to be hosts and possible carriers of Oriental fruit fly.
 - (1) All fruit of the following plants:

Akia Wikstroemia phyllyraefolia Alexander laurel Calophyllum inophyllum Apple, common Malus sylvestris Apricot Prunus armeniaca Avocado Persea americana Banana Musa paradisica var. sapientum = (Musa x paradisiaca) Banana, dwarf Musa nana Barbados cherry Malphighia glabra Brazil cherry Eugenia dombeyi Breadfruit Artocarpus altilis Cactus

Cereus coerulescens Caimitillo Chrysophyllum oliviforme Cashew Anacardium occidentale Cherimova Anonna cherimola

Cherry, Catalina Prunus ilicifolia (ornamental) Chili Capsicum frutescens var. longum Coffee, Arabian Coffea arabica

Country gooseberry Averrhoa carambola Cucumber Cucumis sativas Custard apple Annona squamosa Custard apple, Annona Annona reticulata Date palm Phoenix dactylifera Dragon tree Dracena draco Eggfruit tree

Pouteria campechiana = (Lucuma nervosa) Elengi tree Mimusops elengi Fig, common Ficus carica Gourka Garcinia celebica Granadilla, sweet Passiflora ligularis

Granadilla, yellow Passiflora lauriflora Grape Vitis spp. Grapefruit Citrus paradisi Guava Psidium guajava Guava, pineapple Feijoa sellowiana Guava, red strawberry Psidium littorale

Guava, yellow strawberry Psidium cattleianum lucidum

Imbu Spondias tuberosa Jackfruit Artocarpus heterophyllus Jerusalem Cherry Solanum pseudocapiscum Kitembilla Dovyalis hebecarpa Kumquat Fortunella japonica Lemon Citrus limon Lime, sour Citrus aurantiifolia Longan Euphoria longan Eriobotrya japonica Loquat Lychee Lychee chinensis

Malay apple Eugenia malaccensis Mammee apple Mammea americana Mandarin (tangerine) Citrus reticulata Mangifera indica Mango Mangosteen Garcinia mangostana Mock orange Murraya exotica Mulberry, black Morus nigra Myrtle, downy rose Rhodomyrtus tomentosa

Natal plum Carissa grandiflora Nectarine Prunus persica var. nectarina

Oleander, yellow Thevetia peruviana

Orange, calamondin Citrus japonica and Citrus mitis

Orange, Chinese Citrus japonica hazara Orange, king Citrus, nobilis Orange, sour Citrus aurantium Orange, sweet Citrus sinensis Orange, unshu Citrus unshu Otaheite apple Spondias dulcis Palm, date Phoenix spp. Palm, syrup Jubaea spectabilis Papaya, common Carica papaya Passionflower, Passiflora mollissima

Passionfruit (yellow lilikoi) Passiflora edulis flavicarpa Prunus persica Peach Pear Pyrus communis Solanum muricatum Pepino

Pepper, oriental bush red Capiscum frutescens var. abbreviatum Capiscum frutescens var. grossum

Pepper, sweet Persimmon Diospyros spp.

Persimmon, Japanese Diospyros kaki Plum, American Prunus americana Plum, garden (common

European prune) Prunus domestica Pomegranate Punica granatum Prickly pear, mission Opuntia megacantha Pummelo Citrus grandis Quince Cydonia oblonga

Rose apple $Eugenia\ jambos = (Syzygium\ jambos)$

Sandalwood Santalum paniculatum Sandalwood, white Santalum album Sandericum koetjape Santol Sapodilla Manilkara zapota Sapodilla chiku Achras zapota Sapote, white Casimiroa edulis Coccoloba uvifera Seagrape Soursop Annona muricata Star apple Chrysophyllum cainito Surinam cherry Eugenia uniflora Tomato Lycopersicon esculentum Tropical almond Terminalia catappa Terminalia Terminalia chebula Velvet apple Diospyros discolor

Walnut, California black Juglans hindsii Walnut, English Juglans regia Wampi Citrus lansium West Indian cherry Malpighia punicifolia Cananga odorata Ylang-ylang

(2) Any other product, article, or means of conveyance when it is determined by the director or county agricultural commissioner to present a hazard of spreading live Oriental fruit fly and the person in possession thereof has been so notified.

(d) Restrictions.

(1) At wholesale level, articles and commodities covered which have been commercially produced within the area under quarantine are prohibited movement from or within the area under quarantine except in accordance with the following provisions:

(A) The commodity has been treated for Oriental fruit fly in a manner approved by the director, is transported in a manner approved by the director to preclude exposure to Oriental fruit fly, and is accompanied by a certificate, verifying compliance with above requirements, issued by the director or county agricultural commissioner; or,

- (B) The commodity is moving for treatment for Oriental fruit fly or processing and in a manner approved by the director to preclude exposure to Oriental fruit fly, and is accompanied by a written document affirming that movement has been authorized by the director or county agricultural commissioner.
- (2) At the wholesale level, articles and commodities covered which have been commercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when accompanied by a shipping document indicating the point of origin and destination and moved in accordance with the following provisions:
- (A) The commodity is moving directly through the area under quarantine without delay in an enclosed vehicle or completely enclosed by a covering to prevent exposure to Oriental fruit fly; or,
- (B) The commodity is destined to a wholesale or retail establishment and, if moving between 9:00 a.m. and sunset, is transported in an enclosed vehicle or completely enclosed by a covering to prevent exposure to Oriental fruit fly; or,
 - (C) The commodity is destined to a commercial processing facility.
- (3) At the retail level, articles and commodities covered which have been commercially produced are prohibited movement from or within the area under quarantine except when the person in possession has a sales slip or other comparable document showing the commodity was purchased from a commercial establishment.
- (4) Articles and commodities covered which have been noncommercially produced within the area under quarantine, including "backyard" production, are prohibited movement from the premises where grown except under written authorization of the director or county agricultural commissioner.
- (5) Articles and commodities covered which have been noncommercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when the person in possession has signed a statement showing the commodity, amount, origin, destination, and date of transportation.
- (6) Within the area under quarantine, no wholesale or retail establishment shall handle, sell or offer for sale any article or commodity covered unless such commodities at all times are maintained in a manner approved by the director to preclude exposure to Oriental fruit fly.

(2) Soil within the drip area of plants producing, or which have produced fruit, vegetables, or berries as listed in (c)(1) above.

- (3) Any other product, article, or means of conveyance when it is determined by the Secretary or county agricultural commissioner to present a hazard of spreading live life stages of peach fruit fly and the person in possession thereof has been so notified.
 - (d) Restrictions.
- (1) At the wholesale level, articles and commodities covered in Section (c) are prohibited movement within or from the area under quarantine except as provided in (A) or (B) below:
- (A) If the article or commodity has been treated in a manner approved by the department to eliminate peach fruit fly, is transported in a manner to preclude exposure to peach fruit fly, and is accompanied by a written certificate issued by an authorized State or county agricultural official affirming compliance with this subsection; or,
- (B) The article or commodity is moving for treatment for peach fruit fly or processing and in a manner approved by the department to preclude exposure to peach fruit fly and is accompanied by a written certificate issued by an authorized State or county agricultural official affirming such movement has been authorized under this subsection.
- (2) At the wholesale level, articles and commodities covered in Section (c) which have been commercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when accompanied by a shipping document indicating the point of origin and destination and moved in compliance with (A), (B) or (C) below:
- (A) If the article or commodity is moving directly through the area under quarantine without delay and by a direct route in an enclosed vehicle or container or completely enclosed by a covering to prevent exposure to the peach fruit fly while en route through the area; or,
- (B) The article or commodity is destined to a wholesale or retail establishment within the quarantined area and, if moving between 9:a.m. and sunset, is transported in an enclosed vehicle or container or completely enclosed by a covering to prevent exposure to the peach fruit fly; or
- (C) The article or commodity is destined to a commercial processing facility.
- (3) At the retail level, articles and commodities covered which have been commercially produced are prohibited movement from or within the area under quarantine except when the person in possession has a sales slip or other comparable document showing the commodity was purchased from a commercial establishment.

- (4) Articles and commodities covered which have been noncommercially produced within the area under quarantine, including "backyard" production, are prohibited movement from the premises where grown except under written authorization of the department or county agricultural commissioner.
- (5) Articles and commodities covered which have been noncommercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when the person in possession has signed a statement showing the commodity, amount, origin, destination, and date of transportation.
- (6) Within the area under quarantine, no wholesale or retail establishment shall handle, sell, or offer for sale any article or commodity covered unless such commodities at all times are maintained in a manner approved by the department to preclude exposure to peach fruit fly. No commodity covered shall be held for sale or sold from a truck, trailer, or other mobile vehicle.

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- New section filed 5-23-2006 as an emergency; operative 5-23-2006 (Register 2006, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-20-2006 or emergency language will be repealed by operation of law on the following day.
- Repealer and reservation of subsection (b) filed 8-1-2006 as an emergency; operative 8-1-2006 (Register 2006, No. 31). A Certificate of Compliance must be transmitted to OAL by 11-29-2006 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 5–23–2006 order transmitted to OAL 9–1–2006 and filed 10–12–2006 (Register 2006, No. 41).
- 4. Certificate of Compliance as to 8-1-2006 order transmitted to OAL 11-22-2006 and filed 1-3-2007 (Register 2007, No. 1).

§ 3425. Melon Fruit Fly Interior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers.

- (a) Pest. Melon fruit fly (Bactrocera cucurbitae).
- (b) Area Under Quarantine.

[Reserved]

- (c) Commodities Covered.
- (1) All fruit, vegetables or berries of the following agricultural, wild, or ornamental plants:

Cucumis utllissimus
Cucurbita pepo

Pumpkin, Canada Squash Cucurbita moschata Cucurbita maxima

Watermelon Citrullus lanatus [Citrullus vulgaris]

- (4) Any other product, article, or means of conveyance when it is determined by the department or county agricultural commissioner to present a hazard of spreading live melon fruit fly and the person in possession thereof has been so notified.
 - (d) Restrictions.
- (1) At the wholesale level, articles and commodities covered which have been commercially produced within the area under quarantine are prohibited movement from or within the area under quarantine except in accordance with the following provisions:
- (A) The commodity has been treated in a manner approved by the department to eliminate melon fruit fly, is transported in a manner approved by the department to preclude exposure to melon fruit fly, and is accompanied by a certificate, verifying compliance with the above requirements, issued by the department or county agricultural commissioner; or,
- (B) The commodity is moving for treatment for melon fruit fly or processing and in a manner approved by the department to preclude exposure to melon fruit fly and is accompanied by a written document affirming that movement has been authorized by the department or county agricultural commissioner.
- (2) At the wholesale level, articles and commodities covered which have been commercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when accompanied by a shipping document indicating the point of origin and destination and moved in accordance with the following provisions:
- (A) The commodity is moving directly through the area under quarantine without delay in an enclosed vehicle or completely enclosed by a covering to prevent exposure to melon fruit fly; or,
- (B) The commodity is destined to a wholesale or retail establishment and, if moving between 9:00 a.m. and sunset, is transported in an enclosed vehicle or completely enclosed by a covering to prevent exposure to melon fruit fly; or,
 - (C) The commodity is destined to a commercial processing facility.
- (3) At the retail level, articles and commodities covered which have been commercially produced are prohibited movement from or within the area under quarantine except when the person in possession has a sales slip or other comparable document showing the commodity was purchased from a commercial establishment.
- (4) Articles and commodities covered which have been noncommerically produced within the area under quarantine, including "backyard" production, are prohibited movement from the premises where grown except under written authorization of the department or county agricultural commissioner.
- (5) Articles and commodities covered which have been noncommercially produced outside the area under quarantine are prohibited movement into the area under quarantine except when the person in possession has signed a statement showing the commodity, amount, origin, destination, and date of transportation.
- (6) Within the area under quarantine, no wholesale or retail establishment shall handle, sell or offer for sale any article or commodity covered unless such commodities at all times are maintained in a manner approved by the department to preclude exposure to melon fruit fly.

HISTORY

- New section filed 12-10-87 as an emergency; operative 12-10-87 (Register 87, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4-11-88.
- Repealed by operation of Government Code Section 11346.1(g) (Register 89, No. 51).
- 3. Amendment of section heading and new section filed 1–5–2000 as an emergency; operative 1–5–2000 (Register 2000, No. 1). A Certificate of Compliance must be transmitted to OAL by 5–4–2000 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 1–5–2000 order transmitted to OAL 5–2–2000 and filed 6–1–2000 (Register 2000, No. 22).
- 5. Repealer of subsection (b)(1) filed 6–11–2002; operative 7–11–2002 (Register 2002, No. 24).

§ 3426. White Garden Snail Interior Quarantine.

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

- HISTORY
 1. New section filed 12–21–88; operative 1–20–89 (Register 89, No. 2).
- 2. Repealer filed 5–7–93; operative 6–7–93 (Register 93, No. 19).

§ 3427. Whitefringed Beetle Interior Quarantine.

NOTE: Authority cited: Sections 407, 5301 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- New section filed 11–23–88 as an emergency; operative 11–23–88 (Register 88, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3–23–89.
- 2. Repealed by operation of Government Code section 11346.1(g) filed 1–15–91 (Register 91, No. 19).

§ 3428. Chrysanthemum White Rust Disease Interior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers.

- (a) Pest, Chrysanthemum white rust disease (Puccinia horiana).
- (b) Area. [Reserved]
- (c) Articles and Commodities Covered. The following are declared to be hosts and possible carriers of the disease:
- (1) Plants and plant parts of all species, hybrids, botanical and horticultural varieties of the genera *Chrysanthemum* and *Dendranthema*, except those determined by the director not to be susceptible to infection by the pest.
- (2) All equipment, trucks, tractors, or other articles used in the production, harvest, transportation, or storage of the plant materials in (1) above.
 - (d) Restrictions.
- (1) Articles and commodities covered in subsection (c)(1) are prohibited movement within or from the regulated areas except as provided in (A), (B), or (C) below:
- (A) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities have been treated and inspected in a manner approved by the director.
- (B) If purchased at a retail sales location and accompanied by a sales receipt.
- (C) If the commodity was produced outside the regulated areas and is being moved through a regulated area by direct route and without delay in closed vehicles or containers.
- (2) Articles and commodities covered in subsection (c)(1) are prohibited entry into the regulated area for propagation purposes except if treated upon arrival in a manner approved by the director.
- (3) Articles and commodities covered in subsection (c)(2) are prohibited movement within or from the regulated area except if free from all non-certified plant material of the kinds designated in (c)(1).
- NOTE: Authority cited: Sections 407, 5301, 5302, and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302, and 5322, Food and Agricultural Code. HISTORY
- New section filed 1-5-93 as an emergency; operative 1-5-93 (Register 93, No.
 A Certificate of Compliance must be transmitted to OAL 5-5-93 or emergency language will be repealed by operation of law on the following day.
- Amendment of subsection (b) filed 1-14-93 as an emergency; operative 1-14-93 (Register 93, No. 3). A Certificate of Compliance must be transmitted to OAL 5-14-93 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 1–14–93 order transmitted to OAL 5–12–93 and filed 5–17–93 (Register 93, No. 21).
- Certificate of Compliance as to 1–5–93 order transmitted to OAL 4–28–93 and filed 6–2–93 (Register 93, No. 23).
- 5. Amendment of subsection (b) filed 1-18-94 as an emergency; operative 1-18-94 (Register 94, No. 3). A Certificate of Compliance must be transmitted to OAL by 5-18-94 or emergency language will be repealed by operation of law on the following day.
- 6. Certificate of Compliance as to 1–18–94 order transmitted to OAL 4–18–94 and filed 5–31–94 (Register 94, No. 22).
- 7. Repealer of subsection (b) filed 5–27–2004; operative 6–26–2004 (Register 2004, No. 22).

§ 3429. Sweetpotato Weevil Interior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers.

- (a) Pest. Sweetpotato weevil (Cylas formicarius elegantulus).
- (b) Area Under Ouarantine.
- (1) That portion of San Diego County bounded by a line drawn as follows: Beginning at the intersection of Sunset Cliffs Boulevard and Interstate Highway 8; then, easterly along Interstate Highway 8 to its intersection with Japatul Road; then, southwesterly along said road to its intersection with Lyons Valley Road; then, southwesterly along Lyons Valley Road to its intersection with Barrett Lake Road; then, southeasterly and southerly along Barrett Lake Road to its intersection with State Highway 94; then, southeasterly along said highway to its intersection with State Highway 188; then, southerly along State Highway 188 to its intersection with the United States—Mexico border; then, westerly along said border to its intersection with the Pacific Ocean coastline; then, northerly along said coastline to its intersection with the San Diego River; then, easterly along said river to its intersection with Sunset Cliffs Boulevard; then, southwesterly along said boulevard to the point of beginning.
 - (c) Articles and Commodities Covered.
- (1) Hosts. Sweet potato plants and all plant parts except seed and including vines, draws, and slips, and sweet potato roots, also called yams, camote, batatas, boniatos, buniatos, and moniato (*Ipomoea batatas*), and morning–glory plants (*Ipomoea* spp., *Calystegia* spp., and *Convolvulus* spp.).
- (2) Possible Carriers. Possible carriers include all appliances used in the growing, harvesting, processing, storage, and movement of hosts including, but not limited to field bins, trucks, tractors, harvesting equipment, and any other thing which the Department determines to be capable of spreading any stage of sweetpotato weevil.
 - (d) Restrictions.
- (1) Articles and commodities covered in subsection (c)(1) are prohibited movement within or from the area under quarantine except as provided in (A), (B), (C) or (D) below:
- (A) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities originated from a site or facility which is apparently free from sweetpotato weevil.
- (B) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities have been inspected or treated in a manner approved by the Department and are apparently free from sweetpotato weevil.
- (C) If purchased at a retail sales location and accompanied by a sales receipt.
- (D) If the article or commodity was produced outside the area under quarantine and is being moved through the area under quarantine by direct route and without delay in vehicles or containers which prevent spillage of the article or commodity while en route through the area.
- (2) Articles and commodities covered in subsection (c)(2) are prohibited movement within or from the area under quarantine except if cleaned and treated to the satisfaction of the county agricultural commissioner. NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.
- 1. New section filed 5-30-97 as an emergency; operative 5-30-97 (Register 97, No. 22). A Certificate of Compliance must be transmitted to OAL by 9-29-97 or emergency language will be repealed by operation of law on the following day. For prior history, see Register 94, No. 46.
- Certificate of Compliance as to 5–30–97 order transmitted to OAL 9–23–97 and filed 10–1–97 (Register 97, No. 40).

§ 3430. Karnal Bunt Disease Interior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers.

- (a) Pest. Karnal bunt disease (Tilletia indica).
- (b) Quarantine Area. The area under quarantine for Karnal bunt disease is:
- (1) That portion of Riverside County known as the Palo Verde Valley (in part) bounded by a line drawn as follows: Beginning at the intersection of Neighbours Boulevard and W Hobsonway; then, easterly along W Hobsonway to its intersection with Arrowhead Boulevard; then, northerly along said boulevard to its intersection with W 11th Avenue; then, east-

erly along said avenue to its intersection with Defrain Boulevard; then, northerly along said boulevard to its intersection with 10th Avenue; then, easterly along said avenue to its intersection with the south boundary line of Township 6 South, Range 23 East and Sections 23 and 24; then, easterly along the said south boundary line to its intersection with the California-Arizona State Line; then, southerly along said state line to its intersection with the south boundary line of Township 8 South, Range 22 and Sections 25, 26 and 27; then, westerly along the said south boundary line to its intersection with 36th Avenue; then, westerly along said avenue to its intersection with Stephenson Boulevard; then, northerly along said boulevard to its intersection with 34th Avenue; then westerly along said avenue to its intersection with Keim Boulevard; then, northerly along an imaginary line from said intersection to the intersection of 28th Avenue and Keim Boulevard; then, northerly along Keim Boulevard to its northern most point; then, from that said point northeasterly along an imaginary line to its intersection with the intersection of Stephenson Boulevard and W 14th Avenue; then, easterly along W 14th Avenue to its intersection with Neighbours Boulevard; then, northerly along said boulevard to the point of beginning.

- (c) Articles and Commodities Covered. The following are declared to be hosts and possible carriers of the disease:
- (1) Conveyances, including trucks, railroad cars, and other containers used to move wheat, durum wheat, or triticale;
- (2) Grain elevators/equipment/structures used for storing and handling wheat, durum wheat, and triticale;
 - (3) Milling products or byproducts, except flour;
- (4) Plants, or plant parts, including grain, seed, or straw of all varieties of the following species: wheat (*Triticum aestivum*); durum wheat (*Triticum durum*); and triticale (*Triticum aestivum* x *Secale cereale*);
 - (5) Root crops with soil;
 - (6) Soil from areas where field crops are produced;
- (7) Manure from animals that have fed on wheat, durum wheat, or triticale:
 - (8) Used bags, sacks and containers;
 - (9) Used farm tools;
 - (10) Used mechanized cultivating equipment;
 - (11) Used mechanized harvesting equipment;
 - (12) Used seed conditioning equipment;
 - (13) Used mechanized soil-moving equipment;
- (14) Any other product, article or means of conveyance when it is determined by the secretary that it presents a risk of spreading Karnal bunt disease due to its proximity to an infestation of Karnal bunt disease and the person in possession has been so notified.
 - (d) Restrictions.
- (1) Articles and commodities covered in subsection (c) are prohibited movement within or from portions (b)(1) and (b)(2) of the quarantine area from infested properties or if exposed to infestation by the disease except as provided in (A), (B) or (C) below:
- (A) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities have been:
 - 1. treated and inspected in a manner approved by the department;
- 2. grown, produced, manufactured, stored, or handled in a manner that would prevent infestation or destroy all life stages of Karnal bunt disease;
 - 3. tested and found free from Karnal bunt disease.
- (B) If accompanied by a permit issued by an authorized agricultural official specifying the article or commodity covered; the destination; the handling, utilization, or processing which is authorized; and the conditions under which this shall be conducted.
- (C) If the article or commodity is being moved from outside the quarantine area and is being moved through the quarantine area by direct route and without delay.
- (2) Seed, as specified in (c)(4), is prohibited movement from all portions of the quarantine area except as provided in (A), (B) or (C) below:
- (A) If accompanied by a certificate issued by an authorized agricultural official affirming that the seed has been:
 - 1. treated and inspected in a manner approved by the department;

- 2. grown, produced, manufactured, stored, or handled in a manner that would prevent infestation or destroy all life stages of Karnal bunt disease;
- 3. tested in a manner approved by the department and found free from Karnal bunt disease.
- (B) If accompanied by a permit issued by an authorized agricultural official specifying the commodity covered; the destination; the handling, utilization, processing which is authorized; and the conditions under which this shall be conducted.
- (C) If the seed is being moved from outside the quarantine area and is being moved through the quarantine area by direct route and without delay.

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322. Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- New section filed 4–5–96 as an emergency; operative 4–5–96 (Register 96, No. 14). A Certificate of Compliance must be transmitted to OAL by 8–5–96 or emergency language will be repealed by operation of law on the following day.
- New subsection (b)(2) filed 4–10–96 as an emergency; operative 4–10–96 (Register 96, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–8–96 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–10–96 order transmitted to OAL 8–8–96 and filed 9–4–96 (Register 96, No. 36).
- Editorial correction of subsections (a) and (c)(4) and HISTORY 1 (Register 96, No. 38).
- 5. Certificate of Compliance as to 4–5–96 order transmitted to OAL 8–5–96 and filed 9–16–96 (Register 96, No. 38).
- 6. Amendment of subsections (b)(1) and (b)(2), new subsection (b)(3), amendment of subsections (d)(1) and (d)(1)(A)1., and new subsections (d)(2)-(d)(2)(C) filed 5-1-97 as an emergency; operative 5-1-97 (Register 97, No. 18). A Certificate of Compliance must be transmitted to OAL by 8-29-97 or emergency language will be repealed by operation of law on the following day.
- 7. Certificate of Compliance as to 5–1–97 order transmitted to OAL 8–7–97 and filed 9–9–97 (Register 97, No. 37).
- 8. Repealer of subsection (b)(3) filed 7–2–2001 as an emergency; operative 7–2–2001 (Register 2001, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–30–2001 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7-2-2001 order transmitted to OAL 10-30-2001 and filed 11-28-2001 (Register 2001, No. 48).
- 10. Amendment of subsection (b)(1) and repealer of subsection (b)(2) filed 2–17–2004 as an emergency; operative 2–17–2004 (Register 2004, No. 8). A Certificate of Compliance must be transmitted to OAL by 6–16–2004 or emergency language will be repealed by operation of law on the following day.
- 11. Certificate of Compliance as to 2-17-2004 order transmitted to OAL 5-21-2004 and filed 7-6-2004 (Register 2004, No. 28).
- 12. Amendment of subsection (b)(1) filed 9–22–2004 as an emergency; operative 9–22–2004 (Register 2004, No. 39). A Certificate of Compliance must be transmitted to OAL by 1–20–2005 or emergency language will be repealed by operation of law on the following day.
- 13. Amendment of subsection (b)(1) filed 2–2–2005 as an emergency; operative 2–2–2005 (Register 2005, No. 5). A Certificate of Compliance must be transmitted to OAL by 6–2–2005 or emergency language will be repealed by operation of law on the following day.
- 14. Certificate of Compliance as to 9-22-2004 order transmitted to OAL 1-13-2005 and filed 2-28-2005 (Register 2005, No. 9).
- 15. Certificate of Compliance as to 2-2-2005 order transmitted to OAL 5-16-2005 and filed 6-22-2005 (Register 2005, No. 25).

§ 3431. Olive Fruit Fly Interior Quarantine.

NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultural Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- 1. New section filed 11-19-98 as an emergency; operative 11-19-98 (Register 98, No. 47). A Certificate of Compliance must be transmitted to OAL by 3-19-99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 11–19–98 order transmitted to OAL 3–15–99 and filed 4–26–99 (Register 99, No. 18).
- 3. Repealer filed 6–20–2002; operative 7–20–2002 (Register 2002, No. 25).

§ 3432. Red Imported Fire Ant Interior Quarantine.

A quarantine is established against the following pest, its hosts, and possible carriers:

- (a) Pest. Red imported fire ant (Solenopsis invicta).
- (b) Quarantine Area. The area under quarantine for red imported fire ant in California is:

- (1) The entire county of Orange.
- (2) Los Angeles County:
- (A) That portion of the county in the Cerritos area bounded by a line drawn as follows: Beginning at the intersection of Artesia Boulevard and Marquardt Avenue; then, southerly along said avenue to its intersection with the Los Angeles—Orange County Line; then, southerly and westerly along said line to its intersection with Carson Street; then, westerly along said street to its intersection with Norwalk Boulevard; then, northerly along said boulevard to its intersection with Pioneer Boulevard; then, northerly along said boulevard to its intersection with South Street; then, easterly along said boulevard to its intersection with Norwalk Boulevard; then, northerly along said boulevard to its intersection with 183rd Street; then, easterly along said street to its intersection with Bloomfield Avenue; then, northerly along said avenue to its intersection with Artesia Boulevard; then, easterly along said boulevard to the point of beginning.
- (B) That portion of the county in the Azusa area bounded by a line drawn as follows: Beginning at the intersection of Foothill Boulevard and Irwindale Avenue; then, easterly along said boulevard to its intersection with Azusa Avenue; then, southerly along said avenue to its intersection with East Fifth Street; then easterly along said street to its intersection with North Cerritos Avenue; then, southerly along said avenue to its intersection with Arrow Highway; then, westerly along said highway to its intersection with Azusa Avenue; then southerly along said avenue to its intersection with Covina Boulevard; then, westerly along an imaginary line from said intersection to the intersection of Irwindale Avenue and Martinez Street; then, northerly along said avenue to the point of beginning.
 - (3) Riverside County:
- (A) That portion of the county in the Moreno Valley area bounded by a line drawn as follows: Beginning at the intersection of Reche Vista Drive and Canyon Ranch Road; then, southeasterly along Canyon Ranch Road to its intersection with Valley Ranch Road; then, easterly along Valley Ranch Road to its intersection with Michael Way; then, southerly along said way to its intersection with Casey Court; then, easterly along said court to its intersection with the Moreno Valley City Limits; then, southerly and easterly along said city limits to its intersection with Pico Vista Way; then, southwesterly along said way to its intersection with Los Olivos Drive; then, southerly along said drive to its intersection with Jaclyn Avenue; then, westerly along said avenue to its intersection with Perris Boulevard; then, southerly along said boulevard to its intersection with Kalmia Avenue; then, westerly along said avenue to its intersection with Hubbard Street; then, northerly along said street to its intersection with Nightfall Way; then, westerly and southerly along said way to its intersection with Sundial Way; then, westerly along Sundial Way to its intersection with Indian Avenue; then, southerly along said avenue to its intersection with Ebbtide Lane; then, westerly along said lane to its intersection with Ridgecrest Lane; then, southerly along Ridgecrest Lane to its intersection with Moonraker Lane; then, westerly along Moonraker Lane to its intersection with Davis Street; then, southerly along said street to its intersection with Greogory Lane; westerly along said lane to its intersection with Heacock Street; then, northwesterly from said intersection along an imaginary line to the intersection of Lake Valley Drive and Breezy Meadow Drive; then, northwesterly along Breezy Meadow Drive to its intersection with Stony Creek; then, northeasterly from said intersection along an imaginary line to the intersection of Old Lake Drive and Sunnymead Ranch Parkway; then, northwesterly along said parkway to its intersection with El Granito Street; then, easterly along said street to its intersection with Lawless Road; then, easterly from said intersection along an imaginary line to the intersection of Heacock Street and Reche Vista Drive; then, northerly along said drive to the point of beginning.
- (B) That portion of the county in the Indio area bounded by a line drawn as follows: Beginning at the intersection of Avenue 50 and Jackson Street; then, southerly along said street to its intersection with 54th Avenue; then, westerly along said avenue to its intersection with Madi-

son Street; then, northerly along said street to its intersection with Avenue 50; then, easterly along said avenue to the point of beginning.

(C) That portion of the county in the Rancho Mirage, Palm Desert, and Bermuda Dunes areas bounded by a line drawn as follows: Beginning at the intersection of Ramon Road and Bob Hope Drive; southerly along said drive to its intersection with Dinah Shore Drive; then, easterly along Dinah Shore Drive to its intersection with Key Largo Avenue; then, southerly along said avenue to its intersection with Gerald Ford Drive; then, westerly along said drive to its intersection with Bob Hope Drive; then, southerly along Bob Hope Drive to its intersection with Frank Sinatra Drive; then easterly along Frank Sinatra Drive to its intersection with Vista Del Sol; then, southerly along Vista Del Sol to its intersection with Country Club Drive; then, easterly along said drive to its intersection with Adams Street; then, southerly along said street to its intersection with 42nd Avenue; then, easterly along said avenue to its intersection with Tranquillo Place; then, southerly along said place to its intersection with Harbour Court; then, southwesterly from said intersection along an imaginary line to the intersection of Granada Drive and Caballeros Drive; then, southeasterly along Caballeros Drive to its intersection with Kingston Drive; then, westerly along Kingston Drive to its intersection with Mandeville Road; then, easterly along said road to its intersection with Port Maria Road; then, southerly along Port Maria Road to its intersection with Fred Waring Drive; then, westerly along said drive to its intersection with the Dune Palms Road; then, southwesterly from said intersection along an imaginary line to the intersection of Adams Street and Miles Avenue; then, westerly along said avenue to its intersection with Washington Street; then, northwesterly along said street to its intersection with Fred Waring Drive; then, westerly along said drive to its intersection with Joshua Road; then, northerly along said road to its intersection with Park View Drive; then, westerly along said drive to its intersection with State Highway 111; then, northwesterly along said highway to its intersection with Magnesia Fall Drive; then, westerly along said drive to its intersection with Gardess Road; then, northwesterly along said road to its intersection with Dunes View Road; then, northeasterly along Dunes View Road to its intersection with Halgar Road; then, northwesterly along Halgar Road to its intersection with Indian Trail Road; then, northeasterly along Indian Trail Road to its intersection with Mirage Road; then, northerly along Mirage Road to its intersection with State Highway 111; then, northwesterly along said highway to its intersection with Frank Sinatra Drive; then, easterly along said drive to its intersection with Da Vall Drive; then, northerly along said Da Vall Drive to its intersection with Ramon Road; then, easterly along said road to the point of beginning.

(D) That portion of the county in the Palm Springs area bounded by a line drawn as follows: Beginning at the intersection of State Highway 111 and and San Rafael Drive; then, easterly along said drive to its intersection with Indian Canyon Drive; then, southerly along Indian Canyon Drive to its intersection with Francis Drive; then, easterly along Francis Drive to its intersection with North Farrell Drive; then southerly along North Farrell Drive to its intersection with Verona Road; then, easterly along said road to its intersection with Whitewater Club Drive; then, easterly along an imaginary line from said intersection to the intersection of Verona Road and Ventura Drive; then, easterly along said road to its intersection with Avenida Maravilla; then, easterly and southerly along said avenida to its intersection with 30th Avenue; then, westerly along said avenue to its end; then, due west along an imaginary line from the end of 30th Avenue to its intersection with the Whitewater River; then, southeasterly along said river to its intersection with Dinah Shore Drive; then, westerly from said intersection along an imaginary line to the east end of 34th Avenue; then, westerly along said avenue to its intersection with Golf Club Drive; then, southerly along said drive to its intersection with East Palm Canyon Drive; then, southerly from said intersection along an imaginary line to the intersection of Desterto Vista and Palm Hills Drive; then, southerly along said drive to its end; then, southwesterly along an imaginary line from the end of said drive to the intersection of Murray Canyon and Palm Canyon Drive; then, northwesterly along said drive to its intersection with the Palm Springs City Limits; then westerly and northerly along said city limits to its intersection with Tahquitz Creek; then, due north from said intersection along an imaginary line to its intersection with Tramway Road; then, northeasterly along said road to the point of beginning.

- (c) Commodities Covered.
- (1) Imported fire ant queens and reproducing colonies of imported fire ants.
- (2) Soil, separately or with other articles, except when commercially packaged. For the purpose of this section, soil shall include all growing media
 - (3) Baled hay and baled straw stored in direct contact with the ground.
- (4) Plants and sod with roots and soil attached, except privately owned house plants maintained indoors and not for sale.
- (5) Used soil-moving equipment, unless free of all noncompacted soil.
- (6) Any other product, article, or means of conveyance when it is determined by the department or county agricultural commissioner to present a hazard of spreading live red imported fire ant and the person in possession thereof has been so notified.
- (d) Restriction on Movement, Possession and Sale of Commodities Covered
- (1) Movement of Commodities Covered; Commercial Production and Wholesale Distribution. It is unlawful to move within or from the quarantine area a commercial shipment of any commodity covered at the production or wholesale level, except when certified by the department or county agricultural commissioner in accordance with the following provisions:
- (A) The commodity was treated in a manner approved by the department to eliminate all live red imported fire ant; or,
- (B) The commodity was inspected and determined to be free from all life stages of the red imported fire ant; or,
- (C) The commodity has been grown, produced, manufactured, stored, or handled in a manner that would prevent infestation by or destroy all life stages of the imported fire ant; or,
- (D) The commodity was produced outside the quarantine area and is being transported:
- 1. through the area by direct route and without delay in closed vehicles or containers to preclude infestation by red imported fire ant; or
- 2. under permit of the department specifying conditions to preclude infestation by red imported fire ant.
- (2) Movement of Commodities Covered from Commercial Sources; Retail Level. Retail size purchases of commodities covered obtained from commercial retail sources may be moved into, within or from the quarantine area, if the person in possession has a sales slip or other comparable document showing the purchase was made from a commercial retail establishment. Other transportation of such commodities is prohibited.
- (3) Movement of Commodities Covered; Not from Commercial Sources.
- (A) Within the quarantine area, to a specified destination for specified handling, utilization, or processing (the destination and other conditions to be listed in a permit issued by the department or county agricultural commissioner), and this movement will not result in the spread of the imported fire ant, because the imported fire ant will be destroyed by the specified handling, utilization, or processing;
- (B) Within the quarantine area, no commodity covered shall be moved from the origin premises without a certificate or permit issued by the department or county agricultural commissioner;
- (C) Commodities covered not obtained from commercial sources may be transported into the quarantine area only if the person in possession has a signed statement showing the commodity, amount, place of origin, destination and date of transportation.
- (4) Restrictions on Wholesale and Retail Sales. Within the quarantine area, no wholesale or retail establishment shall handle, sell or offer for

sale any commodity covered unless such commodities at all times are maintained in a manner approved by the department to preclude infestation by red imported fire ant.

(5) No person shall transport, possess, handle or sell any commodity covered in violation of the provisions of this section. No person shall knowingly prepare, possess, or use any false document, or knowingly make any false statement to any enforcement officer, in connection with the possession, sale or transportation of any commodity covered. NOTE: Authority cited: Sections 407, 5301, 5302 and 5322, Food and Agricultura Code. Reference: Sections 5301, 5302 and 5322, Food and Agricultural Code.

HISTORY

- New section filed 2-4-99 as an emergency; operative 2-4-99 (Register 99, No. 6). A Certificate of Compliance must be transmitted to OAL by 6-4-99 or emergency language will be repealed by operation of law on the following day.
- 2. New subsections (b)(2)–(b)(2)(A) filed 2–11–99 as an emergency; operative 2–11–99 (Register 99, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–11–99 or emergency language will be repealed by operation of law on the following day.
- 3. New subsections (b)(3)–(b)(3)(C) filed 2–11–99 as an emergency; operative 2–11–99 (Register 99, No. 7). A Certificate of Compliance must be transmitted to OAL by 6–11–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–4–99 order transmitted to OAL 6–4–99 and filed 7–19–99 (Register 99, No. 30).
- Certificate of Compliance as to first 2–11–99 order transmitted to OAL 6–4–99 and filed 7–19–99 (Register 99, No. 30).
- Certificate of Compliance as to second 2-11-99 order transmitted to OAL 6-4-99 and filed 7-19-99 (Register 99, No. 30).
- 7. New subsection (b)(2)(B) filed 8-19-99 as an emergency; operative 8-19-99 (Register 99, No. 34). A Certificate of Compliance must be transmitted to OAL by 12-17-99 or emergency language will be repealed by operation of law on the following day.
- 8. New subsection (b)(3)(D) filed 8–19–99 as an emergency; operative 8–19–99 (Register 99, No. 34). A Certificate of Compliance must be transmitted to OAL by 12–17–99 or emergency language will be repealed by operation of law on the following day.
- 9. Editorial correction of subsection (b)(3)(A) (Register 2000, No. 4).
- 10. Certificate of Compliance as to 8–19–99 order (amending subsection (b)(3)(D)) transmitted to OAL 12–17–99 and filed 1–25–2000 (Register 2000, No. 4).
- 11. Certificate of Compliance as to 8–19–99 order (amending subsection (b)(2)(B)) transmitted to OAL 12–17–99 and filed 1–28–2000 (Register 2000, No. 4).

§ 3433. Diaprepes Root Weevil Interior Quarantine.

A quarantine is established against the following pest, its hosts and possible carriers.

- (a) Pest. Diaprepes Root Weevil (Diaprepes abbreviatus).
- (b) Area Under Quarantine.
- (1) In the County of Los Angeles:
- (A) In the Long Beach area: Beginning at the intersection of E. 7th Street and State Highway 1; then, southeasterly along State Highway 1 to its intersection with E. 2nd Street; then, southwesterly, northwesterly and westerly along E. 2nd Street to its intersection with Mira Mar Avenue; then, northerly along Mira Mar Avenue to its intersection with E. 4th Street; then, easterly along E. 4th Street to its intersection with Termino Avenue; then, northerly along Termino Avenue to its intersection with E. 7th Street; then, easterly along E. 7th Street to the point of beginning.
- (B) In the La Mirada area: Beginning at the intersection of La Mirada Boulevard and Alicante Road; then, easterly along Alicante Road to it intersection with the western boundary line of Behringer Park; then, southerly and easterly along the boundary line of Behringer Park to its intersection with the boundary line of Los Angeles and Orange counties; then, southerly along said boundary line to its intersection with State Highway 39; then, southwesterly along State Highway 39 to its intersection with Rosecrans Avenue; then, easterly along Rosecrans Avenue to its intersection with the boundary line of Ralph B. Clark Regional Park; then, easterly and southerly along said boundary line to its intersection with Buena Tierra Place; then, westerly along Buena Tierra Place to its intersection with Los Coyotes Drive; then, southeasterly, southerly and southeasterly along Los Coyotes Drive to its intersection with Country Club Drive; than, southwesterly along Country Club Drive to its intersection

with La Mirada Boulevard; then, northwesterly along La Mirada Boulevard to the point of beginning.

- (2) In the County of Orange:
- (A) In the Newport Beach area: Beginning at the intersection of East Bluff Drive and University Drive; then, northeasterly along University Drive to its intersection with the southern boundary of Bonita Creek Park; then, southerly, easterly and northerly along said park boundary to its intersection with State Highway 73; then, southerly and southeasterly along said highway to its intersection with Bonita Canyon Drive; then, southwesterly along Bonita Canyon Drive to its intersection with Prairie Road; then, southerly and westerly along Prairie Road to its intersection with San Miguel Drive; then, southerly and southwesterly along San Miguel Drive to its intersection with Joaquin Hills Road; then, northwesterly along San Joaquin Hills Road to its intersection with Jamboree Road; then, northeasterly along Jamboree Road to its intersection with East Bluff Drive; then, northwesterly, northerly and northeasterly along East Bluff Drive to the point of beginning.
- (B) In the Newport Beach (West) area: Beginning at the intersection of Dover Drive and Irvine Avenue; then, northeasterly along Irvine Avenue to its intersection with E 20th Street; then, northwesterly along E 20th Street to its intersection with Fullerton Avenue; then, northeasterly along Fullerton Avenue to its intersection with E Bay Street; then, northwesterly along E Bay Street to its intersection with W Bay Street; then, northwesterly along W Bay Street to its intersection with Thurin Street; then, northerly along Thurin Street to its intersection with Victoria Street; then, easterly and southeasterly along Victoria Street to its intersection with Newport Boulevard; then, northeasterly along Newport Boulevard to its intersection with Vanguard Way; then, southeasterly along Vanguard Way to its intersection with Santa Isabel Avenue; then, southeasterly along Santa Isabel Avenue to its intersection with Irvine Avenue; then, southwesterly, southerly, southwesterly, southerly and southwesterly along Irvine Avenue to its intersection with the boundary line of Upper Newport Bay Regional Park; then, southeasterly, northeasterly, southeasterly, southwesterly, southeasterly, northeasterly, southeasterly, southerly, southwesterly, easterly, southwesterly, southerly, easterly, southeasterly, southwesterly, westerly, southwesterly, southeasterly, southwesterly, easterly, southwesterly and southeasterly along the boundary line of Upper Newport Bay Regional Park until its intersection with the shoreline of Upper Newport Bay; then, southerly, northwesterly, southwesterly, southeasterly, southwesterly, westerly, northwesterly, southerly, easterly, southerly, westerly and southwesterly along the shoreline of Upper Newport Bay until its intersection with the boundary line of Castaways Park; then, northwesterly along the boundary line of Castaways Park to its intersection with Dover Drive; then, northeasterly along Dover Drive to its intersection with Westcliff Drive N; then, northwesterly along Westcliff Drive N to its intersection with Irvine Avenue; then, northeasterly along Irvine Avenue to the point of beginning.
- (C) In the Yorba Linda area: Beginning at the intersection of Village Center Drive and Yorba Linda Boulevard; then, northerly and northeasterly along Village Center Drive to its intersection with Manzanita Avenue; then, southeasterly, easterly and northeasterly along Manzanita Avenue to its intersection with Cork Circle; then, northeasterly along Cork Circle to its northeastern most point; then, along an imaginary line from the northeastern most point of Cork Circle to its intersection with the northwestern most point of Alder Avenue; then, southeasterly along Alder Avenue to its intersection with San Antonio Road; then, southerly along San Antonio Road to its intersection with Yorba Linda Boulevard; then, easterly and southeasterly along Yorba Linda Boulevard to its intersection with Via De La Escuela; then, southwesterly and westerly along Via De La Escuela to its intersection with Dominguez Ranch Road; then, southerly and southwesterly along Dominguez Ranch Road to its intersection with Trailside Drive; then, westerly along Trailside Drive to its intersection with Yorba Ranch Road; then, southerly along Yorba Ranch Road to its intersection with E Esperanza Road; then, southwesterly along E Esperanza Road to its intersection with Fairmont Boulevard; then, northwesterly along Fairmont Boulevard to its intersection with Pa-

seo De Las Palomas; then, northeasterly and easterly along Paseo De Las Palomas to its intersection with Village Center Drive; then, northerly, northeasterly and northerly along Village Center Drive to the point of the beginning.

(D) In the Huntington Beach area: Beginning at the intersection of the Pacific Coast Highway and Warner Avenue; then, easterly, northerly and easterly along Warner Avenue to its intersection with Edwards Street; then southerly along Edwards Street to its intersection with the northwest border line of Harriett Weder Regional Park; then, northwesterly, southwesterly, southerly, southwesterly, southwesterly, southwesterly, southwesterly, southwesterly, southwesterly along the border line of Harriett Weder Regional Park to its intersection with the Pacific Coast Highway; then, northwesterly along the Pacific Coast Highway to the point of beginning.

(3) In the County of San Diego:

(A) In the Encinitas area: Beginning at the intersection of Encinitas Creek and Calle Acervo; then, northerly along Calle Acervo to its intersection with Camino Lindo; then, northeasterly along an imaginary line from the intersection of Calle Acervo and Camino Lindo to its intersection with the western most point of Dusty Trail; then, easterly along Dusty Trail to its eastern most point; then, northeasterly along an imaginary line from the eastern most point of Dusty Trail to its intersection with the northwestern most point of Cantle Lane; then, southeasterly and southerly along Cantle Lane to its intersection with Lone Hill Lane; then, northeasterly, southeasterly and southerly along Lone Hill Lane to its intersection with Lone Hill Estates Court; then, easterly, northerly, easterly, northerly, easterly and northerly along Lone Hill Estates Court to its intersection with Williams Trail; then, easterly along Williams Trail to its intersection with Rancho Summit Drive; then, southerly and southeasterly along Rancho Summit Drive to its intersection with Canyon De Oro; then, southwesterly along Canyon De Oro to its intersection with Fortuna Ranch Road; then, southwesterly along Fortuna Ranch Road to its intersection with Adams Run; then, southeasterly along an imaginary line to its intersection with the northern most point of Calle Ponte Bella; then, southerly, southwesterly and southeasterly along Calle Ponte Bella to its intersection with Escondido Creek; then, northeasterly, southeasterly and northeasterly along Escondido Creek to its bifurcation; then, northeasterly along an imaginary line to the northwestern most point of Seven Bridges Road; then, southeasterly, southerly and southeasterly along Seven Bridges Road to its intersection with Vista Cascada; then southwesterly, southeasterly and southerly along Vista Cascada to its intersection with Aliso Canyon Road; then, westerly and southerly along Aliso Canyon Road to its intersection with El Camino Del Norte; then, westerly, southwesterly and northwesterly along El Camino Del Norte to its intersection with Via De Fortuna; then, southerly, southwesterly, southerly and southwesterly along Via De Fortuna to its intersection with Los Mirlitos; then, southeasterly and easterly along Los Mirlitos to its eastern most point; then, easterly along an imaginary line to its intersection with the northwestern most point of Loma Linda Drive; then, southeasterly along Loma Linda Drive to its intersection with San Elijo Avenue; then, northeasterly along San Elijo Avenue to its intersection with Avenida De Acacias; then, southerly, southwesterly and southerly along Avenida De Acacias to its intersection with Via De La Cumbre; then, southeasterly along an imaginary line to its intersection with the intersection of La Valle Plateada and Paseo Delicias; then, southwesterly along Paseo Delicias to its intersection with Las Colinas; then, southeasterly, southerly, southeasterly, southwesterly and southeasterly along Las Colinas to its intersection with El Zorro Vis; then, southeasterly and southwesterly along El Zorro Vis to its southwestern most point; then, southwesterly along an imaginary line to its intersection with the northern most point of La Via Feliz; then, southerly along La Via Feliz to its intersection with El Sicomoro; then, easterly along El Sicomoro to its intersection with Via A La Casa; then, southeasterly along an imaginary line from said intersection to its intersection with the western most point of Via Barranca Del Zorro; then, easterly along Via Barranca Del Zorro to its intersection with Calle Camposeco; then, southerly and southeasterly along Calle Camposeco to its intersection with Circa Del Norte; then, northeasterly and southeasterly along Circa Del Norte to its intersection with San Dieguito Road; then, easterly and southeasterly along San Dieguito Road to its intersection with Camino Del Sur; then, southwesterly, southeasterly, easterly, southeasterly, southerly, southwesterly and southerly along Camino Del Sur to its intersection with State Highway 56; then, northwesterly, westerly and southwesterly along State Highway 56 to its intersection with Rancho Santa Fe Farms Road; then, northerly along Rancho Santa Fe Farms Road to its intersection with Carmel Valley Road; then, starting southwesterly along Carmel Valley Road to its intersection with State Highway 56; then, southeasterly along an imaginary line to the northeastern most point of Anderson Ridge Place; then, starting southwesterly along Anderson Ridge Place to its intersection with Del Mar Mesa Road; then, southwesterly along an imaginary line to its intersection with -117.19367 Longitude and 32.94122 Latitude; then, starting westerly along Meadows Del Mar to its intersection with Del Mar Meadows Road; then, starting southwesterly along Del Mar Meadows Road to its intersection with Carmel Country Road; then, starting southerly along Carmel Country Road to its intersection with Carmel Mountain Road; then, southwesterly, westerly and southwesterly along Carmel Mountain Road to its intersection with Harvest Run Drive: then, southeasterly, southerly and southeasterly along Harvest Run Drive to its southeastern most point; then, southerly along an imaginary line to its intersection with the boundary line of Los Penasquitos Canyon Preserve; then, southwesterly, southeasterly, southwesterly, northwesterly, southwesterly, northwesterly, southeasterly, southerly, southeasterly, southwesterly, southerly, southeasterly, southwesterly, southeasterly, southwesterly, southeasterly and northwesterly along the boundary line of Los Penasquitos Canyon Preserve to its intersection with Sorrento Valley Boulevard; then, southwesterly along Sorrento Valley Boulevard to its intersection with U.S. Interstate 805; then southeasterly along U.S. Interstate 805 to its intersection with Governor Drive; then, southwesterly, westerly, northwesterly, westerly, southwesterly and westerly along Governor Drive to its intersection with Regents Road; then, northerly and northwesterly along Regents Road to its intersection (over crossing) with the "Coaster" (Amtrak) railroad tracks; then, southwesterly, southerly and southeasterly along said railroad tracks to its intersection with State Highway 52; then, westerly along State Highway 52 to its intersection with Ardath Road; then, northwesterly along Ardath Road to its intersection with Hidden Valley Road; then, southerly, easterly, southerly, southwesterly, southeasterly, easterly, southeasterly and southerly along Hidden Valley Road to its intersection with Via Capri; then, northwesterly, southwesterly, northwesterly, southwesterly, southeasterly, southerly and southeasterly along Via Capri to its intersection with La Jolla Scenic Drive S; then, southwesterly along La Jolla Scenic Drive S to its intersection with Cardeno Drive; then, southeasterly, southerly, southwesterly, southeasterly and southwesterly along Cardeno Drive to its intersection with Calle Vaquero; then, southeasterly and northeasterly along Calle Vaquero to its intersection with Westknoll Drive; then, southeasterly, southwesterly and southeasterly along Westknoll Drive to its intersection with Vickie Drive; then, southwesterly along Vickie Drive to its intersection with Yost Drive; then, easterly and northeasterly along Yost Drive to its intersection with Windsor Drive; then, southeasterly, southwesterly, southerly and southeasterly along Windsor Drive to its intersection with Loring Street; then, southwesterly along Loring Street to its intersection with Foothill Boulevard; then, southeasterly along Foothill Boulevard to its intersection with Loring Street; then, southwesterly along Loring Street to its intersection with Gresham Street; then, southeasterly along Gresham Street to its intersection with Wilbur Avenue; then, southwesterly along Wilbur Avenue to its intersection with Mission Boulevard; then, northwesterly along Mission Boulevard to its intersection with La Jolla Mesa Drive; then, northwesterly along La Jolla Mesa Drive to its intersection with Linda Rosa Avenue; then, northwesterly along Linda Rosa Avenue to its intersection with Forward Street; then, southwesterly along Forward Street to its intersection with Bellevue Avenue; then, northwesterly along Bellevue Avenue to its intersection with Folsom Drive; then, northeasterly and northwesterly along Folsom Drive to its intersection with Bellevue Avenue; then, northwesterly along Bellevue Avenue to its intersection with Waverly Avenue; then, northwesterly along Waverly Avenue to its intersection with Via Del Norte; then, southwesterly, northwesterly and southwesterly along Via Del Norte to its intersection with La Jolla Boulevard; then, northwesterly, northerly, northeasterly and northwesterly along La Jolla Boulevard to its intersection with Westbourne Street; then, southwesterly along Westbourne Street to its intersection with the boundary line of Neptune Park; then, northwesterly and northeasterly along the boundary line of Neptune Park to its intersection with the coastline of California; then, northerly, northeasterly, northerly, northeasterly, southeasterly, northeasterly, southeasterly and northeasterly along the coastline of California to its intersection with the southern boundary line of the UC San Diego campus; then, easterly along the boundary line of the UC San Diego campus to its intersection with La Jolla Shores Drive; then, northeasterly, northerly, northeasterly, southeasterly and northeasterly along La Jolla Shores Drive to its intersection with N Torrey Pines Road; then, northwesterly and northerly along N Torrey Pines Road to its intersection with Torrey Pines Scenic Drive; then, northwesterly along Torrey Pines Scenic Drive to its intersection with the boundary line of Torrey Pines City Park; then, southwesterly, southeasterly, southerly, westerly, southwesterly, northerly, and northwesterly along the boundary line of Torrey Pines City Park to its intersection with the boundary line of Torrey Pines State Reserve; then, northerly along the boundary line of Torrey Pines State Reserve to its intersection with N Torrey Pines Road; then, northerly along N Torrey Pines Road to its intersection with S Camino Del Mar; then, northerly along S Camino Del Mar to its intersection with the Amtrak railroad tracks; then, northerly along the Amtrak railroad tracks to its intersection with Coast Boulevard; then, southerly along Coast Boulevard to its intersection with 15th Street; then, northeasterly, southeasterly, northeasterly, northwesterly and northeasterly along 15th Street to its intersection with Crest Road; then, southeasterly from said intersection along an imaginary line to its intersection with Oribia Road and San Dieguito Drive; then, northerly, northeasterly and southeasterly along San Dieguito Drive to its intersection with the boundary line of Crest Canyon Open Space Park; then, easterly, southerly, easterly, southerly, easterly and northeasterly along the boundary line of Crest Canyon Open Space Park to its intersection with the boundary line of Overlook Park; then, northerly, northeasterly, easterly, southerly, southwesterly, and southerly along the boundary line of Overlook Park to its intersection with High Bluff Drive; then, easterly along High Bluff Drive to its intersection with Landfair Road; then, northerly, northeasterly and southeasterly along Landfair Road to its intersection with Half Mile Drive; then, easterly along Half Mile Drive to its intersection with El Camino Real; then, northwesterly, northerly, northeasterly and northerly along El Camino Real to its intersection with Via De La Valle; then, northeasterly, northerly and northeasterly along Via De La Valle to its intersection with Las Palomas; then, northwesterly along Las Palomas to its intersection with Puerta Del Sol; then, northwesterly along Puerta Del Sol to its intersection with Linea Del Cielo; then, northerly, northeasterly and northerly along Linea Del Cielo to its intersection with Rambla De Las Flores; then, northwesterly, southwesterly, northwesterly, northerly, northeasterly, northerly and northeasterly along Rambla De Las Flores to its intersection with La Granada; then, northwesterly along La Granada to its intersection with Los Morros; then, southwesterly along Los Morros to its intersection with El Aspecto; then, northwesterly along El Aspecto to its northwestern most point; then, westerly along an imaginary line to its intersection with the southwestern most point of Los Pinos; then, northeasterly and northwesterly along Los Pinos to its intersection with La Noria; then, southwesterly along La Noria to its intersection with El Puente; then, northwesterly, northerly, northwesterly and northerly along El Puente to its intersection with Escondido Creek; then, northeasterly, southeasterly, northeasterly, northwesterly, northeasterly and northeasterly along Escondido Creek to its intersection with S Rancho Santa Fe Road; then, northwesterly along S Rancho Santa Fe Road to its intersection with

Rancho Santa Fe Road; then, northeasterly along Rancho Santa Fe Road to its intersection with 11th Street; then, northwesterly along 11th Street to its northern most point; then, northwesterly along an imaginary line from the northern most point of 11th Street to its intersection with Whitewood Place and Mountain Vista Drive; then, southwesterly, westerly, southwesterly and westerly along Mountain Vista Drive to its intersection with N El Camino Real; then, northerly along N El Camino Real to its intersection with Olivenhain Road; then, southeasterly, easterly and northeasterly along Olivenhain Road to its intersection with Rancho Santa Fe Road; then, southeasterly along Rancho Santa Fe Road to its intersection with Encinitas Creek; then, northeasterly along Encinitas Creek to the point of beginning.

(B) In the Carlsbad area: Beginning at the intersection of Ambrosia Lane and Poinsettia Lane; then, southeasterly along Poinsettia Lane to its intersection with Cassia Road; then, northeasterly along Cassia Road to its intersection with La Costa Boulevard; then, easterly, northeasterly and easterly along La Costa Boulevard to its intersection with El Camino Real; then, southerly along El Camino Real to its intersection with Carillo Way; then, northeasterly along Carillo Way to its intersection with El Fuerte Street; then, southerly, southeasterly, southerly, southwesterly along El Fuerte Street to its intersection with Babilonia Street; then, southerly along an imaginary line from said intersection to its intersection with the intersection of Romeria Street and Gibralter Street; then, southwesterly and southerly along Gibraltar Street to its intersection with La Costa Avenue; then, southwesterly, westerly, northwesterly, westerly, southwesterly and westerly along La Costa Avenue to its intersection with El Camino Real; then, northwesterly and northeasterly along El Camino Real to its intersection with Arenal Road; then, northwesterly and southwesterly along Arenal Road to its intersection with Columbine Drive; then, northwesterly and northerly along Columbine Drive to its intersection with Geranium Avenue; then, northwesterly and southwesterly along Geranium Avenue to its intersection with Mimosa Drive; then, northwesterly along Mimosa Drive to its intersection with Lupine Road; then, southwesterly along Lupine Road to its intersection with Hummingbird Road; then, westerly and northwesterly along Hummingbird Road to its intersection with Batiquitos Drive; then, northerly and northwesterly along Batiquitos Drive to its intersection with Baccharis Avenue; then, northeasterly, easterly and northerly along Baccharis Avenue to its intersection with Sand Aster Drive; then, northwesterly and northerly along Sand Aster Drive to its intersection with Cormorant Avenue; then, easterly along Cormorant Avenue to its intersection with Ambrosia Lane; then, northerly, northwesterly and northeasterly along Ambrosia Lane to the point of beginning.

(C) In the Oceanside area: Beginning at the intersection of S Pacific Street and Oceanside Boulevard; then, northeasterly along Oceanside Boulevard to its intersection with US Interstate 5; then, southeasterly along US Interstate 5 to its intersection with Jefferson Street; then, southwesterly, southerly and southwesterly along Jefferson Street to its intersection with Laguna Drive; then, westerly along Laguna Drive to its intersection with State Street; then, northwesterly along State Street to its intersection with Carlsbad Boulevard; then, northwesterly along Carlsbad Boulevard to its intersection with S Hill Street; then, northwesterly along S Hill Street to its intersection with Eaton Street; then southwesterly along Eaton Street to its southern point; then, southwesterly along an imaginary line (crossing railroad tracks) to its intersection with the northern point of Eaton Street; then, southwesterly along Eaton Street to its intersection with S Pacific Street; then, northwesterly along S Pacific Street to the point of beginning.

(D) In the Rancho Santa Fe North area: Beginning at the intersection of La Valle Plateada and Paseo Delicias; then, northeasterly along Paseo Delicias to its intersection with Del Dios Highway; then, northeasterly along Del Dios Highway to its intersection with El Camino Del Norte; then, northeasterly along an imaginary line to the eastern most point of Rancho Cielo; then, northeasterly along an imaginary line to the intersection of Camino De La Mitra and Calle Ambiente; then, southeasterly along Calle Ambiente to its intersection with Del Dios Highway; then, southwesterly along an imaginary line to its intersection with the inter-

section of the San Dieguito River and Bing Crosby Boulevard; then, southeasterly, northeasterly, southeasterly, southwesterly and southeasterly along Bing Crosby Boulevard to its intersection with Top O The Morning Way; then, southwesterly, northwesterly, westerly, southwesterly, northwesterly, and northeasterly along Top O The Morning Way to its northern most point; then, northwesterly along an imaginary line to its intersection with the eastern most point of Via Guadalupe; then, westerly along Via Guadalupe to its intersection with Vuelo; then, northwesterly, northeasterly, northwesterly and southwesterly along Vuelo to its intersection with La Valle Plateada; then, northwesterly along La Valle Plateada to the point of beginning.

- (E) In the Scripps Ranch area: Beginning at the intersection of Scripps Ranch Boulevard and Spring Canyon Road; then, southeasterly, northeasterly and southeasterly along Spring Canyon Road to its intersection with Pomerado Road; then, southerly and southwesterly along Pomerado Road to its intersection with Scripps Ranch Boulevard; then, northerly, northeasterly, northwesterly, westerly, northerly, northwesterly, northeasterly, northerly, northwesterly, northeasterly, southeasterly, northeasterly, easterly and northeasterly along Scripps Ranch Boulevard to the point of beginning.
- (F) In the Solana Beach area: Beginning at the intersection of U.S. Interstate Highway 5 and its intersection with the southern boundary line of San Elijo Lagoon County Park; then, northeasterly, easterly, southerly, easterly, northerly easterly, northerly and easterly along the southern boundary line of San Elijo Lagoon County Park to its intersection with El Camino Real; then, southeasterly along El Camino Real at its intersection with Highland Drive; then, southwesterly and southerly along Highland Drive to its intersection with Lomas Santa Fe Drive; then, westerly along Lomas Santa Fe Drive to its intersection with U.S. Interstate Highway 5; then, northerwesterly along U.S. Interstate Highway 5 to the point of beginning.
- (c) Article and Commodities Covered. The following are declared to be hosts and possible carriers of Diaprepes root weevil.
- (1) Soil, sand, gravel or growing media moved separately or with other things, and any other articles which are infested or exposed to infestation by Diaprepes abbreviatus.
- (2) All nursery stock, plants and plant parts and plant products capable of propagation.
- (3) Any other product, article, or means of conveyance when it is determined by the Secretary or county agricultural commissioner to present a hazard of spreading live life stages of *Diaprepes abbreviatus* and the person in possession thereof has been so notified.
 - (4) Dying or dead plant material without roots or soil (green waste).
- (5) Exemptions. The following articles are exempt from the provisions of this section:
 - (A) seed;
 - (B) bare rooted cacti;
 - (C) fruits and vegetables grown above ground;
 - (D) fleshy roots, corms, tubers, and rhizomes that are free of soil;
 - (E) defoliated bare-rooted nursery stock;
 - (F) privately–owned indoor decorative houseplants;
- (G) aquatic plants without soil, and those in containers with growing media if removed from water and shipped immediately;
- (H) shipments moving under special permit established by the Department to ensure such shipments do not present a pest risk; and
- (I) dying or dead plant material without roots or soil (green waste) that has been processed or handled or treated in a manner approved by the Secretary to eliminate live life stages of *Diaprepes abbreviatus* and is moved directly to a city or county sanitary landfill or State licensed compost facility within the quarantine area.
 - (d) Restrictions.
- (1) Articles and commodities covered in Section (c) are prohibited movement within or from the area under quarantine except as provided in (A), (B) (C) or (D) below:

- (A) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities originated from a site or facility which is apparently free from *Diaprepes abbreviatus*.
- (B) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities have been inspected or treated in a manner approved by the Department and are apparently free from Diaprepes abbreviatus.
- (C) If purchased at a retail sales location and accompanied by a sales receipt.
- (D) If the article or commodity was produced outside the area under quarantine and is being moved through the area under quarantine by direct route and without delay in vehicles or containers which prevent spillage of the article or commodity while en route through the area.
- (E) If the article or commodity covered is moved under the terms of a special permit as authorized under Title 3, Section 3154 of the California Code of Regulations.
- (2) Articles and commodities covered in subsection (c)(3) are prohibited movement within or from the area under quarantine except if cleaned and treated to the satisfaction of the county agricultural commissioner. - 2. New subsection (b)(1) and redesignation of portion of former subsection (b) to subsection (b)(2) filed 10-24-2005 as an emergency; operative 10-24-2005 (Register 2005, No. 43). A Certificate of Compliance must be transmitted to OAL by 2-21-2006 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 10-3-2005 order transmitted to OAL 1-9-2006
- and filed 2-16-2006 (Register 2006, No. 7).
 Certificate of Compliance as to 10-24-2005 order transmitted to OAL 1-20-2006 and filed 2-21-2006 (Register 2006, No. 8).
- 5. New subsection (b)(3) filed 5–19–2006 as an emergency; operative 5–19–2006 (Register 2006, No. 20). A Certificate of Compliance must be transmitted to OAL by 9-18-2006 or emergency language will be repealed by operation of law on the following day.
- 6. Amendment designating a portion of subsection (b)(3) as subsection (b)(3)(A) and new subsection (b)(3)(B) filed 6-12-2006 as an emergency; operative 6–12–2006 (Register 2006, No. 24). A Certificate of Compliance must be transmitted to OAL by 10-10-2006 or emergency language will be repealed by operation of law on the following day
- 7. New subsection (b)(3)(C) filed 6-28-2006 as an emergency; operative 6-28-2006 (Register 2006, No. 26). A Certificate of Compliance must be transmitted to OAL by 10-26-2006 or emergency language will be repealed by operation of law on the following day
- 8. New subsection (b)(3)(D) filed 8–16–2006 as an emergency; operative 8–16–2006 (Register 2006, No. 33). A Certificate of Compliance must be transmitted to OAL by 12-14-2006 or emergency language will be repealed by operation of law on the following day
- Amendment of subsection (b)(3)(A) filed 8–24–2006 as an emergency; operative 8–24–2006 (Register 2006, No. 34). A Certificate of Compliance must be transmitted to OAL by 12-22-2006 or emergency language will be repealed by operation of law on the following day.

 10. New subsection (b)(3)(E) filed 8-29-2006 as an emergency; operative
- 8-29-2006 (Register 2006, No. 35). A Certificate of Compliance must be transmitted to OAL by 12-27-2006 or emergency language will be repealed by operation of law on the following day.
- 11. Certificate of Compliance as to 5-19-2006 order transmitted to OAL 9-1-2006 and filed 9-7-2006 (Register 2006, No. 36).
- 12. Redesignation of former subsection (b)(2) as new subsection (b)(2)(A), new subsections (b)(2)(B)-(C) and amendment of subsections (b)(3)(D)-(E) filed 9–19–2006 as an emergency; operative 9–19–2006 (Register 2006, No. 38). A Certificate of Compliance must be transmitted to OAL by 1-17-2007 or emergency language will be repealed by operation of law on the following day
- 13. Certificate of Compliance as to 6-12-2006 order transmitted to OAL 9-26-2006 and filed 10-5-2006 (Register 2006, No. 40).
- 14. Editorial correction of subsection (a) (Register 2006, No. 41).
- 15. Certificate of Compliance as to 6-28-2006 order transmitted to OAL 9-26-2006 and filed 10-12-2006 (Register 2006, No. 41).
- 16. Amendment of subsections (b)(3)(A)–(B) and (b)(3)(D) filed 10–12–2006 as an emergency; operative 10–12–2006 (Register 2006, No. 41). A Certificate of Compliance must be transmitted to OAL by 2–9–2007 or emergency language will be repealed by operation of law on the following day.

- 17. New subsections (b)(2)(D) and (b)(3)(F) filed 11–16–2006 as an emergency; operative 11–16–2006 (Register 2006, No. 46). A Certificate of Compliance must be transmitted to OAL by 3–16–2007 or emergency language will be repealed by operation of law on the following day.
- 18. Amendment of subsections (b)(3)(A), (D) and (E) filed 12–20–2006 as an emergency; operative 12–20–2006 (Register 2006, No. 51). A Certificate of Compliance must be transmitted to OAL by 4–19–2007 or emergency language will be repealed by operation of law on the following day.
- 19. Certificate of Compliance as to 8-24-2006 order transmitted to OAL 12-6-2006 and filed 1-5-2007 (Register 2007, No. 1).
- 20. Certificate of Compliance as to 8-16-2006 order transmitted to OAL 12-6-2006 and filed 1-9-2007 (Register 2007, No. 2).
- 21. Certificate of Compliance as to 8-29-2006 order transmitted to OAL 12-6-2006 and filed 1-18-2007 (Register 2007, No. 3).
- 22. Certificate of Compliance as to 9-19-2006 order transmitted to OAL 1-8-2007 and filed 1-18-2007 (Register 2007, No. 3).
- 23. Certificate of Compliance as to 10–12–2006 order transmitted to OAL 12–29–2006 and filed 2–8–2007 (Register 2007, No. 6).
- 24. Certificate of Compliance as to 11–16–2006 order transmitted to OAL
- 3-15-2007 and filed 4-25-2007 (Register 2007, No. 17).

 25. Certificate of Compliance as to 12-20-2006 order transmitted to OAL
- 4–13–2007 and filed 5–7–2007 (Register 2007, No. 19).

 26. Amendment of subsections (b)(1)(A), new subsection (b)(1)(B), amendment of subsections (c)(2)(A)–(C), (c)(3)(A)–(E) and new subsection (c)(3)(G) filed 7–9–2007 as an emergency; operative 7–9–2007 (Register 2007, No. 28). A Certificate of Compliance must be transmitted to OAL by 1–7–2008 or emer-
- gency language will be repealed by operation of law on the following day. 27. Amendment of subsections (b)(3)(A) and (b)(3)(D), repealer of subsection (b)(3)(E) and subsection relettering filed 9–11–2007 as an emergency; operative 9–11–2007 (Register 2007, No. 37). A Certificate of Compliance must be transmitted to OAL by 3–10–2008 or emergency language will be repealed by operation of law on the following day.
- 28. Amendment of subsections (b)(1)(A) and (b)(3)(B) filed 10–3–2007 as an emergency; operative 10–3–2007 (Register 2007, No. 40). A Certificate of Compliance must be transmitted to OAL by 3–31–2008 or emergency language will be repealed by operation of law on the following day.
- 29. Amendment of subsections (b)(3)(A)–(B) filed 10–29–2007 as an emergency; operative 10–29–2007 (Register 2007, No. 44). A Certificate of Compliance must be transmitted to OAL by 4–28–2008 or emergency language will be repealed by operation of law on the following day.
- 30. Amendment of subsections (b)(3)(A)–(B), new subsection (b)(3)(F) and subsection relettering filed 11–21–2007 as an emergency; operative 11–21–2007 (Register 2007, No. 47). A Certificate of Compliance must be transmitted to OAL by 5–19–2008 or emergency language will be repealed by operation of law on the following day.
- 31. Amendment of subsection (b)(3)(C) filed 11–27–2007 as an emergency; operative 11–27–2007 (Register 2007, No. 48). A Certificate of Compliance must be transmitted to OAL by 5–27–2008 or emergency language will be repealed by operation of law on the following day.
- 32. New subsection (b)(3)(F) and subsection relettering filed 12–19–2007 as an emergency; operative 12–19–2007 (Register 2007, No. 51). A Certificate of Compliance must be transmitted to OAL by 6–16–2008 or emergency language will be repealed by operation of law on the following day.
- 33. Amendment of subsection (b)(3)(A), repealer of subsection (b)(3)(D) and subsection relettering filed 12–26–2007 as an emergency; operative 12–26–2007 (Register 2007, No. 52). A Certificate of Compliance must be transmitted to OAL by 6–23–2008 or emergency language will be repealed by operation of law on the following day.
- 34. Certificate of Compliance as to 7-9-2007 order transmitted to OAL 12-6-2007 and filed 1-10-2008 (Register 2008, No. 2).
- 35. Certificate of Compliance as to 9-11-2007 order transmitted to OAL 12-13-2007 and filed 1-28-2008 (Register 2008, No. 5).
- 36. Certificate of Compliance as to 10-3-2007, 10-29-2007, 11-21-2007, 11-27-2007, 12-19-2007 and 12-26-2007 orders transmitted to OAL 3-21-2008 and filed 4-2-2008 (Register 2008, No. 14).
- 37. Repealer of subsection (b)(3)(A), subsection relettering and amendment of newly designated subsection (b)(3)(B) filed 4–2–2008 as an emergency; operative 4–2–2008 (Register 2008, No. 14). A Certificate of Compliance must be transmitted to OAL by 9–29–2008 or emergency language will be repealed by operation of law on the following day.
- 38. Amendment of subsection (b)(3)(A) filed 4–15–2008 as an emergency; operative 4–15–2008 (Register 2008, No. 16). A Certificate of Compliance must be transmitted to OAL by 10–14–2008 or emergency language will be repealed by operation of law on the following day.

§ 3434. Light Brown Apple Moth Interior Quarantine.

A quarantine is established against the following pest, its hosts and possible carriers.

- (a) Pest. Light brown apple moth (Epiphyas postvittana),
- (b) Area Under Quarantine.
- (1) In the counties of Alameda and Contra Costa, in the Dublin area: Beginning at the intersection of Pine Valley Place and Pine Valley Road;

then, easterly and northeasterly along Pine Valley Road to its intersection with Alcosta Boulevard; then, southeasterly along Alcosta Boulevard to its intersection with Old Ranch Road; then, northeasterly, southeasterly and northeasterly along Old Ranch Road to its intersection with Dougherty Road; then, southeasterly and southerly along Dougherty Road to its intersection with Fall Creek Road; then, southeasterly along an imaginary line to its intersection with the intersection of 15th Street and Cromwell Avenue; then, northerly and northeasterly along Cromwell Avenue to its intersection with Sebille Road; then, southeasterly and southerly along Sebille Road to its intersection with Arnold Road; then southerly along Arnold Road to its intersection with Central Parkway; then, easterly along Central Parkway to its intersection with Hacienda Drive; then, southerly, southwesterly and southerly along Hacienda Drive to its intersection with W Las Positas Boulevard; then, southwesterly, westerly and southwesterly along W Las Positas Boulevard to its intersection with Foothill Road; then, southeasterly along Foothill Road to its intersection with Santos Ranch Road; then, westerly, northwesterly, westerly, southwesterly, northwesterly, southwesterly, westerly, northwesterly, westerly, northwesterly, northerly, northwesterly, southwesterly, westerly and northwesterly along Santos Ranch Road to its intersection with Cowing Road; then, northwesterly, westerly, northwesterly, northeasterly, southwesterly, northwesterly, northeasterly, easterly, northeasterly, northwesterly, southwesterly, northerly, northeasterly, northerly, northwesterly and northeasterly along Cowing Road to its intersection with Hollis Canyon Road; then, northeasterly, northwesterly, northeasterly, southeasterly, easterly, northwesterly, westerly, northeasterly, northerly, southeasterly, northeasterly, easterly, northwesterly, northeasterly, northwesterly, northeasterly, northwesterly, northeasterly and northerly along Hollis Canyon Road to its northern most point; then, northeasterly along an imaginary line to its intersection with Pine Valley Place; then southeasterly, northeasterly and southeasterly along Pine Valley Place to the point of beginning.

(2) In the counties of Alameda, Contra Costa, Marin. San Francisco, San Mateo and Santa Clara: Beginning at the intersection of Redwood Avenue and Corte Madera Avenue; then, northwesterly along Corte Madera Avenue to its intersection with Magnolia Avenue; then, starting northwesterly, along Magnolia Avenue to its intersection with College Avenue; then, northerly along College Avenue to its intersection with Woodland Road; then, starting westerly along Woodland Road to its intersection with S Ridgewood Road; then, southwesterly along S Ridgewood Road to its intersection with Turnagain Road; then, northwesterly along Turnagain Road to its intersection with Idlewood Road; then, starting northwesterly along Idlewood Road to its intersection with Crown Road; then, starting northwesterly along Crown Road to its intersection with Goodhill Road; then, starting westerly along Goodhill Road to its intersection with the boundary line of the City of Ross; then, starting southwesterly along said boundary line to its intersection with 37.956146 latitude and -122.574792 longitude; then, southwesterly along an imaginary line to its intersection with the northeastern most point of Shafer Grade Road; then, starting southerly along Shafer Grade Road to its intersection with Old Bolinas Fairfax Road; then, starting northerly along Old Bolinas Fairfax Road to its intersection with Sky Oaks Road; then, starting westerly along Sky Oaks Road to its intersection with the boundary line of the Meadows Golf Course; then, starting southwesterly along said boundary line to its intersection with Bolinas Road; then, starting westerly along Bolinas Road to its intersection with Whites Hill Preserve; then, starting northwesterly along Whites Hill Preserve to its intersection with Sir Francis Drake Boulevard; then, starting southeasterly along Sir Francis Drake Boulevard to its intersection with Gunsight Fire Road; then, starting northeasterly along Gunsight Fire Road to its intersection with the boundary line of the Loma Alta Preserve; then, starting northwesterly along said boundary line to its intersection with Loma Alta Fire Road; then, starting northeasterly along Loma Alta Fire Road to its intersection with Nunes Fire Road; then, starting northeasterly along Nunes Fire Road to its intersection with Lucas Valley Road; then, starting southeasterly along Lucas Valley Road to its intersection with Miller Creek Road; then, starting northerly along Miller Creek Road to its intersection with US Highway 101; then, southerly along US Highway 101 to its intersection with Miller Creek; then, starting northeasterly along Miller Creek to its intersection with San Pablo Bay coastline; then, easterly along an imaginary line to its intersection with the San Pablo Bay coastline and Refugio Creek; then, starting southeasterly along Refugio Creek to its intersection with San Pablo Avenue; then, southwesterly along San Pablo Avenue to its intersection with Sycamore Avenue; then, starting southeasterly along Sycamore Avenue to its intersection with Refugio Valley Road; then, southeasterly along Refugio Valley Road to its intersection with Pheasant Drive; then starting southwesterly along Pheasant Drive to its intersection with Malachite Court; then, starting southeasterly along Malachite Court to its southwestern most point; then, southwesterly along an imaginary line to its intersection with the northern most point of Silvercrest Street; then, southwesterly along Silvercrest Street to its intersection with Victor Street; then, southeasterly along Victor Street to its intersection with Wright Avenue; then, easterly along Wright Avenue to its intersection with Marcas Street; then, starting southerly along Marcas Street to its intersection with the boundary line of the City of Pinole; then, starting southwesterly along the boundary line of the City of Pinole to its intersection with Pinole Valley Road; then, southeasterly along Pinole Valley Road to its intersection with Alhambra Valley Road; then, southeasterly along an imaginary line to its intersection with the southern most point of Hampton Road; then, southeasterly along an imaginary line to its intersection with the intersection of Bear Creek Road and Happy Valley Road; then, starting northeasterly along Bear Creek Road to its intersection with the boundary line of Briones Regional Park; then, starting northwesterly along the boundary line of Briones Regional Park to its intersection with Alhambra Valley Road; then, starting easterly along Alhambra Valley Road to its intersection Castle Creek Court; then, northerly along Castle Creek Court to its northern most point; then, northerly along an imaginary line to its intersection with the southern most point of Millthwait Drive; then northeasterly along Millthwait Drive to its intersection with Alhambra Valley Road; then, starting northeasterly along Alhambra Valley Road to its intersection with Alhambra Avenue; then, starting northwesterly along Alhambra Avenue to its intersection with State Highway 4; then, starting southwesterly along State Highway 4 to its intersection with Wolcott Lane; then, starting northerly along Wolcott Lane to its intersection with southern boundary line of Carquinez Straight Regional Park; then, starting westerly along said boundary line to its intersection with the southern shoreline of the Carquinez Straight: then, starting southeasterly along said shoreline to its intersection with Pacheco Creek; then, southeasterly along Pacheco Creek to its intersection with Waterfront Road; then, northeasterly along Waterfront Road to its intersection with Solano Way; then, starting southeasterly along Solano Way to its intersection with Olivera Road; then, starting southeasterly along Olivera Road to its intersection with E Olivera Road; then, southeasterly along E Olivera Road to its intersection with the boundary line of the US Naval Weapons Station Concord; then, starting southeasterly along said boundary line to its intersection with Denkinger Road; then, southwesterly along Denkinger Road to its intersection with Concord Boulevard; then, southeasterly along Concord Boulevard to its intersection with Yvonne Drive; then, northeasterly along Yvonne Drive to its intersection with Laurel Drive; then, southeasterly along Laurel Drive to its intersection with Old Kirker Pass Road; then, easterly along Old Kirker Pass Road to its intersection with Kirkwood Drive; then, starting southeasterly along Kirkwood Drive to its intersection with Jameson Court; then, starting northeasterly along Jameson Court to its eastern most point; then, southerly along an imaginary line to its intersection with the boundary line of the Oakhurst Country Club at 37.955812 latitude and -121.937638 longitude; then, southwesterly along said boundary line to its intersection with Oakhurst Drive; then, starting easterly along Oakhurst Drive to its intersection with Clayton Road; then, starting westerly along Clayton Road to its intersection with Marsh Creek Road; then, starting southeasterly along Marsh Creek Road to its intersection with Mountaire Parkway; then, starting southerly along Mountaire Park-

way to its intersection with Mountaire Circle; then, starting southwesterly along Mountaire Circle to its intersection with Mt Tamalpais Drive; then, southwesterly along Mt Tamalpais Drive to its intersection with the boundary line of Mount Diablo State Park; then, starting westerly along said boundary line to its intersection with point 37.902500 latitude and -121.974244 longitude; then, southwesterly along an imaginary line to its intersection with the southeastern most point of an unnamed road at 37.895716 latitude and -121.980741 longitude; then, starting northwesterly along the unnamed road to its intersection with Northgate Road; then, northwesterly along Northgate Road to its intersection with the boundary line of the City of Alamo; then, starting southwesterly along said boundary line to its intersection with Castle Rock Road; then, southwesterly along an imaginary line to its intersection with the eastern most point of Robb Road; then, starting westerly along Robb Road to its intersection with Whitecliff Way; then, southwesterly along Whitecliff Way to its intersection with Rudgear Road; then, starting westerly along Rudgear Road to its intersection with Danville Boulevard; then, northwesterly along Danville Boulevard to its intersection with Crest Avenue; then, starting westerly along Crest Avenue to its intersection with Castle Crest Road; then, starting southwesterly along Castle Crest Road to its intersection with an unnamed dirt road; then, starting southeasterly along the unnamed dirt road to its intersection with the point 37.859521 latitude and -122.049884 longitude; then, starting westerly along the unnamed dirt road to its intersection with Grey Eagle Drive; then, starting westerly along Grey Eagle Drive to its intersection with Terra Granada Drive; then, northwesterly along Terra Granada Drive to its intersection with Tice Creek Drive; then, northwesterly along Tice Creek Drive to its intersection with Avenida Sevilla; then, southwesterly along Avenida Sevilla to its southwestern most point; then, southwesterly along an imaginary line to the eastern most point of Valley Hill Drive; then, starting northwesterly along Valley Hill Drive to its intersection with Bollinger Canyon; then, southerly along an imaginary line to its intersection with the intersection of Brown Ranch Road and Miller Road; then, starting southwesterly along Miller Road to its intersection with Big Burn Road; then, starting westerly along Big Burn Road to its southern most point; then, southwesterly along an imaginary line to its intersection with the intersection of Redwood Road and Grass Valley Road; then, starting southeasterly along Redwood Road to its intersection with Miller Road; then, southeasterly along an imaginary line to its intersection with the northwestern most point of the boundary line of Cull Canyon Regional Recreation Area; then, starting northeasterly along the boundary line of Cull Canyon Regional Recreation Area to its intersection with Cull Canyon Road; then, southeasterly along an imaginary line to its intersection with the intersections of Crow Canyon Road, Norris Canyon Road and the City of Castro Valley boundary line; then, starting northeasterly along the City of Castro Valley boundary line to its intersection with Paloverde Road; then, starting southeasterly along Paloverde Road to its intersection with Palomares Road; then, southwesterly along an imaginary line to its intersection with the eastern most point of Fairweather Court; then, southwesterly along Fairweather Court to its intersection with Five Canyons Parkway; then, starting southeasterly along Five Canyons Parkway to its intersection with Fairview Avenue; then, starting southeasterly along Fairview Avenue to its intersection with the northern boundary line of Garin Regional Park; then, starting southeasterly along the northern boundary line of Garin Regional Park to its intersection with the boundary line of Dry Creek Pioneer Regional Park; then, starting southeasterly along the boundary line of Dry Creek Pioneer Regional Park to its intersection with South Dry Creek Branch; then, southerly along an imaginary line to its intersection with the intersection of Montalban Drive and Blaisdell Way; then, southwesterly along Montalban Drive to its intersection with Easterday Way; then, northwesterly along Easterday Way to its intersection with E Nursery Avenue; then, southwesterly along E Nursery Avenue to its intersection with Nursery Avenue; then, southwesterly along Nursery Avenue to its intersection with Niles Boulevard; then, northwesterly along Niles Boulevard to its intersection with Alvarado Niles Road; then, northwesterly along Alvarado Niles Road to its intersection with Osprey Drive; then, southerly along Osprey Drive to its intersection with Quarry Lakes Drive; then, starting southeasterly along Quarry Lakes Drive to its intersection with Isherwood Way; then, southwesterly along Isherwood Way to its intersection with Paseo Padre Parkway; then, starting southeasterly along Paseo Padre Parkway to its intersection with Mowry Avenue; then, northeasterly along Mowry Avenue to its intersection with Mission Boulevard; then, northwesterly along Mission Boulevard to its intersection with Niles Canyon Road; then, northeasterly along Niles Canyon Road to its intersection with Old Canyon Road, then, starting northeasterly along Old Canyon Road to its southeastern most point, then, southeasterly along an imaginary line to its intersection with the northeastern most point of Morrison Canyon Road, then, southeasterly along an imaginary line to its intersection with the intersection of U S Interstate 680 and Vargas Road, then, southwesterly along U S Interstate 680 to its intersection with Mission Boulevard, then, starting southeasterly along Mission Boulevard to its intersection with U S Interstate 880, then, starting southeasterly along U S Interstate 880 to its intersection with the boundary line of Alameda County; then, starting southwesterly along the boundary line of Alameda County to its intersection with the boundary line of San Mateo County; then, southeasterly along an imaginary line its intersection with the northern boundary line of the City of Sunnyvale and the shoreline of San Francisco Bay; then, starting southeasterly along the northern boundary line of the City of Sunnyvale to its intersection with U.S. Highway 101; then, southeasterly along U.S. Highway 101 to its intersection with E Brokaw Road; then, starting northeasterly along E Brokaw Road to its intersection with Murphy Avenue; then, northeasterly along Murphy Avenue to its intersection with Hostetter Road; then, northeasterly along Hostetter Road to its intersection with N Capitol Avenue; then, southeasterly along N Capitol Avenue to its intersection with Mckee Road; then, northeasterly along Mckee Road to its intersection with Kirk Avenue; then, southeasterly along Kirk Avenue to its intersection with Alum Rock Avenue; then, southwesterly along Alum Rock Avenue to its intersection with Fleming Avenue; then, southeasterly along Fleming Avenue to its intersection with Story Road; then, starting southwesterly along Story Road to its intersection with Clayton Road; then, starting southeasterly along Clayton Road to its intersection with Mount Pleasant Drive; then, southeasterly along Mount Pleasant Drive to its intersection with Ruby Avenue; then, starting southeasterly along Ruby Avenue to its intersection with Tully Road; then, starting southwesterly along Tully Road to its intersection with Curtner Avenue; then, southwesterly along Curtner Avenue to its intersection with State Highway 87; then, southeasterly along State Highway 87 to its intersection with Santa Teresa Boulevard; then, starting southerly along Santa Teresa Boulevard to its intersection with Snell Avenue; then, starting southerly along Snell Avenue to its southern most point; then, southeasterly along an imaginary line to its intersection with Scenic Vista Drive; then, starting westerly along Scenic Vista Drive to its intersection Via Santa Teresa; then, starting southeasterly along Via Santa Teresa to its intersection with Henwood Road; then, southeasterly along Henwood Road to its intersection with Harry Road; then, southwesterly along Harry Road to its intersection with Mckean Road; then, southwesterly along Mckean Road to its intersection with Mockingbird Hill Lane; then, southwesterly along Mockingbird Hill Lane to its intersection with the boundary line of Almaden Quicksilver Park; then, starting westerly along the said boundary line to its intersection with Hicks Road; then, starting northwesterly along Hicks Road to its intersection with Shannon Road; then, starting northwesterly along Shannon Road to its intersection with Kennedy Road; then, starting southwesterly along Kennedy Road to its intersection with Los Gatos Boulevard; then, northeasterly along Los Gatos Boulevard to its intersection with Roberts Road; then, northwesterly along Roberts Road to its intersection with Blossom Hill Road; then, southwesterly along Blossom Hill Road to its intersection with State Highway 17; then, southwesterly along State Highway 17 to its intersection with Los Gatos Saratoga Road; then, starting northwesterly along Los Gatos Saratoga Road to its intersection with Fruitvale Avenue; then, northerly along Fruitvale Avenue to its intersection with

Saratoga Avenue; then, southwesterly along Saratoga Avenue to its intersection with Crestbrook Drive; then, northwesterly along Crestbrook Drive to its intersection with Braemar Drive; then, northeasterly along Braemar Drive to its intersection with Scotland Drive; then, northwesterly along Scotland Drive to its intersection with Glen Brae Drive; then, starting northeasterly along Glen Brae Drive to its intersection with Cox Avenue; then, starting westerly along Cox Avenue to its intersection with Wardell Road; then, starting westerly along Wardell Road to its intersection with Arroyo De Arguello; then, starting southerly along Arroyo De Arguello to its intersection with Comer Drive; then, starting westerly along Comer Drive to its intersection with Star Ridge Court; then, starting westerly along Star Ridge Court to its intersection with Parker Ranch Court; then, starting easterly along Parker Ranch Court to its intersection with Parker Ranch Road; then, starting southwesterly along Parker Ranch Road to its intersection with Prospect Road; then, starting northerly along Prospect Road to its intersection with Arrowhead Lane; then, starting southwesterly along Arrowhead Lane to its northwestern most point; then, along an imaginary line to its intersection with an unnamed road at 37.295200 latitude and -122.056823 longitude; then, starting northwesterly along the unnamed road to its intersection with Regnart Road at 37.296672 latitude and -122.060084 longitude; then, northeasterly along Regnart Road to its intersection with Regnart Canyon Drive; then, starting northwesterly along Regnart Canyon Drive to its intersection with the boundary line of Stevens Creek County Park; then, starting northwesterly along the boundary line of Stevens Creek County Park to its intersection with Stevens Canyon Road; then starting northeasterly along Stevens Canyon Road to its intersection with S Foothill Boulevard; then, northerly along S Foothill Boulevard to its intersection with N Foothill Boulevard; then, northerly along N Foothill Boulevard to its intersection with Foothill Expressway; then, northwesterly along Foothill Expressway to its intersection with S El Monte Road; then, southwesterly along S El Monte Road to its intersection with U.S. Interstate 280; then, starting northwesterly along U.S. Interstate 280 to its intersection with Page Mill Road; then, southwesterly along Page Mill Road to its intersection with Arastradero Road; then, starting westerly along Arastradero Road to its intersection with Alpine Road; then, starting northeasterly along Alpine Road to its intersection with Westridge Drive; then, starting southwesterly along Westridge Drive to its intersection with Portola Road; then, starting northwesterly along Portola Road to its intersection with Old La Honda Road; then, starting southwesterly along Old La Honda Road to its intersection with Skyline Boulevard (State Highway 35); then, starting northwesterly along Skyline Boulevard (State Highway 35) to its intersection with Kings Mountain Road; then, starting southeasterly along Kings Mountain Road to its intersection with the western boundary line of Huddart County Park; then, starting southeasterly along the boundary line of Huddart County Park to its intersection with Greer Road; then, northwesterly along an imaginary line to its intersection with the western most point of Raymundo Drive; then, starting easterly along Raymundo Drive to its intersection with Runnymede Road; then, northeasterly along an imaginary line to its intersection with the intersection of Palm Circle Road and Canada Road; then, northwesterly along Canada Road to its intersection with U.S. Interstate Highway 280; then, starting northwesterly along U.S. Interstate Highway 280 to its intersection with State Highway 35; then, starting northwesterly along State Highway 35 to its intersection with Skyline Boulevard; then, starting southeasterly along Skyline Boulevard to its intersection with Muddy Road; then, southwesterly along an imaginary line to the northeastern most point of Murray Ranch Road; then, southwesterly along Murray Ranch Road to its intersection with Higgins Canyon Road; then, southwesterly along an imaginary line to its intersection with the intersection of State Highway 1 and Redondo Beach Road; then, southwesterly along Redondo Beach Road to its western most point; then, due westerly along an imaginary line to its intersection with the coast line of California; then, starting northerly along the coast line of California to its intersection with the boundary line of Half Moon Bay State Beach; then, starting northeasterly along said boundary line to its intersection State Highway 1; then, north-

westerly along State Highway 1 to its intersection with Capistrano Road; then, northeasterly along Capistrano Road to its intersection with Carmel Avenue; then, northeasterly along Carmel Avenue to its intersection with San Juan Avenue; then, northeasterly along San Juan Avenue to its northeastern most point; then, northeasterly along an imaginary line to its intersection with the western most point of Lewis Avenue; then, starting easterly along Lewis Avenue to its intersection with El Granada Boulevard; then, starting northerly along El Granada Boulevard to its intersection with Roosevelt Boulevard; then, starting southeasterly along Roosevelt Boulevard to its intersection with the boundary line of the City of Half Moon Bay; then, starting northeasterly along the boundary line of the City of Half Moon Bay to its intersection with Frenchmans Creek; then, easterly along an imaginary line to its intersection with Skyline Boulevard and Skyline; then, northwesterly along Skyline to its northern most point; then, northwesterly along an imaginary line to its intersection with 37.555234 latitude and -122.426721 longitude; then, starting northwesterly along an unnamed road to its intersection with 37.569684 latitude and -122.447534 longitude; then, starting northeasterly along an unnamed road to its intersection with the southeastern most point of Fire Trail 1; then, northwesterly along Fire Trail 1 to its intersection with Fassler Avenue; then, northwesterly along an imaginary line to its intersection with the southern most point of Berendos Avenue; then, starting northerly along Berendos Avenue to its intersection with Reina Del Mar Avenue; then, westerly along Reina Del Mar Avenue to its intersection with State Highway 1; then, northwesterly and northerly along State Highway 1 to its intersection with Clarendon Road; then, westerly along Clarendon Road to its western most point; then, westerly along an imaginary line to its intersection with the California coastline; then, starting northerly along the California coastline to its intersection with U.S. Highway 101; then, northerly along U.S. Highway 101 to its intersection with the southern boundary line of the Golden Gate National Recreation Area; then, starting westerly along the boundary line of the Golden Gate National Recreation Area to its intersection with the California coastline; then, starting northwesterly along the California coastline to its intersection with the boundary line of the Golden Gate National Recreation Area; then, starting northerly along the boundary line of the Golden Gate National Recreation Area to its intersection with Muir Woods Road; then, starting northwesterly along Muir Woods Road to its intersection with Panoramic Highway; then, starting northwesterly along the Panoramic Highway to its intersection with the boundary line of the City of Mill Valley; then, starting northeasterly along the said boundary line to its intersection with Crown Road; then, starting southeasterly along Crown Road to its intersection with North Trail; then, starting southeasterly along North Trail to its intersection with Fern Trail; then, starting easterly along Fern Trail to its intersection with Summit Drive; then, starting southwesterly along Summit Drive to its intersection with Redwood Avenue; then, starting northeasterly along Redwood Avenue to the point of beginning.

(3) In the county of Marin, in the Novato area: Beginning at the intersection of Novato Creek Road and Hicks Valley Road; then, northeasterly along an imaginary line to its intersection with the northwest point of the boundary line of the City of Novato; then, starting southeasterly along the boundary line of the City of Novato to its intersection with the boundary line of Rancho Olompali State Park; then, starting northwesterly along the boundary line of Rancho Olompali State Park to its intersection with US Highway 101; then, starting southeasterly along US Highway 101 to its intersection with Atherton Avenue; then, starting southeasterly along Atherton Avenue to its intersection with Bugeia Lane; then, southerly along an imaginary line to its intersection with the northern most point of Robinhood Drive; then, starting southwesterly along Robinhood Drive to its intersection with Olive Avenue; then, southwesterly along an imaginary line to its intersection with the intersection of Vintage Way and Rowland Boulevard; then, starting westerly along Rowland Boulevard to its intersection with S Novato Boulevard; then, southeasterly along S Novato Boulevard to its intersection with Sunset Parkway; then, starting southwesterly along. Sunset Parkway to its intersection with Ignacio Boulevard; then, starting northwesterly along Ignacio Boulevard to its intersection with College of Marin Avenue; then, starting northwesterly along the College of Marin Avenue to its western most point; then, northwesterly along an imaginary line to its intersection with Indian Valley Road and Old Ranch Road; then, southwesterly along Old Ranch Road to its intersection with Deer Trail; then, northwesterly along Deer Trail to its western most point; then, southwesterly along an imaginary line to an imaginary point at 38.086305 latitude and -122.600034 longitude; then, northwesterly along an imaginary line to its intersection with Tanglewood Lane; then, starting northerly along Tanglewood Lane to its intersection with Maestro Road; then, starting northwesterly along Maestro Road to its northern most point; then, northwesterly along an imaginary line to its intersection with the intersection of Cabro Ridge with Cabro Court; then, southwesterly along Cabro Court to its intersection with Plata Court; then starting northwesterly along Plata Court to its intersection with Santa Maria Drive; then, northwesterly along Santa Maria Drive to its intersection with Amber Court; then, northwesterly along an imaginary line from the intersection of Amber Court and Santa Maria Drive to the southern most point of W Brooke Drive; then, starting northerly along W Brooke Drive to its intersection with Wild Horse Valley Road; then, northwesterly along Wild Horse Valley Road to its intersection with Vineyard Road; then, southwesterly along Vineyard Road to its intersection with Verissimo Drive; then, northwesterly along Verissimo Drive to its intersection with Ravine Way; then, northwesterly along an imaginary line to the point of beginning.

(4) In the counties of Monterey, San Benito and Santa Cruz: Beginning at the intersection of Empire Grade and Jamison Creek Road; then, northwesterly along an imaginary line to its intersection with the intersection of Heartwood HI and the boundary line of Big Basin Redwoods State Park; then, starting northerly along the boundary line of Big Basin Redwoods State Park to its intersection with State Highway 236; then, starting southeasterly along State Highway 236 until its intersection with State Highway 9; then, starting southeasterly along State Highway 9 to its intersection with the boundary line for the City of Boulder Creek; then, starting southerly along the boundary line for the City of Boulder Creek to its intersection with Two Bar Road; then, northeasterly along Two Bar Road to its intersection with Cougar Rock Road; then, southeasterly along an imaginary line to its intersection with the northwestern most point of Whalebone Gulch Road; then, southeasterly along Whalebone Gulch Road to its intersection with Bear Creek Road; then, northeasterly along Bear Creek Road to its intersection with Amber Ridge Loop; then, starting southeasterly along Amber Ridge Loop to its eastern most point; then, southeasterly along an imaginary line to its intersection with the intersection of E Zayante Road and Fern Ridge; then, starting easterly along Fern Ridge to its northeastern most point; then, southeasterly along an imaginary line to its intersection with the intersection of Weston Road and Glenwood Drive; then, northeasterly along Glenwood Drive to its intersection with Mountain Charlie Road; then, starting northeasterly along Mountain Charlie Road to its intersection with Riva Ridge Road; then, starting westerly along Riva Ridge Road to its intersection with Hutchinson Road; then, starting northeasterly along Hutchinson Road to its intersection with State Highway 35; then, starting southeasterly along State Highway 35 to its intersection with Summit Road; then, starting northeasterly along Summit Road to its intersection with Chasewood Drive; then, starting northeasterly along Chasewood Drive to its eastern most point; then, northeasterly along an imaginary line to its intersection with the intersection of Aldercroft Heights and Metcalf Road; then, easterly along Metcalf Road to its intersection with Cothran Road; then, northeasterly along an imaginary line to its intersection with the southeastern most point of Mount Umunhum Road; then, starting northeasterly along Mount Umunhum Road to its southeastern most point; then, southerly along an imaginary line to Metcalf Road at 37.137451 latitude and -121.897744 longitude; then, starting southeasterly along Metcalf Road to its intersection with Loma Prieta Road; then, southwesterly along an imaginary line to its intersection with the intersection of Nall Lane and Lago Lomito Way; then, starting easterly along Lago Lomito

Way to its intersection with Loma Prieta Way; then, starting southeasterly along Loma Prieta Way to its intersection with Mount Bache Road; then, starting southeasterly along Mount Bache Road to its intersection with Highland Way; then, starting southerly along Highland Way to its intersection with Hihns Sulphur Springs Road; then, westerly along Hihns Sulphur Springs Road to its intersection with the boundary line of Forest of Nisene Marks State Park; then, starting southerly along the boundary of Forest of Nisene Marks State Park to its intersection with Nisene Marks State Park; then, starting northeasterly along Nisene Marks State Park to its intersection with Buzzard Lagoon Road; then, starting northerly along Buzzard Lagoon Road to its intersection with Ormsby Road; then, starting southeasterly along Ormsby Road to its intersection with Ormsby Cutoff; then, starting northeasterly along Ormsby Cutoff to its intersection with the boundary line of Santa Cruz County; then starting southeasterly along said boundary line to its intersection with an unnamed road at -121.763850 longitude and 37.048577 latititude; then, southerly along an imaginary line to its intersection with the intersection of Hazel Dell Heights and Hazel Dell Road; then, southeasterly along Hazel Dell Road to its intersection with Mt. Madonna Road; then, starting easterly along Mt. Madonna Road to its intersection with Pole Line Road; then, starting southeasterly along Pole Line Road to its intersection with State Highway 152; then, starting northeasterly along State Highway 152 to its intersection with the western boundary of M11S03E07 (Base/Meridian, Township, Range and Section); then, southerly along the western boundary of M11S03E07 to its intersection with the western boundary of M11S03E18; then, southerly along the western boundary of M11S03E18 to its intersection with the boundary line of Santa Cruz County; then, starting easterly along the boundary line of Santa Cruz County to its intersection with the boundary line of San Benito County; then, westerly along an imaginary line to its intersection with State Highway 129 at -121.58623 longitude/36.89946 latitude; then, starting northwesterly along State Highway 129 to its intersection with School Road; then starting southerly along School Road to its intersection with Forest Road; then, starting westerly along Forest Road to its intersection with Anzar Road; then, starting southeasterly along Anzar Road to its intersection with Cannon Road; then, starting southwesterly along Cannon Road to its intersection with U.S. Highway 101 (State Highway 156); then, southwesterly along an imaginary line to its intersection with the northern most point of Audrey Lane; then, southwesterly along Audrey Lane to its intersection with Crazy Horse Canyon Road; then, starting southeasterly along Crazy Horse Canyon Road to its intersection with San Juan Grade Road; then, southwesterly along San Juan Grade Road to its intersection with Herbert Road; then, starting southeasterly along Herbert Road to its intersection with Natividad Road; then, southwesterly along Natividad Road to its intersection with El Boronda Road; then, starting easterly along El Boronda Road to its intersection with Constitution Road; then, southwesterly along Constitution Road to its intersection with E Laurel Drive; then, southeasterly along E Laurel Drive to its intersection with N Sanborn Road; then, starting southwesterly along N Sanborn Road to its intersection with S Sanborn Road; then, starting southerly along S Sanborn Road to its intersection with E Blanco Road; then, starting southwesterly along E Blanco Road to its intersection with W Blanco Road; then, northwesterly along W Blanco Road to its intersection with S Davis Road; then, southwesterly along S Davis Road to its intersection with Reservation Road; then, starting northwesterly along Reservation Road to its intersection with Inter-Garrison Road; then, westerly along Inter-Garrison Road to its intersection with Schoonover Road; then, southerly along an imaginary line to its intersection with the northern most point of Belavida Road; then, southeasterly along Belavida Road to its intersection with Pasadera Drive; then, starting southerly along Pasadera Drive to its intersection with the Salinas Highway (State Highway 68); then, starting northwesterly along the Salinas Highway (State Highway 68) to its intersection with Canyon Del Rey Boulevard; then, southwesterly along an imaginary line to its intersection with the intersection of Via Malpaso and Cinquenta; then, starting southeasterly along Via Malpaso to its southeastern most point; then, southeasterly

along an imaginary line to its intersection with the intersection of Loma Del Rey and Carmel Valley Road; then, southwesterly along an imaginary line to its intersection with -121.832791 longitude and 36.497182 latitude; then, starting northwesterly along an unnamed road to its intersection with Cantera Run; then, starting southeasterly along Cantera Run to its intersection with Rancho San Carlos Road; then, starting northwesterly along Rancho San Carlos Road to its intersection with Carmel Valley Road; then, starting westerly along Carmel Valley Road to its intersection with State Highway 1; then, starting southeasterly along State Highway I to its intersection with Rio Road; then, starting northwesterly along Rio Road to its intersection with Santa Lucia Avenue; then, starting southwesterly along Santa Lucia Avenue to its intersection with the boundary line of Carmel-by-the-Sea; then, starting northwesterly along the boundary line of Carmel-by-the-Sea to its intersection with the California coastline; then, starting northeasterly along the coastline of California to its intersection with the Waddell Creek; then, starting northerly along Waddell Creek to its intersection with State Highway 1; then, southeasterly along State Highway 1 to its intersection with Canyon Road; then, northeasterly along an imaginary line to its intersection with the intersection of Fistelera Ridge Road and Last Chance Road; then, northeasterly along an imaginary line to its intersection with Purdy Ranch Road and Scott Creek; then, along an imaginary line to its intersection with the northern most point of Big Creek Road; then, northeasterly along an imaginary line to its intersection with the western most point of Blodgetts Road; then, starting southeasterly along Blodgetts Road to its intersection with Empire Grade; then, starting northwesterly along Empire Grade to the point of beginning.

(5) In the County of San Mateo in the Pescadero area: Beginning at the intersection of Stage Road and Pomponio Creek Road; then, starting northeasterly along Pomponio Creek Road to its intersection with Burns Valley Road; then, starting southwesterly along Burns Valley Road to its intersection with Pomponio Truck Trail; then, starting southwesterly along Pomponio Truck Trail to its intersection with Pescadero Creek Road; then, starting easterly along Pescadero Creek Road to its intersection with Memorial Park Road; then, starting southwesterly along Memorial Park Road to its intersection with Wurr Road; then, southeasterly along an imaginary line to its intersection with the intersection of the western boundary line of Pescadero Creek County Park and Butanoridge; then, starting southwesterly along Butano ridge to its intersection with South Ranch Road; then starting southeasterly along South Ranch Road to its intersection with Cloverdale Road; then, starting southeasterly along Cloverdale Road to its intersection with North Butano Truck Trail, then, starting northwesterly along North Butano Truck Trail to its southwestern most point; then, northwesterly along an imaginary line to its intersection with the intersection of Bean Hollow Road and Reservoir Road; then, starting northwesterly along Reservoir Road to its intersection with Pescadero Creek Road; then, northwesterly along Pescadero Creek Road to its intersection with State Highway 1: then, northeasterly along State Highway 1 to its intersection with the northwestern boundary line of Pescadero State Beach; then, easterly along an imaginary line to its intersection with Bradley Creek and Stage Road; then, starting northerly along Stage Road to the point of beginning.

(6) In the County of Santa Barbara, in the Carpinteria area: Beginning at the intersection of Paquita Drive and Arriba Street; then, starting northeasterly along Arriba Street to its northern most point; then, northerly along an imaginary line to its intersection with the intersection of 34.433 latitude and –119.550335 longitude; then, easterly along 34.433 latitude to its intersection with Carpinteria Creek; then, starting southwesterly along Carpinteria Creek to its intersection with the coastline of California; then, starting northwesterly along the coastline of California to its intersection with Arroyo Paredon Creek; then, starting northerly along Arroyo Paredon Creek to its intersection with an imaginary point at 34.41533 latitude and –119.55162 longitude; then, northerly along an imaginary line to its intersection at an imaginary point at 34.42106 latitude and –119.55162 longitude; then, easterly along an imaginary line to the point of beginning.

(7) In the Vallejo area of the County of Solano: Beginning at the intersection of State Highway 37 and Sage Street; then, starting northeasterly along State Highway 37 to its intersection with Columbus Parkway; then, starting southeasterly along Columbus Parkway to its intersection with Lake Herman Road; then, southeasterly along an imaginary line to its intersection with Ascot Parkway and Georgia Street; then, southwesterly along Georgia Street to its intersection with Columbus Parkway; then, starting southeasterly along Columbus Parkway to its intersection with State Park Road; then, southwesterly along State Park Road to its intersection with U.S. Interstate 780; then, northwesterly along U.S. Interstate 780 to its intersection with the western boundary line of Benicia State Park Recreation Area; then, starting southerly along said boundary line to its intersection with the coastline of San Francisco Bay; then, starting westerly along said coastline to its intersection with the southern most point of Maritime Academy Drive; then, northwesterly along an imaginary line to its intersection with the southeastern point of the boundary line of the Mare Island Naval Reserve; then, starting northwesterly along the boundary line of the Mare Island Naval Reserve to its intersection with State Highway 37; then, northeasterly along State Highway 37 to its intersection with the eastern shoreline of the Napa River; then, starting northerly along said shoreline to its intersection with the point 38.147849 latitude and -122.273883 longitude; then, northerly along an imaginary line to its intersection with the intersection of Meadows Drive and Severus Drive; then, starting northeasterly along Severus Drive to its intersection with Elliott Drive; then, southeasterly along Elliott Drive to its intersection with Mini Drive; then, starting northeasterly along Mini Drive to its intersection with Corcoran Avenue; then, northeasterly along Corcoran Avenue to its intersection with Fairgrounds Drive; then, southerly along Fairgrounds Drive to its intersection with Borges Lane; then, starting northeasterly along Borges Lane to its intersection with Nicole Way; then, starting southwesterly along Nicole Way to its intersection with Gateway Drive; then, starting northwesterly along Gateway Drive to its intersection with Sage Street; then, starting southeasterly along Sage Street to the point of beginning.

(8) In the Sonoma area of the County of Sonoma: Beginning at the intersection of Arnold Drive and Madrone Road; then, northeasterly along Madrone Road to its intersection with State Highway 12; then, southeasterly along State Highway 12 to its intersection with Cavedale Road; then, northeasterly along Cavedale Road to its intersection with Corey Road; then, southeasterly along an imaginary line to its intersection with Moon Mountain Road at -122.485067 longitude/38.337634 latitude; then, starting northerly along Moon Mountain Road to its intersection with Martin Road; then, starting easterly along Marin Road to its southeastern most point; then, southeasterly along an imaginary line to its intersection with an unnamed, dirt road at -122.465582 longitude/38.334148 latitude; then, southwesterly, southeasterly, southwesterly, and easterly along unnamed, dirt roads to -122.465671 longitude/38.330685 latitude; then, southeasterly along an imaginary line to its intersection with the intersection of High Road and Morada Drive; then, starting easterly along Morada Drive to its intersection with Norrbom Road; then, starting southwesterly along Norrbom Road to its intersection with the boundary line of the City of Sonoma; then, northwesterly along said boundary line to it intersection with 5th Street W; then, southwesterly along 5th Street W to its intersection with Leveroni Road; then, starting northwesterly along Leveroni Road to its intersection with Arnold Drive; then, starting northeasterly along Arnold Drive to its intersection with Sperring Road; then, southwesterly along Sperring Road to its intersection with Mocabee Road; then, southeasterly along Mocabee Road to its intersection with Felder Road; then, starting southwesterly along Felder Road to its intersection with Felder Creek; then, starting northwesterly along Felder Creek to its intersection with Lewis Creek; then, northwesterly along Lewis Creek to its point of beginning; then, northeasterly along an imaginary line to its intersection with the southern most point of Fowler Road; then, northerly along Fowler Road to its intersection with Grove Street; then, northwesterly along Grove Street to its intersection with White Alder; then, northeasterly along an imaginary line to the southwestern most

point of Adele's Way; then, starting easterly along Adele's Way to its intersection with Katie Lane; then, northwesterly along Katie Lane to its intersection with Sobre Vista Road; then, starting northeasterly along Sobre Vista Road to its intersection with Arnold Drive; then, northwesterly along Arnold Drive to the point of beginning.

- (c) Articles and Commodities Covered. The following are declared to be hosts and possible carriers of light brown apple moth.
 - (1) All nursery stock.
 - (2) All green waste residues from any plants.
- (3) All fresh garlands, wreaths, cut flowers and greens produced within the area under quarantine.
- (4) All harvested fruits and vegetables produced within the area under quarantine except the following commercially–produced crops:

Artichoke (globe)

Asparagus

Beets without tops

Bok Choy

Broccoli

Brussel sprouts

Carrots without tops

Celery

Cabbage

Cauliflower

Collard greens

Kale

Kohlrabi

Lettuce (head and leaf)

Olive

Parsley

Peppers

Potato

Pumpkin

Radish without tops

Spinach

Squash

Tomato

Walnuts

- (5) Any other harvested plant parts which by scientific investigation is shown to be capable of sustaining light brown apple moth in any stage of development.
- (6) Possible carriers shall include all appliances used in the growing, harvesting, processing and hauling of the host plants and plant parts and any green waste residues including but not limited to tractors, trailers, trucks, planting, picking and pruning equipment and processing machinery and any other article, thing or means of conveyance when it is determined by the Secretary or county agricultural commissioner to present a hazard of spreading live life stages of the light brown apple moth.
- (7) Exemptions. The following articles are exempt from the provisions of this subsection:
 - (A) Seed extracted from fruit;
 - (B) Defoliated dormant bare-rooted nursery stock;
- (C) Defoliated dormant nursery stock in containers where all leaf litter and any weeds have been removed;
 - (D) Privately-owned indoor decorative houseplants; and,
- (E) Dying or dead plant material (green waste) that has been processed or handled or treated in a manner approved by the Secretary to eliminate live life stages of the light brown apple moth and is moved directly to a city or county sanitary landfill or State licensed compost facility within the quarantine area.
 - (d) Restrictions.
- (1) Articles and commodities covered in subsection (c)(1), (2), (3), (4) and (5) are prohibited movement within or from the area under quarantine except as provided in (A), (B), (C), (D) and (E) below:
- (A) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities originated from a site or facility which is apparently free from light brown apple moth.

- (B) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities have been inspected or treated in a manner approved by the Department and are apparently free from light brown apple moth.
- (C) If purchased at a retail sales location and accompanied by a sales receipt.
- (D) If the article or commodity was produced outside the area under quarantine and is being moved through the area under quarantine by direct route and without delay in vehicles or containers which prevent exposure to infestation of the article or commodity to light brown apple moth while en route through the area.
- (E) If the article or commodity covered is moved under the terms of a special permit as authorized under Title 3, Section 3154 of the California Code of Regulations.
- (2) Articles and commodities covered in subsection (c)(6) are prohibited movement within or from the area under quarantine except if cleaned and treated to the satisfaction of the Department or county agricultural commissioner.

- 1. New section filed 4–20–2007 as an emergency; operative 4–20–2007 (Register 2007, No. 16). A Certificate of Compliance must be transmitted to OAL by 10–17–2007 or emergency language will be repealed by operation of law on the following day.
- 2. Repealer of subsections (b)(1)–(4) and new subsections (b)(1)–(10) filed 6–6–2007 as an emergency; operative 6–6–2007 (Register 2007, No. 23). A Certificate of Compliance must be transmitted to OAL by 12–3–2007 or emergency language will be repealed by operation of law on the following day.
- 3. New subsection (b)(9) and subsection renumbering filed 6-7-2007 as an emergency; operative 7-7-2007 (Register 2007, No. 23). A Certificate of Compliance must be transmitted to OAL by 12-4-2007 or emergency language will be repealed by operation of law on the following day.
- 4. Amendment of subsections (b)(1), (b)(7) and (c)(4) filed 6-21-2007 as an emergency; operative 6-21-2007 (Register 2007, No. 25). A Certificate of Compliance must be transmitted to OAL by 12-18-2007 or emergency language will be repealed by operation of law on the following day.
- Amendment filed 7–18–2007 as an emergency; operative 7–18–2007 (Register 2007, No. 29). A Certificate of Compliance must be transmitted to OAL by 1–14–2008 or emergency language will be repealed by operation of law on the following day.
- 6. Amendment of subsection (b)(1), repealer of subsection (b)(1)(A) designator and subsection (b)(1)(B), amendment of subsections (b)(2)(A)-(B), (b)(5), (b)(6), (b)(8)-(9) and (b)(10)(A), repealer of subsection (b)(10)(C) and amendment of subsections (b)(11)-(b)(11)(A) and (b)(12)-(13) filed 8-21-2007 as an emergency; operative 8-21-2007 (Register 2007, No. 34). A Certificate of Compliance must be transmitted to OAL by 2-19-2008 or emergency language will be repealed by operation of law on the following day.
- Amendment filed 9–28–2007 as an emergency; operative 9–28–2007 (Register 2007, No. 39). A Certificate of Compliance must be transmitted to OAL by 3–26–2008 or emergency language will be repealed by operation of law on the following day.
- 8. Amendment of subsections (b)(8) and (b)(10)(A)–(B) filed 11–9–2007 as an emergency; operative 11–9–2007 (Register 2007, No. 45). A Certificate of Compliance must be transmitted to OAL by 5–7–2008 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–20–2007, 6–6–2007, 6–7–2007, 6–21–2007 and 7–18–2007 orders transmitted to OAL 10–2–2007 and filed 11–15–2007 (Register 2007, No. 46)
- 10. Amendment of subsection (b)(3), repealer of subsections (b)(5)–(7), (b)(9)(A)–(B) and (b)(11), subsection renumbering and amendment of newly designated subsections (b)(6)(A) and (b)(7) filed 11–29–07 as an emergency; operative 11–29–07 (Register 2007, No. 48). A Certificate of Compliance must be transmitted to OAL by 5–27–08 or emergency language will be repealed by operation of law on the following day.
- 11. Amendment of subsection (b)(4), repealer of subsection (b)(4)(A) designator and subsection (b)(4)(B) and amendment of subsection (b)(7) filed 12–3–2007 as an emergency; operative 12–3–2007 (Register 2007, No. 49). A Certificate of Compliance must be transmitted to OAL by 6–2–2008 or emergency language will be repealed by operation of law on the following day.
- 12. Amendment of subsections (b)(3) and (b)(7) filed 12–21–2007 as an emergency; operative 12–21–2007 (Register 2007, No. 51). A Certificate of Compliance must be transmitted to OAL by 6–18–2008 or emergency language will be repealed by operation of law on the following day.
- 13. Amendment of subsection (b)(3) filed 2–4–2008 as an emergency; operative 2–4–2008 (Register 2008, No. 6). A Certificate of Compliance must be trans-

- mitted to OAL by 8-4-2008 or emergency language will be repealed by operation of law on the following day.
- 14. Amendment of subsections (b)(3) and (b)(7) filed 2–11–2008 as an emergency; operative 2–11–2008 (Register 2008, No. 7). A Certificate of Compliance must be transmitted to OAL by 8–11–2008 or emergency language will be repealed by operation of law on the following day.
- 15. New subsection (b)(5) and subsection renumbering filed 2–22–2008 as an emergency; operative 2–22–2008 (Register 2008, No. 8). A Certificate of Compliance must be transmitted to OAL by 8–20–2008 or emergency language will be repealed by operation of law on the following day.
- 16. Amendment of subsections (b)(3), repealer of subsection (b)(4) and subsection renumbering filed 3–12–2008 as an emergency; operative 3–12–2008 (Register 2008. No. 11). A Certificate of Compliance must be transmitted to OAL by 9–8–2008 or emergency language will be repealed by operation of law on the following day.
- 17. Amendment of subsection (b)(3) filed 3-17-2008 as an emergency; operative 3-17-2008 (Register 2008. No. 12). A Certificate of Compliance must be transmitted to OAL by 9-15-2008 or emergency language will be repealed by operation of law on the following day.
- 18. Amendment of subsection (b)(5), new subsection (b)(7) and subsection relettering filed 3–21–2008 as an emergency; operative 3–21–2008 (Register 2008, No. 12). A Certificate of Compliance must be transmitted to OAL by 9–17–2008 or emergency language will be repealed by operation of law on the following day.
- 19. Certificate of Compliance as to 8–21–2007 order, including further amendment of subsection (b)(5), transmitted to OAL 2–11–2008 and filed 3–26–2008 (Register 2008, No. 13).
- 20. Amendment of subsection (b)(3) filed 4–8–2008 as an emergency; operative 4–8–2008 (Register 2008, No. 15). A Certificate of Compliance must be transmitted to OAL by 10–6–2008 or emergency language will be repealed by operation of law on the following day.
- 21. Certificate of Compliance as to 9–28–2007, 11–9–2007, 11–29–2007 and 12–3–2007 orders transmitted to OAL 3–4–2008 and filed 4–16–2008 (Register 2008, No. 16).
- 22. Amendment of subsection (b)(8) filed 4–18–2008 as an emergency; operative 4–18–2008 (Register 2008, No. 16). A Certificate of Compliance must be transmitted to OAL by 10–15–2008 or emergency language will be repealed by operation of law on the following day.
- 23. Amendment of subsection (b)(5) and new subsection (b)(10) filed 5-2-2008 as an emergency; operative 5-2-2008 (Register 2008, No. 18). A Certificate of Compliance must be transmitted to OAL by 10-29-2008 or emergency language will be repealed by operation of law on the following day.
- 24. Amendment of subsection (b)(3), new subsection (b)(4), subsection renumbering, repealer of subsection (b)(8) and amendment of subsection (b)(9) filed 5–7–2008 as an emergency; operative 5–7–2008 (Register 2008, No. 19). A Certificate of Compliance must be transmitted to OAL by 11–3–2008 or emergency language will be repealed by operation of law on the following day.
- 25. Amendment of subsection (b)(3), repealer of subsection (b)(4), subsection renumbering and amendment of newly designated subsections (b)(5) and (b)(7) filed 5-23-2008 as an emergency; operative 5-23-2008 (Register 2008, No. 21). A Certificate of Compliance must be transmitted to OAL by 11-19-2008 or emergency language will be repealed by operation of law on the following day.
- 26. Repealer of subsection (b)(1), subsection renumbering, amendment of newly designated subsections (b)(2) and (b)(3), new subsections (b)(3)(A)–(B) and amendment of newly designated subsections (b)(4) and (b)(6) filed 6–4–2008 as an emergency; operative 6–4–2008 (Register 2008, No. 23). A Certificate of Compliance must be transmitted to OAL by 12–1–2008 or emergency language will be repealed by operation of law on the following day.
- 27. Amendment of subsection (b)(2), repealer of subsection (b)(5)(A) and redesignation of former subsection (b)(5)(B) as subsection (b)(5) filed 6–11–2008 as an emergency; operative 6–11–2008 (Register 2008, No. 24). A Certificate of Compliance must be transmitted to OAL by 12–8–2008 or emergency language will be repealed by operation of law on the following day.
- 28. Amendment of subsection (b)(2), repealer of subsection (b)(3)(A), redesignation and amendment of former subsection (b)(3)(B) as subsection (b)(3) and amendment of subsections (b)(5) and (b)(7) filed 6–16–2008 as an emergency; operative 6–16–2008 (Register 2008, No. 25). A Certificate of Compliance must be transmitted to OAL by 12–15–2008 or emergency language will be repealed by operation of law on the following day.
- 29. Certificate of Compliance as to 12–21–2007, 2–4–2008, 2–11–2008, 2–22–2008 and 3–12–2008 orders transmitted to OAL 5–27–2008 and filed 7–9–2008 (Register 2008, No. 28).
- 30. Amendment of subsection (b)(4) filed 7–11–2008 as an emergency; operative 7–11–2008 (Register 2008, No. 28). A Certificate of Compliance must be transmitted to OAL by 1–7–2009 or emergency language will be repealed by operation of law on the following day.
- 31. Amendment of subsection (b)(2) filed 7-28-2008 as an emergency; operative 7-28-2008 (Register 2008, No. 31). A Certificate of Compliance must be transmitted to OAL by 1-26-2009 or emergency language will be repealed by operation of law on the following day.

Article 5. Miscellaneous Rulings

§ 3550. Plant Products Exempt from Holding for Inspection.

HISTORY

- 1. Amendment filed 9–19–58 as an emergency; effective upon filing (Register 58, No. 17). For prior history, see Register 56, No. 3.
- Certificate of Compliance—Section 11422.1, Government Code, filed 11-18-58 (Register 58, No. 22).
- Amendment filed 3–15–72; effective thirtieth day thereafter (Register 72, No. 12).
- 4. Amendment filed 5-7-74; effective thirtieth day thereafter (Register 74, No. 19)
- 5. Amendment filed 10–15–74; effective thirtieth day thereafter (Register 74, No. 42)
- 6. Repealer filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3551. Pear Decline Is "Pest."

NOTE: Authority cited: Sections 16 and 100(a)(1), Food and Agricultural Code.

HISTORY

- New section filed 12–28–60 as an emergency; effective upon filing. Certificate
 of Compliance—Sec. 11422.1, Government Code, included (Register 61, No.
 1).
- 2. Repealer filed 3-5-71; effective thirtieth day thereafter (Register 71, No. 10).

§ 3552. Hold Used Cotton Machinery for Inspection in San Joaquin Valley Quality Cotton District.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Sections 52851–52855, 52901, and 52971–52976, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–25–63; effective thirtieth day thereafter (Register 63, No. 5).
- 2. Amendment of subsection (c) filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Amendment filed 1–17–80; effective thirtieth day thereafter (Register 80, No. 3)
- 4. Amendment filed 3-11-92; operative 4-10-92 (Register 92, No. 12).
- 5. Renumbering of former section 3552 to new section 3821.1 filed 5–7–97; operative 6–6–97 (Register 97, No. 19).

§ 3555. Dissemination of Pests Through the Agency of Appliances.

NOTE: Authority cited: Sections 407 and 5741, Food and Agricultural Code.
HISTORY

- 1. Amendment filed 8–30–65 as an emergency; effective upon filing (Register 65, No. 16). For prior history see Register 63, No. 18.
- 2. Certificate of Compliance—Section 11422.1, Government Code, filed 11-10-65 (Register 65, No. 21).
- 3. Editorial change of cited authority to conform to Food and Agricultural Code, 1967 Stats., c. 15 (Register 68, No. 13).
- Amendment of subsection (a) and new subsection (e) filed 3–15–72; effective thirtieth day thereafter (Register 72, No. 12).
- 5. Repealer filed 3-29-83; effective thirtieth day thereafter (Register 83, No. 14).

§ 3556. Dissemination of Weed Pests Through the Movement of Feed Grain.

The Secretary of the California Department of Food and Agriculture designates feed grain as a thing liable to be infested with pests.

Any person receiving or moving feed grain from within the state shall notify the county agricultural commissioner of the arrival of such grain, and hold the same for inspection by the commissioner, without unnecessarily moving or placing such grain where it may grow or be disseminated or contaminate clean grain. The commissioner may waive the requirement of notification of arrival and holding for inspection at destination on shipments which are accompanied by a certificate of cleanliness or the commissioner may waive the requirement of holding uncertified shipments for inspection if any such shipment is destined to a mill or establishment which has been approved by the Secretary or Commissioner as being capable of processing or storing feed grain infested with weed seed pests in such a manner that no contamination of clean grain or dissemination of the pests would result. The Secretary will

issue a list of approved mills and establishments showing their locations, weed seed pests each may receive, and the approved methods of handling infested feed grain.

- (a) Definitions. As used in this section:
- (1) "Feed grain" means the whole seed or seed–like fruits of grain, including wheat, barley, oat, rye, sorghum, and corn, for any use other than planting
- (2) "Restricted weed seed pests liable to be disseminated through the movement of feed grain" means viable seed or propagule of the following weeds: Acroptilon repents, Russian knapweed; Alhagi maurorum, camelthorn; Cardaria chalepensis, lens-podded hoary cress; Cardaria draba, heart-podded hoary cress; Cardaria pubescens, globe-podded hoary cress; Centaurea solstitialis, yellow starthistle; Cirsium avense, Canada thistle; Convolvulus arvensis, field bindweed; Elytrigia repens, quackgrass; Euphorbia esula, leafy spurge; Gaura coccinea, scarlet gaura; Gaura drummondii, scented gaura; Gaura sinuata, wavyleaf gaura; Helianthus ciliaris, blueweed; Lepidium latifolium, perennial peppercress; Rorippa austriaca, Austrian fieldcress; Salvia virgata, meadow sage; Setaria faberi, giant foxtail; Solanum carolinense. Carolina horse nettle; Solanum elaeagnifolium, white horsenettle; Sonchus arvensis, perennial sowthistle; Sorghum halepense, Johnsongrass.
- (b) Standards of Cleanliness for Feed Grain. To be eligible for certification under provisions of this section, feed grain shall be free of mature seed or propagule of restricted weed seed pests liable to be disseminated through the movement of feed grain, as listed in subsection (a)(1), except that a tolerance shall be allowed of up to five (5) seeds each of Johnsongrass, field bindweed, and yellow starthistle, per pound of feed grain examined.
- (c) Certificates of Cleanliness may be issued by the commissioner whenever adequate inspection has been made of the field or when samples are drawn from any conveyance, mill, or storage facility and it has been determined that the feed grain meets the standard of cleanliness. Continued identity of all such certified feed grain shall be maintained to prevent commingling with uninspected or infested feed grain.
- (d) Inspection Counties. Any commissioner who elects to accept certificates of cleanliness issued in compliance with this section, shall so notify the Secretary in writing. The Secretary will issue a list of counties where certificates of cleanliness will be accepted.
- (e) Disposition of Infested Shipments. Any shipment of feed grain found to be infested with the seed of any pest not of common occurrence in the county or locality into which such shipment is brought is subject to the provisions of Sections 6341 to 6344, inclusive, of the Food and Agricultural Code. With the approval of the commissioner at destination, such shipments may be allowed to move in quarantine to an approved mill or establishment.

NOTE: Authority cited: Sections 407 and 5721, Food and Agricultural Code. Reference: Sections 5721 and 6501, Food and Agricultural Code.

HISTORY

- 1. Amendment of section and filed 1-13-78; effective thirtieth day thereafter (Register 78, No. 2). For prior history, see Register 68, No. 13.
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 3. Amendment filed 5-7-97; operative 6-6-97 (Register 97, No. 19).

§ 3557. Seed Screenings and Cleanings.

The Secretary of the Department of Food and Agriculture promulgates this regulation pertaining to seed screenings and cleanings for the purpose of preventing the dissemination of the seed of any pest through the movement of seed screenings or cleanings from crop seed.

- (a) Definitions. As used in this Section:
- (1) "Screenings" means seed screenings or cleanings from crop seeds, and includes all products or materials removed from crop seed by any means whatsoever.
- (2) "Pest" means any form of vegetable life that is or is liable to be dangerous or detrimental to the agricultural industry of the state.
- (3) "Crop seed" means the seed or seed-like fruit of grain, beans, flax, beets, onions or any other crop, whether or not intended for planting purposes.

- (4) "Processing" means cleaning, grinding or other treatment, including destruction, of screenings to prevent the dissemination of the seed of any pest or render the seed of any pest present or liable to be present incapable of reproduction.
 - (b) Inspection.
- (1) If upon inspection the county agricultural commissioner finds the screenings to be free of the seed of any pest and the screenings will be utilized in his county, he shall release the screenings with an inspection and release stamp. The lot of screenings shall be marked or segregated in order to maintain its identity until final disposition.
- (2) If upon inspection the commissioner finds the screenings to contain the seed of any pest, he shall notify the person in possession that such screenings are subject to the processing requirements as set forth in Section 7571 to 7581, inclusive, Food and Agricultural Code. If the grower of the crop seed from which the screenings were removed elects to have the screenings returned, they may be returned to the growing origin under permit as provided in subsection (d)(1),
 - (c) Approved Processing Mills or Establishments.
- (1) Any person operating a mill or establishment which processes screenings containing the seed of any pest may apply to the commissioner for approval of the equipment and operating procedures. Approval for processing shall be granted whenever the commissioner determines that the equipment is adequate and is operated in such a manner, to handle screenings without risk of disseminating the seed of any pest or to render the seed of any pest incapable of reproduction.
- (2) Approval may be withdrawn at any time upon determination by the commissioner that the terms of approval are not complied with.
- (3) The Commissioner shall list with the Secretary, all mills and establishments for which approval has been granted, together with the conditions, if any, of such approval, and shall notify the Secretary of any approval withdrawn, and the reasons therefore. The Secretary will issue a list of mills and establishments approved by county agricultural commissioners showing their locations and the source of screenings and cleanings approved for each listing.
 - (d) Permits.
- (1) Applications for permits to move screenings containing the seed of any pest for destruction, processing or return to growing origin shall be made to the Commissioner of the county in which the screenings are located. No permit shall be issued for movement of screenings into another county except to processing mills and establishments approved by the commissioner of the county of destination, as provided in subsection (c).
- (2) Permits shall be in writing, listing the name and address of the permittee, owner or person in possession of the screenings, and the name of the approved processing establishment receiving the screenings. A statement naming the pest or pests present and any other conditions governing the use of the permit such as tightly closed containers, holding for destination inspection, and expiration date may be included. The original of each permit shall be signed by the enforcing officer.

NOTE: Authority cited: Sections 407 and 7502, Food and Agricultural Code. Reference: Sections 7502, 7571, 7572, 7573, 7575 and 7576, Food and Agricultural Code.

HISTORY

- Amendment of subsection (b) filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 68, No. 25.
- Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 3. Amendment filed 5-7-97; operative 6-6-97 (Register 97, No. 19).

§ 3558. Insects Which May Be Imported or Shipped Into or Within California Without a Permit.

Section 6305 of the Food and Agricultural Code requires persons to obtain a permit from the director or the United States Department of Agriculture to import into, or ship or transport within, the state live insects except for certain exemptions. One of these exemptions is for beneficial or useful insects of common occurrence in the state. To identify which beneficial insects do not require a permit to import into, or ship or trans-

port within, the state the following lists are provided. However, as with all insect shipments they shall be rejected when the insects are moved in conjunction with host plants or other host organisms when such hosts would normally be rejected if moving independently.

(a) Insects for which a permit is not required:

Acmon blue (Plebejus acmon)

Alderflies, dobsonflies (Megaloptera)

Alfalfa butterfly (Colias eurytheme)

Alkali bees (Nomia melanderi)

Almond moth (Cadra cautella)

American cockroach (Periplaneta americana)

American painted lady (Vanessa virginiensis)

Angelwinged katydid (Microcentrum rhombifolium)

Angoumois grain moth (Sitogroga cerealella)

Anise swallowtail (Papilio zelicaon)

Antlions (Myrmeleontidae)

Argentine ant (Linepithema humile)

Armyworm (Pseudaletia unipunctata)

Backswimmers (Notonectidae)

Beet armyworm (Spodoptera exigua)

Black blow fly (Phormia regina)

Black cutworm (Agrotis ipsilon)

Bluebottle fly (Calliphora vicina)

Buckeye butterfly (Precis coenia)

Caddisflies (*Trichoptera*)

Cat flea (Ctenocephalides felis)

California dogface butterfly (Colias [Zerene] eurydice)

California ringlet (Coenonympha californica)

California sister (Adelpha bredowii)

Carolina mantid (Stagomantis carolina)

Ceanothus silk moth (Hyalophora euryalis)

Chalcedon checkerspot (Euphydryas chalcedona)

Checkered white (Pieris [Pontia] protodice)

Chinese mantid (Tenodera aridifolia sinensis)

Cigarette beetle (Lasioderma serricorne)

Clodius Parnassian (Paranassius clodius)

Clouded sulfur (Colias pholidice)

Cloudless sulfur (Phoebis sennae)

Codling moth (Cydia pomonella)

Common black field cricket (Gryllus sp.)

Common checkered skipper (Pyygus communis)

Confused flour beetle (Tribolium confusum)

Convergent ladybird beetle (Hippodamia convergens)

Corn earworm (Helicoverpa zea)

Damselflies, dragonflies (Odonata)

Darkling beetles (Eleodes spp.)

Dermestid beetles (Anthrenus flavipes, Anthrenus scrophulariae, Attagenus megatoma)

Diamondback moth (Plutella xylostella)

Diplurans (Diplura)

Dobsonflies (Coryalidae)

Dog flea (Ctenocephalides canis)

Embiids (Embioptera)

European earwig (Forificula auricularia)

European mantid (Mantis religiosa)

Fall armyworm (Spodoptera frugiperda)

Field cresent (Phyciodes campestris)

Firebrat (Thermobia domestica)

Flesh fly (Sarcophaga haemorrhoidalis)

German cockroach (Blatella germanica)

Giant black water beetle (Hydrophilus triangularis)

Giant lacewings (Polystoechotidae)

Giant roach (Blaberus giganteus)

Green lacewing (Chrysopa carnea)

Green peach aphid (Myzus persicae)

Greenbottle flies (*Phaenicia sericata*, *P. pallescens=P. cuprina*)

Greenhouse thrips (Heliothrips haemorrhoidalis)

Greenhouse whitefly (Trialeurodes vaporariorum)

Gulf fritillary (Agraulis vanillae)

Harlequin bug (Murgantia histrionica)

Harvester ants (Pogonomyrmex californicus)

Harvestman (Phalangida)

Hissing cockroach (Gromphadorhina portentosa, Gromphadorhina spp.)

House cricket (Acheta domesticus)

House fly (Musca domestica)

Human flea (Pulex irritans)

Imported cabbage butterfly (Artogeia rapae)

Indian meal moth (Plodia interpunctella)

Iris mantid (Iris oratoria)

Jerusalem crickets (Stenopelmatus spp.)

Large milkweed bug (Oncopeltus fasciatus)

Leaf cutter bees (Megachile rotundata)

Limibatid mantid (Stagomantis limibata)

Little house fly (Fannia canicularis)

Lorquin's admiral (Limenitis [Basilarchia] lorquini)

Mayflies (Ephemeroptera)

Meal moth (Pyralis farinalis)

Mealworms (Tenebrio molitor and T. obscurus)

Mealybug destroyer (Cryptolaemus montrouzieri)

Mediterranean flour moth (Anagasta kuehniella)

Milbert's tortoise shell (Aglais milberti)

Millipedes (Diplopoda)

Mourning cloak butterfly (Nymphalis antiopa)

Mylitta crescent (Phyciodes mylitta)

Naval orangeworm (Amyelois transitella)

Orange dog butterfly (Papilio cresphontes)

Oriental cockroach (Blatta orientalis)

Painted lady butterfly (Vanessa cardui)

Pale swallowtail (Papilio eurymedon)

Pauropods (Pauropoda)

Pine white (Neophasia menapia)

Pipevine swallowtail (Battus philenor)

Polyphemus silkmoth (*Antheraea polyphemus*)

Pomace flies (Drosophila spp.)

Potato tuberworm (Phthorimaea operculella)

Proturans (Protura)

Psuedoscorpions (Chelonethida)

Queen (Danaus gilippus)

Red admiral butterfly (Vanessa atalanta)

Rock crawlers (Grylloblattodea)

Sara orangetip (Anthocaris sara)

Satyr anglewing (Polygonia satyrus)

Scorpionflies (Mecoptera)

Symphlids (Symphyla)

Silkworm (Bombyx mori)

Silverfish (Lepisma saccharina)

Small milkweed bug (Lygaeus kalmii)

Snakeflies (Raphidoptera)

Stable fly (Stomoxys calcitrans)

Stag beetles (Lucanidae)

Stoneflies (Plecoptera)

Tenodera mantid (Tenodera augustipennis)

Timemas (Timemidae)

Tobacco hornworm (Manduca sexta)

Tomato hornworm (Manduca quinquemaculata)

Twisted wing parasites (Strepsiptera)

Two-tailed swallowtail (Papilio multicaudata)

Velvent ants (Mutillidae)

Walnut husk fly (Rhagoletis completa)

Water boatman (Corixidae)

Water striders (*Gerris* spp.)

Waterbugs (Belostomatidae)

Wax worm or bee moth (Galleria mellonella)

Webbing clothes moth (*Tineola biselliella*)

West coast lady (Vanessa annabella)

Western tailed blue (Everes amyntula)

Western tiger swallowtail (*Papilio rutulus*)

Whip scorpions (Amblypygi, Microthelypohonida, Pedipalpida, and Schizopeltida)

Whirligig beetles (Gyrinidae)

White lined sphinx (Hyles lineata)

Wind scorpions (Solpugida)

Zephyr angelwing (Polygonia zephyrus)

Zorapterans (Zoraptera)

- (b) Groups of insects for which a permit is not required when the insect species under consideration is of common occurrence in California.
 - (1) Predacious species of beetles of the family Coccinellidae.
 - (2) Predacious species of flies of the family Syrphidae.
- (3) Predacious species of Neuropterous insects of the family Chrysopidae.
 - (4) Parasitic species of flies of the family Tachinidae.
- (5) Parasitic species of Hymenopterous insects of the families: Ichneumonidae, Braconidae, Aphelinidae, Chalcididae, Scelionidae, and Trichogrammatidae.
- (6) Insects that have been introduced and previously released in California for biological control of insect, weed, or other types of pests.

NOTE: Authority cited: Sections 407 and 5302, Food and Agricultural Code. Reference: Section 6305, Food and Agricultural Code.

HISTORY

- 1. New section filed 4-3-74; effective thirtieth day thereafter (Register 74, No. 14).
- 2. Repealer and new section filed 3–29–83; effective thirtieth day thereafter (Register 83, No. 14).
- 3. Amendment filed 5-7-97; operative 6-6-97 (Register 97, No. 19).
- 4. Editorial correction of subsection (a)(24) (Register 2004, No. 27).
- 5. Amendment of subsection (a), including removal of numbered subsection designators, and amendment of subsection (b)(5) filed 7-2-2004; operative 8-1-2004 (Register 2004, No. 27).

§ 3559. Garlic Production in Mono County.

- (a) The director finds that certain pests of garlic (*Allium satvium*), namely stem and bulb nematode (*Ditylenchus dipsaci*), white rot fungus (*Sclerotium cepivorum*), garlic yellow stripe virus, and pink root (*Pyrenochaeta terrestris*), are not known to occur in the garlic production areas of Mono County specified in (b).
- (b) A quarantine area is established, for the purpose of maintaining the pest cleanliness of garlic plantings in that area, which, for purposes of this section, is denominated as follows:
- (1) "Antelope Valley": Beginning at the intersection of the California–Nevada State Line and the southern portion of Topaz Lake; then southeasterly along said state line to Eastside Road; then southwesterly along Eastside Road to Interstate Highway 395; then westerly along an imaginary line to the border of Toiyabe National Forest; then northerly along an imaginary line to T9N; then easterly along T9N to Interstate Highway 395; then northerly along said highway to Topaz Lake; then southeasterly along Topaz Lake to the point of beginning;
- (2) "Benton, Hammil, and Chalfant Valleys": Beginning at the intersection of State Highway 6 and the California–Nevada State Line, then southeasterly along said state line to its intersection with the Inyo National Forest Boundary, then southerly and easterly along said boundary to its intersection with the Inyo–Mono County Line, then westerly along said county line to its intersection with Fish Slough Road, then northerly along said road to its intersection with Black Rock Mine Road, then northwesterly along Black Rock Mine Road to its intersection with Joe Maive Road, then northwesterly along said road to its intersection with Yellow Jacket Road, then northerly along Yellow Jacket Road to its intersection with State Highway 120, then due north along an imaginary line to the point it intersects the Inyo National Forest Boundary, then

northasterly along said boundary to its intersection with the California–Nevada State Line, then southeasterly along said line to the point of beginning.

(c) No garlic plant or part thereof shall be planted or maintained in any state of cultivation in the quarantine area unless a written application has been received and a permit has been issued by the director or the Agricultural Commissioner for Mono County.

Such permit shall be issued provided the garlic is the progeny of plants tested by the University of California and found free of the garlic yellow stripe virus; has been produced under the provisions of Section 3044 et seq., "California Certified Seed Garlic," or is accompanied by a certificate issued by a State or county agricultural regulatory official verifying the garlic is of equivalent pest status as garlic produced under said provisions; and provided the director or commissioner determines the garlic covered by the permit is free of the pests specified in subsection (a) and other serious pests of garlic.

(d) No person shall bring into the quarantine area any machinery, parts of machinery, tools, equipment, or other appliances which have been used in garlic fields outside the quarantine area unless those appliances have been treated for garlic pests which may be carried on them. The treatment shall include a high–pressure steam cleaning or washing with water under pressure to remove all soil and debris, followed by treatment with a fungicide.

The agricultural commissioner shall be immediately notified of the arrival in the quarantine area of such appliances which shall be held for inspection by the commissioner before use in the quarantine area. If, upon inspection, soil or debris is detected, the appliances shall be treated, as specified above, or removed from the quarantine area.

Article 6. Airport and Marine Terminal Inspection.

§ 3560. Facility Service Charges and User Fees.

- (a) Pursuant to sections 5351 and 5353(a), each air carrier or foreign air carrier shall pay a service charge of forty—three dollars (\$43) to the Secretary upon the initial landing in California of each flight of the carrier which originated outside the United States from a country to which a current United States Department of Agriculture quarantine or California Department of Food and Agriculture quarantine is applicable, or which made an intermediate stop on that flight in such a country. Any carrier may apply for an exemption from Department inspection and payment of the fee as to particular flights on the basis that the aircraft's operations and other inspections and certifications provide adequate compliance with the objectives of the Act.
- (b) Pursuant to sections 5352 and 5353(b), each marine carrier engaged in foreign commerce shall pay a user fee of one hundred dollars (\$100) to the Secretary upon the initial arrival in California of a carrier's vessel on a voyage which originated outside the United States from a country to which a current United States Department of Agriculture quarantine or California Department of Food and Agriculture quarantine is applicable, or which made an intermediate stop on that voyage in such a country. Any carrier may apply for an exemption from Department inspection and payment of the fee as to particular voyages on the basis that the carrier's operations and other inspections and certifications provide adequate compliance with the objectives of the Act.
- (c) Each air and marine carrier subject to the above charges or fees shall file a return quarterly in the form prescribed by the Secretary, verified by the company officer primarily responsible for supervising the preparation of the return and assuring its accuracy. The return accompa-

nied by full payment, shall be timely filed so as to be received by the Cashier of the California Department of Food and Agriculture within thirty (30) days following the quarters ending on March 31, June 30, September 30 and December 31. Returns not received by such dates, or received without required information and verification, shall be subject to the penalty prescribed by section 5353, subsection (d).

HISTORY

- New section submitted to OAL for printing only pursuant to Food and Agricultural Code section 5353(h) filed 3-15-91; operative 4-1-91 (Register 91, No. 15).
- 2.Amendment filed 12–22–94; operative 1–1–95. Submitted to OAL for printing only (Register 94, No. 51).

Subchapter 5. Insect Pest Control

§ 3580. Citrus Whitefly Districts.

NOTE: New authority cited: Sections 407 and 5901, Food and Agricultural Code. Reference: Sections 5901–5907, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 2–9–68 as an emergency; effective upon filing (Register 68, No. 6). For prior hisory, see Register 67, No. 18.
- Certificate of Compliance—Section 11422.1, Govt. Code, filed 3–19–68 (Register 68, No. 12).
- 3. Repealer filed 6-4-76; effective thirtieth day thereafter (Register 76, No. 23).

Article 1. Pest Control Areas

§ 3581. Sweetpotato Weevil Control Area.

- (a) Proclamation of Control Area. That portion of the State of California described as follows, within which a certain pest, sweetpotato weevil (*Cylas formicarius elegantulus*), is known to exist or which has been exposed to infestation, is hereby proclaimed to be a control area with respect to said pest:
- (1) Control Area. That portion of San Diego County bounded by a line drawn as follows: Beginning at the intersection of Sunset Cliffs Boulevard and Interstate Highway 8; then, easterly along Interstate Highway 8 to its intersection with Japatul Road; then, southwesterly along said road to its intersection with Lyons Valley Road; then, southwesterly along Lyons Valley Road to its intersection with Barrett Lake Road; then, southeasterly and southerly along Barrett Lake Road to its intersection with State Highway 94; then, southeasterly along said highway to its intersection with State Highway 188; then, southerly along State Highway 188 to its intersection with the United States—Mexico border; then, westerly along said border to its intersection with the Pacific Ocean coastline; then, northerly along said coastline to its intersection with Sunset Cliffs Boulevard; then, southwesterly along said boulevard to the point of beginning.
- (b) Hosts. Sweet potato plants and all plant parts except seed and including vines, draws, and slips, and sweet potato roots, also called yams, camote, batatas, boniatos, buniatos, and moniato (*Ipomoea batatas*), and morning–glory plants (*Ipomoea* spp., *Calystegia* spp., and *Convolvulus* spp.).
- (c) Possible Carriers. Possible carriers include all appliances used in the growing, harvesting, processing, storage, and movement of hosts, including but not limited to field bins, nursery and production growing areas, storage areas and facilities, trucks, tractors, harvesting equipment, processing equipment and facilities, and any other grounds, appurtenances, or things which the Department determines to be capable of harboring or spreading any stage of sweetpotato weevil.
- (d) Means and Methods. The following means and methods may be used by the Department in the control or eradication of sweetpotato weevil within the control area:
- (1) The search for all life stages of sweetpotato weevil by visual inspection, the use of traps, or any other means.

- (2) The use of insecticides, chemicals, or other materials as fumigant, spray, dust, bait, or in any other form as often as necessary to effect control or eradication.
 - (3) The cleaning and treatment of possible carriers.
- (4) The removal and destruction of hosts if the action is the only practical way of controlling or eliminating the infestation.
- (5) The removal and immediate destruction of infested host material. NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code, Reference: Sections 5321 and 5322, Food and Agricultural Code.

HISTORY

- 1. New article 1 (section 3581) and section filed 5–30–97 as an emergency; operative 5-30-97 (Register 97, No. 22). A Certificate of Compliance must be transmitted to OAL by 9-29-97 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 5-30-97 order transmitted to OAL 9-23-97 and filed 10-1-97 (Register 97, No. 40).

Article 2. Pest Eradication Areas

§ 3585. Western Grapeleaf Skeletonizer Eradication Area.

- 1. Amendment filed 4-30-75; effective thirtieth day thereafter (Register 75, No. 18). For prior history, see Register 75, No. 1.
- 2. Repealer filed 12-1-75; effective thirtieth day thereafter (Register 75, No. 51)

§ 3586. Western Cherry Fruit Fly Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5322 and 5761, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (d) filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 59, No. 1.
- 2. Amendment filed 3-9-83; effective thirtieth day thereafter (Register 83, No.
- 3. Repealer filed 9-28-84; effective thirtieth day thereafter (Register 84, No. 39).

§ 3587. Hall's Scale Eradication Area.

NOTE: Authority cited: Sections 16 and 108, Agricultural Code.

HISTORY

- 1. New section filed 9-23-52; effective thirtieth day thereafter (Register 29, No.
- 2. Repealer filed 11–2–67; effective thirtieth day thereafter (Register 67, No. 44).

§ 3588. Mexican Fruit Fly Eradication Area.

- (a) Proclamation of Eradication Area. All of the Counties of Riverside, San Bernardino, San Diego and Los Angeles, State of California, within which the Mexican fruit fly, Anastrepha ludens, is known to exist, are hereby proclaimed to be an eradication area with respect to said pest. As such, it is amenable to the provisions of article 4 (sections 5761–5764) of chapter 8, part 1, division 4 of the Food and Agricultural Code of California.
- (b) Hosts. All citrus fruits except lemons and sour limes; mangoes, sapotas (including sapodillas and the fruit of all members of the family Sapotaceae, and of the genus Casimiroa and all other fruits commonly called sapotas or sapotes) apples, apricots, ciruelas, guavas, mameys, peaches, pears, plums, pomegranates, quinces, and fruits of species of the genus Sargentia.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest in said area.
- (1) The use of insecticides, chemicals, or other materials as spray (including soil spray treatments), dust, bait, or in any other form as often as necessary to effect control or eradication.
- (2) The removal and destruction of hosts and of the fruit of such hosts if such action is the only practical way of eliminating the infestation.
- (3) The search for all stages of Mexican fruit fly by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted plants bearing or capable of bearing hosts.
- (5) The importation, rearing, or liberation of sterile forms of the Mexican fruit fly.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761-5764, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–14–89 as an emergency; operative 11–14–89 (Register 89, No. 46). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3–14–90. For prior history, see Registers 89, No. 11 and 87, No. 27.
- 2. Certificate of Compliance transmitted to OAL 3-13-90 and filed 4-12-90 (Register 90, No. 16).
- 3. Amendment of subsection (a) filed 5-14-90 as an emergency; operative 5-14-90 (Register 90, No. 26). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 9-15-90.
- 4. Certificate of Compliance as to 5-14-90 order transmitted to OAL 9-11-90 and filed 10-4-90 (Register 90, No. 46).
- 5. Amendment of subsection (a) filed 8-31-99 as an emergency; operative 8-31-99 (Register 99, No. 36). A Certificate of Compliance must be transmitted to OAL by 12-29-99 or emergency language will be repealed by operation of law on the following day.
- 6. Certificate of Compliance as to 8–31–99 order transmitted to OAL 12–27–99 and filed 1-21-2000 (Register 2000, No. 3).

§ 3589. Japanese Beetle Eradication Area.

- (a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which a certain pest, Japanese beetle, Popillia japonica, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest: The counties of Los Angeles, Merced, Orange, Riverside, San Bernardino and San Diego.
- (b) Hosts and Possible Carriers. Any and all premises, plants, plant products, soil, sod and any other articles or things which are infested or exposed to infestation by the Japanese beetle.
- (c) Means and Methods. The following means and methods may be used in the control and eradication of said pest within said area:
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait or in any other form as often as necessary to effect control or eradica-
- (2) The removal and destruction of hosts if such action is the only practical way of eliminating the infestation.
- (3) The searching for all stages of Japanese beetle by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted hosts in any stage of development.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5322, 5761, 5762 and 5763, Food and Agricultural Code.

- 1. New section filed 8–15–73 as an emergency; effective upon filing (Register 73, No. 33). For prior history, see Register 67, No. 44.
- Certificate of Compliance filed 11-9-73 (Register 73, No. 45).
- Repealer filed 6–4-76; effective thirtieth day thereafter (Register 76, No. 23). New section filed 7–1–83 as an emergency; effective upon filing (Register 83, No. 29). A Certificate of Compliance must be transmitted to OAL within 120
- days or emergency language will be repealed on 10-29-83 5. Certificate of Compliance as to 7–1–83 order transmitted to OAL 10–18–83 and filed 11-14-83 (Register 83, No. 47).
- 6. Editorial correction of subsection (c)(1) (Register 95, No. 40).
 7. Amendment of subsection (a) filed 4–24–97; operative 5–24–97 (Register 97, No. 17).
- 8. Amendment of subsection (a) and amendment of Note filed 7-3-2006 as an emergency; operative 7–3–2006 (Register 2006, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2006 or emergency language will be repealed by operation of law on the following day.

 9. Certificate of Compliance as to 7–3–2006 order transmitted to OAL 9–26–2006 and filed 10–5–2006 (Register 2006, No. 40).
- 10. Amendment of subsection (a) filed 7-6-2007 as an emergency; operative 7–6–2007 (Register 2007, No. 27). A Certificate of Compliance must be transmitted to OAL by 1–2–2008 or emergency language will be repealed by operation of law on the following day
- 11. Amendment of subsection (a) filed 7–23–2007 as an emergency; operative 7–23–2007 (Register 2007, No. 30). A Certificate of Compliance must be transmitted to OAL by 1-21-2008 or emergency language will be repealed by operation of law on the following day
- 12. Certificate of Compliance as to 7-6-2007 order transmitted to OAL 10-9-2007 and filed 11-14-2007 (Register 2007, No. 46).
- 13. Certificate of Compliance as to 7-23-2007 order transmitted to OAL 10–23–2007 and filed 12–6–2007 (Register 2007, No. 49).
- 14. Amendment filed 6-30-2008 as an emergency; operative 6-30-2008 (Register 2008, No. 27). A Certificate of Compliance must be transmitted to OAL by 12-29-2008 or emergency language will be repealed by operation of law on the following day.
- 15. Amendment of subsection (a) filed 8-1-2008 as an emergency; operative 8-1-2008 (Register 2008, No. 31). A Certificate of Compliance must be trans-

mitted to OAL by 1-28-2009 or emergency language will be repealed by operation of law on the following day.

§ 3589.1. Whitefringed Beetle Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which a certain pest, whitefringed beetle, *Graphognathus leucoloma*, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest:

The entire County of San Bernardino.

- (b) Hosts and Possible Carriers. Any and all premises, plants, plant products, soil, sod and any other articles or things which are infested or exposed to infestation by the whitefringed beetle.
- (c) Means and Methods. The following means and methods may be used in the control and eradication of said pest within said area:
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait or in any other form as often as necessary to effect control or eradication.
- (2) The removal and destruction of hosts if such action is the only practical way of eliminating the infestation.
- (3) The searching for all stages of whitefringed beetle by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted hosts in any stage of development.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761–5763, Food and Agricultural Code.

HISTORY

 New section filed 8-18-88 as an emergency; operative 8-18-88 (Register 88, No. 35). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12-16-88.

§ 3589.2. Sweet Potato Weevil Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761–5763, Food and Agricultural Code.

HISTORY

- New section filed 3-9-93 as an emergency; operative 3-9-93 (Register 93, No. 11). A Certificate of Compliance must be transmitted to OAL 7-7-93 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 3–9–93 order transmitted to OAL 6–17–93 and filed 7–19–93 (Register 93, No. 30).
- 3. Repealer filed 6–30–94 as an emergency; operative 6–30–94 (Register 94, No. 26). A Certificate of Compliance must be transmitted to OAL by 10–28–94 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 6–30–94 order transmitted to OAL 10–12–94 and filed 11–15–94 (Register 94, No. 46).
- 5. Editorial correction of HISTORY 3 (Register 94, No. 46).

§ 3590. Pink Bollworm Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows within which pink bollworm (*Pectinophora gossypiella*) is known to exist is hereby declared to be an eradication area.

The entire counties of Fresno, Imperial, Inyo, Kern, Kings, Los Angeles, Madera, Merced, Riverside, San Benito, San Bernardino, San Diego, and Tulare.

- (b) Definition. The following definitions are applicable to this section.
- (1) Pest. Pink bollworm (Pectinophora gossypiella).
- (2) Hosts. Cotton (Gossypium), okra (Hibiscus esculentus), kenaf (Hibiscus cannibinus) plants and plant parts and any crop residues thereof or any other plant which by investigation is shown to be capable of sustaining pink bollworm in any stage of development.
- (3) Possible Carriers. Possible carriers shall include all appliances used in the growing, harvesting, processingand hauling of seed cotton, cottonseed or cotton by–products including but not limited to tractors, trailers, trucks, planting, picking and shredding equipment, cotton gin and processing machinery, the grounds and appurtenances thereto and any lands where host plants are growing or were grown during the past season, or any other thing which by investigation is shown to be capable of harboring or spreading any stage of the pink bollworm. When the Director or Commissioner deems it necessary, no person shall move any vehicle, appliance, plant or plant parts or thing that is restricted in the Pink Bollworm Eradication Area except under permit issued by the Commissioner.

- (c) Implementing Procedures. In controlling pink bollworm of cotton, Agricultural Commissioners shall be responsible to the Director and shall carry out in their counties programs prescribed by the Director. The Commissioner or the Director may elect, as necessary, to implement some or all of the control methods stated in paragraph (d) and may require persons in possession of property upon which cotton is growing or stored or which contain other hosts of pink bollworm, to use these control methods. Host plants on such property which are not brought into compliance as required, and so maintained, shall be deemed a public nuisance and subject to abatement procedures at the expense of the owner or person in possession.
 - (d) Control Methods
- (1) The repeated application of insecticidal or herbicidal sprays or dusts or biological agents by approved methods to host plants or possible carriers capable of harboring or spreading the pink bollworm.
- (2) "Control Methods" and "Requirements for Further Planting" as stated in Section 3595.
- (3) Visual or mechanical survey to establish the efficacy of treatments and to determine further spread of pink bollworm.
- (4) Cleanup or treatment of all cotton production and harvesting appliances and farm sites.
- (5) Continuous processing or treatment of gin trash through approved insect-killing fans or other approved methods.
- (6) Closure of cotton gins followed by cleanup or treatment by approved methods of said gins and gin yards.
- (7) Tarping or construction of all trucks, trailers and other appliances hauling unprocessed seed cotton, contaminated cottonseed or unprocessed gin trash to or from cotton gins, or elsewhere, to prevent spillage or blowout along roads.
- (8) Registration of cotton production equipment including, but not limited to, planters, pickers, tractors, cotton trailers and shredding equipment
- (9) Other methods determined necessary in eradicating or controlling pink bollworm, applied to particular plantings, including destruction of growing cotton plants and soil treatments.
- (e) Permits for Movement of Restricted Articles. When it has been determined by the Director or Commissioner that, due to contamination with live pink bollworm, a hazard of spread of pink bollworm is presented by movements of any product or article of any character whatsoever, the Commissioner at the direction of the Director shall require safeguards and restrict movements of hosts and possible carriers and contaminated products and articles within the eradication area. Notice of such fact shall be given to the person having custody thereof. Thereafter such contaminated product or article may be moved only after it has been cleaned, treated, or otherwise disinfected to the satisfaction of the Commissioner. Permits may be issued by the Director or the Commissioner through a signed agreement with a person engaged in moving within the eradication area of hosts and possible carriers or contaminated products and articles for limited handling, utilization or processing, or for treat-

When the Director or Commissioner deems it necessary, persons intending to move any host or possible carrier or any contaminated product or article shall make application for inspection as far in advance of movement as possible, shall so handle such things as to safeguard them from infestation, and shall assemble them at such points and in such manner as the Director or Commissioner shall designate to facilitate inspection.

Permits may be revoked and further permits may be refused by the Director or Commissioner whenever either one determines that the further use of such permits would in the Director's or Commissioner's judgment result in the spread of the pink bollworm. Because of the nature of said pest, the permit shall be subject to summary revocation for cause at the Commissioner's discretion.

HISTORY

1. Amendment filed 10–9–73 as an emergency; effective upon filing (Register 73, No. 41).

- 2. Certificate of Compliance filed 12-21-73 (Register 73, No. 51).
- 3. Amendment of subsections (c) and (e) filed 7-28-77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 4. Editorial correction adding NOTE filed 2–17–83 (Register 83, No. 8).

§ 3591. Woolly Whitefly Eradication Area.

NOTE: Authority cited: Sections 407, 5322 and 5761, Food and Agricultural Code. HISTORY

1. Repealer filed 6-4-76; effective thirtieth day thereafter (Register 76, No. 23). For prior history, see Register 68, No. 25.

§ 3591.1. Comstock Mealybug Eradication Area.

NOTE: Authority cited: Sections 407, 5322 and 5761, Food and Agricultural Code. Reference: Sections 5322 and 5761-5763, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) (1) filed 9–1–72 as an emergency; effective upon filing (Register 72, No. 36). For prior history, see Register 71, No. 31.
- 2. Certificate of Compliance filed 10-27-72 (Register 72, No. 44).
- 3. Editorial correction of NOTE filed 2-17-83 (Register 83, No. 8).
- 4. Repealer filed 9–28–84; effective thirtieth day thereafter (Register 84, No. 39).

§ 3591.2. Oriental Fruit Fly Eradication Area.

- (a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which the Oriental fruit fly, Bactrocera dorsalis, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest, and as such it is amenable to the provisions of Article 4 (Sections 5761-5764) of Chapter 8, Part 1, Division 4, of the Food and Agricultural Code of California. The entire counties of Alameda, Contra Costa, Los Angeles, Orange, Riverside, Sacramento, San Bernardino, San Diego, San Mateo, Santa Barbara and Santa Clara.
- (b) Hosts. All fruit (including nuts, dates, and berries), many kinds of vegetables, cotton, and the fruiting bodies of many wild and ornamental plants are known to be hosts or possible hosts of the oriental fruit fly. All these items that are infested or are exposed to infestation by the oriental fruit fly are declared a public nuisance.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest in said area:
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait, or in any other manner as often as necessary to effect eradication.
- (2) The removal and destruction of all plant parts known or suspected to harbor any stage of said pest.
- (3) The search for all stages of oriental fruit fly by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted plants bearing or capable of bearing hosts.
- (5) The importation, rearing, liberation, and fostering of parasites and predators which attack oriental fruit fly.
- (6) The importation, rearing, or liberation of sterile forms of the oriental fruit fly.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761, 5762, 5763 and 5764, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) filed 9-5-86 as an emergency; effective upon filing (Register 86, No. 36). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1–5–87. For prior history see Register 86, No. 6.
- 2. Reinstatement of subsection (a) as it existed prior to emergency amendment filed 9–5–86 by operation of Government Code section 11346.1(f) (Register 87, No. 27).
- 3. New subsection (a)(5) filed 6-22-90 as an emergency; operative 6-22-90 (Register 90, No. 33). A Certificate of Compliance must be transmitted to OAL by 10-22-90 or emergency language will be repealed by operation of law on the following day.
- 4. Reinstatement of subsection (a) as it existed prior to 6-22-90 emergency amendment filed 5-21-91 by operation of Government Code section 11346.1(f) 120 days from effective date (Register 91, No. 41).
- 5. Amendment of subsection (a) filed 10-1-91 as an emergency; operative 10-1-91 (Register 92, No. 12). A Certificate of Compliance must be transmitted to OAL 1-29-92 or emergency language will be repealed by operation of law on the following day
- Certificate of Compliance including amendments as to 10–1–91 order transmitted to OAL 1–22–92 and filed 2–20–92 (Register 92, No. 12).
- 7. Amendment of subsection (a) and adoption of subsection (a)(5) filed 11–10–93 as an emergency; operative 11–10–93 (Register 93, No. 46). A Certificate of Compliance must be transmitted to OAL 3-10-94 or emergency language will be repealed by operation of law on the following day.

- 8. Certificate of Compliance as to 11-10-93 order transmitted to OAL 2-25-94 and filed 4-7-94 (Register 94, No. 14).
- 9. New subsection (a)(7) and amendment of Note filed 7-24-2001 as an emergency; operative 7–24–2001 (Register 2001, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-21-2001 or emergency language will be repealed by operation of law on the following day.
- 10. Certificate of Compliance as to 7-24-2001 order transmitted to OAL 11-20-2001 and filed 12-12-2001 (Register 2001, No. 50).
- 11. New subsection (a)(8) filed 7-28-2006 as an emergency; operative 7-28-2006 (Register 2006, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-27-2006 or emergency language will be repealed by operation of law on the following day.
- 12. New subsection (a)(9) filed 11-8-2006 as an emergency; operative 11-8-2006 (Register 2006, No. 45). A Certificate of Compliance must be transmitted to OAL by 3-8-2007 or emergency language will be repealed by operation of law on the following day.
- 13. Certificate of Compliance as to 7-28-2006 order transmitted to OAL 11-22-2006 and filed 1-8-2007 (Register 2007, No. 2).
- 14. Certificate of Compliance as to 11-8-2006 order transmitted to OAL 2-20-2007 and filed 3-28-2007 (Register 2007, No. 13).
- 15. Editorial correction restoring inadvertently omitted subsection (c)(2) (Register 2007, No. 14).
- 16. Amendment of subsection (a) and repealer of subsections (a)(1)-(9) filed 7-6-2007 as an emergency; operative 7-6-2007 (Register 2007, No. 27). A Certificate of Compliance must be transmitted to OAL by 1-2-2008 or emergency language will be repealed by operation of law on the following day.
- 17. Amendment of subsection (a) filed 9-25-2007 as an emergency; operative 9–25–2007 (Register 2007, No. 39). A Certificate of Compliance must be transmitted to OAL by 3–24–2008 or emergency language will be repealed by operation of law on the following day.
- 18. Certificate of Compliance as to 7-6-2007 order transmitted to OAL 10-23-2007 and filed 11-29-2007 (Register 2007, No. 48).
- 19. Certificate of Compliance as to 9-25-2007 order transmitted to OAL 12-13-2007 and filed 1-22-2008 (Register 2008, No. 4).

§ 3591.3. Dutch Elm Disease Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761-5763, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a)(1) filed 1-23-78 as an emergency; effective upon filing (Register 78, No. 4). For prior history, see Register 17, No. 51.

 2. Certificate of Compliance filed 4–3–78 (Register 78, No. 14).

 3. Amendment of subsection (a)(1) filed 7–20–78 as an emergency; effective upon
- filing (Register 78, No. 29)
- 4. Certificate of Compliance filed 10-4-78 (Register 78, No. 40).
- 5. Amendment filed 3–5–81; effective thirtieth day thereafter (Register 81, No. 10).
- 6. Amendment of subsection (a)(1) filed 7-21-82 as an emergency; effective upon filing (Register 82, No. 30). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11–18–82. 7. Certificate of Compliance as to 7–21–82 order filed 11–5–82 (Register 82, No.

- 8. Editorial correction of Note filed 2–17–83 (Register 83, No. 8).
 9. Amendment of subsection (a)(1) filed 10–31–90 as an emergency; operative 10–31–90 (Register 90, No. 49). A Certificate of Compliance must be transmitted to OAL by 2–28–91 or emergency language will be repealed by operation of law on the following day.
- 10. Reinstatement of section as it existed prior to emergency amendment filed 10-31-90 by operation of Government Code section 11346.1(f) (Register 91, No. 47)
- 11. Repealer filed 2-10-94; operative 3-14-94 (Register 94, No. 6).

§ 3591.4. Tuliptree Scale Eradication Area.

NOTE: Authority cited: Sections 407, 5322 and 5761, Food and Agricultural Code. HISTORY

- 1. Amendment of subsection (a) filed 5-14-76; effective thirtieth day thereafter (Register 76, No. 20). For prior history, see Register 74, No. 4.
- 2. Repealer filed 3-9-83; effective thirtieth day thereafter (Register 83, No. 11).

§ 3591.5. Mediterranean Fruit Fly Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which the Mediterranean fruit fly, Ceratitis capitata, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest, and as such it is amenable to the provisions of Article 4 (commencing with Section 5761) of Chapter 8, Part 1, Division 4, of the Food and Agricultural Code of California.

The entire counties of Los Angeles, Orange, Riverside, San Bernardino, San Diego, Santa Clara, Solano, Tulare and Ventura.

(b) Hosts. All fruit (including nuts and berries), vegetables (other than leafy types grown above ground,) and the fruiting bodies of many ornamental and wild plants are known to be hosts or possible hosts of Mediterranean fruit fly. All these items (along with soil under or near plants bearing these items) that are infested or are exposed to infestation by Mediterranean fruit fly, are declared a public nuisance.

- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest in said area.
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait or in any other manner as often as necessary to effect control.
- (2) The removal and destruction of all plant parts known or suspected to harbor any stage of said pest.
- (3) The searching for all stages of Mediterranean fruit fly by visual inspection, the use of taps, or any other means.
- (4) The removal and destruction of abandoned or unwanted plants bearing or capable of bearing hosts.
- (5) The importation, rearing, liberation, and fostering of parasites and predators which attack Mediterranean fruit fly.
- (6) The importation, rearing, or liberation of sterile forms of the Mediterranean fruit fly.

NOTE: Authority: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761, 5762, 5763 and 5764, Food and Agricultural Code.

- 1. Amendment of subsection (a) filed 9-7-89 as an emergency; operative 9-7-89 (Register 89, No. 37). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-5-90. For prior history, see Register 88, No. 53
- 2. New subsection (a)(3) filed 10-4-89 as an emergency; operative 10-4-89 (Register 89, No. 40). A Certificate of Compliance must be transmitted to OAL with-
- in 120 days or emergency language will be repealed on 2–1–90.

 3. New subsection (a)(4) filed 11–22–89 as an emergency; operative 11–22–89 (Register 89, No. 47). A Certificate of Compliance must be transmitted to OAL
- within 120 days or emergency language will be repealed on 3–22–90. Certificate of Compliance as to 9–7–89 order transmitted to OAL 1–5–90 and filed 1-26-90 (Register 90, No. 5).
- Certificate of Compliance as to 10-4-89 order transmitted to OAL 2-1-90 and filed 2-21-90 (Register 90, No. 9)
- 6. Certificate of Compliance as to 11-22-89 order transmitted to OAL 3-22-90 and filed 4-20-90 (Register 90, No. 16).
- 7. New subsection (a)(5) filed 4-24-90 as an emergency; operative 4-24-90 (Register 90, No. 20). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on
- 8. Reinstatement of subsection (a) as it existed prior to 4-24-90 emergency amendment filed 5-21-91 by operation of Government Code section 11346.1(f) 120 days from effective date (Register 91, No. 42).
- 9. New subsection (a)(5) filed 12-8-92 as an emergency; operative 12-8-92 (Reg ister 92, No. 50). A Certificate of Compliance must be transmitted to OAL 4-6-93 or emergency language will be repealed by operation of law on the fol-
- 10. Certificate of Compliance as to 12-8-92 order transmitted to OAL 3-9-93 and filed 3-30-93 (Register 93, No. 14).
- 11. New subsection (a)(6) filed 11–19–93 as an emergency; operative 11–19–93 (Register 93, No. 47). A Certificate of Compliance must be transmitted to OAL -21-94 or emergency language will be repealed by operation of law on the following day
- 12. Certificate of Compliance as to 11-19-93 order transmitted to OAL 2-3-94 and filed 3-9-94 (Register 94, No. 10).
- New subsection (a)(7) filed 10–6–94 as an emergency; operative 10–6–94 (Register 94, No. 40). A Certificate of Compliance must be transmitted to OAL by 2-3-95 or emergency language will be repealed by operation of law on the following day
- 14. Certificate of Compliance as to 10-6-94 order transmitted to OAL 1-30-95 and filed 2-22-95 (Register 95, No. 8)
- 15. New paragraph following subsection (a), repealer of subsections (a)(1)–(7) and amendment of Note filed 9–11–2007 as an emergency; operative 9-11-2007 (Register 2007, No. 37). A Certificate of Compliance must be transmitted to OAL by 3-10-2008 or emergency language will be repealed by operation of law on the following day.
- 16. Certificate of Compliance as to 9-11-2007 order transmitted to OAL 12-13-2007 and filed 1-22-2008 (Register 2008, No. 4).
- 17. Amendment of subsection (a) filed 6-23-2008 as an emergency; operative 6–23–2008 (Register 2008, No. 26). A Certificate of Compliance must be transmitted to OAL by 12–22–2008 or emergency language will be repealed by operation of law on the following day.

§ 3591.6. Gypsy Moth Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which gypsy moth, Lymantria dispar, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest, and as such is amenable to the provisions of Article 4 (Sections 5761, 5762, and 5763) of Chapter 8, Part 1, Division 4, of the Food and Agricultural Code of California.

- (1) The entire counties of Los Angeles, Marin, Nevada, Orange, Riverside, San Diego, San Mateo, Santa Barbara, Santa Clara, Santa Cruz and
- (b) Hosts and Possible Carriers. Trees, shrubs with persistent woody stems, and parts of such trees and shrubs (except seed, fruits, and cones); timber and timber products, including but not limited to lumber, planks, poles, logs, cordwood, and pulpwood; mobile homes and recreational vehicles, and associated equipment, moving from infested properties; outdoor furniture; and any other products, articles, or means of conveyance, of any character whatsoever when it is determined by an inspector that they present a hazard of spread of the gypsy moth and the person in possession thereof has been so notified. All these items that are infested or are exposed to infestation by gypsy moth are declared a public nuisance.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest in said area.
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait, or in any other form as often as necessary to effect control.
- (2) The removal and destruction of trees and shrubs if permission is received from the property owner, or if such action is the only practical way of eliminating the infestation of a host or possible carrier.
- (3) The searching for all stages of gypsy moth by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted hosts or possible carriers bearing or capable of bearing gypsy moth in any stage.
- (5) The importation, rearing, liberation, and fostering of parasites and predators of the gypsy moth.
- (6) The importation, rearing, or liberation of sterile forms of the gypsy

- 1. New section filed 10-22-76 as an emergency; effective upon filing (Register
- Certificate of Compliance filed 1-10-77 (Register 77, No. 3).
- Amendment of subsections (a) and (b) filed 8-26-81; effective thirtieth day thereafter (Register 81, No. 35)
- Amendment of subsection (a)(1) filed 2–24–82 as an emergency; effective upon filing (Register 82, No. 9). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6–24–82. Certificate of Compliance as to 2–24–82 order filed 5–25–82 (Register 82, No.
- Amendment of subsection (a) filed 8-18-82 as an emergency; effective upon filing (Register 82, No. 34). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12-16-82.
- 7. Certificate of Compliance as to 8–18–82 order filed 11–19–82 (Register 82, No.
- 8. Amendment of subsection (a) filed 7-1-83; effective thirtieth day thereafter (Register 83, No. 27).
- 9. Amendment filed 7–3–84; effective thirtieth day thereafter (Register 84, No. 7). 10. Amendment of subsection (a)(1) filed 7–15–85; effective thirtieth day thereafter (Register 85, No. 29).
- 11. Amendment of subsection (a) filed 3–24–87 as an emergency; effective upon filing (Register 87, No. 13). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 7-22-87
- 12. Reinstatement of subsection (a) as it existed prior to emergency filed 3-24-87 by operation of Government Code Section 11346.1(g) (Register 87, No. 34).
- 13. Amendment of subsection (a)(1) filed 12-7-95 as an emergency; operative 12-7-95 (Register 95, No. 49). A Certificate of Compliance must be transmitted to OAL by 4-5-96 or emergency language will be repealed by operation of law on the following day
- Certificate of Compliance as to 12–7–95 order transmitted to OAL 2–26–96 and filed 3–8–96 (Register 96, No. 10).
- 15. Amendment of subsection (a)(1) filed 4-24-97; operative 5-24-97 (Register 97, No. 17).
- 16. Amendment of subsections (a)-(a)(1) and amendment of Note filed 8-28-2000 as an emergency; operative 8-28-2000 (Register 2000, No. 35). A Certificate of Compliance must be transmitted to OAL by 12-26-2000 or emergency language will be repealed by operation of law on the following day
- Certificate of Compliance as to 8-28-2000 order transmitted to OAL 12-26-2000 and filed 1-23-2001 (Register 2001, No. 4).
- 18. Amendment of subsection (a)(1) filed 7–5–2006 as an emergency; operative 7–5–2006 (Register 2006, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–2–2006 or emergency language will be repealed by operation of law on the following day
- 19. Amendment of subsection (a)(1) filed 7–17–2006 as an emergency; operative 7-17-2006 (Register 2006, No. 29). A Certificate of Compliance must be transmitted to OAL by 11-14-2006 or emergency language will be repealed by operation of law on the following day.

- 20. Amendment of subsection (a)(1) filed 8-1-2006 as an emergency; operative 8-1-2006 (Register 2006, No. 31). A Certificate of Compliance must be transmitted to OAL by 11-29-2006 or emergency language will be repealed by operation of law on the following day.
- 21. Amendment of subsection (a)(1) filed 8–10–2006 as an emergency; operative 8-10-2006 (Register 2006, No. 32). A Certificate of Compliance must be transmitted to OAL by 12-8-2006 or emergency language will be repealed by operation of law on the following day.
- 22. Certificate of Compliance as to 7-5-2006 order transmitted to OAL 9-26-2006 and filed 10-2-2006 (Register 2006, No. 40).

 23. Certificate of Compliance as to 7-17-2006 order transmitted to OAL
- 10-4-2006 and filed 10-19-2006 (Register 2006, No. 42).
- 24. Certificate of Compliance as to 8-1-2006 order transmitted to OAL 10-27-2006 and filed 12-6-2006 (Register 2006, No. 49).
- 25. Certificate of Compliance as to 8-10-2006 order transmitted to OAL 12-6-2006 and filed 1-8-2007 (Register 2007, No. 2).
- 26. Amendment of subsection (a)(1) filed 7-20-2007 as an emergency; operative 7-20-2007 (Register 2007, No. 29). A Certificate of Compliance must be transmitted to OAL by 1-16-2008 or emergency language will be repealed by operation of law on the following day.
- 27. Amendment of subsection (a)(1) filed 7-24-2007 as an emergency; operative 7–24–2007 (Register 2007, No. 30). A Certificate of Compliance must be transmitted to OAL by 1-21-2008 or emergency language will be repealed by operation of law on the following day
- 28. Certificate of Compliance as to 7-20-2007 order transmitted to OAL 12-6-2007 and filed 1-22-2008 (Register 2008, No. 4).
- 29. Certificate of Compliance as to 7-24-2007 order transmitted to OAL 12-6-2007 and filed 1-22-2008 (Register 2008, No. 4).

§ 3591.7. Hydrilla Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5322, 5761 and 6048, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-8-77 as an emergency; effective upon filing (Register 77, No. 7).
- Certificate of Compliance filed 4–29–77 (Register 77, No. 18).
- 3. Amendment filed 5–31–79; effective thirtieth day thereafter (Register 79, No.
- 4. Amendment of subsections (a)(1) and (c)(5) filed 12-8-82; effective thirtieth day thereafter (Register 82, No. 50).
- 5. Editorial correction renumbering Section 3591.7 to Article 7 (Section 3962) filed 4-11-83 (Register 83, No. 16).

§ 3591.8. Khapra Beetle Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761-5763, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-11-81 as an emergency; effective upon filing (Register 81, No. 11). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 7-8-81
- 2. Certificate of Compliance transmitted to OAL 7-8-81 and filed 7-30-81 (Register 81, No. 31)
- 3. Repealer filed 3-9-83; effective thirtieth day thereafter (Register 83, No. 11).

§ 3591.9. Cotton Boll Weevil Eradication Area.

- (a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which cotton boll weevil (Anthonoms grandis) is known to exist, is hereby proclaimed to be an eradication area with respect to said pest, and as such is amenable to the provisions of Article 4 (Sections 5761-5763) of Chapter 8, Part 1, Division 4, of the Food and Agricultural Code of California.
 - (1) The entire counties of Imperial, Riverside, and San Bernardino.
- (b) Hosts. Cotton (Gossypium spp.) plants and parts thereof and any other plant which by investigation is shown to be capable of sustaining cotton boll weevil in any stage of development.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest in said area.
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait or in any other form as often as necessary to effect control or eradication.
- (2) The removal and destruction of hosts if such action is the only practical way of eliminating the infestation.
- (3) The searching for all stages of cotton boll weevil by visual inspection, the use of traps, or any other means.

(4) The removal and destruction of abandoned or unwanted hosts in any stage.

HISTORY

- 1. New section filed 2-23-83 as an emergency; effective upon filing (Register 83, No. 9). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6-23-83
- 2. Certificate of Compliance filed 6-17-83 (Register 83, No. 25).

§ 3591.10. Apple Maggot Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761-5763, Food and Agricultural Code.

HISTORY

- 1. New section filed 9-8-83 as an emergency; effective upon filing (Register 83, No. 38). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-6-84.
- 2. Amendment of subsection (a) filed 9-19-83 as an emergency; effective upon filing (Register 83, No. 39). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-17-84.
- 3. Amendment of subsection (a) filed 9-23-83 as an emergency; effective upon filing (Register 83, No. 39). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-21-84.
- 4. Certificate of Compliance as to 9-8-83 order, 9-19-83 order, and 9-23-83 order transmitted to OAL 12-13-83 and filed 1-11-84 (Register 84, No. 2).
- 5. Amendment of subsections (a) and (c) filed 8-17-84 as an emergency; effective upon filing (Register 84, No. 35). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on
- 6. Amendment of subsection (a) filed 9-19-84 as an emergency; effective upon filing (Register 84, No. 39). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1–17–85.
- 7. Certificate of Compliance as to 8-17-84 order and 9-19-84 order transmitted to OAL 11-30-84 and filed 1-2-85 (Register 85, No. 1).
- 8. Amendment of subsection (a) filed 9-16-86 as an emergency; effective upon filing (Register 86, No. 38). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-14-87.
- 9. Amendment of subsection (a) filed 9-22-86 as an emergency; effective upon filing (Register 86, No. 41). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-20-87.
- 10. Emergency language filed 9-16-86 and 9-22-86 repealed by operation of Government Code section 11346.1 (Register 87, No. 25).
- 11. Amendment of subsection (a) filed 6-10-87 as an emergency; operative 6-10-87 (Register 87, No. 25). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 10-8-87.
- 12. Emergency language filed 6-10-87 repealed by operation of Government Code section 11346.1 on 10-9-87 (Register 88, No. 35)
- 13. Repealer filed 6-30-94; operative 8-1-94 (Register 94, No. 26).

§ 3591.11. Caribbean Fruit Fly Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761-5764, Food and Agricultural Code.

- 1. New section filed 2-6-84 as an emergency; effective upon filing (Register 84, No. 7). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6-7-84.
- 2. Certificate of Compliance transmitted to OAL 5-8-84 and filed 6-5-84 (Register 84, No. 23)
- 3. Repealer filed 11-29-84; effective thirtieth day thereafter (Register 84, No. 48).

§ 3591.12. Peach Fruit Fly Eradication Area.

- (a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which peach fruit fly, Bactrocera zonata, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest, and as such, it is amenable to the provisions of Article 4 (Sections 5761-5764) of Chapter 8, Part 1, Division 4, of the Food and Agricultural Code of California.
 - (1) The entire county of Alameda.
 - (2) The entire county of Fresno.
 - (3) The entire county of Los Angeles.
 - (4) The entire county of Riverside.
 - (5) The entire county of Santa Clara.

[The next page is 340.5.]

- (b) Hosts.
- (1) Fruit of the following plants: Apple. pomegranate, mango, peach, pear, citrus, date, loquat, cucumber, melon, tomato, guava, fig, and any other plants determined by the director to produce fruit which is attached by *Bactrocera zonata*.
- (2) Soil or planting media within the drip area of plants producing, or which have produced, host fruit.
- (c) Means and method. The following means and methods may be used in the eradication and control of said pest in said area:
- (1) The use of insecticides, chemicals, or other materials as spray (including soil spray treatments), dust, bait, or in any other manner as often as necessary to effect control or eradication.
- (2) The removal and destruction of hosts, including plants of hosts, if such is a practical way of eliminating the infestation.
- (3) The searching for all stages of the fly by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted hosts or plants bearing or capable of bearing hosts.
- (5) The importation, rearing, liberation, and fostering of parasites and predators which attack the fly.
- (6) The importation, rearing, or liberation of sterile forms of the fly. NOTE: Authority cited: Sections 407 and 5322. Food and Agriculture Code. Reference: Sections 5761 through 5764, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–20–93 as an emergency; operative 9–20–93 (Register 93, No. 39). A Certificate of Compliance must be transmitted to OAL 1–18–94 or emergency language will be repealed by operation of law on the following day. For prior history, see Register 91, No. 46.
- 2. Certificate of Compliance as to 9–20–93 order transmitted to OAL 1–6–94 and filed 2–8–94 (Register 94, No. 6).
- 3. Amendment repealing and reserving subsection (a)(1) filed 4–24–97; operative 5–24–97 (Register 97, No. 17).
- 4. New subsection (a)(1) filed 10–23–97 as an emergency; operative 10–23–97 (Register 97, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–20–98 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10–23–97 order transmitted to OAL 1–29–98 and filed 3–9–98 (Register 98, No. 11).
- 6. New subsection (a)(2) filed 9-6-2001 as an emergency; operative 9-6-2001 (Register 2001, No. 36). A Certificate of Compliance must be transmitted to OAL by 1-4-2002 or emergency language will be repealed by operation of law on the following day.
- 7. New subsection (a)(2) and subsection renumbering filed 12–4–2001 as an emergency; operative 12–4–2001 (Register 2001, No. 49). A Certificate of Compliance must be transmitted to OAL by 4–3–2002 or emergency language will be repealed by operation of law on the following day.
- 8. Certificate of Compliance as to 9-6-2001 order transmitted to OAL 12-27-2001 and filed 2-7-2002 (Register 2002, No. 6).
- Certificate of Compliance as to 12–4–2001 order transmitted to OAL 4–3–2002 and filed 4–23–2002 (Register 2002, No. 17).
- 10. New subsection (a)(2) and subsection renumbering filed 5–18–2006 as an emergency; operative 5–18–2006 (Register 2006, No. 20). A Certificate of Compliance must be transmitted to OAL by 9–15–2006 or emergency language will be repealed by operation of law on the following day.
- 11. Certificate of Compliance as to 5-18-2006 order transmitted to OAL 8-11-2006 and filed 8-23-2006 (Register 2006, No. 34).
- 12. New subsection (a)(3) and subsection renumbering filed 9–12–2006 as an emergency; operative 9–12–2006 (Register 2006, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–10–2007 or emergency language will be repealed by operation of law on the following day.
- 13. Certificate of Compliance as to 9-12-2006 order transmitted to OAL 12-19-2006 and filed 1-31-2007 (Register 2007, No. 5).

§ 3591.13. Guava Fruit Fly Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which a certain pest, guava fruit fly (*Bactrocera correcta*), is known to exist, is hereby proclaimed to be an eradication area with respect to said pest:

The entire counties of Alameda, Los Angeles, Orange, Sacramento, San Diego and Santa Clara.

- (b) Hosts.
- (1) Fruit of the following plants: citrus, *Eugenia* spp., guava, mango, *Prunus* spp., *Zizyphus* spp., and any other plants determined by the director to produce fruit which is attacked by guava fruit fly.

- (2) Soil or planting media within the drip area of plants producing, or which have produced, host fruit.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest in said area:
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait, or in any other manner as often as necessary to effect eradication.
- (2) The removal and destruction of all plant parts known or suspected to harbor any stage of said pest.
- (3) The search of all stages of guava fruit fly by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted plants bearing or capable of bearing hosts.
- (5) The importation, rearing, liberation, and fostering of parasites and predators which attack guava fruit fly.
- (6) The importation, rearing, or liberation of sterile forms of guava fruit fly.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761, 5762, 5763 and 5764, Food and Agricultural Code.

HISTORY

- New section filed 7–8–93 as an emergency; operative 7–8–93 (Register 93, No. 28). A Certificate of Compliance must be transmitted to OAL 11–5–93 or emergency language will be repealed by operation of law on the following day. For prior history, see Register 86, No. 33.
- Certificate of Compliance as to 7–8–93 order transmitted to OAL 11–2–93 and filed 12–14–93 (Register 93, No. 51).
- 3. Amendment of subsection (a) filed 10-17-94 as an emergency; operative 10-17-94 (Register 94, No. 42). A Certificate of Compliance must be transmitted to OAL by 2-14-95 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10–17–94 order transmitted to OAL 2–9–95 and filed 3–20–95 (Register 95, No. 12).
- 5. Amendment of subsection (a) filed 4-24-97; operative 5-24-97 (Register 97, No. 17).
- 6. Amendment of subsection (a) filed 8-28-97 as an emergency; operative 8-28-97 (Register 97, No. 35). A Certificate of Compliance must be transmitted to OAL by 12-26-97 or emergency language will be repealed by operation of law on the following day.
- 7. Certificate of Compliance as to 8-28-97 order transmitted to OAL 12-18-97 and filed 1-26-98 (Register 98, No. 5).
- 8. Amendment of subsection (a) filed 9-10-99 as an emergency; operative 9-10-99 (Register 99, No. 37). A Certificate of Compliance must be transmitted to OAL by 1-10-2000 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 9–10–99 order transmitted to OAL 1–6–2000 and filed 2–2–2000 (Register 2000, No. 5).
- 10. Amendment of subsection (a) filed 8–16–2000 as an emergency; operative 8–16–2000 (Register 2000, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–14–2000 or emergency language will be repealed by operation of law on the following day.
- 11. Certificate of Compliance as to 8–16–2000 order, including amendment of NOTE, transmitted to OAL 12–13–2000 and filed 1–25–2001 (Register 2001, No. 4).
- 12. Amendment of subsection (a) filed 8–29–2001 as an emergency; operative 8–29–2001 (Register 2001, No. 35). A Certificate of Compliance must be transmitted to OAL by 12–27–2001 or emergency language will be repealed by operation of law on the following day.
- 13. Certificate of Compliance as to 8-29-2001 order transmitted to OAL 12-27-2001 and filed 2-4-2002 (Register 2002, No. 6).
- 14. Amendment of subsection (a) filed 10–6–2006 as an emergency; operative 10–6–2006 (Register 2006, No. 40). A Certificate of Compliance must be transmitted to OAL by 2–5–2007 or emergency language will be repealed by operation of law on the following day.
- 15. Certificate of Compliance as to 10-6-2006 order transmitted to OAL 12-19-2006 and filed 1-24-2007 (Register 2007, No. 4).

§ 3591.14. African Honey Bee Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5006, 5761–5763 and 29007, Food and Agricultural Code.

HISTORY

- New section filed 8-1-85 as an emergency; effective upon filing (Register 85, No. 32). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11-29-85.
- 2. Certificate of Compliance transmitted to OAL 11-27-85 and filed 1-10-86 (Register 86, No. 2).
- 3. Editorial correction of HISTORY 1 (Register 95, No. 40).
- 4. Repealer filed 4-24-97; operative 5-24-97 (Register 97, No. 17).

§ 3591.15. Melon Fruit Fly Eradication Area.

- (a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which the melon fruit fly, *Bactrocera cucurbitae*, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest, and as such it is amendable to the provisions of Article 4 (Sections 5761–5764) of Chapter 8, Part 1, Division 4 of the Food and Agricultural Code of California.
 - (1) The county of Los Angeles.
 - (b) Hosts.
- (1) Fruit of the following plants: apple, avocado, cantaloupe, mango, peach, pear, citrus, cucurbits (melons and gourds), tomato, grape, fig, and any other plants determined by the department to produce fruit which is attacked by melon fruit fly.
- (2) Soil or planting media within the drip area of plants producing, or which have produced, host fruit.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest in said area:
- (1) The use of insecticides, chemicals, or other materials as spray (including soil spray treatments), dust, bait, or in any other manner as often as necessary to effect control or eradication.
- (2) The removal and destruction of hosts, including plants of hosts, if such action is a practical way of eliminating the infestation.
- (3) The searching for all stages of the fly by visual inspection, the use of traps, or any other means.
- (4) The removal and destruction of abandoned or unwanted hosts or plants bearing or capable of bearing hosts.
- (5) The importation, rearing, liberation, and fostering of parasites and predators which attack the fly.
- (6) The importation, rearing, or liberation of sterile forms of the fly. NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761–5764, Food and Agricultural Code.

HISTORY

- New section filed 12–3–87 as an emergency; operative upon filing (Register 87, No. 50). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–4–88.
- 2. Repealed by operation of Government Code Section 11346.1(g) (Register 89, No. 51)
- 3. New section filed 11–22–99 as an emergency; operative 11–22–99 (Register 99, No. 48). A Certificate of Compliance must be transmitted to OAL by 3–21–2000 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 11–22–99 order transmitted to OAL 3–13–2000 and filed 4–6–2000 (Register 2000, No. 14).

§ 3591.16. Red Imported Fire Ant Eradication Area.

- (a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which a certain pest, red imported fire ant, *Solenopsis invicta*, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest:
 - (1) The entire county of Kern.
 - (2) The entire county of Fresno.
 - (3) The entire county of Stanislaus.
 - (4) The entire county of Orange.
 - (5) The entire county of Riverside.
 - (6) The entire county of Los Angeles.
 - (7) The entire county of Madera.
 - (8) The entire county of Sacramento.
 - (9) The entire county of Merced.
- (b) Hosts and Possible Carriers. Any and all premises, plants, plant products, soil, sod and any other articles or things which are infested or exposed to infestation by the red imported fire ant.
- (c) Means and Methods. The following means and methods may be used in the control and eradication of said pest within said area:
- (1) The use of insecticides, chemicals, or other materials as spray, dust, bait or in any other form as often as necessary to effect control or eradication.
- (2) The removal and destruction of hosts if such action is the only practical way of eliminating the infestation.
- (3) The searching for all stages of red imported fire ant by visual inspection or any other means.

(4) The removal and destruction of abandoned or unwanted hosts in any stage of development.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761–5763, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–22–97 as an emergency; operative 12–22–97 (Register 97, No. 52). A Certificate of Compliance must be transmitted to OAL by 4–21–98 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 12-22-97 order transmitted to OAL 4-13-98 and filed 4-20-98 (Register 98, No. 17).
- 3. New subsection (a)(2) filed 7–24–98 as an emergency; operative 7–24–98 (Register 98, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–23–98 or emergency language will be repealed by operation of law on the following day.
- 4. New subsection (a)(3) filed 10–23–98 as an emergency; operative 10–23–98 (Register 98, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–22–99 or emergency language will be repealed by operation of law on the following day.
- 5. New subsection (a)(4) filed 11–17–98 as an emergency; operative 11–17–98 (Register 98, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–17–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–24–98 order transmitted to OAL 11–19–98 and filed 12–15–98 (Register 98, No. 51).
- 7. New subsection (a)(5) filed 12–16–98 as an emergency; operative 12–16–98 (Register 98, No. 51). A Certificate of Compliance must be transmitted to OAL by 4–15–99 or emergency language will be repealed by operation of law on the following day.
- 8. New subsection (a)(6) filed 1–27–99 as an emergency; operative 1–27–99 (Register 99, No. 5). A Certificate of Compliance must be transmitted to OAL by 5–27–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10–23–98 order transmitted to OAL 2–18–99 and filed 3–18–99 (Register 99, No. 12).
- 10. Certificate of Compliance as to 11–17–98 order transmitted to OAL 3–17–99 and filed 3–23–99 (Register 99, No. 13).
- 11. Certificate of Compliance as to 12–16–98 order transmitted to OAL 3–30–99 and filed 4–1–99 (Register 99, No. 14).
- 12. Certificate of Compliance as to 1–27–99 order transmitted to OAL 5–24–99 and filed 6–9–99 (Register 99, No. 24).
- 13. New subsection (a)(7) filed 6-14-2000 as an emergency; operative 6-14-2000 (Register 2000, No. 24). A Certificate of Compliance must be transmitted to OAL by 10-12-2000 or emergency language will be repealed by operation of law on the following day.
- 14. Certificate of Compliance as to 6-14-2000 order transmitted to OAL 10-11-2001 and filed 11-6-2000 (Register 2000, No. 45).
- 15. New subsection (a)(8) filed 10-15-2001 as an emergency; operative 10-15-2001 (Register 2001, No. 42). A Certificate of Compliance must be transmitted to OAL by 2-13-2002 or emergency language will be repealed by operation of law on the following day.
- 16. New subsection (a)(9) filed 1–4–2002 as an emergency; operative 1–4–2002 (Register 2002, No. 1). A Certificate of Compliance must be transmitted to OAL by 5–6–2002 or emergency language will be repealed by operation of law on the following day.
- 17. Reinstatement of section as it existed prior to 10–15–2001 emergency amendment by operation of Government Code section 11346.1(f) (Register 2002, No. 8).
- 18. New subsection (a)(8) filed 2–20–2002; operative 2–20–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 8).
- Certificate of Compliance as to 1–4–2002 order transmitted to OAL 5–6–2002 and filed 6–4–2002 (Register 2002, No. 23).

§ 3591.17. Olive Fruit Fly Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761 through 5764, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–19–98 as an emergency; operative 11–19–98 (Register 98, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–19–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 11–19–98 order transmitted to OAL 3–15–99 and filed 4–26–99 (Register 99, No. 18).
- 3. Repealer filed 6–20–2002; operative 7–20–2002 (Register 2002, No. 25).

§ 3591.18. Asian Longhorned Beetle Eradication Area.

(a) Proclamation of Eradication Area. The portions of the State of California described as follows, within which a certain pest, *Anoplophora glabripennis* (Asian longhorned beetle), is known to exist, are hereby proclaimed to be eradication areas with respect to said pest:

The entire county of Sacramento.

- (b) Possible Carriers. Any and all premises, firewood (all hardwood species), and green lumber and other material living, dead, cut, or fallen, inclusive of nursery stock, logs, stumps, roots, branches, and debris of half an inch or more in diameter of the following genera: *Acer* (maple), *Aesculus* (horse chestnut), *Albizia* (mimosa), *Betula* (birch). *Celtis* (hackberry), *Fraxinus* (ash), *Platanus* (sycamore), *Populus* (poplar), *Salix* (willow), *Sorbus* (mountain ash), and *Ulmus* (elm), and any other articles or things which are infested or exposed to infestation by Asian longhorned beetle, within said area.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest within said area.
- (1) The repeated timely application of insecticides to any and all premises and possible carriers, and any other articles or things which are infested or exposed to infestation with Asian longhorned beetle.
- (2) The removal and destruction of any and all possible carriers, including trees and shrubs if permission is received from the property owner, or if such action is the only practical way of eliminating the infestation of a host or possible carrier to prevent the spread or reinfestation of Asian longhorned beetle.
- (3) The searching for all stages of Asian longhorned beetle by visual inspection, the use of traps, or any other means anywhere within the said area.
- (4) The removal and destruction of abandoned or unwanted hosts or possible carriers bearing or capable of bearing Asian longhorned beetle in any life stage.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 407, 5322, 5761, 5762 and 5763, Food and Agricultural Code. HISTORY

- 1. New section filed 6–27–2005 as an emergency; operative 6–27–2005 (Register 2005, No. 26). A Certificate of Compliance must be transmitted to OAL by 10–25–2005 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 6-27-2005 order transmitted to OAL 9-29-2005 and filed 10-18-2005 (Register 2005, No. 42).

§ 3591.19. Diaprepes abbreviatus Eradication Area.

(a) Proclamation of Eradication Area. The portions of the State of California described as follows, within which a certain pest, *Diaprepes abbreviatus* (West Indian sugarcane root borer or Diaprepes root weevil), is known to exist, are hereby proclaimed to be eradication areas with respect to said pest:

The entire counties of Los Angeles, Orange and San Diego.

- (b) Hosts and Possible Carriers, Within Said Area.
- (1) Any and all premises, soil, sand, gravel or growing media moved separately or with things.
- (2) All nursery stock and plants and plant parts and plant products capable of propagation.
- (3) Any other articles which are infested or exposed to infestation by *Diaprepes abbreviatus*.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest within said area.
- (1) The repeated timely application of insecticides to any and all premises and possible carriers, and any other articles or things which are infested or exposed to infestation with *Diaprepes abbreviatus*.
- (2) The removal and destruction of any and all possible carriers, including nursery stock or trees and shrubs if permission is received from the property owner, or if such action is the only practical way of eliminating the infestation of a host or possible carrier to prevent the spread or reinfestation of *Diaprepes abbreviatus*.
- (3) The searching for all stages of *Diaprepes abbreviatus* by visual inspection, the use of traps, or any other means anywhere within said area.
- (4) The removal and destruction of abandoned or unwanted hosts or possible carriers bearing or capable of bearing *Diaprepes abbreviatus* in any life stage.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 407, 5322, 5761, 5762 and 5763, Food and Agricultural Code. HISTORY

1. New section filed 9-28-2005 as an emergency; operative 9-28-2005 (Register 2005, No. 39). A Certificate of Compliance must be transmitted to OAL by

- 1-26-2006 or emergency language will be repealed by operation of law on the following day.
- 2. Amendment of subsection (a) filed 10–20–2005 as an emergency; operative 10–20–2005 (Register 2005, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–17–2006 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 9–28–2005 and 10–20–2005 orders transmitted to OAL 1–17–2006 and filed 2–21–2006 (Register 2006, No. 8).
- 4. Amendment of subsection (a) filed 5–11–2006 as an emergency; operative 5–11–2006 (Register 2006, No. 19). A Certificate of Compliance must be transmitted to OAL by 9–8–2006 or emergency language will be repealed by operation of law on the following day.
- 5. Certificate of Compliance as to 5-11-2006 order transmitted to OAL 8-11-2006 and filed 8-17-2006 (Register 2006, No. 33).

§ 3591.20. Light Brown Apple Moth Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows within which a certain pest, light brown apple moth (*Epiphyas postvittana*), is known to exist are hereby proclaimed to be eradication areas with respect to said pest:

The entire counties of Alameda, Contra Costa, Los Angeles, Marin, Monterey, Napa, San Benito, San Francisco, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Solano and Sonoma.

(b) Hosts Within Said Area. The following nursery stock, plants and plant parts and any greenwaste residues thereof or any other plant which by scientific investigation is shown to be capable of sustaining light brown apple moth in any stage of development:

Abelia spp. (abelia)

Abies spp. (fir)

Acacia spp. (acacias)

Acer spp. (maple)

Achillea spp. (yarrow)

Acmena spp. (lilly-pily tree)

Actinidia spp. (Chinese gooseberry, kiwi, kiwifruit)

Adiantum spp. (maidenhair ferns)

Aesculus spp. (horse chestnut, buckeye)

Alnus spp. (alder)

Amaranthus spp. (amaranths)

Antirrhinum spp. (snapdragons)

Apium spp. (celery)

Aquilegia spp. (columbines)

Arbutus spp. (madrone, strawberry tree)

Arctotheca spp. (capeweeds, cape dandelion)

Arctotis spp. (African daisy)

Artemesia spp. (mugwort, sage brush, tarragon, worm wood, etc.)

Asparagus spp. (asparagus, asparagus fern, smilax asparagus)

Astartea spp.

Aster spp. (asters)

Aucuba spp. (aucuba, Himalaya laurel, Japanese laurel)

Baccharis spp. (coyote brush, desert broom)

Banksia spp. (candle flowers)

Begonia spp. (begonia)

Berberis spp. (barberry)

Beta spp. (beet)

Betula spp. (birch)

Blandfordia spp. (Christmas bells)

Boronia spp. (boronias)

Brassica spp. (broccoli, cauliflower, cabbage, cress, kale, mustard, etc.)

Breynia spp. (snow bush)

Bromus spp. (brome, bromegrass, chess, foxtail, rescuegrass)

Buddleia spp. (butterfly bush)

Bursaria spp. (black thorns, prickly box)

Calendula spp. (calendula, marigold)

Callistemon spp. (bottle brush)

Camellia spp. (camellia)

Campsis spp. (trumpet creeper, trumpet vine)

Capsella spp. (shepard's purse)

Capsicum spp. (peppers)

Cardus spp. (Italian thistle, musk thistle, plumeless thistle)

Carmichaelia spp.

Carpobrutus spp. (ice plant, pickle weed, pigface)

Cassia spp. (golden shower, pink shower, rainbow shower, gold medallion tree)

Ceanothus spp. (buck brush, wild lilac)

Cedrus spp. (cedar)

Centranthus spp. (fox's brush, heliotrope, valerian)

Ceratostigma spp. (Chinese plumbago)

Chaenomeles spp. (Chinese–quince, flowering quince) *Chamaecyparis* spp. (false cypress, Port Orford cedar)

Chenopodium spp. (fat-hen, lamb's quarters)
Chimonanthus spp. (Japanese allspice, wintersweet)

Choisya spp. (Mexican orange)

Chrysanthemum spp. (chrysanthemums)
Chrysanthemum x morifolium (florist mums)

Cirsium spp. (Arizona thistle, bull thistle, Canada thistle)

Citrus spp. (citrus)

Clerodendron spp. (clematis, virgin's bower, lather flower, vase vine) *Clerodendron* spp. (bleeding heart vine, bowers, tubeflower, Turk's

turban)

Clethra spp. (white alder, summer–sweet)

Clianthus spp. (desert pea, glory pea, parrot's-beak) Convolvulus spp. (field bindweed, dwarf morning-glory)

Conyza spp. (fleabane, horsethistle) Coprosoma spp. (coprosoma, mirror bush)

Cordyline spp. (cabbage tree, dracaena, good-luck plant)

Coriaria spp. (tanner's tree)
Correa spp. (Australian fuchsia)
Cotoneaster spp. (cotoneaster)
Crataegus spp. (hawthorn)
Crocosmia spp. (montbretia)
Cryptomeria spp. (Japanese cedar)
Cryptostemma spp. (capeweed)

Cucumis spp. (cantaloupe, cucumber, melon, muskmelon)

Cucurbita spp. (gourds, pumpkins, squashes)

Cupressus spp. (cypress) Cydonia spp. (quince)

Cyphomandra spp. (tamarillo, tree tomato, tomato tree)

Cytisus spp. (genista, Scotch broom, Spanish broom, white Spanish)

Dahlia spp. (dahlia)

Datura spp. (angel's trumpet, Jimson weed, thorn apple)

Daucus spp. (carrot, Queen Anne's lace)
Deutzia spp. (crenate pride of Rochester)
Dodonaea spp. (hop bush, hopseed bush)
Diospyros spp. (ebony, persimmon)

Epilobium spp. (fireweed) Erica spp. (heath, heather) Eriobotrya spp. (loquat)

Eriostemon spp. (pink star, wax flower) Erodium spp. (cranesbill, filaree) Escallonia spp. (escallonias)

Eucalyptus spp. (eucalyptus, gum trees)

Eugenia spp. (cherry of the Rio Grande, Lilly Pilly, Surinam cherry)

Euonymus spp. (euonymus, spindle tree) Euphorbia spp. (euphorbia, spurges)

Fagus spp. (beech)

Feijoa spp. (feijoa, pineapple guava)

Ficus spp. (creeping fig, fig, fiddleleaf fig, rubber tree weeping fig)

Forsythia spp. (forsythias)
Fortunella spp. (kumquats)
Fragaria spp. (strawberry)
Fraxinus spp. (ash)
Fumaria spp. (fumitory)
Fuchsia spp. (fuchsias)

Garrya spp. (silk-tassel)

Gelsemium spp. (Carolina jessamine)

Genista spp. (brooms)
Geranium spp. (cranesbill)
Gerbera spp. (Transvaal daisy)

Gomphocarpus spp. (cotton bush, hairy balls, wild cotton) Grevillea spp. (hummingbird bush, grevilleas, silky—oak)

Gypsophila spp. (baby's-breath) Hakea spp. (pincushion tree)

Haloragis spp. (erect seaberry, seaberry) Hardenbergia spp. (coral pea, lilac vine)

Hebe spp. (hebe) Hedera spp. (ivy)

Helianthus spp. (Jerusalem artichoke, sunflower)

Helichrysum spp. (curry plant, licorice plant, straw flower)

Hoheria spp. (lacebark) Holcus spp. (velvet grass) Humulus spp. (hops)

Hypericum spp. (Aaron's beard, sweet-amber, St John's wort)

llex spp. (holly) *Iris* spp. (iris)

Jasminum spp. (jasmine)

Juglans spp. (California black walnut, butternut, English walnut)

Juncus spp. (rush)

Kerria spp. (Japanese kerria) Kunzea spp. (Burgan)

Laburnum spp. (bean treegolden-chain)

Lagunaria spp. (cow itch tree, Hercules' club, white field gourd)

Lantana spp. (lantana, shrub verbena)

Lathyrus spp. (sweet pea)

Laurus spp. (Grecian laurel, sweet bay)

Lavendula spp. (lavenders)
Leptospermum spp. (tea trees)
Leucodendron spp. (silver tree)
Ligustrum spp. (privet)
Lilium spp. (lilies)
Linum spp. (flax)

Litchi spp. (leechee, litchi, lychee) Lomandra spp. (mat-rush nyalla, tanika)

Lonicera spp. (honeysuckles)

Linus spp. (flax)

Lotus spp. (bird's-foot trefoil, parrot's-beak, winged pea)

Lupinus spp. (lupines) Lycopersicum spp. (tomatoes) Macadamia spp. (macadamia)

Magnolia spp. (cucumber tree, bull bay, magnolia, southern magnolia,

tulip tree)

Malus spp. (apple)
Malva spp. (mallow)
Mangifera spp. (mango)

Medicago spp. (alfalfa, bur clover, yellow trefoil) *Melaleuca* spp. (honey myrtle, bottlebrush)

Meliotus spp. (white sweet clover, yellow sweet clover)

Mentha spp. (mint)

Mesembryanthemum spp. (ice plant)

Metrosideros spp. (bottlebrush, iron tree, New Zealand Christmas tree)

Michelia spp. (michelia)

Monotoca spp. (broomheaths)
Myoporum spp. (myoporum, Ngaio-tree)

Muehlenbeckia spp. (maidenhair vine, wire plant)
Myosotis spp. (forget-me-not, scorpion grass)

Nemesia spp. (nemesia) Olea spp. (olive)

Opuntia spp. (beaver-tail, cholla, pencil cactus, prickly pear, rabbit-ears, tuna)

Oxalis spp. (lady's sorrel, redwood sorrel, wood sorrel)

Paeonia spp. (peony)

Parahebe spp.

Parkinsonia spp. (Jerusalem thorn, Mexican palo verde)

Parthenocissus spp. (woodbine, Virginia creeper)

Passiflora spp. (banana passionflower, passionfruit, poka)

Pastinaca spp. (parsnip)

Pelargonium spp. (florist's geraniums)

Penstemon spp. (beard-tongue, mountain-pride, scarlet-bugler)

Persea spp. (avocado, Florida mahogany, red bay)

Persoonia spp. (bonewood, lance-leaf)

Petroselinum spp. (parsley)

Phaseolus spp. (green bean, kidney bean, lima bean, snap bean, string bean)

Philadelphus spp. (mock orange)

Phlox spp. (phlox, sweet William)

Phorium spp. (flax lily, mountain flax, New Zealand flax)

Photinia spp. (photinia)

Phyllanthus spp. (emblic, foliage flower, Otaheite gooseberry)

Physalis spp. (ground cherry, husk tomato, tomatillo)

Picea spp. (spruce)

Pieris spp. (andromeda, fetterbrush, Japanese pieris, lily-of-the-valley bush)

Pinus spp. (pines)

Pipturus spp. (mamaki)

Pisum spp. (garden pea, English pea, snow pea, sugar pea)

Pittosporum spp. (pittosporums)

Plantago spp. (plantain)

Platysace spp. (native parsnip)

Plumbago spp. (leadwort, plumbago)

Podranea spp.

Polygala spp. (milkworts)

Polygonum spp. (fleece flower, knotweed, smartweed)

Populus spp. (cottonwood, poplar)

Primula spp. (cowslip, primrose, primula)

Prunus spp. (almond, apricot, cherry, nectarine, peach, plum, flowering ornamentals)

Pseudopanax spp. (five-finger, lancewood)

Pseudotsuga spp. (big-cone pine, Douglas-fir, Japanese Douglas-fir)

Pseudowintera spp. (Horpito)

Pteridium spp. (brackenfern)

Pteris spp. (brake, dish fern, table fern)

Pulicaria spp. (false fleabane)

Pyllanthus spp.

Pyracantha spp. (fire thorn, pyracantha)

Pyrus spp. (Asian pear, pear, ornamental pear, sand pear)

Quercus spp. (oak)

Racosperma spp. (wattle)

Ranunculus spp. (buttercups, crowfoot)

Raphanus spp. (wild radish)

Reseda spp. (mignonette)

Rhaphiolepis spp. (Japanese-hawthorn)

Rhododendron spp. (azalea, rhododendron)

Ribes spp. (currant, gooseberry)

Ripogonum spp. (supplejack)

Robinia spp. (locust)

Rosa spp. (roses)

Rubus spp. (blackberry, boysenberry, raspberry)

Rumex spp. (common sheep sorrel, dock, garden sorrel)

Salix spp. (willow)

Salvia spp. (sages)

Sambucus spp. (elderberry)

Santalum spp. (sandalwood)

Schlumbergera spp. = *Zygocactus* spp. (Christmas cactus, claw cactus, crab cactus)

Senecio spp. (dusty-miller, groundsels)

Sequoia spp. (coast redwood)

Sida spp. (fanpetals, Virginia mallow)

Sisymbrium spp. (hedge mustard)

Smilax spp. (greenbrier, Jacob's ladder, wild sarsaparilla)

Solanum spp. (horse nettles, nightshade, pepino, potato)

Solidago spp. (California goldenrod, Canada goldenrod, goldenrod)

Sollya spp. (Australian bluebells, bluebell creeper)

Sonchus spp. (sowthistle)

Sophora spp. (sophora)

Spergula spp. (corn spurry, spurry)

Syringa spp. (lilac)

Thuja spp. (cedar, giant cedar, Oriental arborvitae, red cedar, white cedar)

Tibouchina spp. (glory bush, lasiandra, pleroma, princess flower)

Tithonia spp. (Mexican sunflower)

Tradescantia spp. (chain plant, spiderwort, wandering Jew, widow's-tears, white-velvet)

Trema spp.

Trifolium spp. (clover)

Triglochin spp. (arrow grass)

Ulex spp. (furze, gorse, whin)

Ulma spp. (elm)

Urtica spp. (nettles, stinging nettles)

Vaccinium spp. (blueberry)

Verbena spp. (verbena, vervain)

Veronica spp. (brooklime, speedwell)

Viburnum spp. (arrowwoods)

Vicia spp. (broad bean, tare, vetch)

Vinca spp. (periwinkles)

Viloa spp. (Johnny-jump-up, miniature pansy, pansy, viola, violet)

Vitis spp. (grape)

Weigela spp. (weigela)

Weinmannia spp. (kamahi)

Wikstroemia spp. (Mou'a, Oahu false Ohelo)

Wilkesia spp.

Wisteria spp. (wisteria)

Zea spp. (corn, maize)

Zelkova spp. (zelkova)

Zygocactus spp. = *Schlumbergera* spp. (Christmas cactus, claw cactus, crab cactus)

- (c) Possible Carriers. Possible carriers shall include all appliances used in the growing, harvesting, processing and hauling of the host plants and plant parts and any greenwaste residues including but not limited to tractors, trailers, trucks, planting, picking and pruning equipment and processing machinery, the premises and appurtenances thereto and any lands where host plants are growing or were grown during the past season, or any other thing which by scientific investigation is shown to be capable of harboring or spreading any stage of the light brown apple moth.
- (d) Means and Methods. The following means and methods may be used in the control and eradication of said pest within said area:
- (1) The repeated application of insecticides or herbicides sprays or dusts, biological agents, pheromones to disrupt mating, or mass trapping by approved methods to any or all premises or lands, host plants or possible carriers, and any other articles or things which are infested or exposed to infestation and capable of harboring or spreading the light brown apple moth.
- (2) The removal and destruction of any and all possible carriers, including nursery stock or trees and shrubs if permission is received from the property owner, or if such action is the only practical way of eliminating the infestation of a host or possible carrier to prevent the spread or reinfestation of light brown apple moth.
- (3) The searching for all stages of light brown apple moth by visual inspection, the use of traps, or any other means anywhere within the said area.

- (4) The removal and destruction of abandoned or unwanted hosts or possible carriers bearing or capable of bearing light brown apple moth in any life stage.
- (5) Covering with tarps or enclosed construction of all trucks, trailers and other appliances hauling host plants, host plant crops or greenwaste residues to or from packing or processing facilities, greenwaste transfer stations, landfills, or elsewhere, to prevent spillage or blowout along roads.

§ 3591.21. Asian Citrus Psyllid Eradication Area.

(a) Proclamation of Eradication Area. The portions of the State of California described as follows, within which a certain pest, *Diaphorina citri* (Asian citrus psyllid), is known to exist or there is an immediate threat of introduction, are hereby proclaimed to be eradication areas with respect to said pest:

The entire State.

- (b) Hosts and Possible Carriers, Within Said Area.
- (1) All nursery stock and plants and plant parts and plant products capable of propagation, except seed and fruit of:

Aegle marmelos (bael, Bengal quince, golden apple, bela, milva)

Aeglopsis chevalieri (Chevalier's aeglopsis)

Afraegle gabonensis (Gabon powder-flask)

Afraegle paniculata (Nigerian powder-flask)

Atalantia missionis (=Pamburus missionis)

Atalantia monophylla (Indian atalantia)

Atalantia spp

Balsamocitrus dawei (Uganda powder-flask)

Bergia (=Murraya) koenigii (curry leaf)

Calodendrum capense (Cape chestnut)

X Citrocirus webberi

Citropsis articulata (Katimboro, Muboro, West African cherry orange)

Citropsis gilletiana (cherry–orange)

Citropsis schweinfurthii (African cherry-orange)

Citrus aurantiifolia (lime, Key lime, Persian lime, lima, limón agrio, limón ceuti, lima mejicana, limero)

Citrus aurantium (sour orange, Seville orange, bigarde, marmalade orange, naranja agria, naranja amarga)

Citrus hystrix (Mauritius papeda, Kaffir lime)

Citrus jambhiri (rough lemon, jambhiri–orange, limón rugoso, rugoso)

Citrus limon (lemon, limón, limonero)

Citrus madurensis (=X Citrofortunella microcarpa)

Citrus maxima (pummelo, pomelo, shaddock, pompelmous, toronja)

Citrus medica (citron, cidra, cidro, toronja)

Citrus meyeri (Meyer lemon, dwarf lemon)

Citrus x nobilis (king mandarin, tangor, Florida orange, King-of-Siam)

Citrus x paradisi (grapefruit, pomelo, toronja)

Citrus reticulata (mandarin, tangerine, mandarina)

Citrus sinensis (sweet orange, orange, naranja, naranja dulce)

Citrus spp.

Clausena anisum-olens (anis)

Clausena excavata (clausena)

Clausena indica (clausena)

Clausena lansium (wampi, wampee)

Clymenia polyandra (a-mulis)

Eremocitrus glauca (Australian desert lime)

Eremocitrus hybrid

Fortunella crassifolia (Meiwa kumquat)

Fortunella margarita (Nagami kumquat, oval kumquat)

Fortunella polyandra (Malayan kumquat)

Fortunella spp.

Limonia acidissima (Indian wood apple)

Merrillia caloxylon (flowering merrillia)

Microcitrus australasica (finger-lime)

Microcitrus australis (Australian round-lime)

Microcitrus papuana (desert-lime)

X Microcitronella spp.

Murraya spp. (curry leaf, orange–jasmine, Chinese–box, naranjo jazmin)

Naringi crenulata (naringi)

Pamburus missionis (pamburus, =Atalantia missionis)

Poncirus trifoliata (trifoliate orange, naranjo trébol)

Severinia buxifolia (Chinese box-orange)

Swinglea glutinosa (tabog)

Tetradium ruticarpum (evodia, wu zhu yu)

Toddalia asiatica (orange climber)

Triphasia trifolia (trifoliate limeberry, triphasia)

Vepris (=Toddalia) lanceolata (white ironwood)

Zanthoxylum fagara (wild lime, lime prickly-ash)

- (3) Any other articles which are infested or exposed to infestation by *Diaphorina citri*.
- (c) Means and Methods. The following means and methods may be used in the eradication, control or suppression of said pest within said area
- (1) The repeated timely application of insecticides or herbicides sprays or dusts, biological agents, or mass trapping by approved methods to any or all premises or lands, host plants or possible carriers, and any other articles or things which are infested or exposed to infestation and capable of harboring or spreading *Diaphorina citri*.
- (2) The removal and destruction of any and all possible carriers, including nursery stock or trees and shrubs if permission is received from the property owner, or if such action is the only practical way of eliminat-

ing the infestation of a host or possible carrier to prevent the spread or reinfestation of Diaphorina citri.

- (3) The searching for all stages of *Diaphorina citri* by visual inspection, the use of traps, or any other means anywhere within the said area.
- (4) The removal and destruction of abandoned or unwanted hosts or possible carriers bearing or capable of bearing Diaphorina citri in any

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 407, 5322, 5761, 5762 and 5763, Food and Agricultural Code. HISTORY

1. New section filed 7-24-2008 as an emergency; operative 7-24-2008 (Register 2008. No. 30). A Certificate of Compliance must be transmitted to OAL by 1-20-2009 or emergency language will be repealed by operation of law on the following day.

§ 3591.22. False Codling Moth Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows within which a certain pest, false codling moth (Thaumatotibia leucotreta), is known to exist are hereby proclaimed to be eradication areas with respect to said pest:

The entire State.

(b) Hosts Within Said Area. The following nursery stock, plants and plant parts and any greenwaste residues thereof or any other plant which by scientific investigation is shown to be capable of sustaining false codling moth in any stage of development:

Scientifc Name

Abelmoschus esculentus Abutilon hybridum Abutilon spp. Ananas comosus Annona cherimola Annona glabra Annona muricata Annona reticulata Annona squamosa Annona spp. Averrhoa carambola Azanza garckeana Bauhinia galpini Butryospermum parkii Caesalpinia pulcherrima Calotropis procera Camellia sinensis Capparis tomentosa Capsicum spp. Cassia petersiana Catha edulis Ceiba pentandra Chrysophyllum cainito Citrus aurantiifolia Citrus limon Citrus paradisi

Citrus paradisi x Citrus reticulata Citrus reticulata Citrus reticulata x Citrus sinensis

Citrus sinensis Citrus spp. Coffea arabica Coffea spp. Cola nitida

Combretum apiculatum Combretum zeyheri Cyphomandra betacea Diospyros mespiliformis Diospyros spp.

Englerophytum magalismontanum

Eriobotrya japonica Eugenia uniflora Ficus capensis Flacourtia indica Garcinia mangostana Gossypium hirsutum Gossypium spp. Harpephyllym cattrum Hibiscus spp. Juglans regia

Juglans spp. Litchi chinensis Lycopersicon esculentum Macadamia ternifolia

Common Name

Okra Indian mallow

Flowering maple, Mallow Pineapple

Cherimoya Pond apple Soursop Custard apple Sugar apple Sweetsop Carambola Snot apple Pride of De Kaap Butterseed Peacock flower

Sodom apple

Woolly caper-bush Pepper Monkey pod Khat

Kapok Star apple Lime Lemon Grapefruit Tangelo Mandarin orange Temple orange

Sweet orange Orange Coffee Coffee Cola

Red bushwillow, Rooibos Large fruited bushwillow

Tree tomato Jakkalsbessie Persimmon Stemfruit Loquat Surinam cherry Wild fig Governor's plum Mangosteen Cotton Cotton Kafir plum Hibiscus English walnut Walnut Litchi

Tomato

Macadamia nut

Scientife Name

Macadamia spp. Mangifera indica Mumisops zeyheri

Musa paradisiaca var. sapientum Olea europaea

Pennisetum purpureum Persea americana Phaseolus lunatus Physalis ixocarna Physalis spp. Podocarpus falcatus Prunus armeniaca Prunus domestica

Prunus spp. Pseudolachnostylis maprounaefolia

Psidium guajava Punica granatum Quercus spp. Ricinus communis Royena pallens Schotia afra Schotia speciosa

Prunus persica

Sclerocarya birrea Sclerocarya caffra Sechium edule

Sida spp. Solanum melongena Sorghum vulgare Sorghum spp. Syzygium cordatum Syzygium jambos Synsepalum dulciticum Theobroma cacao Triumfetta spp. Vangueria infausta Vigna unguiculata

Vigna spp Vitis vinifera Vitis spp. Xeroderris stuhlmannii Ximenia caffra Yucca alofolia Yucca glóriosa

Yucca spp. Zea mays Ziziphus jujube Ziziphus mucronata Common Name

Macadamia Mango Red milkweed Banana Olive Elephant grass Avocado Lima bean Husk tomato Ground cherry Outeniqua yellowwood

Apricot Prune Peach

Cherry (all), Plum Kudu-berry Common guava Pomegranate Oak Castor bean Bluobos Boerboon

Hottentot kafir bean tree Marula

Marula, Kafir marvolanut

Chayote Sida Eggplant Sorghum Sorghum Water-bessie Rose apple Miraculous berry

Cacao Burrbark Wild medlar Cowpea Cowpea Grape Grape Wing bean Large sour plum Spanish bayonet Spanish dagger Yucca

Corn Jujube Buffalo thorn

- (c) Possible Carriers. Possible carriers shall include all appliances used in the growing, harvesting, processing and hauling of the host plants and plant parts and any greenwaste residues including but not limited to tractors, trailers, trucks, planting, picking and pruning equipment and processing machinery, the premises and appurtenances thereto and any lands where host plants are growing or were grown during the past season, or any other thing which by scientific investigation is shown to be capable of harboring or spreading any stage of false codling moth.
- (d) Means and Methods. The following means and methods may be used in the control and eradication of said pest within said area:
- (1) The repeated application of insecticides or herbicides sprays or dusts or biological agents or pheromones to disrupt mating or mass trapping by approved methods to any or all premises or lands, host plants or possible carriers, and any other articles or things which are infested or exposed to infestation and capable of harboring or spreading the false codling moth.
- (2) The removal and destruction of any and all possible carriers, including nursery stock or trees and shrubs if permission is received from the property owner, or if such action is the only practical way of eliminating the infestation of a host or possible carrier to prevent the spread or reinfestation of false codling moth.
- (3) The searching for all stages of false codling moth by visual inspection, the use of traps, or any other means anywhere within the said area.
- (4) The removal and destruction of abandoned or unwanted hosts or possible carriers bearing or capable of bearing false codling moth in any life stage.
- (5) Covering with tarps or enclosed construction of all trucks, trailers and other appliances hauling host plants, host plant crops or greenwaste

residues to or from packing or processing facilities, greenwaste transfer stations, landfills, or elsewhere, to prevent spillage or blowout along roads.

(6) The importation, rearing, or liberation of sterile forms of the false codling moth.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 407, 5322, 5761, 5762 and 5763, Food and Agricultural Code.

 New section filed 8-1-2008 as an emergency; operative 8-1-2008 (Register 2008, No. 31). A Certificate of Compliance must be transmitted to OAL by 1-28-2009 or emergency language will be repealed by operation of law on the following day.

§ 3592. White Garden Snail Eradication Area.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761–5763, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-21-88; operative 1-20-89 (Register 88, No. 53).
- 2. Repealer filed 5-7-93; operative 6-7-93 (Register 93, No. 19).

Article 3. Host-Free Districts

§ 3595. Cotton Pests Host-Free Districts.

- (a) Proclamation. The secretary finds that infestations of pink boll-worm and cotton boll weevil in cotton growing areas of California present a threat of further spread of pink bollworm and cotton boll weevil and that it is impracticable to eradicate said pests or to prevent the continuing spread of said pests unless cotton plants are not grown, cultivated, or maintained during certain periods of time.
- (b) Definitions. The following definitions are applicable to this section.
- (1) Pests. Pink bollworm (*Pectinophora gossypiella*) and cotton boll weevil (*Anthonomus grandis*).
- (2) Hosts. Cotton (*Gossypium*), okra (*Abelmoschus* [*Hibiscus*] *esculentus*), and kenaf (*Hibiscus cannibinus*) plants and parts thereof, or any other plant which by investigation is shown to be capable of sustaining pink bollworm or cotton boll weevil in any stage of development.
- (c) Host–Free Districts. The following areas are declared cotton pests host–free districts.

District 1. The entire counties of Inyo, Los Angeles, and San Diego and the entire county of San Bernardino except that portion described as follows: beginning at a point where U.S. Highway 95 intersects the California–Nevada border, then southerly along said highway to the San Bernardino–Riverside County line, east along said county line to the California–Arizona border, then easterly and northerly along the California–Arizona and California–Nevada borders to the point of beginning.

District 2. The entire counties of Kern, Kings, and Tulare.

District 3. The entire county of Fresno south of Shields Avenue and projected lines drawn due east and due west from the ends of Shields Avenue through Fresno County.

District 4. The entire counties of Madera, Merced, and San Benito and that portion of Fresno County north of Shields Avenue and projected lines drawn due east and due west from the ends of Shields Avenue through Fresno County.

District 5. The entire county of Riverside except the campus of the University of California at Riverside, that portion of San Bernardino County not in District 1, and Townships 9S and 10S of Imperial County.

District 6. That portion of Imperial County described as follows: that area bounded by the California–Arizona border, the California–Mexico border, and the All American Canal from the Pilot Knob Power Station to Laguna Dam.

District 7. That portion of Imperial County not included in Districts 5

(d) Requirements. All cotton plants in District one shall be destroyed in a manner described in subsection (f) below by March 1 of each year. All cotton plants in Districts two and three shall be destroyed in a manner described in subsection (f) below by December 20 of each year. All cotton plants in District four shall be destroyed in a manner described in sub-

section (f) below by December 31 of each year. All cotton plants in District five shall be destroyed in a manner described in subsection (f) below by January 1 of each year. All cotton plants in District six shall be destroyed in a manner described in subsection (f) below by December 15 of each year. All cotton plants in District seven shall be terminated in a manner described in subsection (e) below by October 1 of each year and destroyed in a manner described in subsection (f) below by December 1 of each year. No cotton shall be planted in Districts one or five prior to March 1 of each year. No cotton shall be planted in District six prior to February 15 of each year. No cotton shall be planted in District seven prior to February 10 of each year.

Okra, kenaf, and other hosts except cotton may be planted, grown, cultivated, or maintained in any district at any time.

Requirements of this regulation do not pertain to picked cotton stored in ricks or modules.

Unless otherwise amended, effective January 1, 2000 subsection (d) shall read:

(d) Requirements. All cotton plants in District one shall be destroyed in a manner described in subsection (e) below by March 1 of each year. All cotton plants in Districts two and three shall be destroyed in a manner described in subsection (e) below by December 20 of each year. All cotton plants in District four shall be destroyed in a manner described in subsection (e) below by December 31 of each year. All cotton plants in Districts five and seven shall be destroyed in a manner described in subsection (e) below by January 1 of each year. All cotton plants in District six shall be destroyed in a manner described in subsection (e) below by December 15 of each year. No cotton shall be planted in Districts one or five prior to March 1 of each year. No cotton shall be planted in Districts two, three, or four prior to March 10 of each year. No cotton shall be planted in Districts six or seven prior to February 15 of each year.

Okra, kenaf, and other hosts except cotton may be planted, grown, cultivated, or maintained in any district at any time.

Requirements of this regulation do not pertain to picked cotton stored in ricks or modules.

(e) Method of Termination. To comply with *termination* requirements described in subsection (d), cotton plants shall be *terminated* by the application, at label dosages, of a chemical registered for use on cotton plants to cause the *blooms*, *squares*, and *immature bolls* to drop from the plants.

Unless otherwise amended, effective January 1, 2000 subsection (e) shall read:

- (e) Method of Destruction.
- (1) Shredding. All cotton stalks and debris shall be shredded by a power driven shredding device in a manner which effectively reduces stalks to a particle size permitting burial and decomposition and assures that bolls remaining in the field are broken open and the parts scattered.
- (2) Tillage. Following shredding as required above, the land on which any cotton plants were growing during the preceding season shall be tilled in such a manner that stubs are uprooted and loosened from soil around their roots. Roots, plant stubs, shredding debris and trash remaining from harvesting or clean—up operations shall be mixed with surface soil.
 - (f) Method of Destruction.
- (1) Shredding. All cotton stalks and debris shall be shredded by a power driven shredding device in a manner which effectively reduces stalks to a particle size permitting burial and decomposition, and assures that bolls remaining in the field are broken open and the parts scattered.
- (2) Tillage. Following shredding as required above, the land on which any cotton plants were growing during the preceding season shall be tilled in such a manner that stubs are uprooted and loosened from soil around their roots. Roots, plant stubs, shredding debris and trash remaining from harvesting or clean—up operations shall be mixed with surface soil

Unless otherwise amended, effective January 1, 2000 subsection (f) shall read:

(f) Variances.

- (1) Upon written application for a variance the secretary, after consultation with the agricultural commissioner, may grant a variance from full compliance with requirements of subsection (d) and (e) when the applicant demonstrates to the secretary in said written application that compliance has been accomplished to the fullest extent practicable.
- (2) The secretary may grant a variance to growers on an areawide or statewide basis in case of extreme hardships resulting from adverse natural causes.
 - (g) Variances.
- (1) Upon written application for a variance the secretary, after consultation with the agricultural commissioner, may grant a variance from full compliance with requirements of subsections (d), (e), or (f) when the applicant demonstrates to the secretary in said written application that compliance has been accomplished to the fullest extent practicable.
- (2) The secretary may grant a variance to growers on an areawide or statewide basis in case of extreme hardships resulting from adverse natural causes.
- (3) The secretary authorizes the agricultural commissioner of the county which includes District seven to grant variances to growers in District seven from compliance with the termination requirements of subsection (d). The secretary finds that it would be detrimental to the eradication or effective control of the pests to extend this variance authorization to all other districts or periods. The variances from compliance with the termination requirement may be granted under the following conditions:
- (A) The variance may allow a grower to delay termination of a maximum of 30% of the grower's total acreage until October 7, provided that the same grower also terminates an equal or greater acreage by Septem-
- (B) The grower shall enter into a compliance agreement with the agricultural commissioner by September 20 of the year for which the variance is requested.
- (C) All growers in District seven are eligible for the variance if the above conditions are met.

Unless otherwise amended, effective January 1, 2000 subsection (g) shall be repealed.

- 1. Amendment filed 3-23-78 as an emergency; effective 4-10-78 at 12:01 a.m. (Register 78, No. 12). For prior history, see Register 78, No. 9.
- 2. Amendment of subsection (f) filed 5-1-78 as an emergency; effective upon filing (Register 78, No. 18).
- 3. Certificate of Compliance as to 3-23-78 order filed 6-1-78 (Register 78, No. 22).
- 4. Certificate of Compliance as to 5–1–78 order filed 7–3–78 (Register 78, No. 27).
- 5. New subsection (f)(3) filed 1-31-78 as an emergency; effective upon filing and only through 3-1-79 (Register 79, No. 5).
- 6. Editorial removal of subsection (f)(3) (Register 79, No. 19).
- 7. Amendment of subsection (d) filed 7-23-81; effective thirtieth day thereafter (Register 81, No. 30).
- 8. Amendment filed 1-4-89; operative 1-4-89 (Register 89, No. 11).
- 9. Amendment of last paragraph in subsections (d) and (e) and new subsection (g)(3) filed 12-2-91; operative 1-1-92 (Register 92, No. 9).
- 10. Amendment filed 11-10-94; operative 1-1-95 (Register 94, No. 45).
- 11. Amendment of subsection (d) and NOTE filed 10-18-95; operative 11-17-95 (Register 95, No. 42).
- 12. Amendment of subsection (d) filed 10-23-96; operative 11-22-96 (Register 96, No. 43).
- 13. Amendment of subsections (d)-(g) filed 11-20-97; operative 12-31-97 (Register 97, No. 46).
- 14. Amendment of both versions of subsection (d) filed 1-12-98 as an emergency; operative 1–12–98 (Register 98, No. 3). A Certificate of Compliance must be transmitted to OAL by 5–12–98 or emergency language will be repealed by operation of law on the following day.
- 15. Certificate of Compliance as to 1-12-98 order transmitted to OAL 4-17-98 and filed 5-26-98 (Register 98, No. 22).
- 16. Amendment of both versions of subsection (d) filed 5-27-98; operative 6-26-98 (Register 98, No. 22)
- 17. Amendment of second version of subsection (d) filed 2-4-2000; operative 2-15-2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 5).

§ 3596. Cotton Boll Weevil Host-Free Districts.

NOTE: Authority cited: Sections 407, 5322 and 5781, Food and Agricultural Code. Reference: Sections 5322, 5781 and 5784, Food and Agricultural Code.

HISTORY

- 1. New section filed 10-27-82 as an emergency; effective upon filing (Register 82, No. 44). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 2-24-83.
- 2. Certificate of Compliance filed 2-11-83 (Register 83, No. 7)
- Amendment filed 1–13–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 2).

 4. Amendment of subsection (c) filed 2–3–86; effective thirtieth day thereafter
- (Register 86, No. 6).
- Amendment of subsection (c) filed 2-23-87 as an emergency; effective upon filing (Register 87, No. 9). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6-23-87.
- 6. Reinstatement of subsection (c) as it existed prior to emergency filed 2-23-87 by operation of Government Code Section 11346.1(g) (Register 87, No. 34).
- 7. Repealer filed 1–4–89; operative 1–4–89 (Register 89, No. 11).

§ 3597. Lettuce Root Aphid Host-Free Districts.

The director finds that lettuce root aphid (Pemphigus bursarius) exists in certain lettuce-growing areas of California and that this pest cannot be eradicated or effectively controlled by recognized ordinary means.

- (a) Hosts. Lombardy poplar (Populus nigra Cv. 'Italica') and lettuce (Lactuca sativa).
- (b) Host–Free Districts. The following areas are declared lettuce root aphid host-free districts:

District 1. That portion of Monterey County bounded by a line drawn as follows: Beginning at the intersection of the Monterey Bay coastline and the Monterey – Santa Cruz County Line; then northeasterly along said county line to its intersection with Carpenteria Avenue; then southerly along said avenue to its intersection with Snyder Avenue; then westerly along an imaginary line from said intersection to the intersection of San Miguel Canyon Road and Lewis Road; then westerly along Lewis Road to its intersection with Dump road; then southwesterly along an imaginary line from said intersection to the intersection of Hall road and Elkhorn Road; then southerly along Elkhorn Road to its intersection with Elkhorn Slough; then southerly and westerly along said slough to its intersection with the Monterey Bay coastline; then northerly along said coastline to the point of beginning.

District 2. That portion of Monterey County bounded by a line drawn as follows: Beginning at the intersection of Crazy Horse Road and San Juan Grade; then southeasterly along an imaginary line to the intersection of Inverson Road and Gloria Road; then southeasterly along an imaginary line from said intersection to the intersection of County Route G15 and Stonewall Canyon Road; then southeasterly along said road to its intersection with County Route 16; then southeasterly along an imaginary line from said intersection to the intersection of Deadman Gulch Road and Lynch Canyon; then westerly along Deadman Gulch Road to its intersection with Sargent's Road; then due west along an imaginary line from said intersection to its intersection with the Salinas River; then northerly along said river to its intersection with U.S. Highway 101; then northwesterly along an imaginary line from said intersection to the intersection Oasis Road and County Route 14, then northwesterly along an imaginary line from said intersection to the intersection of Central Avenue Hobson Road; then northwesterly along an imaginary line from said intersection to the intersection of County Route 17 and County Route 16; then northerly along an imaginary line from said intersection to the intersection of Clark Road and Paraiso Road; then northwesterly along an imaginary line from said intersection to the west end of Limekiln Road; then northwesterly along an imaginary line from said intersection to the intersection of Blanco Road and Reservation Road; then northwesterly along an imaginary line from said intersection to the northern intersection of Del Monte Boulevard and Lapis Road; then due west along an imaginary line from said intersection to the Monterey Bay coastline, then northerly along said coastline to its intersection with an imaginary line drawn due west from the intersection of Crazy Horse Road and San Juan Grade; then due east along said line to the point beginning.

(c) Requirements. The planting, growing, cultivating, or maintenance in any manner of Lombardy poplar is prohibited in any lettuce root aphid host-free district unless a permit has been issued by the director or agricultural commissioner of the county in which the district is located. Any Lombardy poplar plant which is planted, growing, or being cultivated or maintained within a lettuce root aphid host–free district is a public nuisance and is subject to all the laws which relate to the abatement of such nuisance. Lettuce may be planted, grown, cultivated or maintained in any lettuce root aphid host–free district at any time, except when prohibited by Section 3611, California Code of Regulations.

NOTE: Authority cited: Section 407 and 5781, Food and Agricultural Code. Reference: Section 5781–5783, Food and Agricultural Code.

HISTORY

1. New section filed 3-18-88; operative 3-18-88 (Register 88, No. 14).

Article 4. Fees for Pest Control and Eradication

§ 3600. Fees for Control and Eradication of Pink Bollworm.

This section establishes procedures for collection of fees for control and eradication of pink bollworm or other related cotton pests as authorized by Section 6005 of the Food and Agricultural Code.

- (a) As used in this section, unless the context otherwise requires:
- (1) Ginner means any person who operates a cotton gin in California.
- (2) Grower means any person who owns or shares in the proceeds of a cotton crop grown in California.
- (b) The Director of Food and Agriculture, pursuant to Section 6005 of the Food and Agricultural Code hereby establishes fees for each bale of cotton grown in California. The fee shall vary in accordance with the protection afforded to the cotton crop in the area where the cotton is grown. The fees shall be:
- (1) For cotton grown in pink bollworm host–free districts; \$2.00 per bale.
- (2) For cotton grown outside pink bollworm host–free districts; \$0.50 per bale.

(The pink bollworm host–free districts are defined in Section 3595, Title 3 of the California Code of Regulations.)

The fees shall be payable by the grower of the cotton in accordance with procedures promulgated in this section which require collection at the time of ginning by California ginners on behalf of the Director for all cotton grown in the State. For California cotton ginned out of state, the growers shall pay the required fees to the Director of Food and Agriculture according to the assessment rate for the district or area where the cotton was grown.

- (c) Each ginner shall pay to the Director the sum collected or obligated to be collected for each calendar month before the fifteenth day of the following month.
- (d) Each grower who has cotton grown in California ginned outside of this State shall pay to the Director the sum owed for each calendar month before the fifteenth day of the following month.
- (e) Each ginner and grower shall accompany payments with a report in duplicate containing such information as is required by instructions of the Director.
- (f) Each ginner and grower shall maintain such books and records as are necessary to verify reports and remittances to the Director for two years. All such records shall be made available for inspection by the Director.
- (g) All information obtained by the Director from books, records and reports of ginners pursuant to this section shall be confidential.

NOTE: Authority cited: Sections 407 and 6005, Food and Agricultural Code. Reference: Section 6005, Food and Agricultural Code.

HISTORY

 Amendment of subsections (b)(1) and (2) filed 10–30–86; designated effective 11–1–86 pursuant to Government Code section 11346.2(d) (Register 86, No. 44). For prior history, see Register 85, No. 43.

- 2. Amendment of subsection (b) filed 9–30–88; operative 9–30–88 (Register 88, No. 41)
- Amendment of subsection (b)(1) filed 7-17-89 as an emergency; operative 7-17-89 (Register 89, No. 29). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11-14-89.
- Certificate of Compliance transmitted to OAL 11–14–89 and filed 11–27–89 (Register 89, No. 49).
- Amendment of subsection (b) filed 8-16-91 as an emergency; operative 8-16-91 (Register 91, No. 50). A Certificate of Compliance must be transmitted to OAL 12-16-91 or emergency language will be repealed by operation of law on the following day.
- 6. Amendment of subsection (b) and NOTE filed 8-27-92; operative 8-27-92 (Register 92, No. 35).
- 7. Amendment of subsection (b)(1) filed 8-16-93; operative 9-15-93 (Register 93, No. 34).

§ 3601. Assessments for Control of Beet Leafhopper.

This section establishes a schedule of, and procedures for the collection of, assessments for the crops shown in paragraph (g) below for the purpose of beet leafhopper control as authorized in sections 6032–6036 of the Food and Agricultural Code, added by Ch. 1017, Stats. 1970.

- (a) As used in this section, unless the context otherwise requires:
- (1) Producer—handler means a producer who operates as a handler, as to any crop in paragraph (g), produced.
- (2) Producer means any person who owns or shares in the proceeds of a crop subject to payment of assessment pursuant to this section.
- (b) The Director of Food and Agriculture, pursuant to Sections 6031–6036 of the Food and Agricultural Code, hereby establishes an assessment for each crop produced in each district stated in paragraph (g). The full amount of the assessment shall be collected from the producer by the first handler at the point and time that the crop is purchased or received by the handler, or in the case of a producer–handler when the crop is marketed.
- (c) The assessment collected from producers by handlers or due from producer-handlers with the exception of handlers of dry beans and/or vine seeds shall be paid to the Director before the 15th day of the following month. Assessments collected from producers by handlers or due from producer-handlers of dry beans and/or vine seeds shall be paid to the Director annually by April 1 for products cleaned during the crop year.
- (d) Each handler or producer-handler shall accompany payments with a statement in duplicate containing such information as is required by instructions of the Director.
- (e) Each handler or producer-handler shall maintain for four years such books and records as are necessary to verify reports and remittances to the Director. All such records shall be made available for inspection by the Director.
- (f) All information obtained by the Director from books, records, and reports of handlers or producer-handlers pursuant to this section shall be confidential.
- (g) The assessments are as follows:

District I—Imperial and Riverside Counties.

HISTORY

- 1. Amendment of subsection (g)(3) filed 3–22–78 as an emergency; designated effective 4–1–78 at 12:01 a.m. (Register 78, No. 12). For prior history, see Register 77, No. 31.
- 2. Certificate of Compliance filed 4-12-78 (Register 78, No. 15).
- 3. Amendment of subsection (g) filed 6–1–78; designated effective 7–1–78 (Register 78, No. 22).
- Amendment filed 12-18-79 as an emergency; designated effective 1-1-80 (Register 79, No. 51). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 4-17-80.
- 5. Certificate of Compliance filed 3-14-80 (Register 80, No. 11).
- 6. Editorial correction repealing subsections (a)(1) and (a)(2) and renumbering subsections (a)(3) and (a)(4) to subsections (a)(1) and (a)(2) filed 2-17-83 (Register 83, No. 8).
- Amendment of subsection (g) filed 7-19-84; effective thirtieth day thereafter (Register 84, No. 29).
- 8. Amendment of subsection (g) filed 10–21–85; designated effective 11–1–85 pursuant to Government Code section 11346.2(d) (Register 85, No. 43)
- Amendment of subsection (g) filed 11–24–86; designated effective 1–1–87. (Register 86, No.48)

- 10. Amendment of subsection (g) filed 3–25–94; operative 5–1–94 (Register 94, No. 12).
- 11. Amendment of subsection (g) filed 3–16–95; operative 7–1–95 (Register 95, No. 11).
- 12. Amendment of subsection (g) filed 5-20-98 as an emergency; operative 7-1-98 (Register 98, No. 21). A Certificate of Compliance must be transmitted to OAL by 10-29-98 or emergency language will be repealed by operation of law on the following day.
- 13. Certificate of Compliance as to 5–20–98 order transmitted to OAL 8–14–98 and filed 9–3–98 (Register 98, No. 36).
- 14. Amendment of subsection (g) filed 6–7–99 as an emergency; operative 7–1–99 (Register 99, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–29–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 6–7–99 order transmitted to OAL 10–19–99 and filed 12–2–99 (Register 99, No. 49).
- 16. Amendment of subsection (g) filed 4–26–2004 as an emergency; operative 7–1–2004 (Register 2004, No. 18). A Certificate of Compliance must be transmitted to OAL by 10–29–2004 or emergency language will be repealed by operation of law on the following day.
- 17. Certificate of Compliance as to 4-26-2004 order transmitted to OAL 9-28-2004 and filed 11-10-2004 (Register 2004, No. 46).

Chapter 4. Plant Pathology

(Originally Printed 7-25-45)

Subchapter 1. Host-Free Districts and Periods (Western Celery Mosaic)

Article 1. Territorial Limits and Periods

§ 3610. Western Celery Mosaic Host–Free Districts and Periods.

The director finds that western celery mosaic virus (which is also known as celery mosaic, *Apium* virus 1, and *Marmor umbelliferarum*) exists in certain celery growing areas of California and that this pest cannot be eradicated or effectively controlled by recognized ordinary means.

- (a) Host. Celery (Apium graveolens).
- (b) Host-Free Districts. The following areas are declared western celery mosaic host-free districts:

District 1. That portion of San Luis Obispo County bounded by a line drawn as follows: Beginning at the point of junction of San Luis Obispo Creek and the mean high tide line of the Pacific Ocean (near the town of Avila); then northeasterly along the center line of San Luis Obispo Creek to the point of its intersection with the center line of U.S. Highway 101; then easterly (approximately 12 miles) along an imaginary line drawn from said intersection to the point of junction of Lopez Creek and Arroyo Grande Creek (near the west boundary of Sec. 33, T31S, R14E, MDM); then southerly (approximately 9 1/2 miles) along an imaginary line drawn from the junction of Lopez Creek and Arroyo Grande Creek through the southernmost corner of Lot No. 39 of Rancho Nipomo to its point of intersection with the center line of U.S. Highway 101; then westerly (approximately 8 miles) along an imaginary line drawn from said point on U.S. Highway 101 through the southwest corner of Lot No. 131 of Rancho Bolsa de Chemisal to its point of intersection with the mean high tide line of the Pacific Ocean; then along the mean high tide line of the Pacific Ocean in a northerly and westerly direction to the point of be-

District 2. The entire County of Monterey.

District 3. The entire County of Ventura.

- (c) Host–Free Periods. The following are declared host–free periods for the districts described in subsection (b):
 - (1) At any place within the District, outside of greenhouses, in:
- (A) District 1, the host–free period shall commence on January 1 and end on January 31.
- (B) District 2, the host-free period shall commence on January 1 and end on January 31.

- (C) District 3, the host–free period shall commence on July 15 and end on August 4.
 - (2) Inside of greenhouses within the District in:
- (A) District 1, the host–free period shall be any continuous eight day period each year agreed upon by the county agricultural commissioner and each greenhouse owner or manager.
- (B) District 2, the host–free period shall be any continuous eight day period each year agreed upon by the county agricultural commissioner and each greenhouse owner or manager.
- (C) District 3, the host-free period shall commence on July 15 and end on July 22.
 - (d) Prohibitions and Permits.
- (1) Except as provided in paragraphs (2), (3) and (4) of this subsection, the planting of celery transplants, including any variety or subspecies of Apium graveolens, or the holding of celery in any state of cultivation or growth, other than seed or seedlings not showing above ground, is prohibited within the western celery mosaic host–free districts during the annual host–free periods established for those districts.
- (2) No celery plant or part thereof, other than seed, shall be planted or maintained in any state of cultivation or growth within any western celery mosaic host–free district unless a permit has been issued by the director or the agricultural commissioner of the county in which the district is located. The director or the agricultural commissioner may issue a permit to introduce, plant, and maintain celery transplants within the district, except during any host–free period established in subsection (c) (unless the permit is issued pursuant to paragraph (3) or (4) below), provided the director or commissioner determines that the celery plants covered by the permit originated on premises or in a district which is free from western celery mosaic.
- (3) The county agricultural commissioner may issue a permit for growing celery transplants within the host–free district at any time in any greenhouse located one–half mile or more from any wild or cultivated celery growing outside of greenhouses, provided the following conditions are met:
- (A) The applicant notified the commissioner in writing, 30 days in advance of the proposed starting date, of his or her intention to observe a host–free period in the greenhouse at a time other than during the host–free period established for the district in subsection (c)(2), and
- (B) The commissioner determines that no celery plant or living celery plant material has been present in the greenhouse during a period of consecutive days, equivalent to the period established for the district in subsection (c)(2), within the immediately preceding twelve—month period.
- (4) Celery plants may be grown at any time in any western celery mosaic host–free district, in an experimental celery breeding plot, provided a permit for growing experimental celery in a breeding plot has been issued by the agricultural commissioner of the county in which the district is located. Said permit may continue in effect indefinitely providing the commissioner determines that:
 - (A) Effective insect vector control measures are maintained;
- (B) The plot is and remains isolated from commercial celery fields; and
- (C) The plot does not otherwise constitute a source of spread of western celery mosaic virus.

NOTE: Authority cited: Sections 407 and 5781, Food and Agricultural Code. Reference: Sections 5781 and 5784, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (c) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 69, No. 25
- 2. Repealer of Article 1 (Sections 3610–3622, not consecutive) and new Article 1 (Section 3610) filed 12–10–82; effective thirtieth day thereafter (Register 82, No. 50). For prior history, see Registers 78, No. 13; 77, No. 31; 71, No. 15; and 71, No. 1.
- Amendment of subsections (b), (c)(1)(A) and (c)(2)(A)-(B) filed 4-29-93; operative 5-31-93 (Register 93, No. 18).

§ 3611. Lettuce Mosaic Host-Free District and Period.

The Director finds that lettuce mosaic virus disease exists in certain lettuce growing areas of California and that this pest cannot be eradicated or effectively controlled by recognized ordinary means.

- (a) Hosts. Lettuce (*Lactuca* spp) and endive or escarole (*Cichoriumendivia*).
 - (b) Host–Free District. The entire County of Monterey.
- (c) Host–Free Period. The host–free period for the district described in subsection (b) shall commence on December 7 and end on December 21 of each year.
- (d) Restrictions. No host plant including greenhouse seed crop plants or transplants or part thereof, except seed, shall be planted or maintained in any state of cultivation or growth in any lettuce mosaic host–free district during the host–free period unless authorized under a permit issued by the director or agricultural commissioner of the county in which the district is located. During the existence of the host–free period, any host plant or part thereof, except seed, which is planted, growing or being cultivated or maintained within a host–free district, is a public nuisance and subject too all the laws which relate to the abatement of such nuisance. NOTE: Authority cited: Sections 407 and 5781, Food and Agricultural Code. Reference: Sections 5781–5783, Food and Agricultural Code.

HISTORY

- New section filed 9-23-87 as an emergency; operative 9-23-87 (Register 87, No. 40). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 1-21-88.
- Emergency language filed 9–23–87 repealed byoperation of Government Code Section 11346.1 (Register 88, No. 33).
- 3. New section filed 8-9-88; operative 8-9-88 (Register 88, No. 33).

§ 3612. Chrysanthemum White Rust Host–Free District and Period.

The Secretary finds that Chrysanthemum white rust (*Puccinia horia-na*) exists in certain areas of California and that this pest cannot be eradicated or effectively controlled by recognized ordinary means.

- (a) Hosts. *Chrysanthemum* spp. and *Dendranthema* spp. (Chrysanthemums).
- (b) Host-Free District. That portion of Santa Cruz County bounded by a line as follows: Beginning at the intersection of State Highway 1 and State Highway 17; then, northerly along State Highway 17 to its intersection with El Rancho Drive; then, northerly along said drive to its intersection with Carbonera Drive; then, southeasterly along Carbonera Drive to its intersection with Vista Bella Drive; then, southeasterly from said intersection along an imaginary line to the intersection of Glen Canyon Road and Branciforte Drive; then, northerly along said drive to its intersection with Granite Creek Road; then, easterly from said intersection along an imaginary line to the intersection of Browns Valley Road and Hazel Dell Road; then, southeasterly along Hazel Dell Road to its intersection with Mt. Madonna Road; then, southerly along Mt. Madonna Road to its intersection with Casserly Road; then, southeasterly along Casserly Road to its intersection with Carlton Road; then, southeasterly along Carlton Road to its intersection with Riverside Drive (State Highway 129); then, southwesterly along said drive to its intersection with State Highway 1; then, southerly along said highway to its intersection with the Santa Cruz-Monterey County Line; then, southwesterly along said county line to its intersection with the Pacific Ocean coastline; then, northerly and westerly along the said coastline to its intersection with the Santa Cruz Pier; then, northerly along said pier to its intersection with Beach Street; then, westerly along said street to its intersection with West Cliff Drive; then, southerly along said drive to its intersection with Bay Street; then, northwesterly along said street to its intersection with State Highway 1; then, northeasterly along said highway to the point of beginning.
- (c) Host–Free Period. The host–free period for the district described in subsection (b) shall commence on October 1, 1995 and end on May 31, 1996

(d) Restrictions. No host plant, except seed, shall be planted or maintained in any state of cultivation or growth in any Chrysanthemum white rust host–free district during the host–free period unless authorized under a compliance agreement by the Secretary. During the existence of the host–free period, any host plant or part thereof, except seed, which is planted, growing or being cultivated or maintained within a host–free district is a public nuisance and subject to all of the laws which relate to the abatement of such nuisance.

Unless otherwise amended, effective June 1, 1996 this regulation is repealed.

NOTE: Authority cited: Sections 407 and 5781, Food and Agricultural Code. Reference: Sections 5781–5783, Food and Agricultural Code.

HISTORY

1. New section filed 8-23-95 as an emergency; operative 8-23-95 (Register 95, No. 34). A Certificate of Compliance must be transmitted to OAL by 12-21-95 or emergency language will be repealed by operation of law on the following day.

2. Certificate of Compliance as to 8-23-95 order transmitted to OAL 12-13-95 and filed 1-3-96 (Register 96, No. 1).

Subchapter 2. Meyer Lemon

Article 1. Quick Decline of Citrus

§ 3628. Definitions.

(a) "Improved Meyer lemon" means clones of the Meyer lemons designated as Citrus Variety Improvement Numbers 319 and 333 which the director under the authority of Section 5981 of the California Food and Agricultural Code, has determined to be free from infections of virus or mycoplasma–like diseases dangerous or detrimental to the production of commercial or ornamental citrus fruit or plants.

[The next page is 341.]

- (b) "Meyer lemon plant" as referred to in this group excludes all improved Meyer lemon plants as defined above, but otherwise includes:
- (1) Any plant which consists entirely or partly of Meyer lemon plant tissue or
- (2) Any plant to which Meyer lemon plant tissue has been joined at any time by any method of grafting.
- (c) "Virus free" as used in this group means plants free of the tristeza virus or complexes of the tristeza virus as determined by inspection or, in case of dispute, by index testing, or by other recognized laboratory procedures as set forth in regulations of the department.
- (d) "Sale" includes offer for sale, expose for sale, possess for sale, exchange, barter, or trade.
- (e) "Propagation" means to reproduce or multiply a plant by any asexual method.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 5322, 5801–5803 and 5981, Food and Agricultural Code.

HISTORY

- New section filed 8-5-76; effective thirtieth day thereafter (Register 76, No. 32).
- 2. Amendment filed 10–28–82; effective thirtieth da thereafter (Register 82, No. 44).

§ 3629. Meyer Lemon Plants Prohibited.

- (a) Propagation and/or Sale. The propagation and/or sale of Meyer lemon plants is prohibited except under permit from the director for scientific and research purposes.
- (b) Declaration of Nuisance and Abatement. All Meyer lemon plants are declared to be a public nuisance subject to all laws and remedies relating to the prevention and abatement of nuisances. The director or the county agricultural commissioner acting under the supervision and direction of the director may take such action including removal and destruction with reference to such nuisance as is provided by law.

NOTE: Authority cited: Sections 407, 5322 and 5801, Food and Agricultural Code. Reference: Sections 5322, 5801 and 5803, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-5-76; effective thirtieth day thereafter (Register 76, No. 32).
- 2. Amendment of subsections (b) and (c) filed 1-12-77; effective thirtieth day thereafter (Register 77, No. 3).
- 3. Amendment filed 10–28–82; effective thirtieth day thereafter (Register 82, No. 44).
- $4.\ Amendment\ filed\ 9-29-89;\ operative\ 10-29-89\ (Register\ 89,\ No.\ 41).$

§ 3630. Improved Meyer Lemon Plants.

NOTE: Authority cited: Sections 407, 5322 and 5802, Food and Agricultural Code. Reference: Sections 5322, 5401–5402, 5802 and 5821–5822, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (b)(1) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 77, No. 3.
- 2. Amendment filed 10–28–82; effective thirtieth day thereafter (Register 82, No. 44).
- 3. Amendment filed 9-29-89; operative 10-29-89 (Register 89, No. 41).
- 4. Repealer filed 5-7-97; operative 6-6-97 (Register 97, No. 19).

Subchapter 3. Eradication Areas

§ 3635.

NOTE: Authority cited: Sections 407, 5322, and 5761, Food and Agricultural Code. Reference: Sections 5761–5764, Food and Agricultural Code.

HISTORY

1. Repealer filed 5–1–79; effective thirtieth day thereafter (Register 79, No. 18). For prior history of Group 3 (Sections 3635–3638), see Registers 62, No. 6; 67, No. 9; 68, No. 18; 70, No. 3; 72, No. 17; 74, No. 37; 75, No. 26.

§ 3636. Chrysanthemum White Rust Disease Eradication Area.

(a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which a certain pest, Chrysanthemum

white rust disease (*Puccinia horiana*), is known to exist, is hereby proclaimed to be an eradication area with respect to said disease:

- (1) Eradication Area. The entire counties of Santa Clara, Santa Cruz and Santa Barbara.
 - (b) Hosts.
- (1) Plants and plant parts of the genera *Chrysanthemum* and *Dendranthema*.
- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest within said area:
- (1) The application of chemicals to host plants and parts thereof as often as necessary to affect control of the disease.
 - (2) The examination of host plants.
- (3) The removal and immediate destruction of diseased material of hosts listed in (b) above.
 - (4) The steam treatment of nursery beds.
- (5) The establishment of host–free periods within the eradication area listed in (a)(1) above.

NOTE: Authority cited: Sections 407, 5322 and 5781, Food and Agricultural Code. Reference: Sections 5761, 5762, 5763, 5781, 5782 and 5783, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–5–93 as an emergency; operative 1–5–93 (Register 93, No. 2). A Certificate of Compliance must be transmitted to OAL 5–5–93 or emergency language will be repealed by operation of law on the following day.
- Amendment of subsection (a)(1) filed 1-14-93 as an emergency; operative 1-14-93 (Register 93, No. 3). A Certificate of Compliance must be transmitted to OAL 5-14-93 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 1–14–93 order transmitted to OAL 5–12–93 and filed 5–17–93 (Register 93, No. 21).
- 4. Certificate of Compliance as to 1–5–93 order transmitted to OAL 4–28–93 and filed 6–2–93 (Register 93, No. 23).
- Amendment of subsection (a)(1) filed 1–18–94 as an emergency; operative 1–18–94 (Register 94, No. 3). A Certificate of Compliance must be transmitted to OAL by 5–18–94 or emergency language will be repealed by operation of law on the following day.
- 6. Certificate of Compliance as to 1–18–94 order transmitted to OAL 4–18–94 and filed 5–31–94 (Register 94, No. 22).
- 7. Amendment of subsection (a)(1), new subsections (c)(4) and (c)(5) and amendment of Norte filed 5–23–2005 as an emergency; operative 5–23–2005 (Register 2005, No. 21). A Certificate of Compliance must be transmitted to OAL by 9–20–2005 or emergency language will be repealed by operation of law on the following day.

§ 3637. Karnal Bunt Disease Eradication Area.

- (a) Proclamation of Eradication Area. That portion of the State of California described as follows, within which a certain pest, Karnal bunt disease (*Tilletia indica*), is known to exist, is hereby proclaimed to be an eradication area with respect to said disease:
 - (1) Eradication Area. The entire counties of Imperial and Riverside.
 - (b) Hosts and Possible Carriers.
- (1) Conveyances, including trucks, railroad cars, and other containers used to move wheat, durum wheat, or triticale;
- (2) Grain elevators/equipment/structures used for storing and handling wheat, durum wheat, and triticale;
 - (3) Milling products or byproducts, except flour;
- (4) Plants, or plant parts, including grain, seed, or straw of all varieties of the following species: wheat (*Triticum aestivum*); durum wheat (*Triticum durum*); and triticale (*Triticum aestivum* x *Secale cereale*);
 - (5) Root crops with soil;
 - (6) Soil from areas where field crops are produced;
- (7) Manure from animals that have fed on wheat, durum wheat, or triticale:
 - (8) Used bags, sacks and containers;
 - (9) Used farm tools;
 - (10) Used mechanized cultivating equipment;
 - (11) Used mechanized harvesting equipment;
 - (12) Used seed conditioning equipment;
 - (13) Used mechanized soil-moving equipment;
- (14) Any other product, article or means of conveyance when it is determined by the Secretary that it presents a risk of spreading spores of the fungus which causes Karnal bunt disease due to its proximity to an infes-

tation of Karnal bunt disease and the person in possession has been so no-

- (c) Means and Methods. The following means and methods may be used in the eradication and control of said pest within said area:
- (1) The application of chemicals to hosts and possible carriers as often as necessary to effect control of the disease.
 - (2) The examination of hosts and possible carriers.
- (3) The removal and immediate destruction of material of hosts listed in (b)(4) above which is diseased, has been exposed to the disease, or originated from a source known to be diseased.
- (4) The prohibition of planting host crops on properties known to be infested with or exposed to the disease.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5761-5763, Food and Agricultural Code.

HISTORY

- 1. New section filed 4-5-96 as an emergency; operative 4-5-96 (Register 96, No. 14). A Certificate of Compliance must be transmitted to OAL by 8-5-96 or emergency language will be repealed by operation of law on the following day.
- 2. Amendment of subsection (a)(1) filed 4-10-96 as an emergency; operative 4–10–96 (Register 96, No. 15). A Certificate of Compliance must be transmitted to OAL by 8-8-96 or emergency language will be repealed by operation of law on the following day
- 3. Certificate of Compliance as to 4-10-96 order transmitted to OAL 8-8-96 and filed 9-4-96 (Register 96, No. 36).
- 4. Editorial correction of HISTORY 1 (Register 96, No. 38).
- 5. Certificate of Compliance as to 4-5-96 order transmitted to OAL 8-5-96 and filed 9-16-96 (Register 96, No. 38).

§ 3638.

NOTE: Authority cited: Sections 407, 5322, and 5761, Food and Agricultural Code. Reference: Sections 5761-5764, Food and Agricultural Code.

Subchapter 4. Nematodes

§ 3640. Nematodes: Commercially Clean Nursery Stock for Farm Planting.

- (a) Nematode infested nursery stock for farm planting has been determined by the Secretary to be detrimental to agriculture.
- (b) Nursery stock for farm planting shall be commercially clean with respect to economically important nematode species detrimental to agriculture.
- (c) "Commercially clean" nursery stock for farm planting means nursery stock for commercial farm planting that is certified in accordance with the requirements of the Nursery Stock Nematode Certification program as provided in Sections 3055 through 3055.6; and nursery stock which is not so certified shall not be sold or shipped within the State.
- (1) Nursery stock for farm planting produced in non-soil media and garlic, mint, onion, and seed potato nursery stock are exempt from the requirements of this section.
- (2) Nursery stock for farm planting found to be infested with economically important nematode species detrimental to agricultural production may be sold or shipped when, by written agreement, the buyer and the agricultural commissioner of the county where the stock is to be planted both agree to accept the stock for planting in an area where the nematode species infesting the stock is already present.
- (e) Enforcement: Enforcement of this regulation shall be the responsibility of the Department.

NOTE: Authority cited: Sections 407, 5322, 6901 and 6902, Food and Agricultural Code. Reference: Sections 5322, 6901 and 6902, Food and Agricultural Code.

HISTORY

- 1. New subchapter 4 and section filed 12-13-94 as an emergency; operative 12-13-94 (Register 94, No. 50). A Certificate of Compliance must be transmitted to OAL by 4-12-94 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 12-13-94 order including amendment of NOTE transmitted to OAL 4-11-95 and filed 5-2-95 (Register 95, No. 18).

Subchapter 5. Pierce's Disease Control **Program**

Article 1. General Provisions

§ 3650. Legislative Intent and Authority.

- (a) The Legislature has declared that the plant killing bacterium, Xylella fastidiosa and the resulting Pierce's disease, and its vectors present a clear and present danger to California's grape industry, as well as to many other commodities and plant life. The Legislature has created the Pierce's Disease Control Program in the Department of Food and Agriculture.
- (b) The Secretary is authorized to establish, maintain, and enforce regulations consistent with the intent of the Legislature as expressed in Sections 6045-6047, Food and Agricultural Code, as may be necessary to interpret, clarify, or implement Sections 6045–6047. This authority shall be liberally construed to effectuate the intent of Sections 6045–6047.
- (c) The regulations in this subchapter are of statewide interest and concern and are intended to wholly occupy the field.

NOTE: Authority cited: Sections 407, 5323 and 6047, Food and Agricultural Code. Reference: Section 5323, 6045 and 6046, Food and Agricultural Code.

HISTORY

- 1. New subchapter 5 (articles 1-3, sections 3650-3660) article 1 (sections 3650-3654) and section filed 7-25-2000 as an emergency; operative 7–25–2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–22–2000 or emergency language will be repealed by operation of law on the following day.
- 2. New subchapter 5 (articles 1-3, sections 3650-3660) article 1 (sections 3650-3654) and section refiled 11-21-2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New subchapter 5 (articles 1-3, sections 3650-3660) article 1 (sections 3650-3654) and section refiled 3-19-2001 as an emergency; operative 3-19-2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7-17-2001 or emergency language will be repealed by operation of law on the following day.
- 4. New subchapter 5 (articles 1-3, sections 3650-3660) article 1 (sections 3650-3654) and section refiled 7-11-2001 as an emergency; operative 7-11-2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11-8-2001 or emergency language will be repealed by operation of law on the following day.
- 5. Repealed by operation of Government Code section 11346.1(g) (Register 2002, No 42)
- 6. New subchapter 5 (articles 1-4, sections 3650-3663.5), article 1 (sections 3650-3654) and section filed 10-17-2002 as an emergency; operative 10-17-2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2-14-2003 or emergency language will be repealed by operation of law on the following day
- 7. New subchapter 5 (articles 1-4, sections 3650-3663.5), article 1 (sections 3650-3654) and section refiled 2-6-2003 as an emergency; operative 2-14-2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- 8. Certificate of Compliance as to 2-6-2003 order transmitted to OAL 6-16-2003 and filed 7-28-2003 (Register 2003, No. 31).

§ 3651. Control Program.

- (a) The Pierce's Disease Control Program is to be conducted by the local public entity designated by that county's board of supervisors under a Department approved local Pierce's disease workplan, including proposed treatment of Pierce's disease and its vectors.
- (b) The Department shall provide logistical support and assistance when necessary for combating Pierce's disease and its vectors. Logistical support and assistance includes:
 - (1) Biological control assistance.
- (2) Provide information on production practices to reduce levels of Pierce's disease and its vectors.
 - (3) Conduct workplan activities when necessary.
 - (4) Develop pest control alternatives.
 - (c) Workplans.
- (1) The Pierce's Disease Control Program workplan elements shall include, but are not limited to, all of the following:

Page 342 Register 2005, No. 21; 5-27-2005

- (A) Develop and deliver producer outreach information and training to local communities, groups, and individuals to organize involvement with the workplan and to raise awareness regarding Pierce's disease and its vectors
- (B) Develop and deliver ongoing training of the designated local public entity's employees in the biology, survey, and treatment of Pierce's disease and its vectors.
- (C) Identify a local Pierce's disease coordinator within the designated local public entity.
 - (D) Conduct detection and delimitation surveys for vectors.
- (E) If determined necessary to prevent the establishment and spread of Pierce's disease and its vectors, direct and coordinate treatment programs to control or eliminate Pierce's disease and its vectors. Treatment programs shall comply with all applicable laws and regulations and shall be conducted in an environmentally responsible manner.
- (F) Develop and implement a data collection system to track and report new infestations of Pierce's disease and its vectors in a manner respectful of property and other rights of those affected.
- (2) The Department may permit the local public entity to establish variations from the standards set forth in this subchapter based on the written submission to the Department of clear and convincing evidence of stakes and risks to justify a more or less stringent standard.
- (3) The local public entity shall conduct a hearing if an application of the workplan is appealed in writing to that entity. The results of said hearing shall be transmitted to the Department. The hearing notice procedures shall meet minimum due process standards appropriate for the circumstances. The notice and hearing procedures shall be set out in the workplan of the local public entity.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Sections 6045 and 6046, Food and Agricultural Code.

HISTORY

- New section filed 7–25–2000 as an emergency; operative 7–25–2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–22–2000 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 7–11–2001 as an emergency; operative 7–11–2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–8–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).
- 9. Amendment of subsection (c)(1) filed 9–30–2003; operative 9–30–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 40).

§ 3652. Definitions.

The following definitions apply to this subchapter:

- (a) "Bulk citrus" means any unprocessed citrus fruit that have not been commercially packed.
- (b) "Bulk grapes" means any unprocessed grapes that have not been commercially packed.
- (c) "Carriers" means any vehicle, container, or other article or means of conveyance that the Department determines presents a possible risk of artificial spread of vectors.

- (d) "Certification" means the issuance of a certificate in written, stamp, or sticker format by an agricultural commissioner or commissioner representative that affirms that a shipment meets all applicable regulatory requirements.
- (e) "Infestation" shall mean the detection of five (5) or more adult vectors within any five-day period and within a 300-yard radius, or the detection of multiple life stages within any five-day period and within a 300-yard radius. Vectors detected in direct association with a shipment from an infested area do not, in themselves, constitute an infestation.
- (f) "Infested area" shall mean an area within one (1.0) mile of a vector infestation or an area which has not been surveyed in a manner approved by the Department to detect vectors.
- (g) "Non-infested area" shall mean one in which no infestations have been detected after survey in a manner approved by the Department to detect vectors or where the infestation designation has been removed.
- (h) "Pierce's disease" means the disease of grapevines caused by *Xy-lella fastidiosa*, a bacterium.
- (i) "Plants" means nursery stock and privately owned plants that may host vectors of Pierce's disease, except when in the form of seeds, bulbs, stolons, corms, pips, buds, cut flowers, cut foliage, tubers, leafless dormant nursery stock, or harvested fruits and vegetables.
- (j) "Processed grapes" means grapes which have been juiced, canned, crushed, or dried.
- (k) "Vectors or Vectors of Pierce's disease" shall mean *Homalodisca* coagulata, glassy-winged sharpshooter.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-25-2000 as an emergency; operative 7-25-2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-22-2000 or emergency language will be repealed by operation of law on the following day.
- 2. New subsection (a) and subsection relettering filed 11–8–2000 as an emergency; operative 11–8–2000 (Register 2000, No. 45). A Certificate of Compliance must be transmitted to OAL by 3–8–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New subsection (a) and subsection relettering refiled 3–8–2001 as an emergency; operative 3–8–2001 (Register 2001, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–6–2001 or emergency language will be repealed by operation of law on the following day.
- 5. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 6. New subsection (a) and subsection relettering refiled 7–6–2001 as an emergency; operative 7–6–2001 (Register 2001, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–5–2001 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 7–11–2001 as an emergency; operative 7–11–2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–8–2001 or emergency language will be repealed by operation of law on the following day.
- 8. Reinstatement of section as is existed prior to 7–6–2001 emergency amendment by operation of Government Code section 11346.1(f) (Register 2001, No. 46).
- Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 10. New section filed 10-17-2002 as an emergency; operative 10-17-2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2-14-2003 or emergency language will be repealed by operation of law on the following day.
- 11. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- 12. Certificate of Compliance as to 2-6-2003 order transmitted to OAL 6-16-2003 and filed 7-28-2003 (Register 2003, No. 31).

§ 3653. Area Designation Procedures.

(a) An area shall be designated as non-infested based on written affirmation to the Department by the local public entity that the area has been surveyed in a manner approved by the Department to detect vectors with negative results.

- (b) An area shall be designated as infested when the survey results indicate an infestation is present, the Department has defined the infested area, and the local public entity is notified immediately. The Department shall also provide electronic and/or written notification of the area designations to the other local public entities and other interested or affected parties.
- (c) The local public entity may appeal an area designation by submission to the Department of a written request for review of the designation, accompanied by clear and convincing evidence justifying a change in the designation. The appeal must be filed no later than ten (10) working days following receipt of the notice of designation. The Department must respond with a written decision no later than ten (10) working days following receipt of the appeal. During the pending of the appeal, the designation under appeal shall remain in effect.
 - (d) The infested area designation shall be removed if:
- (1) No additional vectors are detected by trapping or visual surveys during the period of January 1 through October 31 of the year following the last vector detection; or,
- (2) Only adult vectors were detected and thorough vector survey/ detection activities document that a breeding population is not present. NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-25-2000 as an emergency; operative 7-25-2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-22-2000 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 7–11–2001 as an emergency; operative 7–11–2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–8–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

§ 3654. Inspection of Shipments and Disposition of Infested Shipments.

- (a) All shipments of bulk citrus, bulk grapes, plants, and carriers are subject to inspection by the agricultural commissioner upon arrival at destination
- (b) Any shipment found to be infested with live vectors shall be refused delivery and may be immediately destroyed unless no damage would be caused to agriculture if the shipment is returned to origin, or processed or treated in a manner approved by the Department to eliminate the vectors.

HISTORY

- 1. New section filed 7-25-2000 as an emergency; operative 7-25-2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-22-2000 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.

- 3. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 7-11-2001 as an emergency; operative 7-11-2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11-8-2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

Article 2. Standards for Grapes

The Secretary hereby establishes the following standards for the movement of bulk grapes to prevent the artificial spread of the Pierce's disease bacterium and its vectors.

§ 3655. Standards for Movement.

- (a) Bulk grapes shall meet the following standards prior to shipment from an infested area to a non-infested area:
- (1) The bulk grapes have originated from a vineyard which has been harvested, handled, or treated in a manner approved by the Department to eliminate vectors and the grapes are monitored during harvest; or,
- (2) The bulk grapes have originated from a non-infested vineyard as determined by surveys, including trapping and visual, approved by the Department to detect the presence of vectors and the grapes are monitored during harvest; or,
- (3) If the county agricultural commissioner at origin and destination determine that compliance with subparagraph (1) or (2) is not feasible, the bulk grapes and associated plant material may be moved for processing in a manner approved by the Department which eliminates the potential artificial spread of vectors and the grapes are monitored during harvest, if feasible, and upon arrival for processing. The commissioners shall notify the Department of their determination as soon as is practicable; or.
- (4) The bulk grapes have completed a post–harvest treatment approved by the Department to eliminate all live vectors.
- (b) To ensure that the above standards are met, the grower shall do all of the following:
- (1) Notify the county agricultural commissioner (of the county in which the vineyard is located) a minimum of 72 hours prior to the initiation of harvest.
- (2) Assure that a certificate, as provided in Section 3656, is attached to every shipment and is provided to the receiver.
- (3) Maintain harvest and shipment records for two years. These records shall be made available to the county agricultural commissioner during normal business hours.
- (c) To ensure that the above standards are met, the receiver shall do all of the following:
- (1) Conduct a trapping and detection program as specified by the agricultural commissioner (of the county in which the receiver is located) to determine if the vector is present at the receiver's facility.
- (2) Collect the certificates, required in Section 3656, for each shipment and maintain them as part of the shipment documentation.
- (3) Dispose of all material other than grapes in a manner that eliminates vector survival risk. Disposal methods include, but are not limited to, steam, crush, cold treat, and solarization.
- (4) Maintain trapping, vector detection, and shipment records for two years. These records shall be made available to the county agricultural commissioner during normal business hours.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New article 2 (sections 3655–3657) and section filed 7–25–2000 as an emergency; operative 7–25–2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–22–2000 or emergency language will be repealed by operation of law on the following day.
- 2. New article 2 (sections 3655–3657) and section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New article 2 (sections 3655–3657) and section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New article 2 (sections 3655–3657) and section refiled 7–11–2001 as an emergency; operative 7–11–2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–8–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New article 2 (sections 3655–3657) and section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New article 2 (sections 3655–3657) and section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).
- 9. Amendment of subsection (c)(1) filed 9–30–2003; operative 9–30–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 40).

§ 3656. Certification.

Shipments of bulk grapes shall be certified as meeting the standards for movement in the following manner:

- (a) Each shipment of bulk grapes shall be accompanied by a certificate issued by the county agricultural commissioner at origin affirming that the shipment meets the standards for movement set forth in Section 3655(a).
- (b) Prior to the movement of each shipment of bulk grapes moved under Section 3655(a)(3), the origin agricultural commissioner shall notify the destination agricultural commissioner of the quantity of grapes being moved, the specific destination, and identification information.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-25-2000 as an emergency; operative 7-25-2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-22-2000 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 7–11–2001 as an emergency; operative 7–11–2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–8–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

§ 3657. Exemptions.

These standards do not apply to the following types of shipments:

- (a) Unprocessed, bulk grapes which are being transported without undue delay or diversion through non-infested areas to an infested destination for processing or treatment, or are being moved to a destination outside the State.
 - (b) Processed grapes.
 - (c) Shipments originating from non-infested areas.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–25–2000 as an emergency; operative 7–25–2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–22–2000 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 7–11–2001 as an emergency; operative 7–11–2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–8–2001 or emergency language will be repealed by operation of law on the following day.
- 5. Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42)
- 6. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

Article 3. Standards for Plants

The Secretary hereby establishes the following standards for the movements of plants to prevent the artificial spread of the Pierce's disease bacterium and its vectors.

§ 3658. Plants.

Shipments of the following live plants shall meet the requirements of Article 3, Standards for Plants:

Scientific Name Abelia spp. Acacia spp. Aeschynanthus spp. Agapanthus spp. Agonis spp. Ajuga spp. Albizia spp Aleurites spp. Alnus spp. Althaea spp. Amaranthus spp. Ambrosia spp. Amelanchier spp. Ananas spp. Annona spp. Antirrhinum spp. Aptenia spp. Arbutus spp. Archontophoenix spp. Arctostaphylos spp. Arecastrum spp. Aronia spp. Asclepias spp. Asparagus spp. Aspidistra spp. Baccharis spp. Bauhinia spp. Berberis spp. Betula spp.

HISTORY

- New article 3 (sections 3658–3660) and section filed 7–25–2000 as an emergency; operative 7–25–2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11–22–2000 or emergency language will be repealed by operation of law on the following day.
- 2. New article 3 (sections 3658–3660) and section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New article 3 (sections 3658–3660) and section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New article 3 (sections 3658–3660) and section refiled 7–11–2001 as an emergency; operative 7–11–2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–8–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New article 3 (sections 3658–3661) and section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New article 3 (sections 3658–3661) and section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- 8. Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).
- 9. Amendment filed 9–30–2003; operative 9–30–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 40).

§ 3659. Standards for Movement.

- (a) Plants shall meet the following standards prior to shipment from an infested area to a non-infested area:
- (1) The plants have been produced, handled, or treated in a manner approved by the Department to eliminate vectors; or,

- (2) The plants originate from a non-infested premise or a non-infested portion of a premise as determined by surveys, including trapping and visual, approved by the Department to detect the presence of vectors and the plants are monitored during loading for shipment; or,
- (3) The plants have been inspected, found to be free of vectors, and have been safeguarded from vectors until shipped.
- (b) To ensure that the above standards are met, the nursery shall do all of the following:
 - (1) Train employees to inspect for and recognize suspect vectors.
- (2) Conduct a trapping and detection program as specified by the agricultural commissioner (of the county in which the nursery is located) to determine if the vector is present at the nursery facility.
- (3) If the vector is present, conduct an ongoing monitoring program that includes a vector free shipment staging area and inspection of plants for vectors.
- (4) Conduct treatments, as necessary, to ensure that each shipment is free of the vectors.
- (5) Maintain treatment, vector trapping, detection, and monitoring records for two years. These records shall be made available to the county agricultural commissioner during normal business hours.

HISTORY

- 1. New section filed 7-25-2000 as an emergency; operative 7-25-2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-22-2000 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 7-11-2001 as an emergency; operative 7-11-2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11-8-2001 or emergency language will be repealed by operation of law on the following day.
- 5. Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- 8. Certificate of Compliance as to 2-6-2003 order transmitted to OAL 6-16-2003 and filed 7-28-2003 (Register 2003, No. 31).

§ 3660. Certification.

Shipments of plants shall be certified as meeting the standards for movement in the following manner:

(a) Each shipment of plants shall be accompanied by a certificate issued by the agricultural commissioner at origin affirming that the shipment meets the standards for movement set forth in Section 3659.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-25-2000 as an emergency; operative 7-25-2000 (Register 2000, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-22-2000 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 11–21–2000 as an emergency; operative 11–21–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3–21–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 3–19–2001 as an emergency; operative 3–19–2001 (Register 2001, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–17–2001 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 7-11-2001 as an emergency; operative 7-11-2001 (Register 2001, No. 28). A Certificate of Compliance must be transmitted to OAL by 11-8-2001 or emergency language will be repealed by operation of law on the following day.

- 5. Repealed by operation of Government Code section 11346.1(g) (Register 2002, No. 42).
- 6. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 7. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

§ 3661. Exemptions.

These standards do not apply to the following types of shipments:

- (a) Privately owned plants which have been maintained indoors.
- (b) Plants which have been designated by the Department as not presenting a risk for the artificial spread of vectors.
- (c) Plants which are being transported without undue delay or diversion through non-infested areas.
 - (d) Plant shipments originating from non-infested areas.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New article 4 (sections 3661–3663) and section filed 11–8–2000 as an emergency; operative 11–8–2000 (Register 2000, No. 45). A Certificate of Compliance must be transmitted to OAL by 3–8–2001 or emergency language will be repealed by operation of law on the following day.
- 2. New article 4 (sections 3661–3663) and section refiled 3–8–2001 as an emergency; operative 3–8–2001 (Register 2001, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–6–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New article 4 (sections 3661–3663) and section refiled 7–6–2001 as an emergency; operative 7–6–2001 (Register 2001, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–5–2001 or emergency language will be repealed by operation of law on the following day.
- 4. Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 46)
- 5. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 6. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

Article 4. Standards for Citrus Fruit

The Secretary hereby establishes the following standards for the movement of bulk citrus to prevent the artificial spread of the vectors of Pierce's disease.

§ 3662. Standards for Movement.

Bulk citrus from an infested area shall meet the standards in (a) or (b) prior to shipment to a non-infested area or an area in which an active control program is being conducted; or prior to transiting a non-infested area or an area in which an active control program is being conducted. The owner shall notify the county agricultural commissioner (of the county in which the grove is located) a minimum of 72 hours prior to the initiation of harvest.

- (a) The bulk citrus have been harvested, handled, or treated in a manner approved by the Department to eliminate all live vectors including, but not limited to, the following:
- (1) Treat grove(s) when infestation levels of vectors are evidenced by multiple detections(s); or,
- (2) Mechanically brush and protect citrus from infestation by vectors; or,
 - (3) Post-harvest treatment of citrus.
- (b) The bulk citrus have originated from a non-infested grove as determined by surveys, including trapping and visual, approved by the De-

- partment to detect the presence of vectors and the citrus fruit are monitored during harvest.
- (c) To ensure that the standards in (a) or (b) are met, the receiver shall do all of the following:
- (1) Collect the certificates, required in Section 3663, for each shipment and maintain them as part of the shipment documentation.
- (2) Notify the agricultural commissioner (of the county in which the receiver is located) when suspect vectors are detected.
- (3) Safeguard infested shipments until rejection action is specified by the agricultural commissioner.
- (4) Maintain shipment records for two years. These records shall be made available to the county agricultural commissioner during normal business hours

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–8–2000 as an emergency; operative 11–8–2000 (Register 2000, No. 45). A Certificate of Compliance must be transmitted to OAL by 3–8–2001 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 3–8–2001 as an emergency; operative 3–8–2001 (Register 2001, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–6–2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 7–6–2001 as an emergency; operative 7–6–2001 (Register 2001, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–5–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 46).
- 5. New article 4 (sections 3662–3663.5) and section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 6. New article 4 (sections 3662–3663.5) and section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).
- 8. Amendment of subsections (c)(2) and (c)(4) filed 9-30-2003; operative 9-30-2003 pursuant to Government Code section 11343.4 (Register 2003, No. 40)

§ 3663. Certification.

Shipments of bulk citrus shall be certified as meeting the standards for movement in the following manner:

(a) Each shipment of bulk citrus shall be accompanied by a certificate or other document issued by the agricultural commissioner at origin affirming that the shipment meets the standards for movement set forth in Section 3662.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

History

- 1. New section filed 11–8–2000 as an emergency; operative 11–8–2000 (Register 2000, No. 45). A Certificate of Compliance must be transmitted to OAL by 3–8–2001 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 3-8-2001 as an emergency; operative 3-8-2001 (Register 2001, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-6-2001 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 7–6–2001 as an emergency; operative 7–6–2001 (Register 2001, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–5–2001 or emergency language will be repealed by operation of law on the following day.
- 4. Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 46).
- 5. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 6. New section refiled 2–6–2003 as an emergency; operative 2–14–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–16–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

§ 3663.5. Exemptions.

These standards do not apply to the following types of shipments:

- (a) Processed citrus fruit, including citrus fruit which has been washed and waxed and is being moved in bulk quantities.
 - (b) Shipments originating from non-infested areas.
- (c) Shipments originating in the infested area that do not enter a non-infested area or an area in which an active control program is being conducted.

NOTE: Authority cited: Sections 407 and 6047, Food and Agricultural Code. Reference: Section 6045, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–17–2002 as an emergency; operative 10–17–2002 (Register 2002, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–14–2003 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 2-6-2003 as an emergency; operative 2-14-2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6-16-2003 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 2–6–2003 order transmitted to OAL 6–16–2003 and filed 7–28–2003 (Register 2003, No. 31).

Article 5. Grapevine Loss Assistance Program

The Secretary hereby establishes the grapevine loss assistance program to compensate eligible vineyard growers for grapevine losses due to Pierce's disease spread by the glassy—winged sharpshooter.

§ 3664. Purpose.

The Grapevine Loss Assistance Program (GVLAP) is established to provide a maximum aggregate \$7.14 million in payment to eligible vine-yard owners who incur losses due to Pierce's disease spread by the glassy-winged sharpshooter.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter). Reference: Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter); and Sections 6045–6047, Food and Agricultural Code.

HISTORY

- New article 5 (sections 3664–3669) and section filed 4–11–2002 as an emergency; operative 4–11–2002 (Register 2002, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–9–2002 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 4-11-2002 order transmitted to OAL 7-19-2002 and filed 8-19-2002 (Register 2002, No. 34).

§ 3665. Application for GVLAP Form GWSS-003 (March 1, 2002).

- (a) Application for compensation shall be made using a Department application form for this purpose.
- (b) Application forms are available from the county agricultural commissioner, Pierce's Disease Control Program, or from the web site: http://www.cdfa.ca.gov/phpps/pdcp.
- (c) Applications for the GVLAP shall be submitted directly to the county agricultural commissioner(s) of the county(ies) in which the vine-yard(s) is located.
- (d) The application form(s) shall be complete and submitted by mail, courier, or hand delivery by the close of business on June 1, 2002 and must include the original signature(s) of the person or entity (authorized representative).
- (e) The application form(s) must be accompanied by Form W–9 Request for Taxpayer Identification Number and Certification (Department of the Treasury, Internal Revenue Service, Rev. January 2002) and all other documents required by this article.
- (f) The application shall indicate the names of all owners (person) of each vineyard or the entity doing business.
- (g) Any person or entity applying for and/or receiving compensation must permit authorized representatives of the program to enter their property during normal business hours without prior notice to assess the accuracy of information supplied to the department; to inspect, examine,

and make copies on site of such reports and accounts to determine qualification or eligibility for or compliance with the program.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter). Reference: Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter); and Sections 6045–6047, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–11–2002 as an emergency; operative 4–11–2002 (Register 2002, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–9–2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–11–2002 order transmitted to OAL 7–19–2002 and filed 8–19–2002 (Register 2002, No. 34).

§ 3666. Eligibility.

The following eligibility requirements apply to the GVLAP:

- (a) Payments are authorized to compensate grape growers only for grapevine losses resulting from Pierce's disease spread by the glassy-winged sharpshooter. Payments are not authorized for grape production losses or for the cost of replanting grapevines.
- (b) Distribution of the compensation payments shall be based on vineyard establishment cost, or a portion thereof, in the county in which the vineyard is located.
- (c) Removal of the grapevines shall have been conducted as a result of infection by Pierce's disease spread by the glassy-winged sharpshooter
- (d) Each removed vineyard acre must have a minimum of 30 percent infection per contiguous acre.
 - (e) Vineyards must have been removed on or after August 10, 1999.
 - (f) Vineyards must have been removed on or before May 1, 2002.
- (g) Documentation must be provided to confirm that the grapevine removal was due to infection by Pierce's disease spread by the glassywinged sharpshooter.
- (h) Proof or confirmation of Pierce's disease infection of the grapevines removed must be confirmed in writing by the local county agricultural commissioner, or the University of California Cooperative Extension farm advisor for viticulture, or by the vineyard owner by written certification that the vines were removed because of infection by Pierce's disease.
- (1) Owner certification must be accompanied by documentation and verification of the number of acres infected and removed.
- (2) Owner certification shall include the date(s) the grapevines were planted and removed.
- (3) The vineyard owner must submit as much evidence as possible (the most preferable method of confirmation being an accepted diagnostic test to indicate the presence of Pierce's disease by a government or university laboratory facility) indicating that the presence of Pierce's disease was the factor causing removal.
- (A) The county agricultural commissioner and/or the farm advisor shall be consulted to identify and verify the actual acreage removed.
- (B) If the presence of Pierce's disease is confirmed as described in (3) above, the sample submitted to the laboratory must be positively identified as representing the acreage removed.
- (C) The number of samples must sufficiently evidence, to the satisfaction of the county agricultural commissioner or the farm advisor, that the infection rate was a minimum of 30 percent per contiguous acre.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter). Reference: Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter); and Sections 6045–6047, Food and Agricultural Code.

HISTORY

- New section filed 4-11-2002 as an emergency; operative 4-11-2002 (Register 2002, No. 15). A Certificate of Compliance must be transmitted to OAL by 8-9-2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4-11-2002 order transmitted to OAL 7-19-2002 and filed 8-19-2002 (Register 2002, No. 34).

§ 3667. Application Review and Eligibility Determination.

(a) After receipt and review of each application, the county agricultural commissioner shall forward his/her recommendation regarding vineyard eligibility for compensation and the application, accompanied by all required documentation, to the Department's Pierce's Disease Control Program Sacramento office.

- (b) All information provided by an applicant is subject for review for completeness and verification by the Pierce's Disease Control Program prior to the final determination of vineyard(s) eligibility. The area from which the grapevines were removed must be verified as an "infested area" based on the distribution of glassy—winged sharpshooter as determined by the Pierce's Disease Control Program.
- (c) The program shall provide written eligibility determinations to the applicant(s) by September 30, 2002.
- (d) Payment shall be made to the name/business name that corresponds to the information provided on Form W-9 (as required by Section 3665[c]) by September 30, 2002, unless an extension is provided by the United States Department of Agriculture for distribution of the funds by December 31, 2002.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter). Reference: Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter); and Sections 6045–6047, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–11–2002 as an emergency; operative 4–11–2002 (Register 2002, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–9–2002 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 4-11-2002 order transmitted to OAL 7-19-2002 and filed 8-19-2002 (Register 2002, No. 34).

§ 3668. Payment Criteria.

- (a) The minimum acreage criterion is one (1) contiguous acre of removed vines demonstrating at least 30% infection rate per acre.
- (b) Vineyards that were removed after two (2) years of age and prior to ten (10) years of age will be compensated at the adjusted compensation rate per acre. The adjusted compensation rate per acre will be calculated using the average cost of vineyard establishment (planting and development costs for the first five [5] years of vineyard age) for the areas affected prorated on the basis of total qualified acreage determined by the Department.
- (c) The maximum rate of compensation for grapevine losses shall not exceed the estimated cost to establish a like vineyard, or portion thereof, in the county in which the vineyard is located.
- (d) For every year of vineyard age greater than ten (10) years, three (3) % will be deducted from the adjusted compensation rate per year per acre for the first 25 years of vine age. For every year of vineyard age greater than 25 years, three and six-tenths (3.6) % will be deducted from the adjusted compensation rate up to and including vineyard age 40. There will be no compensation available for vineyards in excess of 40 years of age.
- (e) If the total amount of applications for compensation exceeds the available funds, payments shall be reduced by a uniform percentage to match the available funds.
- (f) All owners accepting vine loss compensation funds from the Department for the acreage claimed are prohibited from reapplying for vine loss compensation from the Department for the same acreage.
- (g) Compensation limits per acre and pro-rata reimbursement levels will be calculated as a function of total qualified acreage at the end of the qualifying period.
- (h) If the Department or United States Department of Agriculture determines that any provisions of the application, or of the rules and regulations governing the program have not been complied with by the owner receiving compensation, noncompliance may result in the owner not being entitled to any additional payments, the owner refunding any payments made in connection with the compensation program, and owner liability for any other damages incurred as a result of such non-compliance. Non-compliance includes, but is not limited to:
- (1) The owner has adopted any scheme or other device which tends to defeat the purpose of the program provided for by this article;
- (2) The owner has made any fraudulent representation with respect to such program;
- (3) The owner has misrepresented any fact affecting a program determination.

(i) A vineyard owner must retain all financial records and accounts relating to compensation received under the program for a period of six (6) years after the date of payment, or until final resolution of any audit of records by the Department, whichever is later.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter). Reference: Stats. 2002, AB1242, Chapter 18, (An Act Relating to the Glassy-winged Sharpshooter); and Sections 6045–6047, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–11–2002 as an emergency; operative 4–11–2002 (Register 2002, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–9–2002 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 4–11–2002 order transmitted to OAL 7–19–2002 and filed 8–19–2002 (Register 2002, No. 34).

§ 3669. Appeal/Hearing Procedures.

- (a) An appeal of an eligibility decision relative to a compensation application may be filed with the Department's Pierce's Disease Control Program Sacramento office within fourteen (14) calendar days of the date of the decision. A hearing shall be conducted within seven (7) calendar days of an appeal that is timely filed. An appeal that is not timely filed shall be denied and no hearing shall be conducted in connection therewith.
- (b) Hearings shall be conducted pursuant to Chapter 4.5 (commencing with Section 11400) of Division 3 of Title 2 of the Government Code and these regulations.
- (c) Hearings shall be presided over and conducted by a hearing officer designated by the Secretary.
- (d) Hearings may be conducted by telephone, at the discretion of the Secretary.
- (e) The decision of the hearing officer shall be in writing. The decision shall be in minute order form, containing only a brief statement of the conclusion and findings to support the conclusion. It may be handwritten.
- (f) The decision shall be issued within 24 hours after the conclusion of the hearing and may be issued orally at the conclusion of the hearing subject to written confirmation.
- (g) The written decision shall be served on the appellant or designated representative either by personal service or, if available, by facsimile transmission.
- (h) The hearing officer's decision shall be final and not appealable to the Secretary or any other officer of the Department.
- (i) The appellant may seek judicial review of the hearing officer's decision by filing a petition for a writ of administrative mandamus in the appropriate court pursuant to Code of Civil Procedure Section 1084 *et sea*.
 - (i) Hearings shall be recorded by audiotape.

HISTORY

- New section filed 4-11-2002 as an emergency; operative 4-11-2002 (Register 2002, No. 15). A Certificate of Compliance must be transmitted to OAL by 8-9-2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4-11-2002 order transmitted to OAL 7-19-2002 and filed 8-19-2002 (Register 2002, No. 34).

Subchapter 6. Plant Disease Control

§ 3700. Oak Mortality Disease Control.

Restrictions are hereby established against the following pest, its hosts, and possible carriers.

- (a) Pest. A fungus, *Phytophthora ramorum*, which causes oak mortality disease (sudden oak death).
- (b) Regulated Area. The regulated area for the pest is: The entire counties of Alameda, Contra Costa, Humboldt, Lake, Marin, Mendocino, Monterey, Napa, San Mateo, Santa Clara, Santa Cruz, San Francisco, Solano and Sonoma.

(c) Articles and Commodities Covered. The following are declared to be hosts or potential carriers of the pest:

(1) Plants and plant parts (except acorns or seed and a \ast includes the bole) of:

Acer macrophyllum (bigleaf maple)

Acer pseudoplatanus (planetree maple)*

Adiantum aleuticum (Western maidenhair fern)

Adiantum jordanii (California maidenhair fern)

Aesculus californica (California buckeye)

Aesculus hippocastanum (horse chestnut)*

Arbutus menziesii (madrone)

Arctostaphylos manzanita (manzanita)

Calluna vulgaris (Scotch heather)

Camellia spp. (includes all species, hybrids and cultivars)

Castanea sativa (sweet chestnut)
Fagus sylvatica (European beech)*

Frangula californica (=Rhamnus californica) (California coffeeberry)

Frangula purshiana (=Rhamnus purshiana) (cascara)

Fraxinus excelsior (European ash)*

Griselinia littoralis (Griselinia)

Hamamelis virginiana (witch hazel)

Heteromeles arbutifolia (Toyon or Christmas berry)

Kalmia spp. (includes all species, hybrids and cultivars)

Laurus nobilis (bay laurel)

Lithocarpus densiflorus (tanoak)*

Lonicera hispidula (California honeysuckle)

Magnolia doltsopa (=Michelia doltsopa) (Michelia)

Maianthemum racemosum (=Smilacina racemosa, false

Solomon's seal)

Parrotia persica (Persian ironwood)

Photinia fraseri (red tip or Fraser's photinia)

Pieris spp. (includes all species, hybrids and cultivars)

Pseudotsuga menziesii var. menziesii and all nursery grown

P. menziesii (Dougles-fir)

Quercus agrifolia (coast live oak)*

Quercus cerris (European turkey oak)*

Quercus chrysolepis (canyon live oak)*

Quercus falcata (Southern red oak)*

Quercus ilex (Holm oak)

Quercus kelloggii (California black oak)*

Quercus parvula var. shrevei and all nursery grown Q. parvula

(Shreve's oak)*

Rhododendron species (azaleas and rhododendrons)

Rosa gymnocarpa (wood rose)

Salix caprea (goat willow)

Sequoia sempervirens (coast redwood)

Syringa vulgaris (lilac)

Taxus baccata (European yew)

Trientalis latifolia (Western star flower)

Umbellularia californica (California bay laurel)

Vaccinium ovatum (huckleberry)

Viburnum spp. (All species of viburnum);

(2) Associated articles (nursery stock) of the following plants:

Abies concolor (white fir)

Abies grandis (grand fir)

Abies magnifica (red fir)

Acer circinatum (vine maple)

Acer davidii (striped bark maple)

Acer laevigatum (evergreen maple)

Arbutus unedo (strawberry tree)

Arctostaphylos columbiana (manzanita) Arctostaphylos uva-ursi (Kinnikinnick)

Ardisia japonica (Ardisia)

Berberis diversifolia (=Mahonia aquifolium (Oregon grape)

Calveanthus occidentalis (spicebush)

Castanopsis orthacantha (Castanopsis)

Ceanothus thyrsiflorus (blue blossom)

Cercis chinense (Chinese redbud)

Cinnamomum camphora (camphor tree)

Clintonia andrewsiana (Andrew's clintonia bead lily)

Cornus kousa x Cornus capitata (Cornus Norman Haddon)

Corylopsis spicata (spike winter hazel) Corylus cornuta (California hazelnut)

Distylium myricoides (myrtle-leafed distylium)

Drimys winteri (Winter's bark)

Dryopteris arguta (California wood fern)

Eucalyptus haemastoma (Scribbly gum)

Euonymus kiautschovicus (spreading euonymus)

Fraxinus latifolia (Oregon ash)

Garrya elliptica (silk tassel tree, coast silk tassel)

Gaultheria shallon (salal, Oregon wintergreen)

Hamamelis x intermedia [(H. mollis and H. japonica) (hybrid witchhazel)]

Hamamelis mollis (Chinese witch-hazel)

Ilex purpurea (Oriental holly)

Kalmia angustifolia (sheep laurel)

Leucothoe axillaries (fetter-bush, dog hobble)

Leucothoe fontanesiana (drooping leucothoe)

Loropetalum chinense (Loropetalum)

Magnolia denudata x salicifolia (magnolia)

Magnolia ernestii (=Michelia wilsonii) (Michelia)

Magnolia figo (banana shrub)

Magnolia grandiflora (Southern magnolia)

Magnolia kobus (kobus magnolia)

Magnolia liliiflora (=M. quinquepeta) (purple magnolia)

Magnolia maudiae (=Michelia maudiae) (Michelia)

Magnolia salicifolia (=M. proctoriana) (anise magnolia)

Magnolia stellata (star magnolia)

Magnolia x loebneri (Loebner magnolia)

Magnolia x soulangeana (saucer magnolia)

Magnolia x thompsoniana (M. tripetala and M. virginiana)

(magnolia)

Manglietia insignis (red lotus tree)

Nerium oleander (oleander)

Nothofagus obliqua (Roble beech)

Osmorhiza berteroi (sweet Cicely)

Osmanthus delavavi (Delavav Osmanthus)

Osmanthus decorus [(=Phillyrea decora; =P. vilmoriniana)

(Osmanthus)]

Osmanthus fragrans (sweet olive)

Osmanthus heterophyllus (holly olive)

Parakmeria lotungensis (Eastern joy lotus tree)

Physocarpus opulifolius (ninebark)

Pittosporum undulatum (Victorian box)

Prunus laurocerasus (English laurel)

Prunus lusitanica (Portuguese laurel cherry)

Pyracantha koidzumii (Formosa firethorn)

Quercus acuta (Japanese evergreen oak)

Quercus petraea (Sessile oak)

Quercus rubra (Northern red oak)

Rosa cultivars: Royal Bonica (tagged: "MEImodac"), Pink Meidiland

(tagged: "MEIpoque"), Pink Sevillana (tagged: "MEIgeroka")

Rosa rugosa (rugosa rose)

Rubus spectabilis (salmonberry)

Schima wallichii (Chinese guger tree)

Taxus brevifolia (Pacific yew)

Taxus x media (Yew)

Torreya californica (California nutmeg)

Toxicodendron diversilobum (poison oak)

Vancouveria planipetala (Redwood ivy)

- (3) Unprocessed wood and wood products (including but not limited to bark chips, mulch and firewood except when completely free of bark) of the plants listed in paragraph (c)(1) as bole hosts and plant products of the plants in paragraph (c)(1), including but not limited to dried or preserved wreaths;
- (4) Any other product, article or means of conveyance when it is determined by the secretary, based upon generally accepted scientific principles, that it presents a risk of spreading the pest because it is a host or potential carrier of the pest.
 - (d) Restrictions
- (1) Articles and commodities covered in subsection (c) are prohibited movement from the regulated area except as provided in paragraph (A), (B) or (C) below:
- (A) If accompanied by a certificate issued by an authorized agricultural official affirming that the articles and commodities have been:
- 1. produced and maintained in an area which has been surveyed by an authorized agricultural official in a manner approved, based upon generally accepted scientific principles, by the secretary to detect the pest and the area has been found to be free of the pest; or,
- 2. grown, produced, manufactured, stored, or handled in a manner approved by the secretary, based upon generally accepted scientific principles, to prevent infestation by the pest; or,
- 3. tested in a manner approved, based upon generally accepted scientific principles, by the secretary to detect the pest and found to be free of the pest.
- (B) If the article or commodity does not meet the conditions in paragraph (d)(1)(A), it may nevertheless be moved if a permit is issued by an authorized agricultural official specifying the required containment conditions necessary to prevent potential spread of the pest; the article or commodity covered; the destination; and the handling, utilization, or processing which is authorized by the official and the conditions under which this shall be conducted. If the issuance of a permit is denied, an appeal may be filed with the department as provided in subsection (e).
- (C) If the article or commodity is being moved from outside the regulated area and is being moved through the regulated area by direct route and without delay.
- (2) At the retail level, articles and commodities covered are prohibited movement from the regulated area except when the person in possession has proof of purchase showing the commodity was purchased from a seller who is in compliance with paragraph (d)(1)(A).
 - (e) Appeal/Hearing Procedures.
- (1) An appeal pursuant to paragraph (d)(1)(B) may be filed with the department within seven (7) calendar days of the date of denial of the permit. A hearing shall be conducted within 48 hours of an appeal that is timely filed. An appeal that is not timely filed shall be denied and no hearing shall be conducted in connection therewith.
- (2) Hearings shall be conducted pursuant to Chapter 4.5 (commencing with section 11400) of Division 3 of Title 2 of the Government Code and these regulations.
- (3) Hearings shall be presided over and conducted by a hearing officer designated by the secretary.
- (4) Hearings may be conducted by telephone, at the discretion of the secretary.
- (5) The decision of the hearing officer shall be in writing. The decision shall be in minute order form, containing only a brief statement of the conclusion and findings to support the conclusion. It may be handwritten.
- (6) The decision shall be issued within 24 hours after the conclusion of the hearing and may be issued orally at the conclusion of the hearing subject to written confirmation.
- (7) The written decision shall be served on the appellant or designated representative either by personal service or, if available, by facsimile transmission.
- (8) The hearing officer's decision shall be final and not appealable to the secretary or any other officer of the Department.
- (9) The appellant may seek judicial review of the hearing officer's decision by filing a petition for a writ of administrative mandamus in the

appropriate court pursuant to Code of Civil Procedure section 1084 et sea.

(10) Hearings shall be recorded by audiotape.

NOTE: Authority cited: Sections 407, 5321 and 5322, Food and Agricultural Code. Reference: Sections 24.5, 5321 and 5322, Food and Agricultural Code.

HISTORY

- 1. New subchapter 6 (section 3700) and section filed 5–22–2001 as an emergency; operative 5–22–2001 (Register 2001, No. 21). A Certificate of Compliance must be transmitted to OAL by 9–19–2001 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 5-22-2001 order transmitted to OAL 9-19-2001 and filed 10-4-2001 (Register 2001, No. 40).
- 3. Amendment of subsections (a), (b)(1) and (c)(1) filed 12–14–2001 as an emergency; operative 12–14–2001 (Register 2001, No. 50). A Certificate of Compliance must be transmitted to OAL by 4–15–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 12–14–2001 order transmitted to OAL 4–10–2002 and filed 5–2–2002 (Register 2002, No. 18).
- 5. Amendment of subsection (b)(1) filed 7-11-2002 as an emergency; operative 7-11-2002 (Register 2002, No. 28). A Certificate of Compliance must be transmitted to OAL by 11-8-2002 or emergency language will be repealed by operation of law on the following day.
- 6. New subsection (e)(2) and subsection renumbering filed 9–10–2002 as an emergency; operative 9–10–2002 (Register 2002, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–8–2003 or emergency language will be repealed by operation of law on the following day.
- 7. Editorial correction of HISTORY 6 (Register 2002, No. 50).
- 8. Certificate of Compliance as to 7-11-2002 order transmitted to OAL 11-5-2002 and filed 12-10-2002 (Register 2002, No. 50).
- 9. Editorial correction of HISTORY 6 (Register 2003, No. 5).
- 10. Certificate of Compliance as to 9-10-2002 order transmitted to OAL 12-23-2002 and filed 1-27-2003 (Register 2003, No. 5).
- 11. Amendment of subsection (c)(1), new subsection (c)(3) and subsection renumbering filed 2–3–2003 as an emergency; operative 2–3–2003 (Register 2003, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–3–2003 or emergency language will be repealed by operation of law on the following day.
- 12. Amendment of subsections (c)(1)–(3), new subsections (c)(4)–(5) and subsection renumbering filed 3–20–2003 as an emergency; operative 3–20–2003 (Register 2003, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–18–2003 or emergency language will be repealed by operation of law on the following day.
- 13. Certificate of Compliance as to 2-3-2003 order transmitted to OAL 6-2-2003 and filed 7-8-2003 (Register 2003, No. 28).
- 14. Certificate of Compliance as to 3-20-2003 order transmitted to OAL 6-10-2003 and filed 7-10-2003 (Register 2003, No. 28).
- 15. Amendment of subsections (d)(1) and (d)(2) filed 11–6–2003 as an emergency; operative 11–15–2003 (Register 2003, No. 45). A Certificate of Compliance must be transmitted to OAL by 3–15–2004 or emergency language will be repealed by operation of law on the following day.
- 16. Amendment of subsections (c)(1) and (c)(4), new subsection (c)(5) and subsection renumbering filed 1–5–2004 as an emergency; operative 1–5–2004 (Register 2004, No. 2). A Certificate of Compliance must be transmitted to OAL by 5–4–2004 or emergency language will be repealed by operation of law on the following day.
- 17. Certificate of Compliance as to 11-6-2003 order transmitted to OAL 2-27-2004 and filed 4-1-2004 (Register 2004, No. 14).
- 18. Amendment of subsection (c)(4) filed 4–20–2004 as an emergency; operative 4–20–2004 (Register 2004, No. 17). A Certificate of Compliance must be transmitted to OAL by 8–18–2004 or emergency language will be repealed by operation of law on the following day.
- 19. New subsection (c)(7) and subsection renumbering filed 5–3–2004 as an emergency; operative 5–3–2004 (Register 2004, No. 19). A Certificate of Compliance must be transmitted to OAL by 8–31–2004 or emergency language will be repealed by operation of law on the following day.
- 20. Amendment of subsection (b)(1) filed 5–13–2004 as an emergency; operative 5–13–2004 (Register 2004, No. 20). A Certificate of Compliance must be transmitted to OAL by 9–10–2004 or emergency language will be repealed by operation of law on the following day.
- 21. Certificate of Compliance as to 1-5-2004 order transmitted to OAL 4-27-2004 and filed 6-9-2004 (Register 2004, No. 24).
- 22. Amendment of subsections (c)(4) and (c)(7) filed 7–6–2004 as an emergency; operative 7–6–2004 (Register 2004, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–3–2004 or emergency language will be repealed by operation of law on the following day.
- 23. Certificate of Compliance as to 4-20-2004 order transmitted to OAL 8-6-2004 and filed 8-19-2004 (Register 2004, No. 34).
- 24. Amendment of subsections (b)(1), (c)(1) and (c)(7) filed 9–2–2004 as an emergency; operative 9–2–2004 (Register 2004, No. 36). A Certificate of Com-

- pliance must be transmitted to OAL by 12–31–2004 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 5–3–2004 order transmitted to OAL 8–6–2004 and filed 9–20–2004 (Register 2004, No. 39).
- 26. Certificate of Compliance as to 5-13-2004 order transmitted to OAL 8-30-2004 and filed 10-13-2004 (Register 2004, No. 42).
- 27. Certificate of Compliance as to 7-6-2004 order transmitted to OAL 9-14-2004 and filed 10-25-2004 (Register 2004, No. 44).
- 28. Amendment of subsections (c)(1) and (c)(7) filed 1–14–2005 as an emergency; operative 1–14–2005 (Register 2005, No. 2). A Certificate of Compliance must be transmitted to OAL by 5–16–2005 or emergency language will be repealed by operation of law on the following day.
- 29. Certificate of Compliance as to 9-2-2004 order transmitted to OAL 12-10-2004 and filed 1-21-2005 (Register 2005, No. 3).
- 30. Repealed pursuant to the terms of former subsection (f) effective 12–31–2004; new section filed 1–21–2005 as an emergency; operative 1–21–2005 (Register 2005, No. 3). A Certificate of Compliance must be transmitted to OAL by 5–23–2005 or emergency language will be repealed by operation of law on the following day.
- 31. Certificate of Compliance as to 1–21–2005 order transmitted to OAL 4–29–2005 and filed 6–9–2005 (Register 2005, No. 23).
- 32. Amendment of subsection (c)(4), new subsections (c)(7)–(c)(10), subsection renumbering and amendment of newly designated subsection (c)(11) filed 8–12–2005 as an emergency; operative 8–12–2005 (Register 2005, No. 32). A Certificate of Compliance must be transmitted to OAL by 12–12–2005 or emergency language will be repealed by operation of law on the following day.
- 33. Amendment of subsection (c)(11) filed 9-27-2005 as an emergency, operative 9-27-2005 (Register 2005, No. 39). A Certificate of Compliance must be transmitted to OAL by 1-25-2006 or emergency language will be repealed by operation of law on the following day.
- 34. Amendment of subsections (c)(1) and (c)(11) filed 12–1–2005 as an emergency; operative 12–1–2005 (Register 2005, No. 48). A Certificate of Compliance must be transmitted to OAL by 3–31–2006 or emergency language will be repealed by operation of law on the following day.
- 35. Amendment of subsection (c)(4), new subsections (c)(7)–(c)(10), subsection renumbering and amendment of newly designated subsection (c)(11) refiled 12–13–2005 as an emergency; operative 12–13–2005 (Register 2005, No. 50). A Certificate of Compliance must be transmitted to OAL by 4-12–2006 or emergency language will be repealed by operation of law on the following day.
- 36. Certificate of Compliance as to 9-27-2005 order transmitted to OAL 12-20-2005 and filed 2-2-2006 (Register 2006, No. 5).
- 37. Certificate of Compliance as to 12–13–2005 order, including amendment of subsections (c)(3) and (c)(11), transmitted to OAL 1–9–2006 and filed 2–21–2006 (Register 2006, No. 8).
- 38. Amendment of subsections (c)(1)–(2), (c)(5) and (c)(11) filed 3–7–2006 as an emergency, operative 3–7–2006 (Register 2006, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–5–2006 or emergency language will be repealed by operation of law on the following day.
- 39. Certificate of Compliance as to 12-1-2005 order transmitted to OAL 3-9-2006 and filed 4-11-2006 (Register 2006, No. 15).
- 40. Amendment of subsection (c)(11) filed 4–11–2006 as an emergency; operative 4–11–2006 (Register 2006, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–9–2006 or emergency language will be repealed by operation of law on the following day.
- 41. Amendment of subsections (c)(1) and (c)(11) filed 7-26-2006 as an emergency; operative 8-1-2006 (Register 2006, No. 30). A Certificate of Compliance must be transmitted to OAL by 11-29-2006 or emergency language will be repealed by operation of law on the following day.
- 42. Certificate of Compliance as to 3–7–2006 order transmitted to OAL 7–3–2006 and filed 8–15–2006 (Register 2006, No. 33).
- 43. Certificate of Compliance as to 4–11–2006 order transmitted to OAL 7–18–2006 and filed 8–15–2006 (Register 2006, No. 33).
- 44. Amendment of subsections (c)(1) and (c)(11) and amendment of Note filed 10–6–2006 as an emergency; operative 10–10–2006 (Register 2006, No. 40). A Certificate of Compliance must be transmitted to OAL by 2–7–2007 or emergency language will be repealed by operation of law on the following day.
- 45. Certificate of Compliance as to 7-26-2006 order transmitted to OAL 10-27-2006 and filed 12-6-2006 (Register 2006, No. 49).
- 46. Editorial correction removing duplicative listing of *Drimys winteri* (Winter's bark) in subsection (c)(11) (Register 2007, No. 7).
- 47. Certificate of Compliance as to 10-6-2006 order transmitted to OAL 12-29-2006 and filed 2-14-2007 (Register 2007, No. 7).
- 48. Amendment of subsection (c)(1), repealer of subsections (c)(2)–(10), subsection renumbering and amendment of newly designated subsections (c)(2)–(4) filed 3–6–2007 as an emergency; operative 3–6–2007 (Register 2007, No. 10). A Certificate of Compliance must be transmitted to OAL by 9–2–2007 or emergency language will be repealed by operation of law on the following day.
- 49. Editorial correction of subsection numbering (Register 2007, No. 11).

- 50. Amendment of subsection (c)(2) filed 9–12–2007 as an emergency; operative 9–12–2007 (Register 2007, No. 37). A Certificate of Compliance must be transmitted to OAL by 3–10–2008 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 3–6–2007 order transmitted to OAL 8–9–2007 and filed 9–19–2007 (Register 2007, No. 38).
- 52. Amendment of subsection (c)(2) filed 12–19–2007 as an emergency; operative 1–1–2008 (Register 2007, No. 51). A Certificate of Compliance must be transmitted to OAL by 6–30–2008 or emergency language will be repealed by operation of law on the following day.
- 53. Certificate of Compliance as to 9-12-2007 order transmitted to OAL 12-13-2007 and filed 1-29-2008 (Register 2008, No. 5).
- 54. Amendment of subsections (c)(1)–(2) filed 3–17–2008 as an emergency; operative 4–1–2008 (Register 2008, No. 12). A Certificate of Compliance must be transmitted to OAL by 9–29–2008 or emergency language will be repealed by operation of law on the following day.
- 55. Certificate of Compliance as to 12-19-2007 order transmitted to OAL 3-7-2008 and filed 4-21-2008 (Register 2008, No. 17).
- 56. Amendment of subsection (c)(2) filed 6–9–2008 as an emergency; operative 6–9–2008 (Register 2008, No. 24). A Certificate of Compliance must be transmitted to OAL by 12–8–2008 or emergency language will be repealed by operation of law on the following day.
- 57. Certificate of Compliance as to 3-17-2008 order transmitted to OAL 6-3-2008 and filed 7-16-2008 (Register 2008, No. 29).

Chapter 5. Rodent and Weed Control and Seed Inspection

(Originally Printed 7–25–45)

Subchapter 1. San Joaquin Valley Quality Cotton District

Article 1. Definitions

§ 3800. Definitions.

The following definitions, in addition to those stated in Sections 25–50 and 5001–5008 of the Food and Agricultural Code, apply to this Subchapter 1.

- (a) "Applicant" means any person who applies for and/or is approved to participate in the nonapproved cotton variety research program.
- (b) "Approved Cotton" means any cotton which has been tested and approved by the San Joaquin Valley Cotton Board for release and is planted within the San Joaquin Valley Quality Cotton District.
 - (c) "Board" means the San Joaquin Valley Cotton Board.
- (d) "Board Testing" means tests conducted or commissioned by the Board for production and quality evaluation of nonapproved cotton varieties.
- (e) "California Naturally Colored Cotton" means nonapproved naturally colored cotton that is planted for commercial production or is under Article 3, Article 4, or seed increase as specified in Section 3803. It means any variety of the genus Gossypium that does not naturally produce white fiber as established in Title 7, Code of Federal Regulations, Sections 28.401 through 28.407 (Official Cotton Standards of the United States for the Color Grade of American Upland Cotton), as amended August 5, 1992, or in Title 7, Code of Federal Regulations, Sections 28.501 through 28.507 (Official Cotton Standards of the United States for the Grade of American Pima Cotton), as amended June 18, 1985. These two documents are incorporated by reference.
- (f) "California Pima Cotton" means nonapproved white cotton of the species *Gossypium barbadense* that is planted for commercial production or is under Article 3, Article 4, or seed increase as specified in Section 3803.
- (g) "California Upland Cotton" means nonapproved white cotton of the species *Gossypium hirsutum* that is planted for commercial production or is under Article 3, Article 4, or seed increase as specified in Section 3803.
 - (h) "Cooperator" shall mean any of the following:
- (1) "Cooperating Ginner" means any person who owns or operates a cotton gin and who participates by ginning nonapproved cotton.

- (2) "Cooperating Grower" means any person who provides the husbandry in the production of nonapproved cotton.
- (3) "Cooperating Delinter" means any person who, for hire, participates by delinting nonapproved cottonseed.
- (4) "Cooperating Marketer" means any person who, by September 1 of the current year, has registered with the Board expressing the intent to market nonapproved cotton.
- (i) "District" means the San Joaquin Valley Quality Cotton District.
- (j) "Entry" means any nonapproved variety which has been accepted into Board Testing.
 - (k) "Nonapproved Cotton" means:
- (1) Any cotton that has not been approved by the San Joaquin Valley Cotton Board for release and planting within the San Joaquin Valley Quality Cotton District;

[The next page is 343.]

- (2) Any cotton grown outside the District.
- (*l*) "Person" also means individual, firm, corporation, company, organization, cooperative association, partnership, trust association, association, or any other legal entity.
- (m) "SJV Experimental Cotton" means nonapproved cotton grown in Board Testing.
- (n) "Seed Certifying Agency" is an agency approved to certify seed as defined under the Federal Seed Act regulations (Title 7, Code of Federal Regulations, Sections 201.67 through 201.78).
- (o) "White cotton" means any variety of the genus Gossypium that produces white fiber as established in Title 7, Code of Federal Regulations, Sections 28.401 through 28.407 (Official Cotton Standards of the United States for the Color Grade of American Upland Cotton), as amended August 5, 1992, or in Title 7, Code of Federal Regulations, Sections 28.501 through 28.507 (Official Cotton Standards of the United States for the Grade of American Pima Cotton), as amended June 18, 1985. These two documents are incorporated by reference.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- 1. Amendment of group 1 heading and new articles 1–6 (sections 3800–3830, not consecutive) filed 1–22–79 as an emergency; effective upon filing (Register 79, No. 4). For prior history of group 2 (sections 3800–3805), see Registers 59, No. 15 and 19, No. 4.
- 2. Certificate of Compliance filed 4-11-79 (Register 79, No. 15).
- 3. Amendment filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- 4. Editorial correction of HISTORY 1. (Register 86, No. 15).
- 5. Amendment of subchapter heading, first paragraph, subsections (b), (e) and (g) and new subsection (h) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).
- 6. Amendment of section and NOTE filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 7. Amendment of section and NOTE refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 8. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

Article 1.1. Quality Standards

§ 3800.1. Acala and Pima Quality Standards.

The varieties that embody the District Acala and Pima quality standard as defined in Section 52891(a) of the Food and Agricultural Code are, respectively, Acala Summit and Pima S-7.

NOTE: Authority cited: Sections 407, 52891 and 52901, Food and Agricultural Code. Reference: Sections 52891 and 52936, Food and Agricultural Code.

HISTORY

- New article 1.1 (sections 3800.1 and 3800.2) and section filed 12–30–96; operative 12–30–96 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- 2. Amendment filed 1–18–2007; operative 2–17–2007 (Register 2007, No. 3).

§ 3800.2. Referendum.

Pursuant to Section 52936 of the Food and Agricultural Code, the Board may hold a referendum vote whenever the Board proposes that a variety other than Acala Summit or Pima S-7 embodies the Acala or Pima quality standard, but is not so required.

NOTE: Authority cited: Sections 407, 52891, 52901 and 52936, Food and Agricultural Code. Reference: Sections 52891 and 52936, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–30–96; operative 12–30–96 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- 2. Amendment filed 1-18-2007; operative 2-17-2007 (Register 2007, No. 3).

Article 2. General

§ 3801. Responsibilities.

- (a) These regulations apply to applicants, cooperating growers, delinters, and ginners. They shall be enforced by the director.
- (b) Applicants shall inform cooperating growers, delinters, and ginners of the cooperators' responsibilities under these regulations when handling nonapproved cottonseed and lint from such seed.
- (c) Applicants shall enter into agreements with their cooperators which provide that the applicant maintains title to all nonapproved seed cotton produced.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

1. Amendment filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).

§ 3802. Performance Testing of Nonapproved Cottons Developed Outside the San Joaquin Valley Quality Cotton District.

A person desiring to evaluate a nonapproved cotton variety or strain that was not developed or evaluated in a breeding and testing program within the District, as provided under Sections 3810 and 3811, shall submit a request to the Board for performance testing pursuant to Section 52902 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- Amendment of section heading filed 1-7-83; effective thirtieth day thereafter (Register 83, No. 2).
- Amendment of section heading and text filed 3-11-92; operative 4-10-92 (Register 92, No. 12).

§ 3803. Exemption.

- (a) Acreage limitations imposed by these district regulations do not apply as restrictions to the Board or the director.
- (b) The director may waive the limitations of Sections 3815(a) and 3816(a) upon finding of need or upon recommendation of the Board.
- (c) The director, upon recommendation of the Board, may allow an applicant additional limited acreage for seed increase.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1-7-83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment of subsection (c) filed 5-5-86; effective thirtieth day thereafter (Register 86, No. 19).
- 3. Amendment of subsections (a) and (c) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).

Article 2.5. California Upland and California Pima Cotton

§ 3804. Seed Distribution.

By June 1 of each year, seed companies, delinters, gins, and other entities distributing seed of California Upland and California Pima cotton directly to growers in the District shall notify the department of the names, addresses, and telephone numbers of each entity to which they have distributed seed, and the volume of each variety distributed to such entity. Note: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- 1. New article 2.5 (sections 3804–3808) and section filed 3–4–99 as an emergency; operative 3–4–99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day.
- 2. New article 2.5 (sections 3804–3808) and section refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3805. Planting, Field Isolation, and Harvest Notification.

- (a) Only seed that has been certified by a seed certifying agency shall be planted in the District, except acreage planted under Article 3, Article 4, or under Section 3803.
- (b) "Cotton Seed Certification Standards in California," as amended February 11, 1999, shall be used to determine isolation of acreage planted with California Upland and California Pima cotton from acreage planted with cotton grown to produce all classes of certified seed. This document is incorporated by reference. In the absence of seed certifying agency standards for genetically engineered cotton, this cotton shall be isolated from cotton being grown to produce foundation or registered seed by 1/2 mile plus an additional 20 buffer rows of cotton; and from other cotton being grown to produce certified seed by 1/8 mile plus 20 buffer rows of cotton.
- (c) Within 72 hours after planting and 48 hours prior to harvest each grower of California Upland or California Pima cotton shall provide to the department:
 - (1) The name of the grower,
 - (2) The farming entity,
 - (3) Telephone number,
 - (4) Address,
 - (5) Cotton gin to be used,
 - (6) California Upland and California Pima cotton varieties planted,
- (7) Exact field locations involved, including Township, Range and Section.
- (d) At harvest, growers shall complete information tags furnished by the department.
- (1) Prior to movement, these tags shall be attached to all modules and trailers of seed cotton of California Upland and California Pima cotton varieties.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- New section filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7-2-99 order transmitted to OAL 11-1-99 and filed 12-10-99 (Register 99, No. 50).

§ 3806. Ginning.

Ginning of California Upland and California Pima cotton shall be regulated by Sections 3823 and 3824.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- New section filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7-2-99 order transmitted to OAL 11-1-99 and filed 12-10-99 (Register $99,\,No.\,50$).

§ 3807. Delinting of Cottonseed for Planting.

Delinting of California Upland and California Pima cottonseed shall be regulated by Section 3826. "Cotton Seed Certification Standards in California," as amended February 11, 1999, shall be used. This document is incorporated by reference.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- New section filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99

- or emergency language will be repealed by operation of law on the following
- 3. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3808. Marketing.

The marketer shall maintain the identity of California Upland and California Pima cotton. Records shall be made available by the marketer to the department, upon request, to indicate bale numbers of such cotton sold. Records shall be maintained for one year after the end of each cotton production season and the initial delivery of the cotton bales produced during that season.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- New section filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 7-2-99 as an emergency; operative 7-2-99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11-1-99 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7–2–99 order, with amendments, transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

Article 3. Nonapproved Cotton Breeding and Performance Testing

§ 3810. Nonapproved Cotton Breeding Programs.

- (a) Location. Each applicant conducting a breeding program with non-approved cotton within the District shall be restricted to planting the introductions of germ plasm or genetic material, at no more than five (5) locations, totaling no more than one hundred (100) acres. Each planting shall be at least one-half (1/2) mile removed from any Acala or Pima planting cottonseed production area.
- (b) Application. Application for permission to conduct a breeding program shall be made annually in writing to the director on or before January 15 of each year to provide for Board review and comment as required by section 3820, article 5. A plot map detailing the specific location(s) including Township, Range, section, and acreage of said proposed breeding plot(s) shall be filed with the director by February 15 of each year, so that the director may determine that the proposed location(s) does not fall within the isolation area designated in section 3810(a).

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. Amendment of article 3 heading and of section filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- Amendment of subsection (a) filed 5-5-86; effective thirtieth day thereafter (Register 86, No. 19).
- 3. Amendment of subsection (a) filed 2–15–91; operative 3–17–91 (Register 91, No. 11).
- 4. Amendment of subsection (a) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).

§ 3811. Nonapproved Cotton Performance Testing.

- (a) Location. Nonapproved cotton, for which initial crosses or evaluation have been made in a breeding program within the District, may be performance tested by an applicant at no more than eight (8) locations for a total of not more than two hundred (200) acres. Each planting shall be at least one-half (1/2) mile removed from any Acala or Pima planting cottonseed production area. Any approved cotton acreage within the test locations shall be included when computing the two hundred (200) acre limit
- (b) Application. Applications for permission to conduct nonapproved cotton performance testing shall be in writing to the director annually on or before January 15 of each year to provide for Board review and comment as required by Section 3820, Article 5. A plot map detailing the specific location(s) including Township, Range, Section, and acreage of the proposed planting(s) shall be received by the department on or before February 15 of each year so that the director may determine that the pro-

posed location(s) does not fall within the isolation area designated in Section 3811(a).

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1-7-83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment of subsection (a) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).

Article 4. Nonapproved Cotton Agronomic Research

§ 3815. Public Agency Nonapproved Cotton Agronomic Research.

- (a) Location. Public agencies, including the U.S. Department of Agriculture and the University of California, may conduct nonapproved cotton agronomic research at a maximum of twelve (12) locations for a total not to exceed two hundred forty (240) acres. Each planting shall be at least one–half (1/2) mile removed from any Acala or Pima planting cottonseed production area. Any approved cotton acreage within the test locations shall be included when computing the two hundred forty (240) acre limit.
- (b) Application. Applications for permission to conduct nonapproved cotton agronomic research shall be made in writing to the director annually, on or before January 15 of each year, to provide for Board review and comment as required by Section 3820, Article 5. A plot map detailing the specific location(s) including Township, Range, Section, and acreage of the proposed planting(s) shall be received by the department on or before February 15 each year, so that the director may determine that the proposed location(s) does not fall within the isolation area designated in Section 3815(a).

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment of subsection (a) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).

§ 3816. Private Agronomic Research on Nonapproved Cotton.

- (a) Locations. Any person primarily engaged in agronomic research, and not an applicant under Article 3, shall have the director's permission to conduct nonapproved cotton agronomic research within the District. The maximum acreage allowed for such testing shall not exceed ten (10) acres. Any approved cotton acreage within the test locations shall be included when computing the ten (10) acre limit. Each planting shall be at least one–half (1/2) mile removed from any Acala or Pima planting cottonseed production area.
- (b) Application. Applications for permission to conduct nonapproved cotton agronomic research shall be made annually in writing to the director on or before January 15 of each year, to provide for Board review and comment, as required by Section 3820, Article 5. A plot map detailing the specific location(s) including Township, Range, Section, and acreage of the proposed planting(s) shall be received by the department on or before February 15 of each year so that the director may determine that the proposed location(s) does not fall within the isolation area designated in Section 3816(a).

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- $1.\,Amendment\,filed\,1-7-83; effective\,thirtieth\,day\,thereafter\,(Register\,83,No.\,2).$
- 2. Amendment of subsection (a) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).

Article 4.3. Nonapproved Naturally Colored Cotton Research

§ 3817. Research on Nonapproved Naturally Colored Cotton.

- (a) Each applicant conducting:
- (1) a breeding program, which is a program where initial crosses and evaluations of cotton germplasm or genetic material are made, shall be limited to no more than two (2) locations totaling no more than one hundred (100) acres;
- (2) performance tests, which are tests used to evaluate cotton for which initial crosses and evaluations have been made in a breeding program, shall be limited to no more than four (4) locations for a total of not more than two hundred (200) acres;
- (3) agronomic tests, which are tests used to develop scientific data for cotton evaluation, shall be limited to three (3) locations for a total of not more than ten (10) acres.
- All research indicated in this section shall adhere to the field isolation requirements in Section 3818.3.
- (b) Applications for permission to conduct nonapproved naturally colored cotton research shall be made annually in writing to the department by January 15 of each year. A plot map detailing the specific location(s) including Township, Range, and Section, and acreage of each proposed location shall be filed with the department by February 15 of each year, so that the department may determine that each proposed location meets the isolation requirements of Section 3818.3.
- (c) Cotton grown under this article shall adhere to the requirements of Sections 3818.5 (harvest equipment), 3818.8 (ginning), 3819 (delinting), and 3819.3 (marketing).

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- 1. New article 4.3 (section 3817) and section filed 3–4–99 as an emergency; operative 3–4–99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day. For prior history, see Register 83, No. 2.
- 2. New article 4.3 (section 3817) and section refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

Article 4.5. California Naturally Colored Cotton

§ 3818. Production and Notification Requirements.

A producer who intends to grow California naturally colored cotton shall provide written notification to the department by January 15. The notification shall include the name, address, telephone number, and signature of the producer, property owner, or company official contracting for the production or purchase of such cotton and the acreage intended for planting. By February 15, the producer shall provide the department with a legal description of each production location including Township, Range, and Section; a map of each of these locations; the acreage that will be planted; and the names and means of contacting any person controlling cotton production on property within one (1) mile of each production location.

By March 1 of each year, the department shall notify each person controlling said proximal cotton production of the California naturally colored cotton producer's intent. The person controlling said proximal cotton production shall notify the department by March 20 if they intend to plant white cotton within the required isolation distances from the noticed colored cotton locations.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- 1. New article 4.5 (sections 3818–3819.3) and section filed 3–4–99 as an emergency; operative 3–4–99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day.

 2. New article 4.5 (sections 3818–3819.3) and section refiled 7–2–99 as an emergency language will be repealed by operation of law on the following day.
- 2. New article 4.5 (sections 3818–3819.3) and section refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3818.3. Isolation of Naturally Colored Cotton from Other Cotton.

It is the responsibility of the producer of colored cotton to ensure that isolation requirements are met prior to planting.

- (a) "Cotton Seed Certification Standards in California," as amended February 11, 1999, shall be used to determine isolation of acreage planted with California naturally colored cotton from acreage planted with cotton grown to produce all classes of certified seed. This document is incorporated by reference. In the absence of such standards, a grower shall not plant colored cotton within five (5) miles of any white cotton grown for production of planting seed. A grower shall not plant colored cotton within one (1) mile of any white cotton, except on property under his supervision. That grower may plant colored cotton as close as two hundred (200) feet from white cotton providing that the latter will not be used for the production of planting seed.
- (b) Colored cotton acreage shall be subject to destruction in the field if it is planted within these isolation distances. However, destruction shall not be required under the following circumstances:
- (1) Growers who have planted the colored cotton have provided the notification and location information required in Section 3818; and,
- (2) Growers who have planted white cotton within the isolation distances have not provided the notification required in Section 3818.
- (c) California Upland, California Pima, or Approved cotton shall not be planted on land used to grow naturally colored cotton until the land has been irrigated at least twice and gone without cotton for at least two cotton growing seasons.
- (d) Prior to the beginning of each cotton planting season, the department shall notify all colored cotton producers of the cotton plant back restrictions.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- New section filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 7-2-99 as an emergency; operative 7-2-99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11-1-99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–2–99 order, including amendment of subsections (a) and (d), transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3818.5. Equipment Used During the Harvest of Naturally Colored Cotton.

Mechanical harvesters, module builders, module movers, and trailers that have held colored cotton shall be inspected and released by the department before they are used for other cotton. Prior to movement, all modules, trailers, or other containers holding colored cotton shall be clearly marked as to contents under the supervision of the department. Colored cottonseed and seed cotton shall be totally enclosed or covered when transported.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- New section filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- New section refiled 7-2-99 as an emergency; operative 7-2-99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11-1-99

- or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3818.8. Naturally Colored Cotton Ginning.

Colored cotton shall not be ginned in the San Joaquin Valley Quality Cotton District except at a facility dedicated to colored cotton ginning or at a facility which gins colored cotton at the end of the season to be followed by at least fifty (50) bales of white cotton immediately prior to ceasing operation for the season. All such white cotton bales shall be marked to the satisfaction of the department. Prior to the beginning of the next ginning season, the department will inspect each facility that has ginned both colored and white cotton. No saving of white cottonseed for planting shall be done by a gin which processes any colored cotton.

- (a) All bales and seed for planting shall be clearly identified by the department as being colored cotton.
- (b) All seed not for planting shall be crushed, cracked, or otherwise rendered non-viable or shipped out of the District subject to destination state and federal requirements.
- (c) Gin trash shall be disposed of in a manner and at locations which will mitigate any contamination risk from any seed which may be present.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- Renumbering of former section 3823.1 to new section 3818.8, including amendment of section heading, section and NoTE, filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 2. Renumbering of former section 3823.1 to new section 3818.8, including amendment of section heading, section and NOTE, refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3819. Naturally Colored Cottonseed Delinting.

Colored cottonseed shall not be delinted in the San Joaquin Valley Quality Cotton District except at a facility dedicated to colored cottonseed delinting. The delinter shall inform the department of the quantity of each variety delinted, its storage location, and where and when moved.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- Renumbering of former section 3826.1 to new section 3819, including amendment of section heading, section and NoTE, filed 3–4–99 as an emergency; operative 3–4–99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day.
- 2. Renumbering of former section 3826.1 to new section 3819, including amendment of section heading, section and Note, refiled 7-2-99 as an emergency; operative 7-2-99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11-1-99 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3819.3. Marketing.

The marketer shall maintain the identity of California naturally colored cotton. Records shall be made available by the marketer to the department, upon request, to indicate bale numbers of such cotton sold. Note: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- New section filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 2. New section refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

Article 5. Procedure and Enforcement

§ 3820. Board Review and Comment.

The director, upon receipt of the annual application, will forward such application to the Board for review and comment.

The Board may require the applicant to appear in person to present his or her nonapproved cotton testing program.

The director, after Board review and comment, may approve the non-approved cotton testing program proposed by the applicant.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Sections 52891 and 52901, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3820 to Section 3821, and new Section 3820 filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).

§ 3821. Cottonseed Arriving from Outside the District.

- (a) All planting cottonseed arriving from outside the District for planting within the district shall:
- (1) Be free of angular leafspot, Xanthomonas malvacearum; (2) conform to the requirements of the Federal Pink Bollworm Quarantine (7 C.F.R. 301.52); (3) conform to those sections applicable to cotton in Division 4 of this Title 3.
- (b) All planting cottonseed upon arrival within the District shall be inspected for freedom from angular leafspot by the department or by a department approved laboratory. The applicant shall be liable for all costs involved in such inspection.

Sampling to determine freedom from angular leafspot, X. malvacearum, shall be as follows:

- (1) A representative sample of twelve hundred (1200) seeds shall be taken by the department from each lot of planting cottonseed originating outside the District and submitted to the Analysis and Identification Unit, Division of Plant Industry, Department of Food and Agriculture for testing for angular leafspot.
- (2) Seed lots consisting of less than twelve hundred (1200) seeds may be field inspected, after planting, for angular leafspot by the department.
- (c) All lots of planting cottonseed found to be infected with angular leafspot shall be disposed of by discing of the infected fields, if in the field, and destruction of the infected seed lot, under the supervision of the director.
- (d) The importation of planting cottonseed from outside the District for planting purposes shall be suspended upon discovery of any new pest suspected or determined by the director to be of serious economic importance to agriculture. Suspension shall continue until adequate precautions, eradication, or intensive control measures have been applied which assure that such nonapproved planting cottonseed is in compliance with all of the department's pest prevention requirements.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 3821 to section 3822, and renumbering and amendment of former section 3820 to section 3821 filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment of section heading and subsections (a), (b) and (d) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).

§ 3821.1. Hold Used Cotton Machinery for Inspection in San Joaquin Valley Quality Cotton District.

(a) The Secretary hereby finds that cottonseed and seed cotton from "nonapproved cotton" as defined in section 3800, may be introduced into the San Joaquin Valley Quality Cotton District as defined in Section 52865, Food and Agricultural Code, in, on or associated with cotton machinery, equipment and appliances; and further that such cottonseed or seed cotton if disseminated in the fields of said District or mixed with approved cotton varieties would jeopardize the purposes of said District as set forth in Sections 52851 through 52854, Food and Agricultural Code.

- (b) No person shall bring into the San Joaquin Valley Quality Cotton District any cotton machinery, parts of machinery, equipment or appliances which have been used or field tested outside of said District, without immediately notifying the County Agricultural Commissioner of the arrival thereof, and holding such articles for inspection before use.
- (c) The County Agricultural Commissioner may upon such inspection require that any cottonseed or seed cotton on, in or associated with such articles be removed and destroyed under supervision at the expense of the owner or bailee, in order to avoid the possibility of introduction of seeds of nonapproved cotton varieties into the San Joaquin Valley Quality Cotton District.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Sections 52851–52855, 52901, and 52971–52976, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former section 3552 to new section 3821.1 filed 5–7–97; operative 6–6–97 (Register 97, No. 19).

§ 3822. Planting and Harvesting Notification.

- (a) The director shall be notified at least 48 hours prior to planting or harvesting of any authorized nonapproved cotton.
- (b) After planting or harvest, planters, pickers, and other related field equipent shall be cleaned to the satisfaction of the director to assure against contamination of approved planting seed cotton.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former Section 3822 to Section 3823, and renumbering and amendment of former Section 3821 to Section 3822 filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).

§ 3823. Nonapproved White Cotton Ginning, Including California Upland and California Pima Cotton.

- (a) The department shall be notified at least 48 hours prior to the ginning of any nonapproved cotton.
- (b) All nonapproved white cotton shall be ginned under the supervision of the department to assure proper identification and gin cleanup to prevent contamination of approved cotton lint. Ginning shall be done in a manner that prevents the mixing of nonapproved and approved cotton lint. Nonapproved Pima seed cotton shall only be roller ginned and nonapproved Upland seed cotton shall only be saw ginned.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 3823 to section 3824, and renumbering and amendment of former section 3822 to section 3823 filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment filed 3-11-92; operative 4-10-92 (Register 92, No. 12).
- 3. Amendment of section heading, section and NOTE filed 3–4–99 as an emergency; operative 3–4–99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day.
- 4. Amendment of section heading, section and Note refiled 7-2-99 as an emergency; operative 7-2-99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11-1-99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3823.1. Nonapproved Colored Cotton Ginning.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-24-93; operative 4-23-93 (Register 93, No. 13).
- 2. Renumbering of former section 3823.1 to new section 3818.8 filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- 3. Renumbering of former section 3823.1 to new section 3818.8 refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3824. Nonapproved Cotton Lint Storage and Identification, Including California Upland, California Pima, and California Naturally Colored Cotton.

(a) Cotton lint ginned within the District and not from an approved cotton shall be identified as "SJV EXPERIMENTAL", "CALIFORNIA UPLAND", "CALIFORNIA PIMA", or "CALIFORNIA NATURALLY COLORED" cotton at all times.

(b) Identification tags and decals shall be affixed to bales under the supervision of the department. Identification shall not be removed without permission of the department.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 3824 to section 3825, and renumbering and amendment of former section 3823 to section 3824 filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment filed 3-11-92; operative 4-10-92 (Register 92, No. 12).
- 3. Amendment of section heading, section and NOTE filed 3–4–99 as an emergency; operative 3–4–99 (Register 99. No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day.
- 4. Amendment of section heading, section and Note refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3825. Nonapproved Cottonseed Disposal.

Nonapproved cottonseed shall be disposed of under the supervision of the director. Nonapproved cottonseed saved for use by the applicant shall be identified and safeguarded against being commingled with any approved planting cottonseed.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- Renumbering and amendment of former Section 3825 to Section 3826, and renumbering and amendment of former Section 3824 to Section 3825 filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- Editorial correction restoring inadvertently omitted section 3825 (Register 2000, No. 10).

§ 3826. Nonapproved White Cottonseed Delinting, Including California Upland and California Pima Cotton.

The department shall be notified by the delinter at least 48 hours prior to the delinting of any nonapproved white cottonseed. All delinting shall be done in a manner that assures the Secretary that proper identification of nonapproved cottonseed, equipment cleanup, and separation from approved planting cottonseed has been maintained.

NOTE: Authority cited: Sections 407, 52901 and 52981, Food and Agricultural Code. Reference: Sections 52901 and 52981, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 3825 to section 3826 filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment filed 3-11-92; operative 4-10-92 (Register 92, No. 12).
- 3. Amendment filed 7–14–94; operative 8–15–94 (Register 94, No. 28).
- 4. Amendment of section heading, section and Note filed 3–4–99 as an emergency; operative 3–4–99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day.
- 5. Amendment of section heading, section and NOTE refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 6. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

§ 3826.1. Nonapproved Colored Cottonseed Delinting.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-24-93; operative 4-23-93 (Register 93, No. 13).
- 2. Renumbering of former section 3826.1 to new section 3819 filed 3–4–99 as an emergency; operative 3–4–99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7–2–99 or emergency language will be repealed by operation of law on the following day.
- 3. Renumbering of former section 3826.1 to new section 3819 refiled 7–2–99 as an emergency; operative 7–2–99 (Register 99, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–1–99 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 7–2–99 order transmitted to OAL 11–1–99 and filed 12–10–99 (Register 99, No. 50).

Article 6. Refusal of Applications

§ 3830. Refusal of Applications.

The director shall refuse an application or revoke an authorization granted under these regulations, if:

- (a) The proposed location does not meet the isolation requirements under Sections 3810(a), 3811(a), and 3815(a) or 3816(a);
- (b) The applicant or his cooperators fail to comply with the regulations pertaining to this subchapter, or state or federal quarantines applicable to cotton
- (c) After review and comment by the Board, the program proposed is determined not to be in the best interests of the cotton industry in the District.

NOTE: Authority cited: Sections 407 and 52901, Food and Agricultural Code. Reference: Section 52901, Food and Agricultural Code.

HISTORY

- 1. Amendment and new subsection (c) filed 1–7–83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Amendment of subsection (c) filed 3–11–92; operative 4–10–92 (Register 92, No. 12).

Subchapter 2. Crop Seed Certification and Screenings

NOTE: Authority cited for §§ 3800-3805, Sections 16 and 154.4 of the Agricultural Code.

HISTORY

- 1. Originally published 7-25-45 (Title 3).
- 2. Repealed and new §§ 3800–3805 filed 3–2–50; effective 30th day thereafter (Register 19, No. 4).
- 3. Repealer of Sections 3800 through 3805 filed 9–2–59; effective 30th day thereafter (Register 59, No. 15).
- 4. Editorial correction (Register 86, No. 15).

Subchapter 3. Seed Inspection

(Originally Printed 7-25-45)

Article 1. Definitions and Construction

§ 3850. Terms Defined.

- (a) As used in the California Seed Law, Section 52251 *et seq.*, Food and Agricultural Code, and in Group 3 of these regulations:
- (1) "Lot" means a definite quantity of seed normally identified by a number or other identification.
- (2) Change in Lot. As used in Section 52354(a) of the Food and Agricultural Code the identity of the lot has been changed whenever the information required by any of the following sections of the Food and Agricultural Code has been changed: 52452(b), (h) and 52453(c), (d).
- (3) "Origin Inspected Warehouse" means a premise which has maintained standards included in Article 7 of these regulations and therefore is exempt from the provisions of Section 6501, Food and Agricultural Code.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Sections 52254.5, 52257.5, 52331, 52333, 52354, 52363, 52391, 52392, 52451–52454, 52482, and 52511, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 66, No. 1.
- 2. Amendment filed 3–24–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3851. Agricultural Seeds.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52332, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11-15-62; effective 30th day thereafter (Register 62, No. 23).
- 2. Repealer filed 3-24-83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3852. Vegetable Seeds.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52332, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11-15-62; effective 30th day thereafter (Register 62, No. 23).
- 2. Repealer filed 3-24-83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3853. Weed Seeds.

The following species, when occurring incidentally in agricultural seed, are classed as weed seeds for the purpose of labeling as required by Section 52452, Food and Agricultural Code, unless labeled and sold as specific constituents of a definite seed mixture:

- (a) All species not listed in Section 3899, Schedule I (a).
- (b) All species listed in Section 3901, Schedule III.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52332, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11-15-62; effective 30th day thereafter (Register 62, No. 23).
- 2. Amendment filed 1–14–66; effective thirtieth day thereafter (Register 66, No. 1)
- 3. Amendment filed 3–24–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3854. Prohibited Noxious Weed Seed.

In accordance with Section 52332 of the Food and Agricultural Code, the Director hereby designates the seed or propagule of the following species of plants to be prohibited noxious weed seed within the meaning of Section 52257 of the Food and Agricultural Code:

Alhagi pseudalhagi (camelthorn)

Cardaria chalepensis (lens-podded hoary cress)

Cardaria draba (heart-podded hoary cress)

Cardaria pubescens (globe-podded hoary cress)

Carduus acanthoides (plumeless thistle)

Carduus nutans (musk thistle)

Carthamus leucocaulos (whitestem distaff thistle)

Centaurea repens (Russian knapweed)

Cirsium arvense (Canada thistle)

Cirsium undulatum (wavyleaf thistle)

Cucumis melo var. dudaim (dudaim melon)

Euphorbia esula (leafy spurge)

Helianthus ciliaris (blueweed)

Lepidium latifolium (perennial pepperweed)

Onopordum spp. (onopordum thistles)

Rorippa austriaca (Austrian fieldcress)

Solanum carolinense (Carolina horsenettle)

Solanum elaeagnifolium (white horsenettle)

Sonchus arvensis (perennial sowthistle)

NOTE: Authority cited: Sections 407 and 52332, Food and Agricultural Code. Reference: Sections 5004, 52256–52258, 52287 and 52332, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11–15–62: effective 30th day thereafter (Register 62, No. 23).
- 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Amendment filed 12-21-77 as an emergency; designated effective 1-1-78 (Register 77, No. 52).
- 4. Certificate of Compliance filed 1-6-78 (Register 78, No. 1).

§ 3855. Restricted Noxious Weed Seed.

In accordance with Section 52332 of the Food and Agricultural Code, the Director hereby designates the seed or propagule of the following species of plants to be restricted noxious weed seed within the meaning of Section 52258 of the Food and Agricultural Code:

Agropyron repens (quackgrass)

Allium vineale (wild garlic)

Carduus pycnocephalus (Italian thistle)

Carduus tenuiflorus (Italian thistle)

Carthamus baeticus (smooth distaff thistle)

Carthamus lanatus (woolly distaff thistle)

Cenchrus echinatus (southern sandbur grass)

Cenchrus incertus (coast sandbur grass)

Cenchrus longispinus (mat sandbur grass)

Centaurea solstitialis (yellow starthistle)

Chorispora tenella (purple mustard)

Convolvulus arvensis (field bindweed)

Cuscuta spp. (dodder)

Cyperus esculentus (yellow nutgrass)

Cyperus rotundas (purple nutgrass)

Elymus caputmedusae (medusahead)

Halogeton glomeratus (halogeton)

Hypericum perforatum (Klamath weed)

Iva axillaris (poverty weed)

Salvia aethiopis (Mediterranean sage)

Sida hederacea (alkali mallow)

Sorghum halepense (Johnsongrass and other perennial Sorghum spp. including but not limited to Sorghum almum and perennial sweet sudangrass.)

Tribulus terrestris (puncture vine)

NOTE: Authority cited: Sections 407 and 52332, Food and Agricultural Code. Reference: Sections 5004, 52256–52258, 52287 and 52332, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–21–77 as an emergency; designated effective 1–1–78 (Register 77, No. 52). For prior history, see Register 77, No. 31.
- 2. Certificate of Compliance filed 1-6-78 (Register 78, No. 1).

[The next page is 345.]

§ 3856. "Cleaning or Conditioning."

as used in Section 52451, Food and Agricultural Code, means cleaning, scarifying, or blending to obtain uniform quality, and other operations which would change the purity or germination of the seed and therefore require retesting to determine the quality of the seed; but not to include operations such as packaging, labeling, blending together of uniform lots of the same kind or variety without cleaning, or the preparation of a mixture without cleaning, any of which would not require retesting to determine the quality of the seed.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52451, Food and Agricultural Code.

HISTORY

1. Amendment filed 3–24–83; effective thirtieth day thereafter (Register 83, No. 13)

Article 2. Labeling

§ 3861. Specimen Labels.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Sections 52451–52454, Food and Agricultural Code.

HISTORY

- Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23).
- 2. Repealer filed 3-24-83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3862. Blank Spaces or the Words "Free" or "None."

in the place of a number or percentage on the label are construed as equivalent to "0" or "0.00 percent," as the case may be, for the purpose of applying the tolerances prescribed in these regulations.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Sections 52452 and 52453, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3863. Designation of Kind, Type or Variety.

- (a) Agricultural Seeds. The common names listed in Section 3899, Schedule I (a), are recognized as "commonly accepted" names for the purpose of labeling agricultural seeds as required by Section 52452, Food and Agricultural Code.
- (b) Vegetable Seeds. The common names listed in Section 3899, Schedule I (b), are recognized as names of "kind" for the purpose of labeling vegetable seeds as required by Section 52453, Food and Agricultural Code. In addition to the "kind," the "variety" is required to be stated on the label of vegetable seeds. If the variety is not known, the label is construed to be in compliance with this provision if it contains the words "unknown variety."
- (c) Other Names. Any name of kind, type, variety or strain, whether listed in Schedule I or not, is construed to comply with the requirements of Sections 52452 and 52453, Food and Agricultural Code, if its application to the seed so labeled is in fact in common usage in California, unless such usage is misleading or confusing. Names or terms that tend to create a false impression as to history or quality of the seed are construed to be misleading.
- (d) Hybrid. The term "hybrid" applied to kinds or varieties of seed means the first generation seed of a cross produced by controlling the pollination and by combining (1) two or more inbred lines; (2) one inbred or a single cross with an open–pollinated variety; or (3) two selected clones, see lines, varieties, or species. "Controlling the pollination" means to use a method of hybridization which will produce pure seed which is at least 75 percent hybrid seed. Hybrid designations shall be treated as variety names.

Any kind or variety that is less than 95 percent but more than 75 percent hybrid seed as a result of incompletely controlled pollination in a cross shall be labeled to show (a) the percentage that is hybrid seed or (b) a statement such as "contains from 75 percent to 95 percent hybrid seed." NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52452, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–28–77 as organizational and procedural: effective upon filing (Register 77, No. 31). For prior history, see Register 69, No. 4.
- 2. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3864. Seed in Hermetically Sealed Containers.

The period of validity of germination tests is extended, as provided in Section 52481(c), Food and Agricultural Code, to the following period for seed packaged in hermetically sealed containers under conditions and label requirements set forth in this section:

- (a) Germination Tests. The germination test for agricultural and vegetable seed shall have been completed within the following period, exclusive of the calendar month in which the test was completed, immediately prior to shipment, delivery, transportation, or sale:
- (1) In the case of agricultural or vegetable seeds shipped, delivered, transported, or sold to a dealer for resale, 18 months;
- (2) In the case of agricultural or vegetable seeds for sale or sold at retail, 36 months.
- (b) Conditions of Packaging. The following conditions are considered as a minimum under the provisions of Section 52481(c), Food and Agricultural Code:
- (1) A container, to be acceptable under the provisions of this section, shall not allow water vapor penetration through any wall, including the wall seals, greater than 0.05 gram of water per 24 hours per 100 square inches of surface at 100U F. with a relative humidity on one side of 90 percent and on the other of 0 percent. Water vapor penetration or WVP is measured by the standards of the U.S. Bureau of Standards as:

gm H2O/24 hr./100 sq. in./100U F./90% RH V. 0% RH

(2) The percentage of moisture, on a wet weight basis, of agricultural or vegetable seeds subject to the provisions of this section shall not exceed the following:

Family	Kind	Maximum percent seed moisture
Graminae	Sweet corn	6.0
	Red fesue	8.0
Liliaceae	Onion, leek, chive, welsh onion	6.5
Chenopodiaceae	Beet, chard	
Cruciferae	Cabbage, broccoli, cauliflower, collards, C cabbage, kale, turnip, rutabaga, kohlrab Brussels sprouts, mustard, radish	Chinese i,
Leguminosae	Snap bean, lima bean, pea	7.0
Umbelliferae	Carrot, celery, celeriac Parsnip Parsley	7.0 6.0
Solanaceae	Tomato Pepper Eggplant	5.5 4.5
Cucurbitaceae	Cucumber, muskmelon, squash, pumpkin Watermelon	6.0
Compositae	Lettuce	5.5 t

A tolerance of one (1.0) percent moisture is applicable to the maximum percentage of moisture listed above and the percentage of moisture found by an official test. The percentage of moisture shall be determined by the air oven method.

- (c) Labeling Required. In addition to the labeling required by Sections 52452, 52453 or 52484, Food and Agricultural Code, seed packaged under the provisions of this section shall be conspicuously labeled with the following information:
 - (1) Seed has been preconditioned as to moisture content.
- (2) Container is hermetically sealed. "Germination test valid until (month, year)" may be used on the label. (Not to exceed 36 months from date of test.)

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52481, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31). For prior history, see Register 66, No. 1.
- 2. Amendment of subsections (b) and (c) filed 3-24-83; effective thirtieth day thereafter (Register 8, No. 13).

§ 3865. Germination Standards.

The standards of germination indicated in Section 3900, Schedule II, are the germination standards for vegetable seeds for the purpose of the label statements required by Section 52453, Food and Agricultural Code. The standards include hard seeds, if present, provided that in packages of more than one–half pound the percentage of hard seeds and the percentage of germination exclusive of hard seeds are separately stated on the label.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52453, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11–15–62; effective 30th day thereafter (Register 62, No. 23).
- 2. Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4).
- 3. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3866. Treated Seed.

NOTE: Authority cited: Sections 407, 52331 and 52332, Food and Agricultural Code. Reference: Sections 52332 and 52484, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5-26-58; designated effective 1-1-59 (Register 58, No. 9).
- 2. Amendment filed 10–15–76; effective thirtieth day thereafter (Register 76, No. 42).
- 3. Amendment of subsection (a) filed 3–24–83; effective thirtieth day thereafter (Register 83, No. 13).
- 4. Repealer filed 9-28-89; operative 10-28-89 (Register 89, No. 41).

§ 3867. Labeling of Seed Containers.

In addition to the information required under Sections 52451 through 52455 of the Food and Agricultural Code each label of agricultural and/or vegetable seed shall include the Arbitration/Conciliation/Mediation Notice required in Section 3915.1, except seed covered by Sections 52454 and 52455; seed covered by Section 52454 shall bear the notice in accordance with Section 52454(b).

The procedure for making the formal complaint referred to in the arbitration/conciliation/mediation notice is set forth in Sections 3915 through 3918.

NOTE: Authority cited: Sections 407, 52331 and 52332, Food and Agricultural Code. Reference: Sections 52332, 52451, 52452, 52453, 55454, 52455 and 52456, Food and Agricultural Code.

HISTORY

- New section filed 8-7-75; effective thirtieth day thereafter (Register 75, No. 32).
- 2. Editorial correction of NOTE filed 4-27-83 (Register 83, No. 18)
- 3. Amendment of section and NOTE filed 1–17–96; operative 2–16–96 (Register 96, No. 3).
- Amendment of first paragraph and Note filed 3-4-2008; operative 4-3-2008 (Register 2008, No. 10).

Article 3. Inspection and Sampling

§ 3871. Classification of Samples.

- (a) An official sample is a sample drawn by an enforcement officer in the manner prescribed by Sections 3872 and 3873 for the purpose of determining whether the seed is in compliance with the provisions of the California Seed Law, Section 52251 *et seq.*, Food and Agricultural Code.
- (b) A certification sample is a sample drawn by an agent of a recognized seed certifying agency, or by an enforcement officer acting upon the request of such agency, in accordance with the rules and regulations of such agency.
- (c) A quarantine sample is a sample submitted for noxious—weed seed examination by a commissioner or a plant quarantine officer.

- (d) A service sample is a sample submitted for testing for an individual or firm.
- (e) A miscellaneous sample is any sample not otherwise classified. NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–14–66; effective thirtieth day thereafter (Register 66, No. 1).
- 2. Amendment of subsection (a) filed 3–24–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3872. Sampling.

- (a) Procedure. The following procedure shall be followed for securing official samples and is recommended for all other samples:
 - (1) General.
- (A) Approximately equal portions shall be taken from fairly evenly distributed parts of the quantity of seed to be sampled. Access shall be had to all parts of that quantity. When more than one trierful of seed is drawn from a container, each successive trierful shall be from evenly separated parts of the container. When more than one handful is taken from a container the handfuls shall be taken from well–separated parts.
- (B) For free-flowing seed in bags or bulk, a probe or trier long enough to sample any portion of the bag shall be used.
- (C) Non-free-flowing seed, such as certain grass seed, or uncleaned seed, difficult to sample with a probe or trier, shall be sampled by thrusting the hand into the bulk and withdrawing representative portions. Protective gloves shall be worn when sampling treated seed.
- (D) As the seed is sampled, each portion shall be examined and if there appears to be a lack of uniformity, the portions shall not be combined but shall be retained as separate samples to determine such lack of uniformity as may exist.
- (E) When the portions appear to be uniform, they shall be combined to form a composite sample.
- (F) If a sealed container is opened or probed for inspection, the inspector shall reseal the container with a suitable seal indicating the purpose for which the container was opened.
- (G) If a label is removed, the inspector shall affix to the container a tag on which the label statements have been copied.
- (2) Bulk. Bulk seeds shall be sampled by inserting a long probe or thrusting the hand into the bulk, as circumstances require, in at least seven fairly uniformly distributed parts of the quantity being sampled.
 - (3) Bags.
 - (A) In quantities of six bags or less each bag shall be sampled.
- (B) In quantities of more than six bags, five bags plus at least 10 percent of the number of bags in the lot shall be sampled. Regardless of the lot size it is not necessary that more than 30 bags be sampled.
- (C) Samples shall be drawn from unopened bags except under circumstances where the identity of the seed has been preserved.
 - (4) Other Containers.
- (A) In sampling seed in sealed containers, such as vegetable seed in packets, or lawn seed in boxes, when it is not practical to sample by other means, one or more entire unopened containers shall be taken.
- (B) If requested by the custodian, sealed containers of single component seeds, containing more weight than needed for the official sample, shall be opened on the premises and the sample taken in the presence of the custodian. The remainder of the contents of the opened container shall be left with the custodian.
- (C) Seed in containers, other than bags, when it is practical to sample by a probe without breaking the seal, shall be sampled in the same manner as seed in bags.
- (D) Regardless of the type of container, the sample in the aggregate shall notbe less than the quantity specified in subsection (b) of this section
- (b) Size of Sample. The following are minimum weights of official samples of seed to be submitted for analysis, test, or examination:

Page 346

- (1) Agricultural Seed.
- (A) Four ounces (114 grams) of bentgrasses, red fescues, bluegrasses, white or alsike clover, or seeds not larger than these.
- (B) Eight ounces (227 grams) red clover, alfalfa, ryegrasses, bromegrasses, meadow or tall fescues, wheatgrasses or seeds of similar size.
- (C) One pound (454 grams) of sudangrass, subclover, sugar beet, or seeds of similar size.
- (D) Two pounds (908 grams) of cereals, vetch, safflower, sorghum, or seeds of similar or larger size.
 - (2) Vegetable Seed.
- (A) One–eighth ounce (3.54 grams) of celery, lettuce, onion, cabbage or seeds not larger than these.
- (B) One-half ounce (14.18 grams) of pepper, eggplant or seeds of similar size.
- (C) One ounce (28.35 grams) of spinach, radish, table beet, muskmelon, or seeds of similar size.
- (D) Four ounces (114 grams) of asparagus, New Zealand spinach, watermelon or seeds of similar size.
- (E) One pound (454 grams) of pea, garden bean, pumpkin, corn or seeds of similar size.
- (F) Two and one-half pounds (1.14 Kilograms) of lima bean, runner bean, horsebean, or seeds of similar or larger size.

When a purity analysis is requested to determine the percentage by weight of any sample of vegetable seed, the minimum weight of the sample shall be not less than the minimum weight required for an official sample of agricultural seed of similar size.

- (c) Preparation of Official Sample.
- (1) A "description of sample" form, provided by the department, shall be completed for each sample, and a label or facsimile label shall be attached to the original copy.
- (2) For seed sampled in bags or bulk the sample shall be enclosed in an official sample bag, properly identified by the appropriate portion of the "description of sample" form and sealed with an official seal. If requested by the custodian, or other financially interested party, the sample shall be divided and a portion left on the premises.
- (3) For seed sampled in packets or other sealed containers, where the entire container is taken as the sample, the sample may be submitted without being enclosed in an official sample bag; provided the appropriate portion of the "description of sample" form is firmly attached to the container or containers submitted as a sample.
- (4) All samples shall be plainly marked outside with an appropriate identification.
- (5) Samples of treated seed shall be double bagged with an inner bag of plastic. The outer container shall be clearly marked to indicate the treatment material and under the remarks section of the "description of sample" form reference to treatment labeling shall be made, such as "properly labeled as to (generic or common name/s) treatment." Any documents accompanying the official sample shall not be placed inside the plastic bag.
- (d) Return of Official Sample. Any portion of the sample not used in making the tests shall be returned to the owner at his expense, if requested within 60 days of sampling.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 4–9–54; effective thirtieth day thereafter (Register 54, No. 8).
- 2. Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23).
- 3. Amendment filed 1–14–66; effective thirtieth day thereafter (Register 66, No. 1).
- 4. Amendment filed 10–15–76; effective thirtieth day thereafter (Register 76, No. 42).
- 5. Amendment of subsections (b) and (c) filed 3-24-83; effective thirtieth day thereafter (Register 83, No. 13).
- 6. Editorial correction of subsections (b)(1)(B) and (c)(1) (Register 83, No. 21).

§ 3873. Forwarding Sample.

- (a) An official sample and the "description of sample" form, accompanied by a label, shall be sent to California Department of Food and Agriculture, Nursery and Seed Services, 1220 N Street, Sacramento, California 95814.
- (b) All other samples may be placed in any suitable nonsealed container, and forwarded to the State Seed Laboratory, Laboratory Services, California Department of Food and Agriculture, 1220 N Street, Sacramento, California 95814, except as provided in subsection (c).
- (c) Certification samples should be forwarded to the seed-certifying agency for which they were drawn.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- 1.Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23).
- 2. Amendment filed 1–14–66; effective thirtieth day thereafter (Register 66, No. 1).
- 3. Amendment filed 10–15–76; effective thirtieth day thereafter (Register 76, No. 42).
- 4. Editorial correction adding NOTE filed 4–27–83 (Register 83, No. 18).

§ 3874. Labels.

HISTORY

- 1. Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23).
- 2. Repealer filed 1-14-66; effective thirtieth day thereafter (Register 66, No. 1).

Article 4. Certification

§ 3875. Seed-Certifying Agencies.

(a) Recognized Agency. The Secretary, after consultation with the Director of the University of California Agricultural Experiment Station, as provided in Food and Agricultural Code Section 52401, finds that the following is qualified to certify as to variety, type, strain, and other genetic characters of agricultural and vegetable seeds, and is hereby officially approved and recognized as a seed–certifying agency within the meaning of the California Seed Law:

California Crop Improvement Association, a nonprofit corporation incorporated under the laws of the State of California.

(b) Official Agencies authorized by law to certify as to matters of fact respecting agricultural or vegetable seeds are not construed to be "seed-certifying agencies" within the meaning of Section 52482, Food and Agricultural Code, and such certification does not authorize representation of seed so certified as "certified seed" unless expressly provided by law

NOTE: Authority cited: Sections 407, 52331 and 52401, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10–15–76; effective thirtieth day thereafter (Register 76, No. 42).
- 2. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).
- Change without regulatory effect amending subsection (a) and NOTE filed 3-5-2008 pursuant to section 100, title 1, California Code of Regulations (Register 2008, No. 10).

§ 3876. Cooperation with Seed-Certifying Agencies.

All services performed at the request of and in cooperation with an officially recognized seed–certifying agency shall be performed in accordance with the rules and regulations of that agency, insofar as consistent with the provisions of law.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52421, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3877. Fees for Certification Services.

(a) Schedules. The fees for certification services performed by the director are shown in Section 4603(f). The fees for certification services performed by commissioners may be established as provided in Section 52422, Food and Agricultural Code, and in this regulation.

- (b) Approval of Schedules. Each commissioner, before establishing a schedule of fees for certification services performed under the provisions of Section 52422, Food and Agricultural Code, is required to submit the proposed schedule to the director for approval. Schedules of fees submitted for approval should be based on the approximate cost of these services
- (c) Transmittal. Claims for fees according to the approved schedule may be submitted directly to the seed—certifying agency, and payment of fees for services performed by a commissioner may be transmitted directly to the commissioner for such disposition as may be directed by the board of supervisors.

NOTE: Authority cited: Sections 407, 5851, 5852 and 52331, Food and Agricultural Code. Reference: Sections 5851, 5852, 52331 and 52422, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23)
- 2. Amendment filed10–15–76; effective thirtieth day thereafter (Register 76, No. 42).
- 3. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).
- 4. Amendment of subsection (a) and Note filed 10–6–2004; operative 11–5–2004 (Register 2004, No. 41). Pursuant to Food and Agricultural Code section 5852(h), regulations establishing charges for services listed in subsection (a) of that section are not subject to review by OAL.

Article 5. Analysis and Testing

§ 3878. Indistinguishable Seed.

Determinations shall be made in the same manner as currently required by Sections 201.58a–201.58c, Federal Seed Act Regulations (Title 7, Chapter 1, Part 201 of the Code of Federal Regulations).

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- Amendment filed 10-5-76; effective thirtieth day thereafter (Register 76, No. 42). For prior history, see Register 66, No. 12.
- 2. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3879. Noxious-Weed Seed Examination.

Examination of a sample for noxious—weed seeds shall be made in accordance with the current procedure prescribed in Section 201.52, Federal Seed Act Regulations (Title 7, Chapter 1, Part 201 of the Code of Federal Regulations).

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 66, No. 1.
- 2. Amendment filed 11–28–73; effective thirtieth day thereafter (Register 73, No. 48).
- 3. Editorial correction adding NOTE filed 4–27–83 (Register 83, No. 18).

§ 3880. Purity Analysis.

A purity analysis includes examination for noxious—weed seeds, as defined in Section 3879, and shall be made in the same manner as currently required by Sections 201.45–201.51(a), Federal Seed Act Regulations (Title 7, Chapter 1, Part 201 of the Code of Federal Regulations).

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 66, No. 1.
- 2. Amendment filed 11–28–73; effective thirtieth day thereafter (Register 73, No. 48).
- 3. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3881. Germination Tests.

Germination tests shall be made in the same manner as currently required by Sections 201.53–201.58, Federal Seed Act Regulations (Title 7, Chapter 1, Part 201 of the Code of Federal Regulations).

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 66, No. 1.
- 2. Amendment filed 11–28–73; effective thirtieth day thereafter (Register 73, No. 48).
- 3. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3882. Tolerances.

The tolerances to be applied in all enforcement procedure required by the California Seed Law shall be the same as currently provided in Sections 201.59–201.65, Federal Seed Act Regulations (Title 7, Chapter 1, Part 201 of the Code of Federal Regulations).

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 66, No. 1.
- 2. Amendment filed 11–28–73; effective thirtieth day thereafter (Register 73, No. 48)
- 3. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).

§ 3883. Fees for Testing and Other Services.

The fees for tests other than those made free of charge are shown in Section 4603(f). All fees for testing are payable in advance, except that for governmental agencies prohibited by law from making advance payments, tests may be made on receipt of a purchase order or other authorization for payment of the proper fees.

NOTE: Authority cited: Sections 407, 5851, 5852 and 52331, Food and Agricultural Code. Reference: Sections 5851, 5852 and 52331, Food and Agricultural Code. HISTORY

- 1. Amendment filed 4-9-54; effective thirtieth day thereafter (Register 54, No. 8).
- 2. Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23).
- 3. Editorial correction adding Note filed 4-27-83 (Register 83, No. 18).
- 4. Amendment of section and Note filed 10–6–2004; operative 11–5–2004 (Register 2004, No. 41). Pursuant to Food and Agricultural Code section 5852(h), regulations establishing charges for services listed in subsection (a) of that section are not subject to review by OAL.

§ 3884. Free Tests.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Section 52331, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23)
- 2. Repealer filed 3-24-83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3885. Mixtures.

- (a) For germination tests of mixtures of three or more kinds of lawn or pasture seed which require a purity separation before a germination test is made, the fee established in Section 4603(f) includes a purity analysis report if specifically requested.
- (b) For germination tests of mixtures other than those specified in subsection (a) of this section, the fee is the sum of the fees established in Section 4603(f) for germination tests of the several components. For a purity analysis of such mixtures, the fee is the same as for that component of the mixture for which the highest charge would be made if analyzed separately.

NOTE: Authority cited: Sections 407, 5851, 5852 and 52331, Food and Agricultural Code. Reference: Sections 5851, 5852 and 52331, Food and Agricultural Code. HISTORY

- 1. Amendment filed 8–10–51; effective thirtieth day thereafter (Register 25, No. 3).
- 2. Amendment filed 4–9–54; effective thirtieth day thereafter (Register 54, No. 8).
- 3. Amendment filed 8-2-56; effective thirtieth day thereafter (Register 56, No. 15)
- 4. Amendment filed 12–2–57; effective thirtieth day thereafter (Register 57, No. 21).
- 5. Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23).
- 6. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).
- Amendment of section and Note filed 10–6–2004; operative 11–5–2004 (Register 2004, No. 41). Pursuant to Food and Agricultural Code section 5852(h), regulations establishing charges for services listed in subsection (a) of that section are not subject to review by OAL.

Article 6. Enforcement and Procedure

§ 3887. Hearings.

Hearings held before the director pursuant to Sections 52311(c) and 52393 of the Food and Agricultural Code shall, as far as practicable, be governed by the procedure prescribed by the Government Code, Title 2, Division 3, Part 1, Chapter 5, Section 11500 et seq., except that the director, or a hearing officer designated by the director shall preside.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Sections 52311 and 52393, Food and Agricultural Code.

HISTORY

- Amendment filed 1–14–66; effective thirtieth day thereafter (Register 66, No. 1).
- 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Amendment filed 3–24–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3888. Procedure Under "Stop-Sale" Order.

- (a) Form. The "stop–sale" order shall be in the form provided for the purpose by the Department. A warning tag or notice may be attached by the enforcement officer to any lot of seed held under a "stop–sale" order. Such tag or notice shall be in the form provided by the Department and shall not be removed except by or under the direction of an enforcement officer, until the "stop–sale" order has been removed.
- (b) Proof of Service. Within five days after service of any "stop-sale" order, the person making the service shall forward to the Director a copy of the order together with an acknowledgment of service signed by the person served, or an affidavit stating the time and place of service upon the person named in the order.
- (c) Release. Upon notification that the law has been complied with, the Commissioner or the Director shall examine the evidence of compliance, and if satisfied that the law has been complied with, shall immediately cause the "stop-sale" order to be removed. When a new test is required, evidence of compliance shall include a copy of the record of the new test, indicating that the seed held under the "stop-sale" order has been sampled and tested.
- (d) Disposal Permits. Permission to move or otherwise dispose of a lot of seed held under "stop—sale" order shall be in the form provided by the Department, and shall specify the purpose for which the permit is given. No permit shall be issued for movement to another county except with the approval of the Commissioner of the county of destination.
- (e) Demand for Hearing. Demand for hearing as to justification of a "stop–sale" order shall be in writing and shall be filed with the Director or Commissioner who issued the order. Such demand may be filed at any time before the "stop–sale" order is removed.
- (f) Notice of Hearing. Within fifteen days after receipt of a demand for a hearing as to the justification of a "stop-sale" order, the Director or the Commissioner upon whom demand has been made shall fix a time and place for such hearing, and shall so notify the person making the demand.
- (g) Hearing. Hearings as to justification of "stop-sale" orders shall be private and shall be conducted in the manner prescribed by Section 3887.
- (h) Record. The original record of the proceedings shall be filed in the office of the Director; one copy shall be filed in the office of the Commissioner, if the hearing was called by a Commissioner; and one copy shall be mailed to the person on whose demand the hearing was called.
- (i) Findings. If the hearing officer, upon the facts shown at the hearing, finds that the "stop-sale" order is justified, the hearing officer shall make an order dismissing the proceedings. If the hearing officer finds that the "stop-sale" order is not justified, the hearing officer shall cause the "stop-sale" order to be removed forthwith.
- (j) Appeal. Appeals shall be made in writing and filed in the office of the Director. Hearings on appeal shall be conducted in like manner and with like effect as hearings on the original cause.

HISTORY

- 1. Amendment filed 11–15–62; effective thirtieth day thereafter (Register 62, No. 23).
- 2. Amendment filed 1–14–66; effective thirtieth day thereafter (Register 66, No. 1).
- 3. Amendment of subsection (i) filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 4. Editorial correction adding NOTE filed 4-27-83 (Register 83, No. 18).
- 5. Editorial correction of section number (Register 95, No. 25).

Article 7. Origin Inspection of Seed

§ 3890. Designation of Origin Inspected Warehouse.

An origin inspected warehouse shall:

- (a) Maintain complete records of all lots of seed subject to Article 8 of the California Seed Law, Sections 52451–52454, Food and Agricultural Code, and have such records available to an enforcing officer.
- (b) Maintain a compliance level for lots of seed officially sampled at origin as indicated in Section 3891. A lot of seed is deemed to comply if
- (1) found free of the seed of a "noxious weed" as defined under the provisions of Section 52256, Food and Agricultural Code and
- (2) found in compliance with Sections 52452 or 52453, Food and Agricultural Code.

A premise shipping seed complying with these standards may apply the director for designation as an "Origin Inspected Warehouse" and if approved in accordance with Section 3892, shall be assigned a designation which may be used on all labeling.

NOTE: Authority cited: Sections 407 and 52333, Food and Agricultural Code. Reference: Section 52333, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4).
- 2. Amendment filed 3–24–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 3891. Sampling.

NOTE: Authority cited: Sections 407 and 52331, Food and Agricultural Code. Reference: Sections 52331 and 52333, Food and Agricultural Code.

- 3. Repealer filed 4-24-97; operative 5-24-97 (Register 97, No. 17).

§ 3892. Designation and Reinstatement As an "Origin Inspected Warehouse."

Before issuing an official designation to an establishment, the responsible party shall show the Director technical competence, responsibility and good faith in seeking to hold said designation. The Director may refuse to issue an official designation to a responsible party who fails to make such a showing and may refuse to reissue a designation to a party whose designation has been revoked until such a showing is made.

- 4. Repealer filed 4-24-97; operative 5-24-97 (Register 97, No. 17).

Article 8. Schedules

§ 3899. Schedule I

(a) Agricultural Seeds*

Common name ** Botanical name Alfalfa Medicago sativa L. Alfilaria: Filaree

Alyceclover Alysicarpus vaginalis (L.) DC. Amaranth Amaranths spp. Paspalum Notatum Fluegge Bahiagrass Hordeum vulgare L.

Barley Bean * as follows:

Adzuki bean Vigna angularis (wild) ohwi and Ohashi Bean (field) Phaseolus vulgaris L.

Bell bean: Horsebean, small seeded Blackeye bean: Cowpea Broadbean: Horsebean

Garbanzo bean: Chickpea Lima bean

Mat bean Moth bean: Mat bean

Mung bean V. radiata (L.) Wilczek var. radiata Rice bean V. umbellata (Thunb.) ohwi and Ohashi Phaseolus acutifolius A. Gray var. latif Tepary bean olius Freem.

P. lunatus L.

Vigna acontifolia (Jacq.) Marechal

Windsor bean: Horsebean

See also: Castorbean Horsebean Soybean Velvetbean

Beet * as follows: Field beet: Mangel wurzel Beta vulgaris L. Beta vulgaris L. Sugar beet Bentgrass as follows:

Colonial bentgrass, Agrostis tenuis Sibth.

including all cultivar Creeping bentgrass

A. stolonifera L. var. palustris (Huds.) Farw.

Seaside bentgrass: Creeping bentgrass

Velvet bentgrass A. canina L.

Bermudagrass as follows:

Bermudagrass Cynodon dactylon (L.) Pers. var. dactyl

Giant bermudagrass Cynodon dactylon var. aridus Harlan and deWet

Bluegrass as follows: Annual bluegrass Poa annua L. Big bluegrass P. ampla Merr. P. bulbosa L. Bulbous bluegrass Canada bluegrass P. compressa L. Kentucky bluegrass P. pratensis L Nevada bluegrass nevadensis Vasey Rough bluegrass P. trivialis L. Texas bluegrass P. arachnifera Torr.

Winter bluegrass: Bulbous bluegrass P. nemoralis L.

Wood bluegrass

Bluestem as follows: Andropogon gerardi Vitman Big bluestem Little bluestem Schizachyrium scoparium Michx. Andropogon Hallii Hack. Sand bluestem

Yellow bluestem Bluestem wheatgrass: see wheatgrass

Broomcorn: Sorghum Broomcorn millet: Proso millet

Brome as follows:

Blando brome: Soft chess California brome Harlan brome Mountain brome Prairie brome: Rescuegrass

Smooth brome Buckhorn plantain: see plantain

Buckwheat Common buckwheat Tartary buckwheat Buffalograss

Buffelgrass Burclover as follows:

California burclover Spotted burclover Burnet, little Canarygrass

Bromus mollis L. B. carinatus Hook and Arn. B.stamineus (L.) Desv. B. marginatus Steudel B. cathartics Vahl. B. inermis Leyss

Fagopyrum esculentum Moench. F. tataricum Gaertn. Buchloe dactyloides (Nutt.) Engl. Cenchrus ciliaris L.

Bothriuchloa ischaemum (L.) Keng

Medicago polymorpha L. M. arabica (L.) Huds. Sanguisorbà minor Scop. Phalaris canariensis L

Canarygrass Reed Cane: Sorghum P. arundinacea L.

Carpetgrass Axonopus affinis Chase Castorbean Ricinus communis L Charlock: Field mustard

Chess, soft: Blando brome Bromus mollis L. Chickpea Cicer arietinum L Clover as follows:

Alsike clover Trifolium hybridum L. Berseem clover T. alexandrinum L. Cluster clover T. glomeratum L. Crimson clover T. incarnatum L.

Egyptian clover: Berseem clover

Hop clover

Large hop clover T. campestris Schreb.

Low hop clover: Large hop clover Small hop clover: Suckling clover Ladino clover T. repens L. T. lappaceum L. Lappa clover Persian clover T. resupinatum L. Red clover pratense L. Rose clover T. hirtum All. Strawberry clover T. fragiferum L. Subclover T. subterraneum L. Suckling clover T. dubium Sibth.

White clover See also: Alyceclover Burclover Sourclover Sweetclover Corn * as follows:

Corn Zea mavs L. Popcorn Z. mays L.

Broomcorn: Sorghum Egyptian corn: Sorghum Kafir corn: Sorghum

Gossypium spp. Cotton

Vigna unguiculata (L.) Walp. subsp. un Cowpea

guiculata

T. repens L.

Paspalum dilatatum Poir. **Dallisgrass** Dichondra repens Forst. Dichondra Dogtail, crested Cynosurus cristatus L.

Dropseed, sand Sporobolus cryptandrus (Torr). A. Gray Durra: Sorghum

Fenugreek

Trigonella foenum-graecum L. Fescue as follows:

Chewings fescue Festuca rubra L. subsp. commutata Gaud.

Creeping fescue: Red fescue, creeping

Hard fescue F. longifolia Thuill Meadow fescue F. pratensis Huds. Red fescue F. rubra L. subsp. rubra F. ovina L. var. ovina Sheep fescue Tall fescue F. arundinacea Schreb.

Feterita: Sorghum Filaree as follows:

Broadleaf filaree Erodium botrys Bertol. Redstem filaree E. cicutarium (L.) Aiton Whitestem filaree E. moschatum (Burm. f.) L'Her. Flax Linum usitatissimum L Alopecurus pratensis L.

Foxtail, Meadow Foxtail millet: See Millet Garbanzo: Chickpea Goatnut: Joioba

Grama as follows: Blue grama

Bouteloua gracilis (H.B.K.) Stendel Side-oats grama B. curtipendula (Michx.) Torr. Grasspea Lathyrus sativus L. Guar Cyamopsis tetragonoloba (L.) Taub. Guayule

Parthemium argentatum Gray Guineagrass Panicum maximum Jacq. var. maximum Hardinggrass Phalaris stenoptera Hack. Heronbill: Filaree

Horsebean 3 Vicia Faba L. V. faba L. Horsebean, small seeded

Indiangrass Sorghastrum nutans (L.) Nash Jojoba Simmondsia chinensis Gray Kafir: Sorghum

Kaoliang: Sorghum Lespedeza as follows:

Chinese lespedeza; Lespedeza cuneata G. (Don)

sericea lespedeza Common lespedeza; L. striata (J. A. Murray) Hook and Arn. striate lespedeza

Page 350 Register 2004, No. 41: 10-8-2004

Korean lespedeza Lotus: Trefoil Lovegrass as follows: Boer lovegrass Lehmann lovegrass Sand lovegrass Weeping lovegrass Lupine * as follows: . Blue lupine White lupine Yellow lupine Maize: Corn Mallow, little Malva: Mallow Mangel wurzel: Beet Medick as follows: Black medick Spotted medick: Spotted burclover Millet as follows:

Broomcorn millet: Proso millet Foxtail millet

Hog millet: Proso millet Japanese millet Pearl millet Proso millet Ragi millet
Milo: Sorghum
Milo maize: Sorghum Molassesgrass Mustard * as follows: Black mustard Field mustard India mustard White mustard Napiergrass Natalgrass Needlegrass: Stipa Oatgrass, tall Oat as follows: Common oat

Green panicgrass

Pea as follows:
Field pea

Wedge pea: Grasspea
See also: Chickpea
Cowpea
Grasspea
Pigeonpea
Roughpea
Tangier-pea

Panicgrass as follows: Blue panicgrass

Red oat Orchardgrass

Peanut
Pigeonpea
Pigweed: Amaranth
Plantain, buckhorn
Popcorn: See Corn
Proso millet: See Millet
Rape as follows:
Annual rape
Bird rape: Annual turniprape
Turniprape, Biennial
Winter rape

Redtop Rescuegrass Rhodesgrass Rice

Article 9. Registration and Assessment

§ 3906. Assessment Fees.

The Secretary pursuant to sections 52331, 52354, and 52354.5 of the Food and Agricultural Code, hereby establishes an annual assessment of \$0.15 per one-hundred dollars (\$100) gross annual dollar volume sales of agricultural and/or vegetable seed in this State for the preceding fiscal year as defined in section 52352 of the Food and Agricultural Code. Such assessment shall be paid to the Secretary within one calendar month of July 1 for the preceding fiscal year. If not paid within the time allotted, a penalty of 10% of the assessment fee due shall be added.

Article 10. Seed Complaint Mediation

§ 3915. Mediation of Complaints Required.

Use and completion of the complaint meditation procedures set forth in this article is a prerequisite to pursuing other dispute resolution mechanisms against a seed labeler when seed planted in California fails to conform to the label statements required by Sections 52452 and 52453 of the Food and Agricultural Code. Only those completing the complaint process are eligible to pursue other dispute resolution mechanisms except as otherwise provided.

- (a) The complaint process requires the filing of a complaint followed by an investigation by the Secretary. At the conclusion of the investigation, mediation may be requested.
- (b) Mediation as used in this article shall mean an alternative dispute resolution process which utilizes a neutral third party who facilitates the resolution of a dispute between parties. The mediator does not make a decision or an award. Resolution of a dispute that is mediated occurs when an agreement is reached between the complainant and the respondent.
- (c) The Secretary may terminate the complaint mediation procedure and issue an Order of the Secretary stating that the requirement of Section 52332(f) of the Food and Agricultural Code has not been met if the person alleging damage to a crop (designated herein as complainant):
 - (1) fails to maintain the crop until notification of release;
 - (2) withdraws the complaint at any time;
 - (3) refuses to cooperate in the investigation;

^{*} See Section 3853.

- (4) fails to request mediation after receipt of the report of investigation; or
- (5) fails to appear at the mediation hearing without reasonable cause.
- (d) The Secretary may release the complainant to pursue other dispute resolution mechanisms by issuing an Order of the Secretary stating that the requirement of Section 52332(f) has been met if the seller or labeler of the seed (designated herein as respondent):
 - (1) fails to file an answer;
 - (2) refuses to cooperate in the investigation procedure;
 - (3) fails to agree to mediation; or
- (4) fails to appear at the mediation hearing without reasonable cause. NOTE: Authority cited: Sections 407 and 52332, Food and Agricultural Code. Reference: Section 52332, Food and Agricultural Code.

HISTORY

- New Article 10 (Sections 3915–3921) filed 8–7–75; effective thirtieth day thereafter (Register 75, No. 32).
- 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- 3. Editorial correction of NOTE filed 4-27-83 (Register 83, No. 18).
- Amendment of article heading, repealer and new section filed 1–17–96; operative 2–16–96 (Register 96, No. 3).

§ 3915.1. Mediation Notice.

The following notice shall appear upon every label of agricultural or vegetable seed except as provided in Section 3867:

NOTICE

ARBITRATION/CONCILIATION/MEDIATION REQUIRED BY SEVERAL STATES

Under the seed laws of several states, arbitration, mediation or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed to which this notice is attached to produce as represented. The consumer shall file a complaint (sworn for AR, FL, IN, MS, SC, TX, WA; signed only CA, ID, ND, SD) along with the required filing fee (where applicable) with the Commissioner/Director/Secretary of Agriculture, Seed Commissioner, or Chief Agricultural Officer within such time as to permit inspection of the crops, plants or trees by the designated agency and the seedman from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statute.

NOTE: Authority cited: Sections 407 and 52332, Food and Agricultural Code. Reference: Section 52332, Food and Agricultural Code.

HISTORY

1. New section filed 1-17-96; operative 2-16-96 (Register 96, No. 3).

§ 3916. Complaint Procedures.

In order to make a formal complaint and seek mediation of a dispute as required by Section 3915, the complainant shall file a complaint within such time as to permit inspection of the crop by the Secretary and the respondent.

- (a) To file a complaint, the complainant shall:
- (1) File a written complaint with the Secretary giving the following information:
 - (A) the complainant's name, address and telephone number;
 - (B) the nature of the complaint and the alleged causes thereof;
- (C) evidence of purchase and the label of the seed used to plant the affected crop (copies are acceptable, but originals must be presented upon demand by the Secretary during the investigation or mediation); and
 - (D) accurate and complete directions to locate the affected crop;
- (2) forward a copy of the written complaint to the respondent by certified or registered mail, at the time of filing;
- (3) pay to the Department of Food and Agriculture a nonrefundable filing fee of two hundred and fifty dollars (\$250), at the time of filing in accordance with Section 52321 of the Food and Agricultural Code; and
- (4) maintain the crop alleged to be damaged in the field until notified of release by the Secretary. The Secretary may require the complainant to maintain a representative portion of the crop. Designation of a representative portion by the Secretary shall be made within seven (7) days after receipt of the complaint.

- (b) Within seven (7) calendar days after receipt of the copy of the written, filed complaint, the respondent shall file with the Secretary a written answer to the complaint and send a copy of the answer to the complainant by certified mail.
- (c) The Secretary shall review the complaint to determine if the complaint is within the scope of Section 52332(f) of the Food and Agricultural Code and has been filed in accordance with this section. Within ten (10) calendar days of receipt of the respondent's written answer, the Secretary shall notify both parties in writing of the acceptance or the reason for rejection of the complaint.

- 2. Editorial correction adding NOTE filed 4–27–83 (Register 83, No. 18).
- 3. Repealer filed 1–17–96; operative 2–16–96 (Register 96, No. 3).

§ 3916.3. Appointment of Investigational Committee.

NOTE: Authority cited: Sections 407 and 52332, Food and Agricultural Code. Reference: Section 52332, Food and Agricultural Code.

HISTORY

- 1. Editorial correction adding Note filed 4-27-83 (Register 83, No. 18).
- 2. Repealer filed 1-17-96; operative 2-16-96 (Register 96, No. 3).

§ 3917. Investigation Procedures.

Upon review and acceptance of a complaint, the Secretary shall initiate an investigation of the complaint.

- (a) Within seven (7) calendar days, the Secretary shall appoint an investigational committee whose purpose is to assist the Secretary in conducting the investigation, make recommendations, offer opinions, and file an investigational report with the Secretary. Each investigational committee shall be composed of four disinterested members as follows: one member shall be the Secretary's designee, who shall serve as chairperson of all investigational committees and who shall make and maintain the file of each committee's investigations and opinions; one member, plus an alternate, shall be a County Agricultural Commissioner in whose county there is production of the kind of crop under consideration; one member, plus an alternate, shall be engaged primarily in the production and/or sale of the kind of seed cited in the complaint; and one member, plus an alternate, shall be a user of such seed.
- (1) Members of each investigational committee shall serve until dismissed by the Secretary or until the report of investigation is filed with the Secretary, whichever occurs first. Alternates shall serve only in the absence of their respective members.
- (2) Committee members shall receive no compensation for the performance of their duties but may receive per diem and mileage as authorized by law.
- (3) Each committee may be called into session by the chairperson to consider matters referred to it. The chairperson shall conduct all meetings and deliberations held by the committee.
- (b) The Secretary shall make a full and complete investigation of the matters complained of, including, but not limited to, an inspection of the crop in the field. The investigation shall be completed within sixty (60)

Page 354

days of the receipt of the complaint unless the investigation requires a growout or other procedure which cannot be completed within that time; in such case, the Secretary shall notify the complainant and respondent in writing stating the reasons for the extension.

- (c) In conducting the investigation, the Secretary may:
- (1) require the parties to provide pertinent records;
- (2) require testimony under oath or statements under penalty of perjury;
- (3) cause to be tested or grown to production a representative sample of seed under the supervision of the Secretary;
 - (4) obtain assistance from qualified experts; and
 - (5) investigate any other matters relative to the complaint.
- (d) The chairperson shall file with the Secretary the committee's written report of investigation along with the investigation file within thirty (30) days after the conclusion of the investigation of the complaint. The Secretary shall transmit the report by certified mail to the complainant and to the respondent. The file, including the report of investigation, shall be maintained by the Secretary for a period of five (5) years.

NOTE: Authority cited: Sections 407 and 52332, Food and Agricultural Code. Reference: Section 52332, Food and Agricultural Code.

HISTORY

- 1. Editorial correction adding Note filed 4-27-83 (Register 83, No. 18).
- Repealer and new section filed 1–17–96; operative 2–16–96 (Register 96, No. 3).

§ 3918. Mediation Procedures.

- If, during the course of the investigation, the complainant and respondent have not resolved the disputed complaint, the complainant may request mediation.
- (a) To request mediation of the disputed complaint the complainant shall:
- (1) file a written request for mediation with the Secretary within ten (10) days after the receipt of the investigation report; and
- (2) forward a copy of the request for mediation to the respondent by certified mail.
- (b) Within seven (7) days after receipt of the request for mediation, the Secretary shall:
- (1) appoint a mediator from within the Department or by contract with outside mediation services; and
- (2) set a time and place for the mediation hearing. The mediation hearing shall begin within thirty (30) days after the request for mediation and shall take place in the county in which the crop alleged to be damaged was grown unless other arrangements are agreed to by the complainant and the respondent.
- (c) The Secretary may declare an impasse if the mediator determines that either party fails to be responsive to the mediation process during the mediation hearing.
- (d) The mediator shall file a report with the Secretary within seven (7) days after completion of the mediation hearing and transmit same by certified mail to the complainant and respondent.
- (e) Within seven (7) days after receipt of the mediator's report, the complainant and respondent shall file with the Secretary written notice of acceptance or rejection of the mediation. Upon completion of mediation or declared impasse, the prerequisite requirement as specified in Section 52332(f) of the Food and Agricultural Code shall be satisfied. - 2. Amendment filed 7–28–77 as organizational and procedural; effective upon filing (Register 77, No. 31).
- Repealer of Article 4 (Section 3955) filed 12–8–82; effective thirtieth day thereafter (Register 82, No. 50).

Article 5. Alligatorweed

§ 3960. Alligatorweed Eradication Areas.

(a) Those portions of the State of California described as follows, within which a certain pest, alligatorweed *Alternanthera philoxeroides*, is known to exist, are hereby proclaimed to be an eradication area with respect to said pest:

The entire counties of Riverside, Tulare, Kings and Los Angeles.

(b) Possible Carriers.

Any and all premises, soil, stream or channel water and any other articles or things which are infested or exposed to infestation by alligatorweed, within said area.

(c) Means and Methods.

The following means and methods are to be used in the eradication of said pest within said area.

- (1) Repeated timely application of sterilants or herbicidal sprays to properties, water channels and other places or things that are infested or are exposed to infestation by alligatorweed.
- (2) The placement of screens in infested water channels or ditches to prevent the spread or reinfestation of alligatorweed.
- (3) The visual inspection of properties, streams, water channels and other places and things for the presence of alligatorweed.
- (4) In addition to the other means and methods described in this subsection (c) eradication of alligatorweed in Los Angeles County may be accomplished by excavation, removal or burial within Los Angeles County after on–site destruction of above ground portions.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5322 and 5761–5763, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-5-68; effective thirtieth day thereafter (Register 68, No. 25).
- Amendment filed 5–11–70; effective thirtieth day thereafter (Register 70, No. 20).
- 3. Amendment of NOTE filed 3–9–83; effective thirtieth day thereafter (Register 83, No. 11).
- 4. Amendment of section heading and subsection (a) filed 1-2-97 as an emergency; operative 1-2-97 (Register 97, No. 1). A Certificate of Compliance must be transmitted to OAL by 5-2-97 or emergency language will be repealed by operation of law on the following day.
- ation of law on the following day.

 5. Certificate of Compliance as to 1–2–97 order transmitted to OAL 5–1–97 and filed 6–6–97 (Register 97, No. 23).

Article 6. Dudaim Melon

§ 3961. Dudaim Melon Eradication Area Regulation.

- (a) Proclamation of Eradication Area. The portion of the State of California described as follows, within which a certain pest, *Cucumis melo* var. *dudaim*, is known to exist, is hereby proclaimed to be an eradication area with respect to said pest:
 - (1) The entire county of Imperial.
- (b) Possible Carriers. Any and all premises, soil, equipment, containers and any other articles or things which are infested or exposed to infestation by dudaim melon, within said area.
- (c) Methods and Means. The following means and methods are to be used in the eradication of said pest within said area:
- (1) Repeated timely applications of herbicides to crops, ditch banks, roadsides and other areas that are infested by dudaim melon.
- (2) Thoroughly cleaning machinery and harvesting equipment after use in infested fields before moving into uninfested fields.
- (3) The visual inspection of properties, roadsides, ditch banks and other places and things for the presence of dudaim melon.

(4) Picking, removing and burning fruits of the dudaim melon, which escape control.

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5322 and 5761–5763, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–16–72; effective thirtieth day thereafter (Register 72, No. 8).
- 2. Amendment of NOTE filed 3–9–83; effective thirtieth day thereafter (Register 83, No. 11).

Article 7. Hydrilla

§ 3962. Hydrilla Eradication Area.

- (a) Proclamation of Eradication Area. The portions of the State of California described as follows, within which a certain pest, *Hydrilla verticillata*, is known to exist, are hereby proclaimed to be eradication areas with respect to said pest:
- (1) The entire counties of Calaveras, Imperial, Lake, Madera, Mariposa, Nevada, Shasta, Tulare and Yuba.
- (b) Possible Carriers. Any and all premises, soil, streams, lakes, ponds, water channels, and any other articles or things which are infested or exposed to infestation by hydrilla, within said area.
- (c) Means and Methods. The following means and methods may be used in the eradication of said pest within said area.
- (1) Repeated timely application of herbicides to lakes, ponds, water channels and other places that are infested with hydrilla.
- (2) The placement of screens in infested water channels or ditches to prevent the spread or reinfestation of hydrilla.
- (3) The visual inspection of lakes, ponds, water channels, streams, and other places and things for the presence of hydrilla.
- (4) Thorough cleaning of any machinery or equipment after use in infested areas before moving equipment to an uninfested location.
- (5) Excavating or removal by hydraulic or other means of hydrilla followed with burial or drying on a non-aquatic site within the eradication

NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Reference: Sections 5322, 5761 and 6048, Food and Agricultural Code.

History

- 1. Editorial correction renumbering former section 3591.7 to article 7 (section 3962) filed 4–11–83 (Register 83, No. 16). For prior history of former section 3591.7, see Registers 82, No. 50; 79, No. 22; and 77, Nos. 18 and 7.
- Amendment of subsection (a) filed 6-8-88 as an emergency; operative 6-8-88 (Register 88, No. 25). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 10-6-88.
- 3. Certificate of Compliance transmitted to OAL 10-6-88 and filed 11-4-88 (Register 88, No. 46).

- 14. Amendment of subsection (a)(1) filed 8–13–97 as an emergency; operative 8–13–97 (Register 97, No. 33). A Certificate of Compliance must be transmitted

- to OAL by 12–11–97 or emergency language will be repealed by operation of law on the following day.
- 15. Certificate of Compliance as to 8–13–97 order transmitted to OAL 12–2–97 and filed 12–31–97 (Register 98, No. 1).
- 16. Amendment of subsection (a) filed 8-5-2004 as an emergency; operative 8-5-2004 (Register 2004, No. 32). A Certificate of Compliance must be transmitted to OAL by 12-3-2004 or emergency language will be repealed by operation of law on the following day.
- 17. Certificate of Compliance as to 8-5-2004 order transmitted to OAL 12-2-2004 and filed 1-13-2005 (Register 2005, No. 2).

Article 8. South American Spongeplant

§ 3963. South American Spongeplant Eradication Area.

(a) Proclamation of Eradication Area. The portions of the State of California described as follows, within which a certain pest, *Limnobium laevigatum* (South American spongeplant), is known to exist, are hereby proclaimed to be eradication areas with respect to said pest:

The entire counties of Fresno, Madera, Merced and Shasta.

- (b) Possible Carriers. Any and all premises, soil, streams, lakes, ponds, water channels, and any other articles or things which are infested or exposed to infestation by South American spongeplant, within said area.
- (c) Means and Methods. The following means and methods may be used in the eradication of said pest within said area.
- (1) The repeated timely application of herbicides to any and all premises, soil, streams, lakes, ponds, water channels, and any other articles or things which are infested or exposed to infestation with South American spongeplant.
- (2) The placement of screens in infested streams, water channels or ditches to prevent the spread or reinfestation of South American sponge-plant.
- (3) The visual inspection of streams, lakes, ponds, water channels and other places and things for the presence of South American spongeplant.
- (4) The thorough cleaning of any machinery or equipment after use in infested areas before moving said machinery or equipment to an uninfested location.
- (5) The excavating or removal by hydraulic or other means of South American spongeplant followed with burial or drying on a non-aquatic site within the eradication area.
- (6) The draining, removing or preventing water from being able to be present to support an infestation of South American spongeplant.

 NOTE: Authority cited: Sections 407 and 5322, Food and Agricultural Code. Ref-

erence: Sections 407, 5322, 5761, 5762 and 5763, Food and Agricultural Code. HISTORY

- 1. New article 8 (section 3963) and section filed 6–3–2005 as an emergency; operative 6–3–2005 (Register 2005, No. 22). A Certificate of Compliance must be transmitted to OAL by 10–3–2005 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 6–3–2005 order transmitted to OAL 9–9–2005 and filed 10–4–2005 (Register 2005, No. 40).
- 3. Amendment of subsection (a) filed 12–26–2007 as an emergency; operative 12–26–2007 (Register 2007, No. 52). A Certificate of Compliance must be transmitted to OAL by 6–23–2008 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 12-26-2007 order transmitted to OAL 5-28-2008 and filed 6-24-2008 (Register 2008, No. 26).
- Amendment of subsection (a) filed 7–14–2008; operative 8–13–2008 (Register 2008, No. 29).

Subchapter 5. Wild Bird and Animal Importations

(Originally Printed 7-25-45)

See Rules and Regulations of the Fish and Game Commission, C. A. C. 14, Section 671.

Subchapter 6. Noxious Weed Species

§ 4500. Noxious Weed Species.

It has been determined that the following species of plants are noxious weeds within the meaning of Section 5004 of the Food and Agricultural Code:

Acacia paradoxa (Kangaroo thorn)

Acaena anserinifolia (biddy biddy)

Acaena novae-zelandiae (biddy biddy)

Acaena pallida (biddy biddy)

Achnatherum brachychaetum (punagrass)

Acroptilon repens (Russian knapweed)

Aegilops cylindrica (jointed goatgrass)

Aegilops ovata (ovate goatgrass)

Aegilops triuncialis (barb goatgrass)

Aeschynomene rudis (rough jointvetch)

Alhagi maurorum (camelthorn)

Ailanthus altissima (tree of heaven)

Allium paniculatum (panicled onion)

Allium vineale (wild garlic)

Alternanthera philoxeroides (alligatorweed)

Ambrosia trifida (giant ragweed)

Araujia sericofera (bladderflower)

Arctotheca calendula (capeweed, as seed or fertile plants)

Arundo donax (giant reed)

Cardaras chalepensis (lens-podded hoary cress)

Cardaria draba (heart-podded hoary cress)

Cardaria pubescens (globe-podded hoary cress)

Carduus acanthoides (plumeless thistle)

Carduus nutans (musk thistle)

Carduus pycnocephalus (Italian thistle)

Carduus tenuiflorus (Italian thistle)

Carthamus baeticus (smooth distaff thistle)

Carthamus lanatus (woolly distaff thistle)

Carthamus leucocaulos (whitestem distaff thistle)

Cenchrus echinatus (southern sandbur)

Cenchrus incertus (coast sandbur)

Cenchrus longispinus (mat sandbur)

Centaurea calcitrapa (purple starthistle)

Centaurea diffusa (diffuse knapweed)

Centaurea iberica (Iberian starthistle)

Centaurea maculosa (spotted knapweed)

Centaurea melitensis (tocalote)

Centaurea solstitialis (yellow starthistle)

Centaurea squarrosa (squarrose knapweed)

Centaurea sulphurea (Sicilian thistle)

Chondrilla juncea (skeletonweed)

Chorispora tenella (purple mustard)

Cirsium arvense (Canada thistle)

Cirsium ochrocentrum (yellowspine thistle)

Cirsium undulatum (wavyleaf thistle)

Cirsium vulgare (bull thistle)

Convolvulus arvensis (field bindweed)

Coronopus squamatus (swinecress)

Cortaderia jubata (jubata grass)

Crupina vulgaris (bearded creeper)

Cucumis melo var. dudaim (dudaim melon)

Cucumis myriocarpus (paddy melon)

Cuscuta spp. (dodder)

Cynara cardunculus (artichoke thistle)

Cyperus esculentus (yellow nutsedge)

Cyperus rotundus (purple nutsedge)

Cytisus scoparius (Scotch broom)

Elytrigia repens (quackgrass)

Euphorbia esula (leafy spurge)

Euphorbia oblongata (oblong spurge)

Euphorbia serrata (serrate spurge)

Gaura drummondii (scented gaura)

Gaura sinuata (wavyleaf gaura)

Genista monspessulana (French broom)

Halimodendron halodendron (Russian salt tree)

Halogeton glomeratus (halogeton)

Helianthus ciliaris (blueweed)

Heteropogon contortus (tanglehead)

Hydrilla verticillata (hydrilla)

Hyoscyamus niger (black henbane)

Hypericum perforatum (Klamath weed)

Isatis tinctoria (dyer's woad)

Lepidium latifolium (perennial peppercress)

Linaria genistifolia ssp. dalmatica (Dalmatian toadflax)

Lythrum salicaria (purple loosestrife)

Muhlenbergia schreberi (nimblewill)

Nothoscordum inodorum (false garlic)

Nymphaea mexicana (banana waterlily)

Onopordum (spp. onopordum thistles) Orobanche ramosa (branched broomrape)

Oryza rufipogon (red rice)

Panicum antidotale (blue panicgrass)

Peganum harmala (harmel)

Pennisetum clandestinum (Kikuyugrass)

Physalis virginiana var. sonorae (smooth groundcherry)

Physalis viscosa (grape groundcherry)

Polygonum cuspidatum (Japanese knotweed)

Polygonum polystachyum (Himalayan knotweed)

Polygonum sachalinense (giant knotweed)

Prosopis strombulifera (creeping mesquite)

Rorippa austriaca (Austrian fieldcress)

Salsola australis (common Russianthistle)

Salsola paulsenii (barbwire Russianthistle)

Salsola vermiculata (wormleaf salsola)

Salvia aethiopis (Mediterranean sage)

Salvia virgata (meadow sage)

Scolymus hispanicus (golden thistle)

Senecio jacobaea (tansy ragwort)

Senecio mikanioides (Delairea odorata) (Cape ivy)

Senecio squalidus (Oxford ragwort)

Setaria faberi (giant foxtail)

Solanum cardiophyllum (heartleaf nightshade)

Solanum carolinense (Carolina horsenettle)

Solanum dimidiatum (Torrey's nightshade)

Solanum elaeagnifolium (white horsenettle)

Solanum lanceolatum (lanceleaf nightshade)

Solanum marginatum (white-margined nightshade)

Sonchus arvensis (perennial sowthistle)

Sorghum halepense (Johnsongrass and other perennial Sorghum spp. including but not limited to Sorghum almum and perennial sweet sudangrass)

Spartium junceum (Spanish broom)

Sphaerophysa salsula (Austrian peaweed)

Striga lutea (witchweed)

Symphytum asperum (rough comfrey)

Taeniatherum caput-medusae (medusahead)

Tagetes minuta (wild marigold)

Tamarix chinensis (salt cedar)

Tamarix gallica (salt cedar)

Tamarix parviflora (salt cedar)

Tamarix ramosissima (salt cedar)

Tribulus terrestris (puncture vine)

Ulex europaeus (gorse)

Viscum album (European mistletoe)

Zygophyllum fabago (Syrian beancaper)

This regulation shall in no way restrict the designation of a weed pest to those species listed herein.

NOTE: Authority cited: Sections 407 and 5004, Food and Agricultural Code. Reference: Section 5004, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12-21-77 as an emergency; designated effective 1-1-78 (Register 77, No. 52). For prior history, see Register 77, No. 31. Certificate of Compliance filed 1–6–78 (Register 78, No. 1).
- 3. Amendment of NOTE filed 3-9-83; effective thirtieth day thereafter (Register
- 4. Amendment filed 5-7-97; operative 6-6-97 (Register 97, No. 19).
- 5. Amendment filed 8–12–2003; operative 9–11–2003 (Register 2003, No. 33).
- 6. Amendment filed 1-28-2008; operative 2-27-2008 (Register 2008, No. 5).

Chapter 7. Miscellaneous Rulings

Subchapter 1. Service Charges

§ 4600. General Provisions.

- (a) The department may provide analytical, diagnostic, inspection, testing and other non-regulatory services related to nursery stock, plants, seed, or other plant pests and diseases on a charge-for-service basis.
- (b) Service charges may include the approximate hourly labor costs of the involved departmental staff, including prorated staff benefits and departmental overhead costs, the cost of any shipping, handling, supplies, equipment and materials; and mileage, travel and per diem pursuant to the State's per diem travel rules, and required to provide the service.
- (c) This subchapter establishes the department's schedule of charges as provided in Sections 5851 and 5852, Food and Agricultural Code.
- (d) The department shall provide a diagnostic result within ten working days of receipt of a nematology, entomology or plant taxonomy sample/specimen or shall notify the client of an estimated time for the delivery of diagnostic results if a period of time longer than ten working days will be required.
- (e) The department shall provide a diagnostic result within 35 working days of receipt of a plant pathology sample/specimen or shall notify the client of an estimated time for the delivery of diagnostic results if a period of time longer than 35 working days will be required.
- (f) The identification of a pest not known to occur in the United States or California, or a pest that is of limited or wide but not general distribution in California shall be reported to the appropriate federal or state plant pest prevention officials.
- (g) The client may establish an account with the department from which fees for services rendered by the department may be debited or the service charges established by this subchapter shall be payable after the service has been provided and billed by the department.
- (h) Payments not received within 30 calendar days of the date of billing shall be considered late. Payments post-marked on the 30th calendar day shall be considered to be on time. Once late, a late charge of 10% of the total amount billed or amount unpaid shall be assessed and added to the
- (i) The department may refuse services for any client who has not paid a previously submitted bill or when there is a lack of qualified staff to provide requested service.

NOTE: Authority: Sections 407, 5851 and 5852, Food and Agricultural Code. Reference: Sections 407, 5851 and 5852, Food and Agricultural Code.

HISTORY

1. New chapter 7 (subchapter 1), subchapter 1 (sections 4600-4603) and section filed 11-12-2002; operative 12-12-2002. Pursuant to Food and Agricultural Code Section 5852, subdivision (h), regulations establishing charges for the services listed in subdivision (a) of that section are not subject to review by the Office of Administrative Law (Register 2002, No. 46).

§ 4601. Disclaimer of Liability and Financial Responsibility.

- (a) The department shall not guarantee the accuracy, level or timeliness of its diagnostic results; or that it can provide diagnostic services for every request or sample or specimen submitted or obtained.
- (b) If the department cannot perform the requested diagnostics, the client shall be contacted and consulted about what action she/he prefers, and

Page 358

informed of any additional time or costs that might be involved if samples or specimens would have to be sent to an outside vendor/specialist for diagnostics.

(c) The department shall not be responsible for shipping costs or samples that are inadequate, lost, not delivered, damaged during transport, decayed or otherwise unfit or unusable for the requested service or for the costs of shipping samples requested by the shipper to be returned.

NOTE: Authority: Sections 407 and 5852, Food and Agricultural Code. Reference: Sections 407 and 5852, Food and Agricultural Code.

HISTORY

1. New section filed 11–12–2002; operative 12–12–2002. Pursuant to Food and Agricultural Code Section 5852, subdivision (h), regulations establishing charges for the services listed in subdivision (a) of that section are not subject to review by the Office of Administrative Law (Register 2002, No. 46).

§ 4602. Payment for Services Provided.

- (a) The department shall establish a schedule of charges for the services described in this subchapter based upon the approximate cost of the service rendered
- (b) The department may charge additional fees, upon approval by the client, when due to conditions, or number of samples and/or determinations made, the fees established will not cover the cost of the service as described.
- (c) A client may request a refund of any funds that the client deposited in an account with the department.

NOTE: Authority: Sections 407, 5851 and 5852, Food and Agricultural Code. Reference: Sections 407, 5851 and 5852, Food and Agricultural Code.

HISTORY

1. New section filed 11–12–2002; operative 12–12–2002. Pursuant to Food and Agricultural Code Section 5852, subdivision (h), regulations establishing charges for the services listed in subdivision (a) of that section are not subject to review by the Office of Administrative Law (Register 2002, No. 46).

§ 4603. Schedule of Charges.

The Secretary of Food and Agriculture, pursuant to Section 5852 of the Food and Agricultural Code, establishes the following schedule of charges for analytical, diagnostic, inspection, testing and other non-regulatory services related to nursery stock, plants, seed, or other plant pests and diseases.

(a) The hourly charge for requested diagnostics or scientific consultations which require travel is \$60 per hour portal to portal, plus any car mileage at \$0.35 per mile, air fare, meals and lodging pursuant to the State's per diem travel rules.

- (b) Nematology
- (1) The charge for processing and providing diagnostics for an unprocessed nematode sample is \$40.
- (2) The charge for diagnostics of processed and preserved nematode samples is \$20.
 - (c) Entomology and Plant Taxonomy
- (1) The charge per specimen for diagnostics of arthropods or plants in quantities of ten specimens or less is \$20 regardless of the level of taxonomic determination.
- (2) The charge for processing multiple samples of 11 or more specimen determinations will be \$60 per hour plus the cost of any materials that might be required.
 - (d) General Pathology
- (1) The general plant pathology per diagnosis charge for up to ten samples is \$20 regardless of the level of taxonomic determination.
- (2) The general plant pathology per diagnosis charge for multiple sample submissions of 11 or more specimens is \$60 per hour plus the cost of any materials that might be required.
- (3) The general plant pathology per diagnosis charge involving the use of an electron microscope is \$160 per hour plus the cost of any materials that might be required.
 - (e) Seed Pathology

For seeds of the same kind in the same sample:

- (1) Seed blotter tests are \$35 for 400 seeds and \$60 for 1000 seeds.
- (2) An agar plate test of 400 seeds for fungal pathogens is \$35.
- (3) An extraction and plating test for the first bacterial pathogen is \$125 and \$25 for each additional bacterial pathogen.
- (4) A Potato Spindle Tuber Viroid DNA hybridization test is \$250.
- (5) Enzyme-linked immunosorbant assay (ELISA) tests are \$60 for 400 seeds and \$85 for 1200 seeds.
 - (6) A centrifuge wash and microscopy test is \$35.
 - (7) A grow–out test is \$125.
- (8) A bioassay test for the presence of a fungicide substance on seeds is \$35.
 - (9) Specific crop seed:

Crop/Disease ALFALFA	Pathogen	Cost	Test duration	Minimum sample size
Bacterial wilt Bacterial leafspot Spring black stem Verticillium wilt Alfalfa mosaic virus	Clavibacter michiganensis subsp. insidiosus Xanthomonas campestris pv. alfalfae Phoma medicaginis Verticillium albo—atrum Alfalfa mosaic virus	\$125 \$125 \$35 \$35 \$85	2–5 weeks 2–5 weeks 2 weeks 2–5 weeks 3 weeks	30,000 nontreated seed 30,000 nontreated seed 500 nontreated seed 2000 nontreated seed 2000 nontreated seed

	Analysis	Test	(TZ) Test
Wheat		29.00 38.00	75.00 90.00

¹Purity Analysis requires a minimum sample of 30,000 seed units and includes California Noxious Weed Seed examination. Samples submitted not meeting the minimum shall not be run. For the minimum weight for a kind of seed, contact the California Seed Laboratory prior to submitting a sample for testing.

²Germination or Tetrazolium test requires a minimum sample of 1,000 seed units. Samples submitted not meeting the minimum shall not be run. For the minimum weight for a kind of seed, contact the California Seed Laboratory prior to submitting a sample for testing.

For germination tests of mixtures of two or more kinds of lawn or pasture seed, which require a purity separation before a germination test is made, the fee will include a purity analysis report if specifically requested.

For germination tests of mixtures of two or more kinds of lawn or pasture seed or all other kinds, the fee will be the sum of the fees established for germination tests of the several components. For a purity analysis of such mixtures, the fee is the same as for that component of the mixture for which the highest charge would be made if analyzed separately. The minimum fee for any mixture will be \$60.00.

(2) Vegetable seed.

	Purity ¹ Analysis	Germination ² Test	Tetrazolium ² (TZ) Test
A			. ,
Asparagus	\$35.00 30.00	40.00 47.00	90.00 60.00

¹Purity Analysis requires a minimum sample of 30,000 seed units and includes California Noxious Weed Seed examination. Samples submitted not meeting the minimum shall not be run. For the minimum weight for a kind of seed, contact the California Seed Laboratory prior to submitting a sample for testing.

²Germination or Tetrazolium Tests require a minimum sample of 1,000 seed units. Samples submitted not meeting the minimum shall not be run. For the minimum weight for a kind of seed, contact the California Seed Laboratory prior to submitting a sample for testing.

Fees for additional tests, examinations, and services are as follows:
California or All State Noxious Weed Seeds examination \$
Complete Other Species examination ¹ \$35.00 ³
Foreign Noxious Weed Seeds ¹
Ryegrass Florescence ² \$20.00 ⁴
Sclerotia Percentage
Seed Mositure
Sod Quality Exam
Soil Percentage \$35.00 ³
Treated Seed
X-ray Analysis

¹ California, All State and Foreign Noxious Weed Seed examinations and Complete Other Species examination require a minimum sample of 30,000 seed units. Samples submitted not meeting the minimum shall not be run. For the minimum weight for a kind of seed, contact the California Seed Laboratory prior to submitting a sample for testing.

²Ryegrass Florescence test requires a minimum sample of 1,000 seed units. Samples submitted not meeting the minimum shall not be run. For the minimum weight for a kind of seed, contact the California Seed Laboratory prior to submitting a sample for testing.

 3 \$20.00 when a purity test, soil exam, sclerotia exam or noxious exam is also requested.

⁴In addition to Germination test fee.

Charges for tests of agricultural and vegetable seed kinds not listed and for seed that is unclean, field run, or excessively dirty will be based on the cost of a similar test, or on the time required to run the test at \$60.00 per hour (\$60.00 minimum charge).

Fees for special handling and services are as follows:

International Seed Testing Association (ISTA) \$20.00\frac{1}{2}\$
Canadian Seed Act & Regulations (CSAR) \$20.00\frac{1}{2}\$
Express mailing (Federal Express or others) Actual costs
FAXing test results \$3.00 per page

- (g) Postentry Quarantine Program Charges shall be per postentry quarantine inspection performed as required under federal regulation (7 CFR § 319.37–7) and based upon combining the total amounts of (1) and (2) below.
- (1) The charge for inspection performed at the postentry quarantine site is \$60 per hour.
- (2) The charge for travel, based upon the distance traveled from the responsible inspector's office to the postentry quarantine inspection site, shall be:
 - (A) \$50 for up to 50 miles;
 - (B) \$100 from over 50 to 100 miles:
 - (C) \$150 from over 100 to 150 miles;
 - (D) \$240 from over 150 to 200 miles; and,
 - (E) \$340 for over 200 miles.

NOTE: Authority cited: Sections 407, 5851, 5852 and 52331, Food and Agricultural Code. Reference: Sections 407, 5851, 5852 and 52331, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–12–2002; operative 12–12–2002. Pursuant to Food and Agricultural Code Section 5852, subdivision (h), regulations establishing charges for the services listed in subdivision (a) of that section are not subject to review by the Office of Administrative Law (Register 2002, No. 46).
- 2. New subsections (f)-(f)(2) and amendment of Note filed 10-6-2004; operative 11-5-2004 (Register 2004, No. 41). Pursuant to Food and Agricultural Code section 5852(h), regulations establishing charges for services listed in subsection (a) of that section are not subject to review by OAL.
- New subsection (g) filed 2-15-2005; operative 3-17-2005 (Register 2005, No. 7). Pursuant to Food and Agricultural Code section 5852(h), regulations establishing charges for services listed in subsection (a) of that section are not subject to review by OAL.

Division 5. Miscellaneous Matters

Division 6. Pesticides and Pest Control Operations

Chapter 1. Pesticide Regulatory Program

Subchapter 1. Definition of Terms

Article 1. Definitions for Division 6

§ 6000. Definitions.

"Agricultural commodity," means an unprocessed product of farms, ranches, nurseries and forests (except livestock, poultry and fish). Agricultural commodities include fruits and vegetables; grains, such as wheat, barley, oats, rye, triticale, rice, corn and sorghum; legumes, such as field beans and peas; animal feed and forage crops; rangeland and pasture; seed crops; fiber crops such as cotton; oil crops such as safflower, sunflower, corn and cottonseed; trees grown for lumber and wood products; nursery stock grown commercially; Christmas trees; ornamentals and cut flowers; and turn grown commercially for sod.

"Air-purifying respirator" means a respirator with an air-purifying filter, cartridge, or canister that removes specific air contaminants by passing ambient air through the air-purifying element.

"Application block" means a field, or portion of a field, treated in a 24-hour period that typically is identified by visible indicators, maps, or other tangible means.

"Applied to the soil" or "applied to the ground" means the labeling of a pesticide product includes terminology such as,

- (a) Soil fumigant
- (b) Soil applied
- (c) Soil treatment product
- (d) Can be used as a soil drench
- (e) Application to soil
- (f) Inject into the soil
- (g) Incorporate in top (x) inches of soil; pre-plant incorporation
- (h) Use on soil for control of soil-borne diseases
- (i) Surface application; band treatment, surface blend
- (j) Side dressing both/one side of row and cultivate into soil
- (k) Should be mixed uniformly into top (x) inches of soil
- (1) Pre-emergent to the weed
- (m) Broadcast to the soil
- (n) Apply in seed furrow

"Artificial recharge basin" means a surface facility, such as an infiltration pond or basin, or spreading ground specifically designed and managed to increase the infiltration of introduced surface water supplies into a ground water basin. "Artificial recharge basin" does not include ditches, canals, or reservoirs designed primarily to transport and store water, or stream channels, lakes, and other naturally occurring water bodies that are not principally managed to recharge ground water.

"Assure" or "Ensure" means to take all reasonable measures so that the behavior, activity, or event in question occurs. When the behavior, activity, or event in question involves or concerns an employee, reasonable measures by an employer include determining that the employee has the knowledge to comply; providing the means to comply; supervising the work activity; and having and enforcing a written workplace disciplinary action policy covering the employer's requirements, as well as other measures required by pesticide law or this division.

"Atmosphere–supplying respirator" means a respirator that supplies the respirator user with breathing air from a source independent of the ambient atmosphere, and includes supplied–air respirators (SAR) and self–contained breathing apparatus (SCBA) units.

"Branch location" means any location, other than the principal place of business, operated by a pesticide dealer or an agricultural pest control business to carry out licensed activities in California. "Buffer zone" as used in sections 6447, 6447.1, 6447.2, and 6447.3 means an area that surrounds a pesticide application block in which certain activities are restricted for a specified period of time to protect human health and safety from existing or potential adverse effects associated with a pesticide application.

"Carbamates" means esters on N-methyl carbamic acid which inhibit cholinesterase.

"Certified commercial applicator" means:

- (a) A person holding a valid qualified license issued by the director;
- (b) A pilot holding a valid journeyman pest control aircraft pilot's certificate issued by the director;
- (c) A person holding a certified technician certificate issued by the Vector Biology and Control Section of the Department of Health Services:
- (d) A person holding a valid structural pest control operator or field representative license issued by the Structural Pest Control Board of the Department of Consumer Affairs; and
- (e) A person holding a valid qualified applicator certificate by the director.

"Certified private applicator" means a private applicator holding a valid private applicator certificate issued by the commissioner (or the director in any county where there is no commissioner).

"Chemical resistant" or "Waterproof" means a material that allows no measurable movement of the pesticide through it during use. When a specific material is specified on pesticide product labeling, personal protective equipment constructed of that material shall be used.

"Chemigation" means the application of pesticides through irrigation systems.

"Closed system" means a procedure for removing a pesticide from its original container, rinsing the emptied container and transferring the pesticide product, mixtures and dilutions and rinse solution through connecting hoses, pipes and couplings that are sufficiently tight to prevent exposure of any person to the pesticide or rinse solution. Rinsing is not required when the pesticide is used without dilution. The system's design and construction shall meet the director's closed system criteria.

"Commercial applicator" means a person who uses or supervises the use of a pesticide for any purpose or on any property other than as provided by the definition of "private applicator."

"Confidential reader" is a person chosen by an employee required to wear a respirator to read to him/her the Medical Evaluation Questionnaire required under section 6739 in a language primarily understood by the employee. This includes, but is not limited to, a coworker, family member, friend, or an independent translator provided by the employer. The employer or the employer's direct agent, such as a supervisor, manager, foreman, or secretary, are not included and are prohibited from being confidential readers.

"Conflict with labeling" means any deviation from instructions, requirements or prohibitions of pesticide product labeling concerning storage, handling or use except:

- (a) A decrease in dosage rate per unit treated;
- (b) A decrease in the concentration of the mixture applied;
- (c) Application at a frequency less than specified;
- (d) Use to control a target pest not listed, provided the application is to a commodity/site that is listed and the use of the product against an unnamed pest is not expressly prohibited;
- (e) Employing a method of application not expressly prohibited, provided other directions are followed;
- (f) Mixing with another pesticide or with a fertilizer, unless such mixture is expressly prohibited;
- (g) An increase in the concentration of the mixture applied, provided it corresponds with the current published UC Pest Management Guidelines of the University of California, which are available from their Statewide Integrated Pest Management Project, One Shields Avenue, Davis, California 95616, or on–line at http://www.ipm.ucdavis.edu; or
- (h) The use of personal protective equipment consistent with the exceptions and substitutions in section 6738.

"Continuous monitoring" means the measurement of the air concentration of a specific pesticide on an uninterrupted, real-time basis by instrumental methods.

"Course" means any course, class, or program offered by a provider of continuing education approved pursuant to section 6512.

"Coverall" means a one—or two—piece garment of closely woven fabric or equivalent that covers the entire body, except the head, hands, and feet, and must be provided by the employer as personal protective equipment. Coverall differs from, and should not be confused with, work clothing that can be required to be provided by the employee.

"Display" means to make information available to the employee so that he or she may readily see and read the document, during normal business hours, without having to make a specific request of any person. An employee shall not be hindered or impeded from examining documents required to be displayed. This definition does not preclude using a binder or filing cabinet, that otherwise meets these criteria, to contain documents for display.

"Dormant insecticide" means petroleum distillates, petroleum hydrocarbons, unclassified petroleum oils, and mineral oils with the addition of other insecticides—or other insecticides used alone—that are used for pest control and applied to deciduous plants.

"Dormant oil" means petroleum distillates, petroleum hydrocarbons, unclassified petroleum oils, and mineral oils that are used for pest control and applied to deciduous plants.

"Early entry" means entry into a treated field or other area after the pesticide application is complete, but before the restricted entry interval or other restrictions on entry for that pesticide have expired.

"Employee" means any person who, for any kind of compensation, performs work, services, or activities covered by this division.

"Employer" means any person who exercises primary direction and control over the work, services, or activities of an employee. A foreman, crew leader, supervisor, or similarly situated person represents the employer when hiring an employee or when exercising, or having responsibility for exercising, the primary direction and control, but is not considered the employer himself or herself.

"Enclosed cab" means a chemical resistant barrier that completely surrounds the occupant(s) of the cab and meets those portions of the requirements in American Society of Agricultural Engineers Standard S–525 (Rev. 5/98) that pertain to dermal protection.

"Enclosed cab acceptable for respiratory protection" means an enclosed cab that incorporates a dust/mist filtering and/or a vapor or gas removing air purification system, as appropriate for the exposure situation. Enclosed cabs certified by the manufacturer as meeting American Society of Agricultural Engineers Standard S–525 (Rev. 5/98) are acceptable under this definition. The Director may, upon request, approve other enclosed cabs as acceptable under this definition.

"Engineered rights-of-way" means areas within a ground water protection area that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

"Evapotranspiration" is the combination of water transpired from vegetation and evaporated from the soil and plant surfaces. Evapotranspiration data can be obtained from the California Irrigation Management Information System (CIMIS) or other local sources.

"Examination" means written examination.

"Feasible" means capable of being accomplished in a successful manner, within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

"Feasible alternatives" means other chemical or non-chemical procedures which can reasonably accomplish the same pest control function with comparable effectiveness and reliability, taking into account economic, environmental, social, and technological factors and timeliness of control.

"Feasible mitigation measure" means a condition attached to the approval of an activity which, if implemented, would substantially reduce

any adverse impact, taking into account economic, environmental, social, and technological factors and timeliness of control.

"Field" means any area (including a greenhouse) upon which one or more agricultural plant commodities (including forest and nursery products) are grown for commercial or research production. Field does not include range or pasture harvested by grazing animals.

"Field capacity" is the amount of water remaining in soil when the downward water flow due to gravity becomes negligible.

"Fieldworker" means any person who, for any kind of compensation, performs cultural activities in a field. Fieldworker does not include persons performing tasks as a crop advisor, including field checking or scouting, making observations of the well being of the plants, or taking samples, nor does it include local, state, or federal officials performing inspection, sampling, or other similar official duties.

"Filter or air purifying element" means a component used in respirators to remove solid or liquid aerosols from the inspired air.

"Filtering facepiece (dust mask)" means a negative pressure particulate respirator with a filter as an integral part of the facepiece or with the entire facepiece composed of the filtering medium.

"Fumiscope®" is a monitoring instrument that measures the concentration of methyl bromide inside a structure in ounces per 1,000 cubic feet. (The analytical detection limit of a Fumiscope® is 250 parts per million [ppm]).

"Greenhouse" means a structure or space, of sufficient size to permit entry, that is enclosed with a nonporous covering and used in the commercial or research production of an agricultural plant commodity. The term includes, polyhouses, mushroom houses, rhubarb houses and similar structures.

"Ground-based application equipment" means equipment such as:

- (a) Hand sprayers
- (b) Backpack sprayers
- (c) Air-blast sprayers
- (d) Field soil injection equipment
- (e) Dusters
- (f) Drills
- (g) Granular applicators
- (h) Ground-rig sprayers

"Ground water protection area" means an area of land that has been determined by the Director to be vulnerable to the movement of pesticides to ground water, as identified in the Department of Pesticide Regulation document EH03-05 (Est. 08/03), hereby incorporated by reference, entitled "Ground Water Protection Areas," in Appendix I. The determination of a ground water protection area is based on factors, such as soil type, climate, and depth to the ground water, that are characteristic of areas where legally applied pesticides or their breakdown products have been detected and verified in ground water.

"Hand labor" means any cultural activity, performed by hand or with hand tools, that causes substantial contact with surfaces (such as plants or soil) that may have pesticide residues. These activities include hand harvesting, detasseling, thinning, hand weeding, topping, planting, sucker removal, pruning, disbudding, roguing, and packing produce into containers in the field. Hand labor does not include operating, moving, or repairing irrigation equipment or performing the duties of a crop advisor, field checker, or scout, making observations of the well being of the plants, or taking samples.

"Handle" means mixing, loading, transferring, applying (including chemigation), or assisting with the application (including flagging) of pesticides, maintaining, servicing, repairing, cleaning, or handling equipment used in these activities that may contain residues, working with opened (including emptied but not rinsed) containers of pesticides, adjusting, repairing, or removing treatment site coverings, incorporating (mechanical or watered—in) pesticides into the soil, entering a treated area during any application or before the inhalation exposure level listed on pesticide product labeling has been reached or greenhouse ventilation criteria have been met, or performing the duties of a crop advisor, includ-

ing field checking or scouting, making observations of the well being of the plants, or taking samples during an application or any restricted entry interval listed on pesticide product labeling. Handle does not include local, state, or federal officials performing inspection, sampling, or other similar official duties.

"Home use" means use in a household or its immediate environment.

"Human Participant" means a living person who participates in a human pesticide exposure study conducted in order to obtain (1) data through intervention or interaction with the participant, or (2) identifiable private information. Intervention, as used in this definition, includes both physical procedures by which data are gathered and manipulations of the participant or the participant's environment that are performed for research purposes. Interaction, as used in this definition, includes communication or interpersonal contact between the investigator and human participant. Private information, as used in this definition, includes information about behavior that occurs in a context in which a participant can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by a participant and which the participant can reasonably expect will not be made public. Private information must be individually identifiable in order for the acquisition of that information to constitute research involving human participants. Individually identifiable means that the identity of the participant is or may readily be ascertained by the investigator or associated with the information.

"Hydrologically isolated site" means any treated area that does not produce runoff capable of entering any irrigation or drainage ditch, canal, or other body of water.

"Immediately dangerous to life or health (IDLH)" means an atmosphere that poses an immediate threat to life, would cause irreversible adverse health effects, or would impair an individual's ability to escape from a dangerous atmosphere.

"Industrial use" means use for or in a manufacturing, mining or chemical process or use in the operation of factories, processing plants, and similar sites.

"Institutional Review Board (IRB)" means an objective committee whose purpose is to review protocols of human pesticide exposure studies to ensure the safety and general welfare of the human participants, and to guarantee that their human rights are not violated. The Institutional Review Board shall meet the requirements as specified in Title 40 Code of Federal Regulations, (Protection of the Environment), Part 26, (Protection of Human Subjects), when conducting a review of a protocol.

"Institutional use" means use within the confines of, or on property necessary for the operation of buildings such as hospitals, schools, libraries, auditoriums and office complexes.

"Leaching ground water protection areas" are sections of land designated as "leaching" in the Department of Pesticide Regulation document EH03–05 (Est. 08/03), hereby incorporated by reference, entitled "Ground Water Protection Areas," where pesticide residues move from the soil surface downward through the soil matrix with percolating water to ground water.

"Medical supervision" means occupational health guidance and necessary associated health evaluation by a physician licensed to practice medicine.

"Net irrigation requirement" is the amount of water needed to bring the soil in the crop root zone to field capacity at the time of irrigation. It can be determined by direct measurements of soil moisture, such as by using tensiometers, or indirect measurements of soil moisture, such as by estimating evapotranspiration that has accumulated since the last irrigation.

"Notice of Intent" means oral or written notification to the commissioner, as specified by the commissioner, prior to the use of a pesticide pursuant to a permit.

"Nursery" means any operation engaged in the outdoor commercial or research production of cut flowers or ornamental cut greens or any plants that will be used in their entirety in another location.

"Operator of the property" means a person who owns the property and/ or is legally entitled to possess or use the property through terms of a lease, rental contract, trust, or other management arrangement. "Organophosphates" means organophosphorus esters which inhibit cholinesterase.

"Ozone nonattainment area" means an area designated in Title 40, Code of Federal Regulations section 81.305 for the purpose of air quality planning within the chart titled "California — Ozone (1–Hour Standard)."

"Person" means any individual, partnership, association, corporation, business entity or organized group of persons whether incorporated or not.

"Personal protective equipment" (PPE) means apparel and devices worn to minimize human body contact with pesticides or pesticide residues that must be provided by an employer and are separate from, or in addition to, work clothing. PPE may include, chemical resistant suits, chemical resistant gloves, chemical resistant footwear, respiratory protection devices, chemical resistant aprons, chemical resistant headgear, protective eyewear, or a coverall (one— or two—piece garment).

"Pest management guides" are manuals prepared by the Department or University of California that include pest management information on specific crops and which have been adopted as a standard by the director.

"Pesticide" means:

- (a) any substance or mixture of substances that is a pesticide as defined in the Food and Agricultural Code and includes mixtures and dilutions of pesticides.
- (b) as the term is used in Section 12995 of the Food and Agricultural Code, includes any substance or product that the user intends to be used for the pesticidal poison purposes specified in Sections 12753 and 12758 of the Food and Agricultural Code.

"Pesticide exposure study" means

- (a) A data gathering project that meets one or more of the following criteria:
- (1) Human participants are to be directly exposed to the pesticide for the purpose of determining its pharmacokinetics or pharmacodynamics;
- (2) Human participants are monitored and the use of the pesticide is not consistent with current accepted labeling or current regulations;
- (3) Humans are exposed as the result of a contrived application in order to monitor exposure without routine pest control being a significant objective:
- (4) Human participants are monitored for the purpose of satisfying initial or continuing registration requirements of the U.S. Environmental Protection Agency or the Department; or
- (5) Human participants are monitored to develop or contribute knowledge of pesticide exposure to be generalized to other populations.
 - (b) "Pesticide exposure study" does not include the following:
- (1) Data collected for the purpose of satisfying an existing health standard for exposure monitoring or if it is understood that routine monitoring is a condition of employment;
- (2) Unscheduled monitoring of persons in response to a medical emergency to identify possible sources of exposure;
- (3) Monitoring conducted by a government agency or by an employer, to determine the workplace exposure of his or her employees.
- (4) Monitoring requested by an individual or group of individuals to determine personal exposure levels.
- (5) The analysis or evaluation, after the human participant involvement has ceased, of existing or previously collected data, documents, records, specimens, or samples, if these sources are publicly available or if the information is recorded by the study director in such a manner that the human participants cannot be identified, directly or through identifiers linked to the participants.

"Pesticide safety information series" means a series of leaflets that summarize health and safety aspects of various pesticides and groups of pesticides.

"Pesticides in toxicity category one" means pesticide products which are required to prominently display the signal word "DANGER" on the label.

"Pesticides in toxicity category two" means pesticide products which are required to prominently display the signal word "WARNING" on the label.

"Physician or other licensed health care professional (PLHCP)" means an individual whose legally permitted scope of practice allows him or her to independently provide, or be delegated the responsibility to provide, some or all of the health care services required by these regulations

"Private applicator" means:

(a) an individual who uses or supervises the use of a pesticide for the purpose of producing an agricultural commodity on property owned, leased, or rented by him/her or his/her employer; or

(b) a householder who uses or supervises the use of a pesticide, outside the confines of a residential dwelling for the purpose of controlling ornamental, plant or turf pests on residential property owned, leased, or rented by that householder.

"Qualified applicator certificate holder" means a person who has qualified by examination in one or more pest control categories to supervise pesticide applications. However, such qualification shall not entitle the holder to supervise the operations of a pest control business licensed pursuant to section 11701 of the Food and Agricultural Code, except as provided in section 11704.

"Qualified applicator licensee" means a person who has qualified by examination in one or more pest control categories to supervise the pesticide applications made by a pest control business licensed pursuant to sections 11701 to 11709, inclusive, of the Food and Agricultural Code, and who is responsible for safe and legal operations under such license.

"Qualitative fit test (QLFT)" means a pass/fail fit test to assess the adequacy of respirator fit that relies on the individual's response to the test agent.

"Quantitative fit test (QNFT)" means an assessment of the adequacy of respirator fit by numerically measuring the amount of leakage into the respirator.

"Regularly handle" means that the employee is handling pesticides during any part of the day for more than 6 calendar days in any 30 consecutive day qualifying period beginning on the first day of handling. Any day spent or loading pesticides while exclusively using a closed system or mixing only pesticides sealed in water–soluble packets is not included for any employee who has a baseline blood cholinesterase level established pursuant to section 6728(c)(1).

"Respirator program administrator" is a person who is qualified by appropriate training or experience that is commensurate with the complexity of the respiratory protection program, and demonstrates knowledge necessary to administer a respiratory protection program. Such training or experience includes, but is not limited to, reading and understanding either the American National Standard for Respiratory Protection Publication (ANSI Z88.2), or the U.S. Department of Labor's "Small Entity Compliance Guide for the Revised Respiratory Protection Standard"; or taken specific course work on developing a respiratory protection program from a college or a respirator manufacturer's authorized representative; or is an American Board of Industrial Hygiene Certified Industrial Hygienist.

"Restricted entry interval" (REI) means the period of time after a field is treated with a pesticide during which restrictions on entry are in effect to protect persons from potential exposure to hazardous levels of residues. An REI may be found on pesticide product labeling or in regulation.

"Runoff ground water protection areas" are sections of land designated as "runoff" in the Department of Pesticide Regulation document EH03–05 (Est. 08/03), hereby incorporated by reference, entitled "Ground Water Protection Areas," where pesticide residues are carried in runoff water to more direct routes to ground water such as dry or drainage wells, poorly sealed production wells, or soil cracks, or to areas where leaching can occur.

"Sensitive aquatic site" means any irrigation or drainage ditch, canal, or other body of water in which the presence of dormant insecticides could adversely impact any of the beneficial uses of the waters of the state specified in Water Code section 13050(f).

"Site specific" means a pesticide permit that identifies the specific area to be treated, the size of that area, and the commodity(ies) or site(s) on that area to be treated.

"Solicits services or sales," as used in section 11410 of the Food and Agricultural Code, means sells or offers for sale any pesticide, method, or device outside of a fixed place of business.

"Structural use" means a use requiring a license under chapter 14 (commending with section 8500), division 3 of the Business and Professions Code.

"Study director" means the individual responsible for the overall conduct of a research project.

"Substantial Drift" means the quantity of pesticide outside of the area treated is greater than that which would have resulted had the applicator used due care. This definition is applicable to section 12972 of the Food and Agricultural Code and section 6614 of title 3, California Code of Regulations.

"Time specific" means a pesticide permit that specifies the date the intended application is to commence or permit with a notice of intent requirement. The pesticide use may commence within four days following such date if delays are caused by uncontrollable conditions such as adverse weather or unavailability of equipment. The commissioner shall require a notice of intent from either the grower, the grower's authorized representative, or the pest control business when necessary to make the permit time and site specific.

"Treated field" means a field that has been treated with a pesticide or had a restricted entry interval in effect within the last 30 days. A treated field includes associated roads, paths, ditches, borders, and headlands, if the pesticide was also directed to those areas. A treated field does not include areas inadvertently contaminated by drift or over spray.

"Use" means any pesticide related activity including:

- (a) Pre-application activities, including;
- (1) Arranging for the application;
- (2) Mixing or loading; and
- (3) Making necessary preparations for the application, including responsibilities related to notification, handler training, decontamination facilities, use and care of personal protective equipment, medical monitoring and assistance, and heat stress management;
 - (b) Application of the pesticide;
 - (c) Post-application activities, including;
- (1) Control of the treated area to reduce exposure, including responsibilities for restricted entry intervals, warnings, decontamination facilities, medical assistance, and fieldworker training;
- (2) Management of the treated area, crop, or crop by–products, including responsibilities for preharvest intervals and plant back restrictions;
- (3) Transportation, storage, and disposal of excess pesticides, spray mix, equipment wash water, and pesticide containers; and
- (4) Cleaning of application equipment and other pesticide containing materials.
 - (d) Use does not include:
- (1) Activities where involvement is only incidental to other tasks such as emergency responders providing incident management, commercial transportation of pesticide related waste for disposal or recycling, or a waste disposal or recycling facility accepting or handling these wastes; or
- (2) Manufacturing, formulating, or packaging (including bulk repackaging) by a registered pesticide producing establishment.

"Veterinarian" means a person licensed to practice veterinary medicine in California.

"Volatile organic compound (VOC)" means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, that participates in atmospheric photochemical reactions. This includes any organic compound other than those exempted by the U.S. Environmental Protection Agency pursuant to Title 40 of the Code of Federal Regulations section 51.100.

"Weed oil" means a pesticide, the label of which states that the product may be used, by itself, to control weeds, and which contains 70% or more of the following active ingredients, petroleum hydrocarbons, mineral oil, petroleum oil, petroleum distillates, and/or aromatic petroleum distil-

"Work clothing" means garments such as long-sleeved shirts, shortsleeved shirts, long pants, short pants, shoes, and socks. Work clothing is not considered personal protective equipment although pesticide product labeling or regulations may require specific work clothing during some activities. Work clothing differs from and should not be confused with a coverall. While coveralls shall be provided by the employer, work clothing can be required to be provided by the employee. Short sleeved shirts and short pants are considered acceptable work clothing only under conditions expressly permitted by pesticide product labeling.

HISTORY

- 1. Change without regulatory effect repealing section and adopting new section filed 10-12-93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 42). For prior history, see Register 92, No. 5.
- 2. New definition "Economic poison" filed 9-23-94; operative 10-24-94 (Regis-
- New definition "Pesticide exposure study" and amendment of Note filed 5–26–95; operative 6–26–95 (Register 95, No. 21).
 New definitions for "Assure," "Chemical resistant," "Chemigation," "Coverall," "Display," "Early entry," "Enclosed cab acceptable for respiratory protection," "Fieldworker," "Greenhouse," "Hand labor," "Nursery," "Treated field," tion, "Fieldworker," "Greenhouse," "Hand labor," "Nursery," "Treated field," and "Use," and amendment of definitions for "Commercial applicator," "Employee," "Employer," "Enclosed cab," "Field," "Handle," "Personal protective equipment," "Private applicator," "Restricted entry interval" and "Work clothing" and amendment of Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

 5. Change without regulatory effect repealing definition of "Economic poison" and amending definitions of "Pesticide" and "Weed oil" filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

 6. Amendment of definitions of "Conflict of labeling," "Enclosed cab" and "En-
- Amendment of definitions of "Conflict of labeling," "Enclosed cab" and "Enclosed cab acceptable for respiratory protection" filed 5–10–99; operative
- closed cab acceptable for respiratory protection. The distribution of September 19, No. 20).

 7. New definition for "Fumiscope" and amendment of Note filed 8–15–2000; operative 9–14–2000 (Register 2000, No. 33).

 8. Repealer of definition "Authorized representative," amendment of definitions are discrete." "Operator of the property" and "Private appli-8. Repealer of definition "Authorized representative, amendment of definitions "Certified private applicator," "Operator of the property" and "Private applicator," new definitions "Course" and "Person" and amendment of Note filed 10–20–2000; operative 11–19–2000 (Register 2000, No. 42).

 9. New definitions of "Application block" and "Buffer zone" filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).
- 10. Change without regulatory effect amending regulatory definitions of "Enclosed cab" and "Enclosed cab acceptable for respiratory protection" and repealing regulatory definition of "Restricted materials hazard chart" filed 3-8-2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 10).
- New definitions of "Ethical review," "Human participant," "Institutional Review Board (IRB)" and "Study director" and amendment of definition of "Pes-(Register 2002, No. 29). A Certificate of Compliance must be transmitted to OAL by 11–15–2002 or emergency language will be repealed by operation of law on the following day.
- 12. Repealer and new definitions of "Application block" and "Buffer zone" filed 9–19–2002 as an emergency; operative 9–22–2002 (Register 2002, No. 38). A Certificate of Compliance must be transmitted to OAL by 1–21–2003 or emergency language will be repealed by operation of law on the following day.

 13. New definitions of "Ethical review," "Human participant," "Institutional Re-
- ticide exposure study" refiled 11–7–2002 as an emergency, operative 11–15–2002 (Register 2002, No. 45). A Certificate of Compliance must be transmitted to OAL by 3-17-2003 or emergency language will be repealed by
- operation of law on the following day.

 14. Repealer and new definitions of "Application block" and "Buffer zone" refiled 1–21–2003 as an emergency; operative 1–21–2003 (Register 2003, No. 4). A Certificate of Compliance must be transmitted to OAL by 5-21-2003 or
- emergency language will be repealed by operation of law on the following day. 15. Certificate of Compliance as to 11–17–2002 order, including repealer of definition of "Ethical review" and further amendment of definitions of "Institutional Review Board" and "Pesticide exposure study," t 3–17–2003 and filed 4–24–2003 (Register 2003, No. 17). " transmitted to OAL
- 16. Repealer and new definitions of "Application block" and "Buffer zone" refiled 5–19–2003 as an emergency; operative 5–21–2003 (Register 2003, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-18-2003 or emer-
- gency language will be repealed by operation of law on the following day.

 17. Repealer and new definitions of "Application block" and "Buffer zone" refiled 9–11–2003 as an emergency; operative 9–18–2003 (Register 2003, No. 37). A Certificate of Compliance must be transmitted to OAL by 1-16-2004 or emergency language will be repealed by operation of law on the following day.

- 18. Repealer and new definitions of "Application block" and "Buffer zone" refiled 1-14-2004 as an emergency; operative 1-17-2004 (Register 2004, No. 3). A Certificate of Compliance must be transmitted to OAL by 5-17-2004 or emergency language will be repealed by operation of law on the following day.

 19. Repealer of definition of "Groundwater protection advisory" and new defini-
- tions of "Artificial recharge basin," "Engineered rights-of-way," "Evapotranspiration," "Field capacity," "Ground water protection area," "Leaching ground water protection areas," "Net irrigation requirement" and "Runoff ground water protection areas" and amendment of Note filed 4-27-2004; operative 27-2004 (Register 2004, No. 18).
- 20. Repealer and new definitions of "Application block" and "Buffer zone" refiled 5-17-2004 as an emergency; operative 5-18-2004 (Register 2004, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-15-2004 or emergency language will be repealed by operation of law on the following day.
- 21. Repealer and new definitions of "Application block" and "Buffer zone" refiled 9–9–2004 as an emergency; operative 9–15–2004 (Register 2004, No. 37). A Certificate of Compliance must be transmitted to OAL by 1-13-2005 or emergency language will be repealed by operation of law on the following day.
- 22. Certificate of Compliance as to 9–15–2004 order, including further amendment of definitions of "Application block" and "Buffer zone," transmitted to OAL 9-21-2004 and filed 11-3-2004 (Register 2004, No. 45).
 23. New definitions of "Dormant oil," "Dormant insecticide," "Hydrologically
- isolated site" and "Sensitive aquatic site" filed 7-18-2006; operative 8-17-2006 (Register 2006, No. 29).
- 24. New definitions of "Air-purifying respirator," "Atmosphere-supplying respirator," "Confidential reader," "Filter or air purifying element," "Filtering facepiece (dust mask)," "Immediately dangerous to life or health (IDLH)," "Physician or other licensed health care professional (PLHCP)," "Qualitative fit test (QLFT)," "Quantitative fit test (QNFT)" and "Respirator program administrator" filed 6–13–2007; operative 1–1–2008 (Register 2007, No. 24).
- 25. Amendment of definition of "Buffer zone" and new definitions of "Ozone nonattainment area" and "Volatile organic compound (VOC)" filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

- Change without regulatory effect repealing section filed 10–12–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 42).

Subchapter 2. Program Certification

Article 1. Purpose

§ 6100. Purpose.

§ 6000.6

- (a) This article provides for the submittal of the pesticide regulatory program to the Secretary of Resources for certification. This article is contingent on certification of the pesticide regulatory program by the Secretary of the Resources Agency and shall expire if and when the pesticide regulatory program is not certified. The submittal for certification under Section 21080.5 of the Public Resources Code provides for environmental review of the pesticide regulatory program which is to be achieved in view of the findings of the Legislature in Section 1, Chapter 308, Statutes 1978, which are as follows:
- (1) Agriculture is a major and essential component of California's economy.
- (2) The proper, safe, and efficient use of pesticides is essential for the protection and production of agricultural commodities and for health protection.
- (3) Timeliness in the application of pesticides is paramount in good pest management and is essential in the prevention of economic waste.
- (4) Reasonable environmental review of such pesticide use is prudent and appropriate.
- (5) Individual permits to apply pesticides must often be issued on short notice, thereby making impracticable the type of environmental review which would occur if the issuance of such permits was subject to the preparation of an environmental impact report or a negative declaration pursuant to the requirements of Division 13 of the Public Resources Code.
- (6) Preparation of environmental impact reports and negative declarations for pesticide permits would be an unreasonable and expensive burden on California agriculture and health protection agencies.
- (7) For the purposes of this article any county agricultural commissioner shall be considered a state agency. Under authority of the Food and Agricultural Code, each commissioner shall administer the local enforcement of the pesticide regulatory program under the supervision of the director.
- (8) The procedures for governmental review of pesticide recommendations and use shall not unnecessarily burden permit applicants or require such applicants to furnish unnecessary information.
- (b) This section and Sections 6122, 6408, 6410, 6422, 6424, 6426, 6428, 6430, 6432, 6434 and 6436 shall expire if and when the department's pesticide regulatory program is not certified pursuant to Section 21080.5 of the Public Resources Code.

NOTE: Authority cited: Sections 11456, 12781 and 14005, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code; and Chapter 308, Statutes of 1978.

HISTORY

- I. Editorial renumbering and amendment of former Section 2441 to Section 6100(a) and renumbering and amendment of former Section 2452(k) to Section 6100(b) filed 8-13-85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6102. Severance.

If any provision of division 4, chapter 1 subchapter 2, articles 4, 5, 7, 11 and 20 or division 6, chapter 2, subchapter 4 or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions of the cited articles or application of the articles which can be given effect without the invalid provision or application, and to this end the provisions of the cited articles are severable.

NOTE: Authority cited: Sections 11456, 12781, 12981 and 14005, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code; and Chapter 308, Statutes of 1978.

HISTORY

- 1. Editorial renumbering and amendment of former section 2490.3 to section 6102 filed 8–13–85 (Register 85, No. 33).
- 2. Editorial correction of printing error (Register 91, No. 33)
- 3. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 2. Standards

§ 6110. Public Reports.

- (a) When the director proposes to amend, adopt, or repeal a standard or regulation of the pesticide regulatory program or is reviewing a county regulation pursuant to Section 11503 of the Food and Agricultural Code, a public report shall be prepared allowing 45 days for the public to review each proposal. The public report shall be posted on the official bulletin boards of the Department, and of each commissioner's office, and in each District office of the Division of Pest Management, Environmental Protection and Worker Safety for 45 days. "Standard," as used in this article, means pest management guidelines, restricted materials hazard chart, pesticide safety information series, and similar documents.
- (1) Each public report shall include a summary of the proposal and shall be sent to any person upon written request. In addition, the public agencies to be consulted pursuant to Section 6252 shall be sent a copy of the public report. The director may develop a schedule of actual cost for the reproduction of public reports to be charged to those requesting copies.
- (2) Each public report shall describe the activities of the pesticide regulatory program that will be affected by the proposal and a summary of existing statutes related to the proposal.
- (3) Each public report shall include a statement of any significant adverse environmental effect that can reasonably be expected to occur, directly or indirectly, from implementing the proposal, and a statement of any reasonable mitigation measures that are available to minimize significant adverse environmental impact.
- (4) Each public report shall also contain a statement and discussion of reasonable alternatives which would reduce any significant environmental impact
- (5) The availability of the public report shall be noted in any notices of any proceeding on the proposal.
- (b) The evaluation of proposed changes shall follow any hearing or other consultation with the public, and the director shall consider all applicable factors including the following in evaluating the proposal:
- (1) The adequacy of the proposal in achieving the purposes of the pesticide regulatory program as provided in Section 11501 of the Food and Agricultural Code.
- (2) The consistency of the proposal with the intent and provisions of Section 21080.5 of the Public Resources Code.

NOTE: Authority cited: Sections 11456, 12781 and 14005, Food and Agricultural Code. Reference: Section 21080.5, Public Resources Code; and Sections 11501 and 11503, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2444(a) and (b) to Section 6110 filed 8-13-85 (Register 85, No. 33).
- 2. Amendment filed 1–18–89; operative 2–17–89 (Register 89, No. 5).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6116. Notice of Final Decision.

- (a) (1) The final action taken regarding a standard or regulation in which a significant adverse environmental point was raised during the evaluation process shall include a written evaluation of such points approved by the director.
- (2) The director shall not adopt a standard or regulation which would cause a significant adverse environmental impact if there is a feasible alternative or feasible mitigation measure available which would substantially lessen any significant adverse impact which implementation of the proposal may reasonably be expected to have on the environment.
- (b) After adopting a standard or regulation affecting the pesticide regulatory program, the director shall file a Notice of Decision with the Secre-

Page 364

tary of the Resources Agency for posting. The notice shall be available for public inspection, and remain posted for a period of 30 days at the Resources Agency.

NOTE: Authority cited: Sections 11456, 12781, 12981 and 14005, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2444(c) and (d) to Section 6116 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6118. Emergency Actions.

The director shall prepare a public report on proposed emergency standards or regulations relative to the pesticide regulatory program. Insofar as possible, each report shall be available in advance of the emergency adoption of proposed standards or regulations. Comments from the general public and public agencies shall be solicited pursuant to the Administrative Procedure Act.

NOTE: Authority cited: Sections 11456, 12781 and 14005, Food and Agricultural Code. Reference: Section 14103, Food and Agricultural Code; and Chapter 308, Statutes of 1978.

HISTORY

- 1. Editorial renumbering of former Section 2444(e) to Section 6118 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 3. Consultation

§ 6122. Commissioner Consultation.

(a) At least quarterly and when notified by a responsible public agency of a violation of an applicable environmental standard, each commissioner shall consult with public agencies that have jurisdiction by law with respect to resources that may be affected by use of pesticides in the county. Such public agencies include, but are not limited to, agencies that are concerned with public and occupational health, air and water quality, fish and wildlife.

The consultation shall include the identification of past or potential problems associated with the use of pesticides, appropriate alternatives and mitigation measures, and appropriate permit conditions which substantially reduce any problem.

(b) The commissioner shall consult with the County Farm Advisor or other knowledgeable persons during critical pest control seasons in order to keep abreast of current pest conditions in the county. Such consultation shall be utilized to establish information to assist the evaluation of permit applications and notices of intent to apply a pesticide.

NOTE: Authority cited: Sections 11456, 12781, 12981 and 14005, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code; and Chapter 308, Statutes of 1978.

HISTORY

- Editorial renumbering of former Section 2445 to Section 6122(a) and renumbering of former Section 2452(j)(11) to Section 6122(b) filed 8-13-85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Subchapter 3. Agricultural Commissioner Penalties

Article 1. Guidelines

§ 6128. Enforcement Response.

- (a) The commissioner shall comply with the provisions of this section each time a violation(s) of law or regulation related to pesticide use occurs to determine the appropriate enforcement response.
- (b) For purposes of this section, the following terms are defined as follows:

"Compliance action" is an action that documents that certain behavior or an act is in violation of the law or regulations. The documentation may or may not allege the recipient committed the violation at issue. Compliance actions do not directly impose a monetary penalty. Compliance

actions include violation notice; warning letter; documented compliance interview; or noncompliance noted on an inspection form. Compliance actions also include public protection actions such as cease and desist orders; seize or hold product or produce orders; and prohibit harvest orders.

"Decision report" is a written explanation and record of a commissioner decision, not to take an enforcement action.

"Enforcement action" is an action with the potential to impose a monetary penalty or loss of a right or privilege initiated by a Notice of Proposed Action. Enforcement actions include administrative civil penalty; or disciplinary action (refuse, suspend, or revoke) against a county registration, certificate, or permit.

- (c) In addition to determining the violation class specified in Title 3, California Code of Regulations section 6130 or Title 16, California Code of Regulations section 1922, the commissioner shall respond to each violation(s) with one or more of the following enforcement responses listed below as appropriate to that violation class.
 - (1) Class A or Serious Violation Enforcement Response.
- (A) A formal referral to the District Attorney, City Attorney, or Circuit Prosecutor, or referral to the Director or Structural Pest Control Board Registrar for a statewide licensing action or Attorney General action; or
 - (B) An enforcement action.
 - (2) Class B or Moderate Violation Enforcement Response.
- (A) A formal referral to the District Attorney, City Attorney, or Circuit Prosecutor, or referral to the Director or Structural Pest Control Board Registrar for a statewide licensing action or Attorney General action; or
 - (B) An enforcement action; or
- (C) A compliance action with a decision report, provided there has not been a compliance action for a violation in the same class within two years of the current alleged violation. In some instances, a compliance action may be taken in addition to the enforcement response in (2)(A) or (B), in which case a decision report is not required.
 - (3) Class C or Minor Violation Enforcement Response.
 - (A) An enforcement action; or
- (B) A compliance action with a decision report when there has been a compliance action for a violation in the same class within two years of the current alleged violation; or
- (C) A compliance action without a decision report, provided there has not been a compliance action for a violation in the same class within two years of the current alleged violation.
- (d) If a decision report specified in subsections (c)(2)(C) and (c)(3)(B) is required, the commissioner shall submit the decision report to the Director, within 30 days of the date of the compliance action, for concurrence. If the Director does not concur with the commissioner's decision, the Director shall notify the commissioner within 30 days of the receipt of the decision report with the specific reasons for denial, and an enforcement action shall be taken by the commissioner. The commissioner shall retain a copy of the decision report for two years. A decision report shall contain:
 - (1) The identification of the respondent or case;
 - (2) Description of the incident or act;
 - (3) Section(s) violated;
- (4) The violation class pursuant to Title 3, California Code of Regulations section 6130 or Title 16, California Code of Regulations section 1922;
 - (5) Basis for not taking an enforcement action;
 - (6) Date of decision; and
 - (7) Signature of the Agency official responsible for the decision.
- (e) In the case of a priority investigation, as defined in the 2005 Cooperative Agreement, dated April 2005, between the California Department of Pesticide Regulation, the California Agricultural Commissioners and Sealers Association, and the U.S. Environmental Protection Agency, Region IX, the commissioner shall provide an opportunity to the District Attorney, City Attorney, or Circuit Prosecutor to participate in the investigation and/or pursue a civil or criminal action when a violation may have occurred.

NOTE: Authority cited: Sections 2281, 11456, 12781, 12976 and 15203, Food and Agricultural Code. Reference: Sections 11892, 12996, 12997, 12999.5 and 15202, Food and Agricultural Code.

HISTORY

1. New section filed 11-30-2006; operative 11-30-2006 pursuant to Government Code section 11343.4 (Register 2006, No. 48).

§ 6130. Civil Penalty Actions by Commissioners.

- (a) When taking civil penalty action pursuant to section 12999.5 of the Food and Agricultural Code, county agricultural commissioners shall use the provisions of this section to determine the violation class and the
- (1) For purposes of this article, violations shall be designated as "Class A," "Class B," and "Class C."
- (A) Class A: Violations which created an actual health or environmental hazard, violations of a lawful order of the commissioner issued pursuant to sections 11737, 11737.5, 11896, or 11897 of the Food and Agricultural Code, or violations that are repeat Class B violations. The fine range for Class A violations is \$700-\$5,000.
- (B) Class B: Violations which posed a reasonable possibility of creating a health or environmental effect or violations that are repeat Class C violations. The fine range for Class B violations is \$250-\$1,000.
- (C) Class C: Violations that are not defined in either Class A or Class B. The fine range for Class C violations is \$50-\$400.
- (2) A violation shall be classified as a repeat violation, if it occurs within two years of a violation for which a civil penalty was levied against that person in the same county and of the same class.
- (3) The person charged with a violation(s) shall be notified of the proposed fine action, including the amount of the proposed fine(s). When a penalty is proposed for a repeat violation, the Notice of Proposed Action shall identify the prior violation and the record of the proceedings shall include a copy of the decision regarding that prior violation. The commissioner shall send a copy of the notice to the Department at the same time the notice is provided to the person charged with a violation(s).
- (4) If the person against whom the commissioner levied a fine requested and appeared at the hearing offered by the commissioner, the commissioner's decision shall include information concerning the person's right to appeal the commissioner's decision to the Director.
- (5) The Department, on at least an annual basis, shall inform commissioners of violations for which fines have been levied.
- (b) When acting pursuant to Food and Agricultural Code section 12999.5 or Business and Professions Code section 8617, an agricultural commissioner may bring an action against an employed person who failed to utilize personal protective equipment or other safety equipment as required by section 6702(c) provided the commissioner determines that all of the following conditions are met:
- (1) The employed person is licensed or certified pursuant to Chapter 14, Division 3, of the Business and Professions Code; Chapters 5 or 8, Division 6, of the Food and Agricultural Code; or Chapters 3.4 or 3.6, Division 7, of the Food and Agricultural Code;
- (2) The employer provided the equipment to the licensee or certificate holder and the equipment was available at the work site in a condition that would have provided the safety or protection intended by the equipment;
- (3) The employer, through its written workplace disciplinary action policy, required the licensee or certificate holder to utilize the equipment;
- (4) The employer has complied with applicable training requirements of this Division prior to the time the licensee or certificate holder failed to utilize the equipment;
- (5) The employer supervised the licensee or certificate holder to assure that the equipment was properly used by the licensee; and
- (6) At the time of the licensee's or certificate holder's failure to utilize the equipment, the licensee or certificate holder has knowledge of the discipline that could be imposed under the employer's written workplace disciplinary action policy for failure to utilize the equipment.

HISTORY

- 1. New group 3 (article 1, section 6130) filed 10-16-86 pursuant to Stats. 1985, Ch. 943, Sec. 4; effective thirtieth day thereafter (Register 86, No. 42).
- 2. Amendment filed 12-27-90; operative 1-26-91 (Register 91, No. 4).
- 3. Amendment of section heading, section and NOTE filed 12-31-96; operative 1-1-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- 4. Change without regulatory effect amending subsection (b), adopting new subsection (b)(1), relettering subsections and amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001. No.
- 5. Amendment of subsections (a)(1)-(a)(1)(C) filed 4-26-2004; operative 5-26-2004 (Register 2004, No. 18).
- 6. Amendment of subsections (a)(1) and (a)(2), repealer of subsections (a)(2)(A)–(B) and amendment of subsection (a)(3) filed 11–30–2006; operative 11-30-2006 pursuant to Government Code section 11343.4 (Register 2006, No. 48).

Inspection and Investigation Subchapter 4. **Procedures**

Inspection, Copying and Article 1. Sampling

§ 6140. Inspection Authority.

- (a) The director or commissioner may, during business hours, or if necessary to ensure immediate compliance, at any other reasonable time enter and inspect, and/or sample any of the following or related items in order to determine compliance with the provisions of this chapter and Divisions 6 and 7 of the Food and Agricultural Code, which pertain to pesticides and pest control operations.
- (1) Fields, areas, structures, and greenhouses where pesticides are handled, stored or applied;
 - (2) Growing crops and harvested commodities;
- (3) Equipment (including protective clothing and equipment) used to store, transport or handle pesticides;
 - (4) Change areas and other facilities used by employees; and
 - (5) Pesticides and tank mixtures thereof.
- (b) Each person responsible, pursuant to the provisions of this chapter and Division 6 and 7 of the Food and Agricultural Code which pertain to pesticides and pest control operations, for preparing and maintaining records shall make those records available to the Director or commissioner during business hours upon demand of the Director or commissioner. The required records include:
- (1) records concerning work hours, training and medical monitoring
- (2) pest control recommendations and pesticide use and operations records; and
- (3) pesticide transaction, sales and delivery records.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 11456, 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 6708 to Section 6140 filed 9-26-88; operative 10-26-88 (Register 88, No. 41). For prior history, see Registers 86, No. 34 and 86, No. 31.
- 2. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6141. Employee Interviews.

The director or commissioner may confidentially interview any employee during work hours when reasonably necessary for an investigation of employee illness(s) suspected of having been caused by a pesticide or to investigate a suspected pesticide related safety violation. NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code.

Reference: Sections 11456, 12980 and 12981, Food and Agricultural Code. 1. New section filed 9-26-88; operative 10-26-88 (Register 88, No. 41).

Page 366

 Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Subchapter 5. Sunset Review of Regulations

Article 1. Sunset Review Schedule

§ 6142. Sunset Review of Regulations.

- (a) The Director shall review all regulations in Division 6 of Title 3 on a five-year cycle according to the following schedule:
- (1) Year one (commencing in 2000 and repeated every five years thereafter):

Chapter 1. Pesticide Regulatory Program, and Chapter 2. Pesticides, Subchapter 1;

(2) Year two: (commencing in 2001 and repeated every five years thereafter):

Chapter 2. Pesticides, Subchapters 2, 3, 4, and 5;

(3) Year three: (commencing in 2002 and repeated every five years thereafter):

Chapter 3. Pest Control Operations, Subchapters 1 and 2;

(4) Year four: (commencing in 2003 and repeated every five years thereafter):

Chapter 3. Pest Control Operations, Subchapter 3;

(5) Year five: (commencing in 2004 and repeated every five years thereafter):

Chapter 4. Environmental Protection.

(b) When determining whether a reviewed regulation should be retained, revised, or repealed, the Director will consult with the Secretary for Environmental Protection.

NOTE: Authority cited: Section 11456, Food and Agricultural Code. Reference: Section 11456, Food and Agricultural Code.

HISTORY

1. New subchapter 5 (article 1), article 1 (section 6142) and section filed 1–20–2000; operative 2–19–2000 (Register 2000, No. 3).

Chapter 2. Pesticides

Subchapter 1. Pesticide Registration

Article 1. General Provisions

§ 6145. Intended to Be Used.

A substance is considered to be "intended to be used," as the phrase is used in Sections 12753 and 12758 of the Food and Agricultural Code, and thus be a pesticide requiring registration, when:

- (a) A person who distributes or sells the substance claims, states, or implies, by labeling or otherwise, that:
- (1) the substance, either by itself or in combination with any other substance, can or should be used as a pesticide; or
- (2) the substance consists of or contains an active ingredient and can be used to manufacture a pesticide; or
- (b) A person who distributes or sells the substance has actual or constructive knowledge that the substance will be used, or is intended by the user to be used, as a pesticide; or
- (c) The substance consists of or contains one or more active ingredients and has no significant commercially valuable use as distributed or sold other than:
- (1) use as a pesticide, by itself or in combination with any other substance; or
 - (2) use in the manufacture of a pesticide.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 12753 and 12758, Food and Agricultural Code.

HISTORY

- 1. New section filed 9-23-94; operative 10-24-94 (Register 94, No. 38).
- Change without regulatory effect amending chapter heading, subchapter heading and section filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6146. Liquid Chemical Sterilants.

- (a) For purposes of this section, a "critical medical device" is any device that is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, and a "semicritical medical device" is any device that contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.
- (b) Manufacturers of, importers of, and dealers in liquid chemical sterilant products (including any such products with subordinate disinfectant claims) intended for use on critical or semicritical medical devices (as device is defined in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. sec. 321), are exempt from the requirements of Division 7 of the Food and Agricultural Code, providing the following criteria are met:
- (1) The product is not included in the federal definition of a pesticide under subdivision (u) of section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act [7 U.S.C. sec. 136(u)].
- (2) The product has premarket clearance from the Federal Food and Drug Administration under section 510(k) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. sec. 360(k)].
- (3) The product does not include ethylene oxide as an active ingredient
- (c) Whenever the manufacturer of, importer of, or dealer in any exempted liquid chemical sterilant has factual or scientific information of any adverse effect or risk to human health or the environment that has not previously been submitted to the department, the manufacturer, importer, or dealer shall report the information to the department within 60 days of learning of the information.
- (d) Physicians, surgeons, and local health officers remain subject to the illness reporting requirements of Health and Safety Code section 105200 with regard to exempted liquid chemical sterilants.

NOTE: Authority cited: Section 12804, Food and Agricultural Code. Reference: Section 12804, Food and Agricultural Code.

HISTORY

- New section filed 3-9-98 as an emergency; operative 3-9-98 (Register 98, No. 11). A Certificate of Compliance must be transmitted to OAL by 7-7-98 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 3–9–98 order, including amendment of subsections (a), (b)(1) and (b)(2) and new subsection (e), transmitted to OAL 7–1–98 and filed 8–12–98 (Register 98, No. 33).
- Repealer of subsection (e) filed 1–20–2000; operative 2–19–2000 (Register 2000, No. 3).

§ 6147. Exempted Pesticide Products.

- (a) Manufacturers of, importers of, and dealers in the following pesticide products or classes of pesticide products are exempt from the requirements of Division 7 of the Food and Agricultural Code, provided the pesticide products are exempt pursuant to section 25(b)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act [7 U.S.C. sec. 136w(b)(2)]:
- (1) Pheromones and identical or substantially similar compounds labeled for use only in pheromone traps (or labeled for use in a manner which the Director determines poses no greater risk of adverse effects on the environment than use in pheromone traps), and pheromone traps in which those compounds are the sole active ingredient(s), as specified in 40 Code of Federal Regulations 152.25(b).
 - (2) Preservatives for biological specimens, including:
 - (A) Embalming fluids;
- (B) Products used to preserve animal or animal organ specimens, in mortuaries, laboratories, hospitals, museums and institutions of learning; and
- (C) Products used to preserve the integrity of milk, urine, blood, or other body fluids for laboratory analysis.
- (3) Products consisting of foods that are used to attract pests and which contain no active ingredient(s).

Page 366.1

- (4)(A) Natural cedar blocks, chips, shavings, balls, chests, drawer liners, paneling, and needles that meet all of the following criteria:
 - 1. The product consists totally of cedar wood or natural cedar.
- 2. The product is not treated, combined, or impregnated with any additional substance(s).
- 3. The product bears claims or directions for use solely to repel arthropods other than ticks or to retard mildew, and no additional claims are made in sale or distribution. The labeling must be limited to specific arthropods, or must exclude ticks if any general term such as "arthropods," "insects," "bugs," or any other broad inclusive term is used.
- (B) The exemption does not apply to natural cedar products claimed to repel ticks. The exemption also does not apply to cedar oil, or formulated products which contain cedar oil, other cedar extracts, or ground cedar wood as part of a mixture.
 - (5)(A) Products containing the following active ingredients alone or

in combination with other substances listed in paragraph (5)(A), provided that all the criteria specified in paragraphs (5)(C) and (5)(D) are met:

Castor oil (U.S.P. or equivalent)

Cedar Oil1

Cinnamon

Cinnamon oil1

Citric acid1

Citronella (non-topical uses only)

Citronella oil (non-topical uses only)

Cloves²

Clove oil^{1, 2}

Corn gluten meal

Corn oil

[The next page is 367.]

Cottonseed oil

Dried blood

Eugenol^{1, 2}

Garlic

Garlic oil¹

 $Geraniol^2$

Geranium oil²

Lauryl sulfate¹

Lemongrass oil¹

Linseed oil

Malic acid1

Mint

Mint oil¹

Peppermint²

Peppermint oil^{1, 2}

2-Phenethyl propionate (2-phenylethyl propionate)¹

Potassium sorbate¹

Putrescent whole egg solids

Rosemary²

Rosemary oil^{1, 2}

Sesame (includes ground sesame plant)

Sesame oil

Sodium chloride (common salt)

Sodium lauryl sulfate^{1, 2}

Soybean oil

Thyme²

Thyme oil^{1, 2}

White pepper1

Zinc metal strips (consisting solely of zinc metal and impurities)

- 1 Products containing 8.5% or more of this active ingredient in the formulated product must at a minimum bear the signal word "CAUTION," the phrase "Keep Out of Reach of Children," appropriate precautionary language, and a requirement for appropriate protective eyewear and gloves.
- 2 Products containing this active ingredient intended for topical application to human skin must at a minimum bear the signal word "CAUTION," the phrase "Keep Out of Reach of Children," a dermal sensitization precautionary statement, a prohibition against application to the hands of children, and use directions requiring adult supervision during application to children.
- (B) Topical use products containing less than or equal to 1% of the following active ingredients alone or in combination with **each** other provided: (i) the product label carries as a minimum the signal word "CAUTION," the phrase "Keep Out Of Reach of Children," a dermal sensitization precautionary statement, a prohibition against application to the hands of children, and use directions requiring adult supervision during application to children, and (ii) all the criteria specified in paragraphs (5)(C) and (5)(D) are met:

Citronella

Citronella oil

- (C) A pesticide product exempt under paragraphs (5)(A) and (5)(B) of subsection (a) may include as inert ingredients only those substances listed in the U.S. Environmental Protection Agency's most current List 4A "Inerts of Minimal Concern." U.S. EPA's list of minimal risk inert ingredients is updated periodically and is published in the Federal Register.
- (D) In addition, all of the following conditions must be met for products to be exempted under subsection (a)(5):
- 1. Each product containing the substance must bear a label identifying the name and percentage (by weight) of each active ingredient and the name of each inert ingredient.
- 2. The product must not bear claims either to control or mitigate microorganisms that pose a threat to human health, including but not limited to disease transmitting bacteria or viruses, or claims to control insects or rodents carrying specific diseases, including, but not limited to ticks that carry Lyme disease.
- 3. The product must not include any false and misleading labeling statements, including those listed in 40 CFR 156.10(a)(5)(i) through (viii).

(b) Whenever the manufacturer of, importer of, or dealer in any product exempted pursuant to this section has factual or scientific evidence of any adverse effect or risk to human health or the environment that has not previously been submitted to the department, the manufacturer, importer, or dealer shall report the evidence to the department within 60 days of learning of the information.

HISTORY

1. New section filed 4-26-2000; operative 5-26-2000 (Register 2000, No. 17).

§ 6148. Fee for Each Product Submitted for Registration.

- (a) The fee for each pesticide product submitted for registration is \$750. The fee applies to each:
 - (1) New pesticide product;
 - (2) Additional brand name of a pesticide product; and
- (3) Pesticide product where there is a change in business ownership of the product.
- (b) If the Director returns an incomplete application for product registration to the applicant, the applicant has 180 days from the date the Director initially returned the application to resubmit a complete application without payment of a new registration fee. A new registration fee must accompany applications resubmitted after 180 days from the date the Director returned the application.

NOTE: Authority cited: Sections 12781 and 12812, Food and Agricultural Code. Reference: Section 12812, Food and Agricultural Code.

HISTORY

- New section filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 12812.
- 2. Editorial correction of HISTORY 1 (Register 2004, No. 37).

§ 6148.5. Fees for Amendments to Registered Pesticide Products.

- (a) Each application to amend the labeling of a registered pesticide product, where the amendment must be supported by scientific data, shall be accompanied by a fee of \$100. This fee does not apply to special local needs labeling.
- (b) If the Director returns an incomplete application to amend the labeling of a registered pesticide product to the applicant, the applicant has 180 days from the date the Director initially returned the application to resubmit a complete application without payment of a new fee. A new fee must accompany applications resubmitted after 180 days from the date the Director returned the application.

NOTE: Authority cited: Sections 12781 and 12813, Food and Agricultural Code. Reference: Section 12813, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 12812.
- 2. Editorial correction of HISTORY 1 (Register 2004, No. 37).

§ 6151. Evaluation Time Frames.

The director shall complete the evaluation of data submitted pursuant to Section 6170 for a pesticide containing any active ingredient not currently registered by the director or for any new major use within 120 days of receipt of all such data, and within 60 days of receipt of such data for all other pesticides. When additional specific data are requested, evaluation of it shall be completed within 30 days of receipt. During the evaluation of data, the director shall determine if the pesticide should be classified as a restricted material pursuant to Section 14004.5 of the Food and Agricultural Code.

Note: Authority cited: Sections 12781, 12976, 14004.5 and 14005, Food and Agricultural Code. Reference: Sections 12824 and 14004.5, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2360(c) to Section 6151 and designation of new Article 1 (Sections 6151–6160, not consecutive) filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 1-18-89; operative 2-17-89 (Register 89, No. 5).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6152. Brands.

- (a) A pesticide may be registered under more than one brand name, but the same brand name cannot be registered for products of different chemical composition, or different physical condition sufficient to affect its pesticide properties.
- (b) When a registrant submits revised labeling for a currently registered pesticide to the director all changes from the previous labeling shall be clearly specified by the registrant.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2362 to Section 6152 filed 7–19–85 (Register 85, No. 29).
- 2. Repealer of subsection (a) and subsection relettering filed 8–1–96; operative 8–31–96 (Register 96, No. 31).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6153. Transfer of Registration.

A certificate of registration cannot be transferred if there is a change of business ownership, but a new application and fee are necessary.

NOTE: Authority cited: Sections 11456, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2363 to Section 6153 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6154. Change of Name.

Change of the name of a registrant may be made without additional fee by submission of the following papers to the director:

- (a) The current certificate of registration;
- (b) A new completed application form; and
- (c) An affidavit of no change of business ownership.

NOTE: Authority cited: Sections 11456, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2364 to Section 6154 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6156. Registration Date.

Registration of a pesticide shall become effective on the date the certificate of registration is issued. Such certificate shall not be issued if the director determines the pesticide is to be classified as a restricted material until the pesticide has been so classified.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2360(c) to Section 6156 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6157. Certification.

(a) Each applicant shall certify, by an authorized official of the registrant, under penalty of perjury that to the best of the applicant's knowledge, based upon all information available to the applicant, all informa-

tion submitted in connection with the application for registration or renewal is accurate and complete.

(b) If the director finds that the applicant has submitted inaccurate or incomplete information, the director shall initiate action to refuse or cancel the registration pursuant to Section 12825(f) of the Food and Agricultural Code.

NOTE: Authority cited: Sections 11456 and 12781, Food and Agricultural Code. Reference: Sections 12753, 12758, 12815, 12825, 12827, 12827.5 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2360(d) to Section 6157 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 6-29-87; operative 7-29-87 (Register 87, No. 31).
- 3. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6158. Review and Evaluation.

During the review and evaluation of proposed pesticide labeling and data to support registration, the director shall give special attention to the provisions of Sections 11501, 12824, 12825, 12826, 14102, and 14103 of the Food and Agricultural Code and to each of the following factors, when applicable, in reaching a decision to register or not register the pesticide:

- (a) Acute health effects such as oral toxicity, dermal toxicity, inhalation toxicity, acute eye and skin damage potential, or sensitization potential.
- (b) Evidence of chronic health effects such as carcinogenicity, teratogenicity, mutagenicity, fetal toxicity, and delayed neurotoxicity.
- (c) Potential for environmental damage, including interference with the attainment of applicable environmental standards (e.g., air quality standards and water quality objectives).
 - (d) Toxicity to aquatic biota or wildlife.
 - (e) Method of medical management of poisoning or other injuries.
 - (f) Analytical methods.
 - (g) The availability of feasible alternatives.
 - (h) Efficacy.

If any of these factors are anticipated to result in significant adverse impacts which cannot be avoided or adequately mitigated, registration will not be granted unless the director makes a written finding that anticipated benefits of registration clearly outweigh the risks. When deciding whether or not to register a pesticide for which feasible alternatives exist, the director shall consider any substantial adverse environmental impact which would likely occur from a lack of additional pest control options for the specific proposed use.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2360(e) to Section 6158 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6159. Data Requirements.

The director finds that the data required by the United States Environmental Protection Agency (U.S. EPA) regulations governing pesticide registration, reregistration, and classification adopted in Title 40, Code of Federal Regulations pursuant to authority in the Federal Insecticide, Fungicide and Rodenticide Act substantially meet the data requirements of Section 12824 of the Food and Agricultural Code, except as provided in this section and sections 6158, 6170, 6172, 6176–6179, 6180(a), 6181–6192, 6200, 6210, 6215, and 6222. Information meeting such regulations shall be supplemented as specified in this section and sections 6158, 6170, 6172, 6176–6179, 6180(a), 6181–6192, 6200, 6210, 6215, and 6222. Data waived by the U.S. EPA shall be submitted to the director except when the director makes a written finding that such data are not required to meet the purposes of Sections 11501, 12824, 12825, 12826, 14102, or 14103 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 11456 and 12781, Food and Agricultural Code. Reference: Sections 11501, 12824, 12825, 12826, 14102 and 14103, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2369(a)–(c) to Section 6159 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 1–18–89; operative 2–17–89 (Register 89, No. 5).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending section filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6160. Operational Protocol for Pesticide Registration and Evaluation Manual.

NOTE: Authority cited: Sections 11456, 12781, 12976, 12981 and 14005, Food and Agricultural Code. Reference: Sections 12751–14104, Food and Agricultural Code.

HISTORY

- Editorial renumbering of former Section 2332 to Section 6160 filed 7–19–85 (Register 85, No. 29).
- 2. Repealer filed 1-18-89; operative 2-17-89 (Register 89, No. 5).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6168. Fee for a Certificate of Interim Registration.

In addition to the application fee required pursuant to section 6148, each application for a certificate of interim registration shall be accompanied by a fee of \$5,000 (five thousand dollars) to cover the Department's costs of reviewing and processing the application. The \$5,000 fee also applies to applications:

- (a) For interim registration of an amendment to the labeling of a currently registered product; and
- (b) To amend the labeling and certificate of registration of a product that already has been issued a certificate of interim registration when the amendment will allow additional uses of that product under conditions of interim registration.

NOTE: Authority cited: Sections 12781, 12812 and 13168, Food and Agricultural Code. Reference: Section 13170, Food and Agricultural Code.

HISTORY

- New section filed 1-26-94 as an emergency; operative 1-26-94 (Register 94, No. 4). A Certificate of Compliance must be transmitted to OAL 5-26-94 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 94, No. 34).
- 3. New section refiled 8-24-94; operative 9-23-94 (Register 94, No. 34).
- Amendment of section and Note filed 11-3-2003 as an emergency; operative 1-1-2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 12812.
- 5. Editorial correction of HISTORY 4 (Register 2004, No. 37).

Article 2. Registration Requirements

§ 6170. Application.

(a) Each application for registration of a pesticide product shall be made on the Application for Pesticide Registration Form 39–030 (Rev. 9/03) prescribed by the director and described in section 6170.5. The application is incomplete and may be returned by the Director if the application is not accompanied by the fee required by section 6148, six copies of the product labeling, and the data required to be submitted by sections 6159, 6170, 6172, 6176-6179, 6180(a), 6181-6192, and 6200 when applicable to support registration of the product. All data submitted by the applicant to the U.S. EPA in support of federal registration of the product shall be submitted and all studies shall be submitted in full. The product labeling should be printer's proof, final labels, or legible photocopies thereof. If typescript labels are submitted with the application, printer's proof, final labels, or legible photocopies thereof, must be submitted before a Certificate of Registration (License) for the product will be issued. If the label has been approved by a federal agency, proof of such approval shall be submitted with the application.

- (b) An application to amend the labeling (including a special local needs labeling) of a pesticide product is incomplete and may be returned by the Director if the application is not accompanied by the fee required by 6148.5, six copies of the labeling and the data required to be submitted by sections 6159, 6170, 6172, 6176–6179, 6180(a), 6181–6192, and 6200 when applicable to the amendment. The application to amend the labeling shall be accompanied by all data submitted by the applicant to the U.S. EPA in support of the federal amended labeling of the product and all studies shall be submitted in full. The product labeling should be printer's proof, final labels or legible photocopies thereof. If typescript labels are submitted, printer's proof, final labels or legible photocopies thereof, must be submitted before the amended label will be accepted for use. If the amended labeling has been approved by a federal agency, proof of such approval shall be submitted with the amendment application.
- (c) In lieu of submitting data pursuant to subsections (a) and (b) of this section, an applicant for registration or amendment may reference appropriate data previously submitted to the Director or a pesticide product(s) previously approved by the Director that would be subject to some or all of the same data requirements as applicable to the applicant's product.
- (d) If an applicant does not submit or reference its own data to support its application for registration or amendment, it is subject to the requirements imposed under Food and Agricultural Code section 12811.5.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 12811, 12812, 12815 and 12816, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7-23-90; operative 8-22-90 (Register 90, No. 38).
- 2. Change without regulatory effect amending subsections (a) and (b) and NOTE filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).
- 3. Change without regulatory effect amending subsections (a) and (b) filed 6-5-2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).
- 4. Amendment of subsections (a)–(b) filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 12812.
- 5. Editorial correction of History 4 (Register 2004, No. 37).
- 6. Amendment of subsection (c) and new subsection (d) filed 3–23–2006 as an emergency; operative 3–23–2006 (Register 2006, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–21–2006 or emergency language will be repealed by operation of law on the following day.
- 7. Amendment of subsection (c) and new subsection (d) refiled 7–19–2006 as an emergency; operative 7–19–2006 (Register 2006, No. 29). A Certificate of Compliance must be transmitted to OAL by 11–16–2006 or emergency language will be repealed by operation of law on the following day.
- 8. Certificate of Compliance as to 7–19–2006 order transmitted to OAL 11–9–2006 and filed 12–19–2006 (Register 2006, No. 51).
- Change without regulatory effect amending section filed 2-7-2007 pursuant to section 100, title 1, California Code of Regulations (Register 2007, No. 7).
- 10. Amendment filed 2-8-2007; operative 3-10-2007 (Register 2007, No. 7).

§ 6170.1. Application for Registration of Economic Poison (Pesticide) Form.

NOTE: Authority cited: Sections 407 and 12781, 12845, Food and Agricultural Code. Reference: Sections 12811, 12815 and 12821, Food and Agricultural Code. HISTORY

- 1. Sample forms printed as an addendum to section 6170 (Register 87, No. 31).
- 2. Change without regulatory effect repealing forms 39–032 (Rev. 11–85) and 39–027 (Rev. 11–85) pursuant to section 100, title 1, California Code of Regulations filed 5–23–90 (Register 90, No. 27).
- 3. Repealer filed on 7-23-90; operative 8-22-90 (Register 90, No. 38).

§ 6170.5. Application Form.

The form referred to in section 6170(a) shall require registrants to provide the following information when applicable.

- (a) Firm name, (same as on file with the United States Environmental Protection Agency (U.S. EPA);
- (b) Firm mailing address and street address, if different from mailing address;
- (c) Name and telephone number of official authorized to answer questions concerning the application;
 - (d) Brand name of pesticide product (exactly as shown on label);
 - (e) U.S. EPA registration number of pesticide product;

- (f) Type of U.S. EPA registration obtained;
- (g) Type of California registration action being requested;
- (h) Whether pesticide product contains biochemicals and/or microbials:
 - (i) Type(s) and size(s) pesticide product is to be sold in;
 - (j) Whether pesticide product requires child-resistant packaging;
 - (k) Signal word on label;
 - (1) Specific gravity and pounds/gallon of liquid formulations;
 - (m) Bulk density of solid formulations;
 - (n) pH of water soluble formulations;
- (o) Flash point/flame extension of products containing more than 70% petroleum distillates:
- (p) Whether product is intended for commercial agricultural use and/ or by householders;
 - (q) Type of pesticide product;
 - (r) Method(s) of application;
 - (s) Type of formulation;
- (t) Common chemical name, trade name and CAS number for each active ingredient in the formulation;
- (u) Product name(s) and U.S. EPA registration number(s) of the source product(s) of each active ingredient in the formulation;
- (v) Percent by weight of source product(s) and of active ingredient(s) in formulated product;
- (w) Common chemical name, trade name and the CAS number of each inert ingredient in the formulation (if reporting by trade name only, include Material Safety Data Sheet);
- (x) Product name(s) of the source product(s) of each inert ingredient in the formulation;
 - (y) Purpose of each inert ingredient in formulated product;
- (z) Percent by weight of source product(s) and of the inert ingredient(s) in the formulated product.

NOTE: Authority cited: Sections 12781 and 12845, Food and Agricultural Code. Reference: Sections 12811, 12815 and 12821, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-23-90; operative 8-22-90 (Register 90, No. 38).
- 2. Change without regulatory effect amending subsections (d), (e), (h)–(j) and (q) and Note filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).
- Change without regulatory effect amending section filed 6–5–2002 filed pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6171. Document Requests.

Each applicant shall, upon request of the director, submit to the director a copy of any part or all documents the applicant submitted to the U.S. EPA in support of the U.S. EPA action concerning the pesticide product. Each document request pursuant to this section shall include the director's reason for the request.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2360(b) to Section 6171 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NoTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending section 6–5–2002 filed pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6172. General Toxicity Data.

- (a) The following data shall be submitted with every application for registration.
 - (1) Acute oral and dermal LD_{50} data on the product.
- (2) Acute LC_{50} data on products which produce a respirable aerosol or gas.
 - (3) Primary eye and skin irritation data on the product.
- (b) The following data in addition to the data required by (a), (1)–(3) shall be submitted with each application to register a product containing an active ingredient not previously registered when required by the U.S.

EPA to support the full unconditional registration pursuant to Section 3 of the Federal Insecticide, Fungicide and Rodenticide Act. Pesticides which are determined to be biorational pesticides as determined by the director, may be exempted from the chronic toxicity data requirements.

- (1) Results of a two-year feeding study for oncogenicity on active ingredients in two animal species.
- (2) Results of a teratogenicity study and a two-generation combined male-female reproductive study on active ingredients.
- (3) Results of three mutagenicity studies on active ingredients that detect gene mutations, chromosomal aberrations, and DNA damage/repair. NOTE: Authority cited: Sections 12781 and 12824, Food and Agricultural Code. Reference: Sections 11501 and 12824–12825, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2379.5 to Section 6172 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 6-29-87; operative 7-29-87 (Register 87, No. 31).
- 3. Change without regulatory effect amending subsection (b) and Note filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).
- 4. Change without regulatory effect amending subsections (a)(1), (a)(3) and (b) filed 8–14–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 33).
- 5. Change without regulatory effect amending subsections (a)(1) and (a)(3) filed 2–7–2007 pursuant to section 100, title 1, California Code of Regulations (Register 2007, No. 7).
- 6. Amendment of subsections (a)(1) and (a)(3) filed 2-8-2007; operative 3-10-2007 (Register 2007, No. 7).

Article 3. Supplemental Data Requirements

§ 6176. Safety Related to Exposure.

Dermal Absorption. Each applicant to register a pesticide product that has an active ingredient with an acute dermal toxicity (LD_{50}) of 2,000 or less milligrams per kilogram of body weight for a 24–hour period shall submit to the director dermal absorption data.

Note: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2370(a) to Section 6176 and designation of new Article 3 (Sections 6176–6193) filed 7–19–85 (Register 85, No. 29). For prior history, see Register 82, No. 32.
- 2. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6177. Mixer, Loader, Applicator Exposure.

Each applicant to register a pesticide product in toxicity category one or two, the use of which may be expected to result in significant respiratory or dermal exposure during mixing, loading, or application, shall submit appropriate, dermal or inhalation exposure data. Studies required by this section that involve human participants, to be conducted in California, shall meet the requirements of section 6710.

NOTE: Authority cited: Sections 11456, 12781 and 12981, Food and Agricultural Code. Reference: Sections 12815, 12824, 12980, 12981, 12987 and 12988, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2370(b) to Section 6177 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment of section and NOTE filed 5-26-95; operative 6-26-95 (Register 95, No. 21)
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6178. Management of Poisoning.

Each applicant to register a new pesticide product or a new use of a previously registered product shall submit to the director a protocol supported by data for the practical treatment of poisoning and other injury cases.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

Page 370 Register 2007, No. 7; 2–16–2007

- 1. Editorial renumbering of Section 2370(c) to Section 6178 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6179. Spray Adjuvants.

Each applicant to register a spray adjuvant that is exempt from a tolerance pursuant to U.S. EPA regulations shall submit to the director acute toxicity data on the formulated product including oral, dermal and inhalation toxicity values, and the results of eye and skin irritation tests. If the director determines that the data indicate a risk of chronic effect, the applicant shall submit data relating to such chronic effect.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2370(d) to Section 6179 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending section 6–5–2002 filed pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6180. Rodenticides.

- (a) Each applicant to register a pesticide that is a rodenticide shall submit biochemical data describing the metabolic pathway and the mode of action in animal models suitable for extrapolation of the data to people.
- (b) Anticoagulant rodenticide baits intended for home use shall contain a color additive of such intensity as to be readily evident.
- (c) Suggested dyes or anticoagulant baits are listed in the Department's Vertebrate Pest Control Handbook (Publication No. 410).
- (d) Baits containing strychnine shall be dyed with a green color additive as specified in the Department's Vertebrate Pest Control Handbook.
- (e) Subsections (b) and (c) do not apply to bird control materials or animal repellents.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 11501 and 12824, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Sections 2370(e) and 2401 to Section 6180 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 1-18-89; operative 2-17-89 (Register 89, No. 5).
- Change without regulatory effect amending subsection (a) and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6181. Foliar Residue and Field Reentry.

Each applicant proposing to register a new pesticide product or new use of a previously registered pesticide product that is intended for use on a commercially grown crop where there may be substantial exposure by field workers, shall submit acceptable foliar and soil residue data, including data on toxic alteration products if (a) any active ingredient or alteration product has an acute dermal toxicity (LD50) of 2,000 or less milligrams per kilogram of body weight for a 24–hour period, (b) is highly irritating to the skin, (c) is a sensitizer, or (d) involves a potential risk of a chronic health effect.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2370(f)(1) to Section 6181 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6182. Field Reentry.

(a) A proposed pesticide use that poses a safety hazard to field workers will not be registered until a safety interval to protect such workers has been established and is in effect by regulation or label statement.

- (b) Reentry intervals shall be established on the basis of data on dermal absorption, inhalation and dermal/oral—response studies in animal models in conjunction with foliar and soil dissipation data and any available human exposure data. The selected reentry interval will be sufficiently long to ensure that a safe (no–effect) level is present on foliage and the soil when workers may reenter previously treated areas.
- (c) In the case of a safety interval set without a human reentry study, the director may require a field monitoring study of workers during the first year of use.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2370(f)(2)–(f)(4) to Section 6182 filed 7–19–85 (Register 85, No. 29).
- 2. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6183. Indoor Exposure.

Each applicant to register a pesticide product, the use of which in houses, institutions, or other buildings may result in dermal or respiratory exposure after application, shall submit appropriate exposure data. Studies required by this section that involve human participants, to be conducted in California, shall meet the requirements of section 6710.

NOTE: Authority cited: Sections 12781 and 12981, Food and Agricultural Code. Reference: Sections 12815, 12824, 12980, 12981, 12987 and 12988, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2370(g) to Section 6183 filed 7–19–85 (Register 85, No. 29).
- Amendment of section and Note filed 5–26–95; operative 6–26–95 (Register 95, No. 21).

§ 6184. Residue Test Method.

- (a) Each applicant for the registration of a pesticide product shall provide the director with a method and a standard sample for accurately determining residues of (1) each active ingredient in the pesticide product and (2) each metabolite that may result from the active ingredient for which a tolerance has been established by the U.S. EPA in the Code of Federal Regulations. Test methods shall allow the director to determine residues in or on plant or animal tissue, soil, and water.
- (b) In the case of a pesticide intended for use on a food crop for which a residue tolerance has been established, the method shall allow the director to determine the residue on each crop within a continuous 24—hour period. Registration may be allowed for a reasonable time during which the applicant can comply with this subsection. The registration shall not be allowed to continue for more than 2 years without compliance with this subsection unless the applicant provides the director with an equally effective procedure for accomplishing the protection offered by the 24—hour method.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2371 to Section 6184 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending subsection (a) filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23)

§ 6185. Residue Data.

Residue data required by sections 6159 and 6181 shall be obtained under California or similar environmental use conditions. Such data shall take into consideration differences in plants, soils, climatic conditions, and application techniques.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

- 1. Editorial renumbering and amendment of former Section 2372 to Section 6185 filed 7–19–85 (Register 85, No. 29).
- 2. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending section filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6186. Efficacy.

Each application for registration or amendment to the labeling of a pesticide shall be accompanied by data supporting each efficacy claim. If data supporting such claims are in the public domain and copies of the data are provided, the submission of such data may satisfy the requirement of this section. Such data shall be obtained under California or similar environmental use conditions and shall take into consideration differences in plants, soils, climate conditions, and application techniques. NOTE: Authority cited: Sections 14004.5 and 14006.7, Food and Agricultural Code. Reference: Sections 11501, 12561, 12824, 12825 and 12854, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2373 to Section 6186 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 6-29-87; operative 7-29-87 (Register 87, No. 31).
- Change without regulatory effect amending section and Note filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6187. Hazards to Bees.

Each applicant to register a pesticide product which, under field conditions, may be likely to contact commercial apiaries or pollinating bees shall submit to the director test data indicating the product's acute chronic toxicity to bees. Testing procedures shall be those described by the University of California laboratory studies included in Leaflet 2287, or equivalent procedures.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401-12121, 12501-12671, 12751-13102 and 14001-14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2374 to Section 6187 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NoTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6188. Closed System Compatibility.

- (a) Each applicant to register a liquid pesticide product carrying the signal word "DANGER" on the label for an agricultural use shall submit to the director data on the product's viscosity and such other data the director may require to comply with sections 6188(b) and 6744.
- (b) No liquid pesticide carrying the signal word "DANGER" on the label shall be registered for an agricultural use unless the product is compatible with closed systems as defined in section 6000.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

[The next page is 371.]

- 1. Editorial renumbering and amendment of former Sections 2375 and 2402 to Section 6188 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending section filed 3–8–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 10).

§ 6189. Effects on Pest Management.

Each applicant to register a pesticide for use on a crop for which it was not previously registered shall submit data to the director concerning any adverse effect of the product on pest management systems for that crop. NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2376 to Section 6189 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6190. Inert Ingredient Hazard.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2378 to Section 6190 filed 7–19–85 (Register 85, No. 29).
- 2. Repealer filed 8-1-96; operative 8-31-96 (Register 96, No. 31).

§ 6191. Volatile Organic Compounds.

The director, after consultation with the Air Resources Board, shall determine under what circumstances interference with the attainment and maintenance of ambient air quality standards is likely to result from the evaporative emission of volatile organic compounds contained in a pesticide product and may require the applicant to supply data regarding such emissions.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2379 to Section 6191 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6192. Other Data.

Each applicant to register a pesticide product shall submit to the director any other data determined by the director to be necessary to carry out the provisions of Section 12824 of the Food and Agricultural Code. Each data request pursuant to this section shall include the director's reason for the request. Such data may include, but is not limited to the following:

- (a) Pesticide drift.
- (b) Phytotoxicity.
- (c) Environmental effects.
- (d) Analytical and environmental chemistry.
- (e) The effect from the use of mixtures of two or more products in combination.
 - (f) Contaminants in pesticide products.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2380 to Section 6192 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending first paragraph filed 8–14–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 33).

§ 6193. Wettable and Soluble Powders.

NOTE: Authority cited: Sections 407, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- Editorial renumbering of former Section 2400 to Section 6193 filed 7–19–85 (Register 85, No. 29).
- 2. Repealer filed 8-1-96; operative 8-31-96 (Register 96, No. 31).

§ 6193.5. Acute Effects Data for Dietary Risk Assessment.

- (a) For the purposes of this section, "acute exposure" is defined as a single treatment or repeated treatments during a period normally not to exceed seven days. Signs of acute toxicity are physical, behavioral, or biochemical manifestations, resulting from acute exposure, which are relevant to assessing dietary risks resulting from acute exposures of humans. Relevant observations of acute toxicity are described in the United States Environmental Protection Agency Pesticide Assessment Guidelines, Subdivision F.
- (b) The following data, from studies using active ingredients, are required to assess dietary risk resulting from acute exposures:
- (1) Acute oral LD_{50} toxicity data as required pursuant to Title 40 Code of Federal Regulations, Part 158.340; and
- (2) Oral toxicity data demonstrating a No Observed Effect Level (NOEL) for signs of acute toxicity following acute exposure and oral toxicity data sufficient to produce a dose–response curve for active ingredients with known biological indicators (e.g., cholinesterase inhibition) when this response is relevant to the NOEL. For active ingredients with anticholinesterase activity, at a minimum, red blood cell cholinesterase activity must be reported.
- (c) The data listed in subsection (b) shall be submitted with each application for registration of:
- (1) A pesticide product intended for use on food or feed crops and containing an active ingredient not currently registered for food or feed use; or
- (2) Amended labeling which would add directions for use on food or feed crops to the label of a pesticide product containing an active ingredient not currently registered for food or feed use.
- (d) Pursuant to Section 13060 of the Food and Agricultural Code, when notified by the Department, registrants of pesticides labeled for use on food or feed crops must submit the acute effects data listed in subsection (b). Registrants shall have nine months from the date of the Department's notice to submit the data.
- (e) The Department will not require the data listed in subsections (b) for active ingredients for which the Department has made a written determination that existing data demonstrates that acute dietary exposure is not of toxicological concern.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 12824 and 13060, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-27-92; operative 3-30-92 (Register 92, No. 12).
- 2. Change without regulatory effect amending subsections (c)(1)–(d) and NOTE filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6194. Required Submission of Data.

(a) Registrants required to submit data in support of registrations pursuant to Food and Agricultural Code sections 13060 (c) (1), 13127, 13143 or 13146 shall respond to the director's notices of the data and study requirements. Where the notice pertains to data required pursuant to Food and Agricultural Code section 13127, the data shall be one or more of the mandatory health effects studies specified in Food and Agricultural Code section 13123. Where the notice pertains to data required pursuant to Food and Agricultural Code sections 13143 or 13146, the data shall be all or some of the information specified in Food and Agricultural Code section 13143 (a) (1) through (6). Where the notice pertains to data required pursuant to Food and Agricultural Code section 13060 (c) (1), the data shall be that listed in section 6193.5 (b).

Not later than 90 days after the date of such a notice, registrants shall inform the director in writing as to how they will comply with the data requirements by choosing one or more of the following options:

- (1) Submit the data with their response to the notice.
- (2) Develop and submit the data.
- (3) Agree to jointly develop and submit the data with one or more parties and provide a copy of the agreement signed by the participating parties.
- (4) Acquire authorization to use data being developed and submitted by another party and provide a copy of the authorization signed by that party.
- (5) For data required pursuant to sections 13127, 13143 or 13146 of the Food and Agricultural Code, offer to compensate the developer(s) of the data and provide a copy of the offer, together with evidence that the data developer(s) received the offer.
- (6) Claim the data requirements are not applicable to the registered use patterns of the registrant's pesticide products and provide information supporting the claim.
- (7) When applicable to the particular notice, claim an exemption from the mandatory health effects data requirements pursuant to Food and Agricultural Code section 13128, or claim an exemption from the acute effects data requirements pursuant to Food and Agricultural Code section 13060(c)(2), and provide the information specified in subsection (c).

An option shall be chosen for each data requirement; however, different options may be chosen for different data requirements. When requested by the director, registrants who have chosen options (2) and/or (3) shall submit a written status report to the director regarding the development of the data which shall include, but is not limited to:

- (1) The name and address of the person/organization conducting the study,
 - (2) The initiation and expected completion dates, and
- (3) The scheduled date of submission of the data to the Department. The status report shall be submitted not later than 30 days after the date of the director's request, unless a later date is specified.
- (b) Pursuant to Food and Agricultural Code sections 13060(c)(2) and 13128, data requirements noticed pursuant to Food and Agricultural Code sections 13060(c)(1) and 13127, respectively, shall not apply to applicants or registrants of end use products that are formulated using another producer's pesticide product which is registered with the United States Environmental Protection Agency (EPA) provided, all pesticide active ingredients in the formulated product are derived solely from one or more EPA registered pesticide products and the producer(s) has/have chosen from options (1), (2), (3) and/or (5) in subsection (a) of this section, and is/are in compliance with the requirements of sections 13060 (c) (1) or 13127, whichever applies, of the Food and Agricultural Code and the director's regulations contained in chapter 6 of Title 3 of the California Code of Regulations.
- (c) The director shall grant an exemption as authorized by sections 13060 (c) (2) and 13128 of the Food and Agricultural Code to an applicant or registrant that meets the conditions specified in subsection (b). To apply for an exemption, the applicant or registrant shall submit the following:
- (1) The name and the EPA registration number of each pesticide product purchased to formulate the end use product, and
- (2) The name of the producer(s) from whom the applicant or registrant purchases the active ingredient(s) used to formulate the product(s), who has/have chosen from options (1), (2), (3) and/or (5) in subsection (a) of this section, and is/are in compliance with the requirements of sections 13060(c)(1) or 13127, whichever applies, of the Food and Agricultural Code and the director's regulations contained in chapter 6 of Title 3 of the California Code of Regulations. If the active ingredient(s) is/are not purchased directly from the producer(s), but through a supplier, include a statement identifying the producer(s) by name and certifying that the active ingredient(s) used to formulate the product(s) is/are purchased indirectly from a producer(s) who has/have chosen from options (1), (2), (3) and/or (5) in subsection (a) of this section, and is/are in compliance

with the requirements of sections 13060 (c) (1) or 13127, whichever applies, of the Food and Agricultural Code and the director's regulations contained in chapter 6 of Title 3 of the California Code of Regulations.

- (d) If a registrant that has been granted an exemption pursuant to sections 13060 (c) (2) or 13128 of the Food and Agricultural Code purchases a pesticide product different from that reported in accordance with subsection (c), the registrant shall notify the director of the change. If the registrant still meets the conditions specified in subsection (b) and wishes to request an exemption, the registrant shall reapply for the exemption following the procedure described in subsection (c).
- (e) An applicant or registrant that has been granted an exemption pursuant to sections 13060(c)(2) or 13128 of the Food and Agricultural Code will be exempt as long as the producer(s) of the pesticide active ingredient(s) in its end use product has/have chosen from options (1), (2), (3) and/or (5) in subsection (a) of this section, and is/are in compliance with the requirements of sections 13060(c)(1) or 13127, respectively, of the Food and Agricultural Code and the director's regulations contained in chapter 6 of Title 3 of the California Code of Regulations. An applicant or registrant that no longer qualifies for such an exemption is subject to the requirements of sections 13060 (c) (1) or 13127, whichever applies, of the Food and Agricultural Code.

NOTE: Authority cited: Sections 12781 and 13145, Food and Agricultural Code. Reference: Sections 13060, 13127, 13128, 13143 and 13146, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–1–87; operative 6–1–87 pursuant to Government Code section 11346.2(d) (Register 87, No. 24).
- 2. Amendment filed 3-17-89; operative 4-16-89 (Register 89, No. 12).
- 3. Amendment of subsections (b) and (c), and new subsection (e) filed 11-6-89 as an emergency; operative 11-6-89 (Register 89, No. 45). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3-6-90.
- 4. Certificate of Compliance including amendment of subsections (b), (c) and (e) transmitted to OAL 3-6-90 and filed 4-2-90 (Register 90, No. 16).
- 5. Amendment filed 2-27-92; operative 3-30-92 (Register 92, No. 12).

§ 6195. Acceptability of Submitted Studies.

- (a) The director will determine whether information and studies submitted pursuant to Sections 13127, 13143 and 13146 of the Food and Agricultural Code are valid, complete, and adequate. The determination will be made by considering the following factors including, but not limited to:
 - (1) Study design and conduct,
 - (2) Test substance characterization,
 - (3) Collecting and reporting of data,
 - (4) Statistical analysis of study results, and
- (5) A showing by the registrant that the information and studies meet the requirements of Food and Agricultural Code Sections 13123.5 or 13143.
- (b) The director's determination of acceptability shall be final unless, within 90 days after notice to the registrant of disapproval, the registrant petitions for reconsideration and shows in detail therein the particular matters alleged to have been improperly evaluated by the director and the reasons supporting a different evaluation. The director may grant reconsideration upon such showing and may permit the registrant to supplement the material previously submitted, or otherwise show that the studies submitted are acceptable. The time periods and procedures in such reconsideration actions shall be set by the director in consideration of the particular matters involved.

NOTE: Authority cited: Sections 12781 and 13145, Food and Agricultural Code. Reference: Sections 13127, 13143 and 13146, Food and Agricultural Code.

HISTORY

1. New section filed 6–1–87; operative 6–1–87 pursuant to Government Code Section 11346.2(d) (Register 87, No. 24).

§ 6196. Adoption of Federal Authority.

As authorized by sections 13127 and 13146 of the Food and Agricultural Code, the director adopts the provisions of subparagraph (B) of paragraph (2) of subdivision (c) of section 136a of Title 7 of the United States Code, as applicable to compensation for data developed pursuant

to Food and Agricultural Code sections 13127, 13143 and 13146 and for suspension of registrations pursuant to Food and Agricultural Code Sections 13127, 13127.2, 13127.6, 13127.91, 13127.92 and 13146. References therein to the authority of the Administrator of the United States Environmental Protection Agency (USEPA), acting pursuant to the provisions of the Federal Insecticide, Fungicide and Rodenticide Act, shall be deemed to reefer to the director, acting under the provisions of the Food and Agricultural Code and regulations in Title 3 of the California Code of Regulations. The following provisions shall apply to the adoption of the federal authority:

- (a) The director's authority under other provisions of law is not affected.
- (b) Compensation procedures under federal law are exclusive at any tie such federal procedures can be initiated before an arbitration award under this section becomes final. A later award under federal law for submission of the same data, or substantially the same data, shall supersede an award under this section.
- (c) Arbitration proceedings under this section shall be conducted by arbitrators of the American Arbitration Association using federal procedures to the extent practicable.
- (d) Arbitration awards under this section shall be subject to review in courts of competent jurisdiction to the same extent as judgments of California superior courts.
- (e) No compensation proceedings are authorized of resubmission of public literature studies.
- (f) Compensation for the use of data submitted to the director is applicable only for studies initiated after January 1, 1985 to fill the data requirements of Food and Agricultural Code section 13127 and studies initiated after January 1, 1986 to fill the information requirements of Food and Agricultural Code sections 13143 and 13146. When submitted to the director, use of these data is subject to protection only to the same extent and for the same time periods as such use would be subject to protection by the USEPA Administrator, had the data been submitted to USEPA pursuant to 7 U.S.C. 136a(c)(2)(B)(v).
- (g) The director may include in each Notice of Intent to Suspend such provisions as the director deems appropriate concerning the continued sale of existing stocks of the products included in the Notice.
- (h) The only matters for resolution at the hearing, called pursuant to the Notice of Intent to Suspend, shall be whether the registrant has failed to take the action that served as the basis for the Notice of Intent to Suspend, including, but not limited to, failing to take appropriate steps to submit the data required, to participate in a procedure for reaching agreement concerning a joint data development arrangement, to participate in an arbitration proceeding as required, to comply with the terms of an agreement or arbitration decision concerning a joint data development arrangement, and/or whether the director's determination with respect to the disposition of existing stocks is appropriate.
- (i) If a hearing is held, the decision after completion of such hearing shall be final.

NOTE: Authority cited: Sections 12781, 13127 and 13146, Food and Agricultural Code. Reference: Sections 13127, 13127.2, 13127.6, 13127.91, 13127.92 and 13146, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–1–87; operative 6–1–87 pursuant to Government Code section 11346.2(d) (Register 87, No. 24).
- Editorial correction of printing error in introductory paragraph (Register 91, No. 33).
- Amendment of introductory paragraph, redesignation of numbered subsections to letters, new subsections (g)–(i), and amendment of NOTE filed 10–29–92; operative 10–29–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 44).

§ 6196.1. Provisions for Suspension.

As authorized by Section 13123(m) and Section 13127(c), the following provisions shall apply to suspensions of registrations pursuant to Food and Agricultural Code Section 13127, 13127.2, 13127.6, 13127.91, and 13127.92:

- (a) The provisions of Chapter 5 of the California Administrative Procedure Act (Government Code Sections 11500–11528) apply to any hearing requested except for the following provisions which do not apply to the actual conduct of the hearing:
- (1) Government Code Sections 11503–11507. Suspension actions under the above–cited Food and Agricultural Code Sections are commenced with the filing and service of the Notice of Intent to Suspend. All references to, and requirements for, Accusations or Statements of Issues in Government Code Sections 11500–11528 shall be deemed to apply to Notices of Intent to Suspend.
- (2) Government Code Sections 11517 and 11521. The Administrative Law Judge prepares and issues a final decision in hearings under the above cited sections of the Food and Agricultural Code.
- (3) Government Code Section 11520. If the registrant does not requests a hearing within 30 days after receiving the Notice of Intent to Suspend, the suspension takes effect automatically.
- (b) The final decision of the Administrative Law Judge in any suspension action under the above–cited Food and Agricultural sections shall be issued at the earliest possible time.

NOTE: Authority cited: Sections 12781, 13127 and 13146, Food and Agricultural Code. Reference: Sections 13127, 13127.2, 13127.6, 13127.91 and 13127.92, Food and Agricultural Code.

HISTORY

1. New section filed 10–29–92; operative 10–29–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 44).

§ 6197. Applicability of Section 6196 to Data Obtained Pursuant to Food and Agricultural Code Section 12824.

- (a) Data protection and compensation otherwise applicable to the adoption of federal authority by Section 6196 does not apply to situations described in subsection (d)(1) of Section 13127 and subsection (d) of Section 13146 of the Food and Agricultural Code in which the director obtains data and makes assessments on registrants for the costs thereof pursuant to Section 12824 of the Food and Agricultural Code.
- (b) The director will determine in each matter under subsection (a) the appropriate means of making and collecting the assessments. The amount of the assessment shall be the total cost to the Department to obtain the data less any appropriation the director may have requested, provided such appropriation will be received by the Department. The assessments shall be charged to the registrants of an active ingredient for which data gaps exist in proportion to the total amount of the registrant's pesticide products containing the active ingredient which the registrant reported sold pursuant to Section 6388 for the most current year prior to the assessment for which such records are available. The assessments will be collected before the director initiates the required tests.
- (c) The adoption of federal authority pursuant to Section 6196 does not affect the director's authority to suspend or cancel registrations for failure of registrants to submit data, or comply with assessment orders made pursuant to Food and Agricultural Code Section 12824, either separately or in conjunction with other authority.

NOTE: Authority cited: Sections 12781, 13127 and 13146, Food and Agricultural Code. Reference: Sections 13127 and 13143, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–1–87; operative 6–1–87 pursuant to Government Code Section 11346.2(d) (Register 87, No. 24).
- 2. Amendment of subsection (b) filed 2–27–89; operative 3–29–89 (Register 89, No. 9).
- Change without regulatory effect amending subsection (b) filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6197.5. Assessment of Pesticide Registrants.

(a) Notice of a proposed assessment made pursuant to Food and Agricultural Code Section 13127(d) shall be given to each registrant of the active ingredient for which the data gap(s) exist(s) except those granted an exemption pursuant to Food and Agricultural Code Section 13128, and to each legislative committee which, during the previous and current year, considered legislation involving pesticides. Written comments on

the proposed assessment will be accepted for 30 days. After the 30 days, if the director orders the assessment, notice thereof shall also be given to each such registrant and committee.

- (b) The notice of proposed assessment and the assessment order shall contain the findings of the director as to each of the following:
 - (1) The active ingredient involved;
 - (2) A list of the specific studies for which there are data gaps;
 - (3) The reasons for requiring the assessment to obtain data;
- (4) The total estimated cost of all of the required studies and the estimated cost of each individual study;
- (5) The legislative appropriation, if any, authorized to be used to reduce the assessment to registrants and the balance remaining after application of any such appropriation; and
- (6) Each registrant and its proportional share of the total assessment based upon its reported sales for the most current year prior to the assessment for which such records are available as determined pursuant to Section 6197(b). Registrants that did not report any sales will be assessed the same amount as the registrant(s) reporting the least amount of sales, but not to exceed ten percent (10%) of the total assessment. If no sales were reported by any registrant, the total assessment will be divided equally among the registrants of the active ingredient involved.
- (c) The assessment order shall provide that, within 30 days of the date of the assessment order notice:
- (1) an affected individual registrant may, in lieu of payment, surrender its registration of all products containing the active ingredient which is the subject of the assessment; and
- (2) any individual registrant may, in lieu of payment, file with the director an agreement signed by another California or a United States Environmental Protection Agency registrant of the same active ingredient to pay the individual registrant's assessment.
- (d) As soon as practicable after determining the voluntary surrenders, if any, as provided in subsection (c)(1), the director shall recalculate the percentage of costs to the remaining registrants and provide notice of the recalculated assessments, or provide notice that there were no voluntary surrenders and that the assessments are those specified in the assessment order.
- (e) After 30 days of the issuance of the notice provided in subsection (d), the director may order the suspension of the registration of products containing the active ingredient of any registrant that fails to pay, or fails to have the registrant who signed the agreement as provided in subsection (c)(2) pay, its assessment. The suspension order shall order the registrant to discontinue sales of such products to distributorships/dealers within California.
- (f) After 90 days of the issuance of the notice provided in subsection (d), the director may take the action specified in subsection (e) against all registrations of products containing the active ingredient, except for the products of registrants excluded pursuant to Section 13128 of the Food and Agricultural Code, if the total amount of the assessment has not been paid to the director or funds have not been made available from other sources to conduct the required studies.
- (g) If the original assessment did not provide adequate funds to complete the work being funded, the director may order a supplemental assessment or assessments to provide such necessary additional funds. Notice of the supplemental assessment order shall be given to each registrant, person and committee identified in subsection (a) and include: (1) the additional total amount needed for completion of the studies, (2) any legislative appropriation available, to be used to reduce the supplemental assessment, and (3) each registrant's apportionment based upon its proportional share of the original assessment. The provisions of subsections (c), (d), (e) and (f) will apply to supplemental assessment orders.
- (h) Any registrant that has surrendered its registration or had its registration suspended pursuant to the provisions of this section, or its successors in interest to surrendered or suspended products, shall not be allowed to register or sell any products containing the active ingredient which was subject to assessment unless the studies have been initiated and/or the

data gaps filled and the registrant, or its successor in interest, complies with the following procedure:

- (1) Within 60 days of its application for registration, the applicant/registrant shall submit to the director a statement, signed by each registrant that paid all or a share of the applicable assessment, stating that the registrant has no objection to such product registration; or
- (2) present to the director an order of a court of competent jurisdiction determining that the applicant/registrant is entitled to registration based upon the payment, or offer of payment, of reasonable compensation to concerned registrants, or upon such other basis as the court may deem appropriate: or
- (3) pays the assessment owed at the time it surrendered its registration or had its registration suspended.
- (i) Monies received in excess of the total cost of obtaining the studies will be returned to registrants in proportion to each registrant's paid share of the total assessment.

NOTE: Authority cited: Sections 11456, 12781, 13127 and 13146, Food and Agricultural Code. Reference: Sections 13127 and 13146, Food and Agricultural Code.

HISTORY

- New section filed 7-9-87 as an emergency; operative 7-9-87 (Register 87, No. 31). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11-6-87.
- Certificate of Compliance including amendment transmitted to OAL 11-6-87 and filed 12-7-87 (Register 87, No. 51).
- 3. Amendment of subsection (b)(6) filed 2–27–89; operative 3–29–89 (Register 89, No. 9).
- 4. Amendment of subsections (a) and (f) filed 3–17–89; operative 4–16–89 (Register 89, No. 12).
- 5. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6198. Determination of Critical Need.

Pursuant to Food and Agricultural Code Section 13146(d), the determination of whether an active ingredient or pesticide is "critical to agricultural production" shall be based upon, but is not limited to, the following factors:

- (1) Loss of the active ingredient or pesticide could prevent the commercial production of an agricultural crop.
- (2) No other effective active ingredients or other alternative methods are available for the same use(s).
- (3) Loss of the active ingredient or pesticide could result in the introduction or dissemination of a pest new or not theretofore known to be widely prevalent or distributed within and throughout California.
- (4) Loss of the active ingredient or pesticide could cause a health hazard to animals such as livestock, horses, cattle, sheep, goats, canines and furbearing animals.
- (5) Loss of the active ingredient or pesticide could cause hardship on California's agricultural industry.

NOTE: Authority cited: Sections 12781 and 13146, Food and Agricultural Code. Reference: Sections 13143 and 13146, Food and Agricultural Code.

HISTORY

- 1. New section filed 5-13-88; operative 6-12-88 (Register 88, No. 22).
- Change without regulatory effect amending section and NoTE filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6198.5. List of Active Ingredients Identified Pursuant to Section 13127 of the Food and Agricultural Code

- (a) Section 13127(a) of the Food and Agricultural Code requires the Department to identify 200 active ingredients which the Department determines have the most significant data gaps, widespread use, and which are suspected to be hazardous to people. The active ingredients are listed below in alphabetical order:
 - 1. Acephate
 - 2. Acrolein
 - 3. Alachlor
 - 4. Aldicarb
 - 5. Aldrin

- 6. Alkyl (50%C14, 40%C12, 10%C16) Dimethyl Benzyl Ammonium Chloride
- 7. Allethrin
- 8. (Reserved)
- 9. Amitraz
- 10. Amitrole
- 11. Arsenic Pentoxide12. Arsenic Trioxide
- 13. Asulam, Sodium Salt
- 14. Atrazine
- 15. Azinphos-Methyl
- 16. Barban
- 17. Bendiocarb
- 18. Benomyl
- 19. Bentazon, Sodium Salt
- 20. Boric Acid
- 21. Bromacil
- 22. Bromoxynil Octanoate
- 23. Captafol
- 24. Captan
- 25. Carbaryl
- 26. Carbofuran
- 27. Carbon Tetrachloride
- 28. Carboxin
- 29. Chloramben
- 30. Chlordane
- 31. Chlordimeform
- 32. Chlorflurenol, Methyl Ester
- 33. (Reserved)
- 34. Chlorobenzilate
- 35. Chloroneb
- 36. Ortho-Benzyl-Para-Chlorophenol
- 37. Chloropicrin
- 38. Chlorothalonil
- 39. Chlorpyrifos
- 40. Chlorsulfuron
- 41. Chlorthal-Dimethyl
- 42. (Reserved)
- 43. Coumaphos
- 44. Creosote
- 45. Cryolite
- 46. Cyanazine
- 47. Cyanuric Acid, Monosodium Salt
- 48. Cycloate
- 49. Cyhexatin
- 50. 2,4–D
- 51. 2,4-D, Dimethylamine Salt
- 52. Daminozide
- 53. DDVP
- 54. Deet
- 55. Demeton
- 56. Diazinon
- 57. Dicamba
- 58. Diclobenil
- 59. Para-Dichlorobenzene
- 1,2–Dichloropropane, 1,3–Dichloropropene and Related C–3 Compounds
- 61. 1,3 Dichloropropene
- 62. Diclofop Methyl
- 63. Dicofol
- 64. Didecyl Dimethyl Ammonium Chloride
- 65. Diethatyl-Ethyl
- 66. Dimethoate
- 67. Dimethylphthalate
- 68. 2,4-Dinitrophenol
- 69. Dinocap

- 70. Dinoseb
- 71. Dioxathion
- 72. Diphacinone
- 73. Diphenamid
- 74. Diphenylamine
- 75. Dipropyl Isocinchomeronate
- 76. Diquat Dibromide
- 77. Diuron
- 78. Endosulfan
- 79. Endothall, Mono (N,N-Dimethylalkylamine) Salt
- 80. Endrin
- 81. EPN
- 82. EPTC
- 83. Ethalfluralin
- 84. Ethephon
- 85. Ethofumesate
- 86. Ethoprop
- 87. (Reserved)
- 88. Ethylene Dibromide
- 89. Ethylene Dihloride
- 90. Ethylene Glycol, Monomethyl Ether
- 91. Ethylene Oxide
- 92. Fenamiphos
- 93. Fenarimol
- 94. Fensulfothion
- 95. Fenthion
- 96. Ferbam
- 97. Fluchloralin
- 98. Flucythrinate
- 99. Fluometuron
- 100. Fluvalinate 101. Folpet
- 102. Formaldehyde
- 103. Fosamine, Ammonium Salt
- 104. Glyphosate, Isopropylamine Salt
- 105. Heptachlor
- 106. (Reserved)
- 107. Imazalil
- 108. Iprodione
- 109. (Reserved) 110. Lindane
- 110. Lindane
- 112. Lithium Hypochlorite
- 113. Malathion
- 114. Maleic Hydrazide, Diethamolamine Salt
- 115. Maleic Hydrazide, Potassium Salt
- 116. Mancozeb
- 117. Maneb
- 118. Mefluidide, Diethanolamine Salt
- 119. Metaldehyde
- 120. Metam-Sodium
- 121. Methidathion
- 122. Methomyl
- 123. Methyl Bromide
- 124. Methylene Chloride
- 125. Methylenebis (Thiocyanate)
- 126. Methyl Parathion
- 127. Metolachlor
- 128. Metribuzin 129. Mevinphos
- 130. Molinate
- 131. Monocrotophos
- 132. MSMA
- 133. Naled
- 134. Naphthalene
- 135. Napropamide

- 136. Naptalam, Sodium Salt
- 137. Nitrapyrin
- 138. Norflurazon
- 139. Octylbicycloheptene Dicarboximide
- 140. Oryzalin
- 141. Oxadiazon
- 142. Oxamyl
- 143. Oxycarboxin
- 144. Oxyfluorfen
- 145. Oxythioquinox
- 146. Paraquat Dichloride
- 147. Parathion
- 148. PCNB
- 149. PCP
- 150. Pebulate
- 151. Pendimethalin
- 152. Permethrin
- 153. Petroleum Distillate, Aromatic
- 154. Phenothrin
- 155. Ortho-Phenylphenol
- 156. Phorate
- 157. Phosalone
- 158. Phosmet
- 159. Phosphamidon
- 160. (Reserved)
- 161. Picloram
- 162. Pine Oil
- 163. Piperonyl Butoxide, Technical
- 164. PMA
- 165. Prometryn
- 166. Propamocarb
- 167. Propargite
- 168. Propetamphos
- 169. Propoxur
- 170. Propyzamide
- 171. Pyrethrins
- 172. Resmethrin
- 173. Rotenone 174. Simazine
- 175. Sodium Arsenite
- 176. (Reserved)
- 177. Sulfur Dioxide
- 178. Sulfuryl Fluoride
- 179. Terbacil
- 180. Terrazole
- 181. Tetrachlorophenol
- 182. Tetrachlorvinphos
- 183. Tetramethrin
- 184. Thiabendazole, Hypophosphite Salt
- 185. Thiobencarb
- 186. Thiophanate-Methyl
- 187. Thiram
- 188. Toxaphene
- 189. Triadimefon
- 190. S,S,S-Tributylphosphorotrithioate
- 191. Tributyltin Benzoate
- 192. Tributyltin Oxide
- 193. Trichlorophon
- 194. Trichloro-S-Triazinetrione
- 195. Triclopyr
- 196. Trifluralin
- 197. Triforine
- 198. Vernolate
- 199. Vinclozolin
- 200. Ziram

- (b) The Director has determined that certain of the active ingredients listed in subsection (a) are chemically and toxicologically similar to other active ingredients registered by the Department. Such similar active ingredients have been placed into groups. Completion of the mandatory health effects studies, required pursuant to Section 13127 of the Food and Agricultural Code, for an active ingredient listed in the group will satisfy the data requirements for all of the active ingredients in the group, unless adverse effects reported pursuant to Section 6210 indicate that the mandatory health effects studies should be completed for other active ingredients within the group. In addition, copies of the mandatory health effects studies submitted to the United States Environmental Protection Agency for any of the active ingredients listed below shall also be submitted by the registrant to the Department. The groups are listed below, and the active ingredient(s) listed in subsection (a) have an * after their name:
- 1. Alkyl (50%C14, 40%C12, 10%C16) Dimethyl Benzyl Ammonium Chloride *

Alkyl (60%C14, 30%C16, 5%C12, 5%C18) Dimethyl Benzyl Ammonium Chloride

Alkyl (25%C12, 60%C14, 15%C16) Dimethyl Benzyl Ammonium Chloride

Alkyl (47%C12, 18%C14, 10%C18, 10%C16, 15%C8–C10) Dimethyl Benzyl Ammonium Chloride

Alkyl (50%C12, 30%C14, 17%C16, 3%C18) Dimethyl Benzyl Ammonium Chloride

Alkyl (58%C14, 28%C16, 14%C12) MACASK 0 T Dimethyl Benzyl Ammonium Chloride

Alkyl (61%C12, 23%C14, 11%C16, 5%C8–C10–C18) Dimethyl Benzyl Ammonium Chloride

Alkyl (65%C12, 25%C14, 10%C16) Dimethyl Benzyl Ammonium Chloride

Alkyl (67%C12, 25%C14, 7%C16, 1%C8, C8, C10, C18) Dimethyl Benzyl Ammonium Chloride

Alkyl (90%C14, 5%C12, 5%C16) Dimethyl Benzyl Ammonium Chloride

Alkyl (93%C14, 4%C12, 3%C16) Dimethyl Benzyl Ammonium Chloride

Roccal-R (61%12, 23%C14, 11%C16, 5%C18)

Tetradecyldimethylbenzyl Ammonium Chloride

2. Aluminum Phosphide *

Magnesium Phosphide

Zinc Phosphide

3. Boric Acid *
Boric Oxide

Borax

Sodium Metaborate

Disodium Octaborate Tetrahydrate

Sodium Tetraborate (Pentahydrate)

4. Bromacil *

Bromacil, Dimethylamine Salt

Bromacil, Lithium Salt

Bromacil, Sodium Salt

5. Bromoxynil Octanoate *

Bromoxynil, Butyric Acid Ester

6. Chloramben *

Chloramben, Ammonium Salt

7. Chlordimeform *

Chloridimeform Hydrochloride

8. Ortho-Benzyl-Para-Chlorophenol *

 $Or tho-Benzyl-Para-Chlorophenol,\ Potassium\ Salt$

Ortho-Benzyl-Para-Chlorophenol, Sodium Salt

9. Copper Hydroxide *

Copper Sulfate (Anhydrous)

Copper Sulfate (Pentahydrate)

Copper Copper Ammonium Carbonate

Copper Bronze Powder

Copper Carbonate, Basic

Copper Oxide

Copper Oxychloride

Copper Oxychloride Sulfate

Copper-Sulfate (Basic)

Copper-Zinc Sulfate Complex

Cupric Oxide

10. Cyanuric Acid, Monosodium Salt *

Trichloro-S-Triazinetrione *

Dichloro-S-Triazinetrione

Sodium Dichloro-S-Triazinetrione

Sodium Dichloro-S-Triazinetrione (Dihydrate)

11. 2,4-D *

2,4-D, Dimethylamine Salt *

2,4-D, Alkanolamine Salts (Ethanol and Isopropanol Amines)

2,4-D, Butoxyethanol Ester

2,4-D, Butoxypropyl Ester

2,4-D, Butyl Ester

2,4-D, Diethanolamine Salt

2,4–D, Diethylamine Salt

2,4-D, N, N-Dimethyloleyl-Linoleylamine Salt

2,4-D, Dodecylamine Salt

2,4-D, 2-Ethylhexyl Ester

2,4-D, Isoocytl Ester

2,4-D, Isopropyl Ester

2,4-D, Morpholine Salt

2,4-D, Octyl Ester

2,4-D, N-oleyl-1, 3-Propylenediamine Salt

2,4-D, Propyl Ester

2,4-D, Propylenegylcolbutylether Ester

2,4-D, Sodium Salt

2,4-D, Tetradecylamine Salt

2,4-D, Triethylamine Salt

2,4-D, Triisopropylamine Salt

12. Dicamba *

Dicamba, Diethanolamine Salt

Dicamba, Dimethylamine Salt

Dicamba, Monoethanolamine Salt

13. Didecyl Dimethyl Ammonium Chloride *

Dioctyl Dimethyl Ammonium Chloride

Octyl Decyl Dimethyl Ammonium Chloride

Octyl Dodecyl Dimethyl Ammonium Chloride

14. Dinoseb *

Dinoseb, Amine Salt

Dinoseb, Ammonium Salt

Dinoseb Sodium Salt

Dinoseb, Triethanolamine Salt

15. Diphacinone *

Diphacinone, Sodium Salt

16. Endothall, Mono (N, N-Dimethylalkylmine) Salt *

Endothall

Endothall, Mono (N, N-Diethylalkylamine) Salt

Endothall, Dipotassium Salt

17. Lithium Hypochlorite *

Calcium Hypochlorite

Sodium Hypochlorite

18. Maleic Hydrazide, Diethanolamine Salt *

Maleic Hydrazide, Potassium Salt *

Maleic Hydrazide

19. [Reserved.]

20. MSMA *

DSMA

21. Paraquat Dichloride *

Paraquat Bis (Methylsulfate)

22. PCP *

History

- 1. New section filed 6-16-87 as an emergency; operative 6-16-87 (Register 87, No. 27). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 10-14-87.
- 2. Certificate of Compliance including amendment transmitted to OAL 10–13–87 and filed 11–12–87 (Register 87, No. 47). List of 200 active ingredients originally established by emergency adoption of section 6198.5 on 6/16/87 was modified prior to final approval. Items numbered (8) Aluminum Phosphide, (33) Chlorine, (42) Copper Hydroxide, (87) Ethyl Alcohol, (106) Hydrogen Chloride, (109) Isopropyl Alcohol, (160) Phosphoric Acid and (176) Sulfur, were deleted based upon the Department of Food and Agriculture's determination that available data concerning these active ingredients indicate that the chronic health effects data required pursuant to sections 13123 and 13127 of the Food and Agricultural Code are not required to be submitted for these active ingredients.
- 3. Editorial correction of HISTORY 2 (Register 88, No. 4).
- 4. Amendment of subsection (b), redesignation of (b)19 to reserved, and amendment of NOTE filed 11–9–93; operative 12–21–93 (Register 93, No. 46).
- Editorial correction deleting previously repealed text of subsection (b)19. (Register 95, No. 39).

§ 6199. Fines for Ground Water Protection Data Gaps.

- § 6199.7. Submission of Groundwater Protection Data On Specified Ingredients and Degradation Products.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 13143 and 13145, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-13-90; operative 7-13-90 (Register 90, No. 32).
- 2. Repealer filed 8-1-96; operative 8-31-96 (Register 96, No. 31).

Article 4. Conditional Registration

§ 6200. Conditional Registration.

The director may waive specific data requirements in this subchapter for a period reasonably sufficient, not to exceed three years, for the generation and submission of such required data provided:

- (a) The pesticide product is registered pursuant to the Federal Insecticide, Fungicide and Rodenticide Act, the product is to be used under a Federal Experimental Use Permit, or the product is for use in California only.
- (b) The applicant has provided the director with all data the applicant has available required by the U.S. EPA and by this subchapter to support registration of the pesticide product.
- (c) No conditional registration shall be granted unless the data includes all of the following:
 - (1) Acute oral and dermal LD₅₀ data on the product.
- (2) Acute LC₅₀ data on products which produce respirable aerosols or gases.
 - (3) Primary eye and skin irritation data on the product.
- (4) When human contact is likely with soils or foliage containing residues, foliar and soil residue data as specified in Sections 6181 and 6182, sufficient to establish safe reentry level or interval.
- (5) Analytical methods to determine residues of (1) each active ingredient and (2) each toxic metabolite that may result from the active ingredient for which a tolerance has been established by the U.S. EPA in the Code of the Federal Regulations. Test methods shall, as applicable, allow the director to determine residues in or on plant tissue, soil, and water.
- (6) Preliminary efficacy data indicating the product is effective for the proposed use.
 - (d) The director complies with Section 6158.
 - (e) That each item of data waived is for a specified period.

Such period shall be no more than necessary for the applicant using good faith efforts to develop the information required by Sections 6176–6179, 6180(a), 6181–6183.

- (f) The director makes a written finding, supported by substantial evidence, that the use of the pesticide during the periods while data are being developed, is not expected to cause any significant adverse effect on the environment, that a clear need for the use of the product in California exists while the data is being developed, and that specified benefits of using the pesticide outweigh specified risks to human health and the environment.
- (g) The director requires the use of the best pest control methods and technology available including, but not limited to, methods of application to protect human health and the environment, and limitations to mitigate adverse effects to nontarget organisms or areas.
- (h) Each registrant be required to submit a report to the director annually (with product renewal application if such a waiver extends over Janu-

- ary 1 of any year) and whenever specifically requested by the director, detailing progress made towards development of each item of the waived data
- (i) Where the application is for a pesticide product containing a new active ingredient, the applicant has provided the director with the following data in addition to the data required by section 6200(c), (1)–(6) when required by the U.S. EPA to support the full unconditional registration of the product pursuant to Section 3 of the Federal Insecticide, Fungicide and Rodenticide Act and when specifically requested by the director:
- (1) Results of a two-year feeding study on oncogenicity on active ingredients in at least one animal species.
- (2) Results of a teratogenicity study and one generation of a two-generation combined male-female reproductive study on active ingredients.
- (3) Results of three mutagenicity studies on active ingredients that detect gene mutations, chromosomal aberrations, and DNA damage/repair.
- (4) Data to support medical management of poisoning or injury. NOTE: Authority cited: Sections 11456 and 12781, Food and Agricultural Code. Reference: Sections 11501 and 12824–12825, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2369.5 to Section 6200 and designation of new Article 4 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending first paragraph and subsections (b), (c)(5) and (i) filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).
- 4. Change without regulatory effect amending subsections (c)(1) and (c)(3) filed 8–14–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 33).
- Change without regulatory effect amending subsections (b), (c)(1), (c)(3), (c)(5) and (i) filed 2–7–2007 pursuant to section 100, title 1, California Code of Regulations (Register 2007, No. 7).
- Amendment of subsections (b), (c)(1), (c)(3), (c)(5) and (i) filed 2-8-2007; operative 3-10-2007 (Register 2007, No. 7).

Article 5. Exemptions

§ 6205. Deodorizer or Cleansing Agent.

A product claimed, represented and intended solely as a deodorizer or deodorant, or as a cleansing agent, is not considered to be a pesticide. NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 12753 and 12801, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 6210 to Section 6205 and designation of new Article 5 (Sections 6205 and 6206) filed 7–19–85 (Register 85, No. 29). For prior history of Section 6210, see Register 82, No. 32.
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6206. Section 18 Exemptions.

The director may apply to the U.S. EPA for a Section 18 exemption, pursuant to the Federal Insecticide, Fungicide and Rodenticide Act, when he or she determines that a specific public health quarantine or crisis emergency exists that requires the use of an unregistered pesticide and there is no feasible alternative to the exemption. In the case of Section 18 exemptions, the director may waive the data requirements in this subchapter, but shall require the utilization of the best pest control methods and technology available including, but not limited to, pest population monitoring, a determination of treatment thresholds, methods of application to protect human health and the environment, and limitations to mitigate adverse effects to nontarget organisms.

NOTE: Authority cited: Sections 11456, 12781 and 12824, Food and Agricultural Code. Reference: Sections 11501 and 12751–13102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2369(e) to Section 6206 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending section filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

Article 6. Adverse Effects Disclosure

§ 6210. Adverse Effect Disclosure.

(a) If, during the registration process or at any time after the registration of a pesticide, the registrant has factual or scientific evidence of any adverse effect or risk of the pesticide to human health or the environment (including ambient air quality), the registrant shall immediately submit such evidence to the director. All such information including, but not limited to that required under Section 6(a)(2) of the Federal Insecticide, Fungicide and Rodenticide Act, shall be submitted to the director.

(b) For the purposes of this section, "environment" means the total human surroundings, physical and biological, natural and artificial, including air, water, soil, plants, wildlife, and other ecological factors affecting the growth, development, and safety of people and other living organisms.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Renumbering of former Chapter 4 (Article 3, Section 2350) to Chapter 6 (Article 2, Section 6210) filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32). For prior history, see Register 78, No. 52.
- 2. Editorial renumbering of former Section 6210 to Section 6205, renumbering of former Section 2360.1 to Section 6210 and designation of new Article 6 filed 7–19–85 (Register 85, No. 29).
- 3. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 7. Renewals

§ 6215. Renewal.

- (a) Each registrant shall submit with each renewal application a statement, signed by an authorized official of the applicant under penalty of perjury, that, prior to filing the renewal application the registrant has, to the best of the applicant's knowledge based upon all information available to the applicant, complied with the provisions of Section 6210, (Adverse Effect Disclosure).
- (b) Each renewal shall be issued within 60 days after the director receives an accurate and complete renewal application unless the director takes action pursuant to Sections 12816, 12825, or 12827 of the Food and Agricultural Code.
- (c) The director shall, when renewing a pesticide registration without a reevaluation, make a written finding that he or she has not received sufficient information necessitating reevaluation pursuant to Sections 6220 and 6221.
- (d) Label amendments, including those made pursuant to Sections 18 and 24 (c) of the Federal Insecticide, Fungicide and Rodenticide Act, are subject to departmental review and approval pursuant to Section 6170(b). Approved label amendments are not subject to separate registration renewal requirements.

NOTE: Authority cited: Sections 11456, 12781, 14004.5 and 14006.7, Food and Agricultural Code. Reference: Sections 12812, 12817–12820 and 12824–12827, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2366 to Section 6215 and designation of new Article 7 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 6-29-87; operative 7-29-87 (Register 87, No. 31).
- 3. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6216. Annual Registration Renewal Fee.

Beginning with those certificates of registration expiring on December 31, 2003, the fee for annual renewal is \$750 for each product.

NOTE: Authority cited: Sections 12781 and 12812, Food and Agricultural Code. Reference: Section 12812, Food and Agricultural Code.

History

1. New section filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Cer-

- tificate Compliance is needed pursuant to Food and Agricultural Code section 12812.
- 2. Editorial correction of HISTORY 1 (Register 2004, No. 37).

§ 6217. Penalties for Late Payment of Annual Renewal Application Fee.

If renewal of a certificate of registration is not applied for within one calendar month after December 31 of each year, a penalty of 20 percent of the original amount due shall be added to the renewal fee for each product

NOTE: Authority cited: Sections 12781, 12812 and 12818, Food and Agricultural Code. Reference: Section 12818, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 12812
- 2. Editorial correction of HISTORY 1 (Register 2004, No. 37).

Article 8. Reevaluation Criteria

§ 6220. Reevaluation.

The director may, at any time, evaluate a registered pesticide to carry out the provisions of Sections 12824, 12825, 12825.5, 12826 and 12827 of the Food and Agricultural Code. The Director shall investigate all reported episodes and information received by the Director that indicate a pesticide may have caused, or is likely to cause, a significant adverse impact, or that indicate there is an alternative that may significantly reduce an adverse environmental impact. If the Director finds from the investigation that a significant adverse impact has occurred or is likely to occur or that such an alternative is available, the pesticide involved shall be reevaluated.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 11501, 12824, 12825, 12825.5, 12826 and 12827, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 6220 to Section 6300, renumbering of former Section 2367(a) to Section 6220 and designation of new Article 8 (Sections 6220–6228) filed 7–19–85 (Register 85, No. 29). For prior history, see Register 82, No.32.
- 2. Amendment filed 1-18-89; operative 2-17-89 (Register 89, No. 5).
- 3. Change without regulatory effect amending section and Note filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6221. Reevaluation Criteria.

The director shall also reevaluate a pesticide when certain factors have been found such as, but not limited to:

- (a) Public or worker health hazard.
- (b) Environmental contamination.
- (c) Pesticide residue overtolerance.
- (d) Fish or wildlife hazard.
- (e) Lack of efficacy.
- (f) Undesirable phytotoxicity.
- (g) Hazardous packaging.
- (h) Inadequate labeling.
- (i) Disruption of the implementation or conduct of pest management.
- (j) Other information suggesting a significant adverse risk.
- (k) Availability of an effective and feasible alternate material or procedure which is demonstrably less destructive to the environment.
- (1) Discovery that data upon which a registration was issued is false, misleading, or incomplete.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 11501, 12824 and 12825.5, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2367(b) to Section 6221 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 1–18–89; operative 2–17–89 (Register 89, No. 5).
- 3. Change without regulatory effect amending first paragraph, subsection (c) and NOTE filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

Page 379

§ 6222. Reevaluation Data Requirements.

(a) During a reevaluation, the director shall require submission of all data required for registration of a new pesticide by the U.S. EPA and by sections 6159, 6170, 6176–6179, 6180(a), 6181–6192, and 6200 which is relevant to the focus of the reevaluation and has not previously been submitted to the department. The director shall allow a reasonable time for the development and submission of such data, not to exceed a period of two years. Notwithstanding the lack of such data the director shall act expeditiously to protect against risks to human health and the environment.

(b) If information is obtained from an individual or organization indicating possible adverse effect from the use of a pesticide, the director shall respond in writing to the individual or organization indicating the reasons for his or her decision either to reevaluate or not reevaluate the pesticide registration based upon the information submitted.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2367(c) and (d) to Section 6222 filed 7–19–85 (Register 85, No. 29).
- 2. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending subsection (a) filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6223. Notification.

The registrant whose pesticide product has been designated for reevaluation shall be immediately notified by the director. Such notice shall include the basis for the reevaluation.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2367(e) to Section 6223 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6224. Determinations.

During the reevaluation, the director shall determine if the pesticide should be classified as a restricted material pursuant to Section 14004.5 of the Food and Agricultural Code; and if additional restrictions on use are necessary, or if action pursuant to Section 12824, 12825, or 12826 of the Food and Agricultural Code should be taken.

NOTE: Authority cited: Sections 12781, 14005 and 14006.7. Food and Agricultural Code. Reference: Sections 11501, 12824, 12825, 12825.5, 12826, 14001, 14004.5 and 14005, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2367(e) to Section 6224 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment filed 1-18-89; operative 2-17-89 (Register 89, No. 5).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6225. Reports.

The director shall publish a semi-annual report on pesticides reevaluated, under reevaluation, or which for factual or scientific information was received but no reevaluation was initiated.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2367(f) to Section 6225 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6226. Product Evaluation.

The director shall undertake continuous evaluation of all registered products. First priority shall be given to those products selected according to the specific criteria set forth in this section. Next priority shall be given to other products considered by the director to pose the greatest risk to people and the environment.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2367(g) to Section 6226 filed 7–19–85 (Register 85, No. 29).
- 2. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6227. Annual Review.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2368 to Section 6227 filed 7–19–85 (Register 85, No. 29).
- 2. Repealer filed 1-18-89; operative 2-17-89 (Register 89, No. 5).

§ 6228. Designation of Restricted Materials.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751 and 14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2450.5 to Section 6228 filed 7–19–85 (Register 85, No. 29).
- 2. Repealer filed 1-18-89; operative 2-17-89 (Register 89, No. 5).

Article 9. Trade Secret

§ 6230. Trade Secrets.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2360(f) to Section 6230 and redesignation of new Article 9 (Sections 6230 and 6231) filed 7–19–85 (Register 85, No. 29).
- 2. Repealer filed 6-29-87; operative 7-29-87 (Register 87, No. 31).

§ 6231. Trade Secret Determinations.

NOTE: Authority cited: Sections 407, 11502, 12005, 12111, 12531, 12561, 12781, 12824, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2360(g) to Section 6231 filed 7–19–85 (Register 85, No. 29).
- 2. Repealer filed 6–29–87; operative 7–29–87 (Register 87, No. 31).

Article 10. Labeling

§ 6235. Name, Brand, or Trademark of Pesticide.

The name, brand, or trademark of the pesticide appearing on the label shall be that under which the pesticide is registered.

NOTE: Authority cited: Sections 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2330 to Section 6235 and designation of new Article 10 (Sections 6235–6243, not consecutive) filed 7–19–85 (Register 85, No. 29).
- 2. Change without regulatory effect amending section heading, section and NOTE filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6237. Placement of Label.

The label shall appear on the pesticide or the immediate container thereof. If the immediate container is enclosed within a wrapper or outside container through which the label cannot be clearly read by a person with normal vision, the label must also appear on such outside wrapper or container if it is a part of the retail package.

NOTE: Authority cited: Sections 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- Editorial renumbering of former Section 2390 to Section 6237 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6238. Acceptance of Labeling.

No label may represent a registered pesticide and no supplemental or associated information, whether written or oral, may represent a registered pesticide until such label and information is accepted by the director as part of the labeling. Recommended dilutions, if any, for use of a pesticide shall be submitted with the application.

NOTE: Authority cited: Sections 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2361 to Section 6238 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6239. Name and Address of Manufacturer, Distributor, Packer, Formulator, or Registrant.

An unqualified name and address given on the label shall be considered as the name and address of the manufacturer. If the registrant's name appears on the label and registrant is not the manufacturer, or if the name of the person for whom the pesticide was manufactured appears on the label, it must be qualified by appropriate wording such as "Packed for _____," "Distributed by ______," or "Sold by ______," to show that the name is not that of the manufacturer. If a person has two or more locations at which a pesticide is manufactured or packaged, or from which it is distributed, the name and address of the person's principal office will be accepted except in cases where the director determines that the address of the exact location is necessary for the protection of the public. The address of the manufacturer, registrant, or person for whom manufactured shall include the street address, if any, unless the street address is shown in a current city directory or telephone directory.

NOTE: Authority cited: Sections 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- Editorial renumbering of former Section 2391 to Section 6239 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6240. Legibility of Label and Labeling.

All words, statements, graphic presentations, or designs required by the Food and Agricultural Code or these regulations to appear on the label or labeling must be clearly legible and easy to read by a person with normal vision. The signal word, when required, and the statement, "Keep out of the reach of children," when necessary, shall be of a size bearing a reasonable relationship to the other type on the front part of the label and to the size of the container. The signal word, when required, shall not be less than 18 point type, and the said warning statement shall not be less than 12 point type, unless the label space on the container is too small to accommodate such type sizes, in which case, the director shall prescribe the type size. When the size of the label space requires a reduction in type size, the reduction shall be made to a size no smaller than is necessary, and in no event to a size smaller than 6 point type.

NOTE: Authority cited: Sections 11456, 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of former Section 2393 to Section 6240 filed 7–19–85 (Register 85, No. 29).

 Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6241. Registration Number.

- (a) The assigned registration number shall appear on each pesticide label.
- (b) The registration number shall be shown on the label substantially as follows:

EPA REGISTRATION NO. 00000-00000-00000 or

EPA REG. NO. 00000-00000-00000 or if no Federal number has been assigned

STATE REGISTRATION NO. 00000-00000-00000 or STATE REG. NO. 00000-00000-00000

(The first five digits reflect the manufacturer or basic registrant, the second five digits the product, and the third five digits, if applicable, reflect the distributor.)

NOTE: Authority cited: Sections 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2394 to Section 6241 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending subsection (a) and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6242. Warning or Caution Statement.

Warning or caution statements, which are necessary, and if complied with, adequate to prevent injury to living man and useful vertebrate animals, useful vegetation, and useful invertebrate animals, must appear on the label in a place sufficiently prominent to warn the user, and must state clearly and in nontechnical language the particular hazard involved in the use of the pesticide, e.g., ingestion, skin absorption, inhalation, flammability or explosion, and the precautions to be taken to avoid accident, injury, or damage.

(a) The label of every pesticide shall bear warnings or cautions which are necessary for the protection of the public, including the statement, "Keep out of reach of children," and a signal word such as "Danger," "Warning," or "Caution" as the director may prescribe, on the front panel or that part of the label displayed under customary conditions of purchase; provided, however, the director may permit reasonable variations on the placement of that part of the required warnings and cautions other than the statement, "Keep out of the reach of children," and the required signal word, if in his opinion such variations would not be injurious to the public. If a pesticide is marketed in channels of trade where the likelihood of contact with children is extremely remote, or if the nature of the product is such that it is likely to be used on infants or small children without causing injury in under reasonably foreseeable conditions, the director may waive the requirement of the statement, "Keep out of reach of children" if in his opinion such a statement is not necessary to prevent injury to the public. The director may permit a statement such as "Keep away from infants and small children" in lieu of the statement "Keep out of reach of children" if he determined that such a variation would not be injurious to the public.

(b) The label of every pesticide which is highly toxic to man shall bear the word "Danger" along with the word "Poison" in red on contrasting background in immediate proximity to the skull and crossbones, and an antidote statement including directions to call a physician immediately on the front panel or that part of the label displayed under customary conditions of purchase; provided, however, the director may permit reasonable variations in the placement of the antidote statement if some reference such as "See antidote statement on back panel" appears on the front panel near the word "Poison" and the skull and crossbones.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2395 to Section 6242 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

Title 3

§ 6243. Scope of Labeling Requirements.

The labeling requirements in this article shall provide that pesticide products registered by the director meet, but not exceed, current U.S. EPA labeling requirements. The labeling requirements in this article shall apply equally to pesticide products currently registered by U.S. EPA and submitted to the director for registration, and those requiring registration only pursuant to section 12811 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 11456 and 12781, Food and Agricultural Code. Reference: Sections 12751–13102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2389 to Section 6243 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending section filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6247. Sub-Packaging of Certain Pesticides for Resale to Consumers.

NOTE: Authority cited: Sections 12781 and 14005, Food and Agricultural Code. Reference: Sections 12751–12994, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former section 2396 to section 6247 and designation of new article 11 filed 7–19–85 (Register 85, No. 29).
- 2. Editorial correction of printing error in subsection (c) (Register 91, No. 33).
- 3. Repealer filed 5–31–95; operative 6–30–95 (Register 95, No. 22).
- Change without regulatory effect amending section heading and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

Article 12. Consultation and Public Review

§ 6252. Pesticide Registration, Renewal, and Reevaluation Consultation.

This section applies to the registration, renewal of registration, and reevaluation of pesticides.

The Department shall consult on decisions proposed pursuant to this section with public agencies which have jurisdiction by law over the use of pesticides or over activities or resources which may be affected by the use of pesticides. In doing so, the director shall establish an interagency advisory committee that shall be known as the Pesticide Registration and Evaluation Committee. This committee shall meet bimonthly or more often when requested by the director. The Pesticide Registration and Evaluation Committee shall consist of the following members:

- (a) The Director of the Department of Pesticide Regulation or his or her designee who shall serve as chair of the committee;
- (b) A representative from each of the other boards, offices, and departments in the California Environmental Protection Agency:
 - (1) The Air Resources Board;
 - (2) The Office of Environmental Health Hazard Assessment;
 - (3) The Integrated Waste Management Board;
 - (4) The State Water Resources Control Board;
 - (5) The Department of Toxic Substances Control.
 - (c) A representative from each of the following state agencies:
 - (1) The Department of Food and Agriculture;
 - (2) The Department of Fish and Game;
 - (3) The Department of Industrial Relations;
 - (4) The Department of Health Services;
- (5) The Structural Pest Control Board in the Department of Consumer Affairs;
 - (6) The University of California;
 - (d) A representative from each of the following federal agencies:
- (1) The U.S. Department of Agriculture/Agricultural Research Service;

- (2) The U.S. Environmental Protection Agency, Region IX.
- (e) The President of the California Agricultural Commissioners and Sealers Association or his or her designee;
- (f) A representative of any other public agency that the Director of the Department of Pesticide Regulation deems appropriate after consultation with the existing committee membership.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2443(a) to Section 6252 and designation of new Article 12 (Sections 6252–6255) filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Amendment filed 11–27–2001; operative 12–27–2001 (Register 2001, No. 48)
- Change without regulatory effect amending section heading filed 8–14–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 33).

§ 6253. Proposed Decision.

- (a) Each proposed decision relating to registration and renewal, and each decision to begin reevaluation shall be posted on the official bulletin boards of the Department, and of each commissioner's office, and in each District office of the Division of Pest Management, Environmental Protection and Worker Safety for 30 days for public review and comment.
- (b) A copy of the notice shall be sent to any person who requests it in writing. In addition, the public agencies consulted under Section 6252 shall be sent a copy of the notice.

NOTE: Authority cited: Sections 11456 and 12781, Food and Agricultural Code. Reference: Section 21080.4, Public Resources Code.

HISTORY

- 1. Editorial renumbering of former Section 2443(b) to Section 6253 filed 7–9–85 (Register 85, No. 29).
- 2. Amendment of subsection (a) filed 6–29–87; operative 7–29–87 (Register 87, No. 31)
- Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6254. Public Report.

Each public report shall include a description of the proposed action, a statement of any significant adverse environmental effect that can reasonably be expected to occur, directly or indirectly, from implementing the proposal, and a statement of any reasonable mitigation measures that are available to minimize significant adverse environmental impact.

Each public report shall also contain a statement and discussion of reasonable alternatives which would reduce any significant environmental impact. The public report may be included in the notice of proposed decision. The director may develop a schedule of actual cost for the reproduction of public reports to be charged to those requesting copies.

- (a) The director shall not approve an activity which would cause a significant adverse environmental impact if there is a feasible alternative or feasible mitigation measure available which would substantially lessen any significant adverse impact which implementation of the proposal may reasonably be expected to have on the environment.
- (b) Written Evaluation. The final action taken in regard to a decision subject to this section in which a significant adverse environmental point is raised during the evaluation process shall include a written evaluation of such points approved by the director.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2443(c)–(e) to Section 6254 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending subsection (b) filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

Page 382 Register 2004, No. 37; 9–10–2004

§ 6255. Notice of Decision.

A notice of each decision subject to this article shall be filed within a week of its issuance with the Secretary of Resources for posting. Such notices shall be available for public inspection and shall remain posted for a period of 30 days.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12111, 12531, 12561, 12781, 12976, 12981, 14005 and 14006.7, Food and Agricultural Code. Reference: Sections 11401–12121, 12501–12671, 12751–13102 and 14001–14104, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2443(f) to Section 6255 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending section filed 6–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

§ 6256. Pest Management Advisory Committee.

- (a) There is within the Department of Pesticide Regulation a Pest Management Advisory Committee. The Pest Management Advisory Committee shall consist of the following members:
 - (1) Six ex officio members;

The Director of the Department of Pesticide Regulation or his/her designee who shall serve as chair of the committee;

The Secretary of the California Department of Food and Agriculture or his/her designee who shall serve as vice chair;

The President of the University of California or his/her designee;

The Regional Administrator of the United States Environmental Protection Agency Region IX or his/her designee;

The Chancellor of the California State University or his/her designee; The President of the County Agricultural Commissioners and Sealers Association or his/her designee.

(2) The following members who shall serve an initial term of office of from one to three years, as determined by the chair at the time of appointment, so that approximately one—third of these original committee members shall be replaced annually for the first three years. Subsequent appointments shall be for a term of office of three years;

Five members representing academia and public foundations.

Six members representing agricultural production.

Four members representing environmental and public interest groups. One member representing farm labor organizations.

One member representing general public and consumer advocacy.

One member representing nonagricultural pesticide user groups.

Two members representing pest control advisers.

Four members representing registrants and trade associations.

(b) The members of the Pest Management Advisory Committee shall be appointed by the Director of the Department of Pesticide Regulation, and serve at the pleasure of the chair. Vacancies will be filled for any unexpired term of office as appropriate. The Pest Management Advisory Committee shall assist the Department of Pesticide Regulation in identifying, facilitating, and promoting environmentally sound pest management practices and pest management systems. Pest Management Advisory Committee activities include, but are not limited to, reviewing proposals for pest management research and recommending to the Director which proposals should be funded. Upon the joint decision of the chair and vice chair, funds in the Food Safety Account in the Department of Pesticide Regulation may be expended, upon appropriation, for pest management research purposes to carry out the recommendations of the Pest Management Advisory Committee. The committee shall meet at least quarterly or at the request of the chair. The chair may appoint subcommittees as needed to serve in an advisory capacity. Pest Management Advisory Committee members and any subcommittee members shall serve without compensation.

NOTE: Authority cited: Section 12536, Food and Agricultural Code. Reference: Section 12536, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–14–96; operative 2–14–96 pursuant to Government Code section 11343.4(d) (Register 96, No. 7).
- 2. Amendment filed 11-27-2001; operative 12-27-2001 (Register 2001, No. 48).

Article 13. Research Authorization

§ 6260. Authorization for Research.

- (a) With the exception of those persons exempted by section 6268, a written authorization for research shall be obtained from the director prior to any experimental, unregistered use of a pesticide.
- (b) The authorization may specify conditions under which the research shall be conducted. The conditions may include, but are not limited to, handling of the treated commodity, safety equipment, reentry intervals, medical monitoring, and field posting.
- (c) Research requiring an approved human exposure protocol pursuant to section 6710, shall be conducted in accordance with that protocol.
- (d) The Director may terminate, amend, or refuse to issue an authorization whenever it is determined that:
- (1) the research may involve a hazard to handlers and/or field workers, the public health or the environment,
- (2) the research is used for purposes unrelated to pesticide data development, or
- (3) violations of the authorization, a previous authorization, or divisions 6 or 7 of the Food and Agricultural Code, or regulations adopted pursuant to them, have occurred in connection with such research.
- (e) The research shall be conducted in accordance with the conditions of the authorization and the research authorization regulations of this article

NOTE: Authority cited: Sections 12781 and 12976, Food and Agricultural Code.Reference: Sections 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former section 3092 to section 6260 and designation of new article 13 filed 7–19–85 (Register 85, No. 29).
- 2. Amendment of former subsection (a), and renumbering and amendment of former subsections (b) to section 6262, (c) to section 6263, (d) to section 6261 and (e) to section 6264 filed 6–29–87; operative 7–29–87 (Register 87, No. 31).
- 3. Change without regulatory effect of NOTE filed 8-26-88; operative 8-26-88 (Register 88, No. 36).
- 4. New subsections (b), (c) and (e), and amendment of subsections (a) and (d) filed 5-23-90; operative 6-22-90 (Register 90, No. 27).
- 5. Change without regulatory effect amending subsection (a) and NOTE filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6261. Exemptions from Authorization for Research.

NOTE: Authority cited: Sections 407, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 6260(d) to section 6261 filed 6-29-87; operative 7-29-87 (Register 87, No. 31).
- 2. Change without regulatory effect of NOTE filed 8-26-88; operative 8-26-88 (Register 88, No. 36).
- 3. Renumbering and amendment of section 6261 to section 6268 filed 5–23–90; operative 6–22–90 (Register 90, No. 27).

§ 6262. Application for Research Authorization.

- (a) Application for a research authorization shall be made on a form prescribed by the director. The application shall require applicants to provide the following information:
 - (1) Name, mailing address and telephone number of applicant;
 - (2) Pesticide to be applied:
 - (A) The brand name, common name, or ID number;
 - (B) Residue tolerance established;
 - (C) U.S. EPA registration number;
 - (D) Dosage of active ingredient;
 - (E) Method of application;
 - (F) Type of pesticide;
- (3) Type of site or commodity and stage of growth at which pesticide will be applied;
 - (4) Size, number, and total area of trials;
 - (5) Date of first and last applications;
 - (6) Type of data sought;
 - (7) Planned disposition of treated commodity; and

- (8) Signature and title of persons responsible for the trials.
- (b) The director may require additional data if necessary to assess the potential adverse effects to workers, the public, and/or the environment. NOTE: Authority cited: Sections 11456, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12995 and 14006.6, Food and Agricultural Code.

- 1. Renumbering and amendment of former section 6262 to section 6270, and new section 6262 filed 5-23-90; operative 6-22-90 (Register 90, No. 27). For prior history, see Register 88, No. 36
- 2. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending subsection (a)(2)(C) filed 6-5-2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).
- 4. Editorial correction of HISTORY 3 (Register 2002, No. 27).

§ 6263. Experimental Applications.

NOTE: Authority cited: Sections 407, 12781 and 12796, Food and Agricultural Code. Reference: Sections 11411, 11501(a)(b)(f), 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 6260(c) to section 6263 filed 6-29-87; operative 7-29-87 (Register 87, No. 31).
- 2. Renumbering and amendment of section 6263 to section 6272 filed 5–23–90; operative 6–22–90 (Register 90, No. 27).

§ 6264. Notification and Use of Research Authorization.

- (a) At least 24 hours prior to beginning application of a pesticide requiring a research authorization, the researcher shall submit the following information to the agricultural commissioner of the county where the proposed trial site is located:
 - (1) a copy of the research authorization, and
- (2) a notice of intent as provided in section 6434(b) specifying the location of each trial. If not submitted with the notice of intent, the researcher shall submit a plot map of the exact location of each trial within seven days after initial application of the pesticide.
- (b) If no application of pesticide is made following the notice of intent, the researcher shall notify the agricultural commissioner within two weeks by submitting an Experimental Trial Report as described in section 6266(a).

NOTE: Authority cited: Sections 11456, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 6260(e) to section 6264 filed 6-29-87; operative 7-29-87 (Register 87, No. 31).
- Change without regulatory effect of NOTE filed 8-26-88; operative 8-26-88 (Register 88, No. 36)
- 3. Repealer and new section filed 5-23-90; operative 6-22-90 (Register 90, No.
- 4. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6264.1. Research Authorization—Pesticide Form.

HISTORY

- 1. Sample form printed as an addendum to section 6264 (Register 87, No. 31).
- 2. Repealer filed 5–23–90; operative 6–22–90 (Register 90, No. 27).

§ 6266. Reports of Research Authorization Use.

- (a) Following the final application of a pesticide requiring a research authorization in a particular trial location, and at least 24 hours prior to either harvest or crop destruction, the researcher shall submit an Experimental Trial Report to the agricultural commissioner including the following information:
 - (1) Firm name;
 - (2) Authorization number;
 - (3) Commodity or site treated;
 - (4) Date of report;
 - (5) Trial location;
 - (6) Date and method of planned disposition of treated commodity; and
- (7) Name and telephone number of researcher or representative responsible for crop disposition.

- (b) Within two weeks following the expiration date of the research authorization, the researcher shall submit to the Department an Experimental Pesticide Use Report. This report shall include the following informa-
 - (1) Research authorization number;
 - (2) Pesticide products applied;
 - (3) Commodity or site treated;
 - (4) Rate of active ingredient per acre or unit;
 - (5) Total amount of active ingredient used;
 - (6) Total acres or units treated:
 - (7) Counties where trials were conducted;
 - (8) Name, address and phone number of researcher; and
- (9) Certification that the commodity was harvested/disposed of as required by the authorization.

NOTE: Authority cited: Sections 11456, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. New section filed 5-23-90; operative 6-22-90 (Register 90, No. 27).
- 2. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6268. Exemptions from Authorization for Research.

- (a) A pesticide registrant is exempt from the provisions of section 6260 when the registrant is the operator of the property upon which the research is to be conducted and continues to be the operator until the treated commodity is destroyed or harvested.
- (b) Personnel employed by colleges and universities and engaged in pesticide research are exempt from section 6260 if they are operating according to the current established policy of the college or university which covers pesticide use and experimentation.

NOTE: Authority cited: Sections 11456, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 6261 to section 6268 filed -23-90; operative 6-22-90 (Register 90, No. 27).
- 2. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6270. Costs and Fees Prohibited.

The research authorization holder shall not charge the operator, owner, or person in possession of the property upon which the research is being conducted for the materials or use of the pesticide in connection with the research authorization. This prohibition includes charges or fees for labor and services in connection with the research authorization.

NOTE: Authority cited: Sections 11456, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 6262 to section 6270 filed -23-90; operative 6-22-90 (Register 90, No. 27)
- 2. Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6272. Possession of Authorization.

Each person making an application of a pesticide under a research authorization shall have a copy of the authorization available at the use site at the time of the application.

NOTE: Authority cited: Sections 11456, 12781 and 12976, Food and Agricultural Code. Reference: Sections 11501(a)(b)(f), 12995 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of section 6263 to section 6272 filed 5-23-90; operative 6-22-90 (Register 90, No. 27)
- 2. Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 14. Violations

§ 6300. Misbranding.

A pesticide shall be deemed misbranding if its labeling contains one or more of the following or any graphic representation which is likely to be deceiving or misleading:

(a) A false or misleading statement concerning the effectiveness of the product as a pesticide;

Page 384

- (b) A false or misleading comparison with other pesticides;
- (c) Unwarranted claims as to the safety of the pesticide or its ingredients, including such statements as "Safe," "Nonpoisonous," "Nontoxic," "Noninjurious," or "Harmless" with or without such qualifying phrase as "When used as directed";
- (d) Any statement directly or indirectly implying that a specific brand pesticide is recommended or endorsed by any agency of the Federal Government or the State of California or any political subdivision, agency or instrumentality thereof.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 12881 and 12995, Food and Agricultural Code.

HISTORY

- Editorial renumbering of former Section 6220 to Section 6300 and designation of new Article 14 (Sections 6300 and 6301) filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending section and Note filed 3-27-97
 pursuant to section 100, title 1, California Code of Regulations (Register 97, No.
 13).

§ 6301. Unregistered Products.

- (a) Section 12995 shall not apply to an individual, who personally uses a substance for the purpose of controlling their residence or garden pests, provided no food or feed commodities treated with the substance are sold or distributed to another person or fed to animals that are sold or distributed to another person for human consumption.
- (b) Pesticide products whose registration has lapsed shall not be sold by the registrant, but may be possessed and sold by a dealer for two years after the last date of registration. If acquired while legally registered or within two years after the date of last registration, such products may be possessed and used according to the directions on the label.
- (c) Notwithstanding the provisions of (b), it is unlawful to possess or use any pesticide which has been cancelled or suspended pursuant to Sections 12825, 12826, or 12827 of the Food and Agricultural Code or under FIFRA (7 U.S.C. Section 136 et seq.), except as provided in such cancellation or suspension.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Section 12995, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2440.5 to Section 6301 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect amending subsection (c) and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).
- Amendment of subsection (a) and Note filed 7-3-98; operative 8-2-98 (Register 98, No. 27).

Article 15. Data Cost-Sharing

§ 6310. Dispute Resolution Proceedings.

If agreement cannot be reached about the terms and amount of payment required pursuant to Food and Agricultural Code section 12811.5, at any time more than 90 days after the issuance of an irrevocable offer to pay, either the applicant, source, or data owner may initiate or with the consent of all parties, join a binding dispute resolution proceeding under the rules prescribed under Title 29 Code of Federal Regulations, Part 1440, or its successor provision, if any, or other rules to which the applicant and data owner may agree.

- (a) To the extent feasible, and upon mutual consent of the parties, the proceeding may be consolidated with any dispute resolution process taking place between the same parties and being conducted pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. Sec 136a et.seq.).
- (b) In determining the amount due under this section, the decisionmaker(s) of a dispute resolution proceeding shall consider, among other factors, that the data owner's exclusive right to sell the pesticide resulted in the data owner recovering all or part of the costs of generating the data.
- (c) The finding of the decisionmaker(s) in a dispute resolution proceeding shall be final and conclusive, and no official or court shall have power or jurisdiction to review that finding and determination, except for fraud, misrepresentation, or other misconduct by one of the parties to the

dispute resolution proceeding or the decisionmaker(s) where there is a verified complaint with supporting affidavits attesting to specific instances of fraud, misrepresentation, or misconduct.

(d) The parties to the dispute resolution proceeding shall share equally in the payment of fees and expenses of the dispute resolution process, except that each party shall bear its legal fees and its expenses.

NOTE: Authority cited: Section 12811.5, Food and Agricultural Code. Reference: Section 12811.5, Food and Agricultural Code.

HISTORY

- New article 15 (section 6310) and section filed 3–23–2006 as an emergency; operative 3–23–2006 (Register 2006, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–21–2006 or emergency language will be repealed by operation of law on the following day.
- 2. New article 1.5 (section 6310) and section refiled 7–19–2006 as an emergency; operative 7–19–2006 (Register 2006, No. 29). A Certificate of Compliance must be transmitted to OAL by 11–16–2006 or emergency language will be repealed by operation of law on the following day.
- 3. Certificate of Compliance as to 7-19-2006 order transmitted to OAL 11-9-2006 and filed 12-19-2006 (Register 2006, No. 51).

§ 6312. Noncompliance Notification.

Pursuant to Food and Agricultural Code section 12811.5(g), any notification to the Director of an applicant's failure to comply with its obligation under Food and Agricultural Code section 12811.5(a–d) shall be in writing and shall include, organized by the subsection and subparagraph below to which it is responsive:

- (a) Identification of the applicant and the product registration challenged, including:
 - (1) Applicant name and address;
- (2) Brand name and U.S. Environmental Protection Agency Registration Number of the product;
 - (3) Date of the Department's registration of the product; and
- (4) Identification of each current and/or past Department data requirement for which you claim the applicant failed to submit a study or otherwise satisfy, and for which the applicant failed to make your company an offer to pay.
- (b) With respect to the data for which the data owner claims the applicant failed to make an offer to pay:
- (1) Identification of the Department's exact data requirement to obtain, amend, or maintain the data owner's product that the data was submitted to satisfy;
- (2) Identification of each study (including DPR document number and study record number) submitted and the corresponding data requirement it satisfied; and
- (3) The date each study was submitted to the Department and, if applicable, to the U.S. Environmental Protection Agency (including the Master Record Identification Number MRID).
- (c) A statement setting forth the specific provisions of noncompliance claimed indicating how the data owner's data meet the criteria set forth in Food and Agricultural Code section 12811.5(a) or (b) that make it subject to cost–sharing, providing any documentation currently known to the data owner in support of that contention.
- (d) Proof that, prior to making the notification to the Director pursuant to Food and Agricultural Code section 12811.5(g), the data owner has informed the applicant of its claim, provided the applicant with the information required in (a), (b), and (c), and allowed the applicant an opportunity of at least ten days to promptly make an offer to pay for the data that serves as a basis of the data owner's claim. This proof shall include copies of all correspondence between the data owner and the applicant related to this issue.
- (e) Proof that at the same time the data owner filed its notification to the Director of the applicant's failure to meet its obligation under Food and Agricultural Code section 12811.5(a–d), the data owner sent a copy of the notification and all accompanying data and information by certified mail to the applicant.
- (f) With respect to a claim that the applicant has failed to participate in a proceeding for reaching an agreement on compensation, failed to comply with an agreement related to compensation, or failed to pay an award resulting from a proceeding to determine compensation, proof of

such failure including, but not limited to, all correspondence between the parties on the issue and a copy of the award resulting from a proceeding on compensation, if any.

NOTE: Authority cited: Section 12811.5, Food and Agricultural Code. Reference: Section 12811.5, Food and Agricultural Code.

HISTORY

1. New section filed 12-19-2006; operative 12-19-2006 (Register 2006, No. 51).

§ 6314. Determination.

All parties shall have 30 days from receipt of the copy of the notification to the Director to submit additional evidence and written arguments to the Director. The Director may rely solely on the information provided by the two parties involved in the dispute, without conducting any further investigation. The Director shall provide a written finding within 60 days of the deadline for the parties' submissions. If the Director determines that the applicant has not met its obligations under Food and Agricultural Code section 12811.5(a–d), the Director shall promptly cancel the applicant's product registration.

NOTE: Authority cited: Section 12811.5, Food and Agricultural Code. Reference: Section 12811.5, Food and Agricultural Code.

HISTORY

1. New section filed 12-19-2006; operative 12-19-2006 (Register 2006, No. 51).

HISTORY

- 1. Renumbering and amendment of former Section 2424 to Section 6358 filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32). For prior history, see Register 78, No. 52.
- 2. Change without regulatory effect repealing section filed 4–12–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 15).

§ 6359. Ethylene Dibromide.

NOTE: Authority cited: Sections 407, 12781 and 14102, Food and Agricultural Code. Reference: Sections 11501(b), 12824, 12825, 14001 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2427 to Section 6359 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect repealing section filed 4-12-96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 15).

§ 6360. Cadmium Compounds.

NOTE: Authority cited: Sections 407, 12781 and 12976, Food and Agricultural Code. Reference: Sections 12825, 12995 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2428 to Section 6360 filed 7–19–85 (Register 85, No. 29).
- Change without regulatory effect repealing section filed 4–12–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 15).

§ 6361. Butyl Mercaptan Limitations.

- (a) The Director of Food and Agriculture makes the following findings in relation to Sections 11501 and 12824 of the Food and Agricultural Code regarding pesticides labeled for defoliating plants, containing S,S,S-tributylphosphorotrithioate and tributylphosphorotrithioite.
- (b) Butyl mercaptan is an odorous raw material used in the manufacture of these two pesticides.
- (c) It is technically feasible to manufacture these two pesticides to contain less than 0.1 percent butyl mercaptan.
- (d) Pesticides containing S,S,S-tributylphosphorotrithioate or tributylphosphorotrithioite in which the butyl mercaptan is found to exceed 0.1 percent by weight shall not be sold or used in California.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 11501, 12752, 12824, 12931, 12976 and 12991, Food and Agricultural Code.

- 1. New section filed 1–19–84; effective thirtieth day thereafter (Register 84, No. 3).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6362. 1,2-Dichloropropane Limitations.

NOTE: Authority cited: Sections 407, 12781 and 12976, Food and Agricultural Code. Reference: Section 12824, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–5–85; effective thirtieth day thereafter (Register 85, No. 23).
- Change without regulatory effect repealing section filed 4–12–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 15).

Article 2. Suspensions

§ 6370. DBCP (1,2-Dibromo-3-Chloropropane).

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824, 12825, and 12826, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 2425 to Section 6370 filed 8-4-82; designated effective 1-1-83 (Register 82, No. 32). For prior history, see Register 78, No. 52.
- Change without regulatory effect repealing section filed 4–12–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 15).

§ 6372. N-3-Pyridylmethyl N'-P Nitrophenyl Urea (Vacor).

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Sections 12824, 12825 and 12826, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 2426 to Section 6372 filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32). For prior history, see Registers 79, No. 25; and 79, No. 8.
- 2. Change without regulatory effect repealing section filed 4–12–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 15).

Page 386

§ 6379. Restrictions on Use of Bladex (Cyanizine).

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Section 12824, Food and Agricultural Code.

HISTORY

- New section filed 4-19-85 as an emergency; effective upon filing (Register 85, No. 20). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8-19-85.
- Repealed by operation of Government Code Section 11346.1(g) (Register 87, No. 2).

Subchapter 3. Assessments

Article 1. Mill Assessment Collection

§ 6380. Sales Invoice Misrepresentation.

NOTE: Authority cited: Sections 407 and 12781, Food and Agricultural Code. Reference: Section 12841, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Chapter 4 (Article 9, Sections 2430–2435) to Chapter 6, Group 3 (Articles 1 and 2, Sections 6380–6392, not consecutive) filed 8–4–82; designated effective 1–1–83 (Register 82, No. 32). For prior history, see Registers 80, No. 12; 79, No. 52; 79, No. 28; and 78, No. 52.
- 2. Change without regulatory effect repealing section filed 2–27–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 9).

§ 6382. Penalties.

For any delinquency in making a return, or any deficiency in payment, of the pesticides mill assessment which is received after the date due (one calendar month after March 31, June 30, September 30, and December 31 of each year), a penalty of 10 percent of the amount which is due shall be added.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Section 12843, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

§ 6384. Exemptions.

When a registered pesticide is sold by the registrant to a purchaser for a nonpesticide use and the invoice clearly identifies its specific intended use, the sale is not subject to the mill assessment.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Section 12841, Food and Agricultural Code.

HISTORY

- 1. OAL Notice of Erroneous Filing filed 4–11–85; purported amendment of Section 6384 filed in error on 3–18–85 is null and void and text as filed with Secretary of State on 8–4–82 remains in effect uninterrupted (Register 85, No. 16).
- 2. Change without regulatory effect amending section and Note filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13)

§ 6386. Established Rate.

The director establishes the mill assessment on pesticide products at 21 mills (0.021) per dollar of sales for all sales of registered pesticides for use in this state pursuant to Food and Agricultural Code section 12841. Note: Authority cited: Sections 12781 and 12841, Food and Agricultural Code. Reference: Section 12841, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10–12–90 as an emergency; operative 10–12–89 (Register 89, No. 41). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 2–10–90.
- 2. Certificate of Compliance as to 10–12–89 order transmitted to OAL 2–2–90 and filed 3–2–90 (Register 90, No. 11).
- Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).
- 4. Amendment of section and Note filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 12841.
- 5. Editorial correction of HISTORY 4 (Register 2004, No. 37).

§ 6388. Pesticide Sales and Assessment Reporting.

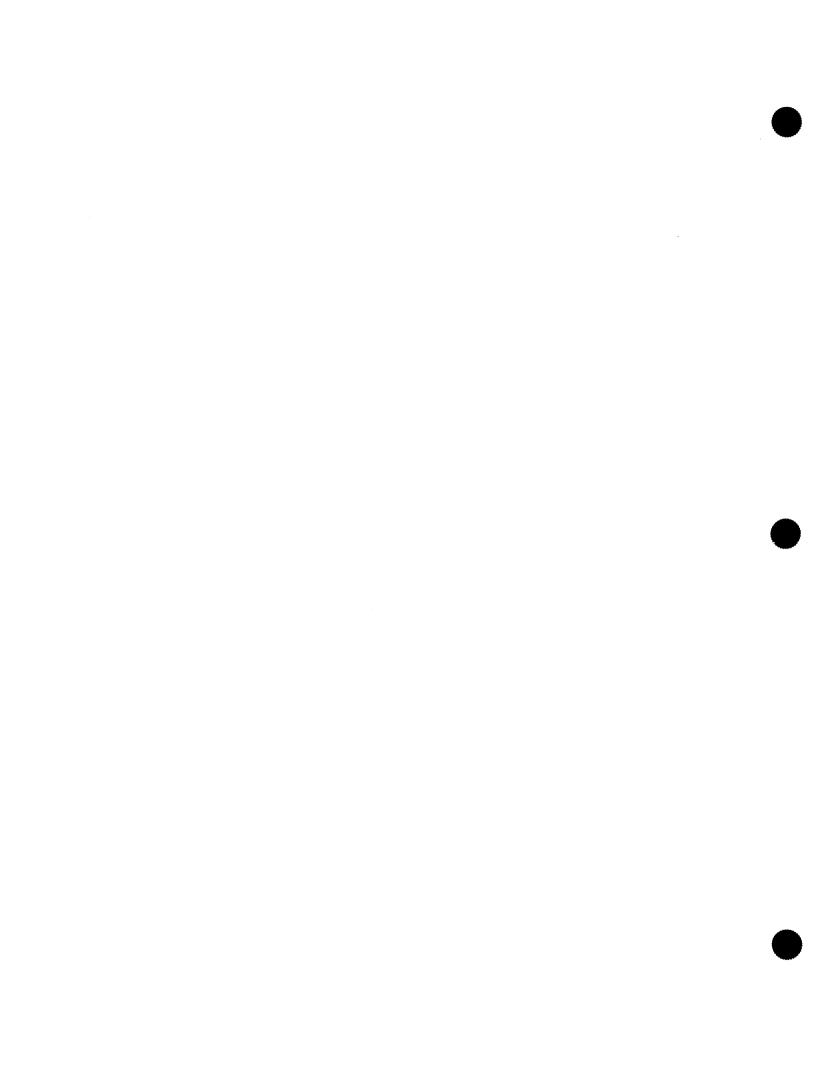

- (a) Each registrant shall report quarterly to the Department the total dollars of sales and total pounds or gallons of each registered and labeled pesticide product sold by the registrant for use in this State and the total assessments due. Each report of pesticide sales and assessment shall be on a form prescribed by the Department or in a format approved by the Director.
- (b) An acceptable Department form for reporting the pesticide sales is form "Report of Pesticide Sales in California," PR-ENF-181 (Rev. 07/98). The information to be reported shall include the following:
 - (1) The ending and delinquent date of the quarter being reported;
- (2) The name, address and U.S. Environmental Protection Agency (U.S. EPA) firm number of the registrant;
- (3) The U.S. EPA or State registration number and brand name of each product registered and sold for use in the State; and
- (4) The total dollar sales and total pounds or gallons of each formulated product sold.
- (c) An acceptable form for reporting the pesticide mill assessments is form "Report of Pesticide Sales in California," PR-ENF-180 (Rev. 07/98). The information to be reported shall include the following:
 - (1) The ending and delinquent date of the quarter being reported;
 - (2) The name, address and U.S. EPA firm number of the registrant;
- (3) The total dollar sales for all products registered and sold for use in the State during the quarter;
 - (4) The pesticide mill assessment rate;
 - (5) The total assessments and penalty (if applicable) that are due;
 - (6) The total amount of payment submitted;
- (7) The name, title, signature, and phone number of the authorized representative completing the form;
 - (8) The date when the form was completed; and
- (9) Certification under penalty of perjury that the information contained in the report is true and correct.
- (d) The individual report specified in (b) and the dollar sales figures associated with a specific product found on the report shall be considered official information acquired in confidence pursuant to Government Code section 6254(k) of the Public Records Act and section 1040 of the Evidence Code.

NOTE: Authority cited: Sections 11456, 12781 and 12845, Food and Agricultural Code. Reference: Sections 12843 and 12845, Food and Agricultural Code.

HISTORY

1. OAL Notice of Erroneous Filing filed 4–11–85; purported amendment of section 6388 filed in error on 3–18–85 is null and void and text as filed with Secretary of State on 8–4–82 remains in effect uninterrupted (Register 85, No. 16).

[The next page is 387.]

- 2. Amendment filed 1-22-92; operative 2-21-92 (Register 92, No. 13).
- 3. Amendment filed 5-16-2005; operative 6-15-2005 (Register 2005, No. 20).

Article 2. Mill Assessment Disbursement Criteria

§ 6390. Purpose of Article.

This article specifies the criteria to be used in allocating pesticide mill assessment funds to counties based upon each county's costs, pesticide regulatory activities, workload, and performance, pursuant to Section 12844 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 11456, 12781 and 12844, Food and Agricultural Code. Reference: Section 12844, Food and Agricultural Code.

HISTORY

- 1. Repealer of Article 2 (Sections 6390 and 6392) and new Article 2 (Sections 6390–6396) filed 7–8–83; effective thirtieth day thereafter (Register 83, No. 28).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6391. County Reimbursement.

- (a) Reimbursement for work specified in section 6393(b) shall be made by April 1 of each year pursuant to section 12841 of the Food and Agricultural Code.
- (b) Reimbursement shall not exceed costs incurred by the county as shown in the County Agricultural Commissioners' Annual Financial Statement, Item 5, entitled "Pesticide Use Enforcement."

NOTE: Authority cited: Sections 11456, 12781 and 12844, Food and Agricultural Code. Reference: Sections 12841 and 12844, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–22–90 as an emergency; operative 1–22–90 (Register 90, No. 5). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 5–22–90.
- 2. Certificate of Compliance as to 1–22–90 order transmitted to OAL 4–23–90 and filed 5–9–90 (Register 90, No. 24).
- 3. Amendment of subsections (a) and (b), new subsection (c), subsection relettering, and amendment of NOTE filed 2–25–99; operative 3–27–99 (Register 99, No. 9)
- 4. Repealer of subsections (a) and (b), subsection relettering and amendment of newly designated subsection (a) filed 6–10–2002; operative 7–1–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 24).

§ 6392. County Reports.

Each county shall submit a monthly report on a form prescribed by the director supporting the administration and enforcement of their pesticide regulatory program. The monthly report shall be submitted within 30 days after the end of each month. All reports shall be subject to audit by the director, and the director may require substantiation of the matters therein.

NOTE: Authority cited: Sections 11456 and 12781, Food and Agricultural Code. Reference: Sections 11455, 12844 and 14012, Food and Agricultural Code.

HISTORY

1. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6393. Criteria Items and Apportionment.

- (a) The amount of funds allocated to each county for each criteria item shall be based on each county's pest control activities, costs, workload, and performance in proportion to all counties, except as provided in sections 6391(b) and 6395.
- (b) The apportionment for each criteria item shall be a percentage of the total mill assessment funds available for reimbursement to counties [less the amount specified in section 6395(b)]. Such criteria items and corresponding apportionments are as follows:
- (1) Apportionment, 3 percent: The total number of Pesticide Use Enforcement Program inspections completed in accordance with the prioritization plan agreed upon by the Director and the commissioner's negotiated work plans;
- (2) Apportionment, 3 percent: The total number of: licensed pest control dealers located in each county; licensed pest control advisers, pest control businesses, pest control aircraft pilots, and farm labor contractors registered in each county; structural pest control operators providing no-

tice of work in each county; active operator identification numbers in each county; and any additional similar workload activities approved jointly by the Director and the commissioners.

- (3) Apportionment, 3 percent: The total number of private applicator certificate holders certified in each county;
- (4) Apportionment, 3 percent: Work hours expended on pesticide related activities that are agreed upon by the Director and the commissioners, provided the work hours are expended by persons holding a Pesticide Regulation and/or Investigation and Environmental Monitoring license or by unlicensed persons qualified to apply for a Pesticide Regulation and/or Investigation and Environmental Monitoring license who are closely supervised by persons holding a Pesticide Regulation and/or Investigation and Environmental Monitoring license;
- (5) Apportionment, 3 percent: Expenditures reported by each county for pesticide—related activities that are agreed upon by the Director and the commissioners:
- (6) Apportionment, 3 percent: The total pounds of pesticides used in the county that have been reported pursuant to Food and Agricultural Code section 12979.
- (7) Apportionment, 21 percent: The total number of restricted materials permits and permit amendments issued by each county; sites identified on all restricted materials permits and permit amendments issued by each county; and notices of intent reviewed by each county;
- (8) Apportionment, 21 percent: Based on the total pounds of nonagricultural-labeled pesticides sold in this state in relation to each county's population. Pounds of pesticide sold data shall be derived from mill assessment collection information provided to the department. Population data shall be based on the most recent U.S. census information; and
- (9) Apportionment, 40 percent: Based on each county's pesticide use report data records in relation to the total number of pesticide use report data records submitted to the department by all counties.

NOTE: Authority cited: Sections 11456, 12781 and 12844, Food and Agricultural Code. Reference: Sections 12841 and 12844, Food and Agricultural Code.

HISTORY

- Amendment of subsection (a) and new subsection (c) filed 1-22-90 as an emergency; operative 1-22-90 (Register 90, No. 5). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 5-22-90.
- 2. Certificate of Compliance as to 1–22–90 order transmitted to OAL 4–23–90 and filled 5–9–90 (Register 90, No. 24).
- 3. Amendment of subsection (c) filed 3–12–91; operative 4–20–91 (Register 91, No. 14).
- 4. Editorial correction of printing error in subsection (c) (Register 91, No. 33).
- 5. Editorial correction of printing error in subsection (c) (Register 91, No. 46).
- 6. Amendment of subsections (a), (a)(4) and (c), new subsections (d)–(d)(2)(K), and amendment of NOTE filed 2–25–99; operative 3–27–99 (Register 99, No. 9)
- 7. Repealer of subsections (a)–(d), redesignation of former subsections (d)(1)–(d)(2)(K) as subsections (a)–(b)(11) and amendment of newly designated subsection (a) filed 6–10–2002; operative 7–1–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 24).
- 8. Repealer and new section filed 1–12–2006; operative 2–11–2006 (Register 2006, No. 2).
- Change without regulatory effect amending subsection (b)(8) filed 2-21-2008 pursuant to section 100, title 1, California Code of Regulations (Register 2008, No. 8).

§ 6394. Performance Evaluation.

- (a) The Director shall evaluate each county pesticide use enforcement program, at least every three years. The evaluation shall measure the county's effectiveness in implementing state program areas recognized in statute or regulation, or agreed upon by the county and Director as an essential program element.
- (b) The Director shall provide a performance evaluation report to the commissioner that documents the county's performance in implementing the state program areas recognized by the Director.
- (c) The Director and the commissioner shall jointly develop and document corrective actions to improve the county's pesticide use enforcement program in the program areas identified in the performance evaluation report. Corrective actions may be brought forth as a recommendation for mill assessment allocation under section 6396(a).

Page 387 Register 2008, No. 8; 2-22-2008

(d) When any commissioner fails to implement the jointly developed corrective actions or an agreement on corrective actions cannot be reached, the Director shall take measures to improve the pesticide use enforcement program in the county. The measures may include but are not limited to, a reduction of the county's annual mill assessment allocation under sections 6393 and 6395(a).

NOTE: Authority cited: Sections 11456, 12781 and 12844, Food and Agricultural Code. Reference: Sections 2281 and 12844, Food and Agricultural Code.

HISTORY

- Change without regulatory effect amending subsection (a) and NOTE filed 10-26-99 pursuant to section 100, title 1, California Code of Regulations (Register 99, No. 44).
- Amendment of section and Note filed 6-10-2002; operative 7-1-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 24).
- 3. Amendment of section heading and section filed 1–12–2006; operative 2–11–2006 (Register 2006, No. 2).

§ 6395. Minimum Reimbursement.

(a) Determinations as specified in sections 6393 and 6394(c), notwith-standing, but subject to section 6391(b), no county shall be reimbursed funds less than the amount of funds reimbursed to the county pursuant to section 12844 of the Food and Agricultural Code, for the fiscal year ending June 30, 2003, or the average for fiscal years ending June 30, 2001, 2002, and 2003, whichever is greater, unless the mill assessment funds available for allocation on March 1 of the current year are less than \$14.3 million, in which case each county's reimbursement shall be reduced in the same proportion as it would have been reimbursed under this article. However, in no instances shall a county's minimum reimbursement be less than \$27,600 except as provided in section 6391(b).

(b) From the total funds available for allocation to counties, 30 percent shall be utilized for the stipulation of subsection (a) above.

NOTE: Authority cited: Sections 11456, 12781 and 12844, Food and Agricultural Code. Reference: Sections 12841 and 12844, Food and Agricultural Code.

HISTORY

- 1. Change without regulatory effect amending subsection (a) and NOTE filed 10–26–99 pursuant to section 100, title 1, California Code of Regulations (Register 99, No. 44).
- Amendment of subsection (a) filed 6-10-2002; operative 7-1-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 24).
- Repealer and new section and amendment of Note filed 1–12–2006; operative 2–11–2006 (Register 2006, No. 2).

§ 6396. Residual Funds.

(a) Any residual funds resulting after the application of sections 6395 may be disbursed based on commissioner requests to support restricted materials permitting and reporting system activities, and any other program element that the Director and the California Agricultural Commissioners and Sealers Association jointly agree upon, on a case—by—case basis. Funding request shall be submitted to the Director by March 31st of each year and jointly approved by the Director and the California Agricultural Commissioners and Sealers Association no later than June 30th.

(b) Any residual funds resulting after the application of sections 6391, 6394(d), 6395, or 6396(a) shall be distributed to all counties not subject to section 6394(d), in the same proportion as funds reimbursed under section 6393.

NOTE: Authority cited: Sections 11456, 12781 and 12844, Food and Agricultural Code. Reference: Section 12844, Food and Agricultural Code.

HISTORY

- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 2. Repealer and new section filed 1-12-2006; operative 2-11-2006 (Register 2006, No. 2).

§ 6397. Sunset Review of Regulations.

NOTE: Authority cited: Section 11456, Food and Agricultural Code. Reference: Section 11456, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-25-99; operative 3-27-99 (Register 99, No. 9).
- 2. Repealer filed 1-20-2000; operative 2-19-2000 (Register 2000, No. 3).

Subchapter 4. Restricted Materials

Article 1. Restricted Materials

§ 6400. Restricted Materials.

The Director designates the pesticides listed in this section as restricted materials.

- (a) Any pesticide labeled as a "restricted use pesticide" pursuant to section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (Title 7, United States Code, section 136a).
- (b) Any pesticide used under an "emergency exemption" issued pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (Title 7, United States Code, section 136p).
- (c) Pesticides formulated as a dust, labeled to permit outdoor use, and packaged in containers of more than 25 pounds, except:
- (1) products containing only exempt materials specified in section 6402; and
- (2) products containing only carbaryl, disulfoton, endosulfan, lindane, strychnine, zinc phosphide or an active ingredient not otherwise included in this section, and labeled only for one or more of the following uses: home use, structural pest control, industrial use, institutional use, and use by public agency vector control districts pursuant to section 2426 of the Health and Safety Code.
- (d) Pesticide products containing active ingredients listed in section 6800(a) (potential to pollute ground water), when labeled for agricultural, outdoor institutional, or outdoor industrial use.
 - (e) Certain other pesticides:

Acrolein, when labeled for use as an aquatic herbicide

Aldicarb (Temik)

Aluminum phosphide (Phostoxin)

4-Amino pyridine (Avitrol)

Azinphos-methyl (Guthion)

Calcium cyanide

Carbaryl (Sevin), except:

- (1) when formulated as a bait; or
- (2) when labeled only for one or more of the following uses: use directly on livestock or poultry, home use, structural pest control, industrial use, institutional use, or use by public agency vector control districts pursuant to section 2426 of the Health and Safety Code.

Carbofuran (Furadan)

Chloropicrin

3-Chloro-p-toluidine hydrochloride (Starlicide)

Dazomet (Basamid), when labeled for the production of agricultural plant commodities.

Dicamba (Banvel), except:

- (1) liquid formulations packaged in containers of 1 quart or less regardless of percentage of dicamba;
- (2) liquid formulations that contain 15% or less dicamba packaged in containers of 1 gallon or less;
- (3) liquid formulations of a product that is labeled to be used without further dilution;
- (4) dry formulations, packaged in containers of 1 pound or less, of a product that is labeled to be further diluted for use; and
- (5) dry formulations, packaged in containers of 50 pounds or less, of a product that contains 10% or less dicamba and is labeled to be used without further dilution.
 - 2,4-dichlorophenoxyacetic acid (2,4-D), except:
- (1) liquid formulations, packaged in containers of 1 quart or less, regardless of percentage of 2,4–D;
- (2) liquid formulations that contain 15% or less 2,4–D packaged in containers of 1 gallon or less;
- (3) liquid formulations of a product that is labeled to be used without further dilution;

- (4) dry formulations, packaged in containers of 1 pound or less, regardless of percentage of 2,4–D;
- (5) dry formulations, packaged in containers of 50 pounds or less, of a product that contains 10% or less 2,4–D and is labeled to be used without further dilution; and
 - (6) products labeled only for use as a plant growth regulator.
 - 2,4-dichlorophenoxybutyric acid (2,4-DB), except:
- (1) liquid formulations, packaged in containers of 1 quart or less, regardless of percentage of 2.4–DB;
- (2) liquid formulations that contain 15% or less 2,4–DB packaged in containers of one gallon or less;
- (3) liquid formulations of a product that is labeled to be used without further dilution:
- (4) dry formulations, packaged in containers of 1 pound or less, regardless of percentage of 2,4–DB; and
- (5) dry formulations, packaged in containers of 50 pounds or less, of a product that contains 10% or less 2,4–DB and is labeled to be used without further dilution.
 - 2,4-dichlorophenoxypropionic acid (2,4-DP), except:
- (1) liquid formulations, packaged in containers of 1 quart or less, regardless of percentage of 2,4–DP;
- (2) liquid formulations that contain 15% or less 2,4–DP packaged in containers of 1 gallon or less;
- (3) liquid formulations of a product that is labeled to be used without further dilution;
- (4) dry formulations, packaged in containers of 1 pound or less, regardless of percentage of 2,4–DP;
- (5) dry formulations, packaged in containers of 50 pounds or less, of a product that contains 10% or less 2,4–DP and is labeled to be used without further dilution.
 - 1,3-Dichloropropene (Telone II)

Disulfoton (Di–Syston), except when labeled only for one or more of the following uses: home use, structural pest control, industrial use, institutional use, and use by public agency vector control districts pursuant to section 2426 of the Health and Safety Code.

Endosulfan (Thiodan), except when labeled only for one or more of the following uses: home use, structural pest control, industrial use, institutional use, and use by public agency vector control districts pursuant to section 2426 of the Health and Safety Code.

Ethoprop (Mocap), when labeled for turf use.

Fenamiphos (Nemacur)

Lindane, except when labeled only for one or more of the following uses: home use, structural pest control, industrial use, institutional use, and use by public agency vector control districts pursuant to section 2426 of the Health and Safety Code.

Metam sodium labeled for the production of agricultural plant commodities

Methamidophos (Monitor)

Methidathion (Supracide)

Methomyl (Lannate), except fly baits containing not more than 1% methomyl

Methyl bromide

- 2-methyl-4-chlorophenoxyacetic acid (MCPA), except:
- (1) liquid formulations packaged in containers of 1 quart or less regardless of percentage of MCPA;
- (2) liquid formulations that contain 15% or less MCPA packaged in containers of 1 gallon or less;
- (3) liquid formulations of a product that is to be used without further dilution;
- (4) dry formulations, packaged in containers of 1 pound or less, regardless of percentage of MCPA; and
- (5) dry formulations, packaged in containers of 50 pounds or less, of a product that contains less than 10% MCPA and is labeled to be used without further dilution.

Methyl isothiocyanate (MITC) labeled for the production of agricultural plant commodities

Mevinphos (Phosdrin)

Molinate (Ordram)

Oxydemeton-methyl (Metasystox-R)

Paraquat (Gramoxone)

Parathion-methyl

Phorate (Thimet)

Potassium N-methyldithiocarbamate (metam-potassium), when labeled for the production of agricultural plant commodities.

Propanil (3,4–dichloropropionanilide)

Sodium cyanide

Sodium fluoroacetate (compound 1080)

Sodium tetrathiocarbonate (Enzone)

Strychnine, except rodenticides when labeled only for one or more of the following uses: home use, structural pest control, industrial use, institutional use, and use by public agency vector control districts pursuant to section 2426 of the Health and Safety Code.

Sulfotepp

Sulfuryl Fluoride

Thiobencarb (Bolero)

Tribufos (DEF, Folex)

Tributyltin, organotin, or a tri-organotin compound formulated as an antifouling paint, coating or compound and labeled for the control of fouling organisms in an aquatic environment.

Zinc phosphide, except when labeled only for one or more of the following uses: home use, structural pest control, industrial use, institutional use, and use by public agency vector control districts pursuant to section 2426 of the Health and Safety Code.

NOTE: Authority cited: Sections 14004.5 and 14005, Food and Agricultural Code. Reference: Sections 14004.5 and 14005, Food and Agricultural Code.

HISTORY

- 1. New subsection (n)(13) filed 12–31–87 as an emergency; operative 1–1–88 (Register 88, No. 3). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–2–88. For prior history, see Register 87, No. 25.
- Certificate of Compliance including amendment of subsection (n)(13) transmitted to OAL 4-5-88 and filed 5-4-88 (Register 88, No. 19).
- 3. Amendment of subsections (n)(10)–(n)(13) filed 5–18–88; operative 5–20–88 pursuant to Government Code section 11346.2(d) (Register 88, No. 21).
- 4. New subsection (n)(14) filed 10–27–88 as an emergency; operative 10–27–88 (Register 88, No. 45). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 2–24–89
- within 120 days or emergency language will be repealed on 2-24-89.

 5. New subsection (n)(16) filed 12-2-88 as an emergency; operative 12-2-88 (Register 88, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4-4-89.
- 6. Relettering of subsection (p) to subsection (r) and new subsection (q) filed 1-4-89; operative 1-4-89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).
- 7. New subsection (n)(15) filed 2-14-89 as an emergency; operative 2-14-89 (Register 89, No. 9). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6-14-89.
- Readoption of subsection (n)(14) filed 2-24-89 as an emergency; operative 2-24-89 (Register 89, No. 13). A Certificate of Compliance must be transmitted to OAL by 6-26-89 or readoption will be repealed by operation of law effective 6-27-89
- 9. New subsections (n)(14), (15), and (16) filed 8–10–89 as an emergency; operative 8–10–89 (Register 89, No. 19). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 12–8–89.
- 10. Amendment of subsection (f)(3) filed 3-29-90 as an emergency; operative 3-29-90 (Register 90, No. 16). A Certificate of Compliance must be transmitted to OAL within 120 days, by 7-27-90, or emergency language is repealed by operation of law.
- 11. A Certificate of Compliance as to 3–29–90 order transmitted to OAL 7–24–90 and filed 8–23–90 (Register 90, No. 39).
- 12. Editorial correction adding previously missing HISTORY 9 and renumbering former HISTORY 9 and 10 to HISTORY 10 and 11 (Register 91, No. 19).
- 13. Notice of Repeal of subsections (n)(14), (15) and (16) filed 1–15–91 by operation of Government Code section 11346.1(g) (Register 91, No. 19).
- 14. Amendment of subsection (n)(10) filed 12–12–91; operative 1–13–92 (Register 92, No. 13).
- 15. New subsections (g)(10)–(11) and amendment of Note filed 7–5–94 as an emergency; operative 7–5–94 (Register 94, No. 27). A Certificate of Compliance must be transmitted to OAL by 11–2–94 or emergency language will be repealed by operation of law on the following day.
- 16. Editorial correction of History 15 (Register 94, No. 44).
- 17. New subsections (g)(10)–(11) and amendment of Note refiled 10–31–94 as an emergency; operative 10–31–94 (Register 94, No. 44). A Certificate of Com-

pliance must be transmitted to OAL by 2-28-95 or emergency language will be repealed by operation of law on the following day

- 18. New subsections (g)(10)–(11) and amendment of Note refiled 2–23–95 as an emergency; operative 2–23–95 (Register 95, No. 8). A Certificate of Compliance must be transmitted to OAL by 6–23–95 or emergency language will be repealed by operation of law on the following day.
- 19. Repealer and new section filed 5-31-95; operative 6-30-95 (Register 95, No.
- 20. Certificate of Compliance as to 2-23-95 order including subsection relettering transmitted to OAL 5-15-95 and filed 6-27-95 (Register 95, No. 26).
- 21. Change without regulatory effect amending subsection (e) carbofuran entry filed 7–24–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 30).
- 22. Amendment adding exception (6) to subsection (e) "2,4—dichlorophenoxyacetic acid (2,4–D)" filed 1–14–97; operative 2–13–97 (Register 97, No. 3).

 23. Amendment of subsection (e) adding "Dazomet" and "Potassium N–methyldithiocarbamate" filed 11–20–2000 as an emergency; operative 11–20–2000 (Register 2000, No. 47). A Certificate of Compliance must be transmitted to OAL by 3-20-2001 or emergency language will be repealed by operation of law on the following day.
- 24. Amendment of subsection (e) adding "Dazomet" and "Potassium N-methyldithiocarbamate" refiled 3-15-2001 as an emergency; operative 3-15-2001 (Register 2001, No. 11). A Certificate of Compliance must be transmitted to OAL by 7-13-2001 or emergency language will be repealed by operation of law on the following day.
- 25. Certificate of Compliance as to 3–15–2001 order transmitted to OAL 6–12–2001 and filed 7–24–2001 (Register 2001, No. 35).
- 26. Amendment of subsection (e) adding "Sulfuryl Fluoride" filed 4–4–2005 as an emergency; operative 4–4–2005 (Register 2005, No. 14). A Certificate of Compliance must be transmitted to OAL by 8–2–2005 or emergency language will be repealed by operation of law on the following day.
- 27. Amendment of subsection (e) adding "Sulfuryl Fluoride" refiled 7–21–2005 as an emergency; operative 8–2–2005 (Register 2005, No. 29). A Certificate of Compliance must be transmitted to OAL by 11-30-2005 or emergency language will be repealed by operation of law on the following day
- 28. Certificate of Compliance as to 7-21-2005 order transmitted to OAL 10-31-2005 and filed 12-15-2005 (Register 2005, No. 50).
- 29. Amendment of subsection (e) filed 1-25-2008; operative 1-25-2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6402. Exempt Materials.

The director designates and establishes pursuant to Section 14006.7 of the Food and Agricultural Code the pesticides stated in this section as exempt materials.

- (a) Spray adjuvants
- (b) Petroleum oils
- (c) Sulfur
- (d) Lime
- (e) Lime-sulfur
- (f) Sodium polysulfide
- (g) Certain copper compounds
- (1) Bordeaux mixture
- (2) Copper acetate
- (3) Copper carbonate
- (4) Copper hydroxide
- (5) Copper–lime mixtures
- (6) Copper linoleate
- (7) Copper oleate
- (8) Copper oxychloride
- (9) Copper sulfate (basic, monohydrate, and pentahydrate)
- (10) Copper oxide
- (11) Copper calcium oxychloride
- (h) Bacillus thuringiensis Berliner

HISTORY

- 1. Editorial renumbering of former Section 2462 to Section 6402 filed 8-13-85 (Register 85, No. 33).
- 2. Repealer of subsection (g)(9), subsection renumbering and amendment of NOTE filed 3–21–95 as an emergency; operative 3–21–95 (Register 95, No. 12). A Certificate of Compliance must be transmitted to OAL by 7–19–95 or emergency language will be repealed by operation of law on the following day.
- 3. Repealer of subsection (g)(9), subsection renumbering and amendment of NoTE refiled 7–13–95 as an emergency; operative 7–13–95 (Register 95, No. 28). A Certificate of Compliance must be transmitted to OAL by 11–10–95 or emergency language will be repealed by operation of law on the following day.

- 4. Repealer of subsection (g)(9), subsection renumbering and amendment of NOTE refiled 11–17–95 as an emergency; operative 11–17–95 (Register 95, No. 46). A Certificate of Compliance must be transmitted to OAL by 3-16-96 or emergency language will be repealed by operation of law on the following day
- 5. Repealer of subsection (g)(9), subsection renumbering and amendment of NOTE refiled 3-15-96 as an emergency; operative 3-15-96 (Register 96, No. 11). A Certificate of Compliance must be transmitted to OAL by 7-13-96 or emergency language will be repealed by operation of law on the following day
- 6. Reinstatement of subsection (g)(9), subsection renumbering and reinstatement of NOTE as they existed prior to emergency order of 3-21-95 by operation of Government Code section 11346.1(f) (Register 96, No. 39).
- 7. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 2. Possession and Use Limitations

§ 6404. Certification Requirements.

NOTE: Authority cited: Sections 407, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2465 first sentence to Section 6404 filed 8-13-85 (Register 85, No. 33).
- 2. Repealer filed 8–1–96; operative 8–31–96 (Register 96, No. 31).

§ 6406. Supervision Standards.

The certified applicator responsible for this supervision shall be aware of the conditions at the site of application and be available to direct and control the manner in which applications are made by the noncertified applicator. The availability of the certified applicator shall be directly related to the actual or potential hazard of the situation.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2465 to Section 6406 filed 8-13-85 (Register 85, No. 33)
- 2. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6408. Private Applicator Certification.

NOTE: Authority cited: Sections 407, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2452(h) and (j)(13) to Section 6408 filed 8–13–85 (Register 85, No. 33).

 2. Repealer filed 8–1–96; operative 8–31–96 (Register 96, No. 31).

§ 6410. Pesticide Safety Information Series.

NOTE: Authority cited: Sections 407, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amending of former section 2452(j)(9)(A) last sentence to section 6410 filed 8-13-85 (Register 85, No. 33).
- 2. Repealer filed 8-13-90; operative 8-13-90 (Register 90, No. 41). (See subsection (c) of 6724.)

§ 6412. Restricted Material Permit Requirements.

- (a) Except as provided in this section and Sections 6400, 6414 and 6416, restricted materials shall be possessed or used only under permit of the commissioner or under his direct supervision, or under permit of the director in any county in which there is no commissioner.
- (b) The person named in a restricted material permit is authorized to retain possession, except for sale, of materials for which the permit was valid after such permit expires, provided they are stored in accordance with Sections 6670 and 6672.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2452(a) and (g) to Section 6412 filed 8-13-85 (Register 85, No 33).
- 2. Amendment filed 1-4-89; operative 1-4-89 pursuant to Government Code Section 11346.2(d) (Register 89, No. 5).
- 3. Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25)

§ 6414. Permit Exemptions.

(a) Permits to possess restricted materials shall not be required of commercial carriers to transport such materials.

Page 390 Register 2008, No. 4; 1-25-2008

- (b) No permit shall be required for restricted materials included only in subsection (a) of section 6400 (federally restricted use) when possessed or used by or under the supervision of a certified private or certified commercial applicator unless otherwise required by the commissioner
- (c) No permit shall be required for antifouling paints or coatings containing tributyltin.
- (d) No permit shall be required for restricted materials used only for experimental or research purposes when possessed or used, by or under the supervision of, research personnel from colleges and universities provided they are operating according to the current established policy of the college or university which covers experimental pesticide use.
- (e) No permit shall be required for restricted materials used according to a valid research authorization issued pursuant to section 6260.

NOTE: Authority cited: Sections 11456, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14006.6, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former section 2452 (b) and (c) to section 6414 filed 8–13–85 (Register 85, No. 33).
- 2. New subsection (c) filed 12–31–87 as an emergency; operative 1–1–88 (Register 88, No. 3). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–2–88.
- Certificate of Compliance transmitted to OAL 4-5-88 and filed 5-4-88 (Register 88, No. 19).
- 4. New subsections (d) and (e) filed 5–23–90; operative 6–22–90 (Register 90, No. 27).
- Change without regulatory effect amending subsection (b) and Note filed 8-27-96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 35).
- Change without regulatory effect amending subsection (a) filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).
- Amendment of section and NOTE filed 10-20-2000; operative 11-19-2000 (Register 2000, No. 42).
- 8. Change without regulatory effect amending subsections (a)–(b) filed 9–9–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 37).

§ 6416. Groundwater Protection Restrictions.

- (a) A permit is required for the possession or use of a pesticide containing a chemical listed in section 6800(a) when the pesticide is:
- (1) applied in an agricultural, outdoor institutional, or outdoor industrial use within a runoff ground water protection area or in a leaching ground water protection area, or
 - (2) restricted for purposes other than ground water protection.
- (b) A permit is not required for the possession or use of a pesticide containing a chemical listed in section 6800(a) when the pesticide is used in a pest eradication program approved by the Department, unless the pesticide is also restricted for purposes other than groundwater protection.
- (c) Notwithstanding the provisions of this article and article 4, the chemicals listed in section 6800(a) may be applied for research or experimental purposes pursuant to a valid research authorization. The applicant must provide the location of the research or experimental site with the research authorization request. The exemptions found in section 6268 do not apply when a person wishes to use these chemicals for research or experimental purposes.

NOTE: Authority cited: Sections 11456, 12976, 13145, 14004.5, 14005, 14006 and 14102, Food and Agricultural Code. Reference: Sections 11501, 13145, 13150, 14004.5, 14005 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).
- Amendment of subsections (a) and (b), repealer of subsections (c) and (d), and relettering and amendment of former subsection (e) to subsection (c) filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 16).
- Amendment of subsection (a) and NOTE filed 12–12–91; operative 1–13–92 (Register 92, No. 13).
- 4. New subsection (d) filed 4-3-92; operative 5-4-92 (Register 92, No. 18).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Repealer of subsections (a)–(b), new subsections (a)–(a)(2), subsection relettering, amendment of newly designated subsection (b) and amendment of NOTE filed 4–27–2004; operative 5–27–2004 (Register 2004, No. 18).

§ 6417. Research Authorization for Groundwater Protection List Chemicals.

NOTE: Authority: Sections 407, 12781, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Section 14006.6, Food and Agricultural Code. HISTORY

- 1. New section filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 16).
- 2. Repealer filed 4-3-92; operative 5-4-92 (Register 92, No. 18).

Article 3. Permit System

§ 6420. Permit Requirements.

- (a) Permits for agricultural use of a restricted material shall be issued in the name of the operator of the property to be treated. The permittee or, when allowed by the commissioner, the permittee's authorized representative or licensed agricultural pest control adviser, shall sign the permit. The authorized representative or licensed agricultural pest control adviser shall provide the commissioner with written documentation from the permittee to act on his/her behalf.
- (b) Permits for nonagricultural use of a restricted material may be issued in the name of the operator of the property to be treated or a pest control business. A permit issued to the operator of the property shall be signed by either the permittee or, when allowed by the commissioner, the permittee's authorized representative. The authorized representative shall provide the commissioner with written documentation from the permittee to act on his or her behalf. A permit issued to the pest control business shall be signed by the owner or a qualified applicator licensee or qualified applicator certificate holder responsible to supervise the operations of the pest control business.
- (c) The permittee shall be responsible for compliance with all permit conditions.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2452(e) to Section 6420 filed 8–13–85 (Register 85, No. 33).
- 2. Amendment of section heading, section and Note filed 10–20–2000; operative 11–19–2000 (Register 2000, No. 42).

§ 6422. Permit Duration.

- (a) Each permit issued for agricultural use of a restricted material shall be site and time specific. Pursuant to Food and Agricultural Code section 14007, any permit may be issued for a one—year period. Permits issued for perennial agricultural plantings, nonproduction agricultural sites, or nonagricultural sites may be issued for up to a three—year period. Permit applicants may apply for and obtain a permit for a shorter duration.
- (b) A permit to use restricted materials shall be valid for the time specified unless sooner revoked or suspended.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14007, Food and Agricultural Code.

- 1. Editorial renumbering of former Section 2452(f) and (j)(2) to Section 6422 filed 8–13–85 (Register 85, No. 33).
- 2. Amendment of section and Note filed 10–20–2000; operative 11–19–2000 (Register 2000, No. 42).

§ 6424. Forms.

- (a) Each application and permit to possess or use a restricted material shall be on a form either provided or approved by the director.
- (b) All information required for a written notice of intent shall be on forms either provided or approved by the director.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2452(i) and (j)(14) to Section 6424 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6426. Alternatives and Mitigation Measures.

- (a) Each licensed agricultural pest control adviser and grower, when determining if and when to use a pesticide that requires a permit, shall consider, and if feasible, adopt any reasonable, effective and practical mitigation measure or use any feasible alternative which would substantially lessen any significant adverse impact on the environment.
- (b) Each licensed agricultural pest control operator shall have available a copy of a written recommendation covering each agricultural use application of a pesticide that requires a permit, and operate in accordance with a pesticide permit issued by the commissioner. The standards for such recommendations are established in Section 6556.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

History

- 1. Editorial renumbering and amendment of former Section 2452(j)(3) and (4) to Section 6426 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6428. Agricultural Permit Applications.

Except as provided in Section 6434(a), each application for a permit for agricultural use of a restricted material shall include the following information:

- (a) Name and business address of the permittee and signature of either the permittee, or when allowed by the commissioner, the permittee's authorized representative or licensed agricultural pest control adviser;
 - (b) Location of each property to be treated;
- (c) Identification of all known areas that could be adversely impacted by the use of the restricted material(s) including hospitals; schools, and playgrounds; residential areas (including labor camps); parks; lakes, waterways, estuaries, and reservoirs; state wildlife management areas; critical habitats of rare, endangered or threatened species; and livestock and crops; (a map or aerial photograph may be used for designating such areas);
- (d) Identification of each commodity or crop, or if there is no commodity or crop the site to be treated;
 - (e) Anticipated pest problem(s) for each crop (pest(s) to be controlled);
- (f) Restricted material(s) requiring a permit necessary to control each pest on each commodity, crop, or site;
- (g) Approximate date(s) or crop stage(s) of intended restricted material application(s);
- (h) Expected method of application including the dilution, volume per acre or other units, and dosage;
- (i) Name of the pest control business, if any, and name, business address, and license or certificate number, with expiration date, of the certified private or certified commercial applicator responsible for supervising the possession or use of the restricted material(s).

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2452(j)(5) to Section 6428 filed 8-13-85 (Register 85, No. 33).
- 2. Amendment of section heading, section and Note filed 10–20–2000; operative 11–19–2000 (Register 2000, No. 42).

§ 6430. Nonagricultural Permit Applications.

Each application for a permit for nonagricultural use of a restricted material shall include the following information:

- (a) Name and business address of the operator of the property or the pest control business;
- (b) The signature of either the permittee, or the authorized representative, or the owner or qualified applicator licensee or qualified applicator certificate holder responsible to supervise the operations of the pest control business;
 - (c) Restricted material(s) to be used;
 - (d) Pest(s) to be controlled;
 - (e) Method of application;
 - (f) Criteria for determining need for the pesticide application and

(g) Name, address and license or certificate number, with expiration date, of the certified applicator responsible for supervising the possession or use of the restricted material(s).

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2452(j)(7) to Section 6430 filed 8-13-85 (Register 85, No. 33).
- 2. Amendment of section heading, section and NOTE filed 10–20–2000; operative 11–19–2000 (Register 2000, No. 42).

§ 6432. Permit Evaluation.

(a) Each commissioner, prior to issuing any permit to use a pesticide and when evaluating a notice of intent, shall determine if a substantial adverse environmental impact may result from the use of such pesticide. If the commissioner determines that a substantial adverse environmental impact will likely occur from the use of the pesticide, the commissioner shall determine if there is a feasible alternative, including the alternative of no pesticide application, or feasible mitigation measure that would substantially reduce the adverse impact. If the commissioner determines that there is a feasible alternative or feasible mitigation measure which significantly reduces the environmental impact, the permit or intended pesticide application shall be denied or conditioned on the utilization of the mitigation measure. When the commissioner determines that there is a likelihood that permit conditions have been or will be violated he shall take appropriate action to assure compliance.

Each commissioner is responsible for knowing local conditions and utilizing such knowledge in making these determinations. Each commissioner shall also consider and where appropriate utilize the provisions of Section 14006.5 and other applicable sections of the Food and Agricultural Code, applicable sections of this code, applicable pest management guides, restricted materials hazard chart, pesticide safety information series, information obtained from monitoring other pest control operations, and other information required by the director.

- (b) In addition to the requirement of Sections 6428 and 6430 each permit shall contain the following:
- (1) Appropriate conditions or limitations on the use of the pesticide(s) including available pesticide safety information series leaflets for each pesticide included on the permit;
- (2) Requirements, if any, for notice prior to an agricultural use pesticide application. In the case of nonagricultural use, notice shall be required to the extent it is necessary to comply with inspection responsibilities and with the monitoring requirements of Section 6436; and
- (3) Appropriate conditions or limitations such as those described in available pest management guides. The commissioner shall inform the permittee of, and where to obtain, any pest management guide applicable to the pest control authorized in the permit.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2452(j)(8) and (9) to Section 6430 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6434. Notice of Intent.

- (a) If the information required by (g), (h), and (i) of Section 6428 is not provided on the permit, it shall be included in the notice of intent.
- (b) When a notice of intent is required by the commissioner, it shall provide the following information concerning the proposed application. If the information required by this paragraph has been provided on the permit it may be referenced on the notice of intent.
 - (1) Permit number;
 - (2) Name and address of permittee and applicator;
 - (3) Location of areas to be treated and name of farm operator;
- (4) Crop or commodity, or if there is no crop or commodity the site to be treated;
 - (5) Approximate acres or other units:
 - (6) Method of application;

Page 392 Register 2008, No. 4; 1-25-2008

- (7) Pesticide(s);
- (8) Dilution, volume per acre or other units, and dosage;
- (9) Pest(s) to be controlled;
- (10) Date intended application is to commence; and
- (11) Location and identity of areas specified in Section 6428 which have changed since the permit was issued and which may be adversely impacted. A map or aerial photograph may be used for designating such locations.

The commissioner shall be notified at least 24 hours prior to commencing the use of a pesticide requiring a permit. The notice of intent to apply a pesticide may be submitted to the commissioner by the operator of the property to be treated, by such operator's authorized representative, or by the licensed pest control operator who is to apply the pesticide. The commissioner may allow less than 24 hours notice if he determines that because of the nature of the commodity or pest problem effective pest control cannot be attained or when 24 hours are not necessary to adequately evaluate the intended application.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2452(j)(6) and (10) to Section 6434 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6436. Permit Monitoring.

The director shall develop and the commissioner shall utilize a valid statistical program for monitoring sites to be treated which requires more frequent monitoring of individuals who have a record of noncompliance with applicable laws and regulations including violations of Section 6556. Such program shall require monitoring of no less than 5% of the sites identified in permits or notices of intent to apply a pesticide for an agricultural use. Such monitoring shall include an evaluation of the basis for the intended application including the written recommendation, if any. In the case of nonagricultural uses, the pesticide use of each permit holder shall be inspected at least once a year. Such monitoring shall insure compliance with this section and with the provisions of Section 14006.5 of the Food and Agricultural Code. No application shall be allowed to proceed if noncompliance with these provisions exists.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

- 1. Editorial renumbering of former Section 2452(j)(12) to Section 6436 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6438. Pest Control Records.

NOTE: Authority cited: Sections 407, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 3090.2(a) and (d) to Section 6438 filed 8–13–85 (Register 85, No. 33).
- 2. Repealer filed 12-22-89; operative 1-1-90 (Register 90, No. 1).

§ 6440. Pesticide Use Reports.

NOTE: Authority cited: Sections 407, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14011.5, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Sections 2459 and 3090.2(b), (c) and (e) to Section 6440 filed 8–13–85 (Register 85, No. 33).
- 2. Repealer filed 12–22–89; operative 1–1–90 (Register 90, No. 1).

§ 6442. Permit Review.

Section 14009 of the Food and Agricultural Code provides for a review by the director of the action of an agricultural commissioner in issuing, refusing, revoking, suspending, or conditioning a restricted materials permit. This section states the standards and procedures applicable to such review by the director.

- (a) Registration of a restricted material is not in itself a right to use the pesticide, but rather a department determination that under appropriate local conditions the commissioner can grant a use permit for the material.
- (b) The decision of an agricultural commissioner in issuing, conditioning, refusing, revoking, or suspending a restricted materials permit will be reversed by the director only for a clear abuse of discretion by the commissioner in applying the applicable restricted materials provisions of the Food and Agricultural Code (beginning with section 14001) and regulations in Title 3, California Code of Regulations (beginning with section 6400). The burden of establishing abuse of discretion is on the person requesting the review.
 - (c) The director's review is limited to the particular permit involved.
- (d) The person requesting the review of the issuance of a permit may request that the director stay the operation of the permit for a limited time or until the matter is finally decided. Whether the stay will be granted or refused will be determined by the director as soon as practicable based on the reasons stated for the stay in the request for review and supporting documents, any counter documents or arguments which are timely submitted to the director by the commissioner or permittee, and the director's own preliminary analysis of whether a stay is necessary to avoid a significant health hazard or significant crop, environmental, or property damage.

NOTE: Authority cited: Section 11456, Food and Agricultural Code. Reference: Section 14009, Food and Agricultural Code.

HISTORY

- Editorial renumbering and amendment of former Section 2463 to Section 6442 filed 8-13-85 (Register 85, No. 33).
- Amendment of section and NoTE filed 10-20-2000; operative 11-19-2000 (Register 2000, No. 42).

§ 6443. Permits for Use of Phenoxy Herbicides on Timberland.

- (a) Permits issued by county agricultural commissioners for aerial application of phenoxy herbicides for conifer release or for site preparation for commercial timber production shall be subject to the requirements of this section.
- (b) Each permit issued for such use shall be posted immediately, or as soon as practicable, by the commissioner in all offices of the commissioner and by the permittee at a post office or similar public place reasonably located so as to be seen by persons living within one mile of the proposed spraying area and shall remain posted until the expiration of such permit.
- (c) Within five days after issuance of the permit, the permittee shall mail a copy of the permit to all owners of record of property within 300 feet of the area to be treated. The permittee shall also mail a copy to all persons residing within 300 feet of the spray site described in the permit area who have filed a request for written notification with the commissioner.
- (d) Each posted and mailed copy of the permit shall include notice of the provisions of this section, Section 6442, Food and Agricultural Code Section 14009, and the names and addresses of the county agricultural commissioner and the permittee.
- (e) If a request for review is mailed to the commissioner within 20 days of the issuance of the permit, no herbicide application pursuant to the permit shall be made until 30 days after such review is completed; however, a further stay may be granted by the director pursuant to an appeal by a person directly affected by the commissioner's action. A copy of the commissioner's decision shall be mailed to the person who requested the review and the permittee.
- (f) The commissioner shall grant a review, pursuant to Food and Agricultural Code, Section 14009, to any interested person.
- (g) If no request for review is received by the commissioner within 30 days of the permit issuance, the application may commence without further delay.
- (h) If a request by a person directly affected by the commissioner's action, for a stay and appeal of the commissioner's review action is mailed to the director within 20 days of the date of the commissioner's review decision, no herbicide application pursuant to the permit shall be made

Page 393

until 15 days after the request is acted upon by the director. The applicant shall mail a copy of the appeal to the commissioner and to the permittee at the same time that the appeal is mailed to the director. The appeal must contain the following statement above the signature of the appellant: "I hereby certify that I have mailed copies of this appeal to the county agricultural commissioner and to the permittee." The appeal shall also contain a copy of the commissioner's review decision.

(i) The director shall grant a stay of the permit and an appeal pursuant to Food and Agricultural Code Section 14009 to all appellants who are directly affected by the permit action.

For the purpose of this section, an appellant shall be considered to be directly affected by the permit action where the appellant establishes that his or her residence, crops, property, or water supply point source lies within one–half mile of the spray site described in the permit. A movable camp site, trailer, home, or other portable property temporarily located in proximity to a spray site shall not qualify as a residence or located concern. The director may find that an appellant located more than one–half mile from the spray site is directly affected.

- (j) The director may rely on the commissioner's determination of the appellant's location, if such a determination way included in the commissioner's decision. The appellant may contest this determination in the appeael.
- (k) The director may deny an appeal and refuse a stay request in the following cases:
- (1) Where an appeal is filed not by an appellant directly affected by the permit for the protection of the appellant's personal interest but, rather, by another on the appellant's behalf, or,
- (2) Where an appeal fails to allege a specific abuse of discretion on the part of the commissioner in the issuance of the permit but, rather, asserts only an objection to phenoxy herbicide spraying, in general, or
- (3) Where an appeal fails to identify the specific location of appellant's source of concern, such as appellant's residence, cropland, water supply, or other fixed geographical reference so as to allow an assessment of the hazards associated with the permit.
- (I) Where the director's decision denies an appeal or refuses a stay, the appellate shall be advised of the right to seek judicial review of the decision.
- (m) A copy of the director's decision shall be mailed to the appellant, the commissioner, and the permittee.
- (n) If no appeal is received by the director with 30 days of the commissioner's review decision, the aerial application may commence without further delay.

If the director's decision upholds the permit issuance and the permit cannot be exercised because of the delay involved in the stay and/or review, the permit shall be extended by order of the director for a sufficient length of time to allow for spraying at the earliest possible date, but in no case longer than 12 months.

NOTE: Authority cited: Sections 11456, 14001, 14005 and 14006, Food and Agricultural Code. Reference: Sections 14004, 14006.5 and 14009, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of Section 2458.11 to Section 6443 filed 9-14-87; operative 10-14-87 (Register 87, No. 38).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6444. Generalized Effects.

If at any time pesticide residues, symptoms, or health hazards appear generally throughout any area, the director or commissioner may cause a field inspection to be made. If it appears that substantial loss, damage or injury is likely to result from continued application of a specific pesticide within such area, the director or commissioner may cause all permits for applications of that pesticide within such area canceled and specify that no additional permits shall be issued therein.

NOTE: Authority cited: Sections 11456, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 4. Field Fumigation Use Requirements

§ 6445. Fumigation-Handling Activities.

For purposes of sections 6447–6447.3, and 6784(b), fumigation–handling activities are limited to employees involved in assisting with covering the tarpaulin at the end of the rows (shoveling); assisting in the overall operation, ensuring proper tarpaulin placement and condition, and changing cylinders (copiloting); operating tractor equipment (driving); supervising the fumigation operation; operating chemigation equipment and assisting in chemigation application and leak repair (chemigating); tarpaulin cutting; tarpaulin or chemigation equipment removal prior to the expiration of the restricted entry interval; and other handling activities specified by the label.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code.

HISTORY

 Amendment of article heading and new section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4)

§ 6445.5. Field Fumigation Licensing Requirements.

Effective January 1, 2009, when a field fumigation application is made by a licensed pest control business, the business must have a person holding a qualified applicator license or certificate with the field fumigation pest control subcategory supervising the work.

NOTE: Authority cited: Sections 11456, 11502 and 14005, Food and Agricultural Code. Reference: Sections 11501, 14001 and 14151, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6447. Methyl Bromide—Field Fumigation — General Requirements.

The provisions of this section and sections 6447.1, 6447.2, 6447.3, and 6784(b) pertain to field soil fumigation using methyl bromide. For purposes of these sections, field soil fumigation does not apply to golf courses, replant of individual vine or tree–sites (tree holes) less than one contiguous acre, raised–tarpaulin nursery fumigations of less than one acre, potting soil, and greenhouses and other similar structures.

- (a) In addition to the requirements of section 6428, the operator of the property to be treated shall submit a proposed work site plan to the commissioner for evaluation at least seven days prior to submitting a notice of intent. The proposed work site plan shall include, but is not limited to, method of application to be used, acreage and identification of each application block to be treated, application rate to be used, description of the notification procedure to property operators pursuant to section 6447.1(b), description of any activities within the buffer zone(s) as specified in section 6447.2(e) and (f), description of any workday/work hour limitations and respiratory protection as specified in sections 6784(b)(2)(C) and (b)(3), and if applicable, description of the tarpaulin repair response plan, and tarpaulin removal. The commissioner shall retain the proposed worksite plan for one year after the expiration of the permit.
- (b) The commissioner, pursuant to section 6432, shall evaluate local conditions and the proposed work site plan.
- (c) The commissioner shall include at least the following when conditioning a permit: the buffer zone requirements, work—hour restrictions, notification requirements, any other restrictions to address local conditions, and if applicable, description of the tarpaulin repair response plan and tarpaulin removal. The commissioner shall complete the evaluation and complete conditioning the permit prior to the submission of the notice of intent.

Page 394 Register 2008, No. 4; 1-25-2008

- (d) An application block shall not exceed 40 acres unless approved by the Director.
- (e) Except for experimental research purposes pursuant to a valid research authorization issued according to section 6260 or a reduced volatile organic compound emission fumigation method approved pursuant to section 6452, tarpaulins shall have a permeability factor of no less than 5 and no more than 8 milliliters methyl bromide per hour, per square meter, per 1,000 parts per million of methyl bromide under the tarpaulin at 30 degrees Celsius, and be approved by the Department. A list of approved tarpaulins is available from the Department.
- (f) Tarpaulins shall be buried under at least four inches of firmly packed soil at the end of the rows. The tarpaulins shall remain in place for the time specified in section 6447.2.
- (g) Fumigation equipment shall be operated to eliminate pesticide drip by clearing the fumigant from the injection device before it is lifted or removed from the soil.
- (h) The Department, in coordination with county agricultural commissioners, shall ensure that ambient air concentrations of methyl bromide do not exceed an average daily non-occupational exposure of nine parts per billion in a calendar month.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

Renumbering of former section 6450 to new section 6447, including amendment of section heading and section, filed 1-25-2008; operative 1-25-2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6447.1. Methyl Bromide Field Fumigation Notification Requirements.

- (a) Notification to the Commissioner.
- (1) Notwithstanding section 6434, the operator of the property to be treated shall assure that the commissioner is notified (notice of intent) at least 48 hours prior to commencing fumigation. The notice of intent shall indicate the hour the fumigation is intended to commence and the information specified in section 6434(b).
- (2) The fumigation shall not commence sooner than the intended starting time or later than 12 hours after the intended starting time specified on the notice of intent.
- (3) If fumigation of an application block does not commence within the time specified in (a)(2), a new notice of intent must be submitted, but no new 48-hour waiting period is needed unless required by the commissioner.
- (4) For multiple application blocks to be fumigated sequentially, the commissioner may allow one notice of intent that includes an application schedule for all the application blocks in lieu of a separate notice of intent for each application block to be fumigated. The schedule must specify the date and time each application block is intended to be fumigated.
 - (b) Notification to Property Operators.
- (1) The operator of the property to be treated shall assure that operators of the following properties within 300 feet of the perimeter of the outer buffer zone receive notification that a permit to use methyl bromide near their property has been issued by the commissioner: properties that contain schools, residences, hospitals, convalescent homes, onsite employee housing, or other similar sites identified by the commissioner. Notification shall be in writing in both English and Spanish, or by other means approved by the commissioner. The operator of the property to be treated shall assure that notification is delivered at least seven days prior to the submission of the notice of intent. The notification shall include the following information:
 - (A) the name of the chemical(s) to be applied;
- (B) name, business address, and business telephone number of the operator of the property to be treated;
- (C) name, business address, and business telephone number of the commissioner;
 - (D) the earliest and latest dates that the fumigation will start; and
- (E) how to request subsequent notification of specific date and time of the fumigation.

(2) The operator of the property to be treated shall assure that specific notification of the date and time of the start of the fumigation and anticipated expiration of buffer zones is provided to those persons notified in (b)(1) who request specific fumigation information. This specific fumigation notification shall be provided at least 48 hours prior to starting the fumigation. If a request for specific notification is received after the submission of the notice of intent and before the fumigation begins, the specific fumigation notification shall be provided prior to starting the fumigation, but the 48—hour requirement shall not apply. If the fumigation of an application block does not commence within the time frame specified in (a)(2), then a new notification must be provided to those persons who requested the information, but the 48—hour requirement shall not apply unless required by the commissioner.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 6450.1 to new section 6447.1, including amendment of subsections (a)(3) and (b)(1), filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6447.2. Methyl Bromide Field Fumigation Buffer Zone Requirements.

- (a) The commissioner shall approve buffer zone sizes and durations based upon local conditions. The commissioner shall rely upon the information provided in Methyl Bromide Field Fumigation Buffer Zone Determination, Est. 2/04, hereby incorporated by reference, to condition restricted material permits, unless the commissioner determines based on other information that a deviation from the information in Methyl Bromide Field Fumigation Buffer Zone Determination, Est. 2/04, can be made in a way that assures equal or less exposure. At no time shall the inner buffer zone be less than 30 feet, and the outer buffer zone be less than 60 feet, or the buffer zone durations be less than 36 hours.
- (b) The operator of the property to be treated shall assure that all buffer zone distances are measured from the perimeter of the application block.
- (c) The buffer zone restrictions shall begin at the start of fumigation. The buffer zone restrictions shall remain in effect for at least 36 hours after the completion of the injection to the application block.
- (d) Two buffer zones, an inner and outer for each application block, shall be approved by the commissioner after the proposed work site plan is submitted.
 - (e) Inner Buffer Zone Restrictions.
 - (1) The inner buffer zone shall be at least 30 feet.
- (2) The operator of the property to be treated shall assure that no persons are allowed within the inner buffer zone except to transit and perform fumigation—handling activities.
- (3) The inner buffer zone shall not extend into adjoining property except as provided below:
- (A) The inner buffer zone may extend into adjoining agricultural property if the adjoining property operator gives written permission and allows the operator of the property to be treated to post the inner buffer zone boundary on the adjoining property with signs. If such written permission is given, the operator of the property to be treated shall assure that:
- 1. the inner buffer zone boundaries on the adjoining property are posted with signs while the buffer zone is in effect; and
- 2. the signs are posted so that the wording is clearly visible, to persons with normal vision, from a distance of 25 feet and shall contain the following words: "METHYL BROMIDE INNER BUFFER ZONE" and "KEEP OUT" and "NO ENTRE"; and
 - 3. the signs are posted at intervals not exceeding 200 feet.
- (B) With approval from the commissioner, the inner buffer zone may extend across sites only where transit activities may occur, including streets, roads, roads within agricultural property, highways, and other similar sites of travel. Written permission and posting requirements in 6447.2(e)(3)(A) shall not apply.
 - (f) Outer Buffer Zone Restrictions.
 - (1) The outer buffer zone shall be at least 60 feet.

- (2) The operator of the property to be treated shall assure that no persons are allowed within the outer buffer zone except to transit, perform fumigation—handling activities, and commissioner—approved activities as identified in the restricted materials permit conditions. In no instance shall persons be allowed within the outer buffer zone for more than 12 hours in a 24—hour period.
- (3) The outer buffer zone may extend into other properties with permission from the operators of these other properties. In no instances shall the outer buffer zone contain occupied residences or occupied onsite employee housing while the outer buffer zone is in effect. The outer buffer zone shall not extend into properties that contain schools, convalescent homes, hospitals, or other similar sites determined by the commissioner.
- (4) The outer buffer zone may extend across roads, highways, or similar sites of travel or sites approved by the commissioner.
- (g) The operator of the property to be treated shall assure that the operator of the other properties specified in (e)(3)(A) and (f)(3) above notify the following persons that a buffer zone(s) has been established on the property: onsite employees, including those of a licensed pest control business or farm labor contractor. The notice to employees shall be given prior to the commencement of the employee's work activity. Notification to farm labor contractor employees may be done by giving written notice to the farm labor contractor, who shall then give the notice to the employee. Employee notification shall be in a manner the employee can understand, and include information required in section 6447.1(b)(2).
- (h) The operator of the property to be treated shall assure that specific notification of the date and time of the start of the fumigation and anticipated expiration of buffer zones is provided to the other property operator, if the operator of the other property is required to notify his/her employees as specified in (g). This specific fumigation notification shall be provided to the other property operator at least 48 hours prior to starting the fumigation. If the fumigation of an application block does not commence within the time frame specified in 6447.1(a)(2), then a new notification must be provided to the other property operator specified in (e)(3)(A) and (f)(3), but the 48–hour requirement shall not apply unless required by the commissioner.
- (i) When a school property is within 300 feet of the perimeter of the outer buffer zone, the injection shall be completed no less than 36 hours prior to the start of a school session. School session shall be those times when students are attending scheduled classes.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

History

- 1. Renumbering of former section 6450.2 to new section 6447.2, including amendment of subsections (e)(3)(B), (g) and (h), filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).
- Editorial correction restoring inadvertently omitted subsections (e)–(e)(2) (Register 2008, No. 11).

§ 6447.3. Methyl Bromide Field Fumigation Methods.

- (a) The methyl bromide field soil fumigation must be made using only the methods described in this section. However, within the San Joaquin Valley, Southeast Desert, or Ventura ozone nonattainment areas, the following methods are prohibited during the May 1 through October 31 time period: (1), (2), (4), and (6); and if applied as alternating fumigated and unfumigated areas (strip fumigation), methods (3) and (5). In addition to labeling requirements for each of these methods, the following requirements shall apply.
 - (1) Nontarpaulin/Shallow/Bed
- (A) Application rate shall not exceed 200 pounds of methyl bromide per acre.
- (B) The application tractor shall be equipped with an air fan dilution system.
 - (C) Rearward-curved (swept-back) chisels shall be used with:
- 1. closing shoes and bed-shaper, or closing shoes and compaction roller; and
- 2. chisel injection points positioned beneath and ahead of the closing shoes.

- (D) Injection depth shall be between 10 and 15 inches. The injection depth to preformed beds must not be below the bed furrow.
 - (E) Injection spacing shall be 40 inches or less.
- (F) The soil shall not be disturbed for at least three days (72 hours) following completion of injection to the application block.
 - (G) The application block restricted—entry interval shall be three days.
 - (2) Nontarpaulin/Deep/Broadcast
- (A) Application rate shall not exceed 400 pounds of methyl bromide per acre.
 - (B) Forward–curved chisel shall be used with:
- 1. An application tractor equipped with an air fan dilution system, and the injection depth shall be at least 20 inches; or
- 2. Closing shoes and compaction roller and the injection depth shall be at least 24 inches.
 - (C) Injection spacing shall be 68 inches or less.
- (D) The soil shall not be disturbed for at least four days (96 hours) following completion of injection to the application block.
 - (E) The application block restricted–entry interval shall be four days.
 - (3) Tarpaulin/Shallow/Broadcast
- (A) Application rate shall not exceed 400 pounds of methyl bromide per acre.
 - (B) Application shall be made using either:
- 1. An application tractor equipped with an air fan dilution system, and with a plow consisting of horizontal v-shaped blades mounted by a vertical arm to the tool bar. The fumigant shall be injected laterally beneath the soil surface; or
- 2. Rearward–curved (swept–back) chisels, closing shoes, and compaction roller shall be used.
 - (C) Injection depth shall be at least 10 and no greater than 15 inches.
 - (D) Injection spacing shall be 12 inches or less.
- (E) The tarpaulin shall be laid down simultaneously (with fumigant injection) by tarpaulin–laying equipment mounted on the application tractor.
- (F) The tarpaulin shall not be cut until a minimum of five days (120 hours) following completion of injection to the application block. The tarpaulin shall be cut pursuant to section 6784(b)(4).
- (G) Tarpaulin removal shall begin no sooner than 24 hours after tarpaulin cutting has been completed.
- (H) The application block restricted-entry interval shall end at completion of tarpaulin removal, and shall be at least six days.
 - (4) Tarpaulin/Shallow/Bed
- (A) Application rate shall not exceed 250 pounds of methyl bromide per acre.
 - (B) Rearward–curved (swept–back) chisels shall be used with either:
- 1. Closing shoes and compaction roller. The closing shoes shall cover the chisel marks with soil just ahead of the compaction roller, and the tarpaulin shall be laid down simultaneously (with fumigant injection) by tarpaulin–laying equipment mounted on the application tractor; or
- 2. Bed shaper. The chisels shall be placed with the injection point under the bed shaper, and the tarpaulin shall be laid down simultaneously (with fumigant injection) by tarpaulin–laying equipment mounted on the application tractor; or
- 3. Combination bed former and bed shaper. The chisels shall be placed between the bed former and the bed shaper. The tractor with the tarpaulin–laying equipment shall immediately follow the application tractor.
- (C) Injection depth shall be between 6 and 15 inches. The injection depth to preformed beds must not be below the bed furrow.
 - (D) Injection spacing shall be 12 inches or less.
- (E) The tarpaulin shall not be cut until at least five days (120 hours) following completion of injection to the application block.
- (F) If tarpaulins are removed before planting, tarpaulin removal shall begin no sooner than 24 hours after tarpaulin cutting has been completed. The application block restricted—entry interval shall end at completion of tarpaulin removal, and shall be at least six days.

- (G) If tarpaulins are not to be removed before planting, the application block restricted–entry interval shall either:
- 1. consist of the five-day period described in subsection (E) plus an additional 48 hours after holes have been cut for planting, or
- 2. be at least 14 days. If this option is chosen, the methyl bromide air concentration underneath the tarpaulin must test less than five parts per million before planting begins.

[The next page is 397.]

- (5) Tarpaulin/Deep/Broadcast
- (A) Application rate shall not exceed 400 pounds of methyl bromide per acre.
 - (B) Forward-curved chisels shall be used with either:
- 1. An air fan dilution system on the application tractor; or
- 2. Closing shoes and compaction roller.
- (C) Injection depth shall be at least 20 inches.
- (D) Injection spacing shall be 66 inches or less.
- (E) The tarpaulin shall be laid down simultaneously (with fumigant injection) by tarpaulin–laying equipment mounted on the application tractor
- (F) The tarpaulin shall not be cut until at least five days (120 hours) following completion of injection to the application block. The tarpaulin shall be cut pursuant to section 6784(b)(4).
- (G) Tarpaulin removal shall begin no sooner than 24 hours after tarpaulin cutting has been completed.
- (H) The application block restricted entry interval shall end at completion of tarpaulin removal, and shall be at least six days.
 - (6) Drip System Hot Gas
- A hot gas application through a subsurface drip irrigation system to tarpaulin-covered beds may be used if all of the following criteria are met:
- (A) Application rate shall not exceed 225 pounds of methyl bromide per acre.
- (B) The fumigant shall be injected beneath the soil surface at a minimum depth of one inch.
- (C) The portion of the drip system used in the fumigation shall be physically disconnected from the main water supply during the fumigation to prevent possible contamination of the water supply.
- (D) All fittings and emitters underneath the tarpaulin shall be buried in the soil to a minimum depth of one inch.
- (E) Prior to the start of the fumigation, all drip tubing shall be checked for blockage, and the irrigation system connections and fittings checked for blockage and leaks using pressurized air and/or water. The end of each drip tubing shall be placed under the tarpaulin prior to introduction of fumigant.
- (F) The tarpaulin shall be placed and inspected for tears, holes, or improperly secured edges prior to fumigating. Repairs and adjustments shall be made before the fumigation begins.
- (G) Prior to the start of the fumigation, all fittings above ground and outside of the tarpaulin shall be pressure—tested with compressed air, water, or nitrogen gas to a maximum pressure of 50 pounds per square inch. A soap solution shall be used to check the fittings for leaks if using air or nitrogen. All apparent leaks shall be eliminated prior to the fumigation. All drip tubing with emitters connected to the distribution manifold not covered by the tarpaulin shall be sealed to prevent fumigant loss through the emitters.
- (H) Prior to introducing the fumigant, the drip system shall be purged of water by means of pressurized gas, such as CO₂ or nitrogen.
- (I) The drip system shall be purged prior to disconnecting any line containing the fumigant.
- (J) After purging, drip tubing shall be pinched off and then disconnected from the distribution manifold. All disconnected tubing leading into the treated field shall be secured to prevent gas from escaping.
- (K) All fittings used for connecting or disconnecting the heat exchanger to the irrigation system manifold shall be of a positive shut-off design.
- (L) All persons shall wear the eye protection specified on the label when working with a manifold system or tubing containing the fumigant under pressure.
- (M) The entire fumigation system (heater, valves, and manifold) shall be purged of the fumigant at the end of each day's fumigation.
- (N) The tarpaulin shall not be cut until at least five days (120 hours) following completion of injection to the application block.
- (O) If tarpaulins are removed before planting, tarpaulin removal shall begin no sooner than 24 hours after tarpaulin cutting has been completed.

- The application block restricted—entry interval shall end at completion of tarpaulin removal and shall be at least six days.
- (P) If tarpaulins are not to be removed before planting, the application block restricted—entry interval shall either:
- 1. consist of the five-day period described in subsection (N) plus an additional 48 hours after holes have been cut for planting, or
- 2. be at least 14 days. If this option is chosen, the methyl bromide air concentration underneath the tarpaulin must test less than five parts per million before planting begins.
- (b) Notwithstanding section 6770, the operator of the property shall assure that only persons performing fumigation—handling activities are allowed in an application block before the restricted entry interval expires. Persons performing activities other than tarpaulin cutting, removal, and repair described in sections 6784(b)(3), (4), and (5) shall wear a full—face respirator that meets the requirements of section 6784(b)(2)(C).
- (c) Notwithstanding subsection (a), a reduced volatile organic compound emission field fumigation method approved pursuant to section 6452 or a method for experimental research purposes pursuant to a valid research authorization issued according to section 6260 may be allowed. NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

1. Renumbering of former section 6450.3 to new section 6447.3, including repealer and new subsection (a), amendment of subsection (a)(3)(C) and new subsection (c), filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6448. 1,3–Dichloropropene Field Fumigation — General Requirements.

The provisions of section 6448.1 apply to field soil fumigation using 1,3–Dichloropropene within the Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, or Ventura ozone nonattainment areas during the May 1 through October 31 time period. Raised–tarpaulin nursery fumigations of less than one acre, or replant of individual vine or treesites (tree holes) less than one contiguous acre, are not considered field soil fumigations under the provision of section 6448.1.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6448.1. 1,3-Dichloropropene Field Fumigation Methods.

- (a) Application rate must not exceed 332 pounds of 1,3–Dichloropropene active ingredient per acre.
- (b) If there are no labeling requirements specifying soil moisture, then at time of application soil must contain at least enough moisture above the depth of application to meet the following test appropriate to the soil texture for:
- (1) coarse soils (sand and loamy sand) at least enough moisture to form a ball when compressed by hand, that may break when tapped;
- (2) loamy, moderately coarse, or medium textured (coarse sandy loam, sandy loam, fine sandy loam) at least enough moisture so that soil forms a ball that holds together when tapped;
- (3) fine texture soils (clay loam, silty clay loam, sandy clay, silty clay, sandy clay loam and clay) at least enough moisture so that the soil is pliable, not crumbly. Forms a ribbon when squeezed between thumb and forefinger.
- (c) The 1,3–Dichloropropene field soil fumigation must be made using only the methods described in this section. However within the San Joaquin Valley, Southeast Desert, or Ventura ozone nonattainment areas, methods (1) and (2) are prohibited. In addition to labeling requirements for each of these methods, the following requirements shall apply.
 - (1) Nontarpaulin/Shallow/Broadcast or Bed
 - (A) Injection point must be at least 12 inches below the soil surface.

- (B) Chisel trace must be eliminated by use of tillage equipment to mix the soil to a depth of at least three inches. Broadcast fumigation must be followed by compaction of the soil surface.
 - (2) Tarpaulin/Shallow/Broadcast or Bed
 - (A) Injection point must be at least 12 inches below the soil surface.
- (B) Chisel trace must be eliminated by use of tillage equipment to mix the soil to a depth of at least three inches. Broadcast fumigation must be followed by compaction of the soil surface.
- (C) Tarpaulins must be buried under at least four inches of firmly packed soil at the end of the rows.
- (D) The operator of the property shall maintain a "tarpaulin repair response plan" pursuant to subsection (d).
- (3) Nontarpaulin/Shallow/Broadcast or Bed/Three Post–Fumigation Water Treatments
 - (A) Injection point must be at least 12 inches below the soil surface.
- (B) Chisel trace must be eliminated by use of tillage equipment to mix the soil to a depth of at least three inches. Broadcast fumigation must be followed by compaction of the soil surface.
- (C) Fumigation must be completed in a time that allows compliance with the post–fumigation water treatments below:
- 1. Water must be applied by an irrigation method that uniformly covers the treated area in the entire application block.
- 2. On the day of fumigation, the first water treatment must consist of at least 0.20 inches of water, beginning within 30 minutes of the completion of fumigation. A second post–fumigation water treatment must consist of at least 0.20 inches of water applied starting no earlier than one hour prior to sunset on the day of fumigation and completed by midnight.
- 3. On the day following fumigation, a third post-fumigation water treatment must consist of at least 0.20 inches of water, and must be applied starting no earlier than one hour prior to sunset and completed by midnight.
- 4. Additional post–fumigation water treatment(s) may be applied at any time provided the treatments required above are completed in the specified time periods.
 - (4) Tarpaulin/Shallow/Bed/Three Post-Fumigation Water Treatment
 - (A) Injection point must be at least 12 inches below the soil surface.
- (B) Chisel trace must be eliminated by use of tillage equipment to mix the soil to a depth of at least three inches.
- (C) Tarpaulins must be buried under at least four inches of firmly packed soil at the ends of the rows.
- (D) Fumigation must be completed in a time that allows compliance with the post–fumigation water treatments below:
- 1. Water must be applied by an irrigation method that uniformly covers the untarped area in the entire application block.
- 2. On the day of fumigation, the first water treatment must consist of at least 0.20 inches of water to the untarped areas, beginning within 30 minutes of the completion of fumigation. A second post–fumigation water treatment must consist of at least 0.20 inches of water to the untarped areas applied starting no earlier than one hour prior to sunset on the day of fumigation and completed by midnight.
- 3. On the day following fumigation, a third post-fumigation water treatment must consist of at least 0.20 inches of water to the untarped areas, and must be applied starting no earlier than one hour prior to sunset and completed by midnight.
- 4. Additional post–fumigation water treatment(s) may be applied at any time provided the treatments required above are completed in the specified time periods.
- (E) The operator of the property shall maintain a "tarpaulin repair response plan" pursuant to subsection (d).
 - (5) Nontarpaulin/Deep/Broadcast or Bed
 - (A) Injection point must be at least 18 inches below the soil surface.
- (B) Chisel trace must be eliminated by use of tillage equipment to mix the soil to a depth of at least three inches. Broadcast fumigation must be followed by compaction of the soil surface.
 - (6) Tarpaulin/Deep/Broadcast or Bed
 - (A) Injection point must be at least 18 inches below the soil surface.

- (B) Chisel trace must be eliminated by use of tillage equipment to mix the soil to a depth of at least three inches. Broadcast fumigation must be followed by compaction of the soil surface.
- (C) Tarpaulins must be buried under at least four inches of firmly packed soil at the end of the rows.
- (D) The operator of the property shall maintain a "tarpaulin repair response plan" pursuant to subsection (d).
 - (7) Chemigation (Drip System)/Tarpaulin
- (A) Drip system must be filled with water and tested for pressure variation, clogged emitters, and leaks before chemigation. The pressure must not exceed the pressure rating of the drip tape, and the pressure variation in the drip tape throughout the field must be less than three pounds per square inch. Drip system must be free of leaks and clogged emitters.
- (B) The tarpaulin shall be placed and inspected for tears, holes, or improperly secured edges prior to fumigating. Repairs and adjustments shall be made before the chemigation begins.
- (C) Ends of drip tape not covered by tarpaulin must be covered by at least two inches of soil.
- (D) After chemigation, the drip system must be flushed with a volume of water at least three times the volume of the mainline and laterals of the drip system.
- (E) The operator of the property shall maintain a "tarpaulin repair response plan" pursuant to subsection (d).
 - (d) Tarpaulin Repair.
- (1) If a tarpaulin is used, the operator of the property shall maintain a "tarpaulin repair response plan." The tarpaulin repair response plan shall identify the responsibilities of the licensed pest control business and/or the permittee with regard to tarpaulin damage detection and repair activities. At a minimum, the tarpaulin repair response plan shall indicate the parties responsible for the repair and incorporate the applicable elements listed in (2) below.
- (2) The "tarpaulin repair response plan" must state with specificity the situations when tarpaulin repair must be conducted. The situations should be based on, but not limited to, hazard to the public, residents, or workers; proximity to occupied structures, size of the damaged area(s); timing of damage; feasibility and response time of repair; and environmental factors such as wind speed and direction.
- (e) Notwithstanding subsection (c), a reduced volatile organic compound emission field fumigation method approved pursuant to section 6452 or a method for experimental research purposes pursuant to a valid research authorization issued according to section 6260 may be allowed. Note: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6449. Chloropicrin Field Fumigation — General Requirements.

The provisions of section 6449.1 apply to field soil fumigation using chloropicrin within the Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, or Ventura ozone nonattainment areas during the May 1 through October 31 time period. Raised–tarpaulin nursery fumigations of less than one acre or replant of individual vine or tree–sites (tree holes) less than one contiguous acre are not considered field soil fumigations under the provisions of section 6449.1.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6449.1. Chloropicrin Field Fumigation Methods.

- (a) Application rate must not exceed 400 pounds of chloropicrin per acre.
- (b) For products containing chloropicrin as the sole active ingredient, the field soil fumigation must be made using only the methods described

Page 398

in section 6447.3 or 6448.1. However within the San Joaquin Valley, Southeast Desert, or Ventura ozone nonattainment areas the methods described in the following sections are prohibited: 6447.3 (a)(1), (2), (4), and (6); if applied as alternating fumigated and unfumigated areas (strip fumigation), methods 6447.3(a)(3) and (5); 6448.1(c)(1) and (5); and if applied as a bed fumigation, 6448.1(c)(2).

- (c) If there are no labeling requirements specifying soil moisture, then at time of application soil must contain at least enough moisture above the depth of application to meet the following test appropriate to the soil texture for:
- (1) coarse soils (sand and loamy sand) at least enough moisture to form a ball when compressed by hand, that may break when tapped;
- (2) loamy, moderately coarse, or medium textured (coarse sandy loam, sandy loam, fine sandy loam) at least enough moisture so that soil forms a ball that holds together when tapped;
- (3) fine texture soils (clay loam, silty clay loam, sandy clay, silty clay, sandy clay loam and clay) at least enough moisture so that the soil is pliable, not crumbly. Forms a ribbon when squeezed between the thumb and forefinger.
 - (d) Tarpaulin Repair.
- (1) If a tarpaulin is used, the operator of the property shall maintain a "tarpaulin repair response plan." The tarpaulin repair response plan shall identify the responsibilities of the licensed pest control business and/or the permittee with regard to tarpaulin damage detection and repair activities. At a minimum, the tarpaulin repair response plan shall indicate the parties responsible for the repair and incorporate the applicable elements described in (2) below.
- (2) The "tarpaulin repair response plan" must state with specificity the situations when tarpaulin repair must be conducted. The situations should be based on, but not limited to, hazard to the public, residents, or workers; proximity to occupied structures, size of the damaged area(s); timing of damage; feasibility and response time of repair; and environmental factors such as wind speed and direction.
- (e) Notwithstanding subsection (b), a reduced volatile organic compound emission field fumigation method approved pursuant to section 6452 or a method for experimental research purposes pursuant to a valid research authorization issued according to section 6260 may be allowed. NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6450. Metam-Sodium, Potassium

N-methyldithiocarbamate (metam-potassium), and Dazomet Field Fumigation — General Requirements.

The provisions of sections 6450.1 and 6450.2 apply to field soil fumigation using metam-sodium, potassium N-methyldithiocarbamate (metam-potassium), or dazomet within the Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, or Ventura ozone nonattainment areas during the May 1 through October 31 time period. Golf courses, tree applications for prevention of root graft disease transmission, wood decay uses, potting soil, replant of individual vine or treesites (tree holes) less than one contiguous acre, raised-tarpaulin nursery fumigations of less than one acre, and greenhouses and other similar structures are not considered field soil fumigations under the provisions of sections 6450.1 and 6450.2.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2453(a) to Section 6450 filed 8–13–85 (Register 85, No. 33).
- Amendment of section and Note filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).
- 3. Repealer and new section filed 9-19-2002 as an emergency; operative 9-22-2002 (Register 2002, No. 38). A Certificate of Compliance must be trans-

- mitted to OAL by 1-21-2003 or emergency language will be repealed by operation of law on the following day.
- 4. Repealer and new section refiled 1–21–2003 as an emergency; operative 1–21–2003 (Register 2003, No. 4). A Certificate of Compliance must be transmitted to OAL by 5–21–2003 or emergency language will be repealed by operation of law on the following day.
- 5. Repealer and new section refiled 5-19-2003 as an emergency; operative 5-21-2003 (Register 2003, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-18-2003 or emergency language will be repealed by operation of law on the following day.
- 6. Repealer and new section refiled 9-11-2003 as an emergency; operative 9-18-2003 (Register 2003, No. 37). A Certificate of Compliance must be transmitted to OAL by 1-16-2004 or emergency language will be repealed by operation of law on the following day.
- 7. Repealer and new section refiled 1–14–2004 as an emergency; operative 1–17–2004 (Register 2004, No. 3). A Certificate of Compliance must be transmitted to OAL by 5–17–2004 or emergency language will be repealed by operation of law on the following day.
- 8. Repealer and new section refiled 5-17-2004 as an emergency; operative 5-18-2004 (Register 2004, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-15-2004 or emergency language will be repealed by operation of law on the following day.
- 9. Repealer and new section refiled 9–9–2004 as an emergency; operative 9–15–2004 (Register 2004, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–13–2005 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 9–15–2004 order, including further amendment of section, transmitted to OAL 9–21–2004 and filed 11–3–2004 (Register 2004, No. 45).
- 11. Renumbering of former section 6450 to section 6447 and new section 6450 filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6450.1. Metam-Sodium and Potassium N-methyldithiocarbamate (Metam-Potassium) Field Fumigation Methods.

- (a) Application rate must not exceed 320 pounds active ingredient per acre for metam-sodium. Application rate must not exceed 350 pounds active ingredient per acre for potassium N-methyldithiocarbamate (metam-potassium).
- (b) Except for the method described in subsection (d)(9), if there are no labeling requirements specifying soil moisture, then at time of application soil must contain at least enough moisture above the depth of application to meet the following test appropriate to the soil texture for:
- (1) coarse soils (sand and loamy sand) at least enough moisture to form a ball when compressed by hand, that may break when tapped;
- (2) loamy, moderately coarse, or medium textured (coarse sandy loam, sandy loam, fine sandy loam) at least enough moisture so that soil forms a ball that holds together when tapped;
- (3) fine texture soils (clay loam, silty clay loam, sandy clay, silty clay, sandy clay loam, and clay) at least enough moisture so that the soil is pliable, not crumbly. Forms a ribbon when squeezed between thumb and forefinger.
- (c) Fumigations must start no earlier than one hour after sunrise and must be completed no later than one hour before sunset except for the method described in subsection (d)(9).
- (d) The metam-sodium or potassium N-methyldithiocarbamate (metam-potassium) field soil fumigation must be made using only the methods described in this section. However, within the San Joaquin Valley, Southeast Desert, or Ventura ozone nonattainment areas, methods (1), (4), and (9) are prohibited. In addition to labeling requirements for each of these methods, the following requirements shall apply.
- (1) Sprinkler/Broadcast or Bed/One Post-Fumigation Water Treatment
- (A) Furnigation must be completed in a time that allows compliance with the post-furnigation water treatment below:
- 1. Water must be applied by an irrigation method that uniformly covers the treated area in the entire application block.
- 2. On the day of fumigation, one post-fumigation water treatment must consist of at least 0.20 inches of water, beginning within 30 minutes of the completion of fumigation.
- 3. Any additional post-fumigation water treatment(s) may be applied at any time.

- (2) Sprinkler/Broadcast or Bed/Two Post-Fumigation Water Treatments
- (A) Fumigation must be completed in a time that allows compliance with the post–fumigation water treatments below:
- 1. Water must be applied by an irrigation method that uniformly covers the treated area in the entire application block.
- 2. On the day of fumigation, the first post–fumigation water treatment must consist of at least 0.20 inches of water, beginning within 30 minutes of the completion of fumigation. A second post–fumigation water treatment must consist of at least 0.20 inches of water applied starting no earlier than one hour prior to sunset on the day of fumigation and completed by midnight.
- 3. Additional post-furnigation water treatment(s) may be applied at any time provided the treatments required above are completed in the specified time periods.
- (3) Sprinkler/Broadcast or Bed/Three Post-Fumigation Water Treatments
- (A) Fumigation must be completed in a time that allows compliance with the post–fumigation water treatments below:
- 1. Water must be applied by an irrigation method that uniformly covers the treated area in the entire application block.
- 2. On the day of fumigation, the first post–fumigation water treatment must consist of at least 0.20 inches of water, beginning within 30 minutes of the completion of fumigation. A second post–fumigation water treatment must consist of at least 0.20 inches of water applied starting no earlier than one hour prior to sunset on the day of fumigation and completed by midnight.
- 3. On the day following fumigation, a third post–fumigation water treatment must consist of at least 0.20 inches of water, and must be applied starting no earlier than one hour prior to sunset and completed by midnight.
- 4. Additional post-furnigation water treatment(s) may be applied at any time provided the treatments required above are completed in the specified time periods.
- (4) Nontarpaulin/Shallow/Broadcast or Bed/One Post-Fumigation Water Treatment
- (A) Furnigation must be completed in compliance with the post–fumigation water treatments pursuant to subsection (d)(1)(A).
- (5) Nontarpaulin/Shallow/Broadcast or Bed /Two Post-Fumigation Water Treatments
- (A) Fumigation must be completed in compliance with the post–fumigation water treatments pursuant to subsection (d)(2)(A).
- (6) Nontarpaulin/Shallow/Broadcast or Bed/Three Post–Fumigation Water Treatments
- (A) Fumigation must be completed in compliance with the post-fumigation water treatments pursuant to subsection (d)(3)(A).
 - (7) Chemigation (Drip System)
- (A) Drip system must be filled with water and tested for pressure variation, clogged emitters, and leaks before chemigation. The pressure must not exceed the pressure rating of the drip tape and the pressure variation in the drip tape throughout the field must be less than three pounds per square inch. Drip system must be free of leaks and clogged emitters.
- (B) After chemigation, the drip system must be flushed with a volume of water at least three times the volume of the mainline and laterals of the drip system.
 - (8) Rotary Tiller/Power Mulcher/Soil Capping
- (A) Application equipment must be followed immediately by soil compaction equipment.
 - (9) Flood
- (A) The fumigant must be applied with at least six inches of water per acre.
- (e) Notwithstanding subsection (d), a reduced volatile organic compound emission field furnigation method approved pursuant to section 6452 or a method for experimental research purposes pursuant to a valid research authorization issued according to section 6260 may be allowed.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).
- 2. Repealer and new section filed 9-19-2002 as an emergency; operative 9-22-2002 (Register 2002, No. 38). A Certificate of Compliance must be transmitted to OAL by 1-21-2003 or emergency language will be repealed by operation of law on the following day.
- 3. Repealer and new section refiled 1–21–2003 as an emergency; operative 1–21–2003 (Register 2003, No. 4). A Certificate of Compliance must be transmitted to OAL by 5–21–2003 or emergency language will be repealed by operation of law on the following day.
- 4. Repealer and new section refiled 5–19–2003 as an emergency; operative 5–21–2003 (Register 2003, No. 21). A Certificate of Compliance must be transmitted to OAL by 9–18–2003 or emergency language will be repealed by operation of law on the following day.
- Repealer and new section refiled 9-11-2003 as an emergency; operative 9-18-2003 (Register 2003, No. 37). A Certificate of Compliance must be transmitted to OAL by 1-16-2004 or emergency language will be repealed by operation of law on the following day.
- Repealer and new section refiled 1–14–2004 as an emergency; operative 1–17–2004 (Register 2004, No. 3). A Certificate of Compliance must be transmitted to OAL by 5–17–2004 or emergency language will be repealed by operation of law on the following day.
- Repealer and new section refiled 5-17-2004 as an emergency; operative 5-18-2004 (Register 2004, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-15-2004 or emergency language will be repealed by operation of law on the following day.
- Repealer and new section refiled 9–9–2004 as an emergency; operative 9–15–2004 (Register 2004, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–13–2005 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 9–15–2004 order, including further amendment of section, transmitted to OAL 9–21–2004 and filed 11–3–2004 (Register 2004, No. 45).
- 10. Renumbering of former section 6450.1 to section 6447.1 and new section 6450.1 filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6450.2. Dazomet Field Fumigation Methods.

- (a) Furnigations must start no earlier than one hour after sunrise and must be completed no later than one hour before sunset.
- (b) The field soil fumigation using dazomet is limited to methods specifically identified in the labeling. In addition to labeling requirements for each identified method, the fumigation must comply with the following.
- (1) Furnigation must be completed in a time that allows compliance with the post–furnigation water treatments below:
- (A) Water must be applied by an irrigation method that uniformly covers the treated area in the entire application block.
- (B) On the day of fumigation, the first water treatment must consist of at least 0.20 inches of water, beginning within 30 minutes of the completion of fumigation. A second post–fumigation water treatment must consist of at least 0.20 inches of water applied starting no earlier than one hour prior to sunset on the day of fumigation and completed by midnight.
- (C) On the day following fumigation, a third post-fumigation water treatment must consist of at least 0.20 inches of water, and must be applied starting no earlier than one hour prior to sunset and completed by midnight.
- (D) On the second day following fumigation, a fourth post-fumigation water treatment must consist of at least 0.20 inches of water, and must be applied starting no earlier than one hour prior to sunset and completed by midnight.
- (E) Additional post-fumigation water treatment(s) may be applied at any time provided the treatments required above are completed in the specified time periods.
- (c) Notwithstanding subsection (b), a reduced volatile organic compound emission field fumigation method approved pursuant to section 6452 or a method for experimental research purposes pursuant to a valid research authorization issued according to section 6260 may be allowed. NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).
- 2. Amendment of subsection (e)(1) and new subsection (e)(4) filed 6–27–2001 as an emergency; operative 6–27–2001 (Register 2001, No. 26). A Certificate of Compliance must be transmitted to OAL by 10–25–2001 or emergency language will be repealed by operation of law on the following day.
- 3. Amendment of subsection (e)(1) and new subsection (e)(4) refiled 10–15–2001 as an emergency; operative 10–25–2001 (Register 2001, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–22–2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10–15–2001 order, including further amendment of section, transmitted to OAL 2–22–2002 and filed 4–8–2002 (Register 2002, No. 15).
- 5. Repealer and new section filed 9-19-2002 as an emergency; operative 9-22-2002 (Register 2002, No. 38). A Certificate of Compliance must be transmitted to OAL by 1-21-2003 or emergency language will be repealed by operation of law on the following day.
- 6. Repealer and new section refiled 1–21–2003 as an emergency; operative 1–21–2003 (Register 2003, No. 4). A Certificate of Compliance must be transmitted to OAL by 5–21–2003 or emergency language will be repealed by operation of law on the following day.
- 7. Repealer and new section refiled 5-19-2003 as an emergency; operative 5-21-2003 (Register 2003, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-18-2003 or emergency language will be repealed by operation of law on the following day.
- Repealer and new section refiled 9-11-2003 as an emergency; operative 9-18-2003 (Register 2003, No. 37). A Certificate of Compliance must be transmitted to OAL by 1-16-2004 or emergency language will be repealed by operation of law on the following day.
- 9. Repealer and new section refiled 1–14–2004 as an emergency; operative 1–17–2004 (Register 2004, No. 3). A Certificate of Compliance must be transmitted to OAL by 5–17–2004 or emergency language will be repealed by operation of law on the following day.
- 10. Repealer and new section refiled 5-17-2004 as an emergency; operative 5-18-2004 (Register 2004, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-15-2004 or emergency language will be repealed by operation of law on the following day.
- 11. Repealer and new section refiled 9–9–2004 as an emergency; operative 9–15–2004 (Register 2004, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–13–2005 or emergency language will be repealed by operation of law on the following day.
- 12. Certificate of Compliance as to 9–15–2004 order, including further amendment of section, transmitted to OAL 9–21–2004 and filed 11–3–2004 (Register 2004. No. 45).
- 13. Renumbering of former section 6450.2 to section 6447.2 and new section 6450.2 filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6450.3. Methyl Bromide Field Fumigation Methods. [Renumbered.]

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-15-2000; operative 1-14-2001 (Register 2000, No. 50).
- 2. Amendment of subsection (a)(1)(C)2. filed 6–27–2001 as an emergency; operative 6–27–2001 (Register 2001, No. 26). A Certificate of Compliance must be transmitted to OAL by 10–25–2001 or emergency language will be repealed by operation of law on the following day.
- 3. Amendment of subsection (a)(2)(C)2. refiled 10–15–2001 as an emergency; operative 10–25–2001 (Register 2001, No. 42). A Certificate of Compliance must be transmitted to OAL by 2–22–2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10–15–2001 order transmitted to OAL 2–22–2002 and filed 4–8–2002 (Register 2002, No. 15).
- 5. Repealer and new section filed 9-19-2002 as an emergency; operative 9-22-2002 (Register 2002, No. 38). A Certificate of Compliance must be transmitted to OAL by 1-21-2003 or emergency language will be repealed by operation of law on the following day.
- 6. Repealer and new section refiled 1–21–2003 as an emergency; operative 1–21–2003 (Register 2003, No. 4). A Certificate of Compliance must be transmitted to OAL by 5–21–2003 or emergency language will be repealed by operation of law on the following day.
- 7. Repealer and new section refiled 5-19-2003 as an emergency; operative 5-21-2003 (Register 2003, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-18-2003 or emergency language will be repealed by operation of law on the following day.
- 8. Repealer and new section refiled 9-11-2003 as an emergency; operative 9-18-2003 (Register 2003, No. 37). A Certificate of Compliance must be trans-

- mitted to OAL by 1-16-2004 or emergency language will be repealed by operation of law on the following day.
- Repealer and new section refiled 1–14–2004 as an emergency; operative 1–17–2004 (Register 2004, No. 3). A Certificate of Compliance must be transmitted to OAL by 5–17–2004 or emergency language will be repealed by operation of law on the following day.
- 10. Repealer and new section refiled 5–17–2004 as an emergency; operative 5–18–2004 (Register 2004, No. 21). A Certificate of Compliance must be transmitted to OAL by 9–15–2004 or emergency language will be repealed by operation of law on the following day.
- 11. Repealer and new section refiled 9–9–2004 as an emergency; operative 9–15–2004 (Register 2004. No. 37). A Certificate of Compliance must be transmitted to OAL by 1–13–2005 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 9–15–2004 order, including further amendment of section, transmitted to OAL 9–21–2004 and filed 11–3–2004 (Register 2004, No. 45).
- 13. Renumbering of former section 6450.3 to section 6447.3 filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6451. Sodium Tetrathiocarbonate Field Fumigation — General Requirements.

The provisions of section 6451.1 apply to field soil fumigation using sodium tetrathiocarbonate within the Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, or Ventura ozone nonattainment areas below during the May 1 through October 31 time period. Replant of individual vine or tree–sites (tree holes) less than one contiguous acre, and raised–tarpaulin nursery fumigations of less than one acre, and greenhouses and other similar structures are not considered field soil fumigations under the provisions of section 6451.1.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6451.1. Sodium Tetrathiocarbonate Field Fumigation Methods.

- (a) The field soil fumigation of sodium tetrathiocarbonate is limited to methods specifically identified in the labeling.
- (b) Notwithstanding subsection (a), a reduced volatile organic compound emission field fumigation method approved pursuant to section 6452 or a method for experimental research purposes pursuant to a valid research authorization issued according to section 6260 may be allowed. NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6452. Reduced Volatile Organic Compound Emissions Field Fumigation Methods.

- (a) For the Sacramento Metro and South Coast ozone nonattainment areas, the Director may approve use of a field fumigation method not described in sections 6447.3, 6448.1, 6449.1, 6450.1, 6450.2, and 6451.1 if the request is accompanied by scientific data documenting the volatile organic compound (VOC) emissions. The emission rating specified in section 6452.4 or the maximum emission rate (emission rating multiplied by the maximum application rate) must be no greater than any one of the methods for the same fumigant described in sections 6447.3, 6448.1, 6449.1, 6450.1, 6450.2, and 6451.1.
- (b) For the San Joaquin Valley, Southeast Desert, and Ventura ozone nonattainment areas, upon written request, the Director may approve use of a field fumigation method either not described or excluded from use in sections 6447.3, 6448.1, 6449.1, 6450.1, 6450.2, or 6451.1 if the request meets the following criteria:
- (1) The request is accompanied by scientific data documenting the VOC emissions:
- (A) The emission rating, as specified in section 6452.4, is no greater than any one of the methods for the same fumigant allowed for use in the

San Joaquin Valley, Southeast Desert, and Ventura ozone nonattainment areas as specified in sections 6447.3, 6448.1, 6449.1, 6450.1, 6450.2, or 6451.1, or

- (B) The maximum emission rate (emission rating multiplied by the maximum application rate) is no greater than any one of the methods for the same fumigant allowed for use in the San Joaquin Valley, Southeast Desert, and Ventura ozone nonattainment areas as specified in sections 6447.3, 6448.1, 6449.1, 6450.1, 6450.2, or 6451.1.
 - (c) Criteria the Director shall consider includes whether:
- (1) the data and information provided are sufficient to estimate emissions:
 - (2) the results are valid as indicated by the quality control data; and
 - (3) the conditions studied represent agricultural fields fumigated.
- (d) The Director shall publish a notice of interim approval for a field fumigation method on the Department's Web site. The interim approval expires three years after the date of approval.

NOTE: Authority cited: Sections 11456, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14102.

HISTORY

- 1. Editorial renumbering of former Section 2453(b) and (c) to Section 6452 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Renumbering of former section 6452 to section 6453 and new section 6452 filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6452.1. Fumigant Volatile Organic Compound Emission Records and Reporting.

- (a) Any person who applies field furnigants shall maintain records of furnigant applications pursuant to section 6624.
- (b) Any person who applies field fumigants shall report the information specified in section 6626.

NOTE: Authority cited: Sections 11456, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14102.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6452.2. Fumigant Volatile Organic Compound Emission Limits.

(a) The Director shall establish field fumigant volatile organic compound (VOC) emission limits in the Volatile Organic Compound Emissions Inventory Report issued pursuant to section 6452.4 for areas that exceed 80 percent of the emissions benchmarks listed below during the May 1 through October 31 time period:

Ozone Nonattainment Area	Total Agricultural and Structural VOC Emissions Inventory Benchmarks from May 1 to October 31
Sacramento Metro	900,000 lbs. (2.4 tons/day average)
San Joaquin Valley	5,900,000 lbs. (16.0 tons/day average)
South Coast	1,500,000 lbs. (4.1 tons/day average)
Southeast Desert	230,000 lbs. (0.62 tons/day average)
Ventura	970,000 lbs. (2.6 tons/day average)

- (b) The Director shall calculate the field fumigant VOC emission limits specified in (a) by subtracting the nonfumigant pesticide VOC emissions from the total agricultural and structural VOC emissions inventory benchmarks. Nonfumigant pesticide product emissions will be the summation of the pounds of each pesticide product used multiplied by the VOC content (emission potential) for the specific product.
- (c) The Director establishes the following field fumigant VOC emissions limits for 2008:

Maximum Total Pounds of VOC

Ozone Nonattainment Area	Emissions from Field Fumigations from May 1 to October 31

Ventura 734,000 lbs. (2.00 tons/day average)

NOTE: Authority cited: Sections 11456, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6452.3. Field Fumigant Volatile Organic Compound Emission Allowances.

- (a) No person may apply a field furnigant during the May 1 through October 31 time period in an ozone nonattainment area for which a furnigant emission limit has been established pursuant to section 6452.2, unless their restricted material permit includes a field furnigant emission allowance.
- (b) To obtain a field fumigant emission allowance, a permittee shall request an emission allowance by submitting information to the commissioner by a date designated by the commissioner. The information must include but is not limited to the following:
 - (1) operator identification number;
 - (2) county;
 - (3) crop;
 - (4) month(s) of application;
 - (5) number of acres to be fumigated;
 - (6) identification of each site to be fumigated;
 - (7) meridian, township, range, and section of sites to be fumigated;
 - (8) verification of operator of property for each site identified;
 - (9) identification of fumigant products to be used;
 - (10) the application rate; and
 - (11) fumigation method.
- (c) The Director shall establish a fumigant emission allowance(s) for each permittee so that the total allowances in each ozone nonattainment area do not exceed the fumigant limit established for that area. If the total allowances requested exceed an established fumigant emission limit, the Director will proportionally reduce each request to ensure that the limit is not exceeded.
- (d) Commissioners in each ozone nonattainment area subject to a fumigant emission limit shall issue permits or amend existing permits to comply with the fumigant emission allowance(s) established by the Director
- (e) Commissioners shall deny any notice of intent that does not comply with the permittees' fumigant emission allowances.

NOTE: Authority cited: Sections 11456, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6452.4. Annual Volatile Organic Compound Emissions Inventory Report.

- (a) The Director shall issue an annual emissions inventory report for the Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, and Ventura ozone nonattainment areas. The emission inventory report must:
- (1) report the total agricultural and structural (fumigant and nonfumigant) pesticide volatile organic compound (VOC) emissions for the previous years. Nonfumigant pesticide product emissions will be the summation of the pounds of each pesticide product used multiplied by the VOC content (emission potential) for the specific product. Fumigant product emissions will be the summation of the pounds of each pesticide product used multiplied by the emission potential for that specific product and VOC emission rating for the application method, as specified in (5);
- (2) evaluate compliance with the total pounds of agricultural and structural VOC emissions specified in section 6452.2;
- (3) establish fumigant emissions limits established pursuant to section 6452.2 for the upcoming year;
 - (4) (reserved).
- (5) establish an emission rating for each field fumigation method described in sections 6447.3, 6448.1, 6449.1, 6450.1, 6450.2, 6451.1, or 6452. The emission rating will be expressed as a percentage of the

Page 398.4

amount of fumigant applied. The Director shall base the emission rating upon available scientific data documenting the VOC emissions.

- (b) A draft emission report shall be made available to the public for comment. A 45–day public comment period will be provided to allow for submission of written statements or arguments to the Director for review before making finalizing the Annual Volatile Organic Compound Emission Report. The emission report will be posted on the Department's Web site.
- (c) The emission ratings as shown in Table 22 in the September 29, 2007 Barry, Spurlock, and Segawa memorandum to John Sanders, shall be used to determine the emissions. These emission ratings may be modified by the final annual emissions inventory report.

NOTE: Authority cited: Sections 11456, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14102, Food and Agricultural Code.

HISTORY

 New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

Article 5. Use Requirements

§ 6453. Chloropicrin and Methyl Bromide—Nursery and Commodity Fumigation.

- (a) When chloropicrin or methyl bromide is used, singly or in combination, to treat nursery potting soils or soil mixes, nursery stock, and other agricultural commodities, appliances, or equipment, it shall be done in a properly sealed fumigation chamber, railroad car, or truck trailer, or under a gas confining tarp approved by the commissioner or director. The commissioner or director may specify the fumigation period. Injection shall be made in a manner that minimizes gas loss.
- (b) When chloropicrin or methyl bromide is applied singly or in combination, the commissioner or director may require the treatment site or fumigation chamber to be posted and attended for a specified time after application.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New article 5 heading and renumbering of former section 6452 to new section 6453 filed 1-25-2008; operative 1-25-2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6454. Chloropicrin and Methyl Bromide—Structural Fumigation.

This section supplements the methyl bromide fumigation requirements found in the Business and Professions Code and Title 16 of the California Code of Regulations, as well as directions for use given on methyl bromide product labeling.

- (a) When furnigating a structure, the furnigator shall ensure that the distance between the furnigated structure and its property line shall meet the following criteria and that no person, other than the furnigation crew, enters the area prescribed in either (1), (2), or (3) below during the treatment period:
- (1) For fumigations utilizing 50 pounds of methyl bromide or less, a distance of at least five (5) feet must exist; or
- (2) For fumigations utilizing more than 50 pounds, but less than 80 pounds, a distance in feet calculated using the following formula must exist:
 - 5 times the total poundage of methyl bromide minus 240 feet; or
- (3) For fumigations utilizing 80 pounds or more, a distance in feet equal to two (2) times the total poundage of methyl bromide applied must exist.
- (b) Structures shall be covered with the required tarpaulins or sealed prior to fumigation. The "acceptable" tarpaulin used in fumigations shall be vinyl coated with a minimum weight of seven (7) ounces per square yard (or having a fumigant retention capability equal to or greater than that provided by the seven–ounce weight tarpaulin). The vinyl coating

shall not be worn, cracked, abraded, or similarly damaged to the extent that any of the underlying fabric shows through the vinyl coating.

- (c) All cuts, tears, holes, or similar damage to tarpaulins shall be repaired prior to introduction of the fumigant. Temporary repairs to damaged tarpaulins shall be made with vinyl coated self-adhesive tape, or the damaged area of the tarpaulin may be rolled and clipped so the tarpaulin's fumigant gas retention capability is maintained.
- (d) Fumigators shall use the fumigant retention method specified in the table below for the application rate and poundage combinations utilized in the fumigation:

Methyl Bromide Application Rate Per 1,000 Cubic Feet of Structure	Total Pounds of Methyl Bromide Applied in a 24–hour Period	Fumigant Retention Method
Up to 0.5 pounds	Not more than 20 pounds	"acceptable" tarpaulin
	More than 20 pounds, but less than 1,000 pounds	"acceptable" tarpaulin, or if the structure is a concrete tilt-up, seal with vinyl coated self-adhesive tape
More than 0.5 pounds Up to 1.5 pounds	Not more than 50 pounds	"acceptable" tarpaulin and a side drape of either: (1) an "acceptable" tarpaulin or (2) an unused 4-mil disposable polyethylene sheet
	More than 50 pounds, but less than 1,000 pounds	"acceptable" tarpaulin, or if the structure is a concrete tilt-up, seal with vinyl coated self-adhesive tape
More than 1.5 pounds Up to 3.0 pounds	Not more than 50 pounds	"acceptable" tarpaulin and a side drape of one unused 4-mil disposable polyethylene sheet
	More than 50 pounds, but less than 1,000 pounds	"acceptable" tarpaulin, or if the structure is a concrete tilt—up, seal with vinyl coated self—adhesive tape

- (e) When tarpaulins are used, all sides of the structure shall be draped to the ground. Sand snakes, water snakes, or similar weights shall be used to seal the base of the tarpaulins to the ground. Prior to the placement of these snakes or weights, the soil adjacent to the structure foundation shall be thoroughly watered.
- (f) Chloropicrin shall be used as a warning agent when fumigating a structure unless specifically prohibited by regulations or product labeling.
- (g) A fan shall be used to disperse chloropicrin and methyl bromide within the structure. Chloropicrin shall be released into the airstream of the fan when it is introduced (either by itself or in combination with methyl bromide).
- (h) Aeration of the fumigated structure shall not begin earlier than one hour after sunrise or later than one hour before sunset. The sunrise and sunset times published in the local newspaper shall be used to establish aeration timing.
- (i) Following treatment, the fumigated structure shall be aerated through convection tubing or ducting. Except as provided in subsection (j), the convection tubing or ducting outlet shall be located above the highest point of the roof as follows:
- (1) Six (6) feet for fumigations utilizing 50 pounds of methyl bromide or less; or
- (2) Ten (10) feet for fumigations utilizing more than 50 pounds of methyl bromide.
- (j) If any nearby structure is taller than the fumigated structure and the distance between the structures is equal to or less than the distance indicated in the following table, the convection tubing or ducting outlet shall be located as high as the top of the roof of the tallest structure.

Total Pounds of Convective Tubing or Ducting Outlet Must Be Methyl Bromide Applied As High As the Tallest Structure Within:

	•
1-14	50 ft.
15-24	75 ft.
25-32	100 ft.
33-40	125 ft.
41-50	150 ft.
51-60	175 ft.
61-99	200 ft.
100-1,000	A distance in footage equal to 2 times
	the pounds of methyl bromide used

- (k) When aerating a fumigated structure, a licensed Branch 1 operator or field representative shall ensure, from the initiation of the aeration procedure to completion of the steps described in (n) of this section, that persons not involved in the aeration process do not come within:
- (1) Ten (10) feet of the fumigated structure, for fumigations utilizing 50 pounds of methyl bromide or less; or
- (2) For fumigations utilizing more than 50 pounds but less than 80 pounds, a distance in feet calculated using the following formula must exist:
 - 5 times the total poundage of methyl bromide minus 240 feet; or
- (3) The number of feet equaling two (2) times the pounds of methyl bromide used for fumigations utilizing more than 80 pounds.
- (*l*) Exhaust fans and convection tubing or ducting may be installed prior to aeration or when covering the structure with tarpaulins in preparation for fumigation. The exhaust fans, convection tubing, and installation of the fans and tubing shall meet the following requirements:
- (1) Each exhaust fan shall have a capacity of at least 5,000 cubic feet per minute (cfm).
- (2) Convection tubing or ducting shall be large enough to fit over the exhaust fan housing and shall be securely attached to the housing prior to aeration.
- (3) Exhaust fans and convection tubing shall be installed in a manner which does not present a hazard to workers and the public.
- (m) If exhaust fans and convection tubing or ducting are installed after the fumigation has begun, the installer shall wear self-contained breathing apparatus (SCBA) respiratory protection.
- (n) The methyl bromide concentration shall be measured at the approximate center of the structure with a Fumiscope®, or similar instrument, that shall be located outside of the fumigated structure. (An instrument similar to a Fumiscope® may be used provided it can measure methyl bromide concentrations at the one ounce per 1,000 cubic feet [250 ppm] level.) Without entering the structure, the fumigator shall collect the methyl bromide sample for measurement through the use of tubing or ducting placed inside the structure and connected to the analytical instrument prior to the initiation of fumigation. The structure shall be aerated until the methyl bromide concentration has been reduced to 250 ppm

- or less (250 ppm is about one ounce per thousand cubic feet) while following the requirements listed below:
- (1) If the fumigated structure's windows were left open during the fumigation, the structure shall be aerated through convection tubing or ducting until the methyl bromide concentration is 250 ppm or less with the tarpaulins left in place; or
- (2) If the fumigated structure's windows were closed during the fumigation:
- (A) The space between the fumigated structure and the tarpaulin shall be aerated prior to tarpaulin removal through convection tubing or ducting.
- (B) After the tarpaulins are removed, the fumigated structure shall be aerated through convection tubing or ducting until the methyl bromide concentration is 250 ppm or less.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former section 2453(d) to section 6454 filed 8–13–85 (Register 85, No. 33).
- 2. Amendment of section heading and Note and new subsections (c)–(f) filed 4–14–92 as an emergency; operative 4–14–92 (Register 92, No. 18). A Certificate of Compliance must be transmitted to OAL 8–12–92 or emergency language will be repealed by operation of law on the following day.
- 3. Amendment of section heading and NOTE and new subsections (c)–(f) refiled 8–14–92 as an emergency; operative 8–14–92 (Register 92, No. 33). A Certificate of Compliance must be transmitted to OAL 12–12–92 or emergency language will be repealed by operation of law on the following day.
- 4. Amendment of section heading and NOTE and new subsections (c)–(f) refiled 12–18–92 as an emergency; operative 12–18–92 (Register 92, No. 51). A Certificate of Compliance must be transmitted to OAL 4–17–93 or emergency language will be repealed by operation of law on the following day.
- 5 Amendment of section heading and NoTE and new subsections (c)–(f) refiled 3–29–93 as an emergency; operative 3–29–93 (Register 93, No. 14). A Certificate of Compliance must be transmitted to OAL 7–27–93 or emergency language will be repealed by operation of law on the following day.
- 6. Repealer of subsections (c)–(f) and reinstatement of section heading and NoTE as they existed prior to emergency amendments filed 12–1–93, effective 7–28–93 by operation of Government Code section 11346.1(f) (Register 93, No. 49).
- 7. Editorial correction of HISTORY 3, 4, 5, and 6 (Register 94, No. 30).
- 8. Repealer and new section and amendment of NoTE filed 8–15–2000; operative 9–14–2000 (Register 2000, No. 33).

§ 6455. Sulfuryl Fluoride—Structural Fumigation, Aeration, and Reentry.

NOTE: Authority: Sections 12976, 12981, 14005, 14102 and 15203, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 4–14–92 as an emergency; operative 4–14–92 (Register 92, No. 18). A Certificate of Compliance must be transmitted to OAL 8–12–92 or emergency language will be repealed by operation of law on the following day.

[The next page is 399.]

- New section refiled 8-14-92 as an emergency; operative 8-14-92 (Register 92, No. 33). A Certificate of Compliance must be transmitted to OAL 12-14-92 or emergency language will be repealed by operation of law on the following day.
- 3. New section refiled 12–18–92 as an emergency; operative 12–15–92 (Register 92, No. 51). A Certificate of Compliance must be transmitted to OAL 4–19–93 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 3–29–93 as an emergency; operative 3–18–93 (Register 93, No. 14). A Certificate of Compliance must be transmitted to OAL 7–16–93 or emergency language will be repealed by operation of law on the following day.
- 5. Repealed by operation of Government Code section 11346.1(f) (Register 93, No. 49).

§ 6456. Sodium Arsenite.

NOTE: Authority cited: Sections 407, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

1. Editorial renumbering of former Section 2454 to Section 6456 filed 8–13–85 (Register 85, No. 33).

2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 6457. Bentazon (Basagran).

In addition to the restrictions specified in sections 6487.1, 6487.2, 6487.3, and 6487.4, the following restrictions apply for agricultural, outdoor institutional, and outdoor industrial uses of bentazon for the purpose of ground water protection:

- (a) Bentazon shall not be applied in Del Norte or Humboldt Counties.
- (b) Bentazon shall not be used in the production of rice.

NOTE: Authority cited: Sections 11456, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former section 6486.6 to section 6457 filed 4–27–2004; operative 5–27–2004 (Register 2004, No. 18).

§ 6458. Aldicarb.

(a) The amount of pesticides containing aldicarb that may be applied to the following crops shall not exceed:

	Stage of Growth Crop of Crop	Pounds of 15G/ Acre/Application	Ounces 15G/1000 Feet of Row
` /	Cotton At Planting At First Squaring From Squaring Through Early Bloom (Do not exceed a total of 21 pounds per acre)	7 14 14	40" row spacing 8.5 17 17
(2)	Potatoes At Planting	14 or	34" row spacing 14.5
	After Planting Sugar beets At Planting or Within One Week Before Planting Postemergence (Do not exceed a total of 28 pounds per acre)	14 14 14	14.5 22" row spacing 9.5 9.5
	Dried Beans	7	22-48" row spacing 7.5
5)	Citrus	33	N/A
		Pounds of 10G/ Acre/Application	Ounces 10G/1000 Square Feet
6)	Ornamentals	50	20
			or Pounds of 10G/1000 Linear Feet 42" row spacing 4
		(Do not exceed 50 pounds per acre per year)	

(b) Pesticides containing aldicarb shall not be applied to cotton, potatoes, sugar beets, dried beans, citrus, or field-grown ornamentals from September 1 to March 1 of each year.

NOTE: Authority cited: Sections 12781 and 12976, Food and Agricultural Code. Reference: Sections 12976 and 13150, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-4-90; operative 7-4-90 (Register 90, No. 29).
- 2. Change without regulatory effect amending section and Note filed 3-27-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13)

§ 6460. Drift Control.

Unless expressly authorized by permit issued pursuant to section 6412, no liquid Dicamba, 2,4–dichlorophenoxyacetic acid, 2,4–dichlorophenoxybutric acid, 2,4–dichlorophenoxypropionic acid, 2–methyl–4–chlorophenoxyacetic acid, or Propanil herbicide shall be:

- (a) Discharged more than ten feet above the crop or target. Discharge shall be shut off whenever it is necessary to raise the equipment over obstacles such as trees or poles.
 - (b) Applied when wind velocity is more than ten miles per hour.
 - (c) Applied by aircraft except as follows:

- (1) The flow of liquid to aircraft nozzles shall be controlled by a positive shutoff system as follows:
- (A) each individual nozzle shall be equipped with a check valve and the flow controlled by a suckback device or a boom pressure release device: or
- (B) Each individual nozzle shall be equipped with a positive action valve.
- (2) Aircraft nozzles shall not be equipped with any device or mechanism which would cause a sheet, cone, fan, or similar type dispersion of the discharged material except as otherwise provided.
 - (3) Aircraft boom pressure shall not exceed 40 pounds per square inch.
- (4) Aircraft nozzles shall be equipped with orifices directed backward parallel to the horizontal axis of the aircraft in flight.
- (5) Fixed wing aircraft and helicopters operating in excess of 60 miles per hour shall be equipped with jet nozzles having an orifice of not less than 1/16 inch in diameter.
- (6) Helicopters operating at 60 miles per hour or less shall be equipped with:

- (A) Nozzles having an orifice not less than 1/16 inch in diameter. A number 46 (or equivalent) or larger whirlplate may be used; or
- (13) Fan nozzles with a fan angle number not larger than 80 degrees and a flow rate not less than one gallon per minute at 40 pounds per square inch pressure (or equivalent); or
- (B) The Microfoil (R) boom (a coordinated spray system including airfoil—shaped nozzles with each orifice not less than 0.013 inches in diameter) or equivalent type approved by the director. Orifices shall be directed backward parallel to the horizontal axis of the aircraft in flight.
 - (d) Applied by ground equipment except as follows:
 - (1) Ground equipment other than handguns shall be equipped with:
- (A) Nozzles having an orifice not less than 1/16 inch in diameter or equivalent, and operated at a boom pressure not to exceed 30 pounds per square inch; or
- (B) Low pressure fan nozzles with a fan angle number not larger than 80 degrees and fan nozzle orifice not smaller than 0.2 gallon per minute flow rate or equivalent, and operated at a boom pressure not to exceed 15 pounds per square inch.

NOTE: Authority cited: Sections 12781, 12972, 12976, 14001, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14006, 14033 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former section 2458(a)–(c) to section 6460 filed 8–13–85 (Register 85, No. 33).
- Amendment filed 2-6-87; effective upon filing pursuant to Government Code section 11346.2(d) (Register 87, No. 7).
- 3. Amendment of subsection (c) filed 5–23–88 as an emergency, operative 5–23–88 (Register 88, No. 22). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 9–20–88.
- 4. Emergency language filed 5–23–88 repealed by operation of law (Register 89, No. 49).
- 5. Amendment of subsection (c) filed 12–1–89; operative 12–1–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 49).
- Editorial correction of printing error in subsection (c)(5) and HISTORY 5. (Register 91, No. 33).
- 7. Change without regulatory effect amending first paragraph and Note filed 4–3–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 14).

§ 6462. Propanil.

The provisions of this section apply to propanil used in Butte, Colusa, Glenn, Placer, and Yuba Counties; the portion of Sutter County situated north of Sankey Road; and the portion of Yolo County situated north of State Highway 16.

- (a) No emulsifiable concentrate formulation shall be applied.
- (b) Applications using aircraft shall be made in accordance with the following requirements:
- (1) Aerial applications shall not be made within four miles of cultivated commercial plantings of prunes.
- (2) No more than 720 acres may be treated by aircraft within each county per day.
- (3) Each operating aircraft nozzle shall produce a droplet size, in accordance with the manufacturer's specifications, not less than 600 microns volume median diameter (Dv0.5) with not more than ten percent of the diameter by volume (Dv0.1) less than 200 microns.
- (c) Notwithstanding (b)(1), the Butte county agricultural commissioner may allow the California Rice Research Station to make aerial applications within four miles of cultivated commercial plantings of prunes according to a work plan submitted to and approved by the Butte county agricultural commissioner. The work plan shall include: the largest individual site that may be treated per application; total acres that may be treated per day which shall not exceed 45 acres; the minimum distance that must be maintained from cultivated commercial plantings of prunes and the application site; and any additional procedures to protect cultivated commercial plantings of prunes within four miles of the application site.
- (d) Applications using ground equipment shall be made in accordance with the following requirements:

- (1) Ground applications shall not be made within one mile of cultivated commercial plantings of prunes, except as provided in (A) and (B) below
- (A) The commissioner may allow applications to be made to sites not less than one-half mile from cultivated commercial plantings of prunes if the following requirements are met:
- 1. Prior to the application, the operator of the property shall provide to the commissioner a recommendation written by a licensed pest control adviser stating there are no other feasible pest management alternatives;
- 2. Onsite monitoring of wind speed and wind direction shall be conducted by the applicator in a manner approved by the commissioner throughout the entire application. A record of recorded data shall be retained for one year; and
- 3. A positive airflow away from cultivated commercial plantings of prunes is present throughout the entire application.
- (B) The commissioner may allow applications to be made to sites less than one-half mile from cultivated commercial plantings of prunes when the following requirements are met in addition to the requirements of (A):
- 1. The commissioner shall provide onsite monitoring of all applica-
- 2. The commissioner shall provide for notice to, and opportunity to comment by, any owner of cultivated commercial plantings of prunes within one-half mile of the application.
- (2) Each operating nozzle shall produce a droplet size, in accordance with the manufacturer's specifications, not less than 500 microns volume median diameter (Dv0.5) with not more than ten percent of the diameter by volume (Dv0.1) less than 200 microns.

NOTE: Authority cited: Sections 11456, 12781, 14001, 14005 and 14102, Food and Agricultural Code. Reference: Sections 14006 and 14007, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former section 2456 to section 6462 filed 8-13-85 (Register 85, No. 33).
- Amendment filed 6-3-86; effective upon filing pursuant to Government Code section 11346.2(d) (Register 86, No. 23).
- 3. Amendment of subsection (b) filed 5–31–91; operative 5–31–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 28).
- 4. Amendment of subsection (a), new subsection (c) and amendment of Note filed 6-4-97 as an emergency; operative 6-4-97 (Register 97, No. 23). A Certificate of Compliance must be transmitted to OAL by 10-2-97 or emergency language will be repealed by operation of law on the following day.
- 5. Reinstatement of section as it existed prior to 6–4–97 emergency amendment by operation of Government Code section 11346.1(f) (Register 98, No. 19).
- 6. Amendment of section and NOTE filed 5-8-98 as an emergency; operative 5-8-98 (Register 98, No. 19). A Certificate of Compliance must be transmitted to OAL by 9-7-98 or emergency language will be repealed by operation of law on the following day.
- Reinstatement of section as it existed prior to 5–8–98 emergency amendment by operation of Government Code section 11346.1(f) (Register 99, No. 15).
- 8. Amendment of subsection (b), new subsections (b)(1)–(e) and amendment of NOTE filed 4–7–99; operative 4–7–99 pursuant to Government Code section 11343.4(d) (Register 99, No. 15).
- Editorial correction replacing inadvertently filed text with correct regulatory text (Register 99, No. 22).
- Amendment of section and NOTE filed 3-23-2004; operative 4-22-2004 (Register 2004, No. 13).

§ 6464. Phenoxy and Certain Other Herbicides.

(a) The provisions of this subsection apply to Dicamba, 2,4—dichlorophenoxyacetic acid, 2,4—dichlorophenoxybutric acid, 2,4—dichlorophenoxypropionic acid, 2—methyl—4—chlorophenoxyacetic acid, and Propanil herbicides when used in the Central Valley below one thousand feet elevation during the period beginning March 16 and continuing through October 15 of each calendar year. The boundary of this area through the Sacramento—San Joaquin Delta where the elevation does not reach 1,000 feet is as follows: Commencing from the point where Bailey Road intersects 1,000 feet elevation in Contra Costa County, thence north along Bailey Road to its intersection with Highway 4, thence west along Highway 4 or its intersection with Highway 680, thence north along Highway 80 to its intersection with Highway 505, thence north along Highway 505

to its intersection with the Solano-Yolo County line, thence west along the Solano-Yolo County line to its intersection with 1,000 feet elevation.

- (1) A smoke column or other device satisfactory to the commissioner shall be employed at the time and place of air applications to indicate to the pilot of the aircraft temperature inversions and the direction and velocity of the air flow; and
- (2) Unless expressly authorized by permit no herbicide in an ester form shall be applied.
- (b) The requirements of this subsection apply to Dicamba, 2,4–dichlorophenoxyacetic acid, 2,4–dichlorophenoxybutric acid, 2,4–dichlorophenoxypropionic acid, 2–methyl–4–chlorophenoxyacetic acid, and Propanil herbicides during the period beginning March 16 and continuing through October 15 of each calendar year when used in the following areas:
- (1) That portion of Sacramento County bounded by a line beginning at the junction of the Mokelumne River and Georgianna Slough; thence in a northerly direction following the meanderings of the Georgianna Slough to its junction with the Sacramento River near Walnut Grove; thence northwesterly along the Sacramento River to the junction of the north end o Randall Island and the north end of Snodgrass Slough; thence southeasterly along Snodgrass Slough to a point 1.0 miles due north of Lambert Road (first Standard Parallel north) which is the common boundary line between Section 27 and 34, T6N-R4E; thence due east along said line to its intersection with the Southern Pacific Railroad tracks; thence southerly along the Southern Pacific Railroad tracks to its intersection with Lambert Road (first Standard Parallel north); thence easterly along Lambert Road to its intersection with Franklin Boulevard, then southerly along Franklin Boulevard to its intersection with Twin Cities Road; thence easterly along Twin Cities Road to its intersection with the Southern Pacific Railroad Tracks (Amador Branch); thence northeasterly along said tracks to their intersection with the first Standard Parallel north; thence easterly along the first Standard Parallel north to its intersection with the Sacramento-Amador County line; thence southerly along the Sacramento-Amador County line to its junction with the Sacramento-Amador-San Joaquin County lines; thence westerly along the Sacramento-San Joaquin County line to the point of beginning.
- (2) All of Madera County west and south of a line beginning at the east boundary of Range 17 east and the Madera County–Merced County boundary line, thence south to the northwest corner of Section 30, Township 9 South, Range 18 east, thence east to the northeast corner of Section 28, Township 9 south, Range 18 east, thence south to the intersection of the Madera Canal in the northeast 1/4 of Section 9, Township 10 south, Range 18 east, thence southeasterly along the Madera Canal to the northeast corner of Section 1, Township 11 south, Range 19 east, thence east along the north boundary line of Township 11 south, to the Madera County–Fresno County boundary line.
- (3) All of Fresno County lying west of a line beginning at Friant Dam and continuing southeasterly along the Friant–Kern Canal its point of intersection with the north boundary of Section 29, Township 13 south, Range 23 east, thence due east along said boundary line projected to its intersection with the east boundary of Township 13 south, Range 24 east; then south along said east boundary of Township 13 south, Range 24 east and continuing south along the east boundary of Township 14 south, Range 24 east to the county boundary line.
 - (4) All of Kings County.
- (5) All of Tulare County lying west of a line drawn southeasterly from the northwest corner of Township 15 south, Range 25 east on the Fresno–Tulare County line to the southeast corner of Township 17 south, Range 27 east; thence due south along said east boundary of Range 27 east to the Kern County boundary line.
- (6) Those portions of Kern County described as follows: (A) All of Kern County lying west of a line commencing at a point on Tulare–Kern County line at the northwest corner of Section 6, Township 25 south, Range 31 east; thence south along the west boundary of Range 31 east to the south boundary of Township 32 south, Range 31 east; thence continuing due south to the Los Angeles County line. (B) Rosamond Area.

Includes all of Township 9 north, Range 14 west, Township 9 north, Range 13 west, and Township 9 north, and Range 12 west.

- (7) A permit authorizing use shall show the application site(s) for which it is valid, except that a permit need not show the application site(s) if a notice of intent to apply pesticide is required to be filed previous to any application. The commissioner may require that any application be made only under his direct supervision.
- (8) No application shall be made on any area situated within two miles of any cultivated commercial vineyard or cotton planting belonging to any person other than the owner of the property being treated unless there is a continuous air flow away from such planting, but in no case shall any application be made within one–half mile of such plantings.
- (9) No application shall be made by aircraft, nor shall aircraft be loaded except as follows:
 - (A) Within Sacramento County.
- (B) During the period beginning March 16 and continuing through March 31 within the counties of Fresno, Kern, Kings, and Tulare.
- (10) The provisions of paragraphs (8) and (9) shall not apply to Dicamba or Propanil herbicides.
- (c) The provisions of this subsection apply to Dicamba, 2,4-dichlorophenoxyacetic acid, 2,4-dichlorophenoxybutric acid, 2,4-dichlorophenoxypropionic acid, 2-methyl-4-chlorophenoxyacetic acid, or Propanil herbicides during the period beginning March 16 and continuing through October 15 of each calendar year when used in that portion of San Joaquin County bounded by a line beginning at the intersection of Sacramento, San Joaquin and Amador Counties; thence southerly along the San Joaquin County line to State Highway 88; thence southwesterly along Highway 88 to its intersection with State Highway 12; thence westerly along Highway 12 and 88 to the intersection of Clements Road to its intersection with an imaginary easterly extension of Eight Mile Road from its junction with the Calaveras River; thence west along this extension to Eight Mile Road; then west along Eight Mile Road to Thornton Road; thence south on Thornton Road to its intersection with Disappointment Slough; thence westerly along Disappointment Slough to the southeast corner of Bishop Tract; thence westerly along the southern edges of Bishop Tract, King Island, and Empire Tract; thence northerly along the west edge of Empire Tract to the southeast corner of Bouldin Island; thence along the southern and western edges of Bouldin Island to the intersection of San Joaquin, Contra Costa, and Sacramento Counties; thence northerly and easterly along the San Joaquin-Sacramento County line to the point of beginning
- (1) No application shall be made when wind velocity is less than 2 miles per hour or greater than 7 miles per hour.
 - (2) No herbicide in an ester form shall be applied.
- (3) A permit authorizing use shall show the application site(s) for which it is valid, except that a permit need not show the application site(s) if a notice of intent to apply pesticides is required to be filed previous to any application.
- (4) No application shall be made on any area situated within two miles of any cultivated commercial vineyard belonging to any person other than the owner of the property being treated; that existed prior to May 1, 1978.
- (5) No application shall be made by aircraft; nor shall aircraft be loaded except as follows:
- (A) Within that portion of San Joaquin County described as the entire areas of Empire Tract, King Island, Bishop Tract, and Rio Blanco Tract, the eastern boundary line of which begins on Atherton Levee Road at the confluence of Disappointment Slough and the dredger cut, located approximately one–half mile west of Interstate Highway 5 Pixley Slough Bridge 29–200 L; and thence running northerly along the State of California borrow pit to its meeting with the easterly end of White Slough subject to the following restriction:
- 1. The commissioner may require that all applications be made under the direct supervision of the commissioner's representative.
- (B) Within the entire area of Staten Island and Bouldin Island subject to the following restrictions:

- 1. The commissioner may require that all applications be made under the direct supervision of the commissioner's representative.
 - 2. A drift reducing agent shall be added to the spray mixture.
- Only one aircraft shall spray at a given time on each of the two isands.
- (6) The provisions of subsections (4) and (5) shall not apply to Propanil herbicides.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006, and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Sections 2457 and 2458(d)–(f) to Section 6464 filed 8–13–85 (Register 85, No. 33).
- 2. Change without regulatory effect repealing subsections (a)–(a)(4), relettering subsections and amending newly designated subsections (a). (b), (b)(9), (b)(10), (c) and (c)(6) and NOTE filed 4–3–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 14).
- 3. New subsections (d)–(d)(4)(E) and amendment of NOTE filed 4–15–98 as an emergency; operative 4–15–98 (Register 98, No. 16). A Certificate of Compliance must be transmitted to OAL by 8–13–98 or emergency language will be repealed by operation of law on the following day.
- 4. Reinstatement of section as it existed prior to 4–15–98 emergency amendment by operation of Government Code section 11346.1(f) (Register 99, No. 16).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6466. Paraquat.

The aerial application of paraquat for preplant or preemergence weed control shall be made only in accordance with the following restrictions:

- (a) Jet nozzles having an orifice of not less than 1/16 inch in diameter shall be used with such orifices directed backward parallel to the horizontal axis of the aircraft in flight. A number 46 (or equivalent) or larger whirlplate may be used.
 - (b) Boom pressure shall not exceed 40 pounds per square inch.
- (c) Spray material shall not be discharged at a height of more than ten (10) feet above the crop or target.
 - (d) Wind velocity shall not exceed 10 miles per hour.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2458.2 to Section 6466 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6467. Folpet.

NOTE: Authority cited: Sections 407, 12976, 12981 and 14006, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14006, Food and Agricultural Code.

HISTORY

- New section filed 2-14-89 as an emergency; operative 2-14-89 (Register 89, No. 9). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6-14-89.
- New, substantially equivalent, section filed 8-10-89 as an emergency; operative 8-10-89 (Register 91, No. 19). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 12-8-89.
- Editorial correction adding previously missing HISTORY 2. (Register 91, No. 19).
- Repealed by operation of Government Code section 11346.1 (g) filed 1–15–91 (Register 91, No. 19).

§ 6468. 1,3-Dichloropropene and Ethylene Dibromide.

NOTE: Authority cited: Sections 407, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2458.3 to Section 6468 filed 8–13–85 (Register 85, No. 33).
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 6469. Propargite (Omite, Comite).

NOTE: Authority cited: Sections 407, 12976, 12981 and 14005, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–27–88 as an emergency; operative 10–27–88 (Register 88, No. 45). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 2–24–89.
- Readoption of a substantially equivalent regulation filed 2–24–89 as an emergency; operative 2–24–89 (Register 89, No. 13). A Certificate of Compliance must be transmitted to OAL by 6–26–89 or readoption will be repealed by operation of law effective 6–27–89.
- New, substantially equivalent, section filed 8-10-89 as an emergency: operative 8-10-89 (Register 91, No. 19). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 12-8-89.
- 4. Editorial correction adding previously missing HISTORY 3. (Register 91, No. 19)
- 5. Repealed by operation of Government Code section 11346.1(g) filed 1–15–91 (Register 91, No. 19).

§ 6470. Cotton Harvest Aids.

- S,S,S-tributyl phosphorotrithioate (DEF), tributyl phosphorotrithioite (Folex), or paraquat when used as cotton harvest aids, singly or in combination, shall be used only in accordance with the following restrictions:
- (a) (1) Closed systems as specified in subsection 2476(b) shall be used for all mixing and transfers conducted by an employee.
- (2) Paraquat applications shall not be made within 1/8 mile of any school or any area zoned as residential where people are actually residing or other inhabited residential area designated by the commissioner.
- (3) DEF or Folex applications shall not be made within 1/2 mile of any area zoned as residential where people are actually residing or other inhabited residential area designated by the commissioner or any school in session or due to be in session within 24 hours.
- (4) DEF or Folex applications shall not in any case be made within 1/8 mile of any school.
- (b) (1) Jet nozzles having an orifice of not less than 1/16 inch in diameter shall be used on aircraft with such orifices directed backward parallel to the horizontal axis of the aircraft in flight. A number 46 (or equivalent) or larger whirlplate may be used.
- (2) Aircraft nozzles shall not be equipped with any device or mechanism which would cause a sheet, fan, cone, or similar type dispersion of the discharged material.
 - (3) Aircraft boom pressure shall not exceed 40 pounds per square inch.
- (4) These cotton harvest aids shall be applied by aircraft only in combination with a viscoelastic thickening agent or other drift control agent approved as effective for such purposes by the Director of the Department of Food and Agriculture.
- (5)Except for the requirements of paragraph (4), this subsection does not apply to helicopters equipped with a Microfoil (R) boom operated at air speeds below 60 miles per hour.
- (c) Air carrier ground equipment shall not be used to apply DEF or Folex.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 2458.4 to Section 6470 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6472. Ethylene Dichloride.

NOTE: Authority cited: Sections 407, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2458.5 to Section 6472 filed 8–13–85 (Register 85, No. 33).
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 6473. Bromoxynil.

NOTE: Authority cited: Sections 407, 12976, 12981 and 14005, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14006, Food and Agricultural Code.

Page 402 Register 2004, No. 18; 4-30-2004

HISTORY

- New section filed 12–2–88 as an emergency; operative 12–2–88 (Register 88, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–4–89.
- 2. New, substantially equivalent, section filed 8–10–89 as an emergency; operative 8–10–89 (Register 91, No. 19). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 12–8–89.
- Editorial correction adding previously missing HISTORY 2. (Register 91, No. 19).
- 4. Repealed by operation of Government Code section 11346.1(g) filed 1–15–91 (Register 91, No. 19).

§ 6474. Carbofuran.

Carbofuran (Furadan) shall not be applied to alfalfa located within one mile of nesting geese, widgeon or coots or to areas where repeated feeding of these waterfowl is known to occur.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2458.7 to Section 6474 1 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6476. Fenamiphos.

The following restrictions apply to all turf uses of fenamiphos (Nemacur).

- (a) Fenamiphos shall not be used to treat residential or institutional lawns or public recreation areas other than golf courses.
- (b) Fenamiphos shall not be applied with a knapsack or similar equipment that is placed on the applicator's body.
- (c) Fenamiphos shall be watered in immediately after it is applied with a minimum of one–half (1/2) inch of water. Such water shall not be allowed to run off the treated area.
- (d) Unprotected persons shall be kept out of areas being treated with fenamiphos until 24 hours after watering, as specified in subsection (c), is completed.

NOTE: Authority cited: Sections 11456, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2458.8 to Section 6476 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6480. 2,4-Dichlorophenyl P-Nitrophenyl Ether.

NOTE: Authority cited: Sections 407, 12976, 12981, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 12981, 14006 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2458.10 to Section 6480 filed 8–13–85 (Register 85, No. 33).
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

§ 6482. Oxydemeton-Methyl (Metasystox-R).

NOTE: Authority cited: Sections 407 and 14005, Food and Agricultural Code. Reference: Sections 14005 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–23–86 as an emergency; effective upon filing (Register 86, No. 52). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–22–87.
- 2. Certificate of Compliance including amendment of subsections (a)(2) and (a)(5) transmitted to OAL 4–22–87 and filed 5–21–87 (Register 87, No. 22).
- 3. Repealer of subsection (b) filed 12–7–88 as an emergency; operative 12–7–88 (Register 88, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–6–89.
- Certificate of Compliance including amendment transmitted to OAL 3-9-89 and filed 3-27-89 (Register 89, No. 13).
- 5. Repealer filed 8–13–90; operative 8–13–90 (Register 90, No. 41). (See new section 6790.)

§ 6484. Bentazon (Basagran).

NOTE: Authority cited: Sections 407 and 14005, Food and Agricultural Code. Reference: Sections 14005 and 14006, Food and Agricultural Code.

HISTORY

- New section filed 6-2-87 as an emergency; operative 6-2-87 (Register 87, No. 25). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 9-30-87.
- 2. Emergency language filed 6–2–87 repealed by operation of Government Code section 11346.1(g) (Register 88, No. 21).
- 3. New section filed 5–18–88; operative 5–20–88 pursuant to Government Code section 11346.2(d) (Register 88, No. 21).
- 4. Repealer filed 12–12–91; operative 1–13–92 (Register 92, No. 13).

§ 6486. Atrazine.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code Section 11346.2(d) (Register 89, No. 5).
- 2. Renumbering and amendment of former section 6486 to section 6486.1 filed 4-10-90; operative 4-10-90 pursuant to Government Code section 11346.2 (d) (Register 90, No. 16).

§ 6486.1. Atrazine.

NOTE: Authority cited: Sections 11456, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former section 6486 to section 6486.1 filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 16). For prior history, see Register 89, No. 5.
- 2. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6486.2. Simazine.

NOTE: Authority cited: Sections 11456, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 16).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6486.3. Bromacil.

NOTE: Authority cited: Sections 11456, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2 (d) (Register 90, No. 16).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6486.4. Diuron.

NOTE: Authority cited: Sections 11456, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2 (d) (Register 90, No. 16).
- 2. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6486.5. Prometon.

NOTE: Authority cited: Sections 11456, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2 (d) (Register 90, No. 16).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

3. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6486.6. Bentazon (Basagran).

NOTE: Authority cited: Sections 11456, 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-12-91; operative 1-13-92 (Register 92, No. 13).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Renumbering of former section 6486.6 to section 6457 filed 4–27–2004; operative 5–27–2004 (Register 2004, No. 18).

§ 6486.7. Azinphos-Methyl.

- (a) When employees apply azinphos-methyl using air carrier (air blast) ground equipment where any part of the airstream is directed at an angle above horizontal to the ground:
- (1) Employee applicators shall wear a chemical–resistant suit over long–sleeved shirt and long–legged pants, chemical–resistant hood, chemical–resistant boots, chemical–resistant gloves, and a full–face respirator or a half–face respirator together with a face shield in addition to labeling–required personal protective equipment;
- (2) If the employee applicator utilizes an enclosed cab and the work clothing and personal protective equipment specified in section 6738(i)(5), (6), and (7), the requirements in (1) do not apply. In situations specified in 6738(i), where respiratory protection is required inside an enclosed cab, the respiratory protection shall meet labeling requirements.

NOTE: Authority cited: Sections 12981 and 14005, Food and Agricultural Code. Reference: Sections 12980, 12981, 14001 and 14006, Food and Agricultural Code.

HISTORY

- New section filed 6-1-98 as an emergency; operative 6-1-98 (Register 98, No. 23). A Certificate of Compliance must be transmitted to OAL by 9-29-98 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 98, No. 42).
- 3. New section filed 4–14–99 as an emergency; operative 4–14–99 (Register 99, No. 16). A Certificate of Compliance must be transmitted to OAL by 8–12–99 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 8-11-99 as an emergency; operative 8-11-99 (Register 99, No. 33). A Certificate of Compliance must be transmitted to OAL by 12-9-99 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2000, No. 23).
- 6. New section filed 9-29-2000; operative 10-29-2000 (Register 2000, No. 39).

§ 6486.8. Norflurazon.

NOTE: Authority cited: Sections 12976, 13145, 14005 and 14006, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-21-2001; operative 3-23-2001 (Register 2001, No. 8).
- 2. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6487.1. Artificial Recharge Basins.

Use of pesticides registered for agricultural, outdoor industrial, and outdoor institutional use containing chemicals listed in section 6800(a) shall be prohibited below the high water line inside artificial recharge basins, unless the pesticide is applied six months or more before the basin is used to recharge ground water.

NOTE: Authority cited: Sections 11456, 12976, 13145 and 14102, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6487.2. Inside Canal and Ditch Banks.

Use of pesticides registered for agricultural, outdoor industrial, and outdoor institutional use containing chemicals listed in section 6800(a)

shall be prohibited below the high water line inside unlined canals and ditches, unless at least one of the following applies:

- (a) the pesticide user can document that the percolation rate of the canal or ditch is equal to or less than 0.2 inches per hour (0.002 gallons per minute per square foot); or
- (b) the pesticide is applied six months before water is run in the canal or ditch.

NOTE: Authority cited: Sections 11456, 12976, 13145 and 14102, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6487.3. Engineered Rights-of-Way Within Ground Water Protection Areas.

Use of pesticides registered for agricultural, outdoor industrial, and outdoor institutional use containing chemicals listed in section 6800(a) shall be prohibited on engineered rights-of-way in leaching or runoff ground water protection areas unless one of the following management options can be met and is designated by the commissioner on the permit:

- (a) The property operator complies with section 6487.4; or
- (b) Any runoff from the treated right—of—way shall pass through a noncrop fully vegetated area adjacent, and equal in area, to the treated area, or spread out onto an adjacent unenclosed fallow field that is at least 300 feet long and that will not be irrigated for six months following application, with full consideration of any plantback restrictions; or
- (c) The property operator complies with any permit issued pursuant to the storm water provisions of the federal Clean Water Act pertaining to the treated area; or
- (d) An alternative management practice or pesticide approved by the Director as follows:
- (1) Upon written request, the Director may evaluate and approve use of management practices that are based on scientific data demonstrating their effectiveness in reducing movement of pesticides to ground water; or
- (2) Upon written request, the Director may make a determination to allow the interim use of a pesticide containing a chemical listed in section 6800(a) on an engineered right-of-way within a ground water protection area, for a period not to exceed three years. The Director's determination shall be based on evidence that the available management practices are not feasible for a specific crop or site, and that there are no feasible alternatives for the specific crop or site. The formal request shall include a study protocol(s) that is acceptable to the Director to develop feasible alternatives or alternate management practices. The study protocol shall include a description of the objective, personnel, study plan, sampling methods including number of samples to be analyzed, data analysis, chemical analytical methods including appropriate quality control, timetable, and references, if any. The requestor shall submit a written progress report every six months. If the progress report does not support the submitted study protocol(s), or if a report is not submitted, the Director may rescind the determination to allow the use of the pesticide within a ground water protection area.
- (3) The Director will issue a public notice stating the reasons interim use has been approved under (1) or (2). The notice will be posted on the Department's Web site.

NOTE: Authority cited: Sections 11456, 12976, 13145 and 14102, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6487.4. Runoff Ground Water Protection Areas.

Except as provided in sections 6487.1, 6487.2, and 6487.3, use of pesticides registered for agricultural, outdoor industrial, and outdoor institutional use containing chemicals listed in section 6800(a) shall be prohibited in runoff ground water protection areas unless one of the following management practices can be met and is designated by the commissioner on the permit. The management practice identified in (b), "Incorporation of the pesticide," does not apply to bentazon.

- (a) Soil disturbance. Within seven days before the pesticide is applied, the soil to be treated shall be disturbed by using a disc, harrow, rotary tiller, or other mechanical method. This subsection does not apply to bentazon, and does not apply to the area to be treated that is immediately adjacent to the crop row and that does not exceed 33 percent of the distance between crop rows; or
- (b) Incorporation of the pesticide. Within 48 hours after the day the pesticide is applied, the pesticide shall be incorporated on at least 90 percent of the area treated; using a disc, harrow, rotary tiller, or other mechanical method, or by sprinkler or low flow irrigation, including chemigation if allowed by the label, using a minimum of 1/4 inch of irrigation water and a maximum of either one inch or the maximum amount of irrigation water specified on the label, at application rates that do not cause surface water runoff from the treated property or to wells on the treated property. This subsection does not apply to bentazon, and does not apply to the area treated with other pesticides listed in section 6800(a) that is immediately adjacent to the crop row and that does not exceed 33 percent of the distance between crop rows; or
- (c) Band treatment. The pesticide shall be applied as a band treatment immediately adjacent to the crop row so that not more than 33 percent of the distance between rows is treated; or
- (d) Timing of application. The pesticide shall be applied between April 1 and July 31; or
- (e) Retention of runoff on field. For six months following the application, the field shall be designed, by berms, levees, or nondraining circulation systems, to retain all irrigation runoff and all precipitation on, and drainage through, the field. The retention area on the field shall not have a percolation rate of more than 0.2 inches per hour (5 inches per 24 hours); or
- (f) Retention of runoff in a holding area off the field. For six months following the application, all runoff shall be channeled to a holding area off the application site, under the control of the property operator, that is designed to retain all irrigation runoff and all precipitation on, and drainage through, the treated field and all other areas draining into that holding area. The holding area shall not have a percolation rate of more than 0.2 inches per hour (5 inches per 24 hours); or
- (g) Runoff onto a fallow field. For six months following application, runoff shall be managed so that it runs off onto an adjacent unenclosed fallow field at least 300 feet long that is not irrigated for six months after application, with full consideration of any plant back restrictions; or
- (h) An alternative management practice or pesticide approved by the Director as follows:
- (1) Upon written request, the Director may evaluate and approve use of alternative management practices that are based on scientific data demonstrating their effectiveness in reducing movement of pesticides to ground water; or
- (2) Upon written request, the Director may make a determination to allow the interim use of a pesticide containing a chemical listed in section 6800(a) within a runoff ground water protection area, for a period not to exceed three years. The Director's determination shall be based on evidence that the available management practices are not feasible for a specific crop or site, and that there are no feasible alternatives for the specific crop or site. The formal request shall include a study protocol(s) that is acceptable to the Director to develop feasible alternatives or alternate mitigation measures. The study protocol shall include a description of the objective, personnel, study plan, sampling methods including number of samples to be analyzed, data analysis, chemical analytical methods including appropriate quality control, timetable, and references, if any. The requester shall submit a written progress report every six months. If the progress report does not support the submitted study protocol(s), or if a report is not submitted, the Director may rescind the determination to allow the use of the pesticide within a ground water protection area.
- (3) The Director will issue a public notice stating the reasons interim use has been approved under (1) or (2). The notice will be posted on the Department's Web site.

NOTE: Authority cited: Sections 11456, 12976, 13145 and 14102, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6487.5. Leaching Ground Water Protection Areas.

Except as provided in sections 6487.1, 6487.2, and 6487.3, use of pesticides registered for agricultural, outdoor industrial, and outdoor institutional use containing chemicals listed in section 6800(a) shall be prohibited in leaching ground water protection areas unless any one of the following management practices can be met and is designated by the commissioner on the permit:

- (a) The permittee shall not apply any irrigation water for six months following application of the pesticide; or
- (b) The permittee shall apply the pesticide to the planting bed or the berm above the level of irrigation water in the furrow or basin and the water level shall remain at or below that level for six months following application of the pesticide; or
- (c) Irrigation shall be managed so that the ratio of the amount of irrigation water applied divided by the net irrigation requirement is 1.33 or less for six months following application of the pesticide; or
- (d) An alternative management practice or pesticide approved by the Director as follows:
- (1) Upon written request, the Director may evaluate and approve use of alternative management practices that are based on scientific data demonstrating their effectiveness in reducing movement of pesticides to ground water; or
- (2) Upon written request, the Director may make a determination to allow the interim use of a pesticide containing a chemical listed in section 6800(a) within a leaching ground water protection area, for a period not to exceed three years. The Director's determination shall be based on evidence that the available management practices are not feasible for a specific crop or site, and that there are no feasible alternatives for the specific crop or site. The formal request shall include a study protocol(s) that is acceptable to the Director to develop feasible alternatives or alternate management practices. The study protocol shall include a description of the objective, personnel, study plan, sampling methods including number of samples to be analyzed, data analysis, chemical analytical methods including appropriate quality control, timetable, and references, if any. The requester shall submit a written progress report every six months. If the progress report does not support the submitted study protocol(s), or if a report is not submitted, the Director may rescind the determination to allow the use of the pesticide within a ground water protection area.
- (3) The Director will issue a public notice stating the reasons interim use has been approved under (1) or (2). The notice will be posted on the Department's Web site.

NOTE: Authority cited: Sections 11456, 12976, 13145 and 14102, Food and Agricultural Code. Reference: Sections 13145, 13150 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6488. Antifouling Paints or Coatings Containing Tributyltin.

- (a) Antifouling paints or coatings containing tributyltin shall be applied only to:
 - (1) aluminum vessel hulls;
 - (2) vessel hulls 82 feet or more in length; and
 - (3) outboard motors and lower drive units.
- (b) Except as provided n subsection (a), antifouling paints or coatings containing tributyltin shall not be applied to any surface or object that will come into contact with the freshwater or marine environment. This prohibition includes, but is not limited to, use on docks, piers, nets and other fishing equipment.
- (c) Prior to purchase of antifouling paints or coatings containing tributyltin the purchaser shall present to the dealer a copy of the registration

of the vessel to be painted or coated to verify the vessel type requirements specified in (a). In the case where no vessel registration exists or the paint or coating is to be applied to an outboard motor or lower drive unit, the purchaser shall submit a sworn statement to verify that the paint or coating shall be applied only to an aluminum vessel hull, to a vessel hull 82 feet or more in length, or to an outboard motor or lower drive. The sworn statement shall be made substantially in the form provided in Section 6574(b).

NOTE: Authority cited: Sections 14005 and 14151, Food and Agricultural Code. Reference: Sections 14005 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–31–87 as an emergency; operative 1–1–88 (Register 88, No. 3). A certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–2–88.
- 2. Certificate of Compliance including amendments and new subsection (b) transmitted to OAL 4-5-88 and filed 5-4-88 (Register 88, No. 19).
- 3. Amendment of subsections (a)–(a)(3) and (c) and amendment of Note filed 1–5–93; operative 1–5–93 (Register 93, No. 2).

§ 6489. Tributyltin Paint and/or Coating Additives.

Pesticides containing bis(tributyltin) oxide which are sold as "additives" to be mixed with paints or coatings shall not be applied, either alone or when mixed with paint, to any surface that comes into contact with the aquatic or marine environment including, but not limited to, vessels, piers and fishing equipment.

NOTE: Authority cited: Sections 12781, 14005 and 14102, Food and Agricultural Code. Reference: Sections 12824, 14005 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-16-88; operative 7-16-88 (Register 88, No. 26).
- 2. Change without regulatory effect amending section and Note filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).

Subchapter 5. Produce Carrying Pesticide Residue

Article 1. Tolerances and Exemptions

§ 6490. Incorporation of Federal Tolerances.

- (a) The Director of Food and Agriculture hereby finds that the pesticide chemicals referred to in this group are useful for the production and marketing of produce and that the presence of such pesticide chemicals as spray residue in quantities within the tolerances hereby established is not deleterious to the health of man or animals.
- (b) The director, having reviewed the tolerances and exemptions from tolerances established by the Environmental Protection Agency in Title 40, Code of Federal Regulations, Part 180 and having found that such tolerances and exemptions therefrom are in accordance with the standards and provisions of the Food and Agricultural Code, hereby establishes like tolerances for pesticide chemicals on produce packed, shipped, or sold within the State of California except as otherwise provided in this Group 5. The director will continuously review future amendments to said federal regulations, and tolerances and exemptions therefrom hereafter adopted shall also be deemed incorporated by reference, unless otherwise provided in this Group 5.
- (c) If the director has evidence that tolerances developed by the EPA are not appropriate for California conditions, the director shall adopt a California tolerance taking into account such evidence.

NOTE: Authority cited: Sections 11456, 12531 and 12561, Food and Agricultural Code. Reference: Section 12565, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2490 to Section 6490 filed 8–13–85 (Register 85, No. 33).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6492. Limitation on Residues.

No residue of a pesticide chemical in or on produce is justified or permitted unless a permissible tolerance has been established by the director, or unless the director has authorized an exemption from a tolerance. NOTE: Authority cited: Sections 11456, 12531 and 12561, Food and Agricultural Code. Reference: Section 12565, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 2490.1 to Section 6492 filed 8–13–85 (Register 85, No. 33).
- 2. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Chapter 3. Pest Control Operations

Subchapter 1. Licensing

Article 1. General License Requirements

§ 6500. License Duration.

The Director shall issue licenses and certificates for two years; provided, however, a license or certificate may be issued for less than two years based on when the applicant enters the two-year cycle described below.

The term of the license or certificate is determined by the Director as follows:

Each license or certificate with a name beginning with A through L shall expire December 31 of the following even numbered year.

Each license or certificate with a name beginning with M through Z shall expire December 31 of the following odd numbered year.

The issuance of a two-year license or certificate in no way affects any annual county registration required by the Food and Agricultural Code. NOTE: Authority cited: Sections 11456, 11502, 12005 and 12111, Food and Agricultural Code. Reference: Section 11456, Food and Agricultural Code.

HISTORY

- 1. New Group 1 (Articles 1-6, Sections 6500-6566, not consecutive) filed 1-24-83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 5). For history of Subchapter 3, see Register 83, No. 5).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Amendment filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 11502.5.
- 4. Editorial correction of HISTORY 3 (Register 2004, No. 37).

§ 6502. Applications.

- (a) An application for a new license or certificate shall be made on a form prescribed by the Director and shall be accompanied by the required application fee specified below in Table 1—License and Certificate Application Fees and Forms. The application fee shall allow an applicant a 12-month period to become licensed or certified.
- (b) Beginning with those licenses or certificates expiring December 31, 2003, an application to renew a license or certificate shall be made on a form prescribed by the Director and shall be accompanied by the required renewal fee specified below in Table 2—License and Certificate Renewal Fees and Forms. If the license or certificate is issued for more than one year pursuant to 6500, the applicant shall pay double the annual renewal fee.
- (1) If the renewal application is not postmarked by December 31 of the year the license or certificate expires, a penalty of 50 percent of the renewal fee shall be added to the original amount due.
- (c) Pursuant to this section, the prescribed forms, hereby incorporated by reference, are specified in Table 1 and Table 2 below.

Table 1—License and Certificate Application Fees and Forms

License or Certificate Type	New Application Fee	Form
Pest Control Business License Additional fee for each Pest Control Business Branch	\$160 \$ 80	Pest Control Business License Application PR-PML-042 (Rev. 9/04)
Pest Control Business License, Maintenance Gardener only	\$ 80	Maintenance Gardener Pest Control Business License Application PR-PML-004 (Rev. 9/04)
Pest Control Dealer License Additional fee for each Dealer Branch	\$160 \$ 80	Pest Control Dealer License Application PR-PML-041 (Rev. 9/04)
Pesticide Broker License Additional fee for each Broker Branch	\$0 \$0	Pesticide Broker License Application (PB) PR-PML-217 (Rev. 1/06)
Agricultural Pest Control Adviser License	\$ 80	Agricultural Pest Control Adviser Application PR-PML-084 (Rev. 9/04)
Pest Control Aircraft Pilot Certificate	\$ 60	Aircraft Pilot Pest Control Certificate Application PR-PML-005 (Rev. 9/04)
Pest Control Dealer Designated Agent License	\$ 25	Pest Control Dealer Designated Agent License Application PR-PML-043 (Rev. 9/04)

HISTORY

- Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Amendment of section and Note filed 11-3-2003 as an emergency; operative 1-1-2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 11502.5.
- 3. Editorial correction of HISTORY 2 (Register 2004, No. 37).
- Change without regulatory effect amending Tables 1 and 2 within subsection (c) filed 9–9–2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 37).
- Change without regulatory effect amending Tables 1 and 2 within subsection (c) filed 2-7-2006 pursuant to section 100, title 1, California Code of Regulations (Register 2006, No. 6).

 Amendment of Tables 1 and 2 within subsection (c) filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6504. Examinations.

- (a) The director shall schedule examinations at such times and places as he deems reasonable. Each applicant shall appear at a time and place designated by the director for examination.
- (b) All applicants for a license or certificate will be required to pass an examination on the laws and regulations governing pesticide use and the safety precautions necessary to prevent injury.
- (c) A passing score of 70 percent or greater is required to qualify for any license or certificate issued pursuant to Division 6 of the Food and Agricultural Code; or for a qualified applicator certificate.
- (d) Applicants may request up to four examinations at each time and place.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12024 and 12111, Food and Agricultural Code. Reference: Sections 11702, 11905, 12024 and 12106, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–14–85 as an emergency; effective upon filing (Register 85, No. 4). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–14–85.
- 2. Certificate of Compliance transmitted to OAL 5-14-85 and filed 6-17-85 (Register 85, No. 25).
- 3. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6505. Examination Fees.

- (a) In addition to the application fee specified in section 6502(a), an agricultural pest control adviser, pest control aircraft pilot, pest control dealer designated agent, qualified applicator license or qualified certificate applicant shall pay, if applicable:
- (1) A \$50 fee for the Laws, Regulations, and Basic Principles examination; and
 - (2) A \$50 fee for each additional examination category requested.
- (b) A license or certificate holder seeking to add an additional category shall submit a \$50 fee for each examination category requested accompanied by the required application form specified in 6502.
- (c) A \$50 fee shall be submitted for each request to reschedule an examination due to the applicant's failure to obtain a passing score or failure to appear for a scheduled examination.

NOTE: Authority cited: Sections 11456 and 11502.5, Food and Agricultural Code. Reference: Section 11502.5, Food and Agricultural Code.

HISTORY

- New section filed 1-14-85 as an emergency; effective upon filing (Register 85, No. 4). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5-14-85.
- 2. Certificate of Compliance transmitted to OAL 5-14-85 and filed 6-17-85 (Register 85, No. 25).
- 3. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Repealer and new section filed 11-3-2003 as an emergency; operative 1-1-2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 11502.5.
- 5. Editorial correction of HISTORY 4 (Register 2004, No. 37).

§ 6506. Acceptance of Prior Examination.

NOTE: Authority cited: Sections 407, 11502, 12005 and 12111, Food and Agricultural Code. Reference: Sections 11702 and 12106, Food and Agricultural Code.

HISTORY

 Repealer filed 5-24-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 22).

§ 6508. Notification of Change.

- (a) Every license or certificate holder shall immediately notify the Director of any change in, including but not limited to, name, business address, business organization, qualified person, bond, insurance, registered officers, or any other matter shown in the application.
- (b) Licenses and certificates are not transferable, and in case of a change of business organization or ownership, a new application and fee are required.
 - (c) A \$20 fee is required when:
- (1) a license or certificate holder requests a replacement or duplicate copy of a license or certificate; or
- (2) a license or certificate is reissued as a result of a name change made pursuant to (a).

NOTE: Authority cited: Sections 11456, 11502, 12005 and 12111, Food and Agricultural Code. Reference: Sections 11501, 11708 and 12110, Food and Agricultural Code.

HISTORY

- 1. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Amendment filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 11502
- 3. Editorial correction of HISTORY 2 (Register 2004, No. 37).

§ 6510. Renewals and New Applications.

A person who has not possessed a valid license or certificate within 12 months of the date of application or has a valid license or certificate and has not completed the continuing education requirements within each two—year license or certification period as specified in section 6511 shall not be allowed to renew his or her license or certificate and shall be required to submit an application for a new license or certificate and pass the examinations before being issued a license or certificate.

NOTE: Authority cited: Sections 11456, 11502, 12005, 12024, 12111 and 14005, Food and Agricultural Code. Reference: Sections 11702, 11905, 12024, 12106 and 14006, Food and Agricultural Code.

HISTORY

- New section filed 5-24-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 22).
- 2. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Change without regulatory effect amending section filed 4–18–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 16).

§ 6511. Continuing Education Requirements.

No license or certificate issued to a licensee or certificate holder specified in this section shall be renewed unless the holder has completed the required continuing education hours within each two—year license or certificate period. The education shall have been obtained in a course or program approved pursuant to section 6512.

- (a) Except as provided in (f) and (g), a pest control aircraft pilot shall complete a minimum of 20 hours of approved continuing education relating to pest management and pesticides, including not less than four hours pertaining to pesticide laws and regulations and four hours pertaining to aerial pest control equipment and application techniques.
- (b) Except as provided in (f) and (g), qualified applicator license and certificate holders shall complete a minimum of 20 hours of approved continuing education relating to pest management and pesticides, including not less than four hours pertaining to pesticide laws and regulations.
- (c) Except as provided in (f) and (g), qualified applicator license and certificate holders engaged in the business of maintenance gardening, pursuant to Food and Agricultural Code section 11704, shall complete a minimum of eight hours of approved continuing education relating to pest management and pesticides, including not less than two hours pertaining to pesticide laws and regulations.
- (d) Except as provided in (f) and (g), qualified applicators who only possess a license or certificate in the seed treatment pest control category shall complete a minimum of four hours of approved continuing education relating to pest management and pesticides, including not less than two hours pertaining to pesticide laws and regulations.
- (e) Except as provided in (f) and (g), an agricultural pest control adviser licensee shall complete a minimum of 40 hours of approved continuing education relating to pest management and pesticides, including not less than four hours pertaining to pesticide laws and regulations.
- (f) Each licensee or certificate holder listed in this section, whose initially issued license or certificate has been valid for less than 12 months at the time of its renewal is exempt from the continuing education requirements applicable to that license or certificate.
- (g) Each licensee or certificate holder listed in this section whose initially issued license or certificate has been valid for 12 to 20 months at the time of its renewal shall complete a minimum of one–half of the continuing education requirements applicable to that license or certificate. NOTE: Authority cited: Sections 11456 and 11502.5, Food and Agricultural Code. Reference: Section 11502.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-4-90; operative 7-4-90 (Register 90, No. 29).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6512. Approval of Continuing Education Courses.

(a) A continuing education provider intending to sponsor a continuing education course or program shall be responsible for the following, including but not limited to, administering the continuing education course

or program, the agenda and course or program content, attendance verification, and administrative record keeping found in section 6513.

- (b) Requests for evaluation and approval of a course or program offering continuing education in pest management and pesticides shall be submitted by the continuing education provider to the Director at least 30 days before presentation of the education. The request for evaluation and approval shall be made on the Continuing Education Approval Request form (PR-PML-131, Rev. 09/03), hereby incorporated by reference, and shall be accompanied by a comprehensive written outline, description of the course or program, and a \$45 fee for each course.
- (c) For a course or program previously approved within the calendar year, the continuing education provider shall submit a request to modify the course or program, or add an additional presentation(s) on the Continuing Education Additional Presentation Request form (PR-PML-132 Est. 9/03), hereby incorporated by reference, at least 30 days before the requested presentation(s).
- (d) If the Director determines that the course or program outline and description are not comprehensive, the Director may request that a more detailed and comprehensive outline and description be submitted before making the determination as to whether the course or program meets the criteria specified in (e) below.
- (e) The Director may approve any course or program submitted for evaluation, which meets the following criteria:
- (1) The instruction shall relate only to pest management and pesticides (including but not limited to, laws and regulations, chemical formulations, labeling and label interpretation, application equipment, pests, identification of environmentally sensitive areas, endangered species, drift prevention, pesticide registration, integrated pest management, cultural practices, pesticide worker safety, surface and ground water protection, and biological control methods).
- (2) The instructional course or program shall be at least one hour total in length.
- (f) The approval of a course or program pursuant to this section shall be valid for the calendar year in which the course or program would be presented.

NOTE: Authority cited: Sections 11456 and 11502.5, Food and Agricultural Code. Reference: Section 11502.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-4-90; operative 7-4-90 (Register 90, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Amendment of section and Note filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 11502.5.
- 4. Editorial correction of HISTORY 3 (Register 2004, No. 37).

§ 6513. Records of Continuing Education.

- (a) The instructor or sponsoring organization shall maintain a record of licensees and certificate holders who have successfully completed continuing education for three years from the completion date of the course or program.
- (b) Each licensee and certificate holder specified in section 6511 shall maintain a record for three years of all continuing education approval pursuant to section 6512 which he acquired during each license or certificate period.
 - (c) The records specified in (a) and (b) shall include:
 - (1) the license or certificate holder's name;
 - (2) license or certificate number;
 - (3) the title and location of the instruction;
 - (4) name of instructor or sponsoring organization, hours credited, and
- (5) the identification code number assigned by the director or regional accreditation committee to the course or program.
- (d) Certificates of course or program completion or written statements containing all the information specified in (c), issued by the instructor or sponsoring organization shall be sufficient to constitute the records specified in (a) and (b).

(e) The records specified in (a) and (b) shall be submitted to the director upon written request.

NOTE: Authority cited: Sections 11456 and 11502.5, Food and Agricultural Code. Reference: Sections 11502.5 and 12980.1(c), Food and Agricultural Code.

HISTORY

- 1. New section filed 6-4-90; operative 7-4-90 (Register 90, No. 29).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6514. Regional Accreditation Committees.

NOTE: Authority cited: Sections 407 and 11502.5, Food and Agricultural Code. Reference: Sections 11502.5 and 12986, Food and Agricultural Code.

HISTORY

- 2. Repealer filed 8-1-96; operative 8-31-96 (Register 96, No. 31).

Article 2. Agricultural Pest Control Operator Licenses

§ 6520. Authorized Agent Qualifications.

NOTE: Authority cited: Sections 407 and 11502, Food and Agricultural Code. Reference: Sections 11702 and 11703, Food and Agricultural Code.

HISTORY

- Repealer filed 1–14–85 as an emergency; effective upon filing (Register 85, No.

 A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–14–85.
- 2. Certificate of Compliance transmitted to OAL 5-14-85 and filed 6-17-85 (Register 85, No. 25).

§ 6522. Categories.

The categories for supervision of pest control by a qualified person pursuant to Section 11708 of the Food and Agricultural Code shall be those listed in Section 6530. Persons holding an unrevoked license or licenses pursuant to this section in 1984 will be issued a corresponding license or licenses for the categories specified in Section 6530 upon application before December 31, 1985.

NOTE: Authority cited: Sections 11456 and 11702, Food and Agricultural Code. Reference: Sections 11702 and 11705, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–24–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 22).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6524. Financial Responsibility of Applicants for an Agricultural Pest Control Business License.

- (a) Each applicant shall demonstrate financial responsibility in connection with the obtaining and maintenance of an agricultural pest control business license pursuant to Article 1 of Chapter 4 (beginning with Section 11701) of Division 6 of the Food and Agricultural Code as follows:
- (1) File with the Director an original certificate of insurance (Form number 38–052, dated 3/88, entitled "Certificate of Insurance") certifying insurance coverage for the operations involved for an annual period in an amount not less than that specified in an in accordance with the provisions of (c). The certificate shall be provided by the Director and issued by the insurer. Within 10 days of expiration of the insurance policy(s) identified by the certificate, applicants who have been licensed by the Director, shall file a new certificate [identifying the current policy(s)] with the Director. For insurance covering aircraft, the certificate shall specify the N number(s) of the aircraft covered by the insurance for chemical liability; or,
- (2) Deposit with the Director a certificate of deposit issued (by a licensed financial institution doing business in California) and maintained under the following conditions:
- (A) The principal amount of the certificate of deposit at time of issuance is not less than that specified in and in accordance with the provisions of (c);
- (B) The Director is given express authority to withdraw any part or all of the funds required to satisfy a final judgment of a California or Federal

Page 409

court based upon violation of the provisions of Food and Agricultural Code Division 6, and Division 7 pertaining to pesticides, and regulations issued pursuant to those provisions;

- (C) The Director is given express authority to withdraw any part or all of the funds and deposit the funds in court in an interpleader action in any circumstance where it appears to the Director that there may be multiple judgments involving violation of the laws and regulations specified in (B) and such funds may be called upon to satisfy such judgments; and
- (D) If any part of the funds are withdrawn as provided in (B) and (C), an additional certificate of deposit shall be filed with the Director so that the remaining funds, if any, of the initial certificate of deposit and the principal amount of the additional certificate of deposit equal the principal amount of the initial certificate of deposit at the time of its issuance; or
- (3) Deposit with and on a form provided by the Director a surety bond (Form number 38–053, dated 3/88, entitled "Agricultural Pest Control Business Licensees Bond") issued by a bonding company doing business in California in an amount not less than that specified in and in accordance with the provisions of (c).
- (b) Applicants electing to show financial responsibility by a certificate of deposit as specified in (a)(2) shall assign the certificate to the Director and shall maintain the certificate and not be entitled to withdraw the funds for two years after termination of the license or until all claims filed against the licensee are satisfied, whichever occurs later.
- (c) Applicants may show financial responsibility by liability insurance which covers chemical bodily injury and chemical property damage or by a certificate of deposit or a surety bond to cover chemical bodily injury and chemical property damage in the amounts specified below:

Type of Pest Control Operations	Bodily Injury Per Person	Liability Insurance Bodily Injury Per Occurrence	Property	Certificate of Deposit or Surety Bond
Agricultural pest con- trol business license applicants who make applications by ground rigs or who make fumigations	\$100,0	00/300,000/50,000)	\$75,000
Agricultural pest con- trol business license applicants who make applications by air- craft	000 pe ty dan one—ha damag numbe craft, y	noo/300,000/100, raircraft; propermage aggregate: alf the property e limit times the er of insured airwhere more than ceraft is insured.		\$50,000 per aircraft but not to ex- ceed \$300,000 per business license
Applicants for an agreultural pest contribusiness license in the maintenance garden category; in lieu of insuance, a certificate of diposit, or surety bon these applicants may provided a statement the Director under penaty of perjury that as chemical bodily injuand chemical proper damage resulting frought their pest control oper tions they are financial able to respond in darages using their own personners.	ol he er ur- le- dd, ay to to to ry ty om a- elly	0/10,000/5,000		\$5,000

(d) Applicants whose business involves applications by aircraft and who elect to show financial responsibility by a certificate of deposit or

sonal assets

- a surety bond shall file with and on a form provided by the Director (Form number 38–054, dated 3/88, entitled "List of Aircraft") a list of the applicant's aircraft including their N numbers and their usages.
- (e) Aircraft which is covered by liability insurance only for nonchemical bodily injury and nonchemical property damage shall not be operated for pesticide application purposes, unless the pest control business using the aircraft has deposited with the Director, as specified in (a)(2) and (a)(3), a certificate of deposit or a surety bond for that aircraft in the amount specified in (c).
- (f) Applicants who make applications by aircraft and ground rigs shall meet the financial responsibility requirements of this section for both the aircraft and ground rig types of pest control operations.

NOTE: Authority cited: Sections 11456, 11502 and 11702, Food and Agricultural Code. Reference: Sections 11501 and 11702, Food and Agricultural Code.

HISTORY

- 1. New section filed 9-19-88; operative 9-19-88 (Register 88, No. 39).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 3. Qualified Applicators

§ 6530. Categories and Examinations.

Applicants may qualify by examination to work in one or more of the following categories:

- (a) Residential, Industrial and Institutional Pest Control
- (b) Landscape Maintenance Pest Control
- (c) Right of Way Pest Control
- (d) Agricultural Pest Control (plant)
- (e) Forest Pest Control
- (f) Aquatic Pest Control
- (g) Regulatory Pest Control
- (h) Seed Treatment
- (i) Agricultural Pest Control (animal)
- (j) Demonstration and Research
- (k) Health Related Pest Control

- 1. New section filed 5–24–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 22).
- 2. Repealer filed 8-1-96; operative 8-31-96 (Register 96, No. 31).

§ 6534. Refusal, Revocation, and Suspension.

A qualified applicator certificate or license may be refused, revoked, or suspended by the director for any of the following:

- (a) Failure to adequately supervise the use of a restricted material;
- (b) Failure to comply with any applicable provision of Divisions 6 or 7 of the Food and Agricultural Code, or regulations adopted pursuant to such provisions;
 - (c) Making any false or fraudulent record or report.

NOTE: Authority cited: Sections 11456, 12976, 14005 and 14102, Food and Agricultural Code. Reference: Sections 11501, 14001 and 14102, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 2468 to Section 6534 filed 4-30-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 18).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Page 410

§ 6536. Field Fumigation Licensing Requirements.

- (a) A person who performs or supervises field fumigation applications pursuant to section 6445.5 must hold a qualified applicator license or certificate in the subcategory of field fumigation pest control.
- (b) Notwithstanding section 6530, examination requirements and fees required pursuant to section 6502 may be waived and a person may be issued a qualified applicator license or certificate in the field fumigation pest control (subcategory O) within 12 months from the effective date of this section, if the applicant meets the following criteria:
- (1) Possesses a valid qualified applicator license or certificate in Agricultural Pest Control (category D), Regulatory Pest Control (category G), or Demonstration and Research (category J);
- (2) Has at least 24 months of technical experience conducting field fumigation activities for a pest control business licensed by the Director from January 1, 2006 to December 31, 2008; and
- (3) Has a statement signed by the pest control business under which the applicant is operating verifying this technical experience.

NOTE: Authority cited: Sections 11456, 11502 and 14005, Food and Agricultural Code. Reference: Sections 11501, 14001 and 14151, Food and Agricultural Code.

1. New section filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

Article 4. Pest Control Aircraft Pilot's Certificate

§ 6540. Apprentice Pilot Supervision.

The journeyman pilot responsible for supervision of an apprentice pilot shall be aware of the conditions at the application site and be available to direct and control the manner in which applications are made by the apprentice. The availability of the journeyman shall be directly related to the actual or potential hazard of the situation.

NOTE: Authority cited: Section 11456, Food and Agricultural Code. Reference: Sections 11908 and 11909, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6542. Registration.

- (a) Each pest control aircraft pilot who registers as an apprentice pilot in any county shall include on the registration form the name of the journeyman pilot responsible for providing supervision of the pest control activities of such apprentice. The journeyman pilot named on the apprentice pilot's county registration must be currently registered with that county.
- (b) The apprentice pilot shall immediately notify the commissioner and amend the registration in the event the journeyman pilot named on the apprentice's registration is no longer able to provide such apprentice with supervision.

NOTE: Authority cited: Sections 11456 and 11502, Food and Agricultural Code. Reference: Sections 11921 and 11924, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6544. Pesticide Handling by Pilots.

Pilots who operate pest control aircraft shall not transfer, mix or load liquid category one or two pesticides containing organophosphates or carbamates unless a closed system is used.

NOTE: Authority cited: Sections 11456, 11502, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11502 and 12981, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 5. Agricultural Pest Control Adviser Licenses

§ 6550. Minimum Qualifications.

- (a) A person who has never held an agricultural pest control adviser license shall meet one of the following minimum qualifications:
- (1) Graduated from college with a bachelor's degree in agricultural sciences, biological sciences, natural sciences, or pest management which includes completing the baccalaureate and/or post-baccalaureate curricula specified in (b); or
- (2) Graduated from an accredited doctoral degree program in agricultural sciences, biological sciences, natural sciences, or pest management; or
- (3) Completed the required curricula specified in (b) and 24 months of technical experience working:
 - (A) for a licensed agricultural pest control adviser;
- (B) for a pest management specialist including, but not limited to, a farm adviser, certified commercial applicator, certified private applicator, or licensed pest control dealer;
 - (C) as a field sweeper, field checker or scout:
- (D) as a participant in field or laboratory research activities relating to pest control;
- (E) as a participant in agricultural pest control/management activities for a federal, state, or county entity;
- (F) as a qualified applicator licensee pursuant to Division 6, Chapter 8, commencing with Food and Agricultural Code section 12201, employed by a licensed pest control business except that no more than 12 months experience solely in the categories specified in subsections 6530(b) and (k) shall be used;
- (G) as a licensed structural pest control operator or field representative for a registered structural pest control company except that no more than 12 months experience shall be used
- (H) as a farm operator involved in agricultural pest control/management activities; or
- (I) as an assistant to, or work as, a certified crop adviser accredited by the American Society of Agronomy.
- (b) To satisfy the requirements of the college-level curricula specified in (a)(1) and (3), 42 semester or 63 quarter units in the following corecourse categories shall be completed with a 2.0 grade-point average or better:
- (1) Physical and Biological Sciences 12 semester or 18 quarter units in this category which includes introduction to inorganic chemistry, organic chemistry, biochemistry, plant biology or botany, general ecology, biology, genetics, plant physiology, and zoology.
- (2) Crop Health 9 semester or 13.5 quarter units in this category which includes courses in soils and irrigation, as well as introductory courses in vegetative management or weed science; plant pathology; entomology; plant nutrition or fertility; nematology; and vertebrate management. A current crop adviser certificate accredited by the American Society of Agronomy can count towards 3 semester or 4.5 quarter units.
- (A) For course titles such as Senior Project, Internship, Cooperative Work Experience, Independent Study, Dissertation, and Thesis, only a total of 3 semester or 4.5 quarter units will be allowed. The applicant shall include a course or project description, and a justification for the course category and principal area of study within the category to be accepted for credit.
- (3) Pest Management Systems and Methods 6 semester or 9 quarter units in this category, with at least one course emphasizing integrated pest management principles. This category includes applied courses in entomology; plant pathology; vegetation management or weed science; and other pest management disciplines, in addition to biological control and courses related to pesticides, pest control equipment systems, and the use of pesticides. Courses on alternative cropping systems, and sustainable or organic agricultural systems are acceptable.

- (A) One year of full-time related work experience listed in section 6550(a)(3)(A-I) may be used to fulfill part of this requirement, provided the work experience is not counted towards the 24 months of technical experience specified in (a)(3) or towards credit for production systems work experience in subsection (b)(4)(A). If approved by the Director, 3 semester or 4.5 quarter units will be granted. Documentation of job duties, employment records, a statement from an employer, or other proof of pest management systems and methods work experience shall be submitted to the Director.
- (B) For course titles such as Senior Project, Internship, Cooperative Work Experience, Independent Study, Dissertation, and Thesis, only a total of 3 semester or 4.5 quarter units will be allowed. The applicant shall include a course or project description, and a justification for the course category and principal area of study within the category to be accepted for credit.
- (4) Production Systems 6 semester or 9 quarter units in this category which includes horticulture; viticulture; forestry; agronomy; and crop, vegetable, fruit, or animal sciences; or other production systems.
- (A) One year of full-time related work experience listed in section 6550(a)(3)(H) may be used to fulfill part of this requirement provided the work experience is not counted towards the 24 months of technical experience specified in (a)(3) or towards credit for pest management systems and methods work experience in subsection (b)(3)(A). If approved by the Director, 3 semester or 4.5 quarter units will be granted. Documentation of job duties, employment records, a statement from an employer, or other proof of production systems work experience shall be submitted to the Director.
- (B) For course titles such Senior Project, Internship, Cooperative Work Experience, Independent Study, Dissertation, Thesis, and Enterprise Project, only a total of 3 semester or 4.5 quarter units will be allowed. The applicant shall include a course or project description, and a justification for the course category and principal area of study within the category to be accepted for credit.
- (5) Electives An additional 9 semester or 13.5 quarter units in any of the categories in (b)(2–4) above.
- (c) The applicant shall submit to the Director the completed Agricultural Pest Control Adviser Core Course and/or Work Experience Requirements for New License Applicants form (PR-PML-085, Rev. 11/07), hereby incorporated by reference, an official transcript verifying the courses completed, and if applicable, documentation for course titles required in subsections (b)(2)(A), (b)(3)(B), or (b)(4)(B), and the degrees granted to the applicant. In addition, an applicant qualifying pursuant to (a)(3) shall submit employment records, a statement from an employer, or other proof of technical experience to the Director.

NOTE: Authority cited: Sections 11456, 12005 and 12024, Food and Agricultural Code. Reference: Section 12024, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–3–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 36).
- 2. Amendment of section and NOTE filed 4-26-99; operative 5-26-99 (Register 99, No. 18).
- 3. Repealer of subsection (d) filed 1–20–2000; operative 2–19–2000 (Register 2000, No. 3).
- Change without regulatory effect amending section filed 12–5–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 49).
- Amendment filed 4–23–2008; operative 4–23–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 17).

§ 6551. Licensing for Public Agencies.

Except as specifically exempted in section 12001 of the Food and Agricultural Code, any person employed by any federal, state, county, or local public agency who provides to that federal, state, county, or local public agency recommendations on any agricultural use must possess a valid agricultural pest control adviser license issued by the Director. NOTE: Authority cited: Sections 11456 and 12005, Food and Agricultural Code. Reference: Sections 11501 and 12001, Food and Agricultural Code.

HISTORY

1. New section filed 10-7-2005; operative 11-6-2005 (Register 2005, No. 40).

§ 6552. Continued Education Requirements.

NOTE: Authority cited: Sections 407, 12005 and 12024, Food and Agricultural Code. Reference: Sections 11501 and 12024, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsections (b)–(d) filed 9–3–85; effective upon filing pursuant to Government Code section 11346.2 (d) (Register 85, No. 36).
- 2. Repealer filed 6-4-90; operative 7-4-90 (Register 90, No. 29).

§ 6554. Regional Accreditation Committee.

NOTE: Authority cited: Sections 407, 12005 and 12024, Food and Agricultural Code. Reference: Sections 11501 and 12024, Food and Agricultural Code.

HISTORY

1. Repealer filed 6-4-90; operative 7-4-90 (Register 90, No. 29).

§ 6556. Recommendations.

In addition to the requirements of Section 12003 of the Food and Agricultural Code, each recommendation shall include:

- (a) Total acreage or units to be treated;
- (b) Concentration and volume per acre or other units;
- (c) Worker re-entry interval, if one has been established; preharvest or preslaughter interval; and label restrictions on use or disposition of the treated commodity, by-products or treated area;
- (d) Criteria used for determining the need for the recommended treatment: and
- (e) Certification that alternatives and mitigation measures that would substantially lessen any significant adverse impact on the environment have been considered and, if feasible, adopted.

In addition, the recommendation shall designate the pest by accepted common name.

NOTE: Authority cited: Sections 11456, 12003 and 12005, Food and Agricultural Code. Reference: Section 12003, Food and Agricultural Code.

HISTORY

1. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6557. Advisories for Groundwater Protection.

NOTE: Authority cited: Sections 11456, 12976, 13145. 14005, 14006 and 14102, Food and Agricultural Code. Reference: Sections 11501, 13145 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2 (d) (Register 90, No. 16).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 3. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

Article 6. Pest Control Dealer Licenses

§ 6560. Supervision.

- (a) Each licensed pesticide dealer shall have and maintain at the principal office and at each branch location a designated agent to actively supervise all operations conducted by the location.
- (b) The designated agent shall be a person who has passed the laws and regulations examination; or who holds a valid agricultural pest control adviser license, pest control aircraft pilot certificate, or is a qualified applicator licensee.

NOTE: Authority cited: Sections 11456 and 12111, Food and Agricultural Code. Reference: Sections 11501 and 12103, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–14–85 as an emergency; effective upon filing (Register 85, No. 4). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–14–85.
- 2. Certificate of Compliance transmitted to OAL 5-14-85 and filed 6-17-85 (Register 85, No. 25).
- 3. Amendment of article 6 heading filed 10–20–2000; operative 11–19–2000 (Register 2000, No. 42).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Page 412

§ 6562. Dealer Records and Sales Reporting.

- (a) Each licensed pesticide dealer shall prepare and maintain records of all pesticides sold or delivered, except for pesticides labeled only for home use. These records shall include the following:
 - (1) The purchaser's name and address;
 - (2) The product purchased, and the amount;
 - (3) The date of purchase;
- (4) The operator identification number(s) specified in Section 6622 on the invoice, or a statement on the invoice indicating that the purchaser was not required to obtain an operator identification number pursuant to Section 6622:
- (5) A copy of an agricultural pest control adviser's written recommendation, or the following statement (or a substantially similar statement) on the invoice or delivery slip supplied to the customer:

No recommendation has been made by, or provided to, the seller concerning the use of the pesticide covered by this invoice; and

- (6) The location where the pesticide was delivered, including the name of the person who, or business which, received the shipment, if the dealer delivered the pesticide.
- (b) The records shall be maintained at the sales office. These records shall be produced for inspection, by purchaser name, upon request by the director or agricultural commissioner.

NOTE: Authority cited: Sections 11456, 12111, 12976 and 13145, Food and Agricultural Code. Reference: Sections 11501, 12110 and 13145, Food and Agricultural Code

HISTORY

- 1. Amendment filed 5–24–85; effective upon filing pursuant to Government Code section 11346.2(d) (Register 85, No. 22).
- 2. Amendment filed 12-22-89; operative 1-1-90 (Register 90, No. 1).
- 3. Amendment of section heading, subsections (a), (a)(2), (a)(4), (b), NOTE and new subsection (c) filed 4–3–92; operative 5–4–92 (Register 92, No. 18).
- 4. Repealer of subsection (c) filed 9–5–95; operative 10–5–95 (Register 95, No. 36)
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6564. Appropriate Products.

All persons engaged in business as licensed pesticide dealers shall:

- (a) Sell or deliver a pesticide for which a recommendation has been provided to him or written by any person employed by him only when the pesticide labeling corresponds to the recommendation; and
- (b) Not knowingly sell or deliver a pesticide for a use not shown in the labeling, or when any condition of use shown in the labeling cannot be complied with.

NOTE: Authority cited: Sections 11456 and 12111, Food and Agricultural Code. Reference: Sections 12971 and 12973, Food and Agricultural Code.

[The next page is 413.]

HISTORY

 Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6566. Supplemental Labeling.

When a recommended pesticide usage is included only in registered supplemental labeling, both the written recommendation, if any, and such registered supplemental labeling shall be delivered by the dealer to the applicator in sufficient time to allow him to prepare properly for the application.

NOTE: Authority cited: Sections 11456 and 12111, Food and Agricultural Code. Reference: Sections 11501 and 12973, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6568. Dealer Responsibilities.

- (a) Each licensed pest control dealer that sells a restricted material which requires a permit for its use or possession shall, before sale or delivery, obtain a copy of the permit.
- (b) A restricted material specified in Section 6400(a) (federally restricted use) or in Section 6400(d) (potential to pollute ground water) that does not require a permit for possession or use shall be sold or delivered only to a certified applicator. The dealer shall, before sale or delivery, obtain from the purchaser a copy of his or her qualified applicator license or certificate, private applicator certificate, or a signed statement in substantially the following form:

I am a ce	ertified applicator authorized b	y the scope of my
		license/certification
	(license/certificate type)	
No	to use the restricted ma	nterial(s) I am purchasing. My
certificat	e/license is valid until	
		(Date)
	operator of the property that l	am employed by
	(Certified Applicator)	(Date)

- (c) Prior to the sale or delivery of pesticides listed in section 6622 to the operator of the property (or the operator's authorized representative) the dealer shall obtain from the purchaser a copy of the restricted materials permit showing all operator identification numbers, if the purchaser has such a permit; or a copy of the form issued to an operator of the property pursuant to section 6622.
- (d) The dealer shall send a list of the operator identification numbers with corresponding names of persons purchasing pesticides during the quarter, within 10 days following the end of each quarter of the calendar year, to each of the commissioners who issued the numbers. The dealer is not required to send the list to the commissioner of the county in which the dealer is located.
- (e) The dealer shall retain for two years a copy of each form specified in section 6622, permit, or signed statement that pesticide purchaser provided to the dealer.

NOTE: Authority cited: Sections 11456 and 14005, Food and Agricultural Code. Reference: Sections 11501, 14006, 14010 and 14035, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former section 2461 to section 6568 filed 8–13–85 (Register 85, No. 33).
- Amendment filed 1–4–89; operative 1–4–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).
- 3. Amendment filed 12-22-89; operative 1-1-90 (Register 90, No. 1).
- 4. Editorial correction of printing errors in form (Register 91, No. 33).
- 5. Change without regulatory effect amending subsection (b) and NoTE filed 8–27–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 35).
- Amendment of section and Note filed 10–20–2000; operative 11–19–2000 (Register 2000, No. 42).

§ 6570. Groundwater Protection Material Requirements.

NOTE: Authority cited: Sections 11456, 12976 and 13145, Food and Agricultural Code. Reference: Sections 11501 and 13145, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).
- 2. Amendment of subsection (a) and Note and repealer of subsection (a)(2) filed 12–12–91; operative 1–13–92 (Register 92, No. 13).
- 3. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- 4. Repealer filed 4–27–2004; operative 5–27–2004 (Register 2004, No. 18).

§ 6572. Sales Reporting.

NOTE: Authority cited: Sections 407, 12976 and 13145, Food and Agricultural Code. Reference: Section 13145, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).
- 2. Repealer filed 4-3-92; operative 5-4-92 (Register 92, No. 18).

§ 6574. Antifouling Paints or Coatings Containing Tributyltin—Dealer Requirements.

- (a) Antifouling paints or coatings containing tributyltin shall be sold only for the following purposes:
 - (1) For application to aluminum vessel hulls;
 - (2) For application to vessel hulls 82 feet or more in length; or
 - (3) For application to outboard motors or lower drive units.
- (b) Prior to sale, the dealer shall secure a copy of the vessel registration to verify the use requirements of (a) (1) or (2). If no vessel registration exists or the paint or coating will be applied to an outboard motor or lower drive unit, the dealer shall secure a sworn statement to verify the use requirements of (a) (1), (2), or (3). The sworn statement shall be made in substantially the following form:
- I, (name of purchaser), declare under penalty of perjury that the antifouling paint or coating containing tributyltin that I am purchasing shall be applied only to an aluminum vessel hull, to a vessel hull 82 feet or more in length, or to an outboard motor or lower drive unit. The serial number of the vessel is (number).

(Signature of Purchaser)	(Date)

- (c) The dealer shall prepare and maintain the following records for all sales of antifouling paints that contain tributyltin:
 - (1) Name and address of vessel owner;
- (2) Name and certificate or license number of the certified commercial applicator and location of vessel where application is to be made;
 - (3) Date of sale;
 - (4) Quantity sold; and
- (5) A copy of the vessel registration or sworn statement verifying the vessel length, vessel hull composition requirements, or intended use on an outboard motor or lower drive unit and registration number. If no registration number exists, the vessel serial number shall be included.
- (d) The dealer shall maintain the records specified in (c) in a separate log of sales for two years; and the records shall be readily accessible to the director and the commissioner upon request.

NOTE: Authority cited: Sections 12111 and 14005, Food and Agricultural Code. Reference: Sections 11501 and 14006, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–31–87 as an emergency; operative 1–1–88 (Register 88, No. 3) A certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 5–2–88.
- Certificate of Compliance including amendment and new subsection (b) transmitted to OAL 4-5-88 and filed 5-4-88 (Register 88, No. 19).
- 3. Amendment of subsections (a)–(a)(3), (b), (c) and (c)(5) and amendment of NOTE filed 1–5–93; operative 1–5–93 (Register 93, No. 2).

§ 6576. Sales Limitation of Clopyralid.

Prior to sale of a pesticide containing the active ingredient clopyralid for which use restrictions have been established in section 6950, the licensed pest control dealer shall obtain and retain for two years a signed statement from a licensed or certified qualified applicator in substantially the following form:

I, <u>(print name of purchaser)</u> , certify that my employees or I will not apply any product containing clopyralid to a residential lawn, and will only apply clopyralid to sites where I can assure the collected grass clippings will remain on the property.
Name of Product:EPA Reg. No.:
Under penalty of perjury, the foregoing statement is true and my em-

Under penalty of perjury, the foregoing statement is true and my employees or I will not apply any pesticide containing the active ingredient clopyralid for lawn and turf uses as defined in Food and Agricultural Code section 13190(e) except in accordance with the listed applicator responsibility requirements.

Signature of Qualified Applicator License or Certificate No.

Category Expiration Date Date of Purchase

NOTE: Authority cited: Sections 11456, 12111, 12781, 12976 and 14102, Food and Agricultural Code. Reference: Sections 12824, 13191 and 13192, Food and Agricultural Code.

HISTORY

1. New section filed 12-28-2005; operative 1-27-2006 (Register 2005, No. 52).

Article 7. Private Applicators

§ 6580. Certificate Issuance.

- (a) An application for a new private applicator certificate shall be made on the Private Applicator Certificate Application form PR-PML-045 (Rev. 12/04), hereby incorporated by reference, and submitted to the county agricultural commissioner. No application fee is required.
- (b) All private applicator certificate applicants shall be required to take and pass the private applicator examination before being issued a new certificate.
- (c) Notwithstanding section 6500, the commissioner, or Director in a county where there is no county agricultural commissioner, shall issue a private applicator certificate for a period of up to three years in accordance with Food and Agricultural Code section 14095.

NOTE: Authority cited: Sections 11456 and 11502, Food and Agricultural Code. Reference: Sections 14091, 14092 and 14095, Food and Agricultural Code.

HISTORY

1. New article 7 (sections 6580–6584) and section filed 5–23–2006; operative 6–22–2006 (Register 2006, No. 21).

§ 6582. Certificate Renewal.

- (a) A certified private applicator who elects to renew his/her certificate shall:
- (1) Submit a Private Applicator Certificate Application form PR-PML-045 (Rev. 12/04), hereby incorporated by reference, to the county agricultural commissioner no sooner than 120 days prior to, and no later than 90 days after, the expiration date; and
- (2) Complete continuing education requirements as specified in section 6584 during the time the certificate is valid, or retake and pass the private applicator certificate examination.
- (b) A certified private applicator who has not renewed his/her private applicator certificate within the timeframe specified in (a)(1) shall be required to take and pass the private applicator examination before being issued a certificate.

NOTE: Authority cited: Sections 11456 and 11502, Food and Agricultural Code. Reference: Sections 14093 and 14096, Food and Agricultural Code.

HISTORY

1. New section filed 5-23-2006; operative 6-22-2006 (Register 2006, No. 21).

§ 6584. Continuing Education Requirements.

(a) Private applicator certificate holders who elect to renew their certification by obtaining continuing education shall have completed the following hours pertaining to the topic areas as described in section 6512(e)(1):

- (1) Each private applicator whose certificate has been valid for less than 12 months at the time of renewal is exempt from continuing education requirements applicable to the certificate.
- (2) Each private applicator whose certificate has been valid for 12 months to 24 months at the time of renewal shall have completed a minimum of four hours, including a minimum of two hours on pesticide laws and regulations.
- (3) Each private applicator whose certificate has been valid for more than 24 months and up to 36 months at the time of renewal shall have completed a minimum of six hours, including a minimum of two hours in pesticide laws and regulations.
- (b) The continuing education shall have been obtained in a course or program approved pursuant to section 6512.

NOTE: Authority cited: Sections 11456, 11502 and 11502.5, Food and Agricultural Code. Reference: Section 14096, Food and Agricultural Code.

HISTORY

1. New section filed 5-23-2006; operative 6-22-2006 (Register 2006, No. 21).

Subchapter 2. Work Requirements

Article 1. Pest Control Operations Generally

§ 6600. General Standards of Care.

Each person performing pest control shall:

- (a) Use only pest control equipment which is in good repair and safe to operate.
 - (b) Perform all pest control in a careful and effective manner.
- (c) Use only methods and equipment suitable to insure proper application of pesticides.
- (d) Perform all pest control under climatic conditions suitable to insure proper application of pesticides.
- (e) Exercise reasonable precautions to avoid contamination of the environment.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code.

HISTORY

- 1. New Subchapter 3 (Group 2, Articles 1–3, Sections 6600–6656, not consecutive) filed 1–3–83; effective thirtieth day thereafter (Register 83, No. 2).
- 2. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6601. General Application of Standards.

- (a) Whenever pesticide product labeling requires the use of personal protective equipment or specifies other restrictions or procedures be followed, the application of that labeling requirement to an owner or operator of the property to be treated, their families, and others, shall be consistent with any applicable standards for employees in Subchapter 3, commencing with Section 6700.
- (b) It is not the intent of these regulations to require separate or duplicate equipment or facilities. Equipment and facilities provided for compliance with the requirements of other agencies may also be used for complying with these regulations provided the equipment and facilities meet the requirements of these regulations.

NOTE: Authority cited: Sections 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12973 and 12980, Food and Agricultural Code.

HISTORY

1. New section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6602. Availability of Labeling.

A copy of the registered labeling that allows the manner in which the pesticide is being used shall be available at each use site.

§ 6604. Accurate Measurement.

Concentrate pesticides shall be weighed or measured accurately using devices which are calibrated to the smallest unit in which the pesticide is being weighed or measured.

NOTE: Authority cited: Sections 11456 and 12976, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6606. Uniform Mixture.

A uniform mixture shall be maintained in both application and service rigs.

NOTE: Authority cited: Sections 11456 and 12976, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6608. Equipment Cleaning.

Pest control equipment shall be thoroughly cleaned when necessary to prevent illness or damage to persons, plants or animals from residues of pesticides previously used in the equipment.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6609. Wellhead Protection.

- (a) Except as provided in subsection (b), the following activities shall be prohibited within 100 feet of a well (including domestic, municipal, agricultural, dry or drainage, monitoring, or abandoned wells):
 - (1) mixing, loading, and storage of pesticides.
 - (2) rinsing of spray equipment or pesticide containers.
- (3) maintenance of spray equipment that could result in spillage of pesticide residues on the soil.
 - (4) application of preemergent herbicides.
 - (b) Wells shall not be subject to the requirements in (a) if they are:
- (1) sited so that runoff water from irrigation or rainfall does not move from the perimeter of the wellhead toward the wellhead and contact or collect around any part of the wellhead including the concrete pad or foundation; or
- (2) protected by a berm constructed of any material sufficient to prevent movement of surface runoff water from the perimeter of the wellhead to the wellhead.
- (c) Application of preemergent herbicides shall be prohibited between the berm and the wellhead.

NOTE: Authority cited: Sections 11456, 12976 and 14102, Food and Agricultural Code. Reference: Sections 11501 and 14102, Food and Agricultural Code.

HISTORY

1. New section filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6610. Backflow Prevention.

Each service rig and piece of application equipment that handles pesticides and draws water from an outside source shall be equipped with an air–gap separation, reduced pressure principle backflow prevention device or double check valve assembly. Backflow protection must be acceptable to both the water purveyor and the local health department.

NOTE: Authority cited: Sections 11456 and 12976, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code.

HISTORY

1. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6612. Age.

No person shall permit a minor under 18 years of age to mix or load a pesticide which, in any use situation, use of any of the following is required by labeling or regulation:

- (a) air supplied respiratory protection;
- (b) closed systems; or

(c) full body chemical resistant protective clothing.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of former Section 6722 to Section 6612 filed 9–26–88; operative 10–26–88 (Register 88, No. 41). For prior history, see Registers 86, No. 34 and 86, No. 31.
- 2. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6614. Protection of Persons, Animals, and Property.

- (a) An applicator prior to and while applying a pesticide shall evaluate the equipment to be used, meteorological conditions, the property to be treated and surrounding properties to determine the likelihood of harm or damage.
- (b) Notwithstanding that substantial drift will be prevented, no pesticide application shall be made or continued when:
- (1) There is a reasonable possibility of contamination of the bodies or clothing of persons not involved in the application process;
- (2) There is a reasonable possibility of damage to nontarget crops, animals or other public or private property; or
- (3) There is a reasonable possibility of contamination of nontarget public or private property, including the creation of a health hazard, preventing normal use of such property. In determining a health hazard, the amount and toxicity of the pesticide, the type and uses of the property and related factors shall be considered.

NOTE: Authority cited: Sections 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501 and 11791, Food and Agricultural Code.

HISTORY

Change without regulatory effect adding new subsection designators (a)–(b), renumbering, and amendment of new subsection (b)(1) and NoTE filed 6–22–95 pursuant to section 100, title 1, California Code of Regulations (Register 95, No. 25)

§ 6616. Consent to Apply.

No person shall directly discharge a pesticide onto a property without the consent of the owner or operator of the property.

NOTE: Authority cited: Sections 11456 and 12976, Food and Agricultural Code. Reference: Section 11501, Food and Agricultural Code.

HISTORY

1. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6618. Notice of Applications.

- (a) Each person performing pest control shall give notice to the operator of the property to be treated before any pesticide is applied.
- (1) The notice shall be in a manner the person can understand and include:
 - (A) The date of the scheduled application;
- (B) The identity of the pesticide to be applied by brand or common chemical name; and
- (C) Precautions to be observed as printed on the pesticide product labeling or included in applicable laws or regulations.
- (2) If the scheduled application is for the commercial or research production of an agricultural plant commodity the notice shall also include:
 - (A) The time of the scheduled application;
 - (B) The location and description of the area to be treated;
 - (C) The applicable restricted entry interval;
- (D) The product name, EPA registration number, and active ingredient; and
- (E) If the pesticide product labeling requires the posting of treated fields.
- (b) The operator of property for the commercial or research production of an agricultural plant commodity shall assure that notice is given to persons, as specified below, except for the persons who applied or supervised the application for which the notice is intended. For the purposes of this subsection, persons includes employees of the operator of the property and any contractor hired by the operator of the property who may walk within 1/4 mile of the treated field.
 - (1) The notice shall be given:

Page 415

- (A) Prior to the application, to persons who are in the field or likely to enter the field during the application; and
- (B) Before the scheduled entry, to persons who may enter the field during the restricted entry interval.
- (2) The notice shall be given to any licensed pest control business or licensed labor contractor hired by the operator of the property that may have employees on or within 1/4 mile of the field during the application or the restricted entry interval. The pest control business or labor contractor receiving notice shall give notice to his or her employees. In lieu of giving notice to the licensed pest control business or the licensed labor contractor, the operator of the property may give notice directly to the employees of a labor contractor or pest control business to meet the requirements of this subsection (b).
- (3) The notice shall be in a manner the person can understand and include:
 - (A) The location and description of the treated area;
 - (B) The time during which entry is restricted; and
- (C) Instructions not to enter the treated field, except as provided in section 6770, until the restricted entry interval has expired.
- (4) The notice specified in this subsection (b) is not required when a field is posted as specified in section 6776 unless the pesticide product labeling requires both oral notification to fieldworkers and the posting of treated fields.
- (c) The operator of property for purposes other than the commercial or research production of an agricultural plant commodity, shall assure that notice is given to all persons who are on the treated property, or likely to enter during the application or the period of time that any restrictions on entry are in effect, except for the persons who made or supervised the application for which the notice is intended.
- (1) The notice shall be in a manner the person can understand and include:
 - (A) the date of the application;
- (B) The identity of the pesticide by brand or common chemical name; and
- (C) Precautions to be observed as printed on the pesticide product labeling or included in applicable laws or regulations.
- (2) Compliance by licensed Structural Pest Control Operators with the notice requirements of section 8538 of the Business and Professions Code meets the requirements of this section.
- (3) Compliance by public agencies with the notice or barrier requirements of section 12978 of the Food and Agricultural Code meets the notice requirements of this section.

NOTE: Authority cited: Sections 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12980 and 12981, Food and Agricultural Code; and Section 8538, Business and Professions Code.

HISTORY

- 1. Amendment filed 12-6-91; operative 1-1-92 (Register 92, No. 13).
- 2. Repealer and new section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6619. Pesticide Application Completion Notice.

- (a) In addition to the notice required pursuant to Section 6618, an agricultural pest control business applying pesticides for the production of an agricultural commodity shall give notice to the operator of the property treated (or the operator's designated employee), within 24 hours of completion of the pesticide application. The operator's designated employee must, at minimum, have the authority and ability to reschedule or stop activities involving field workers performing cultural practices (e.g., irrigating, thinning, tree–limb propping, weeding, harvesting). This notice shall include the following information:
- (1) The location of the property, including the site identification number, and acreage treated;
 - (2) The pesticide(s) applied;
 - (3) The date and hour the application was completed; and
- (4) The applicable reentry and pre-harvest intervals, unless a copy of a written recommendation made by a licensed agricultural pest control

- adviser, properly completed, was given to the operator of the property treated.
- (b) If the operator of the property (or the operator's designated employee) will not be available to receive the notice within the 24-hour period, the operator shall identify in writing, the method by which the agricultural pest control business may provide notification. The method may be, but is not limited to, any of the following:
- (1) Post or leave the notice in a designated location on the operator's property;
 - (2) Record the notification on a phone recorder; or
 - (3) Send the notice over a facsimile machine.
- (c) The operator of the property treated shall maintain a record of the application completion notice(s) he or she receives by site, and a copy of the written notification method provided to each agricultural pest control business, if one is required.
- (d) The agricultural pest control business shall retain a copy of the written notification method received from the operator of the property, if the business received one. The business shall also maintain a written record which documents the following:
 - (1) The name of the operator of the property treated;
- (2) The location of the property, including the site identification number:
 - (3) The date and time the notice was given; and
- (4) The method of notification, including the name of the person notified, if a person was notified.
- (e) The records and written notification method required pursuant to this section shall be retained for two years and made promptly available to the director or commissioner upon request.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501 and 12981, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–22–89; operative 1–1–90 (Register 90, No. 1).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6620. Vector Control Exemption.

- (a) Sections 6616 (Consent to Apply) and 6618 (Notice) shall not apply to a public agency or its contractor operating under a cooperative agreement with the Department of Health Services pursuant to Section 2426 of the Health and Safety
- (b) Section 6614(b)(1) (Protection of Persons, Animals and Property) shall not apply to persons or agencies specified in this section when the pesticide used is registered for use in residential areas for purposes of vector control and is used in accordance with that registered labeling.
- (c) These exemptions are not intended to affect liability for damage as a result of an application made pursuant to this section.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501 ad 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (b) filed 5–24–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 22).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending subsection (b) filed 3-19-2008 pursuant to section 100, title 1, California Code of Regulations (Register 2008, No. 12).

§ 6622. Operator Identification Numbers.

- (a) A person performing pest control for hire is exempt from the requirements of this section.
- (b) This subsection applies to the production of an agricultural commodity. Prior to the purchase and use of pesticide(s) for the production of an agricultural commodity, the operator of the property (or the operator's authorized representative) shall obtain an operator identification number from the commissioner of each county where pest control work will be performed. The operator shall provide each pest control business applying pesticides to such property with his or her operator identification number.
- (c) This subsection applies to the pesticides listed below, when they are not used for the production of an agricultural commodity (e.g., uses

on cemeteries, golf courses, parks, right-of-way, post-harvest agricultural commodities, and certain nonagricultural sites). Prior to the purchase and use of pesticides listed below, each operator of the property (or the operator's authorized representative), shall obtain an operator identification number from the commissioner of each county in which the operator intends to perform pest control. The operator of the property is not required to obtain an operator identification number when a person performing pest control for hire purchases and applies these pesticides.

- (1) Any pesticide for agricultural use, as defined in Food and Agricultural Code section 11408, excluding those for use only on livestock, as defined in Food and Agricultural Code section 18663;
 - (2) Any pesticide listed in section 6400;
- (3) Any pesticide for industrial use as a post–harvest commodity treatment; and
- (4) Any pesticide listed in section 6800(b) for any outdoor institutional or outdoor industrial use.
 - (d) This subsection applies to both subsection (b) and (c).
- (1) Each operator of the property to be treated who is required to obtain a number shall provide the commissioner with a list of the counties in which pest control will be performed and all valid operator identification number(s) issued by other commissioners. The number(s) provided by the operator of the property shall be recorded by the commissioner on the operator's restricted materials permit or on a form approved by the director.
- (2) The operator of the property to be treated shall be issued an operator identification number from the commissioner of each county in which the operator intends to perform pest control. The number shall be recorded on a restricted materials permit, if the operator of the property has such a permit, or issued on a form approved by the director, and shall be valid for a specified period not to exceed 36 months.
- (3) The requirements of this section do not exempt an operator of the property to be treated from obtaining a restricted materials permit(s) or a qualified applicator certificate.

NOTE: Authority cited: Sections 12976, 13145 and 14005, Food and Agricultural Code. Reference: Sections 11501, 14006 and 14011.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-22-89; operative 1-1-90 (Register 90, No. 1).
- Change without regulatory effect amending subsection (c)(2) and NoTE filed 8-27-96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 35).
- 3. Editorial correction of subsection (c) (Register 2002, No. 22).
- Amendment of subsection (d)(2) and amendment of Note filed 12-3-2002; operative 1-2-2003 (Register 2002, No. 49).

§ 6623. Site Identification Numbers.

- (a) Prior to the use of pesticide(s) for the production of an agricultural commodity, the operator of the property shall obtain site identification number(s) from the commissioner for each site where pest control work will be performed. The site identification number(s) shall be valid for the same, concurrent, period of time as the operator identification number.
- (b) The site identification number(s) shall be recorded by the commissioner on a restricted materials permit, if the operator of the property has such a permit, or on a form approved by the director. The information on the permit or form shall include:
 - (1) The name and address of the operator of the property;
 - (2) The operator identification number;
- (3) The location, description, or map of the site(s) where the pest control will be performed;
- (4) A site identification number for each site where the pest control will be performed; and
 - (5) The date of issuance of the site identification number(s).
- (c) The operator of the property shall retain a copy of each restricted material permit or form for two years and make them promptly available to the director or commissioner upon request.

NOTE: Authority cited: Sections 11456, 12976, 13145 and 14005, Food and Agricultural Code. Reference: Sections 12981, 14006 and 14011.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-22-89; operative 1-1-90 (Register 90, No. 1).
- 2. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6624. Pesticide Use Records.

- (a) The following persons shall maintain records of pesticide use:
- (1) Any person who uses a pesticide for an agricultural use as defined in Food and Agricultural Code section 11408, other than use on livestock as defined in Food and Agricultural Code section 18663;
 - (2) Any person who uses a pesticide listed in section 6400;
 - (3) Any person engaged for hire in the business of pest control;
- (4) Any person who uses a pesticide for industrial post–harvest commodity treatment; and
- (5) Any person who uses a pesticide listed in section 6800(b) for any outdoor institution or outdoor industrial use.
- (b) The records shall include the following information for each pest control operation:
 - (1) Date of application;
 - (2) Name of the operator of the property treated;
 - (3) Location of property treated;
 - (4) Crop commodity, or site treated;
 - (5) Total acreage or units treated at the site; and
- (6) Pesticide, including the U.S. Environmental Protection Agency (U.S. EPA) or State registration number which is on the pesticide label, and amount used.
- (c) In addition to the information required in subsection (b), the operator of the property which is producing an agricultural commodity, and an agricultural pest control business applying pesticides to such property, shall include in the records the following information for each pest control operation:
- (1) Location of the property treated, by county, section, township, range, base and meridian;
 - (2) Hour the treatment was completed;
- (3) The operator identification number issued to the operator of the property treated;
- (4) The site identification number issued to the operator of the property treated:
 - (5) Total acreage (planted) or units at the site; and
- (6) Name or identity of the person(s) who made and supervised the application, if the pesticide application was made by an agricultural pest control business.
- (d) The operator of the property which is producing an agricultural commodity shall maintain records of pesticides applied by an agricultural pest control business to such property, by site.
- (e) In addition to the information required in (b), effective January 1, 2002, persons engaged for hire in the business of pest control at a school site [defined in Education Code section 17609(e)] shall include in the records the following information for each pest control operation:
 - (1) Time application was completed;
 - (2) Name and address of the school site; and
- (3) Application location at the school site. For purposes of this subsection, location includes, but is not limited to, classrooms, playgrounds, cafeteria, vehicles, and athletic fields.
- (f) In addition to the information required in subsections (b) and (c), persons who use methyl bromide, 1,3–Dichloropropene, chloropicrin, metam–sodium, N–methyl dithiocarbamate (metam–potassium), dazomet, or sodium tetrathiocarbonate field fumigants within the Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, or Ventura ozone nonattainment areas shall include in the records a description of the method of application pursuant to sections 6447.3, 6448.1, 6449.1, 6450.1, 6450.2, 6451.1, or 6452.
- (g) The records required pursuant to this section shall be retained for two years and made promptly available to the director or commissioner upon request.

NOTE: Authority cited: Sections 12976, 13145, 13188 and 14005, Food and Agricultural Code. Reference: Sections 11501, 11708, 11733, 13186, 14006 and 14011.5, Food and Agricultural Code.

§ 6625

HISTORY

- 1. New section filed 12-22-89; operative 1-1-90 (Register 90, No. 1).
- Change without regulatory effect amending subsection (a)(2) and Note filed 8-27-96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 35).
- Amendment of subsections (b)(6), (c) and (c)(4), new subsections (e)–(e)(3), subsection relettering and amendment of Note filed 10–11–2001; operative 11–10–2001 (Register 2001, No. 41).
- New subsection (f) and subsection relettering filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6625. Pesticide Use Report for School Sites.

- (a) In addition to the reporting requirements of section 6627, persons engaged for hire in the business of pest control at a school site and required to maintain pesticide use records pursuant to section 6624 shall report the use of pesticides to the Director. The report shall be submitted, at least annually, by the 30th day following the end of the calendar year.
- (b) The report shall be on a Department form, School Site Pesticide Use Reporting (PR–ENF–117 Rev. 1/07), hereby incorporated by reference, or in a format approved by the Director. The report shall include the following:
- (1) The name and address of the person who, or business/organization which, applied the pesticide(s);
 - (2) County where the pest control was performed;
 - (3) Date and time of pesticide use;
- (4) Name and address of school site or school site identification number:
 - (5) Location of application;
- (6) Pesticide, including the U.S. Environmental Protection Agency or State registration number which is on the pesticide label, and the amount used.

NOTE: Authority cited: Sections 11456, 11502, 12976, 13145, 13188 and 14005, Food and Agricultural Code. Reference: Sections 11501, 11708, 11733, 13186, 14006 and 14011.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–11–2001; operative 11–10–2001 (Register 2001, No. 41).
- Change without regulatory effect amending subsections (a) and (b) filed 1-5-2007 pursuant to section 100, title 1. California Code of Regulations (Register 2007, No. 1).

§ 6626. Pesticide Use Reports for Production Agriculture.

- (a) The operator of the property which is producing an agricultural commodity shall report the use of pesticides applied to the crop, commodity, or site to the commissioner of the county in which the pest control was performed. This report shall be hand—delivered or mailed, by the 10th day of the month following the month in which the work was performed. This report is not required if the pesticide use is reported to the commissioner by an agricultural pest control business as specified in subsection (b), however, the operator of the property treated shall retain a copy of the business' report by site for two years.
- (b) An agricultural pest control business shall report the use of pesticides applied by it for the production of an agricultural commodity to the commissioner of the county in which the pest control was performed, by hand-delivery or by mail, within seven days of completion of the pesticide application. A copy of the report shall be sent by the business to the operator of the property where the pest control was done, within 30 days of completion of the pesticide application.
- (c) Except as provided in (d), each report of pesticide use pursuant to this section shall be on a Department form or in a format approved by the director. Acceptable Department forms include form 38–017 for an operator of the property to report pursuant to subsection (a), and 39–025 for an agricultural pest control business to report pursuant to subsection (b). The information to be reported shall include the information specified in section 6624 and the name and address of the agricultural pest control business which made the application, if such a business made the application.
- (d) A copy of the use report required by (a) or (b) for the application of a field soil fumigant in the Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, and Ventura ozone nonattainment areas

- must be submitted to the Department with the field fumigation method as specified in section 6624(f) appended to the report. The report must be delivered to the Department according to the date specified in (a) or (b), whichever is applicable. This subsection shall remain in effect only until December 31, 2008.
- (e) Effective January 1, 2009, a use report required by (a) or (b) for the application of a field soil fumigants in the Sacramento Metro, San Joaquin Valley, South Coast. Southeast Desert, and Ventura ozone nonattainment areas shall include the information specified in 6624(f) in addition to that required by this section.
 - (f) If the report is mailed, the postmark shall be the date of delivery.
- (g) If the county in which work was performed has no commissioner, the report shall be made to the director.

NOTE: Authority cited: Sections 11456, 11502, 12976, 13145 and 14005, Food and Agricultural Code. Reference: Sections 11501, 11708, 11733, 12981, 14006 and 14011.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–22–89; operative 1–1–90 (Register 90, No. 1).
- 2. Editorial correction of printing error in subsection (a) (Register 91, No. 33).
- 3. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Amendment of subsection (c), new subsections (d) and (e) and subsection relettering filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

§ 6627. Monthly Summary Pesticide Use Reports.

- (a) Except as provided in Section 6626, persons required to maintain pesticide use records pursuant to Section 6624 shall report a summary of the monthly use of pesticides to the commissioner of the county in which the work was performed. The report shall be provided to the commissioner by the 10th day of the month following the month in which the work was performed. If the report is mailed, the postmark shall be the date of delivery.
- (b) The report shall be on a Department form as specified in Section 6627.1 or in a format approved by the director. The report shall include the following:
- (1) The name and address of the person who or business/organization which applied the pesticide(s);
 - (2) County where the pest control was performed;
 - (3) Month and year of pesticide use;
- (4) Crop, commodity or site treated, except when using a designated use code, as specified on the Monthly Summary Pesticide Use Report form:
- (5) Pesticide, including Environmental Protection Agency or State registration number which is on the pesticide label, and the amount used;
- (6) Number of applications made with each pesticide and the total number of applications made during the month; and
- (7) Total acres or units treated with each pesticide, except when using a designated use code, as specified on Summary Pesticide Use Report form
- (c) If the county in which the work was performed has no commissioner, the report shall be made to the director.

NOTE: Authority cited: Sections 11456, 11502, 12976, 13145 and 14005, Food and Agricultural Code. Reference: Sections 11501, 11708, 11733, 12981, 14006 and 14011.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–22–89; operative 1–1–90 (Register 90, No. 1).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6627.1. Monthly Summary Pesticide Use Report Form.

HISTORY

- 1. New section filed 12-22-89; operative 1-1-90 (Register 90, No. 1).,
- 2. Repealer filed 8–1–96; operative 8–31–96 (Register 96, No. 31).

§ 6628. Negative Pesticide Use Reports.

(a) When during any month a licensed agricultural pest control business performs no pest control work in a county where the business is registered with the commissioner pursuant to Food and Agricultural Code Section 11732, it shall submit a report stating this fact to the commissioner, or to the director in any county where there is no commissioner, by the 10th day of the following month.

- (b) When during any month a licensed structural pest control operator performs no pest control work in a county in which he provided notice of business operation to the commissioner pursuant to Section 15204 of the Food and Agricultural Code, he shall submit a report stating this fact to the commissioner, or to the director in any county where there is no commissioner, by the 10th day of the following month.
- (c) If the report is mailed, the postmark shall be the date of delivery. NOTE: Authority cited: Sections 11456, 11502, 12976, 13145 and 14005, Food and Agricultural Code. Reference: Sections 11501, 11708, 11733, 12981, 14006 and 14011.5, Food and Agricultural Code.

- 1. New section filed 12–22–89; operative 1–1–90 (Register 90, No. 1).
- 2. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 2. Pest Control Business **Operations**

§ 6630. Equipment Identification.

Each person engaged for hire in the business of pest control shall keep each ground rig, service rig, and similar equipment used for mixing or applying pesticides conspicuously and legibly marked with either the business' name, or with "Licensed Pest Control Operator," "Fumigation Division," "Licensed Fumigator" or substantially similar wording and the pest control operator license number of the person or firm. The markings shall be large enough to be readable at a distance of 25 feet.

 2. Repealer filed 12–22–89; operative 1–1–90 (Register 90, No. 1).
- 3. Editorial correction deleting text previously repealed (Register 91, No. 33).

Article 3. Protection of Bees

§ 6650. Pesticides Toxic to Bees.

(a) Pesticides toxic to bees are those that include the words "toxic to bees" on the labeling of the pesticide, regardless of modifying words on the label that state "highly" or "moderately."

- (b) Bees are considered to be inactive from one hour after sunset to two hours before sunrise or when the temperature is below 55 degrees Fahrenheit. The sunset and sunrise times will be those indicated in the local newspaper.
- (c) Residual toxicity (RT) time is that period of time after completing a pesticide application until there is minimal toxic effect to bees. The RT time is specified on product labeling and is based upon Residual Toxicity₂₅ (RT₂₅) studies. RT₂₅ studies determine 25 percent bee mortality based on the test bee population exposed to the formulated pesticide product applied to foliage.

NOTE: Authority cited: Section 29102, Food and Agricultural Code. Reference: Sections 29100 and 29102, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) and NOTE filed 12-7-89; operative 1-6-90 (Register 89, No. 49).
- 2. Repealer and new section filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).

§ 6651. Vector Control Exemption.

Pesticides diluted in one half gallon of water or more per acre applied by local vector control agencies or their contractors pursuant to a cooperative agreement with the Department of Health Services are exempt from the requirements of this article.

NOTE: Authority cited: Section 29102, Food and Agricultural Code. Reference: Sections 29100 and 29102, Food and Agricultural Code.

HISTORY

1. Amendment of NOTE filed 12-7-89; operative 1-6-90 (Register 89, No. 49).

§ 6652. Availability for Notification.

- (a) Each beekeeper who desires advance notice of applications of pesticides shall inform the commissioner of a two-hour period between 6 a.m. and 8 p.m. each day, during which time the beekeeper shall be available for contact, at the beekeeper's expense, to receive advance notice from persons intending to apply pesticide(s). This request for notification shall expire on December 31 of each year.
- (b) This section shall apply statewide. However, from March 15 through May 15 in a citrus/bee protection area, if there are conflicts between the provisions of this section and those of section 6656, section 6656 shall prevail.

NOTE: Authority cited: Sections 11456 and 29102, Food and Agricultural Code. Reference: Section 29102, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5-24-85; effective upon filing pursuant to Government Code section 11346.2(d) (Register 85, No. 22).

 Amendment filed 12–7–89; operative 1–6–90 (Register 89, No. 49).

- Editorial correction of printing error in subsection (a) (Register 91, No. 33).
 Amendment of subsection (a) filed 9-27-91; operative 1-1-92 pursuant to Government Code section 11346.2(c) (Register 91, No. 52).

- section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6654. Notification to Beekeepers.

- (a) Each person intending to apply any pesticide toxic to bees to a blossoming plant shall, prior to the application, inquire of the commissioner, or of a notification service designated by the commissioner, whether any beekeeper with apiaries within one mile of the application site has requested notice of such application.
- (b) If the person performing pest control is advised of a request for notification, he or she shall notify the beekeeper, at least 48 hours in advance of the application, of the time and place the application is to be made, the crop and acreage to be treated, the method of application, the identity and dosage rate of the pesticide to be applied and how the person performing pest control may be contacted by the beekeeper. This time may be increased or decreased by the commissioner, or by a agreement of both the beekeeper and the person performing the pest control work.
- (c) This section shall apply statewide. However, from March 15 through May 15 in a citrus/bee protection area, if there are conflicts between the provisions of this section and those of section 6656, section 6656 shall prevail.

NOTE: Authority cited: Section 29102, Food and Agricultural Code. Reference: Section 29102, Food and Agricultural Code.

HISTORY

1. Amendment filed 4-18-85 as an emergency; effective upon filing (Register 85, No. 16).

- Order of Repeal of 4–18–85 emergency filed 4–18–85 by OAL pursuant to Government Code Section 11349.6 (Register 85, No. 16).
- Amendment of subsection (c) filed 4-29-85 as an emergency; effective upon filing (Register 85, No. 18). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8-27-85.
 Certificate of Compliance including amendment transmitted to OAL 8-27-85

and filed 9-27-85 (Register 85, No. 39).

- Amendment of subsection (c) and new subsection (d) filed 3–29–89 as an emergency; operative 3–29–89 (Register 89, No. 13). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 7–27–89.
- Amendment filed 12–7–89; operative 1–6–90 (Register 89, No. 49)
- 7. Amendment of subsection (a) filed 12–26–2001; operative 1–25–2002 (Register 2001, No. 52).

§ 6655. Notification Region for Butte, Glenn and Tehama Counties.

- (a) The counties of Butte, Glenn and Tehama are established as a region for the notification of apiary owners of pesticide applications by pest control operators who are registered with the commissioners of any of these counties pursuant to Section 11732 of the Food and Agricultural Code and who are required to give notification to beekeepers pursuant to Section 6654.
- (b) The agricultural commissioner of Glenn County shall be the coordinator for the region.
- (c) Pest control operators specified in (a) shall pay an annual fee of \$75.00 to the coordinator. The fee shall be paid at the same time the operator registers with any of the commissioners in the region as specified in (a).
- (d) Beekeepers who have filed a request with any of the agricultural commissioners of the region for notification of pesticide usage pursuant to Section 29101 of the Food and Agricultural Code, shall pay an annual fee to the coordinator in accordance with the following schedule:

Beehives	Annual Fe
1 to 100	\$10.00
101 to 500	\$25.00
501 to 2,000	\$50.00
over 2.000	\$100.00

The fee shall be paid at the same time the beekeeper files a request for notification of pesticide applications with any of the commissioners of the region.

NOTE: Authority cited: Sections 11456, 29080, 29081 and 29082, Food and Agricultural Code. Reference: Sections 29080, 29081, 29082, and 29101, Food and Agricultural Code.

HISTORY

1. New section filed 7-20-89; operative 8-19-89 (Register 89, No. 31).

2. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6656. Citrus/Bee Protection Area.

- (a) The area within one mile of any citrus planting of one acre or more in Fresno, Kern or Tulare county is designated as a citrus/bee protection area.
- (b) The citrus bloom period, in any citrus grove, for purposes of declaring bloom and label interpretation, shall be from when 10 percent of the total citrus blossoms are open until 75 percent of the blossom petals on the north side of the trees have fallen.

The commissioner shall give public notice of the official beginning and ending dates of each citrus bloom period for each citrus growing district in the county, at least three days before establishing such dates.

- (c) Pesticide applications may be made 48 hours or more after the official end of citrus bloom without advance notification to beekeepers until March 15 of the following year pursuant to section 6654(c). Growers/pesticide applicators wishing to make pesticide applications prior to 48 hours after the official end of bloom shall follow the inquiry and notification procedures specified in subsections (a) and (b) of section 6654.
- (d) Each person who owns or operates any apiary within a citrus/bee protection area from March 15 through May 31, shall file a written notice of apiary location with the commissioner before March 15 and shall update such notice, including notice of departure from the citrus/bee protection area.
- (e) Within a citrus/bee protection area, each beekeeper who desires notification of applications of pesticides shall be available for telephone contact at the beekeeper's expense between 4:00 p.m. and 7:00 p.m., Monday through Saturday from March 15 through May 31, to receive advance notice from persons intending to apply pesticide(s).
- (f) Any person intending to apply a pesticide toxic to bees to citrus during a citrus bloom period, except as otherwise provided in this subsection, shall file a notice of intent with the commissioner as provided in section 6434(b) at least 48 hours prior to the intended application. This subsection shall not apply to pesticides listed in section 6656(g) applied when bees are inactive.
- (g) Notwithstanding section 6654(b), the following pesticide applications may be made within a citrus/bee protection area during the citrus bloom period when bees are inactive without notification to beekeepers:
 - (1) Methomyl (Lannate);
 - (2) formetanate (Carzol);
 - (3) Chlorpyrifos (Lorsban);

[The next page is 417.]

- (4) Any pesticide applied so that the RT period shown on the labeling will expire before the next period of bee activity.
- (h) Except for applications of pesticides listed in subsection (g), and applications of pesticides that are not toxic to bees, within a citrus/bee protection area during the citrus bloom period, an application delay of 48 hours or more requires that the person intending to apply the pesticide recontact beekeepers and inform them of the change in scheduling.
- (i) The following applications to citrus are prohibited within a citrus/bee protection area:
 - (1) Carbaryl (Sevin) from first bloom until complete petal fall.
- (2) Any pesticide toxic to bees, except those exempted in subsection (g) during a citrus bloom period, unless the need for control of lepidoptera larvae or citrus thrips (*Scirtothrips citri*) has been established by written recommendation of a representative of the University of California, Agricultural Extension Service, or a licensed agricultural pest control adviser. The recommendation shall state either that the citrus planting does not meet the citrus bloom period criteria, or why alternatives less hazardous to bees would not be effective.

For azinphosmethyl (Guthion), this requirement shall remain in effect until complete petal fall.

NOTE: Authority cited: Sections 11456 and 29102, Food and Agricultural Code. Reference: Sections 29100, 29101 and 29102, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 4–18–85 as an emergency; effective upon filing (Register 85, No. 16).
- Order of Repeal of 4–18–85 emergency filed 4–18–85 by OAL pursuant to Government Code section 11349.6 (Register 85, No. 16).
- 3. Amendment of subsection (b) filed 4–29–85 as an emergency; effective upon filing (Register 85, No. 18). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8–27–85.
- Certificate of Compliance including amendment transmitted to OAL 8-27-85 and filed 9-27-85 (Register 85, No. 39).
- Amendment filed 3-29-89 as an emergency; operative 3-29-89 (Register 89, No. 13). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 7-27-89.
- 6. Amendment of subsection (b) filed 4-27-89 as an emergency; operative 4-27-89 (Register 89, No. 18). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8-25-89.
- 7. Amendment filed 12–7–89; operative 1–6–90 (Register 89, No. 49). 8. Editorial correction of printing errors in subsections (b) and (c) (Register 91, No.
- 33).

 9. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to
- section 100, title 1, California Code of Regulations (Register 2001, No. 25). 10. Amendment of subsections (c), (f)–(h) and (i)(2) filed 12–26–2001; operative 1–25–2002 (Register 2001, No. 52).

Article 4. Storage, Transportation and Disposal

§ 6670. Container Control.

Pesticides, emptied containers or parts thereof, or equipment that holds or has held a pesticide, shall not be stored, handled, emptied, disposed of, or left unattended in such a manner or at any place where they may present a hazard to persons, animals (including bees), food, feed, crops or property. The commissioner may take possession of such unattended pesticides or emptied containers to abate such hazard.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 3135 to Section 6670(a), and renumbering of former Section 3136(a) to Section 6670(b) filed 7–18–85; effective thirtieth day thereafter (Register 85, No. 29).
- 2. Amendment of section heading and repealer of subsection (a) and subsection (b) designator filed 8–1–96; operative 8–31–96 (Register 96, No. 31).
- 3. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6672. Delivery of Pesticide Containers.

(a) No person shall deliver a container which holds or has held a pesticide to a property unless he stores it in an enclosure or closure complying with the requirements of this section or delivers it to a person in charge of the property or his agent, or a pest control operator or his employee.

The person receiving the container shall control access to it in accordance with this section.

- (b) Each person who controls the use of any property or premises is responsible for all containers or equipment on the property which hold or have held a pesticide. Unless all such containers are under his personal control so as to avoid contact by unauthorized persons, he shall:
- (1) Provide a person responsible to him to maintain such control over the containers at all times, or
- (2) Store all such containers in a locked enclosure, or in the case of liquid pesticides in a container larger than 55 gallons capacity, the container shall have a locked closure. Either shall be adequate to prevent unauthorized persons from gaining access to any of the material.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 3137 to Section 6672(a), and renumbering of former Section 3136(b) to Section 6672(b) filed 7–18–85; effective thirtieth day thereafter (Register 85, No. 29).
- 2. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6674. Posting of Pesticide Storage Areas.

Signs visible from any direction of probable approach shall be posted around all storage areas where containers which hold or have held pesticides required to be labeled with the signal words "warning" or "danger" are stored. Each sign shall be of such size that it is readable at a distance of 25 feet and be substantially as follows:

DANGER POISON STORAGE AREA ALL UNAUTHORIZED PERSONS KEEP OUT KEEP DOOR LOCKED WHEN NOT IN USE

The notice shall be repeated in an appropriate language other than English when it may reasonably be anticipated that persons who do not understand the English language will come to the enclosure.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering of former Section 3138 to Section 6674 filed 7–18–85; effective thirtieth day thereafter (Register 85, No. 29). For prior history of Section 3138, see Register 78, No. 49.
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6676. Container Requirements.

Except as provided in the Food and Agricultural Code pertaining to service containers, any container which holds or has held any pesticide, when stored or transported, shall carry the registrant's label. All lids or closures shall be securely tightened except when the procedure described in Section 6684 has been followed. This section shall not apply to measuring devices that are not used to store or transport a pesticide.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code.

- 1. Editorial renumbering and amendment of former Section 3140 to Section 6676 filed 7–18–85; effective thirtieth day thereafter (Register 85, No. 29).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6678. Service Container Labeling.

Service containers, other than those used by a person engaged in the business of farming when the containers are used on the property the person is farming, shall be labeled with:

- (a) the name and address of the person or firm responsible for the container:
 - (b) the identity of the pesticide in the container; and
- (c) the word "Danger," "Warning," or "Caution" in accordance with the label on the original container.

NOTE: Authority cited: Sections 11456, 11502, 12781 and 12859, Food and Agricultural Code. Reference: Sections 11501 and 12859, Food and Agricultural Code.

HISTORY

1. New section filed 5–25–90; operative 6–24–90 (Register 90, No. 28).

- 2. Change without regulatory effect amending subsection (b) and NOTE filed 3–27–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 13).
- 3. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6680. Prohibited Containers for Pesticides.

In no case shall a pesticide be placed or kept in any container of a type commonly used for food, drink or household products.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code. HISTORY

- 1. Editorial renumbering of former Section 3139 to Section 6680 filed 7-18-85;
- effective thirtieth day thereafter (Register 85, No. 29).

 2. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6682. Transportation.

- (a) Pesticides shall not be transported in the same compartment with persons, food or feed.
- (b) Pesticide containers shall be secured to vehicles during transportation in a manner that will prevent spillage onto the vehicle or off the vehicle. Paper, cardboard, and similar containers shall be covered when necessary to protect them from moisture.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code.

- 1. Editorial renumbering of former section 3140.1 to section 6682 filed 7-18-85; effective thirtieth day thereafter (Register 85, No. 29).
- Editorial correction of printing error in subsection (a) (Register 91, No. 33).
- 3. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6684. Rinse and Drain Procedures.

- (a) Except for containers to be returned to the registrant, each emptied container which has held less than 28 gallons of a liquid pesticide that is diluted for use shall be rinsed and drained by the user at time of use as
- (b)(1) Use the following amount of water or other designated spray carrier for each rinse.

Amount of rinse medium Size of container Less than 5 gallons 1/4 container volume 5 gallons or over 1/5 container volume

- (2) Place required minimum amount of rinse medium in the container, replace closure securely, and agitate.
- (3) Drain rinse solution from container into tank mix. Allow container to drain 30 seconds after normal emptying.
- (4) Repeat (2) and (3) above a minimum of two times so as to provide a total of three rinses; or
- (c)(1) Invert the emptied container over a nozzle located in the opening of the mix tank which is capable of rinsing all inner surfaces of the con-
- (2) Activate the rinse nozzle allowing the rinse solution to drain into the tank. The rinse shall continue until the rinse solution appears clear and a minimum of one-half of the container volume of rinse medium has been used. A minimum of 15 pounds pressure per square inch shall be used for rinsing; or
- (d) Other rinse methods, at least equal in effectiveness to the above, approved by the director.

NOTE: Authority cited: Sections 11456, 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code. HISTORY

- 1. Editorial renumbering of former Section 3141 to Section 6684 filed 7–18–85;
- effective thirtieth day thereafter (Register 85, No. 29).

 2. Designation and amendment of subsection (a) and subsection relettering filed -31-95; operative 6-30-95 (Register 95, No. 22)
- 3. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6686. Exemptions.

(a) Sections 6672, 6674, 6682, and 6684 shall not apply to containers which hold or have held pesticides packaged, labeled, and used for home use when in the possession of a householder on his property.

- (b) Sections 6670 and 6672(b) shall not apply to exempt materials specified in section 6402 except where the commissioner, or the director in any county where there is no commissioner, determines that a hazard to public health and safety exists requiring the control specified in sections 6670 and 6672(b).
- (c) Section 6684 shall not apply to outer shipping containers that are not contaminated with a pesticide.
- (d) This article shall not apply to sanitizers, disinfectants, or medical

NOTE: Authority cited: Sections 12976 and 12981, Food and Agricultural Code. Reference: Sections 11501, 12981 and 14102, Food and Agricultural Code.

HISTORY

- 1. Editorial renumbering and amendment of former Section 3141 to Section 6684 filed 7–18–85; effective thirtieth day thereafter (Register 85, No. 29)
- 2. New subsection (e) filed 3–9–95; operative 4–10–95 (Register 95, No. 10). Change without regulatory effect amending section filed 2–28–97 pursuant to
- section 100, title 1, California Code of Regulations (Register 97, No. 9).
- 4. Change without regulatory effect amending subsections (a)–(c) filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Subchapter 3. Pesticide Worker Safety

Article 1. General Scope and Purpose

§ 6700. Scope.

This group specifies work practices for:

- (a) employees who mix, load, apply, store, transport, or otherwise handle pesticides for any use, except for manufacturing, formulating or repackaging of pesticides; and
- (b) for employees who are exposed to residues of pesticides after application to fields.

The requirements of this group do not allow a lower standard of protection when pesticide labeling statements require a higher standard of pro-

The requirements of this group do not apply to storage and transportation of pesticides in the manufacturer's sealed or closed container. In general, the work practices and safety requirements stated in this group are designed to reduce risk of exposure and to ensure availability of medical services for employees who handle pesticides, and to provide safe working conditions for field and other workers.

HISTORY

- $1.\,Renumbering\, and\, amendment\, of\, former\, Chapter\, 4, Subchapter\, 1, Group\, 2\, (Sec-large energy of the control of the con$ tions 2475, 2477–2487) to Chapter 6, Subchapter 3, Group 3 (Sections 6700–6778, not consecutive) filed 10–25–85; effective thirtieth day thereafter (Register 85, No. 43). For prior history of Sections 2475, 2477-2487, see Registers 83, No. 41; 79, No. 29; and 79, No. 1.
- Amendment filed 9–26–88; operative 10–26–88 (Register 88, No. 41).
- 3. Amendment filed 8–13–90; operative 8–13–90 (Register 90, No. 41).
 4. Editorial correction restoring inadvertently omitted HISTORIES 1 and 2 (Register
- 5. Change without regulatory effect amending NOTE filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6701. Interpretation Consistent with Federal Standards.

Whenever the context will allow, the requirements of this subchapter should be interpreted at least as strict as, and consistent, with the Worker Protection Standards in Title 40 Code of Federal Regulations, Part 170. It is intended that these regulations, rather than those in Title 40 Code of Federal Regulations, Part 170, be enforced by the Department of Pesticide Regulation and county agricultural commissioners within the State of California. Any references to Part 170, Code of Federal Regulations on pesticide product labeling shall be considered a reference to Title 3, Division 6, California Code of Regulations when use occurs within California.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 11501, 12973, 12980 and 12981, Food and Agricultural Code.

1. New section filed 12-31-96; operative 1-1-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6702. Employer-Employee Responsibilities.

- (a) The employer shall comply with each regulation in this subchapter which is applicable to the employer's action or conduct.
 - (b) The employer:
- (1) is responsible for knowing about applicable safe use requirements specified in regulations and on the pesticide product labeling:
- (2) shall inform the employee, in a language the employee understands, of the specific pesticide being used, pesticide safety hazards, the personal protective equipment and other equipment to be used, work procedures to be followed, and pesticide safety regulations applicable to all activities they may perform;
- (3) shall supervise employees to assure that safe work practices, including all applicable regulations and pesticide product labeling requirements, are complied with;
- (4) has the duty to provide a safe work place for employees and require employees to follow safe work practices; and
- (5) shall take all reasonable measures to assure that employees handle and use pesticides in accordance with the requirements of law, regulations, and pesticide product labeling requirements.
- (c) Employees shall utilize the personal protective equipment and other safety equipment required by pesticide product labeling or specified in this subchapter that has been provided by the employer at the work site in a condition that will provide the safety or protection intended by the equipment.

NOTE: Authority cited: Sections 12976 and 12981, Food and Agricultural Code. Reference: Sections 12973, 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8-1-86; effective thirtieth day thereafter (Register 86, No. 31).
- 2. Amendment of section and Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- 3. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6704. Application of Labor Code.

In order to insure that rights granted to California employees by Chapter 1 of Division 5 of the California Labor Code are adequately provided to agricultural employees, including employee rights (1) to file confidential complaints alleging unsafe work conditions, (2) to have complaints promptly investigated, (3) to talk to inspectors or compliance officers, and to point out hazards during the inspection process, (4) to be notified of any relevant job hazard, and (5) to not be subject to any retaliation or discrimination because such employee has filed any complaint regarding an unsafe work condition, the director, commissioners, and the Department of Industrial Relations shall cooperate in fully implementing any master agreements entered into between these parties which are designed to insure enforcement of employees' rights as well as any inspection protocols adopted pursuant to such master agreements.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6706. Hazardous Areas.

When there is a reasonable suspicion by the Director or commissioner that a specific workplace has been or may be unsafe for workers due to exposure to active or inert ingredients in pesticide products, or breakdown products of these ingredients, the director or commissioner may require the employer to prohibit entry of employees into that workplace. The director or commissioner may require the employer to provide medical supervision for the period of time necessary for the director to determine the safety of the workplace to protect employees who have been working in or will enter that workplace. This medical supervision may include biological monitoring of persons for possible over—exposure to pesticide product ingredients or breakdown products of these ingredients. The director or commissioner may also specify exposure time limits and protective clothing and equipment to be worn by employees under these circumstances.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6708. Inspection Authority.

NOTE: Authority cited: Sections 407 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of Section 6708 to Section 6140 filed 9–26–88; operative 10–26–88 (Register 88, No. 41).

§ 6710. Pesticide Exposure Studies Involving Human Participants.

- (a) No person shall conduct any pesticide exposure study in California, which involves human participants, unless the Director has given written authorization to the study director to conduct the pesticide exposure study according to an approved protocol.
- (b) The study director shall submit the protocol to the Director for review and provisionary determination of acceptability.
- (c) The Director shall forward a copy of the protocol and review documentation to the Office of Environmental Health Hazard Assessment for concurrent review.
- (d) The Director shall provide comments to the study director on the basis of Department of Pesticide Regulation review and any comments from the Office of Environmental Health Hazard Assessment. The study director shall make any changes deemed necessary by the Director. Upon receipt of the Director's provisionary determination of acceptability, the study director shall obtain a review and approval from an Institutional Review Board (IRB). The IRB must conduct its review in compliance with Title 40 Code of Federal Regulations (Protection of Environment), Part 26 (Protection of Human Subjects).
- (e) The study director shall submit to the Director the IRB's approval of the protocol and all documentation exchanged between the IRB and the study director related to the review.
- (f) The Director shall make the final decision regarding approval or denial of the protocol based on the information required in subsection (e), other relevant available information available to the Director shall notify the study director in writing of the decision and the basis for the decision.
- (g) The Director shall establish an expiration date for the approved protocol. In no instances shall the expiration date exceed that established by the IRB. If a pesticide exposure study is not completed by the expiration date established by the Director, the study director shall not continue the pesticide exposure study until the Director has approved the renewal of the protocol in writing as required in subsection (i).
- (h) Protocol Amendment. The study director shall not make an amendment to the approved protocol that may impact the health of the human participants without approval from the Director. For amendments where participant health is potentially impacted, the study director shall make the request in writing. The proposed amendment, justification, potential impact on study participants, and any measures proposed to mitigate potential impacts shall accompany the request. The Director shall forward a copy of the proposed amendment and any accompanying documentation to the Office of Environmental Health Hazard Assessment for concurrent review. The Director shall provide comments to the study director on the basis of Department of Pesticide Regulation review and any comments from the Office of Environmental Health Hazard Assessment. The study director shall make any changes deemed necessary by the Director. Upon receipt of the Director's provisionary determination of acceptability, the study director shall obtain a review and approval of the proposed amendment from an IRB as required in subsection (d). The study director shall submit to the Director the protocol and all documentation exchanged between the IRB and the study director. The Director shall notify the study director of the decision and the basis for the decision. If approved by the Director, the pesticide exposure study shall be conducted in accordance with the approved amended protocol. In the

event that the potential impact on human participants is uncertain, the study director shall consult with the Director.

- (i) Renewal of Protocol. The study director shall obtain approval of renewal from an IRB as described in subsection (d) prior to requesting the Director's approval to renew the protocol. The study director shall submit, to the Director, the protocol and all documentation exchanged between the IRB and the study director regarding the renewal. After reviewing the documentation, if the Director approves the request for protocol renewal, the Director shall establish a revised expiration date. The revised expiration shall not exceed that date established in the IRB's renewal recommendation.
- (j) In the event of any complications or adverse health effects identified during the conduct of the study, the study director shall take immediate action to ensure the health and safety of the human participants. The study director shall immediately notify the Director of such complications or adverse health effects and the immediate actions taken.
- (k) The study director shall submit the following information to the Director by the expiration date:
- (1) A statement regarding the status of the study including information as to whether the study was completed, postponed, or cancelled.
- (2) A report and explanation of any complications or adverse health effects involving the human participants and what actions were taken.
- (*l*) The Director or agricultural commissioner of the county where the study is taking place may inspect the pesticide exposure study activities to evaluate compliance with the protocol. The Director or commissioner may order the study director or human participants to cease immediately any human pesticide exposure activity conducted during the study to protect the safety of the human participants. The Director may cancel the authorization to conduct the pesticide exposure study whenever it is deemed necessary to protect participant safety, public safety, or the environment.

- 2. Repealer filed 1-20-2000; operative 2-19-2000 (Register 2000, No. 3).

Article 2. General Safety Requirements

§ 6720. Safety of Employed Persons.

- (a) The requirements of this article shall be complied with by the employer for the safety of employees handling pesticides.
- (b) When only vertebrate pest control baits, solid fumigants (including aluminum phosphide, magnesium phosphide, and smoke cartridges), insect monitoring traps or non–insecticidal lures are handled, the employer is exempt from the requirements of sections 6730 (Working Alone), 6732 (Change Area), and 6736 (Coveralls).
- (c) When antimicrobial agents, used only as sanitizers, disinfectants, or medical sterilants, or pool and spa chemicals are handled, the employer is exempt from complying with the provisions of Title 3, California Code of Regulations sections specified below, provided the employer instead complies with any applicable requirements in the following corresponding provisions of Title 8, California Code of Regulations.

Title 3, CCR	Title 8, CCR
6700	3200 and 3202
6702	3200 and 3203
6720	As indicated in this Subsection
6723	3203, 3204, and 5194
6724	3203 and 5194
6726	3400
6732	3367
6734	3363 and 3366
6736	3383
6738	3380 through 3385
6739	5144
6740	3317
6742	5141
6744	3203 and 5194

- (d) The provisions of sections 6734 and 6768 (Decontamination), 6726 and 6766 (Emergency Medical Care), 6736 (Coveralls), 6738(b)–(h) (Personal Protective Equipment), 6739 (Respiratory Protection), and 6770 (Field Reentry) do not apply to licensed agricultural pest control advisers and registered professional foresters, or employees under their direct supervision, while performing, after the application is completed, crop adviser tasks, including field–checking or scouting, making observations of the well–being of the plants, or taking samples provided:
- (1) They have been trained equivalent to the requirements of section 6724 (licensed agricultural pest control advisers are considered trained for the purposes of this exception); and
- (2) The licensed agricultural pest control adviser or registered professional forester responsible for the direct supervision has:
- (A) Made specific determinations regarding appropriate personal protective equipment, needed decontamination facilities, and how to safely conduct crop adviser tasks;
- (B) Informed each employee under his or her direct supervision of the pesticide product and active ingredient(s) applied, method and time of application, the restricted entry interval, and determinations made pursuant to (A) above; and
- (C) Instructed each employee under his or her direct supervision regarding which tasks to perform and how to contact him or her if the need arises.
- (e) The provisions of this subchapter do not apply to employees handling consumer products packaged for distribution to, and use by, the general public, provided that employee use of the product is not significantly greater than the typical consumer use of the product.

HISTORY

- 1. Amendment filed 8-1-86; effective thirtieth day thereafter (Register 86, No. 31).
- Amendment of subsection (a) and new subsections (b) and (c) filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- 3. Amendment of subsection (b) and NOTE filed 7–6–93; operative 8–5–93 (Register 93, No. 28).

- 4. Repealer and new subsection (c) filed 3–9–95; operative 4–10–95 (Register 95, No. 10).
- 5. New subsections (d)–(e) and amendment of Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- Amendment of subsections (b) and (e) filed 5–10–99; operative 6–9–99 (Register 99, No. 20).
- Amendment of subsections (b)-(d) filed 6-13-2007; operative 1-1-2008 (Register 2007, No. 24).

§ 6722. Age.

NOTE: Authority cited: Sections 407 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

 Renumbering and amendment of Section 6722 to Section 6612 filed 9-26-88; operative 10-26-88 (Register 88, No. 41).

§ 6723. Hazard Communication for Pesticide Handlers.

- (a) Before employees are allowed to handle pesticides, the employer shall display a copy of a completed Written Hazard Communication Information for Employees Handling Pesticides in Agricultural Settings (Pesticide Safety Information Series leaflet A–8) or Hazard Communication Information for Employees Handling Pesticides in Noncrop Settings (Pesticide Safety Information Series leaflet N–8), as applicable, at a central location at the workplace. Upon request, the employer shall read to the requesting employee, in a language understandable to that employee, Pesticide Safety Information Series leaflet A–8/N–8. Pesticide Safety Information Series Leaflet A–8/N–8 shall be written by the Department of Pesticide Regulation in English and Spanish. Pesticide Safety Information Series leaflets are available from the Department.
- (b) The employer shall maintain, at a central location at the workplace accessible to employees who handle pesticides, the following:
- (1) pesticide use records as specified in Section 6624(b), (c) and (e) for pesticides that have been handled by his or her employees;
- (2) copies of available Pesticide Safety Information Series leaflets which are applicable to the pesticides and handling activities listed in the pesticide use records referred to in subsection (b)(1); and
- (3) a Material Safety Data Sheet (MSDS), as specified by Title 8 California Code of Regulations, section 5194, for each pesticide listed in the pesticide use records referred to in subsection (b)(1). If the MSDS is not provided by the registrant of a pesticide, the employer shall:
- (A) within seven working days of a request for a MSDS from an employee, employee representative or employee's physician, make written inquiry to the registrant of the pesticide, asking that a MSDS be sent to the employer. If the employer has made written inquiry within the last twelve months as to whether the pesticide is subject to the requirement for a MSDS or the employer has made a written inquiry within the last six months requesting new, revised or later information on the MSDS, the employer need not make additional written inquiry. A copy of the written inquiry shall immediately be sent to the person requesting the MSDS;
- (B) notify the requester of the availability of the MSDS or provide a copy of the MSDS to the requester within fifteen days of receipt of the MSDS from the registrant; and
- (C) if a response has not been received from the registrant within twenty–five working days of the date the inquiry was made, send the Department a copy of the inquiry with a notation that no response has been received. The employer is not precluded from obtaining and providing the MSDS utilizing other more expedient methods in lieu of those provided in this subsection.
- (c) The employer shall inform employees, before they are allowed to handle pesticides and at least annually thereafter, of the location and availability of the records and other documents listed in this section or relating to employee training, monitoring, and potential exposure. If the location of the records and other documents changes, an employer shall promptly inform his or her employees of the new location.
- (d) The employer shall provide, upon request of his or her employee, employee representative, or employee's physician, access to any records or other documents required to be maintained pursuant to this chapter.

Access shall be granted as soon as possible and not to exceed forty-eight hours from the date of the request.

INFORMATIONAL NOTE: Other requirements relating to hazard communication can be found in Sections 6602, 6618, 6619, 6724, 6726, 6738, 6744, 6764, 6766, 6770, and 6776.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code; and 29 Code of Federal Regulations, Part 1910.1200.

HISTORY

- 1. New section filed 12-6-91; operative 1-1-92 (Register 92, No. 13).
- 2. Amendment of subsections (a), (b)(2), (b)(3), (c) and (d) and amendment of Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343,4(d) (Register 97, No. 1).
- Change without regulatory effect amending subsection (a) filed 11–4–99 pursuant to section 100, title 1, California Code of Regulations (Register 99, No. 45)

§ 6723.1. Application–Specific Information for Handlers.

- (a) The operator of property used for the commercial or research production of an agricultural plant commodity shall display, at a central location, the following application–specific information while employees are employed to handle pesticides:
 - (1) Identification of the treated area;
 - (2) Time and date of the application;
 - (3) Restricted entry interval; and
 - (4) Product name, EPA registration number, and active ingredients.
- (b) The information shall be displayed within 24 hours of the completion of an application and include all applications that have been made to any treated field on the agricultural establishment within 1/4 mile of where employees will be working. Once displayed, the information shall remain displayed until the area no longer meets the definition of a treated field or handler employees will no longer be on the establishment, whichever occurs earlier.
- (c) The original or copies of documents otherwise required to be maintained by this chapter may be used to meet the requirements of this section provided they contain the information required by this section.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 11501, 12973, 12980 and 12981, Food and Agricultural Code.

HISTORY

1. New section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6724. Handler Training.

The employer shall assure that employees who handle pesticides have been trained pursuant to the requirements of this section and that all other provisions of this section have been complied with for employees who handle pesticides.

- (a) The employer shall have a written training program. The training program shall describe the materials (e.g., study guides, pamphlets, pesticide product labeling, Pesticide Safety Information Series leaflets, Material Safety Data Sheets, slides, video tapes) and information that will be provided and used to train his or her employees and identify the person or firm that will provide the training. The training program shall address each of the subjects specified in subsection (b) that is applicable to the specific pesticide handling situation. The employer shall maintain a copy of the training program while in use and for two years after use, at a central location at the workplace.
- (b) The training shall cover, for each pesticide or chemically similar group of pesticides, to be used:
- (1) Format and meaning of information, such as precautionary statements about human health hazards, contained in pesticide product labeling;
- (2) Hazards of pesticides, including acute and chronic effects, delayed effects, and sensitization, as identified in pesticide product labeling, Material Safety Data Sheets, or Pesticide Safety Information Series leaflets;
 - (3) Routes by which pesticides can enter the body;
 - (4) Signs and symptoms of overexposure;
 - (5) Emergency first aid for pesticide overexposure;
 - (6) How to obtain emergency medical care;

- (7) Routine and emergency decontamination procedures, including spill clean up and the need to thoroughly shower with soap and warm water after the exposure period;
- (8) Need for, limitations, appropriate use, and sanitation, of, any required personal protective equipment;
 - (9) Prevention, recognition, and first aid for heat related illness;
- (10) Safety requirements and procedures, including engineering controls (such as closed systems and enclosed cabs) for handling, transporting, storing, and disposing of pesticides;
- Environmental concerns such as drift, runoff, and wildlife hazards;
 - (12) Warnings about taking pesticides or pesticide containers home;
- (13) Requirements of this chapter and chapter 4 relating to pesticide safety, Material Safety Data Sheets, and Pesticide Safety Information Series leaflets:
- (14) The purposes and requirements for medical supervision if organophosphate or carbamate pesticides with the signal word "DAN-GER" or "WARNING" on the labeling are mixed, loaded, or applied for the commercial or research production of an agricultural plant commodity:
- (15) The location of the written Hazard Communication Information For Employees Handling Pesticides (Pesticide Safety Information Series leaflet A–8), other Pesticide Safety Information Series leaflets, and Material Safety Data Sheets;
 - (16) The employee's rights, including the right;
- (A) To personally receive information about pesticides to which he or she may be exposed;
- (B) For his or her physician or employee representative to receive information about pesticides to which he or she may be exposed; and
- (C) To be protected against retaliatory action due to the exercise of any of his or her rights.
- (c) The training shall be in a manner the employee can understand, be conducted pursuant to the written training program, and include response to questions.
- (d) Training shall be completed before the employee is allowed to handle pesticides, continually updated to cover any new pesticides that will be handled, and repeated at least annually thereafter. Initial training may be waived if the employee submits a record showing that training meeting the requirements of this section and covering the pesticides and use situations applicable to the new employment situation was received within the last year. A certified applicator is considered trained for the purposes of this section.
- (e) The date and extent of initial and annually required training given to the employee and the job to be assigned shall be recorded. This record shall be verified by the employee's signature and retained by the employer for two years at a central location at the workplace accessible to employees.
- (f) The person conducting the training for employees who will be handling pesticides for the commercial or research production of an agricultural plant commodity shall be qualified as one of the following:
 - (1) A California certified commercial application;
 - (2) A California certified private applicator;
- (3) A person holding a valid County Biologist License in Pesticide Regulation or Investigation and Environmental Monitoring issued by the Department of Food and Agriculture;
- (4) A farm advisor employed by the University of California Extension Office;
- (5) A person who has completed an "instructor trainer" program presented by one of the following:
- (A) the University of California, Integrated Pest Management Program after January 1, 1993; or
 - (B) other instructor training program approved by the Director;
 - (6) A California licensed Agricultural Pest Control Adviser;
 - (7) A California Registered Professional Forester; or
 - (8) Other trainer qualification approved by the Director.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8-1-86; effective thirtieth day thereafter (Register 86, No. 31)
- 2. Amendment of subsection (a) filed 9–26–90; operative 10–26–88 (Register 88, No. 41).
- 3. New subsections (a) and (c) and renumbering and amendment of subsection (b) filed 8–13–90; operative 8–13–90 (Register 90, No. 41).
- 4. Amendment filed 12-6-91; operative 1-1-92 (Register 92, No. 13).
- 5. Repealer and new section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6726. Emergency Medical Care.

- (a) Emergency medical care for employees handling pesticides shall be planned for in advance. The employer shall locate a facility where emergency medical care is available for employees who will be handling pesticides.
- (b) Employees shall be informed of the name and location of a facility where emergency medical care is available. The employer shall post in a prominent place at the work site, or work vehicle if there is no designated work site, the name, address and telephone number of a facility able to provide emergency medical care whenever employees will be handling pesticides and, if the identified facility is not reasonably accessible from that work location, procedures to be followed to obtain emergency medical care.
- (c) When there is reasonable grounds to suspect that an employee has a pesticide illness or when an exposure to a pesticide has occurred that might reasonably be expected to lead to an employee's illness, the employer shall ensure that the employee is taken to a physician immediately. NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Relettering and amendment of subsections (a) and (b) to subsections (b) and (c) and new subsection (a) filed 9–26–88; operative 10–26–88 (Register 88, No. 41).
- Change without regulatory effect amending Note filed 6-20-2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6728. Medical Supervision.

- (a) Whenever an employee mixes, loads, or applies a pesticide with the signal word "DANGER" or "WARNING" that contains an organophosphate or carbamate, for the commercial or research production of an agricultural plant commodity, the employer shall maintain use records that identify the employee, name of the pesticide and the date of use. The original or copies of documents otherwise required to be maintained by this chapter may be used to meet the requirements of this section provided they contain the information required by this section.
- (b) Each employer who has an employee that regularly handles pesticides specified in (a) shall have a written agreement signed by a physician, that includes the names and addresses of both the physician providing the medical supervision and the employer responsible for the employees, stating that the physician has agreed to provide medical supervision and that the physician possesses a copy of, and is aware of the contents of the document "Medical Supervision of Pesticide Workers—Guidelines for Physicians" (available from the Department of Health Services). A copy of this agreement shall be given to the commissioner by the employer no later than when an employee begins to regularly handle pesticides specified in (a).
- (c) The employer's responsibilities for medical supervision for employees regularly handling pesticides specified in (a) shall include the following:
- (1) All covered employees shall have baseline red cell and plasma cholinesterase determinations. Baseline values shall be verified every two years. For new employees, the medical supervisor may accept previously established baseline values if they are obtained in accordance with these regulations by the same laboratory methodology and are acceptable to the laboratory which will analyze the new employee's blood samples.
- (2) (A) The employer shall ensure that each employee, not previously under medical supervision associated with that employer, has red cell and

plasma cholinesterase determinations within three working days after the conclusion of each 30-day period in which pesticides specified in (a) are regularly handled.

- (B) After three tests at 30–day intervals, further periodic monitoring shall be at intervals specified in writing by the medical supervisor except for verification of baseline as specified in (1).
- (C) Where the medical supervisor has made no written recommendation for continued periodic monitoring, the testing interval shall be 60 days.
- (3) The employer shall keep a record of the agreement to provide medical supervision, use records, all recommendations received from the medical supervisor and all results of cholinesterase tests required to be made on his employees by this section or by the medical supervisor. Records required by this section shall be maintained for three years and shall be available for inspection by the employee, the director, commissioner, county health official, or state health official.
- (4) The employer shall follow the recommendations of the medical supervisor concerning matters of occupational health.
- (5) The employer shall post the name, address, and telephone number of the medical supervisor in a prominent place at the locale where the employee usually starts the workday or, if there is no locale where the employee usually starts the workday, at each worksite or in each work vehicle.
- (d) The employer shall investigate the work practices of any employee whose red cell or plasma cholinesterase levels fall below 80% of the baseline. The investigation of work practices shall include a review of the safety equipment used and its condition; and the employee's work practices which included employee sanitation, pesticide handling procedures, and equipment usage. The employer shall maintain a written record of the findings, any changes in equipment or procedures and any recommendations made to the employee.
- (e) The employer shall remove an employee from exposure to organophosphate or carbamate pesticides if the employee's plasma cholinesterase level falls to 60% or less of baseline, or if red cell cholinesterase falls to 70% or less of baseline. The employee shall be removed from further exposure until cholinesterase values return to 80% or more of their respective baseline values. The employer shall maintain written records of the dates of removal and the dates when employees are returned to exposure.
- (f) To meet the requirements of these regulations, acetylcholinesterase (also known as red blood cell cholinesterase) and butyrylcholinesterase (also known as plasma or serum cholinesterase or pseudocholinesterase) tests ordered by a medical supervisor for occupational health surveillance shall be performed by a clinical laboratory currently approved by the State Department of Health Services to perform these tests. By January 1, 2000, tests shall be performed according to the procedures outlined below. If tests cannot be performed according to the following procedures, the conversion procedure outlined in 6728(f)(8) shall be performed.
- (1) Using personnel and procedures acceptable to the Department of Health Services (Business and Professions Code sections 1242, 1243, 1246, 1269, 2070; Health and Safety Code sections 120580, 1607), blood collection and storage shall be done according to the following conditions:
- (A) Blood samples shall be kept in ice or at a temperature of 4° C until time of assay. If the sample is centrifuged to remove the erythrocytes from the plasma, the plasma shall be stored frozen at a temperature of \leq minus 20° C until the assay is performed. If possible, the assay shall be performed within 24 hours after blood collection. Time of sample collection, analysis, and storage conditions shall be specified on the report.
- (B) Ethylenediaminetetraacetic acid (EDTA) or heparin shall be used as an anticoagulant in a standard vacutainer tube.
- (2) The reagents and equipment shall conform to the following conditions:
- (A) A spectrophotometer at a wavelength between 405 and 425 nanometers shall be used.

- (B) The assay shall be performed at the temperature of 25° C.
- (C) The following conditions regarding the buffer/chromogen shall apply:
- 1. A sodium phosphate buffer shall be used at a concentration of 0.1 M adjusted to a pH of 8.0 with a pH meter calibrated at both 7.0 and 10.0.
- 2. Dithiobisnitrobenzoic acid (DTNB) at a stock concentration of 9.7 mM in 0.1 M sodium phosphate buffer pH 7.0 shall be used.
- (D) The substrate acetylthiocholine iodide shall be used at a stock concentration of 10.1 mM in 0.1 M sodium phosphate buffer pH 8.0.
- (E) The butyrylcholinesterase inhibitor quinidine hydrochloride monohydrate shall be used at a stock concentration of 6 mM in distilled deionized water.
- (3) The acetylcholinesterase enzyme assay shall be performed within 15 minutes of preparation and the procedure for performing the assay shall be as follows:
- (A) Measure 0.2 mL whole blood and add into a 1.8 mL solution of deionized distilled water; mix thoroughly and keep the solution on ice.
- (B) To 2.5 mL of the sodium phosphate buffer, add 0.02 mL of the blood solution, 0.1 mL of DTNB (0.32 mM final concentration) and 0.1 mL of quinidine (0.2 mM final concentration); mix thoroughly and allow to sit for 5 minutes.
- (C) Add 0.3 mL acetylthiocholine iodide (1.0 mM final concentration) into the buffer/sample solution and mix thoroughly.
- (D) Measure absorbance over the linear portion of the enzyme activity curve in the spectrophotometer.
- (4) The procedure for performing butyrylcholinesterase enzyme assay determination shall be as follows:
 - (A) Physical separation of plasma or serum shall be performed.
- (B) If samples are frozen, they shall be thawed at room temperature to assure homogeneity of the sample.
- (C) To 2.6 mL of the sodium phosphate buffer, add 0.02 mL of the plasma or serum and 0.1 mL of DTNB (0.32 mM final concentration), mix thoroughly and allow to sit for 5 minutes.
- (D) Add 0.3 mL acetylthiocholine iodide (1.0 mM final concentration) into the buffer/sample solution and mix thoroughly.
- (E) Measure absorbance over the linear portion of the enzyme activity curve in the spectrophotometer.
- (5) A Buffer Blank containing 2.6 mL of sodium phosphate buffer, 0.3 mL of acetylthiocholine (1.0 mM final concentration), and 0.1 mL of DTNB (0.32 mM final concentration) and 0.02 mL of distilled deionized water shall be run with every batch of assays.
- (6) Reporting units shall be in International Units per milliliter of sample (IU/mL).
- (7) Baseline and follow up assays specified in 6728(c)(2)(A) shall be conducted by the same laboratory method.
- (8) If an assay different from that described above is used, the method shall be shown comparable with the foregoing conditions and a conversion equation prepared. Results shall be reported in International Units per mL on both the original and the converted scale. The conditions to establish comparability shall be as described below.
- (A) Using personnel and procedures acceptable to the Department of Health Services (Business and Professions Code sections 1242, 1243, 1246, 1269, 2070; Health and Safety Code sections 120580, 1607), blood samples shall be collected from at least ten subjects.
- (B) Blood from each subject shall be tested by serial dilution as specified in "Comparison and Acetylcholinesterase Assays Run under Conditions Specified by the Standard Ellman Method and Conditions Specified by a Commercial Cholinesterase Reagent Kit." HS–1752, July 30, 1998, Department of Pesticide Regulation, Worker Health and Safety Branch.
 - (C) Test dilutions shall be made at 100% and 50% of enzyme activity.
- (D) Triplicate samples shall be run by both the reference and the alternative methods.
- (E) Pearson product-moment correlation coefficient squared (r²) shall be at least 0.9 between results of the alternative and reference methods. NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- 2. Editorial correction of subsection (a) (Register 95, No. 8)
- 3. Amendment of subsection (a) and NOTE filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- Amendment of subsection (f) and new subsections (f)(1)–(9) filed 4–29–99; operative 5–29–99 (Register 99, No. 18).
- Repealer of subsection (f)(9) filed 1–20–2000; operative 2–19–2000 (Register 2000, No. 3).

§ 6730. Working Alone.

- (a) An employee mixing, loading or applying a pesticide in toxicity category one for production of an agricultural commodity may not work alone during daylight hours unless personal, radio, or telephone contact is made to a responsible adult at intervals not exceeding two hour.
- (b) An employee mixing, loading or applying a pesticide in toxicity category one for production of an agricultural commodity may not work alone during nighttime hours unless personal, radio, or telephone contact is made to a responsible adult at intervals not exceeding one hour.
- (c) A pilot, mixer-loader, and/or flagger team shall be considered as working together. In the case of two ground applicators working in the same field, no additional person is necessary if they can see each other or each other's application vehicles.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6732. Change Area.

For any employee who regularly handles pesticides with the signal word "DANGER" or "WARNING", and for all employees who handle any pesticides for the commercial or research production of an agricultural plant commodity, the employer shall assure that there is, at the place where employees end their exposure period and remove their personal protective equipment, an area where employees may change clothes and wash themselves. Clean towels, soap, and sufficient water shall be available to allow for thorough washing. The employer shall provide a clean, pesticide–free place where employees may store any personal clothing not in use while at work handling pesticides.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8-1-86; effective thirtieth day thereafter (Register 86, No. 31).
- 2. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- Amendment of section and Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6734. Handler Decontamination Facilities.

- (a) The employer shall assure that sufficient water, soap and single use towels for routine washing of hands and face and for emergency eye flushing and washing of the entire body are available for employees as specified in this section.
- (1) This water shall be of a quality and temperature that will not cause illness or injury when it contacts the skin or eyes or if it is swallowed, and shall be stored separate from that used for mixing with pesticides unless the tank holding water for mixing with pesticides is equipped with appropriate valves to prevent back flow of pesticides into the water.
- (2) One clean change of coveralls shall be available at each decontamination site.
- (b) The decontamination site for employees handling pesticides for the commercial or research production of an agricultural plant commodity shall be at the mixing/loading site and not more than 1/4 mile (or at the nearest point of vehicular access) from other handlers, except that the decontamination site for pilots may be at the loading site regardless of distance from where the pilot is working. The decontamination site shall not be in an area being treated or under a restricted entry interval unless:

- (1) The handlers for whom the site is provided are working in that area being treated or under a restricted entry interval;
- (2) The soap, towels, and extra change of coveralls are in an enclosed container: and
 - (3) The water is running tap water or enclosed in a container.
- (c) One pint of water for emergency eye flushing shall be immediately available (carried by the handler or on the vehicle or aircraft the handler is using) to each employee handling pesticides for the commercial or research production of an agricultural plant commodity if the pesticide product labeling requires protective eyewear.
- (d) The decontamination site for employees handling pesticides for uses other than the commercial or research production of an agricultural plant commodity shall be within 100 feet of the mixing/loading site when they are handling pesticides with the signal word "DANGER" or "WARNING" on the label.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. Amendment of section heading, section and NOTE filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6736. Coveralls.

- (a) The employer shall provide coveralls for each employee who handles any pesticide with the signal word "DANGER" or "WARNING" on the label except as provided in 6738(i).
 - (b) The employer shall assure that:
- (1) Employees start each work day wearing coveralls whenever they handle pesticides with the signal word "DANGER" or "WARNING";
- (2) Employees wear coveralls whenever they handle pesticides with the signal word "DANGER" or "WARNING" except as provided in 6738(i):
- (3) Employees change out of their coveralls and wash at the end of the work day:
- (4) Potentially contaminated coveralls removed at the worksite or headquarters are not taken home by employees; and
- (5) Employees whose work day does not involve return to the employer's headquarters, remove and store potentially contaminated coveralls in a sealable container outside of their own living quarters for later return to the employer.
- (c) This section does not apply to employees using fumigants unless the pesticide product labeling expressly requires the use of coveralls. NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- 2. Editorial correction of printing error in subsection (b)(3) (Register 91, No. 33).
- 3. Amendment of section heading, section and NoTE filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6738. Personal Protective Equipment.

- (a) The employer shall:
- (1) Provide all required personal protective equipment, provide for its daily inspection and cleaning (according to pesticide labeling instructions or, absent any instructions, washed in detergent and hot water), and repair or replace any worn, damaged, or heavily contaminated personal protective equipment. Leather gloves previously used to apply only aluminum phosphide or magnesium phosphide pesticides and which have been aerated for 12 hours or more shall be considered cleaned;
- (2) Assure that all clean personal protective equipment, when not in use, is kept separate from personal clothing and in a pesticide free, specifically designated place;
- (3) Assure that appropriate measures are taken to prevent heat related illness when necessary;
- (4) Assure that personal protective equipment is used correctly for its intended purpose:
- (5) Discard any absorbent materials that have been drenched or heavily contaminated with a pesticide with the signal word "DANGER" or "WARNING";

- (6) Keep and wash potentially contaminated personal protective equipment separately from other clothing or laundry;
- (7) Assure that all clean personal protective equipment is either dried thoroughly before stored or is put in a well ventilated place to dry;
- (8) Assure that personal protective equipment remains the property of the employer and that pesticide handlers are not allowed or directed to take potentially contaminated personal protective equipment into their homes;
- (9) Assure that any person or firm assigned or hired to clean or repair potentially contaminated personal protective equipment is protected and informed in accordance with the requirements of section 6744 (Equipment Maintenance).
 - (b) The employer shall assure that:
- (1) Employees wear protective eyewear when required by pesticide product labeling (except as expressly provided in this section) or when employees are engaged in:
 - (A) Mixing or loading except as provided in 6738(i);
- (B) Adjusting, cleaning, or repairing, mixing, loading, or application equipment that contains pesticide in hoppers, tanks, or lines;
- (C) Application by hand or using hand held equipment, except when:
- 1. Applying vertebrate pest control baits that are placed without being propelled from application equipment;
- 2. Applying solid furnigants (including aluminum phosphide, magnesium phosphide, and smoke cartridges) to vertebrate burrows;
 - 3. Baiting insect monitoring traps; or
 - 4. Applying non-insecticidal lures.
- (D) Ground application using vehicle mounted or towed equipment except when:
 - 1. Injecting or incorporating pesticides into soil;
- 2. Spray nozzles are located below the employee and the nozzles are directed downward; or
 - 3. Working in an enclosed cab; or
 - (E) Flagging, except when the flagger is in an enclosed cab.
- (2) Whenever protective eyewear is required, one of the following types of eyewear is worn:
- (A) Safety glasses that provide front, and supplemental brow and temple protection (Common eyeglasses, including sunglasses, do not meet this requirement);
 - (B) Goggles;
 - (C) Face shield;
 - (D) Full face mask used in conjunction with respiratory protection; or
 - (E) Visor (for aircraft operation only).
 - (c) The employer shall assure that:
- (1) Gloves are worn when required by the pesticide product labeling (except as expressly provided in this section) or (unless the pesticide product labeling specifies that gloves must not be worn), when employees are engaged in:
 - (A) Mixing or loading, except as provided in 6738(i);
- (B) Adjusting, cleaning or repairing contaminated mixing, loading, or application equipment; and
- (C) Application by hand or using hand-held equipment except when applying vertebrate pest control baits using long handled implements that avoid actual hand contact with the bait or potentially contaminated areas on equipment.
- (2) If a specific type of glove is not specified on product labeling for the pesticide being handled, gloves made of rubber, neoprene, or other chemical resistant material that provides equivalent or better protection are used. Gloves or glove linings of leather, cotton, or other absorbent materials shall not be worn unless expressly permitted by pesticide product labeling. If chemical resistant gloves with sufficient durability and suppleness are not available, leather gloves may be worn over chemical resistant gloves liners. Once leather gloves have been used for this purpose, they shall not be worn in any other situation.
 - (d) The employer shall assure that:
- (1) When chemical resistant footwear is specified by the pesticide product labeling, one of the following types of footwear is worn:

- (A) Chemical resistant shoes;
- (B) Chemical resistant boots; or,
- (C) Chemical resistant coverings worn over boots or shoes.
- (2) For aircraft operation, chemical resistant footwear need not be worn.
- (e) The employer shall assure that when chemical resistant headgear is specified by the pesticide product labeling, either a chemical resistant hood or a chemical resistant hat with a wide brim is worn. For aircraft operation, a helmet may be substituted for chemical resistant headgear.
- (f) The employer shall assure that when a chemical resistant apron is specified by the pesticide product labeling, a garment that covers the front of the body from mid-chest to the knees is worn.
 - (g) The employer shall assure that:
- (1) When pesticide product labeling or regulations specify a chemical resistant suit, waterproof or impervious pants and coat or a rain suit, a chemical resistant suit that covers the torso, head, arms, and legs is worn.
- (2) If the ambient temperature exceeds 80°F during daylight hours or 85°F during nighttime hours (sunset to sunrise), pesticides requiring a chemical resistant suit are not handled by employees unless they are handled pursuant to exceptions and substitutions permitted in (h) or employees use cooled chemical resistant suits or other control methods to maintain an effective working environment at or below 80°F during daylight hours or 85°F during nighttime hours (sunset to sunrise).
- (h) The following exceptions and substitutions to personal protective equipment required by pesticide product labeling or regulations are permitted:
- (1) Persons using a closed system to handle pesticide products with the signal word "DANGER" or "WARNING" may substitute coveralls, chemical resistant gloves, and a chemical resistant apron for personal protective equipment required by pesticide product labeling;
- (2) Persons using a closed system to handle pesticide products with the signal word "CAUTION" may substitute work clothing for personal protective equipment required by pesticide product labeling;
- (3) Persons using a closed system that operates under positive pressure shall wear protective eyewear in addition to the personal protective equipment listed in (1) or (2). Persons using any closed system shall have all personal protective equipment required by pesticide product labeling immediately available for use in an emergency;
- (4) Persons properly mixing pesticides packaged in water soluble packets are considered to be using a closed (mixing) system for the purposes of this subsection;
- (5) Persons occupying an enclosed cab (including cockpit) may substitute work clothing for personal protective equipment required by pesticide product labeling. If respiratory protection is required it must be worn, except in an enclosed cockpit;
- (6) Persons occupying an enclosed cab acceptable for respiratory protection may substitute work clothing for personal protective equipment required by pesticide product labeling;
- (7) Persons working in an enclosed cab, as specified in (5) and (6), other than an aircraft, shall have all personal protective equipment required by pesticide product labeling immediately available and stored in a chemical resistant container, such as a plastic bag. Labeling-required personal protective equipment shall be worn if it is necessary to work outside the cab and contact pesticide treated surfaces in the treated area. Once personal protective equipment is worn in the treated area, it shall be removed and stored in a chemical resistant container, such as a plastic bag, before reentering the cab;
- (8) A chemical resistant suit may be substituted for coveralls and/or a chemical resistant apron; and
- (9) Pest control aircraft pilots are not required to wear gloves during operation but gloves shall be worn by any person entering or exiting an aircraft contaminated with pesticide residues. While in the cockpit, gloves shall be carried in a chemical resistant container, such as a plastic bag

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–1–86; effective thirtieth day thereafter (Register 86, No. 31).
- 2. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- 3. Amendment of subsections (a), (b), (c) and (d) filed 8-13-90; operative 8-13-90 (Register 90, No. 41).
- 4. Editorial correction of printing error in subsection (d) (Register 91, No. 33).
- 5. Amendment of subsections (b)(1)(C)4, (c)(3)(C) and NOTE filed 7–6–93; operative 8–5–93 (Register 93, No. 28).
- Amendment of section heading and section filed 12–31–96; operative 1–1–97
 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- 7. Amendment filed 5-10-99; operative 6-9-99 (Register 99, No. 20).
- Amendment of subsection (g)(2), repealer of subsections (h)–(h)(8), subsection relettering and repealer of INFORMATIONAL NOTE filed 6–13–2007; operative 1–1–2008 (Register 2007, No. 24).

§ 6739. Respiratory Protection.

- (a) General Requirements.
- (1) The employer shall assure that:
- (A) Employees use approved respiratory equipment in compliance with this regulation when handling pesticides where respirators are required by label, restricted material permit condition, or regulation.
- (2) In any workplace where respirators are required by label, restricted material permit condition, regulation, or employer, the employer shall establish a written respiratory protection program with work site–specific procedures. The program shall be updated as necessary to reflect those changes in workplace conditions that affect respirator use. The employer shall include in the program the following provisions, as applicable:
 - (A) Procedures for selecting respirators for use in the workplace;
 - (B) Medical evaluations of employees required to use respirators;
 - (C) Fit testing procedures for tight-fitting respirators;
- (D) Procedures for proper use of respirators in routine and reasonably foreseeable emergency situations;
- (E) Procedures and schedules for cleaning, disinfecting, storing, inspecting, repairing, discarding, and otherwise maintaining respirators;
- (F) Procedures to ensure adequate air quality, quantity, and flow of breathing air for atmosphere–supplying respirators;
- (G) Training of employees in the respiratory hazards to which they are potentially exposed during routine and emergency situations, including Immediately Dangerous to Life or Health (IDLH) atmospheres, if appropriate:
- (H) Training of employees in the proper use of respirators, including putting on and removing them, any limitations on their use, and their maintenance; and
- (I) Procedures for evaluating the effectiveness of the program pursuant to subsections (n)(1) and (2).
- 1. The respirator program administrator shall administer the respiratory protection program in compliance with this section.
- 2. The employer shall provide respirators, training, and medical evaluations at no cost to the employee.
 - (b) Voluntary Respirator Provision.
- (1) An employer may provide respirators at the request of employees or permit employees to use their own respirators for use on a voluntary basis, if the employer determines that such respirator use will not in itself create a hazard.
- (2) If the employer determines that any voluntary respirator use is permissible, the employer shall provide the respirator users with the information contained in subsection (r) and display this information alongside the display of either the Hazard Communication Information for Employees Handling Pesticides in Agricultural Settings (Pesticide Safety Information Series leaflet A–8), or Hazard Communication Information for Employees Handling Pesticides in Noncrop Settings (Pesticide Safety Information Series leaflet N–8), at a central location in the workplace.
- (3) Under the employer–supplied voluntary respirator provision, the employer shall establish and implement the provisions of a written respiratory protection program necessary to ensure that any employee using a respirator voluntarily is medically able to use that respirator, and that

- the respirator is cleaned, stored, and maintained so that its use does not present a health hazard to the user. Employers are not required to include a written respiratory protection program for those employees whose only use of respirators involves the voluntary use of filtering facepieces (dust masks).
- (A) The employer shall provide respirators, training, and medical evaluations at no cost to the employee.
- (c) Selection of Respirators. The employer shall select and provide an appropriate respirator certified by the National Institute for Occupational Safety and Health (NIOSH) based on the respiratory hazard(s) and relevant workplace and user factors to which the worker is exposed; and the appropriate pesticide label, restricted materials permit condition, regulation, or employer requirements, whichever is most protective.
- (1) The employer shall select respirators from a sufficient number of respirator models and sizes so that the respirator is acceptable to, and correctly fits, the user.
- (2) Fumigant–confining structures shall be considered IDLH atmosphere unless proven not to be by appropriate measuring devices as to that chemical. The employer shall provide the following respirators for employee use in IDLH atmospheres:
- (A) A full facepiece pressure demand self-contained breathing apparatus (SCBA) certified by NIOSH for a minimum service life of thirty minutes, or
- (B) A combination full facepiece pressure demand supplied—air respirator (SAR) with auxiliary self—contained air supply.
- (C) Respirators provided only for escape from IDLH atmospheres shall be NIOSH-certified for escape from the atmosphere in which they will be used.
- (d) Medical Evaluation. The employer shall ensure a medical evaluation is conducted to determine the employee's ability to use a respirator before the employee is fit tested or required to use the respirator in the workplace. The employer may discontinue an employee's medical evaluations when the employee is no longer required to use a respirator.
 - (1) Medical Evaluation Procedures.
- (A) The employer shall identify a physician or other licensed health care professional (PLHCP) to perform medical evaluations using the medical questionnaire in subsection (q) or an equivalent form or an initial medical examination that obtains the same information as the medical questionnaire.
- (B) The medical evaluation shall obtain the information requested by the questionnaire in subsection (q), sections 1 and 2.
 - (2) Follow-up Medical Examination.
- (A) The employer shall ensure that a follow-up medical examination is provided when a PLHCP determines that there is a need for a follow-up medical examination.
- (B) The follow-up medical examination shall include any medical tests, consultations, or diagnostic procedures that the PLHCP deems necessary to make a final determination.
 - (3) Administration of the Medical Questionnaire and Examinations.
- (A) The medical questionnaire and examinations shall be administered confidentially during the employee's normal working hours or at a time and place convenient to the employee. The medical questionnaire shall be administered in a manner that ensures that the employee understands its content.
- (B) The employer shall provide the employee with an opportunity to discuss the questionnaire and examination results with the PLHCP.
 - (4) Supplemental Information for the PLHCP.
- (A) The employer shall provide the following information to the PLHCP before the PLHCP makes a recommendation concerning an employee's ability to use a respirator:
 - 1. The type and weight of the respirator to be used by the employee;
- 2. The duration and frequency of respirator use (including use for rescue and escape);
 - 3. The expected physical work effort;
 - 4. Additional protective clothing and equipment to be worn; and
 - 5. Temperature and humidity extremes that may be encountered.

- (B) The employer shall not be required to provide any supplemental information provided previously to the PLHCP regarding an employee for a subsequent medical evaluation if the information and the PLHCP remain the same. When the employer replaces a PLHCP, the employer shall ensure that the new PLHCP obtains the information specified in (4)(A)1–5 by having the documents transferred from the former PLHCP to the new PLHCP. Employers are not required to have employees medically reevaluated solely because a new PLHCP has been selected.
- (C) The employer shall provide the PLHCP with a copy of the written respiratory protection program and a copy of this section.
 - (5) Medical Determination.
- (A) The employer shall obtain a written medical recommendation from the PLHCP regarding the employee's ability to use the respirator. The written medical recommendation shall be provided on the form in subsection (s) or provide substantially the same information as follows:
- 1. Any limitations on respirator use related to the medical condition of the employee, or relating to the workplace conditions in which the respirator will be used, including whether or not the employee is medically able to use the respirator;
 - 2. The need, if any, for follow-up medical evaluations; and
- 3. A statement that the PLHCP has provided the employee with a copy of the PLHCP's written medical recommendation.
- (B) If a negative pressure respirator is to be used and the PLHCP finds a medical condition that may place the employee's health at increased risk, the employer shall either provide a powered air purifying respirator (PAPR) provided the PLHCP's medical evaluation finds that the employee can use such a respirator or make changes in the workplace such that respiratory protection is not required. If a subsequent medical evaluation finds that the employee is medically able to use a negative pressure respirator, then the employer shall no longer be required to provide a PAPR.
- (6) Additional Medical Evaluations. The employer shall provide additional medical evaluations that comply with the requirements of this section if:
- (A) An employee reports medical signs or symptoms that are related to their ability to use a respirator;
- (B) A PLHCP, supervisor, or the respirator program administrator informs the employer that an employee needs to be reevaluated;
- (C) Information from the respiratory protection program administrator, including observations made during fit testing and program evaluation, indicates a need for employee reevaluation; or
- (D) A change occurs in workplace conditions including, but not limited to, physical work effort, protective clothing, or temperature, that may result in a substantial increase in the physiological burden placed on an employee.
- (e) Fit Testing. The employer shall assure that employees using a tight-fitting facepiece respirator pass an appropriate qualitative fit test (QLFT) or quantitative fit test (QNFT).
- (1) The employer shall ensure that an employee using a tight-fitting facepiece respirator is fit tested prior to initial use of the respirator whenever a different respirator facepiece (size, style, model or make) is used, and at least annually thereafter.
- (2) The employer shall conduct an additional fit test whenever the employee reports, or the employer, PLHCP, supervisor, or respirator program administrator makes visual observations of changes in the employee's physical condition that could affect respirator fit. Such conditions include, but are not limited to, facial scarring, dental changes, cosmetic surgery, or an obvious change in body weight.
- (3) If after passing a QLFT or QNFT, the employee subsequently notifies the employer, PLHCP, supervisor, or respirator program administrator that the fit of the respirator is unacceptable, the employee shall be given a reasonable opportunity to select a different respirator facepiece and to be retested.
- (4) The fit test shall be administered using either the Cal/OSHA-accepted QLFT or QNFT protocols (Title 8, California Code of Regulations, section 5144, Appendix A), or as recommended by the manufac-

- turer of the respirator, if such recommendations are in accordance with Title 8 CCR section 5144, Appendix A, Part II. QLFT is acceptable for all negative–pressure tight–fitting half or full facepiece respirators used in the application of pesticides.
- (5) If the fit factor, as determined through a Cal/OSHA-accepted QNFT protocol (Title 8, California Code of Regulations, section 5144, Appendix A), is equal to or greater than 100 for tight-fitting half face-pieces, or equal to or greater than 500 for tight-fitting full facepieces, the QNFT has been passed with that respirator.
- (6) Fit testing of tight–fitting atmosphere–supplying respirators and tight–fitting powered air–purifying respirators shall be accomplished by performing quantitative or qualitative fit testing in the negative pressure mode, regardless of the mode of operation (negative or positive pressure) that is used for respiratory protection.
- (A) Qualitative fit testing of these respirators shall be accomplished by temporarily converting the respirator user's actual facepiece into a negative pressure respirator with appropriate filters, or by using an identical negative pressure air–purifying respirator facepiece with the same sealing surfaces as a surrogate for the atmosphere–supplying or powered air–purifying respirator facepiece.
- (B) Quantitative fit testing of these respirators shall be accomplished by modifying the facepiece to allow sampling inside the facepiece in the breathing zone of the user, midway between the nose and mouth. This requirement shall be accomplished by installing a permanent sampling probe onto a surrogate facepiece, or by using a sampling adapter designed to temporarily provide a means of sampling air from inside the facepiece.
- (C) Any modifications to the respirator facepiece for fit testing shall be completely removed, and the facepiece restored to NIOSH–approved configuration, before that facepiece can be used in the workplace.
- (f) Facepiece Seal Protection. A respirator that requires a tight face-to-facepiece seal shall not have any interference with the establishment of this seal. The employer shall ensure that:
- (1) Employees shall not wear a respirator with a tight-fitting facepiece if:
- (A) Facial hair comes between the sealing surface of the facepiece and the face or interferes with valve function; or
- (B) Any physical or mental condition interferes with the face-to-facepiece seal or valve function.
- (2) Corrective glasses or goggles or other personal protective equipment worn by an employee do not interfere with the face—to—facepiece seal.
- (3) Employees perform a user seal check each time they put on the respirator using the Cal/OSHA procedures (Title 8, California Code of Regulations, section 5144, Appendix B–1) or procedures recommended by the respirator manufacturer that the employer demonstrates are as effective as those in the Cal/OSHA procedures when using tight–fitting respirators.
- (4) Appropriate surveillance shall be maintained of work area conditions and degree of employee exposure or stress. When there is a change in work area conditions or degree of employee exposure or stress that may affect respirator effectiveness, the employer shall reevaluate the continued effectiveness of the respirator.
 - (5) Employees shall leave the contaminated area:
- (A) To wash their faces and respirator facepieces as necessary to prevent eye or skin irritation associated with respirator use;
- (B) If they detect vapor or gas breakthrough, changes in breathing resistance, or leakage of the facepiece; or
- (C) To replace or adjust the respirator or the filter, cartridge, or canister elements.
- (6) If the employee detects vapor or gas breakthrough, changes in breathing resistance, or leakage of the facepiece, the employer shall replace or repair the respirator before allowing the employee to return to the work area.
- (g) Procedures for Immediately Dangerous to Life or Health (IDLH) Atmospheres. Fumigant-confining structures shall be considered IDLH

atmosphere unless proven not to be by appropriate measuring devices. For all IDLH atmospheres, the employer shall assure that:

- (1) One employee, or when needed pursuant to (2), more than one employee is located outside the IDLH atmosphere;
- (2) Visual, voice, or signal line communication is maintained between the employee(s) in the IDLH atmosphere and the employee(s) located outside the IDLH atmosphere;
- (3) The employee(s) located outside the IDLH atmosphere is trained and equipped to provide effective emergency rescue;
- (4) The employee(s) located outside the IDLH atmosphere notifies the employer or designee, and/or calls 9–1–1 before entering the IDLH atmosphere to provide emergency rescue. Once notified, the employer or designee authorized to do so by the employer, shall provide necessary assistance appropriate to the situation; and
- (5) Employee(s) located outside the IDLH atmospheres is equipped with:
- (A) Pressure demand or other positive pressure self-contained breathing apparatus (SCBA), or a pressure demand or other positive pressure supplied-air respirator with auxiliary SCBA; and if necessary,
- (B) Appropriate retrieval equipment for removing the employee(s) who enter(s) these hazardous atmospheres where retrieval equipment would contribute to the rescue of the employee(s) and would not increase the overall risk resulting from entry.
- (h) Cleaning and Disinfecting. The employer shall provide each respirator user with a respirator that is clean, sanitary, and in good working order. The employer shall ensure that respirators are cleaned and disinfected using the procedures recommended by the respirator manufacturer. If the manufacturer requires a cleaning agent that does not contain a disinfectant, the respirator components shall be disinfected with a registered disinfectant approved for such use. The employer shall assure that:
- (1) Respirators issued for the exclusive use of an employee shall be cleaned and disinfected as often as necessary to be maintained in a sanitary condition.
- (2) Respirators maintained for emergency use shall be cleaned and disinfected after each use.
- (3) Respirators that are collected and reissued for use of any employee shall be cleaned and disinfected before reissued.
- (4) Respirators are stored to protect them from damage, contamination, dust, sunlight, extreme temperatures, excessive moisture, and damaging chemicals. Respirators shall be packed or stored to prevent deformation of the facepiece and exhalation valve.
 - (i) Storage of Emergency Respirators. Emergency respirators shall be:
 - (1) Stored immediately accessible to the work area.
- (2) Stored in compartments or in covers that are clearly marked as containing emergency respirators.
- (3) Stored in accordance with any applicable manufacturer instruc-
- (4) Stored in such a location as to be safely accessible for use if conditions develop requiring utilization of emergency respiratory protection.
 - (j) Inspection and Repair.
- (1) The employer shall ensure that all respirators are inspected before each use and during cleaning, and that:
 - (A) Routine-use respirator inspections include the following:
- 1. A check of respirator function, tightness of connections, and the condition of the various parts including, but not limited to, the facepiece, head straps, valves, connecting tube, and cartridges, canisters or filters;
- 2. A check of elastomeric parts for pliability and signs of deterioration; and
- 3. SCBA air cylinders are checked to ensure that they are recharged when the pressure falls to 80 percent of the manufacturer's recommended pressure level by the end of any workday.
- (B) Emergency-use respirators are also inspected at least monthly according to the routine-use inspection criteria, and in accordance with the manufacturer's recommendations. For escape-only respirators, also conduct inspection before being brought into the workplace for use. For

both emergency use and escape-only respirators, inspections shall include the following:

- 1. A check for proper function before and after each use;
- 2. Certify by documenting the date the inspection was performed, the name (or signature) of the person who made the inspection, the findings, required remedial action, and a serial number or other means of identifying the inspected respirator; and that this information is included on a tag or label that is attached to the storage compartment for the respirator or is kept with the respirator. This information shall be maintained until replaced following a subsequent certification;
- 3. A check for properly functioning SCBA regulator and warning devices: and
- 4. SCBA air cylinders are checked to ensure that they are maintained at 100 percent manufacturer's recommended capacity.
- (2) The employer shall ensure that respirators that fail an inspection or are otherwise found to be defective shall be removed from service, and discarded, repaired, or adjusted in accordance with the following procedures:
- (A) Repairs or adjustments to respirators shall be made only by persons appropriately trained to perform such operations and shall use only the respirator manufacturer's NIOSH-approved parts designed for the respirator;
- (B) Repairs shall be made according to the manufacturer's recommendations and specifications for the type and extent of repairs to be performed; and
- (C) Reducing and admission valves, regulators, and alarms shall be adjusted or repaired only by the manufacturer or a technician trained by the manufacturer.
 - (k) Breathing Air Quality and Use. The employer shall ensure:
- (1) Compressed breathing air suppliers meet at least the requirements for Grade D breathing air described by the Compressed Gas Association (CGA) Commodity Specification for Air, G-7.1-1997 and certify such with a Certificate of Analysis (original or copy) from the supplier.
- (2) Cylinders shall be tested and maintained as prescribed in the Shipping Container Specification Regulations of the Department of Transportation (49 Code of Federal Regulation part 173 and part 178).
- (3) Compressors used to supply breathing air to respirators are constructed and situated so as to conform to Title 8, California Code of Regulations, section 5144.
- (1) Identification of Filters, Cartridges, and Canisters. The employer shall ensure that all filters, cartridges and canisters used in the workplace are labeled and color-coded with the NIOSH approval label. The label shall remain legible and not be removed.
- (m) Training and Information. In addition to the training requirements specified in section 6724, the employer shall ensure that:
- (1) Each employee can demonstrate knowledge of at least the following:
- (A) Why the respirator is necessary and how improper fit, usage, or maintenance can compromise the protective effect of the respirator;
 - (B) What the limitations and capabilities of the respirator are;
- (C) How to use the respirator effectively in emergency situations, including situations in which the respirator malfunctions;
- (D) How to inspect, put on and remove, use, and check the seals of the respirator;
- (E) What the procedures are for maintenance and storage of the respirators
- (F) How to recognize medical signs and symptoms that may limit or prevent the effective use of respirators; and
- (G) The general requirements of this section.
- (2) Training shall be conducted in a manner that is understandable to the employee.
- (3) Training is provided prior to requiring the employee to use a respirator in the workplace.
- (4) A new employee who has received training within the last 12 months that addresses the elements specified in subsection (m)(1)(A)

- through (G) is not required to repeat such training provided that, as required by subsection (m)(1), the employee can demonstrate knowledge of those element(s). Previous training not repeated initially by the employer must be provided no later than 12 months from the date of the previous training.
- (5) Retraining shall be administered annually, and when the following situations occur:
- (A) Changes in the workplace or the type of respirator render previous training obsolete;
- (B) Inadequacies in the employee's knowledge or use of the respirator indicate that the employee has not retained the requisite understanding or skill: or
- (C) Any other situation arises in which retraining appears necessary to ensure safe respirator use.
- (6) The basic advisory information on respirators specified in (r) is provided in any written or oral format to employees who wear respirators when such use is not required by label, restricted materials permit condition, regulation, or by the employer.
 - (n) Program Evaluation.
- (1) The employer shall conduct evaluations of the workplace as necessary to ensure that the provisions of the current written program are being effectively implemented and that it continues to be effective as required by this section.
- (2) The employer shall annually consult employees required to use respirators to assess the employees' views on program effectiveness and to identify any problems. Any problems that are identified during this assessment shall be corrected. Factors to be assessed include, but are not limited to:
- (A) Respirator fit (including the ability to use the respirator without interfering with effective workplace performance);
- (B) Appropriate respirator selection for the pesticides to which the employee is exposed;
- (C) Proper respirator use under the workplace conditions the employee encounters; and
 - (D) Proper respirator maintenance.
- (3) A written record of these evaluations and consultations shall be documented and at least contain:
 - (A) Name of workers consulted.
 - (B) Date of evaluation/consultation.
- (C) Description of any finding from the evaluation or consultation requiring modification of written respiratory protection program or a declaration of no findings.
- (4) Any findings from either the employer evaluation or the employee consultation that necessitate the modification to the written respiratory protection program shall be implemented within 30 days from the date of the evaluation/consultation.
- (o) End-of-Service Life. When air-purifying respirators are required for protection against pesticides, the employer shall ensure that air-purifying elements (or entire respirator, if disposable type) shall be replaced according to the following hierarchically arranged criteria:
- (1) At the first indication of odor, taste, or irritation while in use, the respirator wearer leaves the contaminated area, adjusts the mask for fit and on returning still encounters odor, taste, or irritation. This criterion item supercedes any of the criteria listed in (2)–(6).
- (2) When any End-of-Service-Life-Indicator (ESLI) indicates that the respirator has reached its end of service;
- (3) All disposable filtering facepiece respirators shall be discarded at the end of the workday;
- (4) According to pesticide–specific label directions/recommendations;
- (5) According to pesticide-specific directions from the respirator manufacturer;
- (6) Absent any pesticide-specific directions/recommendations, at the end of the day's work period;

- (p) Recordkeeping. The employer shall retain written information regarding medical recommendations, fit testing, and the respirator program.
- (1) Records required by this section shall be maintained while the employee is required to use respiratory protection and for three years after the end of employment conditions requiring respiratory protection and shall be available for inspection by the employee, the Director, or commissioner.
 - (2) Fit testing.
- (A) The employer shall establish a record of the qualitative and quantitative fit tests administered to an employee including:
 - 1. The name or identification of the employee tested;
 - 2. Type of fit test performed;
 - 3. Specific make, model, style, and size of respirator tested;
 - 4. Date of test; and
- 5. The pass/fail results for qualitative fit testing or the fit factor and strip chart recording or other recording of the test results for QNFTs.
- (3) A written copy of the current respirator program shall be retained by the employer. Previous versions of the written respirator protection program shall be retained for three years.
- (4) Written information required to be retained under this subsection shall be made available upon request to employees falling under the respiratory protection program and to the commissioner or persons designated by the Director for review and copying.
- (q) Medical Evaluation Questionnaire. The completion of this form, or a form that obtains the same information as the medical questionnaire to the DEPARTMENT OF PESTICIDE REGULATION, by each respirator wearing employee; and the review of the completed form by a physician or licensed health care provider, is mandatory for all employees whose work activities require the wearing of respiratory protection.

The medical evaluation questionnaire shall be administered in a manner that ensures that the employee understands the document and its content. The person administering the questionnaire shall offer to read or explain any part of the questionnaire to the employee in a language and manner the employee understands. After giving the employee the questionnaire, the person administering the questionnaire shall ask the following question of the employee: "Can you read and complete this questionnaire?" If the answer is affirmative, the employee shall be allowed to confidentially complete the questionnaire. If the answer is negative, the employer must provide either a copy of the questionnaire in a language understood by the employee or a confidential reader, in the primarily understood language of the employee.

To the employee:

Can you read (circle): Yes/No (This question to be asked orally by employer. If yes, employee may continue with answering form. If no, employer must provide a confidential reader, in the primarily understood language of the employee.)

Your employer must allow you to answer this questionnaire during normal working hours, or at a time and place that is convenient to you. To maintain your confidentiality, your employer or supervisor must not look at or review your answers, and your employer must tell you how to deliver or send this questionnaire to the health care professional who will review it.

Section 1. (Mandatory, no variance in this format allowed) Every employee who has been selected to use any type of respirator must provide the following information (please print):

1. Today's date://	
2. Your name:	
3. Your age:	
4. Sex (circle one): Male/Female	
5. Your height: ft. in.	
6. Your weight: lbs.	
7. Your job title:	

- 8. How can you be reached by the health care professional who reviews this questionnaire?
- 10. Has your employer told you how to contact the health care professional who will review this questionnaire (circle one): Yes/No
- 11. Check the type of respirator you will use (you can check more than one category):
- a. N, R, or P disposable respirator (filter-mask, noncartridge type only).
 - b. Half-face respirator (particulate or vapor filtering or both)
 - c. Full-face respirator (particulate or vapor filtering or both)
 - d. Powered air purifying respirator (PAPR)
 - e. Self contained breathing apparatus (SCBA)
 - f. Supplied air respirator (SAR)
 - g. Other
 - 12. Have you worn a respirator (circle one): Yes/No
 - If "yes," what type(s):
- a. N, R, or P disposable respirator (filter-mask, noncartridge type only).
 - b. Half-face respirator (particulate or vapor filtering or both)
 - c. Full-face respirator (particulate or vapor filtering or both)
 - d. Powered air purifying respirator (PAPR)
 - e. Self contained breathing apparatus (SCBA)
 - f. Supplied air respirator (SAR)
 - g. Other
- Section 2. (Mandatory) Every employee who has been selected to use any type of respirator must answer questions 1 through 8 below (please circle "yes" or "no").
- 1. Do you currently smoke tobacco or have you smoked tobacco in the last month: Yes/No
 - 2. Have you ever had any of the following conditions?
 - a. Seizures (fits): Yes/No
 - b. Allergic reactions that interfere with your breathing: Yes/No
 - c. Claustrophobia (fear of closed-in places): Yes/No
 - d. Trouble smelling odors: Yes/No/Do not know
 - e. Diabetes (sugar disease): Yes/No/Do not know
- 3. Have you ever had any of the following pulmonary or lung problems?
 - a. Asbestosis: Yes/No
 - b. Asthma: Yes/No
 - c. Chronic bronchitis: Yes/No
 - d. Emphysema: Yes/No
 - e. Pneumonia: Yes/No
 - f. Tuberculosis: Yes/No
 - g. Silicosis: Yes/No
 - h. Pneumothorax (collapsed lung): Yes/No
 - i. Lung cancer: Yes/No
 - i. Broken ribs: Yes/No
 - k. Any chest injuries or surgeries: Yes/No
 - l. Any other lung problem that you have been told about: Yes/No
- 4. Do you currently have any of the following symptoms of pulmonary or lung illness?
 - a. Shortness of breath: Yes/No
- b. Shortness of breath when walking fast on level ground or walking up a slight hill or incline: Yes/No
- c. Shortness of breath when walking with other people at an ordinary pace on level ground: Yes/No
- d. Have to stop for breath when walking at your own pace on level ground: Yes/No
 - e. Shortness of breath when washing or dressing yourself: Yes/No
 - f. Shortness of breath that interferes with your job: Yes/No $\,$
 - g. Coughing that produces phlegm (thick sputum): Yes/No
 - h. Coughing that wakes you early in the morning: Yes/No
 - i. Coughing that occurs mostly when you are lying down: Yes/No

- j. Coughing up blood in the last month: Yes/No
- k. Wheezing: Yes/No
- l. Wheezing that interferes with your job: Yes/No
- m. Chest pain when you breathe deeply: Yes/No
- n. Any other symptoms that you think may be related to lung problems: Yes/No
- 5. Have you ever had any of the following cardiovascular or heart problems?
 - a. Heart attack: Yes/No
 - b. Stroke: Yes/No
 - c. Angina (pain in chest): Yes/No
 - d. Heart failure: Yes/No
 - e. Swelling in your legs or feet (not caused by walking): Yes/No
 - f. Irregular heart beat (an arrhythmia): Yes/No/Do not know.
 - g. High blood pressure: Yes/No/Do not know
 - h. Any other heart problem that you have been told about: Yes/No
- 6. Have you ever had any of the following cardiovascular or heart symptoms?
 - a. Frequent pain or tightness in your chest: Yes/No
 - b. Pain or tightness in your chest during physical activity: Yes/No
 - c. Pain or tightness in your chest that interferes with your job: Yes/No
- d. In the past two years, have you noticed your heart skipping or missing a beat: Yes/No
 - e. Heartburn or indigestion that is not related to eating: Yes/No
- f. Any other symptoms that you think may be related to heart or circulation problems: Yes/No
- 7. Do you currently take medication for any of the following prob
 - a. Breathing or lung problems: Yes/No
 - b. Heart trouble: Yes/No
 - c. Blood pressure: Yes/No
 - d. Seizures (fits): Yes/No
- 8. If you have used a respirator, have you ever had any of the following problems?
- (If you have never used a respirator, check the following space and go to question 9:)
 - a. Eye irritation: Yes/No
 - b. Skin allergies or rashes: Yes/No
 - c. Anxiety: Yes/No
 - d. General weakness or fatigue: Yes/No
 - e. Breathing difficulty: Yes/No
- f. Any other problem that interferes with your use of a respirator: Yes/
- 9. Would you like to talk to the health care professional who will review this questionnaire about your answers to this questionnaire: Yes/No

Questions 10–15 must be answered by every employee who has been selected to use either a fullfacepiece respirator or a self-contained breathing apparatus (SCBA). For employees who have been selected to use other types of respirators, answering these questions is voluntary.

- 10. Have you ever lost vision in either eye (temporarily or permanently): Yes/No
 - 11. Do you currently have any of the following vision problems?
 - a. Wear contact lenses: Yes/No
 - b. Wear glasses: Yes/No
 - c. Color blind: Yes/No
 - d. Any other eye or vision problem: Yes/No
- 12. Have you ever had an injury to your ears, including a broken ear drum: Yes/No
 - 13. Do you currently have any of the following hearing problems?
 - a. Difficulty hearing: Yes/No
 - b. Wear a hearing aid: Yes/No
 - c. Any other hearing or ear problem: Yes/No
 - 14. Have you ever had a back injury: Yes/No
- 15. Do you currently have any of the following musculoskeletal problems?
 - a. Weakness in any of your arms, hands, legs, or feet: Yes/No

Date

- b. Back pain: Yes/No
- c. Difficulty fully moving your arms and legs: Yes/No
- d. Pain and stiffness when you lean forward or backward at the waist: Yes/No
 - e. Difficulty fully moving your head up or down: Yes/No
 - f. Difficulty fully moving your head side to side: Yes/No
 - g. Difficulty bending at your knees: Yes/No
 - h. Difficulty squatting to the ground: Yes/No
- i. Difficulty climbing a flight of stairs or a ladder carrying more than 25 lbs: Yes/No
- j. Any other muscle or skeletal problem that interferes with using a respirator: Yes/No

At the discretion of the PLHCP, if further information is required to ascertain the employee's health status and suitability for wearing respiratory protection, the PLHPC may include and require the questionnaire found in Title 8, California Code of Regulations, section 5144, Appendix C, Part B, Questions 1–19.

(r) Voluntary Respirator Provision Information. The employer shall ensure that the following information is provided to employees who voluntarily wear a respirator when not required to do so by label, restricted materials permit condition, regulation, or employer.

Information for Employees Using Respirators When Not Required By Label or Restricted Material Permit Conditions or Regulation.

Respirators are an effective method of protection against designated hazards when properly selected and worn. Respirator use, even when exposures are below the exposure limit, may provide an additional level of comfort and perceived protection for workers. However, if a respirator is used improperly or not kept clean, the respirator itself can become a hazard to the worker. Sometimes, workers may wear respirators to avoid exposures to hazards, even if the amount of hazardous substance does not exceed the limits set by OSHA standards or Department of Pesticide Regulation guidelines. If your employer provides respirators for your voluntary use, or if you provide your own respirator, you need to take certain precautions to be sure that the respirator itself does not present a hazard.

You should do the following:

- 1. Read and follow all instructions provided by the manufacturer on use, maintenance, cleaning and care, and warnings regarding the respirators limitations.
- 2. Choose respirators certified for use to protect against the contaminant of concern. NIOSH, the National Institute for Occupational Safety and Health of the U.S. Department of Health and Human Services, certifies respirators. A label or statement of certification should appear on the respirator or respirator packaging. It will tell you what the respirator is designed for and how much it will protect you.
- 3. Do not wear your respirator into atmospheres containing contaminants for which your respirator is not designed to protect against. For example, a respirator designed to filter dust particles will not protect you against gases, vapors, or very small solid particles of fumes or smoke.
- 4. Keep track of your respirator so that you do not mistakenly use someone else's respirator.
- 5. Air filtering respirators DO NOT supply oxygen. Do not use in situations where the oxygen levels are questionable or unknown.

(s) Medical Recommendation Form. A physician or other licensed health care professional's report of evaluation and approval for respirator use must be on file with the employer before work requiring respirator use is allowed. The following or substantially similar statement from a physician is acceptable:

, I evaluated

Date	Patient's name
At this time there (are)/(are no	ot) medical contraindications to the em-
	spirator while working in potential pes-
•	he patient (does)/(does not) require fur-
	time. Any restrictions to wearing a atory protection are given below.
I have provided the above–na	med patient with a copy of this form.

Physician

INFORMATIONAL NOTE for section 6739: Employers requiring employees to enter oxygen–deficient atmospheres shall conform to respiratory protection requirements in Title 8, California Code of Regulations, section 5144. Oxygen–deficient atmospheres contain less than 19.5 percent oxygen by volume.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. New section filed 6-13-2007; operative 1-1-2008 (Register 2007, No. 24).

§ 6740. Adequate Light.

Whenever natural light in mixing/loading area is not adequate to allow an employee to read the label and work in a safe manner, artificial light shall be provided in such areas which is sufficient to perform these activities.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6742. Safe Equipment.

- (a) The employer shall assure that equipment used for mixing, loading, transferring, or applying pesticides is inspected before each day of use and equipment with any safety defect is repaired or altered to remove the hazard before further use.
- (b)(1) All openings on tanks used for mixing or applying pesticides shall be equipped with covers that will prevent splashes and spills.
- (2) Flexible hoses carrying liquid pesticides in toxicity categories one or two under pressure shall not pass unshielded through the cockpit of an airplane or helicopter.
- (3) Shut-off devices shall be installed on the exit end of all hoses carrying liquid pesticides in toxicity categories one or two from mixing tanks that are adequate to prevent splashes onto the employee doing the loading when filling operations are stopped and the filler hose is removed from

[The next page is 424.3.]

• · the inlet to the tank of the application vehicle. As an alternative, a reversing action pump or a similar system may be used that will empty the hose and will eliminate dripping of liquid from the end of the hose when the filling operation is stopped.

- (4) Each tank with a capacity of more than 49 gallons that is used to mix or apply any liquid mixture derived from a pesticide in toxicity categories one or two, shall have either,
- (A) a properly functioning means to indicate externally the internal liquid level in the tank such as a sight gauge; or
- (B) the tank or the filler hose nozzle shall have a device that will automatically stop the filling operation before the pesticide liquid mixture spills over the top.

HISTORY

- 1. Amendment of subsection (b)(1) filed 8–1–86; effective thirtieth day thereafter (Register 86, No. 31).
- 2. Editorial correction of printing error in subsection (b) (Register 91, No. 33).
- Amendment of subsection (a) and NoTE filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6744. Equipment Maintenance.

Persons who own or operate pesticide mixing, loading, or application equipment shall inform each employee under their control who may be involved in the cleaning, servicing or repair of that equipment of the hazards of the pesticides that person may encounter and the methods of protecting against personal injury. If such cleaning, servicing or repairing is to be performed by persons not under the control of the owner or operator of the equipment, he shall so notify the person in charge of performing these services. Employees who clean, service, or repair mixing and application equipment shall be provided with any necessary protective equipment or clothing by their employer, and shall be instructed and supervised in the maintenance operation in a manner that will reduce work hazards.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

 Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6746. Closed Systems.

- (a) Employers shall provide closed systems for employees that mix or load liquid pesticides in toxicity category one, or load diluted liquid mixes derived from dry pesticides in toxicity category one, for the production of an agricultural commodity. No employee shall be permitted to transfer, mix, or load these pesticides except through a closed system. The system's design and construction shall meet the director's closed system criteria.
 - (b) The requirements of this section do not apply to:
- (1) employees who handle a total of one gallon or less of pesticides in toxicity category one per day exclusively in original containers of one gallon or less; or
- (2) regulatory personnel collecting samples of pesticides according to official sampling procedures.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- Amendment filed 8-1-86; effective thirtieth day thereafter (Register 86, No. 31).
- 2. Amendment filed 9–26–88; operative 10–26–88 (Register 88, No. 41).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 3. Field Worker Safety

§ 6760. Employer Responsibility and Exceptions.

(a) Employers shall comply with the requirements of this article to protect employees who may enter treated fields.

- (b) If only granular baits or attractants or repellents in traps have been applied in a field, the employer is exempt from the requirements of Sections 6762 (Field Work During Application), 6764 (Fieldworker Training), 6766(a) and (b) (Emergency Medical Care), 6768 (Decontamination Facilities), 6770 (Entry After Pesticide Application), 6771 (Requirements for Early Entry Fieldworkers), 6772 (Restricted Entry Intervals), 6774 (Reentry Interval Adjustments), and 6776 (Field Posting).
- (c) Pesticide applications for areawide public pest control programs sponsored by governmental agencies, such as for fruit fly eradication, and those made by vector control agencies operating under cooperative agreements with the State Department of Health Services pursuant to Section 116180 of the Health and Safety Code, and contractors of those agencies, are exempt from the requirements of this article.
- (d) If only algaecides have been used to treat the irrigation system, the employer is exempt from the requirements of Sections 6762 (Field Work During Application), 6764 (Fieldworker Training), 6766(a) and (b) (Emergency Medical Care), 6768 (Decontamination Facilities), 6770 (Field Entry After Pesticide Application), 6771 (Requirements for Early Entry Fieldworkers), 6772 (Restricted Entry Intervals), 6774 (Restricted Entry Interval Adjustments) and 6776 (Field Posting).
- (e) If pesticides have been applied only by injection directly into plants the employer is exempt from the requirements of this article. Direct injection does not include "hack and squirt" methods.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a), renumbering and amendment of Section 6712 to Section 6760(c), renumbering and amendment of Section 6770(h) to Section 6760(d) and new subsection (e) filed 9–26–88; operative 10–26–88 (Register 88, No. 41).
- 2. Amendment of section heading, section and Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6761. Hazard Communication for Field Workers.

- (a) Whenever employees are working as field workers in a treated field, the employer shall display at the worksite, a copy of a completed written Hazard Communication Information for Employees Working in Fields (Pesticide Safety Information Series leaflet A–9). In the event that fieldworkers gather at a central location prior to transportation to the worksite, the Pesticide Safety Information Series leaflet A–9 may instead be displayed at that central location. Pesticide Safety Information Series leaflet A–9 shall be written by the department in English and Spanish. Upon request, the employer shall read to the requesting employee, in a language understandable to that employee, Pesticide Safety Information Series leaflet A–9. Pesticide Safety Information Series leaflets are available from the Department.
- (b) The operator of the property shall maintain in a central location at the workplace accessible to employees, including the employees of labor contractors, who enter a treated field, the following:
- (1) pesticide use records specified in Section 6624 (b), (c), (d) and (e) for pesticides that have been applied to the field within the last two years;
- (2) a Material Safety Data Sheet (MSDS), as specified in Title 8, California Code of Regulations, section 5194, for each pesticide listed in the pesticide use records referred to in subsection (b)(1). If the MSDS is not provided by the registrant of a pesticide, the operator of the property shall:
- (A) within seven working days of a request for a MSDS from an employee, employee representative or employee's physician, make written inquiry to the registrant of the pesticide, asking that a MSDS be sent to the operator of the property. If the operator of the property has made a written inquiry within the last twelve months as to whether the pesticide is subject to the requirement for a MSDS or the operator of the property has made a written inquiry within the last six months requesting new, revised or later information on the MSDS, the operator of the property need not make additional written inquiry. A copy of the written inquiry shall immediately be sent to the person requesting the MSDS;

- (B) notify the requester of the availability of the MSDS or provide a copy of the MSDS to the requester within fifteen days of receipt of the MSDS from the registrant; and
- (C) if a response has not been received from the registrant within twenty—five working days of the date the inquiry was made, send the Department a copy of the inquiry with a notation that no response has been received. The operator of the property is not precluded from obtaining and providing the MSDS utilizing other more expedient methods in lieu of those provided in this subsection.
- (c) The operator of the property shall inform his or her employees, before they are allowed to enter a treated field, of the location and availability of any records and other documents required by subsections (a) and (b). If the employees are employed by a labor contractor, the operator of the property shall inform the labor contractor of the location, or changed location, of the records and other documents. The labor contractor shall provide that information to his or her employees. If the location of the records and other documents changes, the operator of the property and the labor contractor shall promptly inform his or her employees of the new location. The employer, including the labor contractor, shall also inform their employees that they, their physicians and their representatives have a right of access to the information and that the employees are protected against discharge or other discrimination due to the exercise of their rights under this section.
- (d) The operator of the property shall provide, upon request of his or her employee, an employee of a labor contractor, employee representative, or an employee's physician, access to any records, documents and information required to be maintained by this chapter. Access shall be granted as soon as possible and not to exceed forty—eight hours from the date of the request.

INFORMATIONAL NOTE: Other requirements relating to hazard communication can be found in Sections 6602, 6618, 6619, 6724, 6726, 6738, 6744, 6764, 6766, 6770, and 6776.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code; and 29 Code of Federal Regulations, Part 1910.1200.

HISTORY

- 1. New section filed 12-6-91; operative 1-1-92 (Register 92, No. 13).
- 2. Amendment of section and Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6761.1. Application-Specific Information for Fieldworkers.

- (a) The operator of property used for the commercial or research production of an agricultural plant commodity shall display at a central location the following application–specific information, while employees are employed to work in fields:
 - (1) Identification of the treated area;
 - (2) Time and date of the application;
 - (3) Restricted entry interval; and
 - (4) Product name, EPA registration number, and active ingredients.
- (b) The information shall be displayed within 24 hours of the completion of an application and include all applications that have been made to any treated field on the agricultural establishment within 1/4 mile of where employees will be working. The information shall remain displayed until the area no longer meets the definition of a treated field or fieldworker employees will no longer be on the establishment, whichever occurs earlier.
- (c) The original or copies of documents otherwise required to be maintained by this chapter may be used to meet the requirements of this section, provided they contain the information required by this section.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 11501, 12973, 12980 and 12981, Food and Agricultural Code.

HISTORY

1. New section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6762. Field Work During Pesticide Application.

- (a) The requirements of this section are minimum requirements established by the U. S. Environmental Protection Agency and do not assure compliance with the general standard in section 6614.
- (b) No employer shall direct or allow any person, other than the persons making the application, to enter or remain in a treated area of a farm or forest during the application.
- (c) No employer shall direct or allow any person, other than the persons making the application, to enter or remain in treated nurseries or greenhouses, as specified below.
 - (1) If the pesticide is applied in a nursery:
- (A) By aircraft, in an upward direction, or at a pressure of more than 150 pounds per square inch, or is applied as a fumigant, smoke, fog, or aerosol, the prohibited area is the treatment site plus 100 feet in all directions within the confines of the property.
- (B) If the pesticide is applied downward from a height greater than 12 inches from the soil or other planting medium, as a fine spray, or using a pressure of more than 40 pounds per square inch, but not more than 150 pounds per square inch, or which requires respiratory protection on the product labeling, the prohibited area is the treatment site plus 25 feet in all directions within the confines of the property.
 - (2) If the pesticide is applied in a greenhouse:
- (A) As a space treatment (fumigant, smoke, fog, aerosol or mist) or is a pesticide for which the product labeling requires respiratory protection, the prohibited area, until ventilation criteria have been met, is the entire enclosed area plus any adjacent area that is not sealed (sufficient to prevent pesticide transfer) from the treatment site.
- (B) As a spray from a height greater than 12 inches from the soil or other planting medium, as a fine spray, or using a pressure of more than 40 pounds per square inch, the prohibited area is the treatment site plus 25 feet in all directions within the enclosed area.
- (3) Otherwise, in both nurseries and greenhouses, the prohibited area is the treatment site.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. Amendment of section and Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6764. Fieldworker Training.

- (a) The employer shall assure that each employee assigned to work in a treated field has been trained within the last 5 years, in a manner the employee understands, before beginning work in the treated field.
 - (b) The training shall include the following information:
- (1) Importance of routine decontamination and washing thoroughly after the exposure period;
- (2) Restricted entry intervals and what posting means, including both California and federal field posting sign formats;
- (3) Where pesticides are encountered, including treated surfaces in the field, residues on clothing, chemigation and drift;
 - (4) Routes of exposure;
- (5) The hazards of pesticides, including acute effects, chronic and delayed effects, and sensitization effects;
 - (6) Common signs and symptoms of overexposure;
- (7) First aid including decontamination, eye flushing, and obtaining emergency medical care;
 - (8) Warnings about taking pesticides or pesticide containers home;
- (9) The hazard communication program requirements of section 6761; and
 - (10) Employee rights, including the right;
- (A) To personally receive information about pesticides to which he or she may be exposed;
- (B) For his or her physician or employee representative to receive information about pesticides to which he or she may be exposed; and
- (C) To be protected against retaliatory action due to the exercise of any of his or her rights.

- (c) An employee who holds a valid personal pesticide license or certificate issued by the department, a valid verification of training card issued under the authority of the U. S. Environmental Protection Agency, current documented pesticide handler training pursuant to section 6724, or other valid certificate of pesticide training approved by the director is considered to be trained for the purposes of this section.
- (d) The information shall be presented in a manner the employee can understand, orally from written materials or audio visually, using non-technical terms. The trainer shall respond to employee questions.
- (e) The person conducting the training shall be qualified as one of the following:
 - (1) A California certified applicator;
- (2) A person holding any other valid license or certificate of personal pesticide qualification issued by the department;
- (3) A person who has completed an "instructor training" program presented by one of the following:
- (A) the University of California, Integrated Pest Management Program, after January 1, 1993;
 - (B) other instructor training program approved by the director.
 - (4) A California Registered Professional Forester;
- (5) A person holding a valid County Biologist License in Pesticide Regulation or Investigation and Environmental Monitoring issued by the California Department of Food and Agriculture;
- (6) A farm adviser employed by the University of California Extension Office; or
- (7) Other valid trainer qualification approved by the director.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- Amendment of section heading, repealer and new section, and amendment of Note filed 12-31-96; operative 1-1-97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6766. Emergency Medical Care.

- (a) Emergency medical care for employees that enter fields that have been treated with pesticides shall be planned for in advance. The employer shall locate a facility where emergency care is available for employees who will be working in treated fields.
- (b) The employees or their supervisor in the field shall be informed of the name and location of a physician or medical facility where emergency medical care is available, and if the identified facility is not reasonably accessible from that work location, the procedures to be followed to obtain emergency medical care.
- (c) When there are reasonable grounds to suspect that an employee has a pesticide illness or when an exposure to a pesticide has occurred that might reasonably be expected to lead to an employee's illness, the employer shall ensure that the employee is taken to a physician immediately. NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- 2. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6768. Fieldworker Decontamination Facilities.

(a) The employer shall assure that sufficient water (of a quality and temperature that will not cause illness or injury when it contacts the skin or eyes or if it is swallowed), soap, and single use towels for washing of hands and face and for emergency eye flushing are reasonably accessible to all fieldworkers engaged in activities involving contact with treated surfaces in treated fields. The decontamination facilities shall be not more than 1/4 mile from the fieldworkers (or at the nearest point of vehicular access). Handwashing facilities provided in conjunction with toilet facilities pursuant to Title 8 California Code of Regulations, section 3457 (Field Sanitation), shall be considered adequate for the purposes of this section.

(b) The decontamination facilities shall not be in an area under a restricted entry interval unless the fieldworkers for whom the site is provided are performing early entry activities. The facilities shall not be in an area under treatment.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. Amendment of section heading, section and NOTE filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6769. Greenhouse Ventilation Criteria.

When a pesticide with product labeling requiring respiratory protection for application is applied by any method, or when any pesticide is applied as a furnigant, smoke, mist, fog, or aerosol inside a greenhouse, ventilation shall continue until:

- (a) The concentration is measured and found not to exceed any pesticide product labeling standard; or
 - (b) One of the following has occurred if there is no labeling standard:
 - (1) Ten air exchanges are complete;
 - (2) Two hours of mechanical ventilation, such as with fans;
- (3) Four hours of passive ventilation, such as opening vents, windows, or doors:
 - (4) Twenty-four hours with no ventilation; or
- (5) Any combination of percentage portions of (1), (2), (3), and (4) the sum of which equals 100%.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. New section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6770. Field Entry After Pesticide Application.

- (a) The employer shall not allow or direct any employee to enter or remain in a treated field before the restricted entry interval stated on pesticide product labeling or listed in section 6772 has expired except as provided in this section or otherwise expressly authorized by the director pursuant to Title 40 Code of Federal Regulations, Part 170.112(d) or (e).
- (b) Employees may enter a treated field during a restricted entry interval to conduct pesticide handling activities, including soil incorporation (mechanical or watered-in), provided they are wearing the personal protective equipment specified on the pesticide product labeling for handling activities.
- (c) An employee may enter a treated field during a restricted entry interval when there will be no contact with anything that has been treated, including soil, water, air, equipment, or plant surfaces, provided that inhalation exposure does not exceed any pesticide product labeling standard or, for greenhouses, the ventilation criteria in section 6769 have been met. Operating tractors or other equipment from inside an enclosed cab or when shields or other control methods, such as operator placement, physically prevent contact of the employee with anything that has been treated is considered to be a "no contact" activity for the purposes of this section.
- (d) An employee may enter a treated field during a restricted entry interval specified on pesticide product labeling to conduct limited contact activities (including limited contact irrigation) that are necessary and unforeseen, provided that:
- (1) The restricted entry interval is not for a pesticide product with the requirement on the labeling for both oral notification of workers and the posting of treated fields (double notification);
 - (2) At least 4 hours have elapsed since the end of the application;
- (3) Inhalation exposure does not exceed the applicable pesticide product labeling standard or the ventilation criteria in section 6769 have been met:
- (4) Exposure is minimal and limited to the feet, legs (below the knees), hands, and forearms (below the elbows);
- (5) The personal protective equipment specified on pesticide product labeling for early entry or the optional personal protective equipment of coveralls, socks, chemical resistant footwear, chemical resistant gloves,

and protective eyewear (if required by the pesticide product labeling) is utilized:

- (6) The time in treated fields under a restricted entry interval does not exceed 8 hours in any 24 hour period for each employee entering under this exception; and
- (7) The employees are informed that this exception is being used and about the provisions of (2), (3), and (6) orally or by posting notice.
- (8) This exception may not be used if the supporting exception granted by the U. S. Environmental Protection Agency is not in effect.
- (e) An employee may enter a treated field during a restricted entry interval specified on pesticide product labeling to conduct other activities, not included in (b), (c), and (d) that do not involve hand labor provided that:
 - (1) At least 4 hours have elapsed since the end of the application;
- (2) Inhalation exposure does not exceed any pesticide product labeling standard or the ventilation criteria in section 6769 have been met;
- (3) The personal protective equipment specified on pesticide product labeling for early entry is used; and
- (4) Entry does not exceed 1 hour in any 24-hour period for any employee.
- (f) An employee may enter a treated field after the expiration of the restricted entry interval specified on pesticide product labeling and while a restricted entry interval specified in section 6772 is in effect as provided below:
- (1) To conduct activities, other than hand labor, provided that employees are wearing work clothing with long sleeves and legs, shoes with socks, and gloves.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–15–86; effective thirtieth day thereafter (Register 86, No. 34)
- 2. Amendment of subsections (a)–(f) and renumbering and amendment of subsection (h) to Section 6760(d) filed 9–26–88; operative 10–26–88 (Register 88, No. 41)
- Amendment of subsections (d) and (g) filed 8–13–90; operative 8–13–90 (Register 90, No. 41).
- 4. Repealer and new section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6771. Requirements for Early Entry Fieldworkers.

- (a) The employer shall assure that early entry fieldworkers are informed of pesticide product labeling requirements related to human hazards or precautions, first aid, symptoms of poisoning, use and care of personal protective equipment required for early entry into treated fields, the prevention, recognition, and first aid for heat—related illness, and the importance of washing thoroughly at the end of the exposure period.
- (b) The employer shall provide all required personal protective equipment and provide for its cleaning (according to pesticide labeling instructions or, absent any instructions, washed in detergent and hot water), repair and replacement when it cannot be adequately cleaned or properly repaired. All personal protective equipment shall be inspected before each day of use. The employer shall assure that all personal protective equipment is kept separate from personal clothing, in a pesticide free,

specifically designated place, when not in use. All required personal protective equipment required for fieldworker employees shall meet the applicable standards in section 6738.

- (c) The employer shall assure that personal protective equipment is used correctly for its intended purpose.
- (d) The employer shall assure that cleaned personal protective equipment is dried or stored in a well ventilated place to dry. The employer shall assure that contaminated personal protective equipment is kept and washed separately from other clothing or laundry.
- (e) Personal protective equipment shall remain the property of the employer. Early entry fieldworkers shall not be allowed or directed to take home pesticide contaminated personal protective equipment. The employer shall inform any person who cleans or launders personal protective equipment that the equipment may be contaminated, about the hazards presented, and how to properly handle and clean it.
- (f) The employer shall assure that at least one pint of eyeflush water is immediately accessible (carried by the fieldworker or on the vehicle the fieldworker is using) to each fieldworker who is performing, during any restricted entry interval specified on pesticide product labeling, early entry aclivities in a treated field for which the pesticide product labeling requires protective eyewear.
- (g) The employer shall assure that early entry fieldworkers engaged in tasks pursuant to section 6770(d) and (e) are provided, at the place where they remove personal protective equipment, sufficient water, soap, and clean towels so that they may wash thoroughly at the end of the exposure period.
- (h) The employer shall assure that a clean, pesticide—free place for storing personal clothing and putting on personal protective equipment at the start of work and taking off personal protective equipment at the end of the exposure period is provided for early entry fieldworkers
- (i) The employer shall take appropriate measures to prevent heat related illness, when necessary.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

1. New section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6772. Restricted Entry Intervals.

- (a) The restricted entry intervals specified in this section shall be applied according to the following:
- (1) Other restricted entry intervals are found on pesticide product labeling. In case of an inconsistency between the pesticide product labeling and this section, the longer restricted entry interval shall be followed:
- (2) If more than one restricted entry interval in this section is applicable to a given situation, the longer restricted entry interval shall apply, except as provided in section 6774;
- (3) When reference is made to pounds of a pesticide in a restricted entry interval, the reference means pounds of active ingredient;
- (4) A day is considered to be a 24—hour period beginning at the conclusion of the application to the identified field or portion of a field.
- (b) The restricted entry intervals in days in the following table apply to the pesticide/crop combinations listed.

Crop Pesticide	Apples	Citrus	Corn	Grapes	Peaches/Nectarines	Other Crops
Azinphos-methyl	14(B)	30		21	14(B)	14(A), (B)
Chlorpyriphos		2				
Diazinon		5		5	5	
Endosulfan	2	2	2	2	2	2
Malathion		1		1	1	
Methidathion (Supracide)		30				
Methomyl (Lannate)				7(C)		
Parathion-methyl (non-encapsulated)	14	14(D)	14(D)	14(E)	21	14(D)
Phorate (Thimet)		` '	Ì Î			, ,
Phosmet (lmidan)				5	5	
Propargite (Omite/Comite)	21	42	7	30	21	21(F)(G)
Sulfur				3(H)		• / / /

Footnotes:

- (A) This restricted entry interval for other crops applies to stone fruit, such as apricots, cherries, plums, and prunes, and pome fruit, such as pears, only. Stone fruit does not include almonds and other nut crops.
- (B) If the total Azinphos-methyl applied in the current calendar year is 1.0 pounds per acre or less, thinning may be done after 7 days.
- (C) Applications of methomyl made after August 15 have a 21 day restricted entry interval. This interval may be terminated after 10 days if leaf samples tested pursuant to section 6774(c)(4) show 0.1 micrograms per square centimeter or less of dislodgeable foliar residue of methomyl.
- (D) This restricted entry interval applies only when more than one pound per acre of non-encapsulated parathion-methyl is applied.
- (E) The restricted entry interval for non-encapsulated parathion-methyl on grapes in Monterey County is 6 days.
- (F) The restricted entry interval for strawberries and field grown roses treated with propargite is 3 days.
- (G) The restricted entry interval for cotton fields treated with propargite is 7 days. However, from the end of the restricted entry interval until the beginning of harvest, the employer shall assure that employees entering propargite treated cotton fields wear work clothing with long sleeves and legs and gloves.
- (H) This restricted entry interval for sulphur applies from May 15 through harvest in the counties of: Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare; and during March and April in Riverside County.

INFORMATIONAL NOTE FOR SECTION 6772: The inclusion of a reentry interval in this section does not imply that the use of a pesticide is currently registered. Consult the pesticide product labeling for permitted registered uses.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (c) filed 5-15-86 as an emergency; effective upon filing (Register 86, No. 20). Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 9-12-86.
- 2. Amendment of subsection (c) filed 5-22-86 as an emergency; effective upon filing (Register 86, No. 23). Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 9-19-86.
- 3. Amendment filed 8–15–86; effective thirtieth day thereafter (Register 86, No. 34). This supersedes language from 5–15–86 emergency orders.
- Amendment filed 6–3–88 as an emergency; operative 6–3–88 (Register 88, No. 24). Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 10–3–88.
- 5. Amendment filed 9-26-88; operative 10-26-88 (Register 88, No. 41).
- Amendment of table and new footnotes (q) and (r) filed 10–27–88 as an emergency; operative 10–27–88 (Register 88, No. 45). Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 2–24–89.
- 7. Amendment of subsection (b) filed 2-14-89 as an emergency; operative 2-14-89 (Register 89, No. 9). Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 6-14-89.
- 8. Change without regulatory effect of subsection(a) filed 2–27–89 (Register 89, No. 9).
- Readoption of amendment substantially equivalent to emergency amendment of 10-27-88 filed 2-24-89 as an emergency; operative 2-24-89 (Register 89, No. 13). A Certificate of Compliance must be transmitted to OAL by 6-26-89 or readoption will be repealed by operation of law effective 6-27-89 and regulation will revert to text in effect prior to 10-27-89.
- 10. Amendment of subsection (a) and footnote (j) filed 6–29–89 as an emergency; operative 6–29–89 (Register 89, No. 27). Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 10–27–89.
- 11. Amendment of subsections (a) and (b) substantially equivalent to emergency amendments of 2–14–89 and 2–24–89 filed 8–10–89 as an emergency; operative 8–10–89 (Register 91, No. 19). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed by operation of law on 12–8–89.
- 12. Amendment of subsection (a) and footnote (j) filed 5-14-90; operative 5-14-90 (Register 90, No. 24). This supersedes language from 6-3-88 and 6-29-89 emergency order.
- 13. Amendment of subsections (a) and (b) and footnotes (q) and (r) filed 8–13–90; operative 8–13–90 (Register 90, No. 41). This supersedes language from 10–27–88, 2–14–89, and 2–24–89 emergency orders.
- 14. Editorial correction of history notes 3., 11., and 12. (Register 90, No. 41).
- 15. Editorial correction of footnotes (c), (d), (f), (g) and (j) (Register 91, No. 19).
- 16. Editorial correction adding previously missing HISTORY 11. and renumbering former HISTORYs 11., 12., and 13. to HISTORYs 12., 13., and 14. (Register 91, No. 19).
- 17. Repealer and new section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

- Editorial correction restoring inadvertently omitted footnotes and NOTE (Register 97, No.11).
- 19. Change without regulatory effect amending table and footnote (D) filed 10–2–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 40).
- 20. Amendment of subsection (b) (Azinphos-methyl listing in table and footnotes (A) and (B)) filed 6-1-98 as an emergency; operative 6-1-98 (Register 98, No. 23). A Certificate of Compliance must be transmitted to OAL by 9-29-98 or emergency language will be repealed by operation of law on the following day.
- 21. Reinstatement of section as it existed prior to 6–1–98 emergency amendment by operation of Government Code section 11346.1(f) (Register 98, No. 42).
- 22. Editorial correction of Azinphos-methyl listing in table (Register 99, No. 16).
- 23. Amendment of footnote A filed 4–14–99 as an emergency; operative 4–14–99 (Register 99, No. 16). A Certificate of Compliance must be transmitted to OAL by 8–12–99 or emergency language will be repealed by operation of law on the following day.
- 24. Amendment of footnote A refiled 8–11–99 as an emergency; operative 8–11–99 (Register 99, No. 33). A Certificate of Compliance must be transmitted to OAL by 12–9–99 or emergency language will be repealed by operation of law on the following day.
- 25. Reinstatement of section as it existed prior to 4–14–99 emergency amendment by operation of Government Code section 11346.1(f) (Register 2000, No. 23).
- 26. Amendment of footnote A filed 9–29–2000; operative 10–29–2000 (Register 2000, No. 39).

§ 6774. Restricted Entry Interval Adjustments.

- (a) The adjustments in this section apply only to restricted entry intervals specified in section 6772.
- (b) Whenever a mixture of two or more organophosphate pesticides is applied, the restricted entry interval shall be lengthened by adding to the longest applicable restricted entry interval listed in 6772, 50 percent of the next longest applicable restricted entry interval.
- (c) When there is no foliage on the plant that has been treated by a pesticide and any crop or weed cover in the treated area is not over 4 inches in height, the restricted entry interval shall be reduced by 50 percent, but in no case to less than the restricted entry interval specified on the pesticide product labeling.
- (d) A restricted entry interval may be shortened to not less than the restricted entry interval specified on the pesticide product labeling upon verification by the county agricultural commissioner that one of the following has occurred:
- (1) two inches of rainfall within any seven—day period following the pesticide application;
- (2) the equivalent of two inches of rainfall has been applied evenly above all plants by sprinkler irrigation equipment within any seven-day period following the pesticide application;
- (3) for tree crops, at least 50 gallons of water has been applied at one time under pressure and evenly distributed to each tree; or
- (4) the plants have been tested by a procedure acceptable to the director and determined to have no residues or to have residue levels that the director considers not to be hazardous.
- (e) Whenever the pesticide product labeling specifies that a restricted entry interval be adjusted when outdoor applications are made in areas that receive less than 25 inches of average annual rainfall, the restricted entry interval specified for the dry areas shall apply to all outdoor applications in the State. A county agricultural commissioner, upon presentation of valid rainfall data from am official governmental source showing that an area within his or her county receives 25 inches or more of average annual rainfall, may exempt that area from this requirement.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- Amendment filed 8-15-86; effective thirtieth day thereafter (Register 86, No. 34).
- 2. Amendment of section heading, section and Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6776. Field Postings.

- (a) The operator of the property shall assure that signs are posted around treated fields in the following circumstances:
- (1) Whenever required by pesticide product labeling, unless access to the treated field is controlled in a manner that assures no employee (other

than the handlers making the application) will enter, work in, remain in, or walk within 1/4 mile during the application and the restricted entry interval:

- (2) All greenhouse applications, unless access is controlled in a manner that assures no employee (other that the handlers making the application) will enter, work in, remain in, or pass through the greenhouse during the application and the restricted entry interval; and
- (3) Any application that results in a restricted entry interval of greater than 7 days (after adjustment pursuant to section 6774).
- (b) The signs shall be of a size so that the wording specified in (2) and (3) is readable and the skull and crossbones symbol is clearly visible, to a person with normal vision, from a distance of 25 feet. Signs complying with the size requirements of Title 40 Code of Federal Regulations, Part 170.120 are considered to be readable at 25 feet. The signs shall contain the following:
 - (1) The skull and crossbones symbol near the center of the sign;
- (2) The words "DANGER" and "PELIGRO" and "PESTICIDES" and "PESTICIDAS" in the under portion of the sign;
- (3) The words "KEEP OUT" and "NO ENTRE" in the lower portion on the sign;
- (4) Whenever the sign is used to indicate a restricted entry interval of more than 7 days, the following information in the lower portion of the sign:
 - (A) The date of unrestricted entry;
 - (B) The name of the operator of the property; and
 - (C) The field identification, (if any); and
- (5) All letters and the symbol shall be of a color which sharply contrasts with their immediate background.
- (6) The Spanish portion of the sign may be replaced with another non– English language which is read by a majority of workers who do not read English. The replacement sign must be in the same format and meet the same size and other requirements as the original.
 - (c) The signs shall:
- (1) Be posted before the application begins but shall not be posted unless a pesticide application is scheduled within the next 24 hours;
- (2) Remain posted and clearly legible throughout the application and the restricted entry interval; and,
- (3) Be removed within 3 days after the end of the restricted entry interval and before any entry prohibited during a restricted entry interval.
- (d) The signs shall be posted so that they are visible at all usual points of entry to the treated area, including each road, footpath, walkway, or aisle that enters the treated field, and each border with any labor camp adjacent to the treated field. If there are no identified usual points of entry to the treated field, signs shall be posted at the corners of the treated field. When a treated field is adjacent to an unfenced public right—of—way, such as a road, trail, or path, additional signs shall be posted at each end of the treated field and at intervals not exceeding 600 feet along the treated field's border with the right—of—way.
- (e) When a pesticide product with the signal word "DANGER" on the label, or a minimal exposure pesticide listed in section 6790, is being applied to a field through an irrigation system, signs shall be posted in the manner specified in (d). These signs shall contain the following:
- (1) An octagon stop sign symbol at least 8 inches in diameter containing the word "STOP" in English;
- (2) The words "KEEP OUT" and "NO ENTRE" above the symbol and the words "PESTICIDES IN IRRIGATION WATER" and "PESTICIDAS EN AGUA de RIEGO" below the symbol;
 - (3) All letters shall be at least 2 1/2 inches tall; and
- (4) All letters and the symbol shall be of a color which sharply contrasts with their immediate background.
- (f) When a fumigant is applied to a field, signs shall be posted in the manner specified in (d). These signs shall contain the following information instead of the information specified in (b):
 - (1) The skull and crossbones symbol; and
 - (2) The following statements:
 - (A) "DANGER/PELIGRO";

- (B) "Area under fumigation, DO NOT ENTER/NO ENTRE";
- (C) "(Name of Fumigant) Fumigant in use";
- (D) The date and time of the fumigation; and
- (E) The name, address, and telephone number of the applicator.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–15–86; effective thirtieth day thereafter (Register 86, No. 34).
- Repealer and new section filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).
- 3. Amendment of subsection (b) and new subsection (b)(6) filed 5–10–99; operative 6–9–99 (Register 99, No. 20).

§ 6778. Records.

NOTE: Authority cited: Sections 407 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–15–86; effective thirtieth day thereafter (Register 86, No. 34).
- 2. Repealer filed 5-31-95; operative 6-30-95 (Register 95, No. 22).

Article 4. Fumigation

§ 6780. General Fumigation Safe-Use Requirements.

- (a) When fumigant concentrations cannot be controlled and an employee's exposure exceeds the Permissible Exposure Limit (PEL) as specified in Title 8, California Code of Regulations, Section 5155, Airborne Contaminants, or more stringent requirements by product labeling, the employer shall provide and require the employee to wear approved respiratory protective equipment.
- (b) Whenever an employee may be exposed above an exposure standard to methyl bromide, sulfuryl fluoride, or any other fumigant for which only air–supplied respirator equipment is approved, the employer shall either:
 - (1) require the use of air-supplied respirator equipment,
- (2) employ continuous monitoring to warn employees before the PEL is reached or
 - (3) operate under the provisions of (c) below.
- (c) Upon written application by an employer, the director will review and may accept a Fumigation Safety Program that described methods, work practices, devices, or processes which the director determines will ensure that employees will not be exposed to concentrations of fumigants in excess of the PEL.
- (d) The employer shall have an accident response plan at the worksite. The plan shall provide instructions to protect employees during situations such as spills, fire, and leaks. Employees shall be trained in accident management procedures based on the plan.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Section 12981, Food and Agricultural Code.

HISTORY

- 1. New Article 4 (Sections 6780, 6782 and 6784) filed 8–1–86; effective thirtieth day thereafter (Register 86, No. 31).
- Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending subsection (a) filed 3–8–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 10)

§ 6782. Fumigation in Enclosed Spaces.

Enclosed spaces include vaults, chambers, greenhouses, vans, box-cars, ships, planes, vehicles, and tarpaulin–covered structures and commodities. When fumigating tarpaulin–covered commodities inside buildings, and areas or things inside greenhouses, this section applies to the entire structure.

- (a) Whenever a pesticide is used for fumigation inside an enclosed space, at least two trained employees shall be present at all times when:
 - (1) The fumigant is introduced into the enclosed space;
- (A) Except, only one trained person is required to be present when solid fumigants (including aluminum phosphide, magnesium phosphide, and smoke cartridges) are introduced into the enclosed space from outside the enclosed space;

- (2) The enclosed space is entered for the purpose of facilitating aeration; and
- (3) The enclosed space is entered to determine the concentration of the fumigant and personal protective equipment is required by pesticide product labeling or regulation.
- (b) The second employee shall have immediate access to the personal protective equipment required by the pesticide product labeling for handlers in the event entry into the fumigated enclosed space becomes necessary for rescue.
- (c) Prior to the commencement of fumigation, warning signs shall be posted in plainly visible locations on or in the immediate vicinity of all entrances to the space under fumigation and shall not be removed until fumigation and ventilation have been completed, and the premises is safe for reentering. Warning signs shall be printed in red on white background and shall contain, in English and Spanish, the following statement in letters not less than two inches in height: "DANGER-FUMIGATION." They shall also depict a skull and crossbones not less than one inch in height and shall state in letters not less than one—half inch in height the name of the fumigant, the date and time the fumigant was injected, and the name, address and telephone number of the applicator performing the fumigation.
- (d) Employees shall not be allowed to enter fumigated enclosed areas, except to determine the fumigant concentration or facilitate aeration unless the concentration in the area is known to be at or below the level specified in 6780(a) above.
 - (e) The fumigant shall not be released into an occupied work area.
- (f) After completion of the fumigation, the treated area or products shall be managed so that employees entering the area or working with the treated products are not exposed to a concentration in excess of the level specified in 6780(a) above.

NOTE: Authority cited: Section 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–15–86; effective thirtieth day thereafter (Register 86, No. 31).
- Amendment of section heading, first paragraph, and subsection (a), new subsections (a)(1)–(b), subsection relettering, and amendment of newly designated subsection (c) and Note filed 12–31–96; operative 1–1–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 1).

§ 6784. Field Fumigation.

- (a) Signs required to be posted in accordance with section 6776(f) shall remain in place until aeration is complete.
- (b) The provisions of this subsection pertain to field soil fumigations using methyl bromide applied pursuant to the fumigation methods described in section 6447.3.
- (1) Employer Recordkeeping. The employer shall maintain records for all employees performing fumigation—handling activities. The records shall identify the person, work activity(ies), date(s), duration of handling, the U.S. Environmental Protection Agency Registration Number, and the brand name of the methyl bromide product handled. The employer shall maintain these use records at a central location for two years.
 - (2) Employee Protection Requirements.
- (A) Employees involved primarily in shoveling shall work only at the ends of the application rows.
- (B) At least two trained employees shall be present during introduction of methyl bromide and removal of tarpaulins, if used.
- (C) When required by this section, employees shall wear National Institute for Occupational Safety and Health (NIOSH)—certified respiratory protection specifically recommended by the manufacturer for use in atmospheres containing less than five parts per million methyl bromide. Employees shall wear the required respiratory protection during the entire duration of the fumigation—handling activity. NIOSH—approved, air—supplying respiratory protection may be used in lieu of chemical cartridge respirators.
 - (3) Limited Work Hours and Workdays.

- (A) No employee may work in fumigation—handling activities more than the hours specified in Table 1—Maximum Work Hours during the injection period and during the restricted—entry interval.
- 1. An employee may perform fumigation—handling activities without the work—hour limitations specified in Table 1—Maximum Work Hours if a full—face respirator is worn during the entire duration of the activity.
- 2. Multiple–Task Employees. An employee may work in more than one work task and/or application method in a 24–hour period as long as the employee's total work hours do not exceed the lowest total hours specified in Table 1—Maximum Work Hours for any one work task or application method performed.
- (B) Notwithstanding subsection (b)(3)(A), an employee may work in fumigation-handling activities in a 24-hour period for the work hours specified in Table 2—Maximum Work Hours in a Maximum Three (3)Workdays Per Calendar Month during the injection period and during the restricted-entry interval, provided the employee's total workdays performing fumigation-handling activities do not exceed three days in a calendar month.
- 1. An employee may perform fumigation—handling activities without the work—hour limitations specified in Table 2—Maximum Work Hours in a Maximum Three (3)Workdays Per Calendar Month if a half-face respirator is worn during the entire duration of the activity.
- 2. Multiple–Task Employees. An employee may work in more than one work task and/or application method in a 24–hour period as long as the employee's total work hours do not exceed the lowest total hours specified in Table 2—Maximum Work Hours in a Maximum Three (3) Workdays Per Calendar Month for any one work task or application method performed.

Table 1. Maximum Work Hours

Fumigation Method/Activities	Maximum Application Rate (lbs. of actual methyl bromide)	Maximum Work Hours in a 24-Hour Period Wearing Half-Face Respirator During Entire Fumigation-Handling Activity
Nontarpaulin/Shallow/Bed: Tractor Equipment Driving Supervising	200 lbs.	9* 9*
Nontarpaulin/Deep/Broadcast: Tractor Equipment Driving Supervising	400 lbs.	10* no limitation ¹
Tarpaulin/Shallow/Broadcast: Tractor Equipment Driving Shoveling, Copiloting Supervising Tarpaulin Cutting Tarpaulin Removal	400 lbs.	8* 4* 4* no limitation ¹ no limitation ²
Tarpaulin/Shallow/Bed: Tractor Equipment Driving Shoveling, Copiloting Supervising Tarpaulin Cutting Tarpaulin Removal	250 lbs.	no limitation 8* 8* no limitation ¹ no limitation ²
Tarpaulin/Deep/Broadcast: Tractor Equipment Driving Shoveling, Copiloting Supervising Tarpaulin Cutting Tarpaulin Removal	400 lbs.	8* 4* 4* no limitation ¹ no limitation ²
Drip System — Hot Gas: Applicators Supervising Tarpaulin Cutting Tarpaulin Removal	225 lbs.	5* 5* no limitation ¹ no limitation ²

¹Exception: An employee may perform this activity without a half-face respirator provided the employee does not work more than one hour in a 24-hour period. The

maximum one-hour work limitation may be increased in accordance with the formula located below.

²Exception: An employee may perform this activity without a half-face respirator provided the employee does not work more than three hours in a 24-hour period. The maximum three-hour work limitation may be increased in accordance with the formula located below.

*If the actual methyl bromide application rate is less than the maximum application rate shown in Table 1 or below in Table 2 for the particular fumigation method used, the maximum work hours may be increased in accordance with the following formula:

 maximum application rate for method
 x
 work hours in a setual application rate
 revised maximum work hours in a south hours in a setual application rate

Table 2. Maximum Work Hours in a Maximum Three (3) Workdays
Per Calendar Month

E i i Malaka	Maximum Application Rate (lbs. of actual	Maximum Work Hours in a 24–Hour Period Without the Use of
Fumigation Method/Activities	methyl bromide)	Respirators
Nontarpaulin/Shallow/Bed: Tractor Equipment Driving Supervising	200 lbs.	4* 4*
Nontarpaulin/Deep/Broadcast: Tractor Equipment Driving Supervising	400 lbs.	4* 7*
Tarpaulin/Shallow/Broadcast: Tractor Equipment Driving Shoveling, Copiloting Supervising Tarpaulin Cutting Tarpaulin Removal	400 lbs.	4* 3* 3* 4 7
Tarpaulin/Shallow/Bed: Tractor Equipment Driving Shoveling, Copiloting Supervising Tarpaulin Cutting Tarpaulin Removal	250 lbs.	4* 4* 4* 4 7
Tarpaulin/Deep/Broadcast: Tractor Equipment Driving Shoveling, Copiloting Supervising Tarpaulin Cutting Tarpaulin Removal	400 lbs.	4* 3* 3* 4 7
Drip System — Hot Gas: Applicators Supervising Tarpaulin Cutting Tarpaulin Removal	225 lbs.	2* 2* 4 7

- (C) No employee shall be allowed to alternate between the workday and work–hour requirements specified in subsection (b)(3)(A) and (B) unless the employee did not perform fumigation–handling activities during the previous 30 days.
 - (4) Tarpaulin Cutting and Removal Procedures.
- (A) Tarpaulin cutting and tarpaulin removal shall be discontinued if the presence of gas is readily evident (onset of eye irritation or odor).
- (B) Tarpaulins used for broadcast fumigations shall be cut using only mechanical methods including all-terrain vehicle or a tractor with a cutting wheel. Each tarpaulin panel used for broadcast fumigations shall be cut lengthwise.
 - (5) Tarpaulin Repair.
- (A) The operator of the property shall assure that a "tarpaulin repair response plan" is provided to the commissioner. The tarpaulin repair response plan shall identify the responsibilities of the licensed pest control business and/or the permittee with regard to tarpaulin damage detection and repair activities. At a minimum, the tarpaulin repair response plan shall indicate the parties responsible for the repair and incorporate the applicable elements listed in (B) below.

- (B) The "tarpaulin repair response plan" approved by the commissioner in the work site plan must state with specificity the situations when tarpaulin repair must be conducted. The situations should be based on, but not limited to, hazard to the public, residents, or workers; proximity to occupied structures, size of the damaged area(s); timing of damage; feasibility and response time of repair; and environmental factors such as wind speed and direction.
- (C) The ambient air in the damaged areas of the tarpaulin to be repaired must be tested for methyl bromide concentration by a certified applicator of the licensed pest control business that made the application, or by a certified applicator employee of the permittee, or certified applicator permittee, using a testing device as specified by the labeling. The certified applicator must wear self-contained breathing apparatus when conducting these tests.
- (D) All repair work areas must test less than five parts per million methyl bromide before any employee without respiratory protection shall be allowed to enter and conduct tarpaulin repair. Such employee is limited to one work hour in a 24-hour period, unless respiratory protection specified in subsection (b)(2)(C) is worn.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Section 12981, Food and Agricultural Code.

HISTORY

- 1. New section filed 8–15–86; effective thirtieth day thereafter (Register 86, No. 31)
- Amendment of section and Note filed 12–15–2000; operative 1–14–2001 (Register 2000, No. 50).
- 3. Amendment of subsections (b)(4)(A)–(B) and (b)(6)(C)–(D) and new subsections (b)(7)–(b)(7)(B) filed 4–8–2002; operative 4–8–2002 (Register 2002, No. 15)
- 4. Repealer and new section filed 9-19-2002 as an emergency; operative 9-22-2002 (Register 2002, No. 38). A Certificate of Compliance must be transmitted to OAL by 1-21-2003 or emergency language will be repealed by operation of law on the following day.
- 5. Repealer and new section refiled 1–21–2003 as an emergency; operative 1–21–2003 (Register 2003, No. 4). A Certificate of Compliance must be transmitted to OAL by 5–21–2003 or emergency language will be repealed by operation of law on the following day.
- 6. Repealer and new section refiled 5-19-2003 as an emergency; operative 5-21-2003 (Register 2003, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-18-2003 or emergency language will be repealed by operation of law on the following day.
- 7. Repealer and new section refiled 9-11-2003 as an emergency; operative 9-18-2003 (Register 2003, No. 37). A Certificate of Compliance must be transmitted to OAL by 1-16-2004 or emergency language will be repealed by operation of law on the following day.
- 8. Repealer and new section refiled 1-14-2004 as an emergency; operative 1-17-2004 (Register 2004, No. 3). A Certificate of Compliance must be transmitted to OAL by 5-17-2004 or emergency language will be repealed by operation of law on the following day.
- Repealer and new section refiled 5-17-2004 as an emergency; operative 5-18-2004 (Register 2004, No. 21). A Certificate of Compliance must be transmitted to OAL by 9-15-2004 or emergency language will be repealed by operation of law on the following day.
- 10. Repealer and new section refiled 9–9–2004 as an emergency; operative 9–15–2004 (Register 2004, No. 37). A Certificate of Compliance must be transmitted to OAL by 1–13–2005 or emergency language will be repealed by operation of law on the following day.
- 11. Certificate of Compliance as to 9–15–2004 order, including further amendment of section, transmitted to OAL 9–21–2004 and filed 11–3–2004 (Register 2004, No. 45).
- 12. Amendment of subsections (b) and (b)(2)(B) filed 1–25–2008; operative 1–25–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 4).

Article 5. Minimal Exposure Pesticides

§ 6790. Minimal Exposure Pesticides.

This article applies to the following:

- (a) Bromoxynil (Buctril, Bronate)
- (b) Folpet
- (c) Oxydemeton-methyl (Metasystox-R)
- (d) Propargite (Omite, Omite CR, Comite)

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agriculture Code.

HISTORY

- 1. New section filed 8-13-90; operative 8-13-90 (Register 90, No. 41).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6791. Exemptions.

The following exemptions apply to the specific minimal exposure pesticides:

- (a) Folpet, when contained in or added to paints, coatings, or caulking compounds, is exempt from the requirements of this article.
 - (b) [Reserved].

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agriculture Code.

HISTORY

- 1. New section filed 8-13-90; operative 8-13-90 (Register 90, No. 41).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6792. Conditions of Use.

The following conditions apply to the specific minimal exposure pesticides:

- (a) Applications of oxydemeton-methyl to ornamental landscape trees and shrubs shall be made by trunk injection or soil injection methods only;
 - (b) Oxydemeton-methyl shall not be applied within a greenhouse; and
 - (c) Propargite shall not be applied within a greenhouse.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 23981, Food and Agriculture.

HISTORY

- 1. New section filed 8-13-90; operative 8-13-90 (Register 90, No. 41).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6793. Minimal Exposure Pesticide Safety Use Requirements.

- (a) The employer shall provide a clothing change area and instructions, as required by section 6732, for employees who handle minimal exposure pesticides for any period of time, regardless of the toxicity category of the product used.
- (b) The employer shall provide washing facilities, as specified in section 6734, where minimal exposure pesticides are mixed or loaded, regardless of the toxicity category of the product used.
- (c) The employer shall provide and maintain work clothing, as specified in section 6736, and require it to be worn, regardless of the toxicity category.
- (d) The employer shall provide a closed system, as defined in section 6000, and require its use by all employees who mix, load or transfer liquid formulations or load diluted liquid mixes derived from dry formulations of minimal exposure pesticides, regardless of the toxicity category of the product used. The requirements of this subsection do not apply to:
- (1) employees who handle a total of one gallon or less of these pesticides per day exclusively in original containers of one gallon or less; or
- (2) regulatory personnel collecting samples of these pesticides according to official sampling procedures.
- (e) The employer shall provide and require employees to wear full-body chemical-resistant protective clothing, as specified in subsections 6738(g), when handling minimal exposure pesticides. Employees working in the following situations are not required by this subsection to wear chemical-resistant full-body protective clothing, but this clothing shall be present at the work site:

- (1) employees using a closed system, or sealed water soluble packets, while mixing, loading or transferring these pesticides. These employees shall wear a chemical–resistant apron, chemical–resistant gloves and chemical–resistant boots;
 - (2) employees working as applicators in enclosed cabs;
 - (3) employees working as flaggers in enclosed vehicles;
- (4) applicators using vehicle-mounted or towed equipment to inject or incorporate these pesticides into the soil; and
- (5) applicators using equipment with vehicle mounted spray nozzles directed downward and located below the level of the employee.
- (f) The employer shall provide and require employees to wear respiratory protection, as specified in section 6739, when engaged in:
- (1) Hand application or ground application of minimal exposure pesticides, except:
 - (A) Reserved;
- (B) applicators using vehicle mounted or towed equipment to inject or incorporate these pesticides into the soil; and
- (C) applicators using equipment with vehicle mounted spray nozzles directed downward and located below the level of the employee;
- (2) Flagging during an application of a minimal exposure pesticide, except flaggers in enclosed vehicles; and
- (3) Mixing or loading dry formulations of minimal exposure pesticides, except mixers or loaders using sealed water soluble packets.
- (g) All protective clothing and equipment shall be cleaned inside and out or discarded at the end of the day's use.

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agriculture Code.

HISTORY

- 1. New section filed 8–13–90; operative 8–13–90 (Register 90, No. 41).
- Change without regulatory effect amending NOTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).
- Change without regulatory effect amending subsection (d) filed 4–18–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 16).
- 4. Amendment of subsections (e), (e)(1), (e)(4) and (f) filed 6–13–2007; operative 1–1–2008 (Register 2007, No. 24).

Article 6. Use Requirements

§ 6795. Thiophanate-Methyl.

- (a) Employers shall provide and ensure that employees who handle pesticides containing thiophanate-methyl for the treatment of potato seed pieces wear respiratory protection approved by NIOSH/MSHA for dusts.
- (b) Indoor applications of thiophanate-methyl for potato seed-piece treatment are prohibited if there are persons within the room or enclosed space where the treatment is taking place, unless the persons are protected in the manner specified in subsection (a).

NOTE: Authority cited: Sections 11456 and 12981, Food and Agricultural Code. Reference: Sections 12980 and 12981, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–24–91 as an emergency; operative 4–24–91 (Register 91, No. 21). A Certificate of Compliance must be transmitted to OAL by 8–22–91 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 91, No. 46)
- 3. New section filed 2–11–92; operative 2–11–92 pursuant to Government Code section 11346.2(d) (Register 92, No. 12).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Chapter 4. Environmental Protection

Subchapter 1. Ground Water

Article 1. Pesticide Contamination Prevention

§ 6800. Groundwater Protection List.

Pesticides labeled for agricultural, outdoor institutional or outdoor industrial use that contain any of the following chemicals are designated as having the potential to pollute ground water:

- (a) The following chemicals detected in ground water or soil pursuant to section 13149 of the Food and Agricultural Code:
 - (1) Atrazine
 - (2) Simazine
 - (3) Bromacil
- (4) Diuron, except for products with less than 7% diuron that are applied to foliage
 - (5) Prometon
 - (6) Bentazon (Basagran®)
 - (7) Norflurazon
- (b) The following chemicals identified pursuant to section 13145(d) of the Food and Agricultural Code:

Acephate

Acrolein

Alachlor

Aldicarb

Azinphos-methyl

Bensulide

Butylate

Carbaryl Carbofuran

Chloropicrin

Chlorothalonil

Chlorsulfuron

Cyanazine

Cycloate

Dazomet

2,4-D, dimethylamine salt

Diazinon

Dichlobenil

Dichloran

Diethatyl-ethyl

Dimethoate

Diquat dibromide

Disulfoton

EPTC

Ethofumesate

Ethoprop

Fenamiphos Fluometuron

Fonofos

Fosetyl-Al technical

Hexazinone

Imazethapyr

Imidacloprid

Iprodione

Isoxaben Linuron

Linuton

Metalaxyl

Metaldehyde

Methiocarb

Methomyl

Methyl isothiocyanate

Metolachlor

Metribuzin

Molinate

Napropamide

Naptalam, sodium salt

Nitrapyrin

Oryzalin

Oxydemeton-methyl

Parathion

Pebulate

Phorate

Prometryn

Propyzamide

Pyrazon

Rimsulfuron

Sulfometuron-methyl

Tebuthiuron

Triallate

Triflumizole

Vernolate

Vinclozolin

NOTE: Authority cited: Sections 11456 and 13145, Food and Agricultural Code. Reference: Sections 13144, 13145 and 13149, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).
- 2. Amendment of subsections (a) and (b) filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2 (d) (Register 90, No. 16).
- 3. New subsection (a)(6) filed 12–12–91; operative 1–13–92 (Register 92, No. 13).
- 4. Amendment of subsection (b) filed 4–3–92; operative 5–4–92 (Register 92, No. 18).
- 5. Amendment of subchapter 1 heading and amendment of section and NOTE filed 4–13–99; operative 5–13–99 (Register 99, No. 16).
- 6. Amendment filed 2-21-2001; operative 3-23-2001 (Register 2001, No. 8).
- 7. Amendment of subsection (a) and NOTE filed 4–27–2004; operative 5–27–2004 (Register 2004, No. 18).

§ 6802. Pesticide Management Zones.

NOTE: Authority cited: Sections 11456, 12976 and 13145, Food and Agricultural Code. Reference: Section 13145, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).
- 2. Amendment of subsection (b) and new subsections (c)–(g) filed 4–10–90; operative 4–10–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 16).
- 3. Amendment of subsections (b)–(f) filed 6–3–92; operative 7–3–92 (Register 92, No. 23).
- 4. Editorial correction of subsection (f) (Register 95, No. 8).
- 5. Amendment of section and Note filed 4–13–99; operative 5–13–99 (Register 99, No. 16).
- Amendment of subsection (b) and new subsection (h) filed 2-21-2001; operative 3-23-2001 (Register 2001, No. 8).
- 7. Repealer filed 4-27-2004; operative 5-27-2004 (Register 2004, No. 18).

§ 6804. Specific Numerical Values.

Specific numerical values required by Food and Agricultural Code section 13144(a) are established as follows:

- (a) Water solubility—3 ppm
- (b) Soil adsorption coefficient (Koc)—1900 cm³/gm
- (c) Hydrolysis—14 days half-life
- (d) Aerobic soil metabolism—610 days half-life
- (e) Anaerobic soil metabolism-9 days half-life

NOTE: Authority cited: Sections 11456 and 13145, Food and Agricultural Code. Reference: Sections 13144 and 13145, Food and Agricultural Code.

HISTORY

1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code section 11346.2(d) (Register 89, No. 5).

- 2. Amendment of subsections (a)–(c) and new subsection (d) filed 10–23–89; operative 11–22–89 (Register 89, No. 44).
- 3. Amendment filed 10-19-90; operative 11-18-90 (Register 90, No. 47).
- 4. Editorial correction of printing error in subsection (b) (Register 91, No. 32).
- 5. Amendment of subsection (d) and new subsection (e) filed 2–1–93; operative 3–3–93 (Register 93, No. 6).
- Change without regulatory effect amending Note filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6806. Use Reporting.

NOTE: Authority cited: Sections 407, 12976, 13145 and 14102, Food and Agricultural Code. Reference: Section 13145, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code Section 11346.2(d) (Register 89, No. 5).
- 2. Repealer filed 12-22-89; operative 1-1-90 (Register 90, No. 1).

§ 6806.1. Groundwater Protection List Use Report Form.

HISTORY

- 1. New section filed 1–4–89; operative 1–4–89 pursuant to Government Code Section 11346.2(d) (Register 89, No. 5).
- 2. Repealer filed 12-22-89; operative 1-1-90 (Register 90, No.1).

§ 6808. Sunset Review of Regulations.

NOTE: Authority cited: Section 11456, Food and Agricultural Code. Reference: Section 11456, Food and Agricultural Code.

HISTORY

- 1. New section filed 4-13-99; operative 5-13-99 (Register 99, No. 16).
- 2. Repealer filed 1-20-2000; operative 2-19-2000 (Register 2000, No. 3).

Subchapter 2. Air

Article 1. Toxic Air Contaminants

§ 6860. Toxic Air Contaminants List.

The Director designates the following pesticides to be toxic air contaminants:

(a) The following pesticides are designated toxic air contaminants pursuant to Food and Agricultural Code section 14023:

Ethyl parathion

Methidathion

Methyl isothiocyanate (MITC) and other pesticides that generate MITC

Methyl parathion

S.S.S-tributyl phosphorotrithioate (DEF, tribufos)

Sulfuryl Fluoride

(b) The following pesticides are designated toxic air contaminants to implement Food and Agricultural Code section 14021:

Acrolein

Arsenic acid

Arsenic pentoxide

Arsenic trioxide

Captan

Carbaryl

Carbon disulfide-generating pesticides

Chlorine

Chromic acid

m-Creosol

2,4-D salts and esters

1,4-Dichlorobenzene

1,3-Dichloropropene

Dichlorovos

Ethylene oxide

Formaldehyde

Hydrochloric acid

Lindane

Mancozeb

Maneb

Methanol

Methoxychlor

Methyl bromide

Naphthalene 10 10' oxybisphenoxyarsine

Pentachloronitrobenzene

Pentachlorophenol

Phenol

Phosphorus

Phosphine and phospine-generating pesticides

Potassium permanganate

Propoxur

Propylene oxide

Sodium cyanide

Sodium dichromate

Trifluralin

Xvlene

NOTE: Authority cited: Sections 11456 and 14023, Food and Agricultural Code. Reference: Sections 14021 and 14023, Food and Agricultural Code.

HISTORY

- 1. New section filed 9-7-93; operative 10-7-93 (Register 93, No. 37).
- 2. New subsections (a) and (b) and amendment of NOTE filed 3-7-95; operative 4-6-95 (Register 95, No. 10).
- 3. Amendment of subsection (a) filed 1–31–2000; operative 3–1–2000 (Register 2000, No. 5).
- 4. Amendment of subsection (a) filed 8–30–2000; operative 9–29–2000 (Register 2000, No. 35).
- 5. Amendment filed 5-22-2003; operative 6-21-2003 (Register 2003, No. 21).
- 6. Amendment filed 5-7-2007; operative 6-6-2007 (Register 2007, No. 19).
- 7. Amendment of subsection (a) filed 3–13–2008; operative 4–12–2008 (Register 2008, No. 11).

§ 6890. Criteria for Identifying Pesticides as Toxic Air Contaminants.

A pesticide shall be identified as a toxic air contaminant if its concentrations in ambient air are greater than the following levels (for the purposes of this section, a threshold is defined as the dose of a chemical below which no adverse effect occurs):

- (a) For pesticides which have thresholds for adverse health effects, this level shall be ten-fold below the air concentration which has been determined by the Director to be adequately protective of human health.
- (b) For pesticides which do not have thresholds for adverse health effects, this level shall be equivalent to the air concentration which would result in a ten-fold lower risk than that which has been determined by the Director to be a negligible risk.

NOTE: Authority cited: Section 11456, Food and Agricultural Code. Reference: Sections 14021 and 14023, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-16-91; operative 2-15-91 (Register 91, No. 8).
- 2. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

Article 2. Volatile Organic Compounds

§ 6895. Prohibition of Use of Weed Oils.

NOTE: Authority cited: Sections 407, 12781 and 12981, Food and Agricultural Code. Reference: Sections 11501 and 12824, Food and Agricultural Code.

HISTORY

- 1. New section filed 8–16–90; operative 8–16–90 (Register 90, No. 36.)
- Change without regulatory effect adding article 2 heading filed 8–28–91 pursuant to section 100, title 1, California Code of Regulations (Register 92, No. 4).
- 3. Repealer filed 8-1-96; operative 8-31-96 (Register 96, No. 31).

Page 424.8

Subchapter 3. Aquatic and Marine Environments

Article 1. Pesticide Contamination Protection

§ 6900. Antifouling Paints or Coatings Containing Tributyltin.

Antifouling paints or coatings which contain tributyltin shall have an average release rate of no more than four micrograms of organotin per square centimeter per day as determined by the Environmental Protection Agency testing procedure (ASTM Draft 6).

NOTE: Authority cited: Sections 11456, 12781, 14005 and 14102, Food and Agricultural Code. Reference: Sections 12824, 14005 and 14006, Food and Agricultural Code; and Public Law No. 100–333 (June 16, 1988) 102 Statutes 605.

HISTORY

- 1. New section filed 10-31-88; operative 11-30-88 (Register 88, No. 45).
- 2. Change without regulatory effect amending NoTE filed 6–20–2001 pursuant to section 100, title 1, California Code of Regulations (Register 2001, No. 25).

§ 6910. Prohibition of Use and Sale of Pesticide Products Containing Tributyltin.

- (a) No person shall possess for use or use a pesticide product containing tributyltin for the control of fouling microorganisms (such as bacteria, algae, or fungi) in cooling water systems in the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma for the control of fouling microorganisms (such as bacteria, algae, or fungi) in cooling water systems.
- (b) No person in the counties listed in subsection (a) shall sell to users a pesticide containing tributyltin for the control of fouling microorganisms (such as bacteria, algae, or fungi) in cooling water systems.

NOTE: Authority cited: Sections 12976, 14005 and 14102, California Food and Agricultural Code. Reference: Sections 14005, 14006 and 14102, California Food and Agricultural Code.

HISTORY

- New section filed 12-11-95 as an emergency; operative 12-11-95 (Register 95, No. 50). A Certificate of Compliance must be transmitted to OAL by 4-9-96 or emergency language will be repealed by operation of law on the following day.
- New section refiled 4–9–96 as an emergency; operative 4–9–96 (Register 96, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–8–96 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 96, No. 45).
- New section filed 11–7–96; operative 11–7–96 pursuant to Government Code section 11343.4(d) (Register 96, No. 45).

§ 6920. Prohibition of Use and Sale of Pesticide Products Containing Copper.

- (a) No person shall possess for use or use a pesticide product containing copper sulfate for the control, in sewers and drains, of tree or other plant roots, or fungal slime in the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma.
- (b) No person in the counties listed in subsection (a) shall sell to users a pesticide product containing copper sulfate for the control, in sewers and drains, of tree or other plant roots, or fungal slime.

NOTE: Authority cited: Sections 12976 and 14102, California Food and Agricultural Code. Reference: Section 14102, California Food and Agricultural Code.

HISTORY

 New section filed 12-11-95 as an emergency; operative 12-11-95 (Register 95, No. 50). A Certificate of Compliance must be transmitted to OAL by 4-9-96 or emergency language will be repealed by operation of law on the following day.

- New section refiled 4–9–96 as an emergency; operative 4–9–96 (Register 96, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–8–96 or emergency language will be repealed by operation of law on the following day.
- 3. Repealed by operation of Government Code section 11346.1(g) (Register 96, No. 45)
- New section filed 11–7–96; operative 11–7–96 pursuant to Government Code section 11343.4(d) (Register 96, No. 45).

§ 6950. Clopyralid.

The provisions of this section apply to pesticide products that contain the active ingredient clopyralid and are intended for lawn and turf use as defined in Food and Agricultural Code section 13190(e).

(a) No application shall be made to lawn and turf unless the licensed or certified qualified applicator assures that the grass clippings from the treated area remain on the property. In no instances shall clopyralid–containing products be applied to residential lawns.

NOTE: Authority cited: Sections 11456, 12781, 12976 and 14102, Food and Agricultural Code. Reference: Sections 12824, 13191 and 13192, Food and Agricultural Code.

HISTORY

1. New section filed 12-28-2005; operative 1-27-2006 (Register 2005, No. 52).

Subchapter 5. Surface Water

Article 1. Pesticide Contamination Prevention

§ 6960. Dormant Insecticide Contamination Prevention.

- (a) The operator of the property shall meet at least one of the following requirements when making dormant applications:
- (1) only apply a dormant oil, or a biocontrol agent such as but not limited to spinosad or *Bacillus sp.*; or
 - (2) only apply to a hydrologically isolated site; or
- (3) divert any runoff with an on-farm recirculating system and/or contain and hold any runoff for 72 hours a before releasing into a sensitive aquatic site.
- (b) If none of the requirements in subsection (a) can be met, the following dormant insecticide application restrictions shall apply:
- (1) the operator of the property to be treated shall obtain a written recommendation from a licensed pest control adviser prior to the application; and
- (2) the application shall not be made within 100 feet of any sensitive aquatic site; and
- (3) wind speed shall be 3–10 miles per hour (mph) at the perimeter of the application site as measured by an anemometer on the upwind side.
 - (c) Aerial application of dormant insecticides shall only be allowed if:
- (1) soil conditions do not allow field entry, or approaching bloom conditions necessitate aerial application; and
 - (2) all the requirements in subsection (b) are met.
 - (d) No dormant insecticide application shall occur if:
- (1) soil moisture is at field capacity and a storm event, forecasted by the National Oceanic and Atmospheric Administration (NOAA) or National Weather Service (NWS), is to occur within 48 hours following application; or
- (2) a storm event likely to produce runoff from the treated area is forecasted by NOAA/NWS to occur within 48 hours following the application.

NOTE: Authority cited: Section 11456, Food and Agricultural Code. Reference: Sections 11456 and 11501, Food and Agricultural Code.

HISTORY

1. New subchapter 5, article 1 (section 6960) and section filed 7–18–2006; operative 8–17–2006 (Register 2006, No. 29).

Chapter 1. Fair Improvement Allocation Procedures

Article 1. Fair Improvement Allocation Procedures

§ 7000. Definitions.

For purposes of Article 1 of these regulations, the following terms shall have the meanings described below:

- (a) "Act" means paragraph (1) of subdivision (f) of Section 19596.5 of the Code, paragraph (1) of subdivision (i) of Section 19596.6 of the Code and subdivision (b) of Section 19596.15 of the Code.
- (b) "Applicant" means the agency requesting the grant of moneys in connection with the issuance of Obligations the proceeds of which will be used for a purpose described in the Act and these regulations.
- (c) "Application" means the application required to be submitted and filed by an Applicant pursuant to subdivision (b) of Section 19596.15 of the Code and Section 7001 of these regulations.
- (d) "Code" means the Business and Professions Code of the State of California, as amended.
- (e) "Commitment Agreement" means the agreement that, in accordance with Section 7004 of these regulations, shall be entered into between the Director and a Grantee specifying the terms and conditions of each Grant.
- (f) "Department" means the Department of Food and Agriculture of the State of California.
 - (g) "Director" means the Director of the Department.
- (h) "Grant" means any allocation of funds pursuant to the Act and these regulations as evidenced by the terms of a Commitment Agreement.
 - (i) "Grantee" means any Applicant which receives a Grant.
- (j) "Obligations" means bonds, notes, debentures, certificates of participation, or other evidences of indebtedness the proceeds of which will be used for a purpose described in the Act and these regulations or to reimburse funds or refund obligations which were used for such purpose and the debt service on which will be repaid from a Grant.
- (k) "Project" means any one or more of the following, including, in each case, related improvements and appurtenances: the construction of improvements at a fair's racetrack inclosure, the construction of satellite wagering facilities at a fair, health and safety repair projects at a fair, and handicapped access compliance at a fair.
- (l) "Project Costs" means reasonable costs associated with any of the following:
 - (1) Preparing an Application and establishing eligibility.
- (2) Constructing, acquiring, and installing a Project, including, without limitation, all land, structures, real property, and personal property necessary therefor or appurtenant thereto.
- (3) Design, engineering, architectural, planning, inspection, permitting, consulting, legal, accounting and other costs and fees related to the acquisition, financing and development of a Project.

NOTE: Authority cited: Section 19596.15, Business and Professions Code. Reference: Sections 19596.5(f)(1), 19596.6(i)(1) and 19596.15, Business and Professions Code.

HISTORY

- New section filed 11–14–88 as an emergency; operative 11–14–88 (Register 88, No. 47). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3–14–89.
- Certificate of Compliance transmitted to OAL 11-30-88 and filed 12-30-88 (Register 89, No. 2).
- 3. Amendment of division heading and new chapter 1 heading filed 12–20–2001; operative 1–19–2002 (Register 2001, No. 51).

§ 7001. Application Content and Procedure.

- (a) The Application shall be submitted in such manner as the Director or his or her designee shall prescribe, shall be signed by a person designated by the Applicant and shall contain the following information together with any supporting information which the Applicant wishes to include:
- (1) identity of the Applicant, including the name, address, and phone number of the Applicant's principal contact person;
- (2) a description of each Project for which a Grant is requested, including information about whether each Project is the construction of improvements at a fair's racetrack inclosure, the construction of satellite wagering facilities at a fair, health and safety repair projects at a fair, or handicapped access compliance at a fair;
- (3) preliminary cost estimates for the Project, and information about any other sources of funding for the Project;
- (4) information about any federal, state, and local laws and regulatory requirements known to the Applicant to which the Project will be subject and how the Applicant will comply with these;
- (5) the amount of the funds requested and the proposed terms and conditions of the Obligations the debt service on which shall be paid from the Grant, including a statement as to whether such Obligations shall be interim or permanent financing; and
 - (6) the date the Application was completed.
- (b) Applicants shall submit one (1) signed and clearly identified original and two (2) copies of the application to the California Department of Food and Agriculture, Division of Fairs and Expositions, 1010 Hurley Way, Suite 200, Sacramento, CA 95825, Attention: Director.
- (c) An amendment to an Application shall be authorized at any time. If an Application has been accepted pursuant to Section 7002 of these Regulations, an amendment shall be authorized to be submitted prior to discretionary action by the Director pursuant to Section 7003 of these Regulations; provided, however, that the Director shall be authorized to take an additional thirty (30) days to act on said Application, as amended. If an Application has been approved as set forth in Section 7003 of these Regulations, then any amendment to said Application shall be processed and acted upon by the Director within thirty (30) days from the date said amendment is accepted, such acceptance to be governed by Section 7002 of these Regulations.

NOTE: Authority cited: Section 19596.15, Business and Professions Code. Reference: Sections 19596.5(f)(1), 19596.6(i)(1) and 19596.15, Business and Professions Code.

HISTORY

- 1. New section filed 11–14–88 as an emergency; operative 11–14–88 (Register 88, No. 47). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3–14–89.
- Certificate of Compliance including amendment transmitted to OAL 11–30–88 and filed 12–30–88 (Register 89, No. 2).

§ 7002. Review of Applications.

The Director or his or her designee shall evaluate every Application or amendment thereto submitted and determine if it is complete. If the Application or amendment thereto is determined to be complete, it shall be accepted and written notice stating the date that the Application has been accepted shall be mailed to the Applicant within forty–five (45) days after its receipt by the Department. If the Application or amendment thereto is determined not to be complete, it shall not be accepted and written notice shall be mailed to the Applicant within sixty (60) days after its receipt by the Department stating the areas in which the Application or amendment thereto needs to be supplemented.

NOTE: Authority cited: Section 19596.15, Business and Professions Code. Reference: Sections 19596.5(f)(1), 19596.6(i)(1) and 19596.15, Business and Professions Code.

HISTORY

- New section filed 11-14-88 as an emergency; operative 11-14-88 (Register 88, No. 47). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3-14-89.
- Certificate of Compliance transmitted to OAL 11–30–88 and filed 12–30–88 (Register 89, No. 2).

§ 7003. Action on Applications.

- (a) Upon the filing of a complete Application, the Director shall be authorized to consult with any other state agency, public entity, or division within the Department in evaluating the Application for any purpose. The Director shall be authorized by agreement, to utilize the resources of any joint powers authority.
- (b) Within ninety (90) days after the acceptance of a complete Application, the Director shall either (1) approve the Application subject to the terms and conditions the Director determines to be appropriate or (2) deny the Application for any reason. If the Application is approved, the Director shall be authorized to enter into a Commitment Agreement pursuant to Section 7004 of these regulations.
- (c) With respect to commitments of funds available for allocation under Article 10 (commencing with Section 19620) of the Code to complete projects funded under the Act, such commitments shall be made in the priority prescribed by the Act and, where no priority is so prescribed, by the Director.

NOTE: Authority cited: Section 19596.15, Business and Professions Code. Reference Sections 19596.5(f)(1), 19596.6(i)(1) and 19596.15, Business and Professions Code.

HISTORY

- New section filed 11–14–88 as an emergency; operative 11–14–88 (Register 88, No. 47). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3–14–89.
- 2. Certificate of Compliance including amendment of subsection (b) transmitted to OAL 11-30-88 and filed 12-30-88 (Register 89, No. 2).

§ 7004. Commitment Agreement.

- (a) The Director shall enter into a Commitment Agreement with each Grantee which shall set forth the terms and conditions of the Grant.
- (b) The Commitment Agreement shall include the following information:
- (1) A description of the Project or Projects to be funded from proceeds of the Grant or proceeds of Obligations to be repaid from the Grant;
- (2) If applicable, the dates on which the Grant is payable and the amount of the Grant payable on each such date;
- (3) The priority of the payment of each Grant as compared with the payment of other Grants which have been or might be made pursuant to the Act.
- (4) A statement that the Director shall not subsequently amend the priority provisions contained in the Commitment Agreement in any way which could materially adversely affect the interests of any Grantee or the holders of any Obligations without the consent of such Grantee and all such holders.
- (5) A statement that neither the faith and credit nor the taxing power of the State of California or any political subdivision thereof is pledged to the payment of the principal of or premium, if any, or interest on the Obligations.
- (6) A representation by the Grantee that it shall use the proceeds of the Grant or the proceeds of the Obligations only for Project Costs of the Project or Projects described in the Commitment Agreement.
- (7) A statement that all construction contracts entered into in connection with the Project shall comply with any applicable provisions of the California Public Contracts Code, the State Building Code as set forth in Title 24 of California Code of Regulations, and any other applicable state law.
- (8) A statement that (i) the Director shall be authorized to review at the Director's discretion, the approved Project or Projects, where the Project or Projects exceed by ten percent (10%) or \$50,000, whichever is lesser, those amounts allocated for the Project or Projects, and (ii) the Director shall take no action that materially adversely affects the owners of any Obligations issued in connection with the Project or Projects.
- (c) The Commitment Agreement shall contain such provisions regarding the right of assignment as may be agreed upon by the parties thereto. NOTE: Authority cited: Section 19596.15, Business and Professions Code. Reference: Sections 19596.5(f)(1), 19596.6(i)(1) and 19596.15, Business and Professions Code.

HISTORY

- 1. New section filed 11–14–88 as an emergency; operative 11–14–88 (Register 88, No. 47). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 3–14–89.
- Certificate of Compliance including amendment of subsection (b)(7) transmitted to OAL 11–30–88 and filed 12–30–88 (Register 89, No. 2).

Chapter 2. Revenue Generating Contracts

Article 1. Vendor Contracts

§ 7010. Requirements for Vendor Contracts at District Agricultural Associations for Annual Fairs and Secondary Fair Events.

- (a) For the purposes of Article 1 of these regulations, the following terms shall have the meanings described below:
- (1) Annual Fair is the primary annual fair event held at an Association fairgrounds.
- (2) Calendar Year means one year from the start date. For example, two Calendar Years starting June 5, 2001 would end June 4, 2003. The two Calendar Years would therefore include two Annual Fairs, even though 2001, 2002, and 2003 are included in the term.
 - (3) Association means District Agricultural Association.
- (4) Secondary Fair Event is an annual fair event produced by an Association, other than the Association's regular annual fair. Examples include, but are not limited to, a holiday fair or spring fair.
- (5) Vendor means a concessionaire (food, beverage, novelty, or other) or commercial exhibitor who promotes and sells their product at an annual fair or Secondary Fair Event.
- (b) Vendor contracts at Association fairgrounds for Annual Fairs and/ or Secondary Fair Events may be for a term of any period up to five Calendar Years.
- (1) A vendor contract prepared for a term of more than one Calendar Year shall be written for an initial one year term, and shall contain language indicating that:
- a. The contract will automatically be renewed annually up to the total term of the contract upon agreement of the vendor and satisfactory performance evaluation by the Association.
- b. The Association reserves the right to adjust the financial terms, concession/exhibit location, and any other terms and conditions each year upon renewal of the contract.
- c. The Association reserves the right to not renew the contract if legislative budget changes occur.
- (2) Prior to entering into a vendor contract that exceeds one year, an Association board shall:
- a. Establish performance measures for annual performance evaluation of vendors whose contract exceeds one year.
- b. Develop termination clause language to be included in vendor contracts that exceed one year.
- c. Develop any other contract terms or conditions that the board deems to be in the best interest of the Association when entering into vendor contracts that exceed one year.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 3965.1, 3965(d) and 4051(a), Food and Agricultural Code.

HISTORY

1. New chapter 2, article 1 (section 7010) and section filed 12–20–2001; operative 1–19–2002 (Register 2001, No. 51).

Article 2. Motorized Racing Contracts

§ 7015. Requirements for Motorized Racing Contracts at District Agricultural Associations.

- (a) For the purposes of Article 2 of these regulations, the following terms shall have the meanings described below:
 - (1) "Association" means District Agricultural Association.
 - (2) "Motorized racing" means oval track racing of motorized vehicles.

- (b) Prior to entering into any motorized racing contracts, an Association Board shall:
- (1) Establish curfew time(s) for all types of motorized racing activities at the Association;
- (2) Establish maximum decibel noise limits per vehicle and procedures for monitoring decibel noise levels for all types of motorized racing activities at the Association;
- (3) Establish penalty measures for a contractor who fails to comply with these limit requirements; and
 - (4) Develop any other contract terms or conditions that the board

deems to be in the best interest of the Association when entering into a motorized racing contract.

(c) The terms, conditions, and penalty measures set forth in §7015(b) shall be included as part of any Association motorized racing contract. NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 3965.1, 3965(d) and 4051(a), Food and Agricultural Code.

HISTORY
1. New article 2 (section 7015) and section filed 7–23–2002; operative 8–22–2002 (Register 2002, No. 30).

- Standards
- -Catfaces, 3:1472.2
- -Color determination requirements, 3:1332, 3:1332.3
- -General provisions, 3:1472
- -Gray wall defect, 3:1333.2
- -"Greenhouse grown," designation, 3:1472.8
- -Green tomatoes, 3:1332.3
- -Growth cracks, 3:1472.1
- -Insect damage, 3:1472
- -Limited use tomatoes, certification, 3:1333
- -Material other than tomatoes, rejection provisions, 3:1332.4
- -Mold, 3:1332.2
- -Percentage chart, official, 3:1338
- -Repackers, registration requirements, 3:1472.7.1
- -Tolerances, 3:1472.3
- -Varietal marking requirements, containers, 3:1472.4
- -"Vine ripened," designation, 3:1472.5
- -Worm damage, 3:1332.1
- Tags, field identification, 3:1331
- Testing, soluble solids, 3:1333.1
- "Vine ripened," designation, 3:1472.5
- Violations, inspection stations, 3:1339.6, 3:1340.4
- Waste disposal, inspection stations, 3:1339.4 Weighing and weighmasters, inspection stations, 3:1339.7
- Worm damage, 3:1332.1

Yellow leaf curl virus, exterior quarantine, 3:3286

TRANSPORTATION

- Apples, 3:1400.12
- Citrus fruits, 3:1430.1
- Deer, transport to slaughter establishment, 3:906.1 Fallow deer, transport to slaughter establishment, 3:906.1
- Fruits and vegetables, 3:1370.15
- Grease, enforcement fees for transporters of inedible kitchen grease, 3:1180.3.1, 3:1180.3.2
- Insects, live, 3:3558 Lettuce, salad products, 3:1438.33
- Livestock
- -Dead or diseased animals See LIVESTOCK
- -Fallow deer, 3:906.1
- Meat and meat processing, 3:1180.41
- Nectarines, 3:1446.13
- Noxious weeds, 3:301
- Pesticides, 3:6670-3:6686
- Plums, 3:1462, 3:1462.1
- Potatoes, 3:1466.3 Poultry, diseased carcasses and parts, 3:1243
- Prunes, 3:1462, 3:1462.1

TREES

- See also specific type
- Deciduous fruit and nut trees, certification, 3:3015-3:3015.5, 3:3069
- Nursery stock
- See generally PLANT NURSERIES
- Oak mortality disease control, 3:3700
- Pome fruit trees, nursery stock certification, 3:3020-3:3020.5, 3:3069

TRIALLATE

Pesticide, groundwater contaminant, 3:6800

Pesticide, usage restrictions, 3:6400

TRIBUTYL PHOSPHOROTRITHIOATE

Cotton harvest aids, usage restrictions, 3:6470

TRIBUTYL PHOSPHOROTRITHIOITE

Cotton harvest aids, usage restrictions, 3:6470

TRIBUTYLTIN

Antifouling paint additive

- -Application requirements, 3:6488, 3:6489
- -Average release rate, 3:6900
- -Dealer requirements, 3:6488, 3:6574
- Cooling water systems
- -Prohibited use, 3:6910

TRICHOMONOSIS

Bovine, 3:820-3:820.8

TRIFLUMIZOLE

Pesticide, groundwater contaminant, 3:6800

TRIFLURALIN

Pesticide, toxic air contaminant, 3:6860

TRUSTS Milk Producer Security Trust Fund, 3:2100-3:2102 -Allocation of handler payments to producers, 3:2042

TUBERCULOSIS

Cattle

- -Interstate movement into state, 3:758-3:758.1

-Mexican imports, testing, 3:755.4-3:755.5 Livestock, disposal of carcasses and parts, 3:905.1

TULARE COUNTY Alligatorweed eradication area, 3:3960

Hydrilla eradication area, 3:3962

TYPHOID Fowl typhoid, 3:784-3:784.2

URTICARIA Hogs, disposal of diseased or adulterated carcasses and parts, 3:905.20

VACCINES

Brucellosis, bovine, 3:752 Livestock lesions, disposal of carcasses and parts,

3:905.8

VALENCIA ORANGES Crop acreage and statistical reporting assessment,

Noxious weeds

See NOXIOUS WEEDS

VERNOLATE Pesticide, groundwater contaminant, 3:6800

VESICULAR STOMATITIS, 3:799

VETERINARIAN, STATE

Quarantine of animals, 3:1301-3:1301.9 See also QUARANTINE

VETERINARIANS

Trichomonosis -Inspection certificates, 3:820.1

VINCLOZOLIN

Pesticide, groundwater contaminant, 3:6800

-Testing and diagnosis approval, 3:820.5

Milk and milk products, additives, 3:624 **VOLATILE ORGANIC COMPOUNDS (VOCs)**

Pesticides, data submission requirements, 3:6191

WALNUTS

Insect pests, exterior quarantine, 3:3273

WARNINGS

Pesticides, 3:6242

- -Field warnings, 3:6776
- -Legibility, 3:6240

WASTE DISPOSAL

Aircraft garbage, 3:770-3:774

- -Collection regulations, 3:772
- -Definitions, 3:770
- -Disposal methods, 3:774
- -License, processing time, 3:300, 3:301
- -Retention and maintenance, 3:771
- -Segregation requirements, 3:773
- -Transportation regulations, 3:772
- -Violations, informal hearings, 3:1310-3:1310.3

Boat garbage, 3:300, 3:301, 3:770-3:774 Definitions

- -Aircraft, 3:770-3:774
- -Boats, 3:770-3:774

Dehydrated garbage, commercial feed ingredient,

Livestock renderers, 3:1180.28

Meat packing plants, 3:1180.28

Swine vesicular exanthema disease, 3:791.1

Tomato inspection stations, 3:1339.4

Vessel and aircraft garbage, 3:770-3:774 -Violations, informal hearings, 3:1310-3:1310.3

WATERMELONS

Maturity testing, 3:1442.11

Standards, 3:1442.12-3:1442.16

- -Discoloration within edible flesh, 3:1442.15
- -Heart cracks, 3:1442.14
- -Overripe, 3:1442.12
- -Rind rot, 3:1442.13
- -White heart, 3:1442.16

WATER POLLUTION AND CONTROL

Cooling water systems

-Tributyltin, prohibited use, 3:6910

Paint, marine antifouling

- -Application regulations, 3:6488, 3:6489
- -Dealer requirements, 3:6488
- -Pesticide, use as
- --Average release rate, 3:6900

Tributyltin

- -Antifouling paints containing
- -- Application regulations, 3:6488, 3:6489
- -- Dealer requirements, 3:6488
- --Pesticide, average release rate, 3:6900
- -Cooling water systems, prohibited use, 3:6910

WEEVILS

Diaprepes Root Weevil

- -Eradication area, 3:3591.19
- -Interior quarantine, 3:3433

Sweet potato weevils

- -Control area, 3:3581
- -Exterior quarantine, 3:3257
- -Interior quarantine, 3:3429

WEIGHTS AND MEASURES

Apricots, 3:1402.8

Commercial feed, 3:2703

Deputy county sealer of weights and measures, qualifications, 3:107

Fruits and vegetables, direct marketing, 3:1392.4 Inspector of weights and measures

See FOOD AND AGRICULTURE DEPART-MENT

Pesticides, 3:6604, 3:6606

Rabbits, meat processing, 3:1607

Sealers of weights and measures, county, 3:106

WELLS

Pesticide application prohibitions, 3:6609

WHEAT

Commercial feed ingredient, 3:2800

Karnal bunt disease

-Eradication area, 3:3637

-Interior quarantine, 3:3430

WILD RICE

Field crop standards, 3:2836

XANTHOSIS

Livestock, disposal of diseased or adulterated carcasses and parts, 3:905.11

Pesticide, toxic air contaminant, 3:6860

Commercial feed ingredient, 3:2801

YOLO COUNTY

Propanil use, 3:6462

YUBA COUNTY

Hydrilla eradication area, 3:3962 Propanil use, 3:6462

Pesticide regulations, exemptions, 3:6147

ZINC PHOSPHIDE

Pesticide, usage restrictions, 3:6400

zoos

Animal food, slaughter regulations, 3:1180.33
